THE EXECUTIVE MANSION was commenced in 1792, and was first occupied in 1800 by John Adams. The architect, Hoban, took his design from the house of the Duke of Leinster in Dublin, and its cost up to date, inclusive of alterations, additions, etc., exceeds \$1,500,000. In spite of its size, 170 x 86 feet, it contains only seven sleeping rooms, the rest being devoted to State and business purposes.

Naples, Italy:

Claims against, by—

Merchants of United States, 598, 1112.

United States, 556, 598, 867, 1109, 1112, 1157.

Extension of time allowed commissioners for settlement of, recommended, 1267.

Minister of United States to, 557.

Treaty with, referred to, 1195.

Narragansett Indians. (See Indian Tribes.)

Nashville Convention.—The Mississippi State convention of 1849 suggested to other Southern States the feasibility of holding conventions to make some public expression on the slavery question and the encroachments of Northern anti-slavery men. Accordingly, a convention was called in Nashville, Tenn., in June, 1850, composed of delegates from all the Southern States. The Wilmot Proviso and the Missouri Compromise were disapproved of by this meeting. Delegates from Texas, Mississippi, and South Carolina advocated open resistance to Federal authority, but more conservative action prevailed. The convention met again in November, but only moderate resolutions were passed.

Nashville (Tenn.), Battle of.—After the battle of Franklin, Nov. 30, 1864, Gen. Schofield retreated to Nashville, closely followed by Hood, who formed his lines near that city Dec. 4. Reinforcements were sent to Thomas at Nashville, swelling his forces to 56,000 men. Dec. 15 Thomas's army advanced against Hood. The day was consumed in maneuvering and skirmishing. There were not many killed or wounded, but the results of the day's operations were the driving of the Confederates from every position held by them and the capture of 16 guns, 1,200 prisoners, 40 wagons, and several hundred stand of small arms. The Union forces bivouacked on the field and renewed the attack the next morning. By 4 o'clock in the afternoon the Confederates were in retreat toward Franklin. They were pursued until Dec. 28, when Hood crossed the Tennessee with the remnants of his army. The loss in killed and wounded was comparatively light, but 53 guns and 4,875 Confederate prisoners were captured.

Nashville, The, mentioned, 6765, 6766, 6767, 6768, 6769, 6836, 6838.

Nassau, Duchy of:

Convention with, 2303.

Exequatur issued consul of, revoked, 3709.

Natchez:

Commissioners of United States assemble in, 186, 192, 236.

Government in, establishment of, recommended, 236.

Natchez, The. (See *General Urret*, The.)

National Academy of Sciences.—The National Academy of Sciences was incorporated under an act of Congress approved March 3, 1863. It was self-created and retains autonomous powers, but derives national character from the provision in the article of incorporation that "the academy shall, whenever called upon by any depart-

ment of the government, investigate, examine, experiment and report upon any subject of science of art, the actual expense of such investigations, examinations, experiments and reports to be paid from appropriations which may be made for the purpose; but the academy shall receive no compensation whatever for any services to the Government of the United States." The first meeting was held April 22, 1863, and Alexander D. Bache was elected president. Originally the membership was limited to fifty. This limit was removed in 1870, but the policy remained exclusive, election being regarded as a dignity conferred in recognition of special scientific work and only five names are considered for each year's election. A stated session is held annually in Washington on the third Tuesday in April, and another is commonly held elsewhere during each autumn. The membership (at present 96 members and 43 foreign associates) comprises many of the leading scientific specialists of the United States who are grouped into committees on (1) mathematics and astronomy, (2) physics and engineering, (3) chemistry, (4) geology and paleontology, (5) biology, and (6) anthropology. There are in addition a number of foreign associates distinguished for scientific attainment. The president is Dr. W. H. Welch of Johns Hopkins University, and Dr. A. L. Day is the Home Secretary.

National Academy of Sciences, commission from membership of, to formulate plans for forestry system, 6167.

National Air.—The tune, or song, adopted, usually by custom, as a musical symbol of the country; as, in England, "God Save the King"; in France, "The Marseillaise"; in the United States, "The Star Spangled Banner." (See *Star Spangled Banner*.)

In all public assemblages it is a custom, amounting to an unwritten law, for all persons to stand when the national air is played or sung; likewise it is the custom, under similar circumstances for all men, when out of doors to uncover. This mark of respect is held so sacred that any one violating it is apt to be roughly treated. This is especially true when the martial spirit prevails. Foreigners, even though not in sympathy with the air being played, are expected to obey this custom as a matter of "courtesy to the host."

National Anti-Imperialistic League. (See *Imperialism*.)

National Anti-Slavery Party.—A party organized in 1833 for united opposition to slavery. It merged into the Liberty Party (q. v.), and finally into the Abolition Party (q. v.).

National Army.—The term applied to the first draft army of 500,000 called to the colors in the war with Germany. (See *Army*.)

National Association of Naval Veterans.—Organized 1887; 6,000 members; 1,500 contributing members; 30 associations in all the principal cities of the United States.

National Bank Circulation:

Act to fix amount of United States notes and, vetoed, 4222.

Discussed by President—
Arthur, 4720, 4766, 4832.

Cleveland, 4926, 5876, 5966, 5986, 6074, 6157, 6175.
Harrison, Benj., 5474.
Johnson, 3563, 3769.
Roosevelt, 7050.

National Bank Examiners, reports of, referred to, 4655.

National Banks. (See Banks, National.)

National Board of Health.—By act of Congress approved March 3, 1879, a National Board of Health was established, consisting of 7 civilian physicians, 1 army surgeon, 1 navy surgeon, 1 surgeon of the Marine-Hospital Service, and 1 officer of the Department of Justice. This board was abolished by law. A national quarantine law was passed June 3, 1879.

National Board of Health:

Establishment of—

Discussed, 4631.

Recommended, 5983.

Report of, transmitted, 4857, 4972.

National Cemeteries. (See Cemeteries, National.)

Establishment of, and number of Union soldiers buried in, discussed, 3649.

National Committee of Patriotic and Defence Societies. (See Preparedness Societies.)

National Conference of Electricians at Philadelphia referred to, 4956.

National Conservation Association. (See Conservation Commission.)

National Debt. (See Debt, Public.)

National Defense:

Discussed by President—

Wilson, 8020.

National Defense Act.—The name of the act of Congress of June 3, 1916, providing for increases in the provisions for the United States Army. (See Army.)

National Food Board.—This was an organization created by and under the Council of National Defence (q. v.), in order to handle as well as possible the problems arising from the food situation of the country, until Congress passed legislation requested by the President in order to make food regulation efficient and official.

National Forests.—President Cleveland, in his fourth annual message, Dec. 7, 1896 (page 6167), reported that the commission appointed from the membership of the National Academy of Sciences to formulate plans for a national forestry system would soon be prepared to present the result of a thorough and intelligent examination of the preservation of the growing timber of the country. McKinley, in his second annual message, Dec. 5, 1898, reported that up to the previous June 30th, thirty forest reservations had been created by executive proclamations (page 6346). These embraced an estimated area of 40,719,474 acres. By the next year he was able to report the addition of some five million acres to the national forest reserves. (Page 6390.) President Roosevelt discusses at length the importance of the preservation of forests and water supply in his first message after assuming the presidency. (Page 6653.) Mr. Roosevelt's strongest

plea for the preservation of our forests is found in his message of Dec. 8, 1908. (Page 7218.)

The great areas contained in the national forests have now been brought to a condition where they are beginning to serve the purposes of the West. The conservation of timber and forage through wise use, and the protection of stream flow, are the means of sustaining many industries which have contributed materially to the prosperity of the country. At the head of the Forest Service are the Forester and the Associate Forester.

The 163 national forests are distributed in six districts, with a District Forester in charge of each, and headquarters as follows: District 1 (Montana, northeastern Washington, northern Idaho, northwestern South Dakota, northern Michigan, northern Minnesota and southwestern North Dakota), Missoula, Mont.; District 2 (Colorado, Wyoming, the remainder of South Dakota, Nebraska and western Kansas), Denver, Col.; District 3 (most of Arizona, Arkansas, Florida, New Mexico and Oklahoma), Albuquerque, N. Mex.; District 4 (Utah, southern Idaho, western Wyoming, eastern and central Nevada and a small portion of northwestern Arizona), Ogden, Utah; District 5 (California and southwestern Nevada), San Francisco, Cal., and District 6 (Washington, Oregon and Alaska), Portland, Ore.

On July 1, 1913, the force employed by the Forest Service numbered 3,791. Of these 3,068 were employed upon the national forests and 723 were engaged in administrative, scientific and clerical work at the Washington and district headquarters. Of the employees on the national forests the force engaged principally in protective work numbered 2,302 men, as follows: Forest Rangers, 359; Assistant Forest Rangers, 888; Forest Guards, 1,053; Game Wardens, 2. The protective force was therefore about one man for every 80,000 acres, or 125 square miles. (Prussia has one man for every 1,700 acres, and Baden one for every 750.)

The branch of silviculture directs the management of the national forests as regards both the systems of cutting mature timber and the work of forest planting; supervises their protection; co-operates with states in developing forest policies adapted to their requirements; co-operates with private forest owners who desire to practice forestry on their lands; and carries on silvicultural investigations of the important species of the United States. In planting within the national forests the primary object is to produce commercial timber, although in a number of cases planting has been done chiefly with the view of reforesting denuded watersheds in order to control and regulate the flow of streams directly supplying cities and towns. During the year ending June 30, 1913, about 30,000 acres in national forests were sown or planted to trees, chiefly Douglas fir, a Western yellow pine, Austrian pine and Engelmann spruce. There are forty Government nurseries which supply the national forests. In the East, forest planting has been done mainly in connection with states and private owners. At the request of the states the Forest Service makes examinations of their forest conditions and conducts other studies needed to serve as a basis for forest legislation and formulation by each state of a forest policy adapted to its special requirements. The service co-operates with private owners, especially small owners, in states which have no State Forester.

The branch of grazing supervises the

grazing of live stock upon the national forests, the principal lines of work being the allotment of grazing privileges. The number of stock grazed during the past season (1913), under permit, was 1,557,118 head of cattle, horses and swine, and 7,867,851 head of sheep and goats. The annual productive value of this number of stock is more than \$20,000,000. The number of persons holding permits to graze live stock during the past year was in excess of 27,000. About 15 per cent of all the sheep in the United States are grazed in the national forests.

The branch of products carries on studies, tests and demonstrations to further the more complete utilization of the products of the forest. A forest products laboratory is operated at Madison, Wis., in co-operation with the University of Wisconsin. In the Western States all products work centres in the district offices at Denver, San Francisco and Portland.

The act of March 1, 1911, commonly known as the Weeks law, provides for the acquisition of forest lands on the watersheds of navigable streams. Its purpose is to promote and protect the navigability of the streams by preserving the forest on the upland portions of their watersheds. Through this act means are afforded of extending the national forest system to regions where the Government has hitherto owned no forest lands and taken no direct part in forest preservation. July 1, 1905, all matters relating to forest reserves passed to the Department of Agriculture.

The original appropriation was \$2,000,000 per year for five and one-half years, beginning with the last half of the fiscal year, 1911. The Agricultural Appropriation bill for the fiscal year, 1913, made the appropriation for 1912 and subsequent years available until expended. Up to July 1, 1913, 5,833,103 acres were reported upon favorably by the Geological Survey. No unfavorable reports have been made.

New York has purchased and set aside 1,642,000 acres in the Adirondack and Catskill Mountains as forest preserves, under the control of the Conservation Commission of the state. These lands and private lands in the preserve counties are protected from fire by an adequate system of rangers.

Pennsylvania has purchased more than 920,000 acres of land for state forest preserves, and the Forestry Commission has the right to purchase additional forest lands at a price not to exceed \$5 an acre. The preserves are situated chiefly on the mountains of the central part of the state and located with special references to protecting the water supply at the sources of rivers.

Minnesota, Wisconsin and Michigan have well organized state forest departments. Minnesota has 51,000 acres reserved, Wisconsin 385,000 acres and Michigan 232,000. These are protected from fire and the open land is being planted and the mature timber cut and sold. Kansas, Connecticut, Ohio, New Hampshire and Vermont also distribute planting material to private owners and give them advice in regard to methods of forest management. The following states have forestry departments which seek to protect from fire by means of an organized warden system all of the greater portion of the forest lands in the state: Maine, New Hampshire, Vermont, Massachusetts, Rhode Island, Colorado, Montana, Idaho, Connecticut, New Jersey, Maryland, West Virginia, Kentucky, Tennessee, Alabama, Oregon, Washington and California.

The following table shows the Timber Disposed of, Quantity, Price, and Number of Users, Revenue Under

Specified Heads, and Details of Grazing Privileges, Year Ended June 30, 1915.

(From Reports of the Forest Service, Department of Agriculture.)

Free timber given:	
Number of users.....	40 040
Timber cut, M ft.....	123,259
Value, dollars.....	206,597
Timber sales:	
Number.....	10 905
Quantity, M ft.....	1,093,589
Price per M ft. (average), dollars.....	2.44
Grazing:	
Area of ranges, acres.....	110,000,000
Kinds of stock—	
Cattle No.....	1,627,321
Goats, No.....	51,409
Hogs, No.....	2,732
Horses, No.....	96,933
Sheep, No.....	7,232,276

Total, No..... 3,010,731

Revenue:

From—

Timber sales, dollars.....	1,164,008.29
Timber settlements, dollars.....	3,180.89
Penalties for timber trespass, dollars.....	7,284.17
Turpentine sales, dollars.....	8,832.64
Fire trespass, dollars.....	660.60
Special uses, dollars.....	167,007.76
Grazing fees, dollars.....	1,124,677.44
Grazing trespass, dollars.....	5,817.56

Total revenue, dollars..... 2,481,469.35

National Forests:

Combining Manzano and Zuni in Arizona and New Mexico, 7987.

National Foundry, erection of, recommended, 1607, 1714.

National Guard.—The enrolled militia of the States is known collectively as the National Guard. (See Militia.)

Encampment of, in coast works recommended, 5476.

Encouragement of, 5550.

Reorganization of, 6672, 6805, 7236.

National Incorporation Act, suggested, 7074, 7455, 7456, 7457, 7458.

National Intelligencer, publication in, of proceedings of President and Cabinet respecting interpretation of reconstruction acts discussed, 3725.

National Monuments.—(See also Statues and Monuments.) By act approved June 8, 1906, the President is authorized to set apart, as National Monuments, certain portions of the land, or landmarks on the land owned and administered by the Government, which may be of historic or scenic interest. There are thirty such monuments which have been set aside for preservation by Presidential order, of which number nineteen are administered by the Interior Department. The Interior Department also administers the more than eighty bird preserves of the Government. (See Interior Department.)

National Museum.—The National Museum is an offshoot of the Smithsonian Institution at Washington, and was organized under the provisions of the act of 1843 creating the parent institution. It is a museum of record, research and education, and the legal depository of all national collections. It is especially rich in American

archæology and natural history, but contains specimens from all over the world. The new building was completed in 1910 at a cost of \$3,500,000. It contains the specimens collected by the scientific expedition into Africa conducted by Ex-President Roosevelt. Through the beneficence of this private enterprise the museum was enriched by specimens of African mammals superior to that of any other museum in the world. The series of birds, reptiles and plants is also of great importance. The additions to the museum consisted of 4,897 mammals, 4,000 birds, 2,000 reptiles and batrachians and 500 fishes, a total of about 11,397. (See illustration, frontispiece, Vol. VIII.)

National Museum, appropriation for, recommended, 4431, 4458.

Referred to, 6676.

National Parks, should be placed under Department of Agriculture, 7604. (See Chickamauga and Chattanooga National Military Park.)

National Parks and Reservations. (See Parks, National.)

National Party.—In 1900 the National Party was organized as the result of defection from the First Liberty Congress (q. v.). Donelson Caffery was nominated for President and M. Howe for Vice President. The platform declared against expansion, but in favor of the Gold Standard, and it was decided that one elector of the National Party should be voted for at the head of either the Republican or Democratic ticket.

National Prison Congress at Baltimore referred to, 4162. (See also International Prison Congress.)

National Republican Party.—After the defeat of John Quincy Adams by Jackson in 1828 the broad-construction wing of the Democratic-Republican party organized and came out with a platform directly opposed to Jackson on the question of the tariff and the United States Bank. They opposed the spoils system in the public service, favored internal improvements at national expense, a bank of the United States, and a division of the proceeds of land sales among the States. In 1832 they supported Henry Clay for the Presidency and advocated a protective tariff. Clay was defeated, receiving but 49 electoral votes, and in 1835 the party, reformed by other elements, took the name of Whig.

National Rivers and Harbors Congress.—This body consisted of about three thousand delegates, representing nearly all the states and territories. Processions were held in Washington for a period of three days in the latter part of 1908.

National Security League. (See Preparedness Societies.)

National Shipping Board. (See United States Shipping Board.)

National Silver Party.—Organized in 1896; nominated William Jennings Bryan for President and Arthur Sewell for Vice President (the candidates on the Democratic ticket). The platform adopted followed generally the lines of the Democratic platform.

National University.—Washington strongly disapproved of foreign education for American youth and early conceived the idea of establishing a national university

in the central part of the United States. He bequeathed fifty shares of the Potomac Company toward the endowment of such an institution in the District of Columbia, but ultimately the stock of the company proved valueless. Several of the presidents from time to time in their messages recommended the establishment of a national university or universities, or, as they sometimes called them, "seminaries of learning."

National University (see also Education; Seminaries of Learning):

Establishment of, recommended, 58, 194, 197, 398, 470, 553, 878, 4208.

Lands, donation of, to, recommended, 398, 470, 4208.

National Waterways Commission.—A special commission created by Congress in 1909, and the membership of which was drawn entirely from Congress, to make an investigation of transportation by water, and to make recommendations to Congress. It was largely the result of the Lake-to-the-Gulf Deep Waterway Association (q. v.), and of the National Rivers and Harbors Congress (q. v.).

National Zoological Park referred to, 6674.

Nationality.—Federal and not state law determines the status of the nationality of persons in the United States. Until the adoption of the Fourteenth Amendment, the Constitution established no rules regarding the loss or acquisition of nationality. Birth in the country is, as a rule, the test, but not all persons born in the United States are considered as endowed with nationality. The naturalization act of 1790 extended nationality to children born to American parents beyond the sea. In 1855 an act passed restricting this to children whose fathers were citizens. The Civil-Rights Act (q. v.) of 1866 declared "all persons born in the United States and not subject to any foreign power" to be citizens of the United States. The Fourteenth Amendment defines citizens as "all persons born or naturalized in the United States and subject to the jurisdiction thereof." The citizens of Hawaii became citizens of the United States by virtue of annexation, it being so stated in the act of Congress of 1900 which made Hawaii a Territory. The inhabitants of the Philippine Islands and Puerto Rico are entitled to the protection of the Constitution but cannot enjoy the privileges of citizenship until Congress admits their countries to the Union as states or organizes them as territories.

Nations, Congress of. (See under Panama, Isthmus of.)

Nations, Foreign. (See Powers, Foreign; the several powers.)

Native Birds, reservation established for, on Smith Island, 7959.

Natural Rights.—The rights which by nature inhere in man (as distinguished from the rights given by law) such as life, liberty and the pursuit of happiness. (See Declaration of Independence, Volume I, page 1.) The right to these blessings does not carry with it the power to secure them, but government must be formed to establish guarantees of natural rights by the enactment of positive law.

Naturalization.—The investment of an alien with the rights and privileges of citizenship. Section 8 of Article I. of the

Naturalization Messages and Papers of the Presidents

Constitution empowered Congress "to establish a uniform rule of naturalization." Naturalization laws were passed by the colonial legislatures of Maryland, Virginia, New York, South Carolina and Massachusetts between 1666 and 1715. In 1740 the British Parliament enacted a law regulating colonial naturalization. In 1790 Congress legislated for the first time so as to provide for uniformity of naturalization under the Constitution. The conditions of this law were that any free white alien might be admitted to citizenship by any court of record of the state in which he has resided for one year, having been a resident of the United States two years. An act of 1795 required five years' residence and application three years prior to naturalization; that of 1798 required fourteen years' residence and application five years prior to naturalization. The act of April 14, 1802, restored the conditions of the act of 1795 and required a proof of five years' residence in the United States and one in the state, good character, an oath of allegiance, and a renunciation of titles and prior allegiance. No alien may be naturalized if his country is at war with the United States. Conditions and procedure in naturalizing an alien are prescribed by sections 2103-2174 of the Revised Statutes of the United States. Naturalization of Chinese is prohibited by section 14, chapter 126, laws of 1882; and of anarchists by the immigration act of 1903. Naturalized citizens of the United States receive the same protection when abroad as native-born citizens. (See also Expatriation.)

The following paraphrase and condensation of the naturalization laws of the United States have been revised by the Commissioner of Naturalization of the Department of Labor, and includes such minor changes in the law as were provided by the recent amendments embodied in the act of Congress, approved June 25, 1910.

The following courts alone have the power to naturalize aliens: United States District Courts now existing, or which may hereafter be established by Congress in any state, United States District Courts for the Territories of Hawaii and Alaska, also all courts of record in any state or territory now existing, or which may hereafter be created, having a seal, a clerk and jurisdiction in actions at law or equity, or law and equity, in which the amount in controversy is unlimited.

The power to naturalize, conferred upon the above mentioned courts, is limited to persons residing within the geographical limits over which their respective jurisdiction extends.

Any alien who is a white person, or of African nativity or African descent, is required, if he desires to become naturalized, to file a declaration of intention in the clerk's office of any court having jurisdiction over the place in which he lives, and such declaration may not be filed until the alien has reached the age of eighteen years. This declaration must contain information as to the name, age, occupation, time and place of arrival in the United States, and must further show that it is the declarant's *bona fide* intention to become a citizen of the United States and to renounce forever all allegiance and fidelity to any foreign prince, potentate, state or sovereignty, and particularly to the one of which he may be at the time a citizen or subject.

Any alien, of the age of twenty-one years and upward, who has served five consecutive years in the United States navy or one enlistment in the United States marine corps, may be admitted to citizenship without any previous declaration of intention.

The widow and children who are under

age at the time that an alien who has made his declaration of intention has died, without having secured a certificate of naturalization, are also exempted from the necessity of filing a declaration of intention.

By act of June 25, 1910, any person who on May 1, 1905, was an inhabitant for five years and qualified to become a citizen of the United States and who for the five years preceding May 1, 1910, had resided in the United States continuously and who, because of misinformation in regard to his citizenship, had in good faith exercised the rights and duties of a citizen of the United States because of wrongful information and belief, may, upon proof of these facts satisfactory to a court having jurisdiction to naturalize aliens, petition for naturalization without filing the required declaration of intention upon compliance with the other requirements of the law.

Not less than two years after an alien has filed his declaration of intention, and after not less than five years' continuous residence in the United States, he may file a petition for citizenship in any one of the courts above stated which has jurisdiction over the place in which he resides, provided he has lived at least one year continuously, immediately prior to the filing of such petition, in the state or territory in which such place is located. This petition must be signed by the petitioner in his own handwriting and shall give his full name, place of residence, occupation, place of birth and the date thereof, the place from which he emigrated, and the date and place of his arrival in the United States. If such arrival occurred subsequent to the passage of the act of June 29, 1906, he must secure a certificate from the Department of Labor showing the fact of such arrival and the date and place thereof, for filing with the clerk of the court to be attached to his petition. If he is married he must state the name of his wife and, if possible, the country of her nativity and her place of residence at the time of the filing of his petition, and, if he has children, the name, date and place of birth and present place of residence of each living child. The petition must set forth that he is not a believer in or opposed to organized government, or a member of or affiliated with any organization or body of persons teaching disbelief in or opposition to organized government; that he is not a polygamist or a believer in the practice of polygamy, and that he absolutely and forever renounces all allegiance and fidelity to any foreign country of which he may, at the time of filing such petition, be a citizen or subject. This petition must be verified at the time it is filed by the affidavit of two credible witnesses, who are citizens of the United States and who shall state that they have known the petitioner during his entire residence in the state in which the petition is filed, which must be not less than one year, and that they have known him to be a resident of the United States continuously during the five years immediately preceding the filing of the petition; that during such time he acted as a man of good moral character, attached to the principles of the Constitution of the United States and well disposed to the good order and happiness of the same. If a portion of the five years has been passed by the petitioner in some other state than that in which he resides at the time of filing his petition the affidavit of the witness may verify so much of the petitioner's residence as has been passed in the state, and the portion of said five years' residence out of the state may be shown by depositions at the time of hearing on the petition.

No petition may be heard until the expiration of at least ninety days after it is filed nor within thirty days preceding a general election. At the hearing upon a petition, which shall be a date fixed by order of the court, the witnesses are required to again attend and testify in open court so that the judge or judges thereof may be satisfied that the petitioner is qualified and that he has complied with all the requirements of the law.

An alien who has borne a hereditary title or been a member of an order or nobility must renounce such title or position expressly before becoming naturalized. No alien may become naturalized, if physically capable, who does not speak the English language.

Aliens who are admitted to citizenship by order in open court will be required to take the oath of allegiance and thereafter will be entitled to a certificate of naturalization.

The law also provides as to those persons who, though not citizens, owe permanent allegiance to the United States, and who may become citizens of any state or organized territory of the United States, that they may be naturalized upon compliance with all the requirements of the law, except that they will not be called upon to renounce allegiance to any foreign sovereignty.

At the time of filing his declaration of intention an alien is required to pay to the clerk of the court a fee of one dollar. At the time of filing a petition for naturalization a petitioner is required to pay to the clerk of the court a fee of four dollars.

The naturalization of Chinamen is expressly prohibited by Sec. 14, Chap. 126, Laws of 1882.

Naturalization:

Act on subject of uniform rule of, vetoed, 508.

Discussed by President—

Adams, John, 248.

Nautical Almanac.—The Ephemeral and Nautical Almanac of the United States Navy Department was first published in 1853. It contains tables indicating the rising and the setting of the sun, moon and stars, with various astronomical observations of importance to mariners, including announcements of eclipses. It contains data for finding latitude and longitude, and its ephemerides are calculated for both the meridian of Washington and the meridian of Greenwich. It is published three years in advance of the year with which it deals, so that all the information it contains may be used on the longest voyages. (See Navigation.)

Navajo Indians. (See Indian Tribes.)

Naval Academy. (See Navy, Department of.)

Naval Academy.—An institution for the training of naval officers, founded at Annapolis, Md., in 1845, through the efforts of George Bancroft, then Secretary of the Navy. The Academy was not established by formal legislation of Congress, but was opened in October, 1845, under orders from the Secretary of the Navy. It was

not until Aug. 10, 1846, that Congress took any action toward the encouragement of the enterprise. At that time \$28,000 was appropriated for repairs, improvement and instruction, and the following year a like sum was appropriated. In 1850 the school was reorganized and the name changed to the United States Naval Academy. At the outbreak of the Civil War the Academy was removed to Newport, R. I., where it remained until the summer of 1865, when it was re-established at Annapolis.

The Naval Academy is under the jurisdiction of the Bureau of Navigation of the Navy Department and in the immediate control of an academic board, consisting of a superintendent, who is a naval officer; a commandant of cadets, and the heads of the different departments of study, who are, with one exception, naval officers.

The students of the Naval Academy are called Midshipmen. Two Midshipmen are allowed for each Senator, Representative and Delegate in Congress, two for the District of Columbia, and five each year from the United States at large. The appointments from the District of Columbia and five each year at large are made by the President. One Midshipman is allowed from Porto Rico, who must be a native of that island. The appointment is made by the President, on the recommendation of the Governor of Porto Rico. The Congressional appointments are equitably distributed, so that as soon as practicable each Senator, Representative and Delegate in Congress may appoint one Midshipman during each Congress.

The course for Midshipmen is four years at the Academy, when the succeeding appointment is made, and the examination for graduation takes place. Midshipmen who pass the examination for graduation are appointed to fill vacancies in the lower grade of the Line of the Navy, in the order of merit as determined by the Academic Board of the Naval Academy.

The act of June 29, 1906, prescribes that the Secretary of the Navy shall, as soon as possible after June 1 of each year preceding the graduation of Midshipmen in the succeeding year, notify in writing each Senator, Representative and Delegate in Congress of any vacancy that will exist at the Naval Academy because of such graduation, and which he shall be entitled to fill by nomination of a candidate and one or more alternates therefor. The nomination of candidate and alternate or alternates to fill said vacancy shall be made upon the recommendation of the Senator, Representative or Delegate, if such recommendation is made by March 4th of the year following that in which said notice in writing is given, but if it is not made by that time the Secretary of the Navy shall fill the vacancy by appointment of an actual resident of the State, Congressional District or Territory, as the case may be, in which the vacancy will exist, who shall have been for at least two years immediately preceding the date of his appointment an actual and bona fide resident of the State, Congressional District or Territory in which the vacancy will exist, and of the legal qualification under the law as now provided.

Candidates allowed for Congressional Districts, for Territories, and for the District of Columbia must be actual residents. Candidates at the time of their examination must be physically sound, well formed and of robust constitution. Attention will also be paid to the stature of the candidate, and no one manifestly under size for his age will be received at the Academy. The height of candidates for admission shall

not be less than 5 feet 2 inches between the ages of 16 and 18 years, and not less than 5 feet 4 inches between the ages of 18 and 20 years; and the minimum weight at 16 years of age shall be 100 pounds, with an increase of not less than 5 pounds for each additional year or fraction of a year over one-half. Any marked deviation in the relative height and weight to the age of a candidate will add materially to the consideration for rejection. Candidates must be unmarried, and any Midshipman who shall marry, or who shall be found to be married, before his graduation, shall be dismissed from the service. All candidates must, at the time of their examination for admission, be between the ages of 16 and 20 years. The pay of a Midshipman is \$600, beginning at the date of admission. The regulations regarding places and times of examinations and subjects of examinations may be obtained by addressing the Chief of the Bureau of Navigation, Navy Department, Washington.

The Sixty-third Congress, upon the recommendation of the Navy Department, continued the law which had expired by limitation providing for the appointment of two midshipmen by each member of Congress, and the Sixty-fourth Congress, as the first act in larger preparedness, passed the bill giving three appointments to each Senator or Representative. This made possible an increase of 531 midshipmen in a year.

President Wilson signed, Feb. 16, the first of the national defense bills. One increased the entrance class at the Naval Academy.

Naval Academy:

Address to class of 1914 by President Wilson, 7949.

Appropriation for paving sidewalk at, recommended, 4671.

Board of Visitors to, report of, referred to, 3587.

Discussed, 2669, 3386.

Establishment of, recommended, 876.

Instruction at, should be more practical, 7117.

Naval Coast Defence Reserve. (See Naval Reserve.)

Naval Code. (See Code.)

Naval Code, revision of, 2625.

Naval Communications Service. (See Radio Service.)

Naval Consulting Board.—The Naval Consulting Board was organized in July, 1915, by Secretary of Navy Josephus Daniels. It is composed of members selected by the leading scientific societies of the United States, and it is headed and directed by Thomas A. Edison. Although it advises the Navy Department on all matters of importance in the development of the Navy, it is concerned especially with new inventions, which it investigates and on which it reports, and with plans for industrial prepara-

tion for naval purposes, in which work it is assisted by branch committees in all the states of the Union. It also conducts a laboratory in experimental and research work, in order to study all new developments in naval warfare. The personnel of the Board at its organization was as follows: Thomas A. Edison, Lawrence Addicks, A. L. H. Backeland, H. E. Coffin, Alfred Craven, W. L. Emmett, Cooper Hewitt, A. M. Hunt, B. G. Lamme, Hudson Maxim, Spencer Miller, J. W. Richards, A. L. Riker, Thomas Robins, W. L. Saunders, M. B. Sellers, E. A. Sperry, F. J. Sprague, B. B. Thayer, A. G. Webster, W. R. Whitney, H. A. W. Wood, R. S. Woodward. (See Navy; Navy Department.)

Naval Courts of Inquiry, 892.

Naval Expeditions. (See Arctic Expeditions; Exploring Expeditions.)

Naval Militia.—In 1888 Congress passed an act authorizing the maritime states to organize a naval reserve, to be trained and fitted for operating the coast and harbor defense vessels, etc., in time of war, thus liberating the regular naval force to man the heavy seagoing war ships, etc. Massachusetts was the first state to pass laws providing for such organization. New York took similar action, and by 1898 most of the maritime states had regularly organized naval militia. The first appropriation for the equipment of the force was \$25,000, made by Congress in 1891. The naval militia is now organized in twenty-two states and in the District of Columbia.

The reported strength in 1913 was 586 commissioned officers, 32 warrant officers, 1,639 petty officers and 5,269 enlisted men, a total of 7,526.

All matters relating to the Naval Militia come under the cognizance of the Assistant Secretary of the Navy, who transacts all business with the Naval Militia through the Governors and Adjutants-General (or Quartermasters-General) of the states. The officer in the Navy Department, Washington, having charge of Naval Militia matters is Commander F. B. Bassett, Jr., U. S. N.

Naval Militia, development of, discussed, 5759, 6166, 6669.

Naval Observatory.—A division of the Bureau of Equipment of the Navy Department. Its functions are to determine accurately the positions of the sun, moon, planets and the earth for use in preparing the *Nautical Almanac*; to test chronometers and to issue correct time daily; to distribute to vessels of the navy instruments of precision for navigating purposes; to conduct astronomical investigations of general and special scientific interest, and, since 1894, to publish the *Nautical Almanac*.

In 1830 the Navy Department established a depot of charts and instruments in charge of Lieutenant L. M. Goldsborough, and he mounted a 3-inch transit instrument. In 1833 Lieutenant Wilkes moved the depot to a site on Capitol Hill, and at his own expense built an observatory containing a transit instrument of 3½ inches aperture and 63 inches focal length; a Borda's circle; a 34-foot achromatic portable telescope; a portable transit instrument; and a sidereal clock. In 1838 the Secretary of the Navy granted authority for the purchase of all necessary supplies for making a constant series of observations in astronomy, magnetism and meteorology, and detailed naval officers to the work under the instructions of Lieut. J. M. Gilliss.

The new equipment then installed consisted of a sidereal clock and a mean time clock; a meridian circle of 5.5 inches aperture furnished with a circle 5.0 inches in diameter; a portable achromatic telescope of 3½ inches aperture and 42 inches focal length. Berlin, Paris, Greenwich and Vienna presented some 200 rare volumes of the highest standard as the nucleus for an astronomical library. The work done at Capitol Hill between 1838 and 1842 was published as *Astronomical Observations Made at the Naval Observatory*, being the first American work of this nature.

In 1842 Congress, through the efforts of Lieut. Gilliss, authorized the erection of a new observatory. Lieut. Maury was placed in charge of the new establishment and gained an international reputation through his studies of ocean currents and other hydrographic and nautical subjects. He was succeeded in 1861 by Lieut. Gilliss and later by Charles H. Davis and John Rodgers.

Among the earliest scientific achievements of the new observatory were the observations of the planet Neptune, secured in 1846, immediately after its discovery, which enabled Sears C. Walker, by identifying two older foreign observations, to discuss the elements of Neptune during his short connection with the observatory. The adaptation of electricity to record observations by Prof. John Locke, formerly lieutenant in the navy, resulted in the installation of the first practical chronograph at the observatory in 1849. With the 9.6-inch equatorial Assistant Astronomer James Ferguson discovered several planetoids between 1854 and 1860. With the 26-inch refractor (made by Alvan Clark), at that time the largest telescope in the world, Prof. Asaph Hall discovered the moons of Mars in 1877. This instrument was set in place in time to observe the transit of Venus in 1874.

The present observatory buildings on the more favorable site of Georgetown Heights were completed in 1893. They comprise a commodious office building occupied by the astronomical, nautical instrument, time service and *Nautical Almanac* departments, while the 26-inch equatorial, a 9-inch and a 6-inch transit circle, and a 5-inch prime vertical instrument are placed in suitable dome and houses to the south, east, west and north of a clock house, the longitude of which is 5h. 5m. 15.78s. west and the latitude 38° 55' 14" north. Besides the above-named instruments there are a 12-inch equatorial, a 6-inch altazimuth, a 5-inch transit, a 5-inch photoheliograph.

Although one of the youngest among the great astronomical institutions, it has developed in a short time to a rank with those at Greenwich and Pulkowa. Its object is rather the development and application of the known facts of astronomy than the making of further discoveries. Professors Newcomb and Hall, of the older scientific staff of the institution, have recently been succeeded by Professors Skinner, Sec. Updegraph, Eichelberger, Littell and Harschmann. The library now contains some 22,000 volumes and stands second to Pulkowa only.

Naval Observatory:

Naval Officers. (See Navy.)

Naval Order of the United States.—Composed of a General Commandery and commanderies in the States of Massachusetts, Pennsylvania, New York, California and Illinois, and in the District of Columbia. The General Commandery meets triennially on Oct. 5th, and the State Commanderies meet annually in the month of November. The Massachusetts Commandery is the parent Commandery, and was organized at Boston on July 4, 1890. The General Commandery was established three years later, on June 19, 1893. The Companies of the Order are officers and the descendants of officers who served in the navy and marine corps in any war or in any battle in which the said naval forces of the United States have participated. The membership clause, as adopted at the triennial congress held at Boston, Oct. 5, 1895, provides for two classes of members: First, veteran officers and their male descendants; and, second, enlisted men who have received the United States naval medal of honor for bravery in the face of the enemy.

Naval Parade, to be held in New York Harbor, 5760.

Naval Peace Establishment. (See Navy.)

Naval Pension Fund. (See Pensions.)

Naval Reserve.—By act of Congress, approved August 29, 1916, provision was made for the establishment of a naval reserve in the United States Navy. Under this head, the act created six classes of service: Fleet Naval Reserve, Naval Reserve, Naval Auxiliary Reserve, Naval Coast Defence Reserve, Volunteer Naval Reserve, and Naval Reserve Flying Corps. The same act also provided for the establishment of a Marine Corps Reserve. The legislation provides for a naval reserve force embracing all former officers and men of the navy now in civil life, the officers and men of the merchant marine, and civilians capable of serving the navy in connection with the defense of the coasts. After 16 or 20 years of service, enlisted men may transfer from the active list to the Naval Reserve. It is estimated that at the time of the passage of the act, it provided for a reserve force of 20,000 men, and that after a few years that number will have increased to 30,000 men.

Pay.—In the Fleet Naval Reserve, officers receive 2 months' base pay of their rank; and men of 4 years' service, \$50 a year; men of 8 years' service, \$72 a year; and men of 12 years' service, \$100 a year. Pay is increased 25% for each enrollment. In the Naval Auxiliary Reserve, officers receive 1 month's base pay of their rank, and men 2 months' base pay of their rating, with a 25% increase for each enrollment. Men in the Volunteer Naval Reserve receive no pay. In all other classes, officers and men receive 2 months' base pay of their rank or rating. Enlisted men who transfer to the Naval Reserve after 16 or 20 years' service receive between \$40 and \$60 per month.

Service.—Members of the Naval Reserve may be ordered into actual service in the Navy by the President in time of war or national emergency. Enrollment and reenrollment are for terms of four years, but in times of peace or of no national emergency members of the Naval Reserve shall be discharged at their request, provided that they reimburse the Government for any clothing gratuities which may have been furnished them during their enrollment. Members upon enlisting are assigned ranks according

to their qualifications for service, which are determined by examinations. In time of actual service, all members of the Naval Reserve shall be subject to the same regulations as apply to the enlisted men in the Navy, and their pay during time of actual service shall be equal to that of enlisted men and officers in the regular service of the Navy of corresponding grade.

Divisions.—In the Fleet Naval Reserve, all former officers, including midshipmen, of the Naval Service, who have been honorably discharged after not less than one four-year term of enlistment, are eligible. In the Naval Reserve, men between the ages of eighteen and thirty-five who have followed the sea-going profession are eligible. In the Naval Auxiliary Reserve, those eligible are men who have been or who are engaged on vessels of the American merchant marine which have been listed by the Navy Department as suitable for service in time of war. The Naval Coast Defence Reserve is reserved for those citizens who may be of especial value to the Navy Department in connection with the defense of the coasts. Those citizens who are willing to serve in the Naval Reserve without retainer pay and uniform gratuity in time of peace are eligible to the Volunteer Naval Reserve. The Naval Reserve Flying Corps is composed of those persons who are skilled in the designing, building, or operating of aircraft. The Marine Corps Reserve is divided into classes corresponding to the first five classes listed above.

Naval Reserve Flying Corps. (See Naval Reserve.)

Naval Reserve, National, establishment recommended, 6669.

Naval Stations.—Naval bases or shore stations are ports on home or foreign shores owned or leased by the government, where fuel and supplies are stored, and which are regularly visited by vessels on cruise. Recruiting and instruction are also carried on at these stations, and they form the bases for sea manœuvres. Following are the locations of the permanent stations at home and abroad:

Annapolis, Md. (naval academy); Baltimore, Md. (recruiting station); Boston, Mass. (yard and recruiting station); Charleston, S. C. (yard and barracks); Great Lakes, Ill. (training station); Indian Head (proving ground); Key West, Fla.; Las Animas, Colo. (hospital); Mare Island, Cal. (yard, barracks, prison, iron works); Narragansett Bay, R. I. (training station); New York, N. Y. (Brooklyn yard); Norfolk, Va. (Newport News yard); Philippine Islands (Olongapo, Cavite, Canacao); Panama (Canal Zone); Pensacola, Fla.; Philadelphia, Pa. (recruiting station, home, hospital, etc.); Port Royal, S. C. (disciplinary barracks); Portsmouth, N. H. (yard, iron works, hospital, etc.); Puget Sound (Bremerton, Wash., dock, etc.); San Francisco, Cal.; Washington, D. C. (administrative dept.); Guam; Guantanamo, Cuba; Hawaii, H. I.; Tutuila, Samoa; Yokohama, Japan.

Navigation Act.—An important move in England's struggle with the Dutch for possession of the carrying trade of the world. The act was first promulgated in 1645, amplified in 1650, and renewed with a few changes by Charles II. in 1660. It related to five subjects—coasting trade, fisheries, commerce with the colonies, commerce with European countries, and commerce with Asia, Africa and America. The clauses of importance to American history were those providing that all colonial trade should be carried on in ships built and owned in England and the colonies and that in the case of many specified goods trade should

be confined to English markets. The former clause acted as a powerful stimulant to colonial shipbuilding. The act was rendered largely inoperative by the prevalence of smuggling, and the efforts of Great Britain to enforce it were among the leading causes of the Revolution.

Navigation, Bureau of, Navy Department. (See Bureau of Navigation.)

Navigation Laws.—The Constitution gives Congress power to pass navigation laws in accordance with the principles of international law. By act of 1789 a tonnage tax of 6 cents per ton was levied on all American vessels and one of 50 cents a ton

on all vessels built and owned in foreign countries and entering American ports, which practically gave a monopoly of American trade to American bottoms. In 1792 the act requiring American registration was passed. In 1793 the coasting trade was closed to foreign vessels. In 1816, 1817 and 1820 the American navigation laws were remodeled and made to correspond closely to those of Great Britain. Tonnage taxes, which had been abolished, were renewed at the outbreak of the Civil War. With the advent of iron vessels came the decrease in American shipbuilding and the decrease in the American marine was further due to the law forbidding any but American-built ships to fly the American flag. This restriction was, however, modified by the act of 1892. The act of 1886 reduced the tonnage rates considerably. (See Seamen's Act.)

Navigators Islands. (See Samoan Islands.)

Navy.—During the Revolution this country had practically no navy. In September, 1775, the British troops, closely environed in Boston, could receive supplies only by water. To intercept these Washington detailed certain of his officers and men who were familiar with nautical matters to patrol Boston Harbor in small armed cruisers. Some of the states had already constructed vessels at public expense to protect their coast line. New England seamen cruised with such effect in Massachusetts Bay as not only to deprive the British garrisoned in Boston of their necessary supplies, but also to add to the resources of the Continental Army by the capture of numerous prizes. At the end of 1775 the Continental Congress began the construction of a navy by ordering thirteen frigates to be built. These performed some service, but most of the achievements of the war were by privateers. By 1781 all of the thirteen Federal vessels had been either captured or destroyed.

In 1797 and 1798, in anticipation of war with France, Congress authorized the construction of the *Constitution*, *United States*, and *Constellation* and the purchase of twenty-four other vessels. Hostilities with France having been averted, the newly acquired navy was used with good effect in resisting the Barbary States. At the outbreak of the War of 1812 the United States had about a score of vessels, three of them being first-class frigates—the *Constitution*, the *President*, and the *United States*—as against England's 830. The brilliant achievements of American vessels in that war secured increased appropriations. In 1816 \$1,000,000 annually for eight years was appropriated.

By the law of 1819 the Navy was largely increased and a resolution provided for naming ships of the line after the states, frigates after the rivers of the United States, and sloop of war after the chief cities and towns. The vessels were divided among four squadrons and stationed in the Mediterranean, the Pacific, the West Indies, and on the coast of Brazil, and in 1841 an additional squadron was ordered to cruise along the coast of the United States. During the Mexican War the Gulf Squadron blockaded Vera Cruz and bombarded the fort of San Juan de Ulloa into submission, while the Pacific Squadron seized Monterey and Los Angeles, Cal.

At the outbreak of the Civil War the United States had only about forty vessels in commission. The character of naval warfare at this time had been changed by improved armament. The old wooden

vessels were useless when opposed by the Whitworth and other modern guns of long range and heavy caliber. The turreted ironclad was born of the emergency. A new navy had to be constructed in order to maintain the blockade of Southern ports, and by Jan. 1, 1864, the National Government had over 600 vessels, seventy-five of them ironclads, with more than 4,600 guns and 35,000 men. After the war the Navy was reduced. Notwithstanding the appropriation of large sums of money, 1882 found the United States in possession of only 140 vessels, and more than 100 of these were incapable of sea service.

Soon after this date a new policy regarding the Navy was inaugurated and has since been pursued with credit and honor to the nation.

The most important navy yard is at Brooklyn, on the East River, where there are four dry docks, a clothing factory where naval uniforms are made for enlisted men, and other adjuncts. (See Navy Yards and Naval Stations.)

The officers of the navy are trained for their profession at the United States Naval Academy at Annapolis (which see).

Target Practice.—So necessary is target practice considered for the efficiency of the United States Navy that there exists a separate division of Target Practice in the Navy Department (q. v.). Up to 1903, target practice in the Navy was at the short range of about a mile, as naval experts were almost unanimous in the opinion that naval battles could never be fought at distances greater than two or three miles. The range of target practice was gradually increased until the outbreak of the European War showed that naval battles could be fought at great distances, and in recent target practices of the United States Navy the range has been thousands of yards. In the practices off Guantanamo in February, 1916, the ships of the Navy averaged 11% of hits at battle distance. Ships of the dreadnought class, aiming at screen targets 90 feet long and 30 feet high, made 7% of hits at long battle distance and 21% of hits at mean battle distance. Secretary of the Navy Daniels reports that these records are believed not only to have equalled, but even to have bettered the best records made in the European War.

Salutes.—It is the custom of foreign ships of war entering the harbor, or in passing in the vicinity of a fort, to hoist at the fore the flag of the country in whose waters they are and salute it; on the completion of the salute to the flag, a salute (of twenty-one guns) is returned as soon as possible by the nearest fort or battery; if there are several forts or batteries in sight, or within the radius of six miles, the principal fort returns the salute. The Presidential salute of twenty-one guns was adopted that a uniformity in national salutes might be maintained, it being the same number of guns as the royal salute of England. The reason why twenty-one should have been selected as the number of guns has been a source of search and guess, with no satisfactory results. Of the many surmises, the two carrying the most weight of opinion are: First, that twenty-one was the same number of years fixed by English law as the age of majority; the second, that seven was the original salute, and three times seven would signify one seven for each of the divisions, England and Wales, Scotland, and Ireland. It is also asserted that the United States adopted this salute to signify to the mother country that her child had reached its majority, and was prepared, in law, to

inherit the land; and to this end fired the "gun of 1776," the figures of which year added together equal twenty-one. The salutes given in addition to the Presidential salute are as follows: To the Vice-President of the United States and the President of the Senate, 19 guns; members of Cabinet, Chief Justice of United States, Speaker of the House of Representatives, 17 guns; rear-admiral, 13 guns; commodore, 11 guns; captain, 9 guns; to a sovereign or chief magistrate of any foreign country, 21 guns; to the heir apparent or consort of a reigning sovereign, 21 guns. A salute in accordance with their rank is also given to the viceroy, governor-general or governors of provinces belonging to foreign states, to ambassadors extraordinary and plenipotentiary, to envoys extraordinary and plenipotentiary, to ministers resident accredited to the United States, to chargés d'affaires in charge of missions in the United States, to consuls-general accredited to the United States, and to officers of foreign services.

The war with Spain brought the importance of the navy into prominence, and resulted in a general desire for its enlargement, for it became evident that if this country should be attacked by a foreign power, that attack would be by sea; and the true method of defense would be by means of a navy that could meet the enemy, pursue and destroy them on the seas, not by means of mere harbor de-

fenses. The rapidity of this enlargement can be judged by the comparative expenses. For the year ending June 30, 1897, the year before the war with Spain, the cost of the navy was \$34,561,546; and for the year 1904 the cost was \$102,956,102.

All officers paid under this table, below the rank of Rear-Admiral, are entitled to 10 per cent. increase upon the full yearly pay of their grades for each and every period of five years' service as "longevity pay," computed upon their total actual service in the Navy or Marine Corps, provided that the total amount of such increase shall not exceed 40 per cent. upon the full yearly pay of their grade.

All officers on sea duty and all officers on shore duty beyond the continental limits of the United States shall while so serving receive ten per centum additional of their salaries and increase as above provided, and such increase shall commence from reporting for duty on board ship or the date of sailing from the United States for shore duty beyond seas or to join a ship in foreign waters.

Warrant officers (boatswains, gunners, carpenters, sailmakers, pharmacists, machinists and pay clerks) are paid from \$1,125 to \$2,250 a year.

Commandants' clerks receive from \$1,000 to \$1,800 a year.

The present status of the vessels of the Navy is given in the following table:

SHIPS OF THE UNITED STATES NAVY—VESSELS BUILT.

¹Gallons fuel oil.

Submarines.—A-2, A-3, A-4, A-5, A-6, A-7, authorized June, 1900; B-1, B-2, B-3, C-1, authorized April, 1904; C-2, C-3, C-4, C-5, D-1, D-2, D-3, authorized June, 1906; E-1,

E-2, F-1, F-2, F-3, G-1, G-4, authorized May, 1908; H-1, H-2, H-3, authorized March, 1909; K-1, K-2, K-3, K-4, authorized June, 1910; K-5, K-6, K-7, K-8, authorized March, 1911. G-2, G-3, L-1, L-2, L-3, L-4, L-5, L-6, L-7, L-8, L-9, L-10, L-11, M-1, Schley (fleet submarine), N-1, N-2, N-3, N-4, N-5, N-6, N-7, 30, 61 (fleet submarines), O-1, O-2, O-3, O-4, O-5, O-6, O-7, O-8, O-9, O-10, O-11, O-12, O-13, O-14, O-15, O-16.

UNSERVICABLE FOR WAR PURPOSES.—Adams, Boxer, Constellation, Constitution, Cumberland, Essex, Gopher, Granite State, Hartford, Intrepid, Mohican, Philadelphia, Rainbow, Reina Mercedes, Relier, Richmond, Severn, Southery, Topeka, Wolverine, Yantic.

UNITED STATES NAVY PAY ROLL.

Rank	Base Pay
Admiral	\$13,500
Rear-Admirals, first nine	8,000
Rear-Admirals, second nine	6,000
Captains	4,000
Commanders	3,500
Lieutenant-Commanders	3,000
Lieutenants	2,400
Lieutenants (Junior Grade)	2,400
Ensigns	1,700
Midshipmen	600

All staff officers, such as medical directors, chaplains, naval constructors, pay directors, civil engineers, etc., to receive the pay of their rank.

Chief boatswains, and other commissioned warrant officers, receive the same pay as ensigns.

Petty officers master-at-arms, boatswains' mates, gunners' mates, gun captains, quartermasters, machinists, hospital stewards, yeomen, bandmasters, first musicians, coxswains, electricians, boiler-makers, coppersmiths, blacksmiths, plumbers and fitters, sailmakers' mates, carpenters' mates, oilers, printers, painters, water tenders, and hospital apprentices (first class) receive from \$396 to \$924 a year.

The pay of second-class seamen per month is \$26; seamen gunners, \$28; firemen, first class, \$38; musicians, first class, \$34.

The pay of second-class seamen per month is: Ordinary seamen, \$21; firemen, second class, \$33; shipwrights, \$27; musicians, second class, \$33.

The pay of third-class seamen per month is: Landsmen, for training, \$17; coal passers, \$24; apprentices, third class, \$10.

The pay of the enlisted men of the Navy is divided into the following items. Pay of 48,000 petty officers, seamen, etc., \$21,887,424; 3,500 apprentices under training, \$742,749; 395 retired enlisted men, \$340,095, and 1,000 enlisted men in prisons undergoing sentences of court-martial, etc., \$335,406.

Each man in the Navy holding an honorable discharge receives a bounty upon re-enlistment.

Each officer or enlisted man in the Navy who dies from wounds or disease contracted in the line of duty is entitled to have paid to his beneficiary a sum equal to one-half of his annual pay. For this purpose the sum of \$75,000 will be required for the fiscal year 1914.

The term of enlistment in the Navy is four years, except for boys under eighteen, who enlist for minority, with the consent of parents or guardian. Minors over eighteen are enlisted without the consent of parents or guardian, but they must furnish a birth certificate or verified written statement of parent or guardian as to their age. Minors under twenty-one years of age will not be accepted for enlistment if their parents object. Only American citizens of good character who may reasonably be expected to remain in the service are enlisted, and every applicant must pass the required

physical examination, be able to read and write English and take the oath of allegiance.

Roosevelt was the most insistent of all Presidents in urging naval efficiency. In his first annual message to Congress he says (pages 6665, 6666): "The work of upbuilding the Navy must be steadily continued. It is not possible to improvise a navy after war breaks out. No one point of our policy, foreign or domestic, is more important than this to the honor and material welfare, and above all to the peace, of our nation in the future. Whether we desire it or not, we must henceforth recognize that we have international duties no less than international rights. * * * The Navy offers us the only means of making our insistence upon the Monroe Doctrine anything but a subject of derision to whatever nation chooses to disregard it. We desire the peace which comes as a right to the just man armed; not the peace granted on terms of ignominy to the craven and the weakling." This attitude was maintained throughout his administration.

One million dollars for the development of aeronautics in the navy, the largest amount ever appropriated in a single measure for this object, is contained in the naval appropriation bill, which was passed and approved during the last hours of the 63d Congress. "Big Navy" men in both branches regard the bill as a triumph, inasmuch as the conferees who took the bill under consideration after a disagreement upon it was reached, restored many of the items cut by the "little navy" men in the House and Senate. The bill carries an aggregate of \$150,000,000 and will make the following additions to the sea forces; two battleships, six destroyers, two sea-going submarines, sixteen coast defense submarines, and one fuel ship. The hospital ship and the gunboat, authorized by the Senate, were rejected in conference, where the appropriation of \$500,000 for a Government projectile plant, and the appropriation for a second hospital ship also were eliminated.

Navy:

- Admiral of, revival of grade of, recommended, 6345.
- Amalgamation of staff corps recommended, 7696.
- Appointments in, referred to, 2129, 2134.
- Apprentices, corps of, recommended, 2713.
- Appropriations for. (See Navy Department.)
- Army and, forces mobilized on borders of Mexico to protect interests of citizens of United States during uprising, 7658.
- Auxiliary in Spanish-American War, 6313.
- Award of medals in, 6927.
- Base in Philippines advocated, 6880.
- Boys, enlistment of, in, recommended, 1392, 1476, 2713.
- Bureau of Navigation, report of chief of, 6294.
- Classifying and rating of officers and men, 6602.
- Classifying and manning vessels of, 6613.
- Code of, revision of, recommended, 2625.

- Commissary branch, salaries in, 6700.
- Condition and equipment at end of 1911, 8075.

 War College discussed, 6166.
 Wireless telegraph station established in Canal Zone for use of, 8340.

Navy Board:

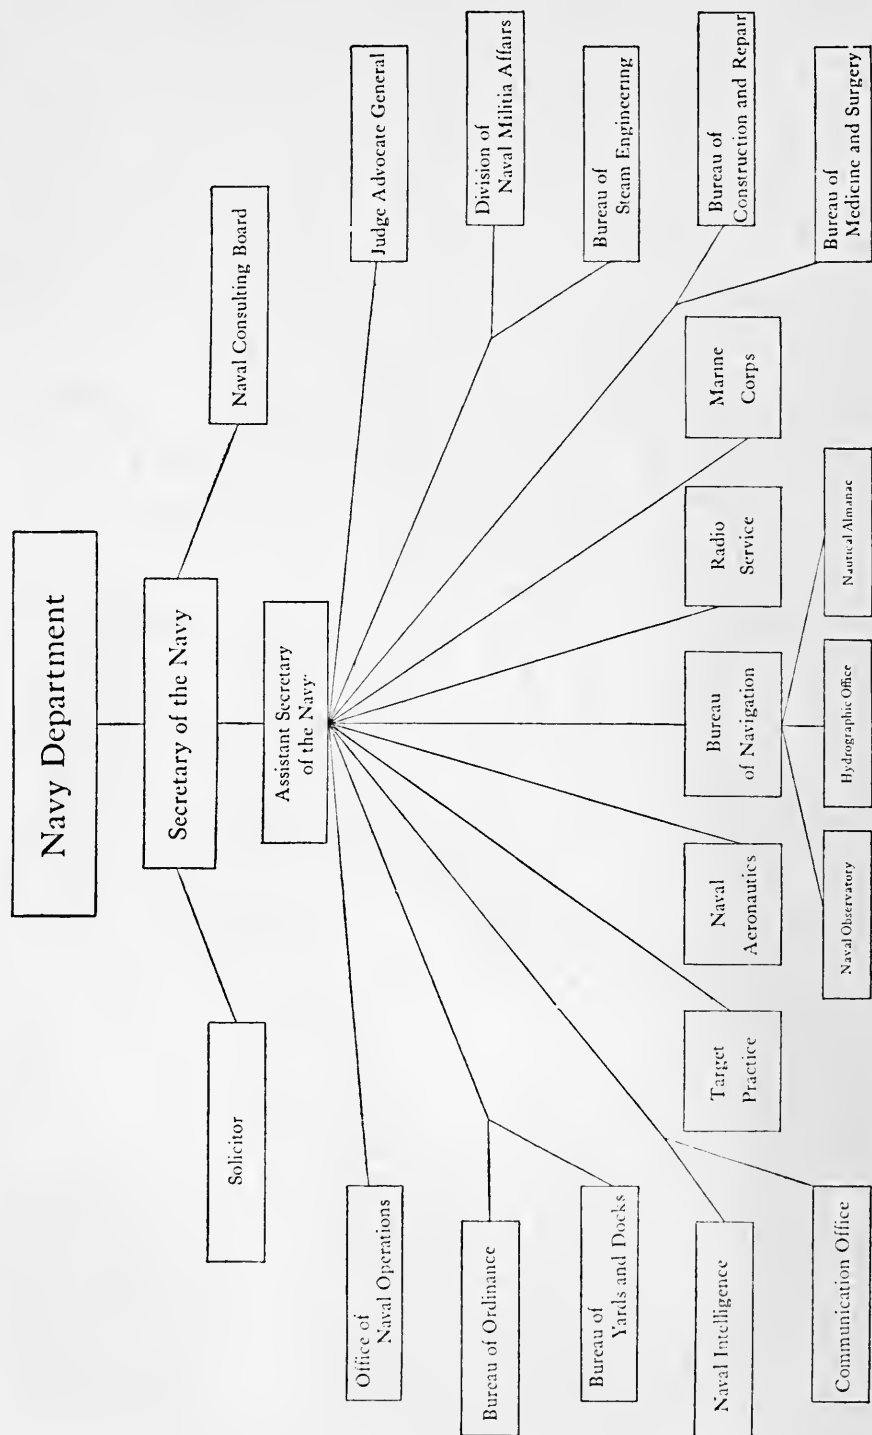

New organization of, 1252.
 Report of, referred to, 2308.
 Should be dispensed with, 1023.

Navy, Department of.—The Continental Navy was under the direction of various committees, boards and agents; the first committee, being one of three members, was appointed on Oct. 13, 1775. In 1781, the Board of Admiralty then acting was replaced by the Secretary of Marine, whose duties correspond with those of the present Secretary of the Navy; but before the end of that year the duties of the office were transferred to the Treasury Department.

Upon the adoption of the Constitution, in 1789, naval matters were placed under the jurisdiction of the War Department and so remained until April 30, 1798, when in consequence of depredations of French cruisers, twelve new ships were added to the fleet; and the modern Department of the Navy was organized with a Secretary at its head. In 1815 a board of three "Navy Commissioners" was created which was charged with the duty of procuring naval stores, of constructing and equipping vessels and of superintending the navy yards; the order creating these Commissioners expressly provides that they should not interfere with the powers of the Secretary of the Navy Department.

In 1842 five bureaus, namely, Navy Yards and Docks, Construction, Equipment and Repairs, Clothing and Provisions, Ordnance and Hydrography, and Medicine and Surgery took the place of the Commissioners. Another reorganization took place in 1862 which placed the Department substantially upon its present basis. The Hydrographic Office was then established and the office of Judge-Advocate-General, created in 1865, was reorganized in 1880. Although assistants to the Secretary had been from time to time appointed before that date, it was not till 1890 that the office of Assistant Secretary was established.

The Secretary of the Navy has the general supervision of the work of the Department, and, although under the Constitution the President is Commander-in-chief of the Navy, the official acts of the Secretary are final. The details of the Secretary's duties are carried out by eight Bureaus, each presided over by a naval officer having the actual or nominal rank of Rear-Admiral. The Bureau of Navigation attends to the promulgation and enforcement of the Secretary's orders; the education of

officers (see Naval Academy); the enlistment and education of enlisted men; keeps their records and preserves the Naval Register; and directs the enforcement of all regulations. The Bureau of Yards and Docks attends to the construction, equipment and maintenance of all Docks and Navy Yards. The Bureau of Equipment furnishes all supplies to the ships, directs the Naval Observatory (q. v.) and prepares the *Nautical Almanac*; the Hydrographic Office, whose duties relate to the preparation of charts and gathering information on all kinds of nautical subjects, is a branch of this Bureau. The Bureau of Ordnance supervises the manufacture of offensive and defensive armor and apparatus, and, in connection with the Bureau of Construction and Repairs, their installation on the ships. The Bureau of Construction and Repairs designs and constructs war-ships, has charge of the docking of the ships and repairing all permanent fixtures. The Bureau of Steam-Engineering constructs and repairs all steam machinery. The Bureau of Medicine and Surgery has charge of and furnishes supplies to the Medical Department and all naval hospitals. The Bureau of Supplies and Accounts furnishes all the general supplies and keeps all naval accounts.

In addition to these Bureaus, the offices of the Judge-Advocate-General form the law department of the Navy. The Commandant of Marines is the head of the Marine Corps (q. v.). The General Board, composed of naval officers of various grades, advises the Secretary on technical matters and submits plans for naval manoeuvres, etc.

Building Programme.—The Secretary of the Navy in his annual report for 1913, recommended the authorization by Congress of a building programme which should include two dreadnaughts, eight destroyers and three submarines annually.

Naval Schools.—There was established on board the *Des Moines*, in 1913, a school for academic, vocational and technical instruction of enlisted men. The experiment met with such success that it was proposed to install the school generally upon the ships and at the shore stations of the navy. Four schools are now maintained for training recruits—at Newport, Norfolk, Chicago and San Francisco.

Enlistments.—The policy recently adopted by the department of raising the standard for admission to the navy has increased the number as well as bettered the character of the men entering the service. There is now a rigid exclusion of those not morally or physically fit.

For more detailed information as to the scope and activities of the Navy Department consult the index references to the Presidents' Messages and Encyclopedic articles under the following headings:

- Near Eastern Division, State Department.**—This division was organized in 1909 by Secretary of State Knox. It falls under the supervision of the third assistant secretary of state (q. v.); and it has charge of matters other than administrative in Germany, Austria-Hungary, Russia, Roumania, Servia, Bulgaria, Montenegro, Turkey, Greece, Italy, Abyssinia, Persia, Egypt and the colonies of these countries. (See State Department.)
- Nebraska.**—One of the western group of states; nickname, "Black Water State." Motto, "Equality before the law." It extends from lat. 40° to 43° north and from long. 95° 25' to 104° west. It is bounded on the north by South Dakota (partly separated by the Missouri River), on the east by Iowa and Missouri (separated from both by the Missouri River), on the south by Kansas and Colorado, and on the west by Colorado and Wyoming, and has an area of 77,520 square miles.
- Nebraska originally formed part of the Louisiana Purchase and was later made a part of the Territory of Missouri. It was made a Territory in 1854, and included portions of the Dakotas, Montana, Wyoming and Colorado. Nebraska was admitted to the Union in 1867. The State takes its name from the river. It was first permanently settled at Bellevue in 1847.
- The State is one of the first in the production of corn, being extremely fertile in the eastern part and along the Platte River. Its principal industries are agriculture and stock raising, slaughtering and meat packing, South Omaha being one of the great cattle markets of the world. Butter, cheese, condensed milk and kindred

dairy products are the chief manufactured products.

The Federal irrigation scheme, completed in 1911, includes the watering of 110,000 acres of Nebraska and Wyoming. There are 3,074,658 acres of land in the State unreserved and unappropriated. Land offices are located at Alliance, Broken Bow, Lincoln, North Platte, O'Neill and Valentine.

Statistics of agriculture collected for the last Federal census place the number of farms in the State at 129,678, comprising 38,622,021 acres, valued, with stock and improvements, at \$2,079,817,647. The average value of land per acre was \$41.80, an increase from \$16.27 in 1900. The value of domestic animals, poultry, etc., was \$222,222,004, including 2,932,350 cattle, valued at \$73,074,057; 1,008,378 horses, \$102,804,907; 83,405 mules, \$10,374,076; 3,435,734 swine, \$29,649,482; 293,500 sheep, \$1,486,948. The yield and value of field crops for 1911 is given as: Corn, 7,425,000 acres, 155,925,000 bushels, \$85,759,000; wheat, 3,098,000 acres, 41,594,000 bushels, \$36,169,000; oats, 2,500,000 acres, 34,750,000 bushels, \$14,942,000; rye, 52,000 acres, 676,000 bushels, \$507,000; potatoes, 116,000 acres, 6,032,000 bushels, \$5,549,000; hay, 1,350,000 acres, 1,148,000 tons, \$11,136,000.

While not noted as a manufacturing state, Nebraska has 2,500 establishments, employing 32,000 persons, and capitalized at about \$100,000. These are engaged in slaughtering and meat packing, manufacturing flour and meal and dairy products for shipment, and minor industries incidental to local needs. The value of the output of the manufacturing in 1911 was about \$200,000,000. There are no mines in the State. The receipts at the State Treasury for the biennial period ending Nov. 30, 1910, were \$10,960,919, and the disbursements \$10,744,066; balance on hand, \$601,290. School, college and university trust funds of the State amounted to \$8,863,690.

The number of manufacturing establishments in Nebraska having an annual output valued at \$500 or more at the beginning of 1915 was 2,493. The amount of capital invested was \$121,020,000, giving employment to 33,695 persons, using material valued at \$174,114,000, and turning out finished goods worth \$221,616,000. Salaries and wages paid amounted to \$24,011,000.

Nebraska (see also Omaha):

Act—

Extending time of payment to purchasers of Indian lands in, vetoed, 5525.

For admission of, into Union, vetoed, 3687.

For sale of Indian reservation in, 4656.

To provide for lease of Fort Omaha Military Reservation to, vetoed, 6119.

Admission of, into Union, proclaimed, 3714.

Supplies issued, suffering people in, referred to, 4272.

Survey-general in, recommendations for discontinuance of office of, 4959.

Negotiations, Diplomatic, Breaking of. (See Diplomatic Negotiations, Breaking of.)

Negro Plot.—An alleged attempt on the part of certain negroes, incited and assisted by whites, to burn New York City. March 18, 1741, a fire occurred in the chapel and barracks of Fort George. It was at first thought to be accidental, but eight other fires of unaccountable origin within a month strengthened the allegation of one Mary Burton, a servant in the employ of John Hughson, that a number of negroes and sailors were implicated in a plot to destroy the town. It was charged that the Spanish were inciting plots among the negroes. Twenty whites and more than 160 negro slaves were imprisoned. Four whites and 18 negroes were hanged and 13 others were burned at the stake before the excitement abated.

Negro Troops.—In early Revolutionary days and in the first two years of the Civil War negro troops were employed to a limited extent. In July, 1863, a general provision was made for their enlistment in the Union Army and numbers were in service. Since the Civil War there have always been negro troops in the regular army. They served in the war with Spain in 1898, and proved to be less subject to the prevailing fever and the enervating effects of heat than white soldiers.

Negroes.—According to the census of 1900 there were in the United States 9,192,389 colored inhabitants. Of these, 119,050 were Chinese, 85,986 Japanese, and 266,760 Indians, leaving 8,621,493 negroes, or about one-ninth the entire population.

Negroes (see also Freedmen; Liberia):

Colonization of—

Discussed, 3255, 3328, 3341, 3401, 3588.

In Mexico, and action taken by United States for relief of, discussed, 6066, 6096.

To be employed for military purposes in war between the States, order regarding, 3318.

Welfare of, discussed by President Taft, 7376.

Nepal.—Nepal lies between 26° 20'-30' 10' N. lat. and 80° 15'-88° 14' E. long., with an extreme breadth from west to east of 520 miles, and a mean of 150 miles from north to south. The State is bounded on the north by Tibet; on the east by Sikkim; on the south by Bengal and Bihar and Orissa; and on the southwest and west by Agra and Oudh. The area is 54,000 square miles. The dominant race is the Gurkha, or Gurkha, descendants of Brahmans and Rajputs who retreated from India during the Muhammadan invasions of the fourteenth, fifteenth and sixteenth centuries, and conquered the country in the eighteenth century A. D. The inhabitants are almost entirely Buddhists, but their languages differ according to racial distinctions, the Gurkha dialect being of Sanskrit origin, and the remaining dialects akin to Tibetan. The population is estimated at 5,000,000.

Physical Features.—The Himalayas traverse the centre of western Nepal, and extend along the northern boundary of the eastern division, where the highest peak of the whole range, Mount Everest, rises to 29,002 feet above sea level, the greatest land altitude yet ascertained.

Western Nepal contains many fertile valleys north and south of the range, and the southern portion of eastern Nepal contains low-lying alluvial land known as the tarai.

The rivers of Nepal flow from the Himalayas with a general southward course to the Ganges, their tributaries flowing through the valleys between parallel ranges of lower elevation than the Himalayas. The valley of Nepal and the southern plains have a rainy season from June to October, winter from October to March, and a hot season from April to June. The climate of the mountains and higher valleys depends on latitude as well as altitude, and varies from tropical to alpine conditions.

History.—The conquest of Nepal by the Gurkhas was completed in 1765, since which date the whole country has been under the hereditary rule of the Shahi dynasty. Since 1816 the actual power has been in the hands of successive Prime Ministers. The southern trend of the Gurkha conquests led to a war with the British Government of India in 1814-1816, since which time a British resident has been accepted at Katmandu.

Government.—Internal affairs are unfettered, but foreign relations are controlled by the Government of India, and by arrangement with Nepal, India obtains many fine recruits for its Gurkha regiments.

The public laws have been greatly modified since the first visit of the Nepalese Prime Minister to England in 1851, and the death penalty is now confined to murder and the killing of cows, manslaughter and cattle maiming being punished by imprisonment for life. The private code, especially caste law, is somewhat rigorous, and slavery is a recognized institution.

Ruler: Maharajadhiraja Trilhubana Bir Bikram Jang Bahadur Shah Bahadur Shumshere Jung, born June 30, 1906, succeeded his father, Dec. 11, 1931.

Almost every male Gurkha is a soldier, and there is a standing army of 30,000 infantry and mountain artillery, with a reserve of about 30,000. In addition some 20,000 Gurkhas are in the service of the Government of India in ten rifle regiments.

Education.—Education is provided by the State free of cost in a central college at the capital, with branch schools in the surrounding district. Instruction is given in Sanskrit, Urdu, and English, and there is a considerable sprinkling of English-speaking Nepalese.

Finance.—The revenue is derived from land rents, forests, customs duties, mining royalties and monopolies, and exceeds \$5,000,000. The trade with India bears a duty each way of about 12 per cent.

Production and Industry.—Every available acre is cultivated for the production of grain, fruit and foodstuffs, and the live stock (which consists only of a few sheep and cattle) is grazed in the jungles or stall-fed. The principal crop is rice, and wheat, pulse, maize and other grains are grown, while fruit, flowers and vegetables are freely cultivated. In the hills tea, cotton and tobacco are grown, and hemp, dye plants and medicinal herbs are obtained.

Gold, silver, lignite and coal have been found, and iron, copper, zinc, lead and sulphur are plentiful. Limestone and marbles abound in central Nepal, and there are numerous mineral springs.

Coarse cottons, paper, bells, brass and iron metal work, weapons, and gold and silver ornaments are the principal manufactures. The dominant Gurkha race despises trade and peaceful industries, which are in the hands of the Newars, a subject Mongol race.

Commerce.—The chief trade route is between Katmandu and the Bengal frontier (76 miles). This road traverses the valley of Nepal, and is the only practicable means of access from India. Two routes lead to Tibet over the Himalayas, near the northwestern and northeastern boundaries, but in each case there is accommodation for pedestrians only in the passes, where goods are carried on men's backs. Three-quarters of the trade is with British India.

Nesqually Indians. (See Indian Tribes.)
Nesqually, Wash., proclaimed port of delivery, 2588.

Netherlands.—The kingdom of the Netherlands is a maritime country of northwest Europe, extending from 53° 32' 21" to 50° 45' 49" N. lat., and from 3° 23' 27" to 7° 12' 20" E. long. The greatest length from north to south is 164 miles, and the greatest breadth is 123 miles. The kingdom is bounded on the east by Germany, and on the south by Belgium, the northern and western boundaries being the North Sea. At the northeastern extremity the boundary crosses the Dollart, a basin at the mouth of the river Ems.

Physical Features.—The coast of the southwest provinces of Zeeland and South Holland, and of the northern provinces of Friesland and Groningen is broken in many places, and groups of islands have been formed by the inroads of the sea. For nearly 200 miles, however, the western coast consists of unbroken sand dunes, protected from the sea by breakwaters, and on the landward side by plantations. The southern archipelago lies between the estuaries of the Meuse and Scheldt, and north of the Meuse estuary is an irregular land formation known as the Hook of Holland; the northern archipelago extends in a semi-circle from the Texel Gat to the Ems basin. Behind the chain of northern islands or Frisian archipelago, are the great gulf or inland sea, known as the Zuyder Zee, or South Sea, to distinguish it from the external North Sea, the northeastern Shallows or Wadden, and the inundated Ems basin, or Dollart, all of which were formed during the thirteenth century by inroads through the original coast line, now marked by the chain of Frisian islands. The area of the Zuyder Zee and Wadden extends 2,600 English square miles, and the Netherlands portion of the Dollart

twenty-three square miles, giving a total area for the kingdom of the Netherlands of close on 14,800 English square miles.

As the name implies, the Netherlands are generally low-lying and flat. Of the total land area, 12,761 square miles, nearly 5,000 square miles would be submerged at high water but for the protecting barriers of sand dunes, dikes and dams, the latter accounting for many of the place names in the country.

The principal rivers are the Rhine (Rijn) and the Meuse (Maas), the former crossing the eastern border from Germany and flowing in several branches to the North Sea and Zuyder Zee, and the latter traversing the province of Limburg and flowing to the North Sea. The estuaries of the Scheldt (Schelde) are also in Netherlands territory. The country is also intersected with lesser streams, and these are turned to account for the purposes of navigation, irrigation and land drainage, and are connected by numerous artificial canals, or grachten, lined with trees and studded with windmills. The intervening land often consists of drained morasses, or polders, transformed into fertile agricultural or grazing land. In addition to the communicating canals there are many ship canals, the largest being the New Waterway from Rotterdam to the Hook of Holland, and the North Sea Canal from Amsterdam and the Zuyder Zee, along the bed of the river Y to Ymuiden on the North Sea coast. There are many inland lakes, or meers, particularly in the northeast, of much importance to the fishing industry, but the principal hydrographical feature is the Zuyder Zee, a land-locked inlet about eighty-four miles from north to south, and forty-five miles from east to west at its widest part. The mean depth is between 11 and 12 English feet, and the nature of much of the bed has prompted several drainage projects, the reclaimed soil being capable of practical cultivation. The present Government are preparing fresh proposals for the reclamation of large portions of the Zuyder Zee.

History.—The territory now known as the Netherlands was incorporated as a Province of the Roman Empire in the first century, A. D., being at that time peopled by various Germanic tribes, the names of the Batavi and the Frisii being still preserved in the kingdom. As the Roman empire crumbled to pieces, the south Netherlands became part of the Frankish dominions, and the inhabitants were converted to Christianity, but the Frisians of the north retained their independence and heathendom until the eighth century, when they were subdued and converted by Charlemagne, himself a Netherlander by descent. The twelfth century witnessed the rise of the towns, but by the fifteenth century the lordship of these towns had passed with that of most of the feudal states to the rulers of Burgundy, and the overlordship passed successively to France and Austria and so to the head of the Holy Roman empire, and at the abdication of Charles V. to his son Philip II., King of Spain. The sixteenth and seventeenth centuries witnessed the beginnings of the Reformation and the rise of the Dutch Republic. The religious dissensions had divided the country into a Protestant Northern Netherlands and Catholic Southern Netherlands, the latter forming the country now known as Belgium. The Netherlands were acknowledged to be independent by the Treaty of Münster (1648), and in 1688 their Stadtholder, William, Prince of Orange, who had married the daughter of the Duke of York (James II.), became King William III. of Great Britain. From 1700-1713 the Netherlands were the scene of many battles of the War of the

Spanish Succession, and at the close of the eighteenth century the people threw over their Stadtholder (whose office had been declared hereditary in 1747) and the Batavian Republic was set up under the protection of the French Republic, but in 1806 Louis Bonaparte, brother of the Emperor Napoleon, was crowned King of Holland. By the Treaty of London (June 11, 1814) the Northern and Southern Netherlands (the Dutch and Belgian provinces) were united and formed into the Kingdom of the Netherlands, under the Prince of Orange-Nassau, a descendant of the house which had taken a leading part in the destiny of the nation since the thirteenth century. This prince was crowned in 1815 as King William I., but the artificial union of Protestant and Catholic countries broke down in 1830-1831, when the Belgian Provinces revolted, and became an independent kingdom.

Government.—The crown is hereditary in the male (and eventually in the female) line of the House of Orange-Nassau, and Kings William I, (1815-1840), William II. (1840-1849) and William III. (1849-1890) were followed in 1890 by the only surviving child of the last-named sovereign.

Present Ruler: Her Majesty Wilhelmina Helena Pauline Maria, Queen of the Netherlands, Princess of Orange-Nassau, Duchess of Mecklenburg, born at The Hague, Aug. 31, 1880; succeeded her father Nov. 23, 1890; assumed the government (which had been carried on by the Queen-Mother, as Regent) Aug. 31, 1898; married at The Hague, Feb. 7, 1901, to His Royal Highness Prince Henry, Prince of the Netherlands and Duke of Mecklenburg.

The States General consists of two chambers. The First Chamber contains 50 members, elected for 9 years (and renewable as to one-third every 3 years) by the Provincial Legislature. The Second Chamber consists of 100 members elected for 4 years by the direct vote of registered male electors. Electors are not registered until the age of 25, and 64 per cent. of the male population of that age are on the register.

Justice is administered in 101 Cantonal Courts, 23 district tribunals which also act as courts of appeal from the cantonal courts. There are 5 higher Courts of Appeal and a Court of Cassation (Hooge Raad) at The Hague.

Each of the 11 Provinces has a legislature elected for 6 years.

AREA AND POPULATION

Provinces	Area in English Sq. Miles	Population 1909
Drenthe.....	1,027	173,318
Friesland.....	1,278	359,552
Groningen.....	909	328,045
Gelderland.....	1,965	639,602
Limburg.....	1,977	332,007
North Brabant.....	851	626,079
North Holland.....	1,078	1,107,693
Overijssel.....	1,291	382,880
South Holland.....	1,162	1,390,744
Utrecht.....	531	288,514
Zeeland.....	692	232,515
Total.....	12,761	5,858,175

The estimated population on Dec. 31, 1912, was 6,102,399.

Education.—The educational system is peculiar, in that primary instructional establishments are encouraged by State aid, while public institutions are provided (where private enterprise is lacking) by local taxation. Primary education is compulsory between the ages of 7-13, the average attendance being 95 per cent. of the enrolment. Technical education is highly efficient, horticulture and agriculture being

Netherlands *Messages and Papers of the Presidents*

a feature of special schools. There are State Universities at Leiden (founded in 1575), Groningen (1585), and Utrecht (1634), and a municipal University at Amsterdam (1877), attended by 4,000 students (700 women), and a Technical University at Delft (1864) attended by 1,200 students.

Finance.—The average revenue for five years including 1914 was 212,445,116 florins and the average expenditure for the same period was 224,574,919 florins. The funded debt Jan. 1, 1914, was 1,148,379,900 florins, the cost of which for interest and sinking fund was 38,505,204 florins. The florin or guilder, the unit of value, is equal to \$0.40, 2 United States money.

Towns.—Capitals, Court: The Hague; Commercial: Amsterdam and Rotterdam. In 1913 there were 10 communes with a population exceeding 50,000, 11 others exceeding 30,000, and 10 more over 20,000. The chief ports are Amsterdam, Rotterdam, Flushing, Terneuzen, Harlingen, Delfzijl, Dordrecht, Zaandam and Schiedam.

Canals.—The total length of the various canals is stated to exceed 1,500 miles, including the great ship canals, and the network of auxiliary canals connecting the various natural waterways. In 1911 there were 3,190 kilometres of railway open for traffic.

Shipping.—The mercantile marine consisted on Dec. 31, 1911, of 428 sailing ships and 347 steamships.

Production and Industry.—Of the total area (8,038,000 English statute acres) 5,308,450 acres were under crops and grass, 2,141,930 acres were arable land, and 641,449 acres were woods and forests in 1909.

At the Census of 1910 there were 1,068,361 cows, and 958,582 other cattle, 889,036 sheep and lambs, 224,231 goats, 1,259,844 pigs, and 327,377 horses.

In 1910 over 20,000 persons were employed in the North Sea fisheries, the herring catch of that year being valued at close on £1,000,000.

The mineral resources of the Netherlands are confined to coal, which is mined in Limburg, and to stone, clay, and other non-metallic minerals, used in the sea defences and for industrial purposes.

The cotton industry is in an increasingly flourishing condition, woollens and linens being manufactured at Tilburg, Leiden, Utrecht, and Eindhoven, and carpets at Deventer. Spirits, liqueurs, and beer, leather, paper making, earthenware, chocolate, diamond cutting, tobacco and shipbuilding, are also important industries.

Trade with the United States.—The value of merchandise imported into Netherlands from the United States for the year 1913 was \$125,909,862, and goods to the value of \$38,180,967 were sent thither—a balance of \$87,728,895 in favor of the United States.

NETHERLAND INDIA.—Lies between 6° N. and 11° S. lat. and 95°-141° E. long., and is divided into two administrations, Java (with Madura) and the "Outposts," under a Governor-General.

DUTCH WEST INDIES.—The possessions in the West Indies are divided into two administrative areas, Surinam (Netherlands Guiana) on the mainland of South America, and the island of Curaçao with its dependencies.

Surinam is situated between British and French Guiana, on the northeast coast of South America, and contains an area estimated at 49,845 square miles, with a population (1912) of 95,099. About 50,000 acres are cultivated, the principal products being sugar, cacao, bananas, maize, coffee and rice. Gold is found and exported, and also balata.

Curaçao is an island in the West Indies, about forty miles north of Venezuela. Salt, phosphates, cattle and straw hats are exported, together with the Curaçao orange, with which the celebrated liqueur is flavored.

War with Acheen, neutrality of United States in, 4192.

Netherlands, Treaties with.—The treaty of commerce and navigation of 1839 was in part superseded by the treaty of commerce and navigation of 1852. Together they provide for equitable imposition of duties of import and export, together with the extension to one of the contracting parties of such additional rights, privileges, or exemptions as may hereafter be granted by either of them to a third power. The reciprocal equality of the flags is recognized in home ports and in the colonial possessions. The coasting trade is exempted from the provisions of the treaty. Holland does not relinquish her right of imposing discriminating duties on trade between the home ports of Holland and her colonies; nor does the United States relinquish her right to sustain her discriminating duties on coffee and tea. But in the event of the abolition of these discriminating duties by the one power, the other shall reciprocate. International arbitration was agreed to by a convention signed in Washington May 2, 1908. (For the consular convention of 1878, see Consular Conventions; for the terms of the extradition treaty of 1887, see Extradition Treaties.)

Neutral Rights.—The most recent definition of the rights and duties of neutral powers and persons during war is set forth in a convention concluded Oct. 18, 1907, at The Hague; ratification advised by the Senate of the United States March 10, 1908; ratified by the President Feb. 23, 1909, and the ratification deposited with the Netherlands government Nov. 27, 1909; proclaimed Feb. 28, 1910. Ratifications were deposited at The Hague Nov. 27, 1909, by Germany, United States, Austria-Hungary, Denmark, Mexico, the Netherlands, Russia, Sweden, Bolivia and Salvador.

His Majesty the German Emperor, King of Prussia; the President of the United States of America; the President of the Argentine Republic; His Majesty the Emperor of Austria, King of Bohemia, etc., and Apostolic King of Hungary; His Majesty the King of the Belgians; the President of the Republic of Bolivia; the President of the Republic of the United States of Brazil; His Royal Highness the Prince of Bulgaria; the President of the Republic of Chile; the President of the Republic of Colombia; the Provisional Governor of the Republic of Cuba; His Majesty the King of Denmark; the President of the Dominican Republic; the President of the Republic of Ecuador; His Majesty the King of Spain; the President of the French Republic; His Majesty the King of the United Kingdom of Great Britain and Ireland and of the British Dominions beyond the Seas, Emperor of India; His Majesty the King of the Hellenes; the President of the Republic of Guatemala; the President of the Republic of Haiti; His Majesty the King of Italy; His Majesty the Emperor of Japan; His Royal Highness the Grand Duke of Luxemburg, Duke of Nassau; the President of the United States of Mexico; His Royal Highness the Prince of Montenegro; His Majesty the King of Norway; the President of the Republic of Panama; the President of the Republic of Paraguay; Her Majesty the Queen of the Netherlands; the President of the Republic of Peru; His Imperial Majesty the Shah of Persia; His Majesty the King of Portugal and of the Algarves, etc.; His Majesty the King of Roumania; His Majesty the Emperor of All the Russias; the President of the Republic of Salvador; His Majesty the King

of Serbia; His Majesty the King of Siam; His Majesty the King of Sweden; the Swiss Federal Council; His Majesty the Emperor of the Ottomans; the President of the Oriental Republic of Uruguay; the President of the United States of Venezuela.

With a view to laying down more clearly the rights and duties of neutral powers in case of war on land and regulating the position of the belligerents who have taken refuge in neutral territory:

Being likewise desirous of defining the meaning of the term "neutral," pending the possibility of settling, in its entirety, the position of neutral individuals in their relations with the belligerents;

Have resolved to conclude a Convention to this effect:

The territory of neutral powers is inviolable.

Belligerents are forbidden to move troops or convoys of either munitions of war or supplies across the territory of a neutral power.

Belligerents are likewise forbidden to erect on the territory of a neutral power a wireless telegraphy station or other apparatus for the purpose of communicating with belligerent forces on land or sea; or to use any installation of this kind established by them before the war on the territory of a neutral power for purely military purposes, and which has not been opened for the service of public messages.

Corps of combatants cannot be formed nor recruiting agencies opened on the territory of a neutral power to assist the belligerents.

A neutral power must not allow any of the acts referred to in preceding paragraphs to occur on its territory.

It is not called upon to punish acts in violation of its neutrality unless the said acts have been committed on its own territory.

The responsibility of a neutral power is not engaged by the fact of persons crossing the frontier separating to offer their services to one of the belligerents.

A neutral power is not called upon to prevent the export or transport, on behalf of one or other of the belligerents, of arms, munitions of war, or, in general, of anything which can be of use to an army or a fleet.

A neutral power is not called upon to forbid or restrict the use on behalf of the belligerents of telegraph or telephone cables or of wireless telegraphy apparatus belonging to it or to companies or private individuals.

Every measure of restriction or prohibition taken by a neutral power in regard to transportation and communication must be impartially applied by it to both belligerents.

A neutral power must see to the same obligation being observed by companies or private individuals owning telegraph or telephone cables or wireless telegraphy apparatus.

The fact of a neutral power resisting, even by force, attempts to violate its neutrality cannot be regarded as a hostile act.

A neutral power which receives on its territory troops belonging to the belligerent armies shall intern them, as far as possible, at a distance from the theater of war.

It may keep them in camps and even confine them in fortresses or in places set apart for this purpose.

It shall decide whether officers can be left at liberty on giving their parole not to leave the neutral territory without permission.

In the absence of a special convention to the contrary, the neutral power shall sup-

Neutral Rights *Messages and Papers of the Presidents*

ply the interned with the food, clothing, and relief required by humanity.

At the conclusion of peace the expenses caused by the internment shall be made good.

A neutral power which receives escaped prisoners of war shall leave them at liberty. If it allows them to remain in its territory it may assign them a place of residence.

The same rule applies to prisoners of war brought by troops taking refuge in the territory of a neutral power.

A neutral power may authorize the passage into its territory of the sick and wounded belonging to the belligerent armies, on condition that the trains bringing them shall carry neither personnel nor war material. In such a case, the neutral power is bound to take whatever measures of safety and control are necessary for the purpose.

The sick or wounded brought under these conditions into neutral territory by one of the belligerents, and belonging to the hostile party, must be guarded by the neutral power so as to ensure their not taking part again in the military operations. The same duty shall devolve on the neutral state with regard to wounded or sick of the other army who may be committed to its care.

The Geneva Convention applies to sick and wounded interned in neutral territory.

The nationals of a state which is not taking part in the war are considered as neutrals.

A neutral cannot avail himself of his neutrality: If he commits hostile acts against a belligerent: if he commits acts in favor of a belligerent, particularly if he voluntarily enlists in the ranks of the armed force of one of the parties. In such a case, the neutral shall not be more severely treated by the belligerent as against whom he has abandoned his neutrality than a national of the other belligerent state could be for the same act.

The following acts shall not be considered as committed in favor of one belligerent in the sense of the above paragraph: Supplies furnished or loans made to one of the belligerents, provided that the person who furnishes the supplies or who makes the loans lives neither in the territory of the other party nor in the territory occupied by him, and that the supplies do not come from these territories; services rendered in matters of police or civil administration.

Railway material coming from the territory of neutral powers, whether it be the property of the said powers or of companies or private persons, and recognizable as such, shall not be requisitioned or utilized by a belligerent except where and to the extent that it is absolutely necessary. It shall be sent back as soon as possible to the country of origin.

A neutral power may likewise, in case of necessity, retain and utilize to an equal extent material coming from the territory of the belligerent power.

Compensation shall be paid by one party or the other in proportion to the material used, and to the period of usage.

The provisions of the present Convention do not apply except between contracting powers, and then only if all the belligerents are parties to the Convention.

Forty-four countries became parties to this Convention, as follows:

United States,	Bulgaria,
Argentina,	Chile,
Austria-Hungary,	China,
Belgium,	Colombia,
Bolivia,	Cuba,
Brazil,	Denmark,

Ecuador,
France,
Germany,
Great Britain (with
reservations),
Greece,

Neutrality, Armed. (See Armed Neutrality)

Neutrality, Proclamation of.—Neutrality, in international law, is the attitude and conditions of a nation or state which does not take part directly or indirectly in a war between other states, but maintains relations of friendship with all the contending parties. In ancient times war between any two nations was likely to involve any other, either through sympathy or by its being drawn unwillingly into the controversy on accusation of favoring one or the other of the belligerents. Modern civilization has made it possible for a peacefully inclined nation to avoid entanglements in quarrels not of its own making. The position which a state intends to take in case of war between its neighbors should be clearly defined. It is customary, therefore, on the breaking out of hostilities for every nation not participating therein to declare its position with reference to the belligerents. This is usually done by a proclamation by the chief ruler of a state proclaiming its neutrality and calling upon its citizens to refrain from any acts of hostility or special favor toward either of the parties to the strife. It is also customary for every nation to put on its statute books general laws regulating the acts of its citizens with reference to foreign wars. Upon the declaration of war between France and Great Britain in 1793 it was decided unanimously by Washington and his Cabinet that a proclamation of neutrality should issue and that a French minister should be received. The proclamation was drafted by John Jay and declared the intention of the United States to pursue a policy of friendship toward both nations, and enjoined upon all citizens to avoid a contravention of that disposition upon pain of prosecution. It is a curious fact that the word "neutrality" was omitted from this proclamation, but it was enforced with fairness. President Roosevelt on Feb. 11, 1904, issued a proclamation declaring the neutrality of this country in the Russo-Japanese War. With the outbreak of the European war of 1914 President Wilson issued a number of proclamations all of the same general tenor. (See pages 7969 et seq.)

Nevada.—One of the western group of states; nickname, "The Sage Brush State"; motto, "All for our country." Nevada extends from lat. 35° to 42° north and from long. 114° to 120° west. It is bounded on the north by Oregon and Idaho, on the east by Utah and Arizona, and on the west and southwest by California, and has an area of 110,690 square miles. The State is rich in precious metals, the principal products being silver and gold. The territory was ceded by Mexico in 1848, and the first settlements were made in 1848 and 1850. Silver was discovered in 1859. Nevada Territory was organized in 1861 and was admitted to statehood in 1864.

Nevada is a Spanish word meaning "snowy" or "white as snow," and the name of the State was derived from the Sierra Nevada. The State ranks sixth in size in the Union. Its length from north to south is 484 miles, its width 321 miles, and its area 109,821 square miles.

The history of Nevada is chiefly the history of her mines. Since the discovery of the Comstock lode and other famous ore bodies periods of activity and prosperity have alternated with periods of depression. Each discovery of high-grade ore in noteworthy quantity has been followed by rapid settlement in that locality and the establishment of one or more towns. In 1890-1893 a sharp decline in the price of silver initiated or accompanied a period of depression in Nevada's mining and general indus-

trial prosperity. Silver is so important a resource of the State that to a large extent even now her prosperity depends upon the market for that metal. Of late years, however, an increased production of gold, copper, and recently of platinum has accompanied a gradual and, it is hoped, substantial industrial progress. Permanent towns have grown up and agriculture and related pursuits are becoming firmly established.

There are within the State 61,177,050 acres of unappropriated and unreserved lands, which can be entered at the United States land office at Carson City. Agriculture is retarded by lack of transportation facilities.

There are 160,000 acres within the State subject to the Federal irrigation project. The farm area consists of nearly 3,000,000 acres, of which about one-third is improved land. The farm animals reported Jan. 1, 1910, were 98,000 horses, valued at \$7,344,000; 4,000 mules, \$316,000; 19,000 milk cows, \$835,000; 404,000 other cattle, \$8,363,000; 1,585,000 sheep, \$5,864,000. The yield and value of field crops for 1911 is given as follows: Corn, 1,000 acres, 30,000 bushels, \$27,000; wheat, 36,000 acres, 1,018,000 bushels, \$968,000; oats, 8,000 acres, 360,000 bushels, \$223,000; potatoes, 8,000 acres, 1,280,000 bushels, \$1,197,000; hay, 254,000 acres, \$61,000 tons, \$8,208,000. The State is one of the leading producers of gold and silver. The output of gold in 1911 was 917,605 fine ounces, worth \$18,968,578; the silver output was 10,651,571 fine ounces, valued at \$5,858,364. While theretofore ranking first in the production of silver, Nevada in 1911 took third place, being surpassed by both Utah and Montana. The Ely district, in White Pine County, produced 61,494,610 pounds of copper in 1910, and has increased since. The receipts by the State Treasurer for the fiscal year of 1911 were \$394,882, and the disbursements, \$1,128,347; balance on hand Jan. 1, 1911, \$655,531.

In 1905 there were 115 manufacturing establishments, with a capital of \$2,891,997, employing 908 persons, who converted \$1,627,776 worth of raw material into finished goods worth \$3,096,274.

In 1906 there were 1,440 miles of steam railway in the State and five miles of electric line. The population in 1910 was 81,875.

Nevada:

Admission of, into Union proclaimed, 3430.

Referred to, 3450.

Condition of, referred to, 3405.

Creation and organization of, as Territory referred to, 3254.

Payment of settlers for improvements on lands in Duck Valley in, referred to, 4661, 4776.

New Brunswick, Canadian Province; area, 2,600 square miles; population, 1901, 31,120.

Aggressions on rights of American citizens by citizens of, 963.

Imprisonment of American citizens by, 963, 969, 990, 1575, 1622, 1687. (See also Great Britain.)

New England.—A name applied to the northeastern section of the United States by Capt. John Smith in his map of the New World published in 1616. Though composed of separate Colonies, there was always a similarity in the customs and habits of the

people. New England formed part of North Virginia, granted to the Plymouth Company by James I. in 1606. In 1613 most of the New England Colonies were united for defensive purposes in the New England Confederation. New England is now applied collectively to the States of Maine, New Hampshire, Vermont, Massachusetts, Rhode Island, and Connecticut.

New England Emigrant Company.

The passage of the Kansas-Nebraska law in 1854 made the institution of slavery in Kansas dependent upon the will of the majority of the people of the state. Proslavery advocates in Missouri set to work to establish slavery by assisting in the emigration of Southern families. In 1855 an association was formed in Boston to offset this movement by assisting New England farmers to establish homes in the debatable territory. This organization was known as the New England Emigrant Company, and did much toward making Kansas a free state.

New England Shilling.

The general court of Massachusetts on May 27, 1652, established a mint at Boston and installed John Hull as mint master. The first coins which were struck were but rude planchets stamped "N. E." near the border on the obverse and the denomination mark (XII) on the reverse, signifying the value of 12d. This was known as the New England shilling and was valued at 18½ cents.

New France.

A French expedition under Verrazano formed a settlement in America as early as 1524, on land discovered by John and Sebastian Cabot in 1497. In 1535 Jacques Cartier ascended the St. Lawrence River as far as the site of Montreal. The first permanent settlement in New France was founded at Quebec by Champlain in 1608. The colonists cultivated friendly relations with the Indians, and Jesuit missionaries extended the French influence through the region of the Great Lakes to the headwaters of the Mississippi and down that stream to the French possessions in the South. The country was conquered by the English in 1629 and restored in 1632. At the beginning of the Seven Years' War New France was made the scene of a part of the struggle between France and England. By 1759 New France, with Louisiana added, comprised the St. Lawrence and Great Lakes basins and the Mississippi basin, though the settlements were scattered. In 1759 Canada was reconquered by the English and its possessions confirmed to them by the treaty of Paris, Feb. 10, 1763. The result of this treaty was the cession of all the country east of the Mississippi to England and that west to Spain. The French laws were continued in force and religious liberty was extended to Roman Catholics.

New Granada.—A name by which that part of South America now called Colombia was known. (See Colombia.)

New Granada (see also Colombia):

New Hampshire.—One of the thirteen original states; nickname, "The Granite State." It extends from lat. 42° 40' to 45° 18' north and from long. 70° 43' to 72° 33' west. It is bounded on the north by the Province of Quebec (Canada), on the east by Maine and the Atlantic Ocean, on the south by Massachusetts and on the west by Vermont (separated by the Connecticut River) and Quebec, New Hampshire is called the "Switzerland of America," being noted for the grandeur of its mountain scenery and the beauty of its lakes. It has an area of 9,341 square miles. It is one of the leading states in the manufacture of boots and shoes, and produces also cotton, woolen, and worsted goods, lumber and timber products, hosiery, and foundry and machine shop products.

New Hampshire was visited by Pring in 1603 and by Capt. John Smith in 1614. It formed part of the territory granted to Gorges in 1621. It was settled by the English at Portsmouth and Dover in 1623. Between 1641 and 1679, and at various times thereafter, it was a part of Massachusetts. Its final separation was in 1741. Vermont was claimed as part of New Hampshire until 1764.

About three-fifths of the area of the State consists of forests.

Statistics of agriculture collected for the last Federal census, place the number of farms in the State at 27,053, comprising 3,249,438 acres, valued, with stock and improvements, at \$103,704,196. The average value of farm land per acre was \$13.70, an increase of \$9.83 in 1900. The value of domestic animals, poultry, etc., was \$11,910,478, including 167,831 cattle, valued at \$5,240,122; 46,229 horses, \$5,266,389; 195 mules, \$29,681; 45,237 swine, \$504,174, and 43,772 sheep, \$192,346. The yield and value of field crops for 1911 was: Corn, 23,000 acres, 1,035,000 bushels, \$849,000; oats, 12,000 acres, 406,000 bushels, \$248,000; potatoes, 17,000 acres, 2,125,000 bushels, \$1,849,000; hay, 640,000 acres, 672,000 tons, \$11,558,000; tobacco, 100 acres, 170,000 pounds, \$27,200. The manufacturing business of the State employs 84,191 persons and \$139,990,000 capital, and turns out \$164,581,000 worth of goods annually. The leading industry is the manufacture of boots and shoes and next is

cotton goods, followed by woolen goods, lumber and paper. The indebtedness of the State at the end of the fiscal year 1911 was \$163,867. Receipts were \$2,612,077, and disbursements, \$2,707,535.

The mountain and lake regions of the State afford delightful summer resorts. There are 1,276 miles of steam railways in the State, and 292 miles of electric line. The population in 1910 was 430,572.

The number of manufacturing establishments in New Hampshire having an annual output valued at \$500 or more at the beginning of 1915 was 1,736. The amount of capital invested was \$156,749,000, giving employment to 85,013 persons, using material valued at \$114,993,000, and turning out finished goods worth \$182,814,000. Salaries and wages paid amounted to \$165,521,000.

Light-Houses ceded to United States by, 102.

Northeastern boundary, correspondence regarding. (See Northeastern Boundary.)

New Hope Church, or Pumpkin Vine Creek (Ga.), Battle of.

—When Gen. Johnston withdrew the Confederate forces from Resaca, Ga., May 16, 1864, he retired by way of Cassville across the Etowah and occupied a strong position commanding the Allatoona Pass. May 23 Sherman crossed the Etowah and moved towards Dallas. Hooker, with the Twentieth Army Corps, moving from Burnt Hickory toward Dallas, May 25 encountered a force of Confederate cavalry at Pumpkin Vine Creek. They were driven across the stream, and about two miles to the eastward the Federals encountered Johnston's entire army. Here a severe battle took place. The Confederates retired and occupied a strong position from Dallas to Marietta. The losses of each army in these operations were about 2,500 men killed and wounded.

New Ireland.—Jan. 12, 1779, Capt. Mowatt, with three British sloops of war, landed Gen. McLane and 900 troops on the peninsula of Biggysduce (now Castine), on the south coast of Maine. On the 25th of the following July an expedition of nineteen armed vessels and twenty-four transports under Gideon Saltonstall, a Connecticut sea captain, and 1,500 men from Massachusetts under Gen. Lovell, arrived at Penobscott for the purpose of dislodging the British. They delayed making the attack, however, and the arrival of five British ships from New York on the 13th of August forced them to burn their ships and disperse. As a result of their success the British during the next year attempted to erect Maine into a province under the name of New Ireland.

New Jersey.—One of the thirteen original states. It extends from lat. 38° 56' to 41° 21' north and from long. 73° 54' to 75° 33' west. It is bounded on the north by New York, on the east by New York (separated by the Hudson River, New York Bay and Staten Island Sound) and the Atlantic Ocean, on the south by Delaware Bay and on the west by Pennsylvania and Delaware (both separated by the Delaware

River.) It has an area of 8,224 square miles.

New Jersey was first settled by the Dutch at Bergen, probably about 1617. There were succeeding colonies there of Swedes, Finns, and English. In 1664 it was granted by the Duke of York to Sir George Carteret, lieutenant-governor of the Isle of Jersey, to be a perpetual inheritance and to be called New Jersey. It was reconquered by the Dutch in 1673 and restored to England in 1674, and sold to the Quakers. Proprietary government ceased in 1702 and New Jersey was made a royal province. It was under the same governor as New York until 1738.

Statistics of agriculture collected for the last Federal census, place the number of farms in the State at 33,487, comprising 2,573,857 acres, valued, with stock and improvements, at \$254,832,665. The average value of land per acre was \$48.23. The value of domestic animals and poultry, etc., was \$24,558,639, including 222,999 cattle, valued at \$8,393,117; 88,922 horses, \$12,012,512; 4,041 mules, \$621,774; 147,005 swine, \$1,127,040; 30,683 sheep, \$161,138; poultry, \$2,221,610. The yield and value of field crops for 1911 is given as follows: Corn, 270,000 acres, 9,936,000 bushels, \$7,055,000; wheat, 84,000 acres, 1,462,000 bushels, \$1,404,000; oats, 71,000 acres, 2,024,000 bushels, \$1,012,000; rye, 72,000 acres, 1,181,000 bushels, \$980,000; potatoes, 84,000 acres, 6,132,000 bushels, \$6,439,000; hay, 428,000 acres, 449,000 tons, \$9,878,000. Some iron and zinc is mined in the State. The Mine Hill mines, in Sussex County, produced, in 1910, 308,353 short tons of zinc, besides 67,324 tons of crude oil. The receipts by the State Treasurer for the fiscal year 1911 were \$8,014,876, and the disbursements were \$9,250,283; balance on hand Oct. 31, 1911, \$3,301,781.

In 1905 the manufacturing establishments of the State had a capital of \$715,060,174 and employed 289,532 operatives, who converted \$470,440,176 worth of raw material into silks, cotton and woolen goods, worsteds, hats, hosiery, ironware, leather, beer, breadstuffs, chemicals, pottery, refined petroleum, etc., to the amount of \$774,369,025.

There are 2,297 miles of steam railway within the State and 1,198 miles of electric line. The population in 1910 was 2,537,167.

The number of manufacturing establishments in New Jersey having an annual output valued at \$500 or more at the beginning of 1915 was 9,742. The amount of capital invested was \$1,352,382,000, giving employment to 431,003 persons, using material valued at \$882,465,000, and turning out finished goods worth \$1,406,633,000. Salaries and wages paid amounted to \$280,984,000.

New Jersey:

Boundary line with New York, 1268.

Ratification of—

Amendment to Federal Constitution by, referred to, 70, 249.

Fifteenth amendment by, 4081.

Fourteenth amendment by, discussed, 3836.

Request from the governor of, that Congress consent to an agreement made with New York State regarding boundary, 1268.

New Jersey, The, interference by American minister to France in case of, 387.

New Jersey Plan.—At the convention held in Philadelphia in 1787 to amend the Articles of Confederation William Paterson, of New Jersey, proposed a constitution providing for a single house of Congress, with power to regulate taxation and commerce and choose the President; that requisitions from states should be continued as under the Articles of Confederation; that a judiciary should be established; that the executive should coerce refractory states or individuals, and other matters of general but minor interest. The plan was unfavorably reported. The convention accepted the Virginia plan with extensive modifications.

New London (Conn.), Capture of.—Sept. 6, 1781, Benedict Arnold's expedition against Connecticut arrived in the harbor of New London. The only defense of the town was the unfinished Fort Trumbull, manned by about 25 or 30 State militia under Capt. Shopley. About a third of these were lost while escaping in boats to Fort Griswold after firing one volley, disabling 4 or 5 of their assailants.

New Madrid (Mo.), Battle of.—On the surrender of Fort Donelson to Grant the Confederates abandoned Columbus, Ky., on the Mississippi, and fell back to New Madrid, Mo., about eighty miles below Cairo. It was defended by Fort Thompson and several batteries and by 6 gunboats mounting heavy guns under Commodore Hollins. March 4, 1862, Gen. Pope appeared before New Madrid with an army of 20,000, which he had been commanding in eastern Missouri. On the 14th, having received heavy guns from Cairo, he gave the place a severe cannonading, disabling several of the gunboats. Gen. McCown, unable to hold New Madrid, removed his garrison during the night and in the midst of a thunderstorm to Island No. 10. Pope lost 51 men killed and wounded.

New Mexico.—One of the southwestern group of states; nickname, "Adobe State;" motto, "Crescit eundo" ("It increases as it goes"). It extends from lat. 40° 20' to 37° north and from long. 103° 2' to 109° 2' west. It is bounded on the north by Colorado, on the east by Texas and Oklahoma, on the south by Texas and Mexico, and on the west by Arizona.

New Mexico was visited by Niza in 1539, and Francisco Vasquez de Coronado conducted an expedition consisting of 400 Spanish and 800 Indians as far north as the present city of Santa Fé in 1540. Near the close of the sixteenth century Spanish missionaries made settlements about the head waters of the Rio Grande, and in 1605 Santa Fé was founded. The Spanish were temporarily expelled by the Indians in 1680. In 1816 the region was conquered by the Americans under General Kearny, who proclaimed himself provisional governor. By the treaty of Guadalupe Hidalgo, proclaimed in 1848, New Mexico became a part of the United States. A territorial government was established by act of Congress approved Sept. 9, 1850. In 1853 a part of the Gadsden Purchase was added to New Mexico, making the present area 122,634 square miles. It was admitted to the Union June 20, 1910.

The industries of New Mexico are mostly confined to mining and stock raising. Some cereals, vegetables, fruit and cotton are raised. With the extension of irrigation more attention is being given both to agriculture and stock raising. In 1900 the irrigated area covered 203,893 acres, exclusive of lands in Indian reserves. The area to

be reclaimed under the Federal reclamation act includes 40,000 acres in New Mexico. The Rio Grande project provides for reservoir construction for the irrigation of 180,000 acres in New Mexico and Texas. Private enterprise is also devoted largely to reservoir and canal construction. The forest area covers more than 8,300,000 acres. There are 44,777,905 acres of public lands in the territory unreserved and unappropriated. The land offices are at Clayton, Las Cruces, Roswell, and Santa Fé.

The agricultural development of New Mexico has been promoted by irrigation, both public and private. From less than 400,000 acres of fertile soil in 1900, the farm lands have increased to 2,000,000 acres actually producing through irrigation and dry farming, and it is believed that 3,000,000 acres additional may be reclaimed by storage and diversion of water. The Las Vegas Irrigation project just completed will deliver water to 18,000 acres; by diversion of water from the Pecos River, Guadalupe County, 16,000 acres have been reclaimed; the central pumping station in Portales, Roosevelt County, furnishes water for 10,000 acres. During the fiscal year ending in 1910, the irrigation department received 158 applications to appropriate water to 617,816 acres of land. During the year ended June 30, 1910, 299,255 cattle and 10,988 horses were shipped, at prices ranging from \$18 to \$28. Sheep to the number of 719,444 were shipped. In the spring of 1910 there were 3,500,000 sheep in pasture in the State. Wild game and fish are abundant.

The copper production of 1910 was 3,784,609 pounds, while 5,031,136 pounds was produced the preceding year. In 1911 the output was increased and the cost of production decreased. Companies whose finished product cost 15 cents per pound in 1907, sold in 1911 at 12.7 cents and made a profit. The Chino Copper Company, with mills in the Santa Rita district, is the latest important producer. The gold produced in 1911 was worth \$639,897, and the silver was valued at \$628,282.

In 1906 there were 2,795 miles of steam railway and 14 miles of electric line in the territory. The population in 1910 was 327,301.

New Netherlands.—The second in order of settlement of the thirteen Colonies. It was the name of the region lying between the Delaware and Connecticut rivers. It was claimed by the Dutch by virtue of its discovery by Henry Hudson, an English navigator in charge of a Dutch expedition, in 1609. A trading post, the germ of a colony, was established, 1613-14, and main-

tained. In 1614 the States-General of the Netherlands granted the exclusive privilege of trading in New Netherlands to the explorers. In 1615 the New Netherlands Company was formed to trade in furs, but little attempt was made to settle families before 1621. In 1623 the new country was made a province of Holland and granted the armorial distinction of a count. Charles II. of England in 1664 granted the country to his brother, the Duke of York, and the garrison of the little block-house at New Amsterdam, being menaced by six times its number, was compelled to surrender. The place was recovered by the Dutch in 1673, but restored the following year. In 1674 the name was changed to New York. The question of the priority of the settlement of New York by the Dutch to that of Plymouth by the expatriated English Pilgrims, fresh from Holland, is one that still divides the historians. Dr. Brodhead, on the authority of Holland documents, seems, however, to have shown that the early trading post set up by the Dutch in 1613 was never abandoned and was really a settlement before the date of the Plymouth colonization. A similar post was established, 1614, near the present site of Albany.

Report of board of management transmitted, 4953.

New Orleans (La.), Battle of.—Within a week after the battle of Rodriguez Canal both Jackson and Sir Edward Pakenham received reinforcements. Jackson's whole force on the New Orleans side of the river on Jan. 8, 1815, was about 5,000, of which only 2,200 were at the front. Only 800 of the latter were regulars. On the opposite side of the river was Gen. Morgan with 800 militia. This force of 5,800, indifferently armed and disciplined, was confronted by 10,000 of the finest soldiers in the world, most of them fresh from the continental campaign under Wellington. The Americans were entrenched behind their fortifications, which the British were compelled to approach across an open plain. In the conflict 2,600 were lost to the British, of whom 700 were killed, 1,400 wounded, and 500 taken prisoners. The Americans lost only 8 killed and 13 wounded. Probably no other battle in history presents this disparity in the number lost. The battle was fought after peace was proclaimed, but before this news reached New Orleans. (See illustration opposite.)

New Orleans (La.), Capture of.—Feb. 20, 1862, Commodore Farragut, with his flagship, the sloop of war *Hartford*, arrived at Ship Island, 100 miles north-northeast of the mouth of the Mississippi. He was in command of the Western Coast Blockading Squadron, with directions to take possession of New Orleans. A military force to cooperate with Farragut arrived at Ship Island March 25, under Gen. B. F. Butler. The defenses of New Orleans were Fort Jackson, on the right bank or south side of the river, near its last great bend before it separates into the Delta, and Fort St. Philip, a little farther upstream on the opposite side. The former, with its water battery, mounted 75 guns; the latter 40. Just above the forts was a fleet of 15 vessels, including the ironclad ram *Manassas* and a floating battery, covered with railroad iron, called the *Louisiana*. These were in command of Commodore J. K. Mitchell. A heavy chain was also stretched across the river below Fort Jackson. Farragut's fleet consisted of 6 sloops of war, 16 gunboats, 21 schooners, each carrying a 13 inch mortar, and 5 other vessels. The fleet carried more than 200 guns.

Farragut bombarded the forts for six days with his mortar boats without much effect. The Confederate loss was 14 killed and 39 wounded. It was then decided to run by the forts. The obstructions were opened in the face of a heavy fire, and the fleet formed in three divisions and awaited the signal. It was given at half past 3 o'clock on the morning of April 24, 1862. Capt. Babley led off with his division of 8 vessels. Under the storm of shot and shell they passed the obstructions and ran by the forts against the current in a stream less than half a mile wide, escaping the blazing rafts only to be met at the end of their journey by the Confederate gunboats eager to begin the fight. The second division of the fleet was led through the fiery gauntlet by the *Hartford*, with Farragut on board. The *Sciota*, carrying Fleet Captain Bell, led the third division. The *Kennebec*, *Hasca*, and *Winona* failed to pass the forts, becoming entangled in the rafts and floating debris and delayed beyond the dawn. The latter lost all but one man of her rilled gun crew. Having passed the forts the fleet savagely

attacked the small Confederate gunboats beyond and their destruction was speedily accomplished. May 1 New Orleans was formally occupied by the United States troops. The Federals lost in the taking of New Orleans 37 killed and 147 wounded. The Confederate loss was stated as only 40 killed and wounded.

New Orleans Massacre.—On March 15, 1891, a mob broke into the jail at New Orleans and killed a number of Italians, who were held charged with the murder of Mayor Hennessey. (The Mayor had been active in investigating a secret society of Sicilian origin, called "Mafiosi.") Secretary of State Blaine immediately urged the Governor of Louisiana to proceed against the guilty parties. The Italian Premier, through diplomatic correspondence, urged punishment of the members of the mob and indemnity for the death of the Italians. Blaine insisted that the United States was without authority to act, and that the State of Louisiana had full power. Thereupon the Italian Minister at Washington, Baron Fava, quit his post, thus substantially cutting off diplomatic relations. President Harrison restored friendly relations with Italy by reversing Blaine's position and by offering, in the name of the United States, to pay the indemnity demanded, which amounted to something over \$24,000.

New York.—One of the thirteen original states; nickname, "The Empire State"; motto, "Excelsior." It extends from lat. 40° 30' to 45° 1' north and from long. 71° 51' to 79° 46' west. It is bounded on the north and northwest by Ontario, Canada (separated for the most part by Lake Ontario and the St. Lawrence River); on the east by Vermont (partly separated by Lake Champlain), Massachusetts, and Connecticut; on the south by the Atlantic Ocean, New York Bay, New Jersey and Pennsylvania (partly separated by the Delaware River), and on the west by Pennsylvania and Ontario (separated by Lake Erie and the Niagara River). Long Island, Staten Island, and several small islands are included in the State. The area is 49,204 square miles. It is mountainous in the eastern part, along the Hudson River. A beautiful rolling country constitutes the watershed separating the north and south drainage of the western and central parts of the State. To the north the surface descends in undulating terraces toward Lake Ontario. To the south the country is higher, in places reaching an altitude of 2,000 to 2,500 feet. The valley of the Mohawk extends westward from the Hudson for nearly 150 miles. New York is the first state of the Union in commerce, manufactures, population, and estimated value of property, and the second state in value of farms.

Statistics of agriculture collected for the last Federal census, place the number of farms in the State at 215,597, comprising 22,030,367 acres, valued, with stock and improvements, at \$1,451,481,495. The average value of land per acre was \$32.13, against \$24.34 in 1900. The value of domestic animals, poultry, etc., was \$183,090,844, including 2,423,003 cattle, valued at

\$83,062,242; 59,008 horses, \$80,043,312; 4,052 mules, \$650,497; 666,179 swine, \$5,905,272; 930,300 sheep, \$1,839,651, and poultry, \$7,879,388. The yield and value of field crops for 1911 was: Corn, 530,000 acres, 29,105,000 bushels, \$15,712,000; wheat, 545,000 acres, 6,728,000 bushels, \$6,392,000; oats, 1,310,000 acres, 38,645,000 bushels, \$19,709,000; rye, 135,000 acres, 2,254,000 bushels, \$2,006,000; potatoes, 375,000 acres, 27,750,000 bushels, \$24,975,000; hay, 4,763,000 acres, 4,858,000 tons, \$86,958,000; tobacco, 3,800 acres, 5,054,000 pounds, \$525,616. The State ranks fourth in the production of iron ore, the output for 1910 being 1,287,209 tons, valued at \$3,818,683.

In 1906 the output of tale was 67,800 tons, worth \$626,900, and 9,612,178 barrels of salt, worth \$2,335,150. In 1907, 1,375,020 tons of iron ore, valued at \$2,820,135, mostly magnetite, were mined. The yield of crude petroleum was valued at \$2,127,748, the natural gas at \$766,157, the mineral water at \$686,574, and the building stone, cement, clay products, etc., at \$21,917,152.

The number of manufacturing establishments in New York having an annual output valued at \$500 or more at the beginning of 1915 was 48,293. The amount of capital invested was \$3,334,278,000, giving employment to 1,289,098 persons, using material valued at \$2,108,607,000, and turning out finished goods worth \$3,814,661,000. Salaries and wages paid amounted to \$873,771,000. Preeminent among the industries of the State is the manufacture of clothing. This factory industry originated in the State about 1835, and by 1880 it was first among the industries of the State. In 1905 New York was first in the production of clothing.

The sugar-refining business, though conducted in only eight establishments, turned out \$116,438,838 worth of finished goods. Next in importance to sugar comes the manufacture of iron ware and machinery. Printing and the manufacture of liquors, bread, tobacco, meats and flour follow in importance in the order named. Dairying is carried on in 1,766 establishments, with a capital of \$9,066,426, and the annual output exceeds \$31,000,000. The textile industries turned out \$114,371,226 worth of cotton and woolen goods, silks, carpets, hosiery and knit goods in 1905. In 1906 the flour and grist mills made \$54,516,435 worth of breadstuffs. The issues from the printing presses brought \$137,985,751, nearly half of which was from periodical papers, printed in English, French, German, Italian, Spanish, Hebrew, Scandinavian, Polish, Bohemian, Chinese, Japanese, Arabic, Greek, Hungarian, and twenty-six other languages.

New York City is the third shipping port of the world, London and Liverpool taking precedence. The imports for 1907-08 amounted to \$688,215,938, and the exports to \$701,062,913; the tonnage of foreign trade was: entered, 12,154,780 tons; cleared, 11,939,964 tons.

In 1906 there were 8,326 miles of steam railway and 3,304 miles of electric line. The population in 1910 was 9,113,279.

New Zealand.—The Dominion of New Zealand is distant about 1,200 miles south-east of the mainland of Australia, and consists of three main islands in the South Pacific Ocean, known as the North, South, and Stewart Islands, between 33°-53° S. latitude and 162° E.-172° W. longitude, with several groups of smaller islands lying at some distance from the principal group.

Physical Features.—A mountain chain traverses the west side of the South Island, culminating in Mount Cook, 12,349 feet in height. The North Island is less generally elevated. The North Island has a large central lake (Taupo) 36 miles long, from which the river Waikato flows northwest to the sea. The celebrated "pink terraces" of Rotomahana, formed by the deposit of silica tinted with oxide of iron, were destroyed by volcanic action in 1886, but are again in process of formation. The South Island has many Alpine lakes of great depth.

The extremes of daily temperature vary throughout the year only by an average of 20°. The mean annual temperature of the whole Dominion for the different seasons is: Spring, 55°; summer, 63°; autumn, 57°; and winter, 48°.

AREA AND POPULATION

Maori Population.....	49,844
Total.....	104,356	1,070,910

History. The west coast of the South Island of New Zealand was discovered by Abel Jansen Tasman, the navigator (voyaging under the direction of the Netherlands' East India Company), on December 13, 1642. The islands were visited in 1769

by Captain Cook, who returned to them in 1773, 1774, and 1777. In 1793 the Government of New South Wales despatched H.M.S. *Duculus* to the islands on a diplomatic mission. The first settlement of Europeans was made in 1814, but no colonization took place until 1825. In 1810 British sovereignty was proclaimed, and on May 3, 1841, New Zealand was, by letters patent, erected into a separate colony distinct from New South Wales.

Government.—The Constitution rests upon the Act of 1852, under which the executive authority is entrusted to a Governor appointed by the Crown and aided by a Council of Ministers, with a Legislature of two houses.

Parliament consists of a Legislative Council appointed by the Governor (prior to 1891 the appointments were for life; since that date for 7 years only), at present consisting of 42 members; and a House of Representatives, consisting of 80 members elected for 3 years. Four of the members are Maoris elected by the natives. Women are entitled to register as electors and to vote at the elections for Members of the House of Representatives, but are not qualified for election or for appointment to the Legislative Council. The capital is Wellington.

Army.—The New Zealand Defence Forces consist of the N. Z. Staff Corps (Officers), the Permanent Staff, and the Royal New Zealand Artillery.

Military training is compulsory on all male citizens between the ages of 12 and 25. The Peace Effective is about 30,000 of all ranks. The material from which the Australian and New Zealand armies are being constructed is the finest in the world.

Navy.—The Dominion possesses the super-dreadnought battle cruiser *New Zealand* (18,800 tons), which has been placed at the disposal of H. M. Admiralty, and torpedo-boats and submarine-mining steamers; the Calliope Dock, capable of docking two warships, was subsidized by the Imperial Government in 1898.

Finance.—The annual revenues amount to nearly £12,000,000, and the expenditures are about the same amount. The debt was stated in 1913 as £90,000,000. The British system of money is in use.

Education.—The State system of education is free, secular, and compulsory; there are also 310 private schools, with 20,238 scholars, and in addition, 104 village schools for the Maoris. The higher education of boys and girls in the cities and large towns is carried on in 32 endowed colleges and grammar schools.

Production and Industry.—The area of the two main islands is 65,440,815 acres, and the total extent of land under all kinds of crop, and of land broken up but not under crop, is 1,729,504 acres, while there are 14,214,741 acres of land in sown grass, of which 9,214,515 acres had not been previously ploughed. Amongst the forest productions are the Kauri pine (found only at the northern extremity of the islands), much valued for shipbuilding and for its resin (Kauri gum). New Zealand flax is used for the manufacture of ropes and twine.

Live Stock.—The cattle in 1911 numbered 2,020,171; sheep, 23,750,153 (in April, 1912); pigs, 348,754; and horses, mules and asses, 404,688. The pastures of the South Island produce the celebrated sheep of the Canterbury Plain.

Minerals.—Coal-mining is one of the largest industries. Gold-mining, both alluvial and quartz, is an important industry in many districts, and rich iron ore, in the form of iron sand, has been found in Tara-

naki, and in the form of brown hematite at Parapara; copper is also found.

Dependencies of New Zealand.—Antipodes Group, Auckland Islands, Bounty Island, and Campbell Islands, all uninhabited. Chatham Islands and Cook Islands. The Cook and other islands, annexed to the British Empire in October, 1900, and included in the boundaries of New Zealand since June, 1901, consist of the islands of Rarotonga, Aitutaki, Mangala, Atiu, Manake, Mitiaro, The Herveys and Takutea.

New Zealand:

Sequestration of lands in, claimed by William Webster, referred to, 4327.

Titles to lands in, claimed by American citizens, referred to, 5179.

Newbern (N. C.), Capture of.—After securing Roanoke Island Burnside proceeded to the execution of another clause of his orders by advancing upon Newbern. March 14, 1862, he landed a force of men on the banks of the Neuse River, eighteen miles below the city. They advanced within five miles of the place where they encountered a redoubt, which was taken by assault. The bridge over the Trent, a tributary of the Neuse, was burned by the Confederates as they retreated. With the capture of Newbern 46 heavy guns, 3 batteries of light artillery, and a large amount of stores fell into Burnside's hands. The Federal loss was 90 killed and 466 wounded. The Confederate loss was 23 killed, 58 wounded, and about 2,500 prisoners.

Newburg Addresses.—There were many things to criticize and much to complain of in the conduct of the Revolutionary War, but heroic achievement and devotion to the cause of freedom, as a rule, overshadowed the jealousies of officers and the complaints of men. Gen. Horatio Gates had always been a rival of Washington for command of the army, and frequently conspired against the latter's popularity. In 1783, while Washington's army was encamped at Newburg, two anonymous appeals were issued to the officers, urging them to hold a meeting to consider the question of the money due them by Congress. The appeals were written by Capt. Armstrong, of Pennsylvania, and were supposed to have been instigated by the Gates faction. Washington immediately denounced the meeting as subversive of discipline and called a regular meeting of the officers to consider the matter. Gates was placed in the chair. Washington's friends carried motions characterizing as "infamous proposals" the suggestions of the Newburg addresses, and furthermore declaring their unshaken confidence in Congress.

Newfoundland.—The Island of Newfoundland is situated between 40° 37' 57" 39' N. latitude and 52° 35' 59" 25' W. longitude, on the northeast side of the Gulf St. Lawrence, and is separated from the North American Continent by the Straits of Belle Isle. The island is about 317 miles long and 316 miles broad, and is triangular in shape, with Cape Bauld north, Cape Race southeast, and Cape Ray southwest at the angles.

Physical Features.—The coast is extremely rugged, and the coastal regions are mountainous, the north and east being excessively cold owing to the quantities of ice brought down from the Greenland seas. The interior is undulating and is covered with fells (round hills) interspersed with lakes, rivers, and swamps, but containing many fertile valleys, where the climate is favorable to

Newfoundland *Messages and Papers of the Presidents*

agriculture, and a great wealth of forests, mainly of pine and birch. The climate is salubrious, and the people are a strong, healthy, hardy, industrious race. The thermometer seldom falls below zero in winter, and ranges in the shade in summer from 70° to 80°.

History.—Newfoundland is the oldest English colony in America, for it was discovered by John Cabot on June 24, 1497; the first land seen was hailed as *Prima Vista*—the present Cape Bonavista. The island was afterwards visited (1500) by the Portuguese navigator, Gaspar de Cortereal, and soon became the centre of an extensive fishing industry, with settlements of Portuguese, Biscayans, and French. In August, 1583, the island was formally occupied by Sir Humphrey Gilbert, in the name of Queen Elizabeth, and by the Treaty of Utrecht (1713) the whole island was acknowledged to be British. A Governor was first appointed in 1728, and in 1885 "Responsible government" was accorded to the island.

Government.—The executive is entrusted to a Governor appointed by the Crown, aided by an Executive Council, with a Legislature of two houses.

AREA AND POPULATION.

	Area in English Sq. Miles	Population 1911
Newfoundland.....	42,750	238,670
Labrador Coast.....	120,000	3,949
Total.....	162,750	242,619

Production and Industry.—The inhabitants are chiefly located on the coast-line of the shore and bays, and for the greater part are engaged in fishing—for cod in summer, and seal fishing in winter and spring; agriculture, mining, and lumbering are also engaging attention, while large pulp and paper mills have been erected. The larger portion of the interior is practically in a state of nature; but their railways have opened up large tracts of rich agricultural, mineral, and timber lands hitherto of small value. There were 770 miles of railway open in 1911.

Shipping.—On Dec. 31, 1910, the Mercantile Marine of Newfoundland consisted of 3,318 sailing vessels of 132,510 tons, and 68 steam vessels of 11,041 tons.

The Capital, St. John's (population 32,292), contains two cathedrals, several banks, and numerous public buildings.

LABRADOR, a dependency of Newfoundland, forms the most easterly part of America, and extends from Blanc Sablon, in the Straits of Belle Isle, on the south, to Cape Chudleigh, at the entrance to Hudson's Straits (or to Cape Wostenholme), on the north; the boundaries between Quebec and Labrador being a matter of keen controversy which is expected to come up for settlement before the Judicial Committee of the Privy Council. Labrador possesses valuable cod, herring, trout, and salmon fisheries. One of the grandest spectacles in the universe is provided by the Great Falls of Labrador, on the Hamilton River. The inhabitants of this 850 miles of coastal America are mainly Eskimos, engaged in fishing and hunting. There are no towns, but there are Moravian mission stations at Maggoviik, Hopedale, Nain, Okak, Hebron and Killinek. Pulp and paper mills have been founded at Sandwich Bay and Hamilton Inlet, to deal with the almost inexhaustible supply of timber.

Trade with the United States.—The value of merchandise imported from the United States into Newfoundland and Labrador for the year 1913 was \$1,888,618, and goods to the value of \$1,151,875 were sent thither—a balance of \$2,736,743 in favor of the United States.

Nicaragua.—Nicaragua is the largest of the Central American Republics and is situated between 10° 45'-15° N. lat. and 83° 40'-87° 38' W. long. It is bounded on the north by Honduras and on the south by Costa Rica, the Atlantic and Pacific Oceans washing the east and west coasts. The Atlantic (Caribbean or Mosquito) coast of about 300 miles is low and swampy, with numerous lagoons and estuaries, with harbors at Gracías á Dios, in the extreme northeast, Bluefields, and San Juan del Norte or Greytown in the extreme south. The Pacific Coast of about 200 miles is rocky and elevated, but possesses good harbors in Fonseca, Corinto, Brito and San Juan del Sur. The area is 51,600 square miles.

Physical Features.—A mountain range known in the southeast as the Cordillera de Yolaina runs from the Caribbean coast to the northwestern boundary. Parallel with this range and close to the Pacific is a range of volcanic peaks, of which several are liable to eruption. Between these ranges are low-lying plains and the Lakes of Nicaragua and Managua and east of the main range the country slopes gradually to the low-lying Mosquito Coast.

The principal rivers are the Wanks or Cocos or Segovia, which forms part of the northern boundary with Honduras; the Río Grande, with its tributary, the Tuma; the San Juan, which forms part of the southern boundary with Costa Rica and flows from Lake Nicaragua to the Caribbean at San Juan del Norte. The main hydrographical features of the country are the vast lakes, Nicaragua and Managua. Lake Nicaragua has a total area of almost 3,000 square miles and a total length of over 100 miles. The lake contains numerous islands and islets, the largest containing the two volcanic peaks of Omotepe and Madera. Lake Managua is about thirty miles long and has a total area of 580 square miles. The Panoloya channel connects the two lakes, but the higher level of Managua presents a navigable connection between the two lakes.

History.—Nicaragua was discovered by Columbus in 1502 and was overrun by the Spaniards under Davila in the first quarter

of the sixteenth century, and formed part of the Spanish Captaincy-General of Guatemala until the revolt of the Spanish Colonies. In 1821 Nicaragua declared its independence of Spain and from 1823-1839 formed part of the Federation of Central American States, but since 1839 the Republic has been independent.

Government.—The Constitution rests on the fundamental law of Nov. 10, 1911 (as amended in 1913), and is that of a centralized republic. The President is elected by direct suffrage for four years. President of Nicaragua, until Dec. 31, 1916, Adolfo Diaz.

Congress consists of a Senate of 13 members and a Chamber of 40 deputies, elected in both instances for 4 years and renewable as to one half biennially.

There is a supreme court at the Capital, and courts of appeal at Leon, Masaya and Bluefields, with courts of first instance in all centres of population.

Service in the Army is compulsory and universal between the ages of 17 and 55.

Ethnography.—On the east coast are many uncivilized tribal Indians known as Mosquitos, their numbers being estimated at 30,000, while pure-blooded Indians are still living in the central districts. There is also a sprinkling of Europeans and their descendants, the greater number being Spanish and German. The total population is about 600,000.

Production and Industry.—The principal agricultural product is coffee, which is grown, principally in the department of Matagalpa, under German management and exported to Hamburg. Bananas are also grown in the eastern districts and on the Mosquito coast. Rice, beans, sugar, cocoa, and tobacco are also cultivated, but large quantities of foodstuffs are imported. The live stock includes cattle, horses, and pigs. The forest products are important, mahogany and rubber being exported.

Gold and silver, copper, coal petroleum, and precious stones are found, the gold export in 1910 exceeding £200,000. The mines are not fully developed.

Manufactures.—Leather and furniture, beer and spirits, tobacco, candles and soap are among the principal industries, those connected with cattle raising being the most important. The imports are principally cottons and other manufactured goods from the United States.

Foreign Trade.—Of the imports 50 per cent are from the United States and 15 per cent from Germany; the exports, 40 per cent to the United States, 15 per cent to Germany, and 12 per cent to France.

Railways.—A line, 172 miles in length, runs from the principal port of Corinto to Leon Managua and Granada on the lakes, whence a line of steamers runs at regular intervals to the southern shores. Many lines are projected, including a trans-isthmus system to Monkey Point, on the Caribbean.

Posts and Telegraphs.—In 1908 there were 135 post offices and 120 telegraph offices, with 1,591 miles of line, the Republic being linked up with the Pacific cable from Mexico to Peru.

Shipping.—In 1908 the ports were visited by 804 vessels, mainly United States and German. The Pacific harbors are the most frequented, Corinto being the chief commercial port.

Debt.—In May, 1909, the Nicaraguan Government obtained a foreign loan of £1,250,000, issuing gold bonds with interest at 6 per cent. The product of the sale of these bonds was to pay off the British loan of 1886 (£245,000), and the United States loan of 1904 (\$1,000,000), while \$2,175,000 was set aside for the construction of a new

railroad from Lake Nicaragua to Monkey Point on the Atlantic seaboard. The 1911 government entered into negotiations for a \$20,000,000 gold loan in the United States. In June, 1912, the government defaulted in the payment of interest on the 6 per cent bonds, and entered into an agreement with the bondholders for the substitution of other securities with a scheme of payments. Up to September, 1915, the American bankers had advanced only \$1,000,000, while they hold as security all the revenues (including customs and railways) and practically control the Banco Nacional.

Cities.—Capital, Managua. Population, 35,000. Others are Leon (65,000), Granada (20,000), Matagalpa, Masaya, Jinotega, Chinandega, Esteli, Boaco, Jinotepe, and Greytown.

The unit of value is the gold *cordoba* of 100 centavos, worth \$1 in United States currency, the paper peso fluctuating, and being worth about 8 cents. In conjunction with the United States loan scheme a monetary reform has been introduced. Token money of the standard value of the United States dollar is issued by the Banco Nacional, and the paper pesos are convertible at the rate of 12.50 per cordoba.

Trade with the United States.—The value of merchandise imported into Nicaragua from the United States for the year 1913 was \$2,925,807, and goods to the value of \$1,437,939 were sent thither—a balance of \$1,487,868 in favor of the United States.

 Duties on vessels from San Juan del Norte suspended by proclamation, 4872.

Nicaragua, Treaty with.—The treaty of friendship, commerce, navigation, and as to isthmian transit, was denounced by Nicaragua to take effect in 1902. The extradition treaty of 1870 was also denounced by Nicaragua to take effect in the same year. The protocol with Nicaragua of 1900 for the construction of an interoceanic canal provided that the President of the United States is empowered to acquire control of such portion of the territory of Nicaragua as may be necessary or advisable to construct a ship canal from a point near San Juan del Norte on the Caribbean Sea, through Lake Nicaragua to Brito, on the Pacific Ocean. As a preliminary to negotiations it is agreed that the details of the canal construction be the same as those contained in a treaty with Great Britain pending decision of the Senate of the United States. (See Extradition Treaties.)

Nicaragua also became a party to the convention between the United States and the several republics of South and Central America for the arbitration of pecuniary claims and the protection of inventions, etc., which was signed in Buenos Aires in 1910 and proclaimed in Washington July 29, 1914. (See South and Central America, Treaties with.)

Nicaragua Canal.—A proposed ship canal across the Republic of Nicaragua to connect the Atlantic and Pacific oceans. As early as 1522 Lake Nicaragua was entered from the western coast and explored by Spanish navigators. In 1550 Antonio Galvao, a Portuguese, proposed four routes for a ship canal across the Isthmus, one by way of Lake Nicaragua and the San Juan River. Later surveys were made by the Spanish and Central American governments. In 1850 Col. O. W. Childs surveyed a canal route from Lake Nicaragua to the Pacific. More complete surveys were made for the United States in 1872-1873 and 1885, and the cost of construction was variously estimated at from \$10,000,000 to \$140,000,000. The Nicaraguan Government made concessions to Americans for constructing a canal in 1849 and 1880 and to a Frenchman in 1858, but they all lapsed without results. In 1884 a treaty was signed for the construction of a canal by the United States, but the Senate refused to ratify it. In 1887 a new concession was granted by Nicaragua and confirmed by Costa Rica. A company was immediately formed and chartered by the United States, work was begun, but ceased in 1892 for lack of funds, and finally in 1893 the company was placed in the hands of a receiver. President McKinley in 1899 appointed a commission to report on the question of the best route for an

Interocean canal and in 1901 a report was presented advising the Nicaragua route, mainly on the ground of the difficulty of acquiring rights and control in Panama. In 1900 the House passed a bill providing for the construction of a Nicaragua Canal but the Senate refused to pass it. Another bill of a similar character passed the House in January, 1902, but before it went to the Senate, a report was received from the Canal Commission recommending the Panama route. The construction of the Panama Canal settles the question of the isthmian route.

Nickel.—A name given to the five-cent piece, although only one-third of the metal is nickel, the other two-thirds being copper.

Ninety-Six (S. C.), Siege of.—Immediately after the surrender of Charleston (May 12, 1780) Clinton sent Lieut. Conger up the Saluda to Ninety-Six, a village in South Carolina, about seventy-five miles from Columbia. May 21, 1781, a part of Gen. Greene's army laid siege to the place.

Kosciusko planned the approaches and the condition of the garrison had become critical, when, on June 20, the siege was raised on the approach of Lord Rawdon with the flank companies of three regiments.

Nipmuc Indians. (See Indian Tribes.)

Nipsic, The, disabled at Samoan Islands, 5479.

Niter, appropriation for improvement in manufacture of, recommended, 2957.

No Man's Land.—A small island three miles southwest of Martha's Vineyard, Mass., to which it belongs.

The term was also applied to a strip of land ceded by Texas to the United States in 1850. It lies between lat. 36° 30' and 37° north and long. 100° and 103° west. It was not included under any government, though often called part of the Indian Territory. The name originally proposed for the district was Cimarron. In 1890 it became part of Oklahoma, and is now known as Beaver County.

Nobel Prize.—The Swedish scientist, Alfred B. Nobel, the inventor of dynamite, died in 1896, bequeathing his fortune, estimated at \$9,000,000, to the founding of a fund, the interest of which should yearly be distributed to those who had mostly contributed to "the good of humanity." The interest is divided in five equal shares, given away, "One to the person who in the domain of physics has made the most important discovery or invention, one to the person who has made the most important chemical discovery or invention, one to the person who has made the most important discovery in the domain of medicine or physiology, one to the person who in literature has provided the most excellent work of an idealistic tendency, and one to the person who has worked most or best for the fraternalization of nations, and the abolition or reduction of standing armies, and the calling in and propagating of peace congresses."

A committee of the Norwegian Storting awarded the prize for the promotion of peace between nations to President Roosevelt in 1906. The money value of the prize was about \$40,000, and the President devoted it to the Foundation for the Promotion of Industrial Peace at home. In accordance with his wishes, Congress passed an act creating a board of trustees, consisting of the Chief Justice of the United States, the Secretaries of Agriculture and Commerce and Labor, a representative each of labor and capital, and two persons representing the general public, to administer the fund. An industrial peace committee of nine members was authorized to meet in Washington each year during the sessions of Congress to discuss differences arising between capital and labor. (See Industrial Peace Committee.)

Nominations.—In politics an act of designation to office, the ratification of which depends upon another person or body of persons. The President nominates to the Senate candidates for high Federal offices, and makes the appointment only after approval. The head of an Executive Department nominates to the President those whom he desires as his subordinates in the higher official position. A national, state, city, county, or town convention of a political party nominates its candidates for office in anticipation of election.

Nominations. (See Executive Nominations.)

Nominating Convention. (See Conventions, Nominating.)

Nonfeasance.—Failure to perform the duties of a public office.

Nonimportation Agreement.—In 1765 the merchants of New York and Boston unanimously agreed to order no new merchandise from England, and to countermand old orders. This was done in retaliation for the passage of the Stamp Act by Parliament. The agreement was strictly observed until 1770, when only tea was prohibited. The members of the Continental Congress signed a nonimportation agreement in 1775.

Nonintercourse Act.—In consequence of the interference with American commerce by vessels of France and England, who were then at war, Congress in 1807 passed the embargo act prohibiting foreign commerce. This was found to work unnecessary injury to American shipping interests, and in 1809 it was repealed and the nonintercourse act substituted. It forbade the entrance to American ports of public or private British or French vessels, all commercial intercourse with France or Great Britain, and the importation after May 20, 1809, of all goods grown or manufactured in the two countries or their colonies. The act was to continue until the next session of Congress, but was revived by acts of June 28, 1809, May 1, 1810, and March 2, 1811.

Non-Intervention.—Reference to a political policy not to intervene. (See Intervention.)

Noo-whâ-hâ Indians. (See Indian Tribes.)

Nook-wa-châh-mish Indians. (See Indian Tribes.)

Norfolk, Va.:

Blockade of port of, removed by proclamation, 3431.

Referred to, 3446.

British officers treated at hospital at, 3404.

Navy-yard at, referred to, 2312.

Surrender of, referred to, 3313, 3315.

Vessels entering and leaving port of, order regarding, 3225.

Norfolk (Va.), Burning of.—Lord Dunmore, the royal governor of Virginia, assumed military control of Norfolk in November, 1775. He was defeated in an effort to dislodge some Virginia and Maryland militia who had taken up a position near the town. He thereupon embarked in a British vessel which lay in the Elizabeth River. Col. Woodford, with the Second Virginia Militia, and Col. Howe, with one regiment from North Carolina and two companies of Maryland militia, occupied the town. On Jan. 1, 1776, Dunmore began a bombardment, and sent ashore a party who set fire to the town. Its destruction was completed by the Americans to prevent its becoming a shelter for the British.

Norfolk (Va.), Surrender of.—The movement of the Federal Army up the peninsula of Virginia, in May, 1862, led to the withdrawal of the Confederate force from Norfolk and to the destruction of the ironclad *Monitor*. This left the James River open to navigation. An expedition was sent out

from the Fortress Monroe, under Gen. Wool, May 10, to take possession of Norfolk. It was turned over by the mayor without a struggle.

Norsemen.—In the sagas or accounts of Scandinavian heroes the Vikings of Norway are represented as having visited the coast of America as early as 861 A. D. The narratives of the early voyages of the Northmen to America are more or less intermingled with fiction. Enough has been verified, however, to warrant some reliable historians giving credence to the more likely part of their claims. We are told that Norsemen had established a settlement in America in 875 A. D. (probably in Iceland, visited by Naddod twelve to fifteen years previously), and that Gumbiorn, a Norse navigator, sighted land farther west.

Eric the Red discovered and named Greenland in 982, and three years later made a second voyage to the new country. During the same year an expedition under Bjarni sailed from Iceland to Greenland, but was driven south by a storm and sighted land at Newfoundland and at Cape Cod or Nantucket. Thence he returned to Greenland. In the year 1000 Leif, son of Eric the Red, sailed with one ship and thirty-five men in search of the land seen by Bjarni. He touched on the coast of Labrador and, journeying southward, stopped for the winter near the site of the present city of Boston. Leif culled the place Vinland, from the abundance of grapes found. This seems to be the earliest authentic account of Norse discoveries in America.

Thorvald, Leif's brother, visited Vinland in 1002, wintered near Mount Hope Bay, R. I., and in the spring of 1003 sent a party of his men to explore the coast, probably as far south as Cape May. In 1004 Thorvald was killed near Boston by Skrelings (the Icelandic name for the aboriginal Americans), and his companions returned to Greenland. About 1007 or 1008 Thorfinn Karlsefne sailed from Greenland with three ships and 160 persons. He landed at Rhode Island and spent three years in Vinland. Here a son was born to Thorfinn, from whom Albert Thorvaldsen, a Danish sculptor living at Copenhagen in the latter part of the eighteenth and the early part of the nineteenth century, was able to trace direct descent. A full account of these early voyages is preserved in the "Codex Flateöensis," written in 1387-1395, and found in a monastery on the west coast of Iceland. The latest tidings of Vinland were received in 1547, and communication with Greenland ceased about 1400. Before Columbus was born European navigators had journeyed westward and touched land, and several maps of the Atlantic Ocean had been made. Prior to 1470 Columbus had visited Iceland, and it has been suggested that he there learned of the Western Continent from the Norse navigators.

North America.—The area of North America, including Mexico, is about 7,200,000 square miles, a little less than twice that of Europe. Its extreme longitudes extend from a little west of 170° W. to 52½° W. in the east of Newfoundland, and its extreme latitudes from about 80° N. latitude to 15° N. latitude in the south of Mexico. It is surrounded by seas on all sides, except in the south, where it joins the Isthmian States of Central America.

The nations of North America, with the form of government and capital of each follow:

Canada (Dominion), Ottawa.
Mexico (Republic), Mexico City.

Newfoundland (British), St. John's.
United States (Republic), Washington.
Alaska (United States), Juneau.

Three main divisions can be made in the relief of North America. The Eastern Mountains, the Great Plains, and the Western Mountains. The Eastern Mountains extend from Labrador to Alabama. The Great Plains form a comparatively level and continuous surface from the Arctic Ocean and the shores of Hudson Bay to the Gulf of Mexico. This is broken in only three places by elevations of importance—the Ozark Mountains, the Lake Plateau (on which stand Lakes Superior, Michigan and Huron) and the Black Hills of South Dakota. A distinction must be made between the Prairies, which are open plains with few trees, rising to about 800 feet in Minnesota at the watershed between Hudson Bay and the Gulf of Mexico and the high plains to the west, which are far dryer and less fertile than the prairie wheat lands. In parts these rise to over 6,000 feet, and are much higher than the Appalachians. In Canada these high plains form the ranching lands of Alberta. In the Arctic plains there are many marshes and lakes. The Western Mountains consist, in the United States, of the Rockies, with summits exceeding 14,000 feet, among which Pike's Peak forms a conspicuous dome, the Sierra Nevada, the highest point of which is Mount Whitney (14,522 feet) and the Cascade range, with Mount Rainier (14,525 feet) and Mount Shasta, and the Coast ranges, which reach 7,500 feet in the densely forested Olympic Mountains of Puget Sound.

Between the Rockies and the Sierra Nevada is the Great Basin traversed by ridges, which rise to no great elevation above the plateau. There is little rainfall, and there are numerous salt lakes, of which the Great Salt Lake in Utah is the most important. The Death Valley in California is several hundred feet below sea-level. The Valley of California is a depression between the Sierra Nevada and Cascade ranges and the Coast ranges. The Western Coast ranges rise to great elevations in Alaska, where Mount St. Elias and Mount McKinley, over 20,000 feet, are the most prominent summits.

Mexico is a tableland, generally above 6,000 feet, which is bounded by two escarpments, the Eastern Sierra Madre, not a distinct mountain range but the margin of the plateau, and the Western Sierra Madre, which is from 8,000 to 12,000 feet and falls steeply to the Pacific. Here is a broad volcanic zone in which Orizaba, 18,252 feet, Popocatepetl, 17,250 feet, and Ixtachihuatl, 16,960 feet, are the highest summits. Colima is the only active volcano. The rivers are mostly short and torrential. The peninsula of Yucatan is a low limestone plateau flat and treeless with few running streams.

Five drainage areas may be distinguished, the Arctic, the Atlantic, the Gulf, inland and the Pacific. In the Arctic Basin the Mackenzie is the only large river. The Atlantic Basin contains the St. Lawrence draining the Great Lakes and the Hudson. The Delaware, Susquehanna and Potomac cut deeply into the northern Alleghenies, but south of Chesapeake Bay the rivers rise on the eastern margin. The Alabama and Tennessee form longitudinal valleys in the southern Alleghenies. The Mississippi occupies the southern portion of the Great Plains. It has numerous large tributaries, the Ohio on the east, and the Missouri, Platte, Kansas, Arkansas and Red River on the west. The Rio Grande del Norte rises in the San Juan mountains. On

the Pacific Coast the Colorado rises in the Rockies and flows in deep canyons through the Arizona deserts. Use has been made of its water to irrigate the Salton depression to the northwest of its mouth. From the Colorado to the Columbia there are no large rivers except in the valley of California, where the Sacramento and San Joaquin are invaluable for irrigation. The Snake tributary of the Columbia River rises in the Yellowstone National Park, and cuts great canyons through a lava plateau. The Fraser, like the Columbia, has a long north and south valley. The Yukon rises not far from the coast in the northwest, and flows into Bering Sea. The Inland Basin, between the Rockies and the Sierra Nevada, has no large rivers.

North Ann Crossing (Va.), Battle of.—

Proceeding southward after the battle of Spottsylvania, Grant's army arrived at the North Ann River May 23, 1864. Warren, whose corps was on the right, crossed the river at Jericho, Hancock at a point four miles below, and the Sixth Corps at Jericho. Lee meantime had retired to a position south of the North Ann, and his left wing rested on the river at a point between the two sections of Grant's army. Burnside's corps was unable to cross the river. Lee's position was impregnable and Grant was compelled to withdraw his army to the north side of the river after a loss of 1,607 in killed and wounded. May 27, having been rejoined by Sheridan, the Army of the Potomac moved toward the Pamunky River.

North Carolina.—One of the thirteen original states; nicknames, "The Tar State," "The Tar-Heel State," and the "Old North State;" motto, "Esse quam videri" ("To be rather than to seem"). It extends from lat. 33° 50' to 36° 33' north and from long. 75° 27' to 84° 20' west. It is bounded on the north by Virginia, on the east and southeast by the Atlantic Ocean, on the south by South Carolina and Georgia, and on the west by Tennessee (separated by the Smoky and other ranges of mountains). It has an area of 52,426 square miles. The surface is mountainous in the west, rolling or gently undulating in the center, and toward the eastern coast or lands bordering on the Albemarle and Pamlico Sounds generally level.

Unsuccessful attempts at colonization were made by Sir Walter Raleigh in 1585-1587. Scattering settlements were made prior to 1663, probably as early as 1633. The territory was granted to proprietors in 1663 by Charles II. The first two colonies are known in history as the Albemarle and the Clarendon. In 1669 a constitution was introduced modeled by the philosopher, John Locke, upon principles of a landed aristocracy and feudal service. The constitution was not a success and was abandoned after twenty-five years. Citizens of North Carolina passed a set of resolutions in 1775 similar to the Declaration of Independence. (See Mecklenburg Declaration.) It was the first colony to instruct its delegates in Congress to vote for independence. The State seceded from the Union May 20, 1861, and was readmitted by act of Congress June 25, 1868.

Statistics of agriculture collected for the last Federal census, place the number of farms in the State at 253,725, comprising 22,439,129 acres, valued, with stock and improvements, at \$375,716,210. The average value of land per acre was \$15.29, as against \$6.24 in 1900. The value of domestic animals, poultry, etc., was \$62,643,984, including 700,861 cattle, valued at \$12,550,054; 166,151 horses, \$18,428,134;

North Carolina Messages and Papers of the Presidents

174,711 mules, \$23,669,687; 1,227,625 swine, \$4,628,046; 214,473 sheep, \$559,217, and poultry, \$2,212,570. The value of field crops in the State in a recent year was placed by the census bureau in excess of \$125,000,000.

North Carolina is the leader among the Eastern states in the production of gold, the output for 1910 being 3,291 fine ounces, worth \$68,045. The silver production was 9,053 fine ounces, valued at \$4,620. Iron and copper are also produced. Vegetable raising for early northern markets is a growing industry, as well as dairying.

The manufactures of the State are those of cotton, lumber and tobacco. The total output for 1905 was \$142,520,776, of which \$51,002,843 was cotton goods, oil and cake; \$28,087,969 tobacco, and \$15,731,379 lumber and timber. In 1906 the State contained 4,409 miles of steam railway and 107 miles of electric line. The population in 1910 was 2,206,287.

The number of manufacturing establishments in North Carolina having an annual output valued at \$500 or more at the beginning of 1915 was 5,507. The amount of capital invested was \$253,842,000, giving employment to 151,333 persons, using material valued at \$169,942,000, and turning out finished goods worth \$289,412,000. Salaries and wages paid amounted to \$56,283,000.

Sent to Mediterranean Sea, 826.

North Dakota.—One of the western group of states; nickname, "Cyclone State;" motto, "Liberty and Union now and forever, one and inseparable." It extends from lat. 46° to 49° north and from long. 96° 30' to 104° 5' west. It is bounded on the north by the Dominion of Canada, on the east by Minnesota, on the south by South Dakota, and on the west by Montana. Its area is 70,837 square miles. Its surface is generally undulating and level.

Dakota was first settled at Pembina by French traders in 1780. The territory of Dakota, comprising the present States of North and South Dakota, was organized from Nebraska Territory by act of March 2, 1861. It was divided on the forty-sixth parallel and the upper portion admitted to the Union Nov. 2, 1889 (5455).

Under the Federal reclamation act much improved farm land is subject to irrigation. The tillable area of the State is more than 15,000,000 acres, of which 10,000,000 is improved. The live stock reported Jan. 1, 1910, was 712,000 horses, valued at \$81,168,000; 8,000 mules, \$1,040,000; 270,000 milch cows, \$8,373,000; 616,000 other cattle, \$12,628,000; 621,000 sheep, \$2,484,000; 206,000 swine, \$2,266,000; the wool production was 715,000 pounds scoured. The yield and value of field crops in 1911 was: Corn, 290,000 acres, 7,250,000 bushels, \$4,350,000; wheat, 9,150,000 acres, 73,200,000 bushels, \$65,148,000; oats, 2,180,000 acres, 51,230,000 bushels, \$21,004,000; rye, 36,000 acres, 598,000 bushels, \$454,000; potatoes, 42,000 acres, 5,040,000 bushels, \$2,772,000; hay, 192,000 acres, 211,000 tons, \$1,477,000; flaxseed, of which the production was the largest of any state in the Union in 1910, was 5,778,000 bushels on 1,605,000 acres, and sold for \$13,578,000. There were 399,641 tons of lignite coal produced in the state in 1910, worth \$595,139. The total mineral output of the State was \$738,818. There were 753 manufacturing establishments in the State, with an aggregate capital of \$11,594,000, paying \$2,422,000 in wages and producing \$19,150,000 in finished products.

There are within the State 1,300,333 acres of public land unreserved and unappropriated. United States land offices are located at Bismarck, Devil's Lake, Dickinson, Fargo, Minot, and Williston.

In 1906 there were 3,761 miles of steam railway and 16 miles of electric line within the State. The Federal census of 1910 gave the population as 577,056.

North Dakota:

Admission of, into Union—

Discussed, 5485.

Open to settlement by proclamation, 5707.

Set apart as public reservation by proclamation, 5579.

Lottery in, efforts to secure charter for, discussed, 5515.

Unlawful combinations in, proclamation against, 5185.

North Point (Md.), Battle of.—After burning Washington in 1814 Gen. Ross withdrew to Admiral Cockburn's fleet and the invaders ran up the Chesapeake Bay to the mouth of the Patuxent River. On the morning of Sept. 12, 1814, the British forces 9,000 strong were landed at North Point, twelve miles from Baltimore, with provisions for three days and eighty rounds of ammunition per man. Baltimore was defended by about the same number of troops under Gen. Samuel Smith. Hearing of the landing of the British, he sent Gen. Stricker with 3,200 men to oppose their advance. Gen. Ross was killed in a preliminary skirmish. The battle was carried on for four hours, when the Americans fell back toward the city and the British bivouacked on the field.

North Polar Regions.—The arctic Ocean consists of a deep sea over 2,000 fathoms, on the southern margin of which there is a broad continental shelf with numerous islands. Into this deeper sea there is only one broad channel, about 700 miles, between Greenland and Scandinavia. Bering Strait is only 49 miles wide and 27 fathoms deep. The southern boundary of the Arctic Ocean is the Wyville-Thomson and Faeroe-Icelandic submarine ridge, which separates the North Atlantic from the Norwegian and Greenland seas. Most of the icebergs are formed on the east and west coasts of Greenland and are carried south by the Polar currents. The lowest temperature observed is -63° in 85° N. latitude, a good deal less than that of Verkhoyansk (-49°), the least recorded temperature of the globe. Forests of pine and larch reach 73° N. in Siberia, and to the north of this are dwarf birches, willows, mosses and lichens. There is sufficient vegetation to the north of Greenland to support rodents and ruminants. Among sea animals are the right whale and the narwhal, which is found further north than any other species, and the walrus. The right whale is now almost extinct. Numerous seals are found on the Arctic margin. Numerous races are found along the fringe of the Arctic. The Lapps are the original inhabitants of Arctic Norway; there are wandering tribes of Samoyedes, Tunguses and Yakuts; the Chukches of Bering Peninsula are more numerous than most of the nomadic tribes. The most northerly of the polar peoples are the Eskimo. Peary owed the success of his expedition to the North Pole largely to the help of these tribes, who were called the Arctic Highlanders by Sir J. Ross.

Exploration.—The first discoveries in the Arctic were made by the Norsemen, Iceland being reached in 861 A. D. and Greenland before 1,000 A. D. Newfoundland and Nova Scotia were visited from the settlements made in Greenland. Modern Arctic exploration may be said to commence with the search for the Northwest Passage. In 1496 John Cabot and his son Sebastian reached 58° N. latitude. In 1527 Robert Thorne, of Bristol, actually set out for the North Pole, but the records of his voyage are unsatisfactory. The first attempt on the Northeast Passage was made by Sir Hugh Willoughby and Richard Chancellor. The latter succeeded in reaching the north coast of Russia at a point which afterwards became the port of Archangel, and in opening up trade with that country. The second expedition in this direction was made by Stephen Burrough, who discovered Novaya Zemlya. In 1576 Martin Frobisher sailed for the Northwest Passage and discovered Frobisher and Hudson Straits.

In 1585 John Davis made the most important series of early voyages. He reached 75° N. latitude as a result of three expeditions, but was unable to make the passage round North America to the west. He demonstrated, however, the commercial importance of the Arctic in whales, seal and deer skins. In 1580 an expedition reached the Kara Sea under the auspices of the Muscovy Company, who in 1594 and 1596 again fitted out ships for the exploration of the Northeast Passage. The pilot, William Barent, was the first Arctic explorer known to pass a winter in the Polar ice.

In 1607 Henry Hudson began his remarkable voyages. His first two expeditions, in which he reached $80^{\circ} 23'$ N. latitude, were to the northeast. His last voyage in 1610 was again directed toward the Northwest Passage. The *Discovery* was ice bound in Hudson Bay, and Hudson was deserted by his crew, who mutinied in the ensuing summer, and nothing is known of his fate. In 1615 William Baffin was appointed pilot to the *Discovery* and sent out by the Merchant Adventurers to search for the Northwest Passage. In 1616 he penetrated north along the west coast of Greenland to latitude $77^{\circ} 45'$, a record not afterwards passed for two centuries.

In 1725 Russian exploration began, and between that date and 1760 Bering mapped a large part of the northeast coast of Asia and opened up the fur trade. In 1773 another strictly Polar expedition was planned, and John Phipps reached $80^{\circ} 40'$ N. latitude, to the north of Spitzbergen. In 1817 two expeditions were sent out with geographical and scientific aims, under Buchan and Franklin, and under Ross and Parry. In 1821 Parry made an attempt to the south of Lancaster Sound. A further voyage in 1823 was also unsuccessful. Meanwhile Franklin made an overland journey to the mouth of the Coppermine River, where a canoe voyage was undertaken to Point Turnagain, $68^{\circ} 18'$ N. and $109^{\circ} 25'$ W. longitude. Franklin's second overland journey (1825-1827) resulted in further exploration on the Arctic coast of North America. Parry's last Arctic voyage in 1827 was an attempt to reach the Pole by sledge boats. From the north of Spitzbergen, traveling for the first time by night alone, he reached latitude $82^{\circ} 45'$. In 1829 Ross made another attempt on the Northwest Passage in the *Victory*, and reached Bellot Strait, the real channel leading to the Arctic Sea, but failed to recognize it as a passage, and returned without success after spending four winters in the ice. In the course of these voyages he attained the Magnetic Pole. The anxiety at Ross's long absence led to Black's relief voyage in the *Terror*. The *Erebus* and *Terror*, which had returned from the Antarctic, were fitted out with steam, and Franklin was commissioned in 1845 to attempt the entrance to Lancaster Sound. The two ships were last sighted near this point by a whaler, but were never seen again. In 1847 relief expeditions were sent out from the east through Lancaster Sound, from the west through Bering Strait, and from the south to the Arctic shores of North America.

The final result of these search expeditions was the completion of the Northwest Passage by McClure, who returned home in 1854. The first authoritative news of the fate of Franklin was obtained by Rae in his exploration of the west coast of Boothia. In 1857 Lady Franklin fitted out a last search expedition, which was commanded by McClintock, and finally Franklin's last record was found on the east coast of

King William's Land. From this it was learned that his ship had been caught in the ice and never released. Till 1874 further Polar exploration was left to American, German, and Austrian explorers.

The Northeast Passage was discovered by Nordenskiöld, who reached the mouth of the Yenisei in two successive years, and attained the East Cape in 1879, after a winter in the ice not far from Bering Strait.

The first crossing of the lofty ice-covered plateau of Greenland was accomplished by Nansen in 1888. Another remarkable journey over the inland ice was carried through by Peary, who proved the insular character of Greenland. In 1892 Nansen attempted to reach the Pole by a novel method. His plan was to follow the course taken by the ill-fated *Jeannette*, which had been caught in the ice near Wrangel Land, and had drifted to New Siberia. The *Fram* was constructed to withstand enormous ice pressure, and preparations were made for drifting across the Polar Basin in the hope that the currents would bring the ship close to the Pole. Finding that the ship's track did not approach sufficiently near to the Pole, Nansen and Johannsen left the ship in 1895 with dogs and sledges, and reached N. latitude 86° 14', the farthest point attained up to that time. The *Fram*, under the command of Otto Sverdrup, finally reached Norway in safety, after drifting to nearly as high a latitude as that attained by Nansen.

In 1896 an attempt to reach the North Pole by balloon was made by Andree, but the expedition was never seen again. In 1909 the Duke of the Abruzzi made an expedition in the *Stella Polare*, and Captain Cagni succeeded in reaching latitude 86° 32', a little north of Nansen's record, by a sledge journey over the ice.

The honor of first reaching the Pole was reserved for Commander Robert Edwin Peary, of the United States Navy, who finally, after many voyages in the north of Greenland, attained success by a remarkable sledge journey during the winter night, reaching the North Pole on April 6, 1909. (See Article Explorations.)

North Star, The. (See *Rodgers, The.*)

North Star State.—Alternative nickname for Minnesota. (See *Gopher State.*)

Northeastern Boundary.—By the treaty of 1783 the northeastern boundary of the United States was defined as extending from the source of the St. Croix River due north to the highlands or watershed between the Atlantic and St. Lawrence systems, thence along those highlands to the northwesternmost head of the Connecticut River. There was a continual dispute over this boundary, and the claims of Americans and Canadians were pressed so vigorously as to lead to preparation for hostilities. The matter was referred to arbitration. In 1831 the King of the Netherlands, as arbitrator, made an award which neither Great Britain nor the United States would accept. Finally by the Webster-Ashburton treaty of 1842 the present boundary was agreed upon, not far from that suggested by the Dutch King. The United States secured about seven-twelfths of the disputed territory and Great Britain five-twelfths.

Northeastern Boundary between United States and Great Britain:

Amicable settlement of, discussed, 1747, 1811, 1820.

Convention with Great Britain regarding, 347, 351, 958.

Conventional agreement to be arranged, 1811.

Correspondence in regard to, 1564, 1622, 1648, 1687, 1738, 1785, 1791, 1798, 1812, 1945, 1965, 2023.

Referred to, 1448, 1784, 2278.

Depredations committed on disputed territory, 1733.

Correspondence regarding, 1738, 1785, 1791.

Disagreement in decision of, 819, 947.

Report of, 1846, 1845, 1965, 2024, 2087.

Discussed, 64, 65, 191, 242, 264, 268, 1156, 1239, 1316, 1368, 1455, 1591, 1820, 1931, 2047.

Excitement growing out of, partially subsided, 1820.

Imprisonment of American citizens charged with trespassing, 963, 969, 990, 1123.

Release of, 1110.

Joint commission for survey of—

Appointment of, referred to, 1702.

Report of, 2024.

King of Netherlands selected as arbitrator, 974.

Award of, referred to, 1110, 1122, 1123, 1126.

Great Britain agrees to, 1123.

Protest of United States minister against, 1122.

Maps regarding transmitted, 960.

Proposition of United States for settlement of—

Declined by Great Britain, 1368.

To be acceded to by Great Britain, 1811.

Referred to, 922, 946, 1070, 1133, 1156, 1200, 1346, 1448, 1697, 1729, 1784, 1796, 1805, 1954.

Reports of commissioners on, 1846, 1945, 1965, 2024, 2087.

Resolutions of Maine legislature regarding, 1126.

Survey of, referred to, 1845, 1931, 1945.

Treaty regarding, discussed, 2015, 2047.

Northern Cheyenne Indians. (See *Indian Tribes.*)

Northwest Territory.—The portion of the United States known in history as the Northwest Territory comprises all the country lying between the Ohio River, the Mis-

Mississippi River and the Great Lakes, immediately west of the original states, and now forming the states of Ohio, Indiana, Illinois, Michigan, and Wisconsin. The original states severally laid claim to this territory by their charters, which granted possession from ocean to ocean. New York ceded her claims to this region to the General Government in 1782, and was followed by Virginia in 1784, Massachusetts in 1785, and Connecticut in 1786. The latter state, however, retained a small tract as the foundation for her school fund. This became known as the Western Reserve.

Congress in July, 1787, passed an ordinance for the government of this territory, and to the wise measures incorporated into that law the states formed from the territory are indebted for much that is wise and judicious in their constitutions. It is claimed by some that the foundations for future national greatness were laid by the manner in which Congress dealt with the question of territorial government at this time. A clause forbidding slavery after 1800 was at first voted down, but afterwards was adopted. The ordinance provided that no land should be taken up until it had been purchased from the Indians and offered for sale by the United States; no property qualification was to be required of electors or elected; a temporary government might be established until the male population of the territory reached 5,000, then a permanent representative government would be permitted, with a Representative in Congress entitled to debate but not to vote. When the inhabitants of any one of the five divisions of the territory reached 60,000 it should be admitted as a state, these states to remain forever a part of the United States, pay their portion of the Federal debt, and in their government uphold republican forms and prohibit slavery; but fugitive slaves were to be surrendered. Arthur St. Clair was governor from 1788 to 1802.

Northwest Territory:

Government established in, and recommendations made to enable the governor and secretary to visit the posts in, 190.

Northwestern Boundary.—The territory bounded on the north by lat. 54° 40', on the east by the Rocky Mountains, on the south by lat. 42°, and on the west by the Pacific Ocean, has been variously claimed by Russia, Spain, Great Britain, and the United States. Russia's claim rested for the most part upon occupation by fur traders, and was settled by a treaty of Jan. 11, 1825, under the terms of which the United States were to make no settlements north of lat. 54° 40' and Russia none south of that latitude. England made a treaty with Russia on the same terms. By the treaty which ceded Florida in 1819 the Spanish claims were confined to the south of lat. 42°. This left the territory between 42° and 54° 40' to the Americans and English. Great Britain had no claim by discovery. The claim of the United States rested upon the voyage of Gray up the Columbia River in 1792 and the explorations of Lewis and Clark through the Rocky Mountains and the Oregon country in 1805 and 1806 under the orders of Jefferson. By the treaty of Oct. 20, 1818, the entire country west of the Rocky Mountains was to be opened to both countries for ten years, and at the end of this period joint occupation for an indefinite time was agreed upon. This arrangement

produced much dissatisfaction and was made a political issue in the United States in 1841. (See "Fifty-four Forty or Eight.") After considerable negotiation lat. 49° was agreed upon (in 1846) as the boundary from the Rocky Mountains to the channel between Vancouver Island and the mainland. (See also San Juan de Fuca explorations.)

Northwestern Boundary between United States and Great Britain.

Commission for settlement of, recommended and referred to, 2810, 2866, 3989, 4056.

Convention for adjustment of, 958, 2243, 2299, 3380.

Concluded and signed, 2302.

Exchange of ratifications referred to, 2307.

Correspondence regarding, 890.

Referred to, 2127.

Discussed, 705, 922, 946, 956, 1133, 1614, 1615, 1684, 2049, 2063, 2110, 2127, 2180, 2190, 2214, 2242, 2277, 2484, 3092, 3197, 3894, 3899.

Emperor of Germany chosen as arbitrator, 4097.

Award of, 4139.

Thanks of United States tendered, 4140.

Final settlement of, 4357, 4382.

Joint commission for marking, 4141.

Report of, 4191.

Marking and tracing of, recommended, 2655, 2741.

Settlement of—

By arbitration, 4139.

Recommended, 3198, 3213.

Proposition regarding, by—

Great Britain—

Declined, 2243.

Referred to, 2305.

Submitted, 2299.

Referred to, 2305.

Referred to, 2484.

Treaty regarding, 3894, 3956.

Warlike preparations made by Great Britain on account of, 2277.

Norwalk Harbor, Conn., survey of, referred to, 1043.

Norway.—Norway occupies the west and north of the Scandinavian peninsula, between 57° 58'–71° 11' N. latitude and 4° 30' 31' 11' E. longitude. Within these limits lie the mainland and a multitude of islands and inlets, estimated at 150,000 in all. The boundaries on the north, west, and south are the Arctic and Atlantic Oceans and the North Sea, and the southeast coast is washed by the Skager Rack, which separates the kingdom from the Danish promontory of Jutland. The Swedish frontier forms the eastern boundary, but beyond this frontier to the northeast the Norwegian Amt of Finnmarken extends along the boundary of the Russian Grand Duchy of Finland.

Physical Features and Climate.—The coast is extremely rugged, broken by inlets or fjords, and studded with islands. The fjords run inland for a great distance, with precipitous cliffs on either side, and down many of them the mountain torrents find their way to the sea in picturesque, elevated waterfalls.

The coast is fringed with a "fence of islands" (skjærgaard), almost throughout its length from southeast to northeast. In the extreme north is the large island of Magerö, which contains, in North Cape, the most northerly point of Norway and of the continent of Europe.

Norway consists of an almost continuous plateau, with frequent peaks and valleys. In addition to the fjords there are countless inland lakes, the largest being Mjösen, sixty miles in length. The principal river of Norway is the Glommen. Many of the rivers run in precipitous beds, and magnificent waterfalls occur in the course of many of them, the most famous being Sarpfoss on the Glommen, Rjukanfoss, or "Smoking Fall," on the Maan, Lofefoss and Espelandfoss, which discharge into Hardanger Fjord, and Vöringsfoss, on the Bjørcea River.

The climate of Norway is in no way typical of the latitudes in which the kingdom is situated, for although a great part of the land lies within the Arctic Circle, the coast is kept free of ice by the prevailing southwest winds and the Gulf Stream drift of warm waters from the Atlantic Ocean. The direction of the Gulf Stream is not only along the west, but round the north and northeast coast, and the most northerly point of the kingdom is thus kept free from the icy currents which cause many lands in lower latitudes to be ice-bound; in fact, the Skager Rack of the south is liable to be closed by ice although the seas of northernmost Norway, 1,000 miles nearer the North Pole, are free all the year round. The highest mean annual temperature is 45° Fahrenheit on the southwest coast, and the lowest mean is 1° above freezing in the extreme north, when the summer average is as high as 53° Fahrenheit, as against 62°, the summer mean at the capital.

The Midnight Sun.—Owing to the geographical position of Norway, the country generally experiences a phenomenon known as "The Midnight Sun," the sun being above the horizon continuously from May to July, at North Cape, and even in the extreme south there is no darkness from April to August. Conversely, there is no sun at North Cape from November to January, but this absence of sunlight does not prevail further south.

History.—The Kingdom of Norway had been established for some centuries and Christianity had been introduced about 150 years when King Harald III. fell at Stamford Bridge in England (1066 A. D.), and from 1389-1521 the kingdom formed part of the tripartite League of Kalmar (see Denmark), by which Norway, Sweden and Denmark were united under King Eric (1389-1397). In 1521, the secession of Sweden left Norway in union with Denmark, and in 1814, by the Treaty of Kiel (Jan. 14, 1814) this union was dissolved, and the kingdoms of Norway and Sweden were united under one crown. In 1905 the Norwegian Storting adopted a resolution dissolving the union with Sweden (June 7), and later in the same year a referendum resulted in an overwhelming majority (368,211 votes to 184) in favor of the dissolution of the union. Negotiations between representatives of Norway and Sweden settled the terms of the sever-

ance, which was ratified by the Norwegian Storting and the Swedish Riksdag on Oct. 9. On Oct. 27 King Oscar of Sweden and Norway issued a proclamation relinquishing the crown of Norway, and a Norwegian referendum authorized the Storting to offer the crown to Prince Charles of Denmark, who entered the Norwegian capital with his consort on Nov. 25, and was crowned in Trondhjem Cathedral in 1906, as King Haakon VII., the first of that name (Haakon the Good), having reigned over Norway from 935-961 A. D.

Government.—Haakon VII., King of Norway, born at Charlottenlund, Aug. 3, 1872 (son of the late King Frederick III. of Denmark); elected King of Norway and accepted the throne Nov. 18, 1905. The Legislature, or Storting, consists of 122 members, elected for three years by universal suffrage of Norwegians of both sexes, aged twenty-five years, paying a certain minimum of taxation. The Storting meets annually and elects one-quarter of its members to form the Lagting, the remaining three-quarters forming the Odelsting.

There are separate courts for civil and criminal cases. Civil cases are generally brought before a court of mediation (forlikskommission) from which appeals may be brought to local court or to the three superior courts of appeal (overretter) at Christiania, Bergen and Trondhjem. Criminal cases are tried by jury courts or at assizes. The final court of the Kingdom is the Supreme Court at Christiania.

Army.—Service in the National Militia is universal and compulsory. (For the Army, see Armies of the World.)

Navy.—The maritime population is universally liable for service in the Navy between the ages of twenty-two and forty-one, with active training of six months. (For the naval strength, see Navies of the World.)

Production and Industry.—The total land area is estimated at 76,518,000 English acres, of which 17,071,158 acres were (1910) woods and forests, 2,746,544 acres cultivated land, and 57,048,849 acres permanent grass, marsh land and uncultivated. The chief crops were wheat, barley, oats, rye, corn, potatoes and hay. The live stock included cattle, sheep, goats, horses and reindeer.

The chief articles of export are timber, woodwork, wood pulp and matches, fish oil and other products of the fisheries, paper, skins and furs, nails, minerals, stone, ice, saltpetre, cyanide, ferro-silicium, zinc, aluminium, calcium carbide, condensed milk,

butter, margarine and tinned goods. The chief imports are cereals, groceries and clothing, coal, hides and skins, cotton and wool, oil, machinery, steamships and metal goods.

Education.—Primary education is compulsory and free between the ages of seven and fourteen, schools being maintained by local taxation with State grants in aid. The attendance is very high, the pupils numbering 376,723 in 1910. The University of Christiania was founded in 1812, and was attended in 1912 by 1,500 students.

Finance.—The budget for 1913-1914 called for an expenditure of 142,020,000 kroner, in anticipation of a revenue of 159,702,000 kroner. The public debt amounts to 362,805,563 kroner, which cost in 1911 17,730,900 kroner in interest and sinking fund. The unit of value, the krone, is equivalent to \$0.268 United States money.

Railways.—In 1913 there were 1,946 miles of railway open for traffic, 282 miles being private and the remainder State owned. The receipts of the State lines in 1912 were 22,671,596 kroner and the expenses 17,275,549 kroner.

Shipping.—The mercantile marine of Norway is exceeded as to tonnage by only three nations (United Kingdom, United States, and Germany), and amounted in January 1, 1913, to 3,232 vessels (2,488,582 gross tons), of which 2,126 (1,800,614 gross tons) were steamers and motor boats, and 1,106 (687,968 gross tons) sailing vessels.

Cities.—Capital, Christiania, on the south-east coast at the head of Christiania Fjord. Population (1910), 241,834. There are fourteen other cities having a population of between 10,000 and 100,000.

There are many reasons why Americans should be interested in Norway and in the development of our trade with that rugged and northerly country. There are certainly half as many Norwegians here as there are in the Fatherland and they own six times as much farming land. It is estimated that the property owned by Norwegians in this country is equal in value to the total wealth of Norway. This in itself is an excellent reason for further developing the trade relations between this great part of our population and Norway. And in considering how we may most effectively build up our trade we should consider carefully not only what we may sell to Norway, but what Norway has to sell that we can buy.

The commerce of Norway has increased rapidly in the last few years. In 1901 the exports amounted to \$44,248,000; in 1912, the latest year for which statistics are available, they had reached just a little less than \$100,000,000. The imports in 1901 were valued at \$76,981,000; in 1912 they were valued at just a little more than \$150,000,000. A large part of this trade is in the hands of Germany and England. Of the imports the United States furnish only a paltry 6 per cent. and of the exports we take about 9 per cent. These figures indicate the possibility of extending the commerce between Norway and the United States. The principal Norwegian exports are fish and fish products, wood and wood pulp, paper, oil, hides and skins, sulphur, calcium carbide, condensed milk, and matches. The principal imports are coal and coke, iron and steel wares, rye and rye meal, machinery and locomotives, iron wrought and unwrought, wool and wool manufactures, cotton and cotton manufactures, hides and skins, coffee, sugar, wheat and wheat meal, barley, petroleum, tobacco, and bacon and lard.

N'Quentl-má-mish Indians. (See Indian Tribes.)

Nuestra Senora, The, seizure of, and claims arising out of, discussed, 3795.

Nullification.—The general meaning of nullification is the act of invalidating or making void. In American politics it is almost exclusively applied to the doctrine set forth by John C. Calhoun and his friends in the South Carolina controversy with the Federal Government, 1828-1833. This doctrine asserted the right of any state to declare the unconstitutionality of any United States law, though it should have been enacted in the proper manner and held to be constitutional by the Supreme Court of the United States. It was further claimed that any attempt to enforce such law in a state which had refused to acknowledge its validity would justify it in at once leaving the Union. The immediate cause of this declaration of principles was that the existing tariff law bore unjustly, so it was claimed, on the non-manufacturing and raw-material-producing states of the south. The arguments in favor of nullification were mainly based upon language used by Jefferson and Madison in the Kentucky and Virginia resolutions of 1798 and 1799 in regard to the alien and sedition laws. Here it was asserted that the General Government was not "the final or exclusive judge of the powers delegated to itself, but that, as in all other cases of compact among powers having no common judge, each party has an equal right to judge for itself, as well of infractions as of the mode and measure of redress." Senator Hayne, of South Carolina, was the first to advocate this doctrine in Congress. On the advice of Calhoun the governor of South Carolina called a convention, and an ordinance of nullification was passed on Nov. 19, 1832. This ordinance declared the Federal tariff law "null and void" and authorized the citizens to refuse payment of duties under it. It also denied the right of the Supreme Court of the United States to pass upon the nullification ordinance. The legislature was on the point of enacting a bill in accordance with this ordinance when the necessity was partly obviated by the passage of Clay's compromise measures (c. v., in 1833). The attempt to interfere with the execution of Federal laws was met by President Jackson's prompt instructions to the revenue officers at Charleston, his proclamation of Dec. 10, 1832 (1203), and his special message to Congress on the subject (1173). March 3, 1833, a new tariff bill was passed which gave satisfaction to the nullifiers, and on March 16 a state convention of South Carolina repealed the ordinance of nullification.

Nullification:

Message regarding, 1173.

Proclamation regarding, 1203.

Referred to, 1185, 1197.

Nutmeg State.—A nickname given to the State of Connecticut in facetious reference to the story that wooden nutmegs were manufactured in the state.

Nutrias, The, seizure of, and claims, arising out of, 4114, 5198, 5547, 5673, 5873, 5962.

Award in case of, 6070.

Oath.—A solemn appeal to the Supreme Being in attestation of the truth of some statement or the binding character of some covenant, undertaking, or promise. In point of law an oath is a solemn declaration which is necessary as a condition to the filling of some office more or less public or of giving evidence in a court of justice. The Constitution requires that before the President shall "enter on the execution of his office he shall take the following oath or affirmation: 'I do solemnly swear (or affirm) that I will faithfully execute the office of President of the United States, and will to the best of my ability preserve, protect and defend the Constitution of the United States.'" The first act of Congress provided for oaths of office. An oath similar to the foregoing is required of all officers of the executive, legislative, and judicial departments of states and the nation.

Congress in June, 1778, directed Washington to administer the following oath of allegiance to the officers of the Army before leaving Valley Forge: "I, [name of officer] in the armies of the United States of America, do acknowledge the United States of America to be free, independent, and sovereign states, and declare that the people thereof owe no allegiance or obedience to George III, King of Great Britain, and I renounce, refuse, and abjure any allegiance or obedience to him; and I do—that I will to the utmost of my power support, maintain, and defend the United States against the said King George III, his heirs and successors, and his or their abettors, assistants, and adherents, and will serve the said United States in the office of—which I now hold, with fidelity according to the best of my skill and understanding." By an act of Congress of Aug. 3, 1861, the oath of allegiance for the cadets at West Point was amended so as to abjure all allegiance, sovereignty, or fealty to any state, county or country whatsoever and to require unqualified support of the Constitution and the National Government. In 1865 oaths of allegiance were required as a condition of pardon of persons who had participated in the rebellion. The oath required of persons appointed to office from the southern states, declaring that they had in no way aided or abetted the rebellion, was called the "iron clad oath," and was modified as soon as all apprehension of further difficulty with the south had passed away.

The oath administered to jurors entering upon their duties is substantially as follows: "You shall well and truly try the issue between the parties and a true verdict give according to the evidence, so help you God"; and the juror sometimes kisses the New Testament. Witnesses must be sworn in a similar manner, the word being, "The evidence you shall give shall be the truth, the whole truth, and nothing but the truth, so help you God." Witnesses must have sufficient understanding to know the nature of an oath, and on this ground young children are excluded as witnesses. A religious belief was formerly required before an oath could be considered as binding. Several statutes of Congress permit a simple affirmation in lieu of an appeal to the Almighty. Any person having conscientious scruples against oaths now makes a solemn affirmation. Jews are sworn on the Pentateuch, keep on their hats, and conclude their oaths with the words "so help me Jehovah." A Mohammedan is sworn on the Koran. A Chinaman is sworn by breaking a dish on the witness box or beheading a fowl. The form of taking an oath

is immaterial, the essential thing being that the witness acknowledge some binding effect derived from his sense of moral obligation to tell the truth. (See also Perjury.)

Oath of Allegiance, army officers directed to subscribe, anew, 3219.

Taken by insurgents in the Philippines, 6692.

Oath of Office:

Act prescribing, for participants in War between the States discussed, 4076.

Modification of, recommended, 3580.

Observatories. (See Meteorological Observatory; Naval Observatory.)

Obtrusive Partizanship.—An expression often incorrectly quoted as "Offensive Partizanship" (used by Grover Cleveland, 5079). In the same message he used the term "Perfidious Activity." Both these expressions referred to efforts on the part of office-holders to influence voting, and became very popular.

Stipulations with French Cable Co. referred to, 4738, 4744.

Oceania.—One of the geographical divisions of the globe. It embraces the Continent of Australia and the Islands of the Pacific Ocean east to Easter Island (109° W.). The islands generally are grouped in two divisions—Australasia and Polynesia.

Australasia is subdivided into Australia proper and Melanesia, "islands of the blacks." The latter includes New Guinea, Bismarck Archipelago, New Caledonia Island, and Solomon, Santa Cruz, New Hebrides, and Loyalty groups. The Fiji Islands (Polynesia), are usually treated with Australia, as are New Zealand and Tasmania.

Polynesia comprises Polynesia proper—Ellice, Samoan, Phoenix, Palmyra, Society, and Tuamotu Islands—and Micronesia, "the little islands." The latter embraces the remaining islands of the Pacific, including Marianne and Caroline west and Hawaiian east. Land area of Oceania, 3,460,000 square miles—more than three-fourths belonging to Australia. (See Australia.)

For the Oceanic possessions of the United States see Hawaii and the Islands of Wake and Guam.

British Possessions.—Besides the islands constituting Australasia, the principal groups, and isolated islands belonging to Great Britain are Cook Islands, Manihiki, Tokelau and Phoenix groups, Ellice Islands, Gilbert Islands, Santa Cruz Islands, British Solomon Islands, and the Islands of Pitcairn, Fanning, Malden, and Christmas. The New Hebrides Islands are jointly protected by Great Britain and France.

French Possessions.—New Caledonia and dependencies, and the Society Islands, the Marquesas, Tuamotu, Gambier, and Tubuai groups, and the Island of Rapa.

German Possessions.—The northeastern portion of New Guinea (Kaiser Wilhelm Land), Bismarck Archipelago, the northerly part of the Solomon group, Marshall Islands, the Marianne or Ladrone Islands (exclusive of Guam), the Caroline Islands and Pelew Islands.

New Guinea.—Discovered by Portuguese in 1511; named Papua in 1526; New Guinea in 1545. Visited by Dutch 1676. Circumnavigated by Dampier 1699. The Dutch took possession of the country west of 141° E. in 1828. The southeastern portion became a British protectorate in 1884; a Crown Colony in 1888. A German protectorate was established in the northeast in 1884. Total area about 312,000 square miles. Interior wide plains and lofty mountains; greatest elevation 16,000 feet. The chief rivers are the Kaiserin Augusta and the Fly. The coast line is deeply indented and has fine harbors. The forests contain cedar, sandalwood, ebony, India rubber, areca and sago palms, bamboos, etc. The soil is adapted to tobacco, rice, tea, sugar cane, coffee, cotton, fruits, etc. The German have established cotton and tobacco plantations. The chief industries are wood carving and manufacture of rope and pottery. Leading exports—copra, pearl shell, trepang, gold, pearls, and sandalwood. Gold, coal, and plum-bago are found. The population is about 1,800,000. Area of Papua (British), 90,540 square miles; population 270,000. The govern-

ment is administered by a Lieutenant Governor. New South Wales, Victoria, and Queensland furnish funds and have a voice in its affairs. Port Moresby is the capital; population 1,500. Kaiser Wilhelm's Land—German New Guinea—area 70,000 square miles; population about 300,000. In hands of German New Guinea Company. Friedrich Wilhelmshafen most important harbor.

Samoan Islands.—First explored by Bougainville in 1768; Christianity was introduced in 1820. Neutrality and independence was guaranteed by Great Britain, United States, and Germany in 1889. The islands were divided between Germany and United States in 1899. They are situated in the middle of the Pacific about 400 miles northeast of Fiji; the largest, Savali and Upolu, belong to Germany. Tutuila and adjacent islands to United States. Total area 1,701 square miles. Chief products are sugar, coffee, cotton, maize, and tropical fruits. Apia is the chief trading center; population 3,742. Pago-pago, Tutuila, is a fine natural harbor. The natives are Christians. (See also Samoan Islands and Tutuila.)

New Hebrides.—Discovered by Spanish in 1606; explored and named by Cook in 1774. The group is northeast of New Caledonia and stretches northwest and southeast 500 miles. Area, 5,700 square miles. Cocoanuts (for copra), maize, millet, coffee, and bananas are grown. Population about 80,000. Jointly administered by France and England.

Solomon Islands.—Discovered by Mendana in 1567-1568; rediscovered by Bougainville 1768. An archipelago in Melanesia, 500 miles east of New Guinea. Area 16,950 square miles, in large part covered with thick forests. Chief commercial products tortoise shell, copra, ivory nuts, and sandalwood. Germany has Bougainville and dependencies in the north; the southern portion of group is under British rule; Choiseul and Isabel were ceded to Great Britain by Germany in 1899.

Trade with the United States.—The value of merchandise imported into Oceania from the United States (including the Philippine Islands) for the year 1912 was \$79,102,845, and goods to the value of \$37,543,441 were sent thither—a balance of \$41,559,404 in favor of the United States.

Rolls of, transmitted to Congress, 508.

Salary of. (See Salaries.)

Official Etiquette.—As state social functions in America are not hedged about by the privileges and prerogatives to which rank, station and birth alone entitle the holder in monarchical courts, American ceremonies, observances and ritual are, in comparison, simple and meagre. No special lessons are required nor are rehearsals needed to carry off with proper dignity any of the observances of state courtesy. Nevertheless, although there is an absence of that ostentatious display which marks the ceremonies of the courts of Europe, official etiquette in America is prescribed by a rigid code established by the highest authorities, which is not disregarded.

It is only natural that state receptions

should be governed by more arbitrary rules than those which direct purely social intercourse. It must be remembered that when an official reception is held, it is always an official duty that is being performed. The state forms and ceremonies which have obtained in America have varied from time to time according to the usages of the day and the taste of the national hostess. They have, at times, been further modified by periods of national calamity, war and the death of immediate relatives, but through all this variation and modification there has run the golden thread of democratic simplicity so dear to the national heart.

The period of Washington's administration must be regarded as a time of transition. Nor is there cause for wonder that much formality and stateliness marked the dispensation of national hospitality in the beginning of the nation's development. The term "colonial" is today associated in our minds with a courtly, stately conventionality peculiarly its own. Men and women of that time, who, either at first hand or through their mothers and fathers, had received their education in courtesy, grace and proper behavior from the customs of England, could not easily shake off their second nature; and no doubt fretted over the meagre means of gratifying their wishes; but as soon as they were cut off by their own desire from this influence and became self-dependent, that pure simplicity nurtured by individual worth became evident. It is not surprising that in the earliest period the Executive Mansion was a place of stately and continuous reception, and that Martha Washington is famous for the dignity, grace and splendor of her social reign; but, on the other hand, the simplicity of Jefferson's time has passed into a proverb, and was such as to excite comment even abroad. The youth, gaiety and impetuous brilliancy of "Dolly Madison" contributed largely to the breaking down of much of the severity and conventionality which preceded her time.

The President is the leader of social as well as of official life. Although he is accessible to all to the extent that all may call upon him, he is not expected to return any visits. He, of course, has the privilege of calling upon a friend. The same is equally true of the wife of the President. He is always addressed as "Mr. President." He does not leave the country, as a rule, and in this respect is under greater restrictions than are any of the crowned heads of Europe. Under this "unwritten law" a foreign legation in Washington is construed as being foreign ground and may not be entered by the President. Neither may he set foot upon a foreign vessel. The only formal calls that he may make are those upon a President-elect, an ex-President, or a President or reigning monarch of a foreign state visiting Washington. He carries no personal card, but one reading simply "The President." He may not accept valuable gifts; and if such are tendered, they are usually placed in the National Museum.

The Chief Justice of the Supreme Court ranks next to the President socially. Below him in turn socially come the Vice-President, the Speaker of the House, the General of the Army and the Admiral of the Navy. It is considered one of the first duties of the Members of the House of Representatives to call upon these when coming to Washington. The social rank of women is decided by that of the husband or father.

The Inaugural Ball, held upon the evening of the day of inauguration, was the first social event in the life of the newly inaugurated President, until it was abolished by President Wilson. It partook more of the nature of a reception than a ball, for it was

so largely attended that dancing was an impossibility. It was usually held in one of the departmental buildings. For several days after the President's inauguration, public informal receptions follow and a week or more is consumed in receptions during the day and dinners at night. These latter are classified, to a certain extent, so that all branches of the official service are formally recognized. Saturday is the official reception day at the White House. The public receptions which are held from the first of January until the beginning of Lent were inaugurated by President Jackson. The guests assemble in the East Room and as quickly as this is filled the President greets them as they pass out. The formal receptions are not held so frequently as previously, on account of the great increase in the number of Senators and Representatives. This is compensated for by inviting some Members of Congress to state dinners and entertaining others with less ceremony.

The scene at a formal or official reception is a brilliant one. The Government officials, the officers of the Army and Navy, and the foreign legations mingle in uniform, and the ladies are not in full dress, but in reception toilettes. Diplomats and attachés wear their court costumes. The President stands at the head of the line, next to him his wife, who invites several prominent ladies to assist her in receiving. As the guests enter, they pass down the receiving line until they have greeted all of the ladies of the receiving party. The daughters of the household of a state official are not invited to state dinners unless the daughter is the female representative of the family.

The general conduct of, and the social observances at these several ceremonies are the same as those which direct social observances elsewhere in good society. The cards of invitation and responses to the ordinary receptions do not differ from those in other American homes; but at the state dinners and official receptions, which are to be regarded in some sense as an interchange of international courtesy, the rules of attendance are very strict and no one would think of neglecting to attend without an eminently satisfactory excuse.

Officialism.—The perfunctory performance of duties in office merely for pay or glory, without genuine display of public interest.

Ogallala Indians. (See Indian Tribes.)

Ogden vs. Saunders.—An important United States Supreme Court case limiting the operation of State bankruptcy laws. Ogden, of Louisiana, declared upon certain bills of exchange drawn in 1806 upon the defendant Saunders, a citizen of Kentucky, but then living in New York. Saunders pleaded a certificate of discharge under the act of the New York legislature of 1801 for the relief of insolvent debtors. The district court of Louisiana gave judgment for the plaintiff. On a writ of error the case was taken before the Supreme Court of the United States, which decided in 1827 that the power to pass bankruptcy laws did not belong exclusively to the United States, and that the fair and ordinary exercise of that power by the States need not involve a violation of the obligation of contracts, but that State law could not discharge a debt due to a citizen of another State. Justice Johnson delivered

the opinion, in which concurred Chief Justice Marshall and Justices Duval and Story.

Ogden, Utah, bill to authorize city of, to assume increased indebtedness vetoed, 5518.

Ogdensburg (N. Y.), Capture of.—In September, 1812, Gen. Brown was sent to Ogdensburg, N. Y., at the mouth of the Oswegatchie River, to garrison Fort Proctor and attempt the capture of some British stores that were reported as being on the way up the St. Lawrence River. Oct. 2, about forty British bateaux, escorted by a gunboat, were seen approaching. On the 4th two gunboats and twenty-five bateaux, containing 750 men, started for Ogdensburg. The American force amounted to about 1,200 effective men. After two hours of firing the invaders withdrew with a slight loss. No one was injured on the American side. Later Maj. Forsyth was placed in command of the garrison at Ogdensburg. With a party of citizens and militia he crossed over to Elizabethtown, Canada, Feb. 6, 1813, and rescued a number of prisoners held there. In retaliation for this exploit Lieut.-Col. McDonnell, with about 800 men, crossed the river on the ice Feb. 22, 1813, and after a short engagement gained possession of the town, which they gave over to plunderers.

Ohio.—One of the central western group of states; nickname, "The Buckeye State." Ohio extends from lat. 38° 24' to 41° 57' north and from long. 80° 34' to 84° 49' west. It is bounded on the north by Michigan and Lake Erie, on the east by Pennsylvania and West Virginia (separated by the Ohio River), on the south by Kentucky (separated by the Ohio River), and on the west by Indiana, and has an area of 41,010 square miles.

Ohio was first visited by the French under La Salle at the end of the seventeenth century. It was claimed by both the French and English. It was ceded to Great Britain in 1763 and to the United States in 1783. In 1787 it became part of the Northwest Territory. The first settlement was made at Marietta in 1788. The State was admitted to the Union in 1802.

Statistics of agriculture collected for the last Federal Census, place the number of farms in the State at 272,545, comprising 24,105,708 acres, with stock and improvements, valued at \$1,902,694,589. The average value of farm land per acre was \$53.34, an increase from \$33.35 in 1900. The value of the domestic animals poultry, etc., was \$197,332,112, including 1,837,697 cattle, valued at \$51,403,344; 910,224 horses, \$93,910,638; 22,850 mules, \$2,775,831; 3,105,627 swine, \$19,412,730; 3,909,162 sheep, \$14,941,381; poultry, \$9,532,672. The yield and value of field crops for 1911 was: Corn, 3,900,000 acres, 150,540,000 bushels, \$87,313,000; wheat, 2,265,000 acres, 36,240,000 bushels, \$32,987,000; oats, 1,700,000 acres, 54,570,000 bushels, \$24,556,000; rye, 60,000 acres, 930,000 bushels, \$790,000; potatoes, 190,000 acres, 12,350,000 bushels, \$10,374,000; hay, 2,556,000 acres, 2,505,000 tons, \$47,344,000; tobacco, 88,000 acres, \$1,400,000 pounds, \$6,186,400.

Ohio ranks fourth among the states in the value of its mineral production, according to the United States Geological Survey. The total value of the mineral production of the state increased from \$111,229,656 in 1912 to \$121,690,661 in 1913. It is the premier state in the value of clay products and in the manufacture of grindstones and pulpstones. It is second in the production of bromine and lime, third in the

output of calcium chloride, natural gas, salt, sand and gravel, and gypsum, fourth in the production of coal, oilstones, scythe-stones, and stone, and seventh in quantity and sixth in value in the production of petroleum. Ohio ranks next to Pennsylvania and second in the country in the manufacture of pig iron, and if pig iron rather than iron ore were taken as the measure of iron production, Ohio would rank second in the total value of its mineral products, which would be increased in 1913 by nearly ninety per cent over the value obtained if pig iron is excluded. Practically all the pig iron produced in Ohio, however, is made from Lake Superior ores and the iron production is credited to the state in which the iron ore was mined.

The two leading products of Ohio are coal and clay products, coal having slightly the better of it in 1912 and 1913, whereas in 1911 the value of the clay products exceeded that of coal. The production of coal in 1913 amounted to 36,290,527 short tons, valued at \$39,948,058, the output both in quantity and value being the maximum record for the state. The production of petroleum, which stands third among the state's mineral industries and in which Ohio ranks sixth, value considered, among all the states, decreased slightly in quantity, from 8,969,007 barrels in 1912 to 8,781,468 barrels in 1913, while the value increased about 45 per cent over the previous year, from \$12,085,398 to \$17,558,452. The value of the natural gas produced in 1913 was \$10,416,699 in 1913, against \$11,891,229 in 1912.

The number of manufacturing establishments in Ohio having an annual output valued at \$500 or more at the beginning of 1915 was 15,658. The amount of capital invested was \$1,677,552,000, giving employment to 606,807 persons, using material valued at \$1,020,782,000, and turning out finished goods worth \$1,782,808,000. Salaries and wages paid amounted to \$123,139,000.

Ohio Companies.—In 1749 George H. granted to a band of wealthy citizens of Virginia and Maryland, calling themselves the Ohio Company, a tract of land containing 500,000 acres, lying in the Ohio Valley south of the Ohio River. Thomas Lee was the projector of the company, but it was later conducted by Lawrence Washington. The terms of the grant required that 100 families should be established upon the tract, a fort should be built, and a garrison maintained. A number of storehouses were also established. In 1753 the territory east of the Missis-

sippi, north of the Ohio River, and west of Pennsylvania, which before the Revolution had been part of the Province of Quebec and afterwards had been claimed by Virginia, was ceded to the United States, with the proviso that it was to be settled and formed into states. March 1, 1786, Rufus Putnam suggested a second Ohio company, and two days later he and Messrs. Cutler, Brooks, Sargent, and Cushing formed an association and issued 1,000 shares at \$1,000 each in Continental certificates or \$125 in gold. A year afterwards Congress granted certain lots free of charge, and an enormous tract was bought at about eight or nine cents per acre in specie. Colonization was immediately begun. Slavery was prohibited. This company had large influence in shaping the ordinance for the government of the Northwest Territory, of which it became a part.

Oklahoma.—One of the southern group of states formed in 1907 by the Union of Oklahoma with the Indian Territory. Nickname, "Boomer State." Motto, "Labor omnia vincit." (Labor conquers everything.) It extends from latitude 33° 35' to 37° north and from longitude 91° 20' to 103° west. It is bounded on the north by Kansas and Colorado, on the east by Arkansas and Missouri, on the south by Texas (separated by the Red River) and on the west by Texas and New Mexico. It has an area of 70,957 square miles.

Oklahoma Territory was formed in 1890 from the western part of Indian Territory and the public strip called No Man's Land (q. v.). Invasions of the Indian Territory took place in 1879 but the settlers were ordered out by proclamations of President Hayes (pages 4499, 4560). Several subsequent invasions of the Territory were made in defiance of Federal law, but all expeditions of settlers were arrested and their towns broken up. Finally delegates of the Creek Nation met at Washington and sold the western half of their domain to the United States Government for \$2,280,857. Congress ratified this agreement March 1, 1889. By proclamation of President Harrison (4540) Oklahoma was opened to settlement at noon April 22, 1889, and during the afternoon of that day 50,000 settlers, who had been encamped on the border, rushed into the territory, formed a provincial government, and laid out town sites. In 1893 the Cherokee strip was ceded by the Indians to the Government for \$8,300,000. Agriculture and stock raising are the principal industries. Salt is the only mineral now mined, but in the future mining promises to be the chief industry of Oklahoma, as gold, silver, lead, zinc and gypsum are known to exist in many places.

Statistics of agriculture collected for the last Federal census, place the number of farms in the state at 1,908,192, comprising 28,859,353 acres, valued, with stock and improvements, at \$918,198,882. The aver-

age value of land per acre was \$22.49, an increase from \$6.50 in 1900. The value of domestic animals, poultry, etc., was \$152,432.792, including 1,953,560 cattle, valued at \$13,187,601; 742,959 horses, \$63,651,631; 257,076 mules, \$28,618,224; 1,839,030 swine, \$11,997,641; 62,472 sheep, \$253,864; poultry, \$3,713,943. The yield and value of the field crops for 1911 was: Corn, 5,675,000 acres, 36,888,000 bushels, \$25,822,000; wheat 1,122,000 acres, 8,976,000 bushels, \$8,258,000; oats, 909,000 acres, 8,181,000 bushels, \$3,927,000; rye, 4,000 acres, 38,000 bushels, \$10,000; potatoes, 30,000 acres, 540,000 bushels, \$670,000; hay, 810,000 acres, 618,000 tons, \$5,184,000, and cotton, 915,000 bales. In the production of petroleum Oklahoma now ranks second, having been surpassed only by California in 1910. The production that year was 52,028,718 barrels. Some gold and silver also are produced.

The number of manufacturing establishments in Oklahoma having an annual output valued at \$500 or more at the beginning of 1915 was 2,518. The amount of capital invested was \$65,478,000, giving employment to 22,700 persons, using material valued at \$70,970,000, and turning out finished goods worth \$102,006,000. Salaries and wages paid amounted to \$14,213,000.

The Federal census of 1910 gave the population as 1,657,155.

Oklahoma:

Appropriation for settlement under treaties of freedom, etc., upon lands in, recommended, 4785.

Oklahoma City, Okla., act authorizing issuance of bonds by, to provide the right of way for railroad, vetoed, 5571.

Old Bay State.—A nickname for Massachusetts (q. v.). (See also States.)

Old Colony.—A popular name for Plymouth County, Mass. The territory was formerly included in the Plymouth Colony, but, being unable to obtain a charter from the British Crown on account of its outspoken opposition to the established church, was in 1691 absorbed into Massachusetts Bay Colony.

Old Dominion.—A name popularly applied to the State of Virginia. In colonial documents Virginia is frequently referred to as "His Majesty's Dominion of Virginia."

Old Dominion State.—A nickname for Virginia (q. v.). (See also States); sometimes also nicknamed Mother of States and Mother of Presidents.

Old Hickory.—An affectionate nickname given to Andrew Jackson in 1813 when, disregarding the order of the Secretary of War to disband his troops, he assumed the responsibility of marching them in a body from Natchez, at his own expense. The Government afterwards approved Jackson's disobedience, and reimbursed him. The nickname stuck to him even through his Presidency, and to his grave.

Old Line State.—A nickname for Maryland (q. v.). (See also States.)

Oleomargarine, act defining butter and imposing tax on, approved and discussed, 4992.

Oligarchy.—Government by a few officials,—derived from the Greek words meaning "few rule."

Olive Branch, The, condemnation of, indemnification asked for, 1268.

Olmstead et al. vs. Rittenhouse's Executrices.—In 1778 Olmstead and other citizens of Connecticut were pressed into the service of the British aboard the sloop *Active*. They revolted and took possession of the vessel, and were in turn captured by the Pennsylvania armed brig *Convention*. The State court of admiralty of Pennsylvania adjudged the *Active* lawful prize and awarded the proceeds of her sale to the State, officers and crew of the *Convention*, and the owners, officers, and crew of *Le Gerard*, a privateer, which assisted in the capture. Olmstead and the others claimed the whole prize, but were awarded only one-fourth. They then appealed to the Federal commissioners of appeals and received a favorable verdict. The State court of admiralty of Pennsylvania set aside this verdict and ordered that the money be brought into court. May 1, 1779, the loan certificates for the prize money were deposited with State Treasurer Rittenhouse. In 1803 the district court of the United States for the State of Pennsylvania entered a final decree that the money be paid over to the libellants. The case having come before the United States Supreme Court, March, 1808, that court ordered a mandamus as against the district judge, and in 1809 judgment was executed in favor of the plaintiffs in spite of violent opposition from Pennsylvania, which opposition had prevented Judge Peters from carrying out his decree. The facts in the matter are all given in the Peters case. (See also 456, *Peters vs. United States*.)

Olustee (Fla.), Battle of.—In February, 1864, a Federal expedition was sent to Florida from Port Royal under command of Gen. Seymour. It was composed of twenty steamers, eight schooners and about 5,000 troops. Feb. 7 the land forces occupied Jacksonville. On the 18th they marched inland, encountering the Confederates on the 20th at Olustee, a railroad station about fifty miles west of Jacksonville. The battle was unexpected and was fiercely fought from 2 o'clock till dark, when the vanquished Federals retired twenty miles to Barbers. Seymour lost nearly 2,000 men, as well as five pieces of artillery, in this disastrous fight, and the expedition returned to Hilton Head.

Olympia, The, mentioned, 6297.

Omaha, The. (See Ikisima Island.)

Omaha Indians. (See Indian Tribes.)

Omaha, Nebr., act to extend privileges to port of, vetoed, 4999.

Oman.—Oman is an independent sultanate of southeast Arabia, with a Muhammadan population that is mainly Arab, but contains many foreign elements, including Indians, Persians, Baluchis, and Swahili negroes. The territory of the sultanate extends from the peninsula of El Katar, on the Persian Gulf, to the promontory of Ras Sair, on the Arabian Sea, a total length of coast of close on 1,500 miles. The north-west extremity is in 54° 30' E. longitude, and Oman extends to the easternmost point of Arabia in 59° 48' E. longitude, and thence southwest to a point about 54° 28' E. longitude and 16° 50' N. latitude. The most northerly point is Ras Musandum in 26° 30' N. latitude. The area is 81,000 square miles.

Physical Features. The northwest and southwest extremities are in the form of a horse-shoe, the intervening land being the arid and sandy desert of central and southern Arabia, the great Ruba el Khali, or Bahna Desert, which covers the penin-

sula, from Oman in the east to Yemen in the west. The northern coast of Oman is washed by the Persian Gulf; the Cape of Ras Musandum reaches to the narrow Strait of Ormuz; the eastern coast is washed by the Gulf of Oman, and the southeastern coast by the Arabian Sea. The promontory (Ras Jebel) which terminates in Ras Musandum is formed by the western horn of a range of mountains, which stretches across northeastern Oman, from Musandum to El Hadd, and shuts out the coastal districts from the interior. The west coast of the Ras Jebel promontory, known as the Pirate Coast, and the remainder of the Persian Gulf littoral, are low lying and sandy, and many rocky islets lie close inshore.

History.—Oman was established as an independent sultanate in 1741 by Ahmed ben Said, an imam (or sultan) of Yemen, who consolidated his power at the expense of the Ottoman empire. In the earlier years of the nineteenth century Oman was the most powerful state in Arabia, and the rule of the Sultan was extended over the Makran coast of the Arabian Sea and over parts of East Africa, including Socotra and Zanzibar. In 1856 the sultanate was divided by the two sons of Sultan Seyyid, and Zanzibar was formed into a separate sultanate.

Government.—The government is absolute and is hereditary in the descendants of Ahmed ben Said. At the present time the authority of the Sultan is effective only in the capital and the neighboring territory, for although the Bedouin Arabs recognize his superiority, the rule is only nominal in the interior, and trade is hampered by tribal warfare and robbery of caravans, which are forced to proceed with strong escorts through the various passes over the mountains, some of which are guarded by friendly chiefs. Since 1798 the relations between Muscat and England have been friendly, and many conventions and treaties have been made. British warships have upheld the authority of the Sultan against rebellious tribes. The Sultan is in treaty relations with the Government of India and receives annually a subsidy, while a British agent resides at the capital. A joint Anglo-French declaration of 1862 guarantees his independence, and the Sultan is pledged not to cede territory to any Power but the British Government. His Highness Seyyid Taimar bin Turki; born 1886, succeeded his father as Sultan in 1913.

Cities.—Capital, Muscat, the principal seaport, on the east coast. Population about 25,000. Other towns and ports are Matrah, about five miles north of the capital (population 10,000), Bartha and Sohar, on the east coast; and Sharakah on the Pirate Coast. The principal inland towns are Nizwa in the "Garden of Oman," and Bereima in the northwest.

Production and Industry.—Communication is carried on by pack animals (chiefly dromedaries) under strong escort, and there is a much frequented route from the Turkish territory in the northwest to the town of Bereima. From Bereima the route leads southward to Nizwa and the Garden of Oman, thus connecting the northwest with the eastern ports. There is a pilgrimage route of twenty-one days across the Arabian Desert, from the Garden of Oman to Mecca, in the Turkish-Arabian vilayet of Hedjaz.

The trade of Oman is considerable, the seaboard trade of Muscat and Matrah exceeding \$2,450,000 in 1912-1913. The chief export is dates, the principal imports being rice, arms and ammunition, coffee, cot-

ton and silk goods. There is an import duty of 5 per cent *ad valorem*, which forms the principal source of revenue, but exports are free.

Omnibus Bill.—Early in the first session of the Thirty-first Congress Henry Clay introduced a series of six resolutions as a basis for the compromise of the slavery question. These resolutions provided for the admission of California as a free state; territorial governments for New Mexico and Utah without conditions as to slavery; a territorial boundary line between Texas and New Mexico favorable to the former; payment of the Texas debt; suppression of the slave trade in the District of Columbia; a more effective fugitive slave law, and a denial of the power of Congress to interfere with the slave trade between the slave states.

On Feb. 5 and 6, 1850, Clay ably advocated the passage of his resolutions by the Senate. That body was strongly Democratic, though the administration was Whig. Debate on Clay's resolutions lasted two months and was participated in by Webster (Mass.), Calhoun (S. C.), Benton (Mo.), King (Ala.), Davis and Foote (Miss.), Hamlin (Me.), Cass (Mich.), Seward and Dickinson (N. Y.), Chase and Corwin (Ohio), Douglass (Ill.), Fremont (Cal.), Soule (La.), Hale (N. H.), Mangum (N. C.), Hunter and Mason (Va.), Bell (Tenn.), and others of note. On April 19 the resolutions were referred to a committee of thirteen, with Clay as chairman, and consisting of six other Whigs and six Democrats. On May 8 this committee submitted an elaborate series of bills embodying the substance of Clay's resolutions. These several bills were known collectively as the "Omnibus bill," and the last was passed on Sept. 20. (See also *Compromise of 1850*.)

Open Door in China.—With China foreign commerce is a matter of modern history. As early as 1516 the Portuguese had established a trading port in China and, together with the Dutch, English and Americans, who followed them, carried on an irregular and unsatisfactory trade for a hundred years without government protection or favor besides being looked upon with suspicion and hatred, as barbarians. From 1664 to 1834 England's China trade was in the hands of the East India Company, whose monopoly came to an end in the latter year. The opium trade, worth \$5,000,000 to \$8,000,000 annually to the government of British India, had long been illegal, and China, in 1837, decided to suppress it. England's refusal to make traffic in opium a crime punishable with death brought on a war in 1840. This was concluded by a treaty which opened to British trade the five ports of Canton, Amoy, Fu-chow, Ning-po, and Shanghai.

Caleb Cushing, heading an embassy from the United States, negotiated a similar treaty in 1844. By its terms a customs duty was established and in consideration of a transit duty, goods were given free conveyance to all places in China.

In 1856 England again found a pretext for war with China and was joined by France in 1857. This was terminated in 1858 by the treaty of Tien-Tsin, which granted toleration to the Christian mis-

sionaries in China, and freedom of Chinese rivers to English and French merchant vessels. At the same time Russia signed a treaty by which she acquired the Amur territory.

While these powers were gaining concessions in China, President Buchanan sent William B. Reed to open negotiations on behalf of the United States. The result of Mr. Reed's efforts was a treaty of amity and commerce, guaranteeing that no American vessel should engage in contraband trade with China.

Anson Burlingame, United States minister to China from 1861 to 1867, won the confidence of the Orientals and secured a treaty granting further concessions. Burlingame later headed a Chinese embassy accredited to eleven different nations. In June, 1873, the Chinese Emperor for the first time gave personal audience to the ministers of the United States, Russia, Great Britain, France, Germany, Holland, and Japan. By the war with Japan, in 1894-1895 China was forced to concede the independence of Korea, and cede to Japan the island of Formosa, the Liaoting peninsula and the Pescadore Islands and an indemnity in money.

While China was thus embarrassed Russia, through France, advanced a loan of \$77,290,000 to help pay the Japanese indemnity. In 1896 American and German capitalists loaned \$80,000,000 and in 1898 another \$80,000,000 was advanced by the English and German banks. In return for these loans valuable railway and trading concessions were exacted with a view to establishing spheres of influence which would serve as an excuse for military occupation.

Until 1904 only twenty-one ports had been opened to foreign trade. In that year three others were opened, and in 1906 sixteen more allowed the ships of the western world to enter. The opening of these ports was looked upon by China as a great concession wrung from her by the overpowering military strength of the allied commercial world. The agreements of 1897-1898 provide that "the administration of the Imperial Maritime Customs Service shall be conducted by representatives of foreign powers until 1943."

An outbreak of the anti-foreign feeling in China, directed against Americans in particular, on account of the Chinese exclusion laws of this country, was shown in the boycott against American goods which began in the southern provinces in 1905. This was entirely dispelled by the wise policy of the Roosevelt administration, carried into execution by Secretaries John Hay and Elihu Root.

William H. Taft, when Secretary of War, declared in a speech made in China that the United States would actively interfere whenever necessary to preserve the open door in all parts of the Chinese empire. Further acts of friendship on the part of the United States were the remission of a part of the Boxer indemnity, upon recommendation of President Roosevelt, and the liberal contributions, under Presidential patronage, to the famine fund in 1905.

Open Door, in the Orient, policy of the United States to be firm in controversies, 6797.

Open Shop.—A term used to describe the conditions of employment in an establishment where men are and may be employed irrespective of their membership or non-membership in a trade union or other labor organization. (See *Trade Unions*, *Closed Shop*.)

Opium Traffic, treaty with China for repression of, and recommendations regarding, 4629, 4986.

Report of, transmitted, 7469.

Legislation regarding, recommended, 5983.

Referred to, 7596.

Taxes and laws regulating traffic in, recommended, 7419, 7470, 7596.

Orange River Colony.—A British colony in South Africa. It was formerly an independent republic known as the Orange Free State, and was founded by the Boers in 1836 and recognized by Great Britain ten years later. In consequence of the part taken in the Boer War it was annexed to the British Crown in 1900. Area, 48,326 square miles; population in 1890 (estimated), 77,716 white and 129,787 blacks, natives of the country.

Order of Indian Wars of the United States.—This order was organized at Chicago Ill., June 10, 1896, and received its charter from the State of Illinois. The order consists of two classes of companions: First, commissioned officers of the army, navy, and marine corps, and of state and territorial organizations, which have been, or may hereafter be, engaged in conflicts, battles or actual field service against hostile Indians in the United States; second, sons of living members of the first class. The object of the Association is to perpetuate the history of the services rendered by the American military forces in their conflicts and wars within the territory of the United States, and to collect and secure for publication historical data relating to the instances of brave deeds and personal devotion by which Indian warfare has been illustrated.

Order of the Founders and Patriots of America.—This order was founded in 1896, its object being "to bring together and associate congenial men whose ancestors struggled together for life and liberty, home and happiness, in the land when it was a new and unknown country and their patriot descendants; from them came thorough patriots who sustained the Colonies in the struggle for Independence in the Revolutionary War; to teach reverent regard for the names and history, character and perseverance, deeds and heroism of the founders of this country and their patriot descendants; to teach that the purpose of the founders could have had no lasting result but for their patriot sons; to inculcate patriotism; to discover, collect, and preserve records, documents, manuscripts, monuments, and history relating to the first colonists and their ancestors and their descendants, and to commemorate and celebrate events in the history of the Colonies and the Republic." **Eligibility**.—Any man above the age of twenty-one years, of good moral character and reputation, and a citizen of the United States, who is lineally descended in the male line of either parent from an ancestor who settled in any of the Colonies now included in the United States of America prior to May 13, 1657, and whose intermediate ancestors in the same line during the Revolutionary period adhered as patriots to the cause of the Colonies, shall be eligible for membership. There are state societies in New York, Connecticut, New Jersey and Pennsylvania.

Orders in Council.—As the sovereigns of Great Britain can act only through privy

councillors or upon their advice, the more formal acts of the administration must proceed from the authority of the sovereign in council, and their execution is directed at a meeting of the privy council, and laid before Parliament within thirty days if in session, and if not in session within thirty days after assembling. Those of most interest in the United States were issued in 1793 and 1794, prohibiting trade with France and directing the seizure of neutral ships engaged in such traffic. In 1806 an order was issued declaring the whole coast of Europe from the Elbe to Brest, France, under blockade. The specific order which caused the greatest indignation in America and provoked retaliatory measures by both France and the United States was that of 1807, which prohibited neutral trade directly with France or her allies. All goods were ordered to be landed in England, to pay duties there, and to be re-exported under British regulations. (See also Berlin Decree; Embargo; Milan Decree.)

Ordinance (see also Arms and Ammunition):

Board of Fortifications, and, discussed, 5373.

Cannon—

Exportation of, order prohibiting, 3326.

Increase in crops, recommended, 1448, 1475, 1607.

Manufacturing operations of, recommendations regarding, 4362, 5878.

Progress in, 2942.

Regulations for distributions of arms, stores, etc., 5159, 5162.

Oregon.—One of the Pacific coast states; motto, "The Union;" nickname, "Webfoot country," from the excessive rainfall. It extends from lat. 42° to 46° 15' north and from long. 116° 40' to 124° 32' west. It is bounded on the north by Washington (partly separated by the Columbia River), on the east by Idaho (partly separated by the Snake River), on the south by Nevada and California, and on the west by the Pacific Ocean. It has an area of 96,699 square miles. Oregon is traversed by the Coast Range and Cascade and Blue Mountains, which run parallel to the coast in the eastern portion of the state. It is drained largely by the Columbia, though there is a large inland basin in the southeast. The chief industries are fishing and agriculture.

The mouth of the Columbia River was discovered by Capt. Gray, an American, in 1792. The river was partly explored by Lewis and Clark in 1804-5. A trading post was founded at Astoria in 1811. The territory, long in dispute, was finally made part of the United States by the treaty with Great Britain in 1846. It was organized as a territory in 1848 and was admitted to the Union in 1859.

Statistics of agriculture collected for the last Federal census, place the number of farms in the state at 45,502, comprising 11,685,110 acres, valued, with stock and improvements, at \$528,243,782. The value of domestic animals, poultry, etc., was \$59,461,828, including 725,255 cattle, valued at \$17,570,685; 271,708 horses, \$25,181,143; 9,927 mules, \$185,788; 217,577 swine, \$1,570,949; 2,639,135 sheep, \$12,213,942; poultry, \$1,067,743. The yield and value of field crops for 1911 was: Corn, 20,000 acres, 570,000 bushels, \$456,000; wheat, 796,000 acres, 16,726,000 bushels, \$12,545,000; oats, 359,000 acres, 12,457,000 bushels, \$5,481,000; rye, 18,000 acres, 351,000 bushels, \$316,000; potatoes, 46,000 acres, 5,980,000 bushels, \$4,007,000; hay, 452,000 acres, 949,000 tons, \$9,110,000. The mineral production of the state is inconsiderable, the coal output having been curtailed by the use of petroleum from California for fuel for railroads and in manufactures. The lumber cut has grown steadily for many years, until lumbering has taken first rank in the state's industries. Oregon has one-sixth of the standing timber of the United States. In 1909 there were 1,468,155 thousand feet cut, which sold for \$18,010,588, mostly fir, spruce and cedar. The salmon catch on the Oregon side of the Columbia River in 1908 was 18,464,000 pounds, and on the coast streams 6,423,000 pounds. Nearly five thousand men are engaged in the Columbia River fisheries. The state has of late years become noted for its innovations in government. In the general election of 1910 the voters enacted under the initiative four important measures. They were: Presidential preference, giving to each voter the opportunity of expressing in primary elections his choice for president and vice-president of the United States. The single tax, which authorizes each county in the state to prescribe its own method of taxation; an employers' liability law, prepared and submitted to the people by organized labor, after a less objectionable bill had met defeat in the legislature; the three-fourths jury verdict, which has reduced the number of mistrials and relieved the badly congested condition of the courts. A constitutional amendment extending the right of suffrage to women was submitted to the voters in Nov., 1912. This has been defeated three times with increasing ma-

jorities. (See Initiative, Referendum and Recall.)

Sugar, beets and hops are also important crops. Apples and plums are raised in great abundance and shipped to all leading markets. West of the Cascade Mountains almost every crop common to the temperate zone is grown, but east of the mountains the country is arid. The Federal irrigation plan, now in operation, contemplates the reclamation of 254,000 acres in Oregon. Private irrigation schemes will add 267,000 acres more. There are 6,972,559 acres of forest reservation in the state. July 1, 1908, there remained unreserved and unappropriated, 16,957,913 acres of land. The United States land offices are located at Burns, LaGrande, Lakeview, Portland, Roseburg and The Dalles.

The mineral output of 1907 was valued at \$2,638,587, and consisted of gold, silver, copper, coal, nickel, cobalt, lead and gypsum. Garnets and opals are found.

The number of manufacturing establishments in Oregon having an annual output valued at \$500 or more at the beginning of 1915 was 2,320. The amount of capital invested was \$139,500,000, giving employment to 35,449 persons, using material valued at \$63,258,000, and turning out finished goods worth \$109,762,000. Salaries and wages paid amounted to \$26,611,000.

Large ocean-going vessels navigate the Columbia River as far as Portland. The railway mileage in 1907 was 2,031 miles of steam road and 286 miles of electric lines. The population in 1910 was 672,765.

Original Package.—In the enforcement of the prohibitory liquor law in the State of Iowa the officers were frequently charged with exceeding the limits of the state's jurisdiction in interfering with the traffic in spirits. State officers seized and confiscated liquors which it was claimed by the owners were sent into the state for reshipment to points outside the jurisdiction of the state courts. State officers defended themselves under the prohibition amendment to the constitution. In 1890 the Supreme Court of the United States, in the case of *Leisy & Co. vs. Hardin*, held that the plaintiffs, brewers in Illinois, had the right to carry liquors into any state and sell them in the original package without reference to local prohibitory or restrictive laws. The decision of the Court rested on the right of Congress to have exclusive control of interstate commerce. Congress thereupon passed a law giving states control of

the liquors so imported, although in the original package.

Oriskany (N. Y.), Battle of.—In August, 1777, Gen. Burgoyne sent a detachment of his army, consisting of 200 regulars, Sir John Johnson's Royal Greens, and some Canadian rangers and Indians, under Col. St. Leger, to operate in western and central New York and ultimately to join the main army under Howe at New York. St. Leger proceeded by way of the St. Lawrence River, Lake Ontario, and the Oswego and Oneida rivers to within a few miles of Fort Stanwix (now Schuyler, near the present city of Rome, on the Mohawk River). The post was garrisoned by less than 1,000 men, under Colonels Gansevoort and Willet. Gen. Herkimer collected the militia of Tryon County and advanced to the assistance of the fort. On Aug. 6 when about six miles from the post, near Oriskany, he fell into an ambush and was fiercely assailed by the British and the Indians under Brant. By reason of a successful sally by Willet the assailants were repulsed, but not without the loss of 400, including many of the leading patriots of that region. St. Leger made no official report of his loss except that of his Indian allies. The fight lasted several hours and was one of the most fiercely contested conflicts of the war. St. Leger, deserted by his Indian allies, retired precipitately to Canada.

Orleans, Territory of.—The old name for the present State of Louisiana. In March, 1804, after the purchase of Louisiana from France, Congress divided the territory, cutting off that portion between Texas and the Mississippi River and from the Gulf of Mexico north to the parallel of lat. 33° north and establishing it as a territory, with William C. C. Claiborne as governor. In 1810 the citizens of Baton Rouge, territory of St. Francisville, overcame the local Spanish garrison, shot the Spanish governor and established the Territory of West Florida. After the people of West Florida had elected a governor and framed a constitution President Madison issued a proclamation (165) directing Governor Claiborne, of the Territory of Orleans, to take possession of West Florida and annex it to Orleans. In February, 1811, an act was passed "to enable the people of the Territory of Orleans to form a constitution and state government." April 12, 1812, an act was passed for the admission of the State of Louisiana into the Union, extending the limits to include all between the Mississippi and Pearl Rivers south of lat. 31° north.

Orleans Territory:

Admission into Union applied for by, 483.

Osborn vs. United States Bank, Ohio.—A leading case in the Supreme Court, September term, 1819, involving the right of

a State to tax United States property. Osborn, auditor of the State of Ohio, through his deputy, forcibly took from the United States Bank at Chillicothe \$100,000 and delivered it to the State treasurer as payment to the State under the act which was passed by the legislature Feb. 8, 1819, levying taxes upon banks doing business in the State without authorization of the State law. The United States circuit court of Ohio decreed that a restitution be made with interest. The Supreme Court of the United States, having been appealed to, affirmed the decision of the circuit court, but gave no interest. The opinion was delivered by Chief Justice Marshall and was very elaborate. Justice Johnson dissented on the point of jurisdiction. Clay, Webster, and Sergeant argued for the right of the bank to sue in the circuit court of the United States. (See also *McCulloch vs. Maryland*.)

Osette Indians. (See Indian Tribes.)

Ostend Manifesto.—In 1852 France and England, fearful of the filibustering expeditions against Cuba and the possible future favor of the United States toward such expeditions, suggested a tripartite convention in which each nation should disclaim all intention to obtain possession of Cuba and should disavowance such possession by another power. With a view to promoting negotiation with Spain for the purchase of Cuba by the United States, Pierre Soulé, American minister to Spain (empowered to negotiate for the purchase of Cuba), John Y. Mason, minister to France, and James Buchanan, minister to Great Britain, met at Ostend, Belgium Oct. 9, 1854, and after three days' session adjourned to meet at Aix-la-Chapelle. They wrote to the United States Government their views of the policy the Administration should pursue. Their message or communication is known as the Ostend Manifesto. It declared that, as Spanish oppression in Cuba was such that the island would speedily resort to arms to free herself, the United States should offer Spain a sum not to exceed \$120,000,000 for Cuba, and in the event of Spain's refusal to sell, the United States would be justified in taking forcible possession of Cuba rather than see it Africanized, like Santo Domingo. President Pierce did not think it prudent to act upon this suggestion, and Soulé, disgusted, resigned soon afterwards and returned home.

Oswego (N. Y.), Capture of.—May 5, 1814, the British squadron commanded by Sir James Yeo, and consisting of 8 vessels, aggregating 222 pieces of ordnance, besides several gunboats and other small craft, moved toward Oswego, N. Y., at the mouth of the Oswego River. The squadron carried more than 1,200 troops, under Lieut.-Col. Drummond. Oswego was protected by Fort Ontario, mounting six old guns, and a garrison of less than 300 men, under Lieut.-Col. Mitchell. These repulsed a landing party sent ashore and the fleet put to sea. It returned the next day and landed the greater portion of the force, which ascended a long, steep hill to the fort in the face of a heavy fire from the Americans. Overwhelming numbers finally compelled Mitchell to fall back. The American loss was 69, including among the killed Lieut. Blaney. The British lost 94, among the wounded

being Capt. Mulcaster, of the *Princess Charlotte*, and Capt. Popham, of the *Montreal*.

Ottoman Empire. (See Turkey.)

Ottoman Empire, Treaties with.—A treaty of commerce and navigation was concluded in 1830. The text of the treaty was in the Turkish language, and by reason of the difficulty of exact translation, much diplomatic correspondence has resulted without reaching an accord. By its terms equitable imposition of taxes and duties is agreed upon in the case of merchants of the Sublime Porte traveling in the possessions of the United States and upon citizens of the United States traveling in the countries and ports of the Sublime Porte; and conditions of trade shall be conducted in all cases upon the terms of the most favored nation. Appointment of consular officers is agreed upon in the dominions of both parties upon the terms usual in consular conventions. Brokers may be employed to assist in the conduct of business; and vessels coming to the several ports in both countries shall proceed upon the same conditions of charges as the most favored nation.

In case of litigation between subjects of the Sublime Porte and citizens of the United States, no decision shall be made or verdict reached unless the American dragoman be present; and citizens of the United States peaceably and lawfully follow their avocation shall not be molested. When an offence has been committed such citizens shall be tried before their own consul and punished by his sentence or decision. American vessels may safely go under their own flag, but must not take the flag of another country nor lend their flag. Merchant vessels may pass the royal residence and come and go in the Black Sea. The vessels of either country may not be taken by force and be compelled to engage in war service. The customary humane regulations are made regarding shipwreck. (For the extradition treaty of 1874, see *Extradition Treaties*.)

Pacific Railroads.—In 1848 Asa Whitney, a New York merchant, zealously advocated the building of a railroad by the Federal Government to the Pacific Ocean from some point on the Missouri or Mississippi River. A bill providing for such a road was introduced in the Senate. It was opposed by Thomas H. Benton and finally tabled by a vote of twenty-seven to twenty-one. The next year Benton introduced a Pacific railroad measure of his own. In March, 1853, an act was passed providing for surveys. By 1855 Government surveyors had ascertained practicable passes through the Rocky Mountains. The rapid growth of the Pacific States in consequence of the "gold fever" and the difficulty of communication between the East and the West, on account of the vast extent of intervening plains made railroad communication more and more desirable. The hopelessness of undertaking so stupendous a work with private capital led many who otherwise were opposed to the principle of Federal aid to internal improvements to advocate the building of the Pacific railroads under Government subsidies. In 1860 both the leading political parties in their platforms declared in favor of building a road under national supervision. The outbreak of the Civil War and the necessity for closer military communication aided the movement.

The bill providing for the Union Pacific and Central Pacific roads was approved July 2, 1862, and granted as subsidies 6 per cent gold bonds of the United States. It gave to the Union Pacific \$16,000 per mile for the great plain west from Omaha, Nebraska, 848,000 per mile for 150 miles over the Rocky Mountains, and \$32,000 per mile for the remainder—in all, 1,031 miles, \$27,236,512; to the Central Pacific \$16,000, \$32,000, and \$48,000 per mile—in all, 883 miles, \$27,855,562. Each company also received 12,800 acres of land per mile of road 25,000,000 acres in all—by a subsequent act July 1, 1864. The companies were allowed to issue an equal amount of their own bonds, which were to be a first lien on the road, the Government bonds the second. The time fixed for opening was set at July 1, 1876, and the road was actually opened May 10, 1869. The two lines were joined, with impressive ceremonies, at Promontory Point, Utah. The last tie, of laurel wood, with a plate of silver upon it, was laid, and the last spike, made of iron, silver and gold, was driven in the presence of distinguished men. The officers of the road and a large concourse of visitors from

East and West were present. Telegraph wires were attached to the last rail, and the last blows were signaled upon bells in Washington and other large cities. In many places large crowds had gathered to receive the first intimation, conveyed almost instantaneously over the electric wires, that the great work was complete. When the signal was received in San Francisco and elsewhere all the church bells were rung, and cannons were fired. The general direction is nearly east and west on or about the fortieth degree of latitude. The total length of the road built by the two companies from Omaha to San Francisco is 1,917 miles. July 2, 1864, a charter with subsidies was granted to the Northern Pacific from Lake Superior to Puget Sound, a distance of 1,800 miles, and thence to the Columbia River, 200 miles. The land granted to this road amounted to 47,000,000 acres, or 73,000 sq. miles. The road was commenced in 1870 and was to have been finished in 1879, but in 1873 the company became embarrassed and ceased work. In 1875 the company was reorganized and the time for construction extended. On Sept. 9, 1883, the last spike was driven at a point fifty miles west of Helena, Mont. The Great Northern extension from Pacific Junction, Mont., to Lowell, on Puget Sound, was completed Jan. 6, 1893.

July 27, 1866, the Atlantic and Pacific road was chartered to run from Springfield, Mo., to the Pacific on or near the thirty-fifth parallel of latitude, a distance of 2,000 miles, and subsidized with 42,000,000 acres of land. March 3, 1871, the Southern Pacific road was chartered to run from Marshall to El Paso, Tex., thence through New Mexico and Arizona to Los Angeles, Cal., along the thirty-second parallel of latitude. The act granted the same amount of land per mile as the others had received.

In May, 1878, an act, known as the Thurman Act, was passed, prescribing more stringent terms for the repayment of government advance. In addition to the amounts retained out of sums due for government service, the Act of 1862 provided for the payment of five per cent of the net earnings of the company. The Act of 1878 retained the entire amount due to the companies for government service, one-half to be applied to interest payments, one-half to form a sinking fund for the principal, and it required, moreover, the annual payment of a fixed sum (\$850,000 for the Union Pacific and \$1,200,000 for the Central Pacific), or so much thereof as might be necessary to make the total obtained by adding the five per cent of net earnings and the whole of the compensation retained, equal to twenty-five per cent of the net earnings. The method of computing the net earnings was prescribed, and it was provided that the additional payments thus required were not to be exacted unless the net earnings were sufficient to meet the interest on the bonds prior in lien to the government mortgage.

From a memorandum issued by Secretary of the Treasury, McAdoo, Sept. 30, 1911, the Central Branch Union Pacific Railroad is still indebted to the United States \$3,618,779.72, of which \$1,600,000 is principal and \$2,018,779.72 is interest.

 Pacifist.—The term arose during the Great European War, and is applied to those persons who are opposed to war; evidently the

word was coined in order to displace the more awkward "pacifactor." Although the word is loosely applied to those who are sympathizers with or workers in the cause of International peace, it is more correctly applied to those persons who are opposed to war under any conditions, non-resistants, sometimes described as believers in peace-at-any-price. In the days preceding the entrance of the United States into the war the word sprang into great prominence, and became applied indiscriminately to all those persons who opposed war with the Central Powers. Although there had been many peace societies active in the United States in the past few decades, yet most of these did not oppose the war with Germany, and hence were not considered "pacifist" organizations,—for instance, the Carnegie Foundation for the Advancement of Peace, the American Peace Society, the World Court League, the League to Enforce Peace. The two pacifist organizations most prominent in the days before President Wilson's announcement of a state of war were the American Union against Militarism and the Emergency Peace Federation, each of them newly organized bodies. The Woman's Peace Party, founded by Jane Addams, was not prominently active in the period preceding the war, nor was Henry Ford, the instigator and backer of the so-called Ford Peace Expedition (q. v., under European War). The American Federation of Labor was definitely anti-pacifist, and Socialists in the United States divided sharply on the issue. (See Peace Societies.)

Theodore Roosevelt.....	John S. Sargent
William Howard Taft.....	Max Zorn

Paints, Oils and Varnishes.—As early as 1795 the use of paint for houses was common in the United States. In cities and towns the inside of the house, at least, was painted, and in all but the cheaper wooden buildings the outside carried a coat of paint. The white house with green window blinds, was for many years of our early history the typical American dwelling.

A small mill for making linseed oil was started in New York City in 1715, and in 1718 John Prout, Jr., erected a linseed oil mill in Connecticut. In 1786 four oil mills were in operation in Lancaster County, Pa. These greatly stimulated the use of paints, and in 1804 Samuel Wetherill made the first successful attempt to manufacture white lead. Red lead, as well as white, was made by him of as good a quality as that imported.

In 1806 experiments in color making were carried on by Anthony Tiemann, and within the year he began the regular manufacture of paints. His first productions were rose pink, Dutch pink, French green and blue. The manufacture of Prussian blues was begun in 1809, and in 1820 chrome yellow was added to the products of this establishment. By 1811 Philadelphia mills were turning out twenty-two different colors of paint, and three small red-lead factories at Pittsburg (the first west of the Alleghenies), were making an annual product of \$13,000. Chrome paints of first quality in the early days of the industry commanded as much as \$3 a pound, and the business was profitable. Extensive deposits of chromic iron, discovered in Chester County, Pa., gave an added impetus to paint grinding, and its growth was strong and steady. The succeeding decade saw the industry firmly established in New York. By 1820 there were extensive works in Brooklyn and New York, producing red and white leads, chrome and other colors, while a factory in Rensselaer County, N. Y., was turning out annually \$4,500 worth of Prussian blue extracted from the by-product of a tannery.

Before 1828 all the varnish used in this country was imported. Its use, while less general than that of paint, was common enough to recommend it to manufacturers as a profitable business, and the first establishment for its manufacture was founded by P. B. Smith in New York City in 1828. Tilden & Hurlburt, the first permanent concern in the business, was established in 1830. This firm made the first importations of gum copal from Zanzibar and the west coast of Africa, and was the first to export American varnish, consigning a quantity to Mexico and South America in 1836. The quality of the American goods proved so exceptional that they not only competed with, but in a great measure supplanted, the exportations of the European manufacturers. The stimulation of a heavy foreign demand added to increased domestic consumption so swelled the business that the matter of obtaining supplies of the gums used became of serious importance. In 1857 such quantities of these raw materials were used that the manufacturers were obliged to establish a system of direct trade with the west coast of Africa.

The growth of the paint and varnish business had in the meantime affected the oil mills. Up to 1836 these mills had used only home grown seed, and a capacity of fifty bushels a day was a fair average output. With the growing use of linseed oil new methods were found necessary, and the firm of J. & L. K. Bridge, of Brooklyn, in that year imported the first cargo of flaxseed from Rely, Odessa, Alexandria and Calcutta, were successfully opened as supply points of this rapidly increasing trade.

In 1850 the paint industry entered upon a new era. The zinc deposits of New Jersey, opened in that year, gave an adequate and cheaply worked supply of ore from which the oxide could easily be reduced. This zinc oxide, in the form of white powder, had long been recognized as a valuable substitute for white lead as a body for

paints. It had up to this time, however, received little attention owing to the small amount available for the market. The new and abundant supply turned the attention of manufacturers to experiments in this direction, and its use has since become general. Several mines were opened and soon were placing the white powdery zinc oxide on the market.

Mineral paints, made from different earths, came into prominence about this time, under strong claims of being fire-proof and indestructible. Ready mixed paints were introduced to the trade in 1852.

About 1857 D. F. Tiemann & Co. made carmine from cochineal, a monopoly theretofore held by France. In 1860 they made a blue, soluble in water, for laundry use, and free from acid. They also established the manufacture of quicksilver vermilion, previously monopolized by England.

The National Lead Company, which controls the greater part of the output of white lead in this country, includes and operates its own oil and paint grinding mills, as well as the lead factories proper, and with a capitalization of about \$30,000,000, is the largest concern in the paint business.

Reports were received from 855 establishments engaged in the paint and varnish industry in 1914, the total products of which for the year were valued at \$149,049,820. Of these 855 establishments, the principal business of 799 was the manufacture of paints or varnishes, and 56 were engaged primarily in other industries but produced paints or varnishes to the value of \$2,597,182 as subsidiary products.

The products in 1914 comprised colors or pigments valued at \$17,497,955; oil paints, \$70,582,461; water paints and kalsomine, \$2,202,281; varnishes and japans, \$36,061,203; fillers, including putty, \$3,239,174; bleached shellac, \$1,806,802; and other products to the value of \$17,749,944.

The more important materials used in the manufacture of paint and varnish are lead in the form of pig lead or as oxides and white lead, zinc white, iron oxides and other earth colors, barytes, dry colors, gums, and solvents or vehicles such as linseed oil, turpentine, benzine, and wood and grain alcohol.

Returns were received from 108 establishments engaged in the production of essential oils in 1914, the total products of which for the year were valued at \$2,565,361.

Including the by-products and the essential oils distilled for others, the total production in 1914 comprised 363,991 pounds of peppermint, valued at \$601,617; 94,299 pounds of spearmint, valued at \$238,971; 41,178 pounds of black birch, valued at \$67,691; 6,000 pounds of wintergreen, valued at \$21,538; 1,702 pounds of wormwood, valued at \$9,010; and oils of camphor, cedar, cloves, lemon, parsley, patchouli, pennyroyal, sandalwood, sassafras, tansy, etc., to the value of \$348,522.

Petroleum Refining.—Petroleum or rock oil was first found in the United States in 1625, in what is now southwestern New York or northwestern Pennsylvania. A well in Kentucky in 1829 yielded such great quantities that it was drained into the Cumberland River or burned. It was only used to a small extent for lighting and in medicine. The petroleum districts of the United States are western Pennsylvania, Ohio, Indiana, West Virginia, Kentucky, Tennessee, Texas, California, Oklahoma, and in smaller quantities in other western states. The refining of petroleum is based upon the separation of the component hydrocarbons by a process of fractional distillation.

The method of mining or drilling for petroleum is the same as that used in sink-

ing gas or artesian water wells. Cheap and rapid transportation is secured by means of a series of tanks about thirty miles apart, connected by underground pipes, and the oil is forced from one set of tanks to another by means of pumps. Pennsylvania has about 25,000 miles of such pipe line.

The growth of the petroleum industry in the United States is shown by the following table, which gives the annual production at five-year intervals since 1859:

Year	Barrels	Year	Barrels
1859.....	2,000	1890.....	45,823,572
1860.....	500,000	1895.....	52,892,276
1865.....	2,197,700	1900.....	63,620,529
1870.....	5,260,745	1905.....	131,717,580
1875.....	10,926,945	1910.....	236,997,659
1880.....	26,286,123	1915.....	290,312,535
1885.....	21,858,785		

(Crude Petroleum Production, 1914.—(United States Geological Survey.)

	Barrels (42 gallons)
California.....	91,775,327
Mid-Continent (Kansas, Oklahoma, etc.).....	97,935,400
Pennsylvania grade (Appalachian).....	24,101,048
Illinois.....	21,919,749
Gulf.....	13,117,528
Lima-Indiana.....	5,962,543
Colorado, Wyoming, and other fields.....	3,790,940
Total production.....	265,762,535

Reports were received from 176 establishments operating refineries, the products of which for the year 1914 were valued at \$396,361,405. They used 191,262,724 barrels of crude petroleum.

The production of naphthas and lighter products, chiefly gasoline, increased from 10,806,550 barrels in 1909 to 29,200,764 barrels in 1914, or by 170.2 per cent, while the value increased from \$39,771,959 to \$121,919,307.

Of the 176 refineries in 1914, 48 were in Pennsylvania, 28 in California, 23 in Oklahoma, 13 in Kansas, 9 in Texas, 9 in Illinois, 8 in New Jersey, 7 in Ohio, 6 in New York, 4 in Colorado, 3 in Maryland, 3 in West Virginia, 2 in Wyoming, and one each in Indiana, Louisiana, and Missouri.

Palestine, outrages committed on American citizens in, 3015.

Palisades Interstate Park.—The State of New York possesses several forest reservations and also several parks. One, the Niagara reservation, comprises the land about the great cataract, purchased at a cost of \$1,000,000. The State Forest Preserve in the Adirondack region on Oct. 1, 1913, contained 1,495,257.29½ acres, and the Catskill Forest Preserve on the same day contained 112,750.15 acres. There are also Letchworth Park, about the falls of the Genesee River; John Boyd Thatcher Park, about the Indian Ladder, in Albany County, and islands in the St. Lawrence river.

Lastly, there is the Palisades Interstate Park, partly in the state of New Jersey and partly in the state of New York, extending along the Hudson river in its Palisades region, and extending north so as to include Bear mountain. The development of this park to its present great dimensions began in 1910, when Mary D. Harriman, widow of the late Edward H. Harriman, informed Governor Hughes of New York that, following the wishes of her husband, she was willing to convey 10,000 acres of land in the counties of Orange and Rockland to be used as a park, and also give \$1,000,000 toward the park project.

The Palisades Park Commission had the same year collected \$1,625,000 for the same

purpose. Previously the commission had acquired by gift of land and of money to the amount of \$300,000, a contribution of \$400,000 from the state of New York, and \$50,000 from the state of New Jersey, the face of the Palisades from Piermont to Fort Lee. It was also proposed in 1910 that the state of New York should appropriate \$2,500,000 for a further purchase of land for the Palisades Interstate Park. Subsequently, in 1910, this proposal was ratified by the voters, and consequently the Palisades Interstate Park, which will cost nearly \$6,000,000, was authorized.

The commissioners of the Palisades Interstate Park since 1910 have been busily engaged in developing the park. The state of New York is preparing to build the last end of Route 3, north of the New Jersey state line, so that ultimately there will be a state highway from the state boundary line of New Jersey and New York along the west shore of the Hudson river north to Newburgh. The commissioners have also cooperated with the state of New York and Orange county, N. Y., in securing the construction of Route 3 of the New York state highway system along the Hudson river through the United States Reservation at West Point and around Storm King mountain. The park roads, when built, are to connect with the main state highways of New York and New Jersey. There is a "Henry Hudson Drive" under the Palisades and a road from Bear mountain on the Hudson river, to Southfields, both of which are on park properties. The commission is advancing the Englewood approach to the Henry Hudson drive. The drive, when completed, will be located under the Palisades in the state of New Jersey, with a number of approaches or spurs connecting the drive with the roads on top of the cliff.

A camp has been established at Blauvelt for the use of working girls, which is used by girls of all nationalities and religions.

Palmetto State.—A nickname for South Carolina (q. v.). (See also States.)

Palo Alto (Mexico), Battle of.—May 7, 1846, Gen. Taylor started from Point Isabel, with a force of 2,288 men, to relieve Fort Brown, twenty-seven miles away. At noon on the following day, when about half way between Point Isabel and Fort Brown, Taylor's army sighted the enemy at the water hole of Palo Alto. The regular Mexican force under Arista numbered 6,000 men, and there were some irregular troops and twelve pieces of artillery. Battle was immediately begun and fiercely fought until sunset. By the light of the moon and the burning prairie grass the belligerents buried their dead. The Mexicans lost 200 killed and 400 wounded. The American loss was only 4 killed and 40 wounded.

Palo Alto, Mexico, Battle of, referred to, 2295, 2300, 2342.

Pan-American Congress. (See International American Conference.)

Pan-American Exposition.—To illustrate the progress of civilization in the western hemisphere during the nineteenth century, there was held at Buffalo, N. Y., from May 1 to Nov. 2, 1901, an International American Fair, participated in officially by the various states of the Union, by Canada, and the South and Central American countries. The site covered an area of 350 acres and the buildings were artistically designed and arranged so as to present an allegorical study of man's struggle with the elements and his final triumph. The color scheme, as well as the artistic beauty, gained for

Pan-American Messages and Papers of the Presidents

the grounds the name of the Rainbow City. The total attendance was 8,179,674. The cost of the exposition was \$8,860,757, and the receipts \$5,534,643, a deficit of \$3,326,114. President McKinley was shot by an assassin in the Temple of Music while holding a reception there Sept. 6, 1901, and died eight days later at the home of the president of the Exposition.

Pan-American Exposition, referred to, 6675.

Pan-American Railroad, discussed, 6864.

Pan-American Union.—The Pan-American Union (the new name given to the International Bureau of American Republics by the Fourth International American Conference, which met at Buenos Aires in July and August, 1910) was established under the recommendation of the First Pan-American Conference, held in the City of Washington in 1889-90 for the purpose of developing and maintaining closer relations of commerce and friendship between the twenty-one Republics of the Western Hemisphere. Its first report was transmitted to Congress in 1891 (5647). It was reorganized by the Third and Fourth Pan-American Conferences, held in Rio de Janeiro in 1906, and in Buenos Aires in 1910, respectively, and its scope widened by imposing many new and important duties. The Pan-American Union regularly communicates with these governments, and furnishes such information as it possesses or can obtain on a great variety of subjects to all of the Republics and to their officials and citizens. It is the custodian of the archives of the Pan-American Conferences, and is especially charged with the performance of duties imposed upon it by these conferences. The Pan-American Union is sustained by contributions from the American Republics in proportion to their population and is governed by a board composed of their diplomatic representatives at Washington, and the Secretary of State of the United States, who is ex-officio its chairman. It is therefore strictly an international institution and not a subordinate bureau of any one government. Its chief executive officer is the Director-General, elected by this governing board. It publishes a monthly bulletin containing the latest information respecting the resources, commerce, and general progress of the American Republics, as well as maps and geographical sketches of these countries, handbooks of trade, travel, and description, and special reports on commerce, tariffs, improvements, concessions, new laws, etc. It also conducts a large correspondence not only with manufacturers and merchants in all countries looking to the extension of Pan-American trade, but with writers, travelers, scientists, students, and specialists, for the purpose of promoting general Pan-American intercourse. Another and practical feature of the Pan-American Union is the Columbus Memorial Library and reading room, which contains 22,000 volumes relating to the American Republics. (See also International American Conference and American Republics, Bureau of.)

Practical work of, 7115.

Panama.—The Republic of Panama occupies the Isthmus which connects the continent of North and South America, and lies between Costa Rica and Colombia, having formed a department of the latter Republic until Nov. 4, 1903. The Isthmus of

Panama lies between 7° 15'-9° 39' N. latitude and 77° 15'-83° 30' W. longitude, and has an area of 32,380 square miles. The northern coast is washed by the Caribbean Sea (Atlantic) and the southern coast by the Pacific Ocean.

Physical Features.—The country is everywhere mountainous, with a ridge, more or less defined, extending from the western to the eastern boundary, and consists of a succession of hills and valleys with little open plain. The Cordilleras of Chiriqui and Veraguas of the west are continued eastward by the Cordilleras of Panama and Darien.

The largest rivers are the Tuira, or Rio Darien, of the eastern province, rising close to the Caribbean shore and flowing into the Pacific in the Gulf of San Miguel; the Chepo, or Bayano, with a similar course to the Bay of Panama; and the Chagres which flows northward through Gatun Lake to the Caribbean, part of its course being utilized for the Panama Canal. The only lake is that of Gatun, which has been formed by the construction of a dam in order to raise the water level of the Canal.

Although lying within the tropics the climate is not unhealthy, and the mean temperature varies little throughout the republic, being about 80° Fahrenheit. The wet season lasts from April to December, and the dry season is bracing with dry northeast winds from the Caribbean.

History.—Panama formed a department of the Republic of Colombia from 1855 until its secession in 1903. On Jan. 4, 1904, a constitutional assembly was elected and a constitution was adopted, under which a centralized republic was inaugurated.

Government.—The President is elected by the votes of all adult male citizens for the term of four years and is ineligible for a successive term of office, unless he retires from office eighteen months before the elections. There is no Vice-President, but the assembly elects three designados to provide a head for the State in case of the death of the President. President (1912-1916, elected Oct. 1, 1912): Dr. Belisario Porras.

The executive power is vested in the President, who appoints ministers, judges of the Supreme Court, diplomatic representatives, and provisional governors.

The National Assembly consists of a single chamber of twenty-eight members, elected for four years by direct adult male suffrage, and meets biennially on Sept. 1. The President has a veto on legislation, but the Assembly can pass the same bill a second time and the President must then sign it, if the Supreme Court declares it to be within the constitutional limits.

The Supreme Court consists of five judges, appointed by the President, and there are superior courts and circuit courts, and justices of municipal courts appointed by the five judges of the first-named tribunal.

Each of the seven provinces is under a governor, appointed by the President, and possesses municipal districts with elective legislatures, and an alcalde appointed by the governor. Under the treaty by which the Panama Canal Zone was ceded to the United States, the municipalities of Colon and Panama within the ceded area, were expressly excluded from the zone.

There is no standing army, but the integrity of the republic has been guaranteed by the United States. Order is maintained by a small national police force.

Education.—Primary education is free and compulsory, 294 primary schools being maintained by the State, the pupils

numbering nearly 20,000. There are also secondary and special schools, for the training of teachers, and a university has been opened at the capital, with a competent staff of professors, both native and foreign.

Finance.—The assembly meets biennially, and votes a provision for two financial years. The finances of the Republic at the present time show a surplus in the treasury with no debts of \$500,000. In addition the United States Government paid the first instalment of \$250,000 per annum for rental of the Canal Zone, which sum is on deposit in the United States as well as \$6,000,000 gold, portion of the \$10,000,000 paid for the Canal Zone Concession. Moreover the government has nearly \$1,000,000 gold invested in the National Bank in Panama and as a guarantee for the parity of the silver currency with gold (balboa=\$1 United States money).

	1912.	1913.
Revenue	\$3,455,287	\$3,842,214
Expenditure	3,402,504	3,842,214

There is a small local debt of about \$500,000. The Government has \$6,300,000 invested in the United States, and \$750,000 in the National Bank.

Production and Industry.—The soil is extremely fertile, but there is little cultivation, and nearly one-half the land is unoccupied. The greater part of the cultivated portion is under bananas, other crops including coffee, tobacco and cereals, while cacao grows wild in the northwestern province of Bocas del Toro. The forest-clad hills provide valuable medicinal plants and dyestuffs, India rubber, mahogany and other timber and cabinet woods. The live stock is being greatly improved and there are excellent grazing grounds. Immigration is encouraged by the grant of small farms to likely settlers on favorable terms. The fisheries are important, and the pearl industry is being largely exploited with profitable results. Gold is mined in the eastern provinces, and copper is found in the west, where also valuable coal deposits exist and await development. Iron is also found, and there are productive salt mines on Parita Bay, while mineral springs abound.

Chocolate factories and soap works have been established in the capital, and sugar refineries are projected. The tobacco and salt industries are government monopolies.

The principal exports are bananas, rubber, raw cocoa, vegetable ivory, mother-of-pearl, cabinet woods and medicinal plants; the imports are almost entirely manufactured goods and foodstuffs. Customs duties (15 per cent *ad valorem*, except on flour, rice, corn and a few prime necessities which are 10 per cent *ad valorem*), are levied at all ports, including those of the Canal Zone, the latter being paid over to the Panama government by the officials of the United States, but supplies for the canal are exempt from duty.

Transportation.—The only railway runs along the canal route from Colon (or Aspinwall) to Panama and was included in the purchase by the United States. This interoceanic line is fifty miles in length and was built by United States capitalists in 1855. In the province of Bocas del Toro the United Fruit Company (American) have constructed about 150 miles of railway (including spurs) on their banana plantations, which cover an area of 35,000 acres. This line is being extended toward Port Limon (Costa Rica), and only twenty miles separates the terminal from that port.

In 1910 there were ninety-six post-offices and thirty-seven telegraph offices, with one

wireless station. There is a wireless station at Colon, and another with radius of 260 miles at Balboa. A high power station to communicate 3,000 miles or more is being erected in the Canal Zone.

Cities.—Capital, Panama, on the south coast, the Pacific terminus of the interoceanic line from Colon (Atlantic) and within the Canal Zone, but expressly reserved to the Republic. Population (1911), 37,505. Other towns are Colon (17,748), David (10,000), Los Santos, Santiago, Las Tablas, Bocas del Toro.

Trade with the United States.—The value of merchandise imported into Panama from the United States for the year 1913 was \$24,562,247, and goods to the value of \$4,231,010 were sent thither—a balance of \$20,328,237 in favor of the United States.

Vessels from, duties on, suspended by proclamation, 4871.

Panama, Treaties with.—By The treaty concluded in 1903 for the construction of a ship canal, it was agreed that the United States guarantees and will maintain the independence of Panama. The United States receives in perpetuity the use, occupation, and control of a zone of land for the construction, maintenance and protection of a canal; said zone to be ten miles in width and extending five miles in width on both sides of the central line of the path of the canal, and three marine miles at each end out to sea. Grant is also made of other parts of territory adjacent which may be necessary for the construction and maintenance of the canal. This grant includes the Islands of Perico, Naos, Culebra, and Flamenco. The rights, power, and authority of the United States within the zone shall be the same as though the territory were an integral part of the United States. The use of rivers, streams and bodies of water is included in the grant.

The Republic of Panama acknowledges a monopoly to the United States of the construction of the canal within the limits of its possessions. At the same time the grants hereby conveyed do not in any degree invalidate the claims of private landholders within the area; nor does the grant interfere with the rights of the public to roads and means of conveyance within the territory. Damages arising from the occupation by the United States are to be appraised by a joint commission of Panama and the United States and awards for damages resulting from the construction of the canal shall be paid solely by the United States.

The United States has the power to make such alterations in the sanitary arrangements of the cities of Panama and Colon as it may deem desirable for the supply of water and the distribution of sewage; and for such improvements made at the cost of the United States, that government has the authority to impose reasonable taxes upon the inhabitants of the cities.

Authority is granted to the United States to adopt the measures necessary for the maintenance of law and order within the limits of these cities. The Republic of Panama transfers to the United States all rights of sovereignty over the canal, the New Panama Canal Company, and the Panama Railroad Company which it has inherited from the Republic of Colombia, and authorizes the United States to exercise all such rights and privileges in the construction of the canal.

The only charges, imposts, and duties which are to be levied by the United States at the entrance to the canal and by the Republic of Panama shall be the ordinary charges of toll for the use of the canal and the imposition of customs duties upon such merchandise as is destined to be consumed within the Republic of Panama. No national, state, or municipal taxes shall be imposed upon the canal or upon any machinery, or material of construction, or auxiliaries and accessories of all kinds. The telegraph and telephone lines within the zone shall be at the service of the government of the Republic of Panama for the transmission of official messages at the customary and usual rates. There shall be free and safe access permitted by Panama to the immigration to the zone by persons of all classes and nationalities.

The United States agrees to pay to Panama for the rights, privileges and concessions herein granted ten millions of dollars in gold on ratification of this treaty and an annual sum of two hundred and fifty thousand dollars, beginning nine years after ratification.

The canal shall be neutral in perpetuity and shall be opened in accordance with the treaty between the United States and Great Britain on this subject. Free transportation of vessels, troops, and munitions of war is granted to Panama. If any terms or conditions of this treaty shall prove incompatible with later terms or conditions granted to a third power, the Republic of Panama agrees to waive its rights on such points. No anterior pledges, debts, liens, trusts, or liabilities granted by the Republic of Panama shall operate to the detriment of the United States and any damages resulting therefrom shall be liquidated by Panama.

All claims for remuneration in connection with the canal construction which have been arranged for or any profits which might accrue to the advantage of Panama are hereby renounced by that power.

The United States has full power to police, fortify, and station troops to preserve order or maintain safety in the canal zone. The rights hereby granted to the United States shall not be lessened or impaired by any changes in the laws or in the political integrity of Panama. Naval or coal-stationing stations will be conveyed by Panama to the United States by sale upon terms to be agreed upon should such become necessary for the better maintenance or preservation of the canal.

An extradition treaty was signed in 1904, the terms of which will be found in the Encyclopedic article, Extradition Treaties.

Panama also became a party to the convention between the United States and the several republics of South and Central America for the arbitration of pecuniary

claims and the protection of inventions, etc., which was signed in Buenos Aires in 1910 and proclaimed in Washington July 29, 1914. (See South and Central America, Treaties with.)

Panama Canal.—The idea of constructing a ship canal between the Atlantic and Pacific oceans occurred to navigators as soon as the form of the continents of North and South America became known. As early as 1527 Il. de la Serna surveyed a canal route from Chagres to Panama. Lopez de Gomara in 1551 proposed to the Spanish Government the building of a canal. In 1698, when William Paterson, an adventurous Scot, had established an English colony on the Isthmus of Darien which he called New Caledonia, he advocated constructing a canal across the narrow strip of land separating the two great oceans. Many surveys have been made of the Isthmus with the view of piercing it with an artificial waterway. The United States obtained some very complete maps of the country by the explorations of Col. Hughes in 1849, Lieut. Strain in 1854, Lieut. Michler in 1858, and Commodores Selfridge and Tull in 1870 and 1875. (See opposite 3882.) In 1869 a treaty was signed by representatives of the United States of Colombia and the United States, providing for the construction of a canal by the latter nation, but there was so much delay and the treaty was so amended by the Colombian Congress that the matter was temporarily dropped by the United States. In 1877 the Colombian Government granted a concession to a Frenchman named Wyse for constructing a canal giving him "exclusive privilege for the excavating of a canal between the two oceans," the terminal ports and waters to be neutral.

At the invitation of Ferdinand de Lesseps, an International Scientific Congress met at Paris in 1879 and hastily decided upon the Panama route for a canal, the American members of the congress refraining from voting. The Panama Canal Company was then formed, with De Lesseps as president, and the Wyse concession was purchased for 10,000,000 francs. The route selected was close to the present line of the Panama Railroad, crossed the Chagres River six times and contemplated a long and deep cut through the Cordillera. The cost had been estimated at \$169,000,000, and shares of the company had been taken by French citizens, many of them of the middle class, to the amount of \$260,000,000. Work was begun in 1881, but the affairs of the company were conducted with so great corruption, that it became bankrupt in 1889, and a year later suspended work. In 1892, after an investigation of the affairs of the company, De Lesseps, his son, the contractor Eiffel and others in public life were arrested on charges of fraud in the management of the funds entrusted to them for use in the construction of the canal, and in March of the following year, the New Panama Canal Company was formed, with renewed concessions to terminate in April, 1914.

In the meantime American interest in an interoceanic canal had revived, and there was much discussion of a route across the territory of Nicaragua. The Nicaragua Canal Association obtained concessions from Nicaragua and carried on work of construction from 1889 until 1893, when it became bankrupt. In 1899 a commission was appointed by Congress to determine the most feasible route for an isthmian canal. It reported that if the rights and property of the New Panama Canal Company could be purchased for a reasonable price a canal

across Panama could be built more economically than one across the territory of Nicaragua, and recommended the Panama route. In order that the United States might have exclusive control over the proposed canal the Clayton-Bulwer Treaty (q. v.), between Great Britain and the United States, was superseded by the Hay-Pauncefote Treaty on Dec. 17, 1901. In 1902, in accordance with the report of its commission appointed in 1899, Congress passed an act (approved June 28), authorizing the President to secure for the United States the property of the New Panama Canal Company, at a cost of \$40,000,000. It was further provided in the act, that "should the President be unable to obtain for the United States a satisfactory title to the property of the New Panama Canal Company and the control over the necessary territory of the Republic of Colombia * * * within a reasonable time and upon reasonable terms, then the President should endeavor to provide for a canal by the Nicaragua route." The Colombian Government, however, on Aug. 12, 1903, rejected the Hay-Herran Treaty, which had been negotiated between it and the United States, thereby refusing the United States' final offer of \$10,000,000 down and \$250,000 annually for the Panama concession. (See Hay-Herran Treaty, page 6828.)

On Nov. 3, 1903, the Department of Panama proclaimed its independence of Colombia, and having been recognized as an independent republic by the United States, on Nov. 18, the Isthmian Canal Treaty between the United States and the Republic of Panama was signed at Washington.

According to this treaty the Republic of Panama granted to the United States the perpetual use, occupation and control of a zone of land ten miles wide (five miles on each side of the central line of the route of the canal) across the Isthmus, complete sovereignty to which was to pass to the United States. The price paid the Republic of Panama by the United States was \$10,000,000 down and \$250,000 annually as long as the convention should continue, beginning nine years after the date of ratification. The United States also guaranteed the neutrality of the canal and the independence of the Republic of Panama. Ratifications of the treaty were exchanged at Washington on Feb. 26, 1904. According to an act of Congress approved April 28, 1904, the President took possession of the Canal Zone, and organized its government. The President also appointed an Isthmian Canal Commission of seven members, and directed that the War Department, through this Commission, should undertake the supervision of the construction of the canal and the government of the Canal Zone. On April 4, 1905, this Commission was dismissed and a second appointed, the responsibility being placed chiefly upon the executive committee of three members.

The present composition of the Isthmian Canal Commission is as follows: Chairman and Chief Engineer, Col. George W. Goethals; Assistant Chief Engineer, Col. H. F. Hodges, Civil Engineer, U. S. N.; assistant to the Chief Engineer, H. H. Rousseau; Division Engineer, Central Division, Lieut.-Col. D. D. Gaillard; Division Engineer, Atlantic Division, Lieut.-Col. William L. Sibert; Chief Quartermaster, Lieut.-Col. C. A. Derol; Chief Sanitary Officer, Col. W. C. Gorgas; Hon. Maurice H. Thatcher, in charge of the Department of Civil Administration.

A proposed expression of regret from the United States Government for its recognition of the Republic of Panama raises the question whether the secession of Panama

from Colombia was or was not a legal action.

The federation of the United States of Colombia was formed Dec. 17, 1819, and its Constitution promulgated July 12, 1820. At that time the Isthmus of Panama, a separate Spanish administrative department, was still under Spanish control.

In November, 1821, the Isthmus of Panama revolted, expelled the Spanish garrison and set up an independent state. In so doing it received no Colombian assistance. Subsequently, of its own volition, and reserving its sovereign rights, it federated with the States of Colombia. In 1830 Panama warned the Colombian Government that the illegal assumption of autocratic power by Bolivar would force it to resume its separate existence, and this decision was only modified by Bolivar's resignation of the presidency in that year. In 1841, after five years of civil war, an Isthmian Convention met at Panama and voted to separate from the federation and to resume their independent sovereign rights. Under this resolution the Isthmus remained independent for about a year, when it rejoined the federation on the promise of promulgation of a new Constitution that should recognize its rights.

Two Constitutions adopted in 1843 and 1853 were unsatisfactory and caused continuous insurrection on the Isthmus. Finally, by an amendment to the Constitution of New Granada in 1855, Panama was recognized as a sovereign state, while all the other provinces remained in direct control of the central Government. In 1858 this amendment was confirmed by the promulgation of a new Constitution creating the Granadan Confederation, and constituting a group of sovereign states federated for limited purposes, but otherwise independent and possessing at all times the rights of nullification and secession. In 1860 several of the states in this federation, including Panama, adopted ordinances of secession and the president of the republic recognized their right to do so in addressing the President of the State of Panama as follows:

"I trust that in reply to this letter you will advise me that the State of Panama is still in union with the others, and that you will send your plenipotentiary to take his seat in the Congress, the convocation of which I have communicated to you."

In September, 1861, a new agreement of federation, signed by the President of the State of Panama and the commissioner plenipotentiary of the United States of New Granada, contained the following specific reservations:

Article 1. The sovereign State of Panama shall be incorporated into the new national entity which is called the United States of New Granada, and shall continue in consequence to form one of the federal sovereign states which compose that association * * * with the specific reservation and conditions expressed in the following article.

Article 2. * * * the said state to be hereby incorporated with the United States above mentioned, but this state, in exercise of its sovereignty, reserves to itself the right to refuse its approval to the said new pact, and to the Constitution which may be drawn up, whenever, in its judgment, it may violate the autonomy of the state.

And this agreement was ratified by the Legislative Assembly of Panama, Oct. 15, 1861, with the following stipulation:

The president of the state is hereby authorized, in order to reconstitute the republic, to incorporate the said state therein, always provided that it shall be accorded

the same concessions as set forth in the agreement of Sept. 6 last.

The rights of nullification and secession recognized in the constitutional amendment of 1855, the Constitution of 1858, and the agreement of 1861 were never relinquished by the citizens of Panama, and the terms of this agreement of 1861 were included in the Colombian Constitution of 1863. But notwithstanding this fact, a new Constitution promulgated in 1885, by executive decree, and in violation of the procedure of amendment defined in previous Constitutions, purported to terminate those rights and to reduce the Isthmus of Panama to the status of a crown colony without representation in the national Congress; and it was held in involuntary subjection by overpowering garrisons of the national army stationed in the Isthmian cities by order of the executive at Bogota.

The act of secession adopted by the citizens of Panama in popular assembly Nov. 3, 1903, was, therefore, a reassertion of legal rights maintained since the independence of Panama was achieved by its citizens in 1821, and in the meantime on numerous occasions asserted by Panama, acknowledged by the Colombian Government and never relinquished by the citizens of Panama; and the recognition of the independence of the Republic of Panama was, as Secretary Root wrote to Colombian Minister Mendoza in 1906, "a recognition of the just rights of the people of Panama."

It would appear that the recognition of the Republic of Panama was an act for which the United States should take credit to itself in espousing the cause of an oppressed people, and for which it owes the Government of Colombia no apology or reparation.

The canal is about fifty miles in length from deep water in the Caribbean Sea (Limón Bay) to deep water in the Pacific Ocean. The minimum width is 500 feet and the depth is forty-one feet. Vessels entering the canal from the north, or Caribbean, end pass through a sea level channel for about seven miles to the Gatun dam and locks, where, by a series of three lifts, they are raised to eighty-five feet above sea level.

The Gatun dam, which is the largest ever built crosses the Chagres River where it flows between two hills. It is 8,000 feet long across the top and 2,100 feet thick at its greatest width at the base. Its crest is 115 feet above sea level, or thirty feet above the level of Gatun Lake. The dam expands the waters of the river and lake into one continuous body of water 164 square miles in area, backing them through the Culebra cut thirty-one miles to Pedro Miguel lock. A spillway 285 feet wide carved 1,200 feet through solid rock carries off the surplus water.

The Culebra cut, which ranks with the Gatun dam as one of the engineering wonders of the age, pierces the highest part of the mountain range on the isthmus. Gold Hill, 330 feet high, had to be cut down to within forty feet of sea level, necessitating the removal of nearly a hundred million cubic yards of earth. The cut is 300 feet wide at the bottom and nine miles long.

After reaching this elevation through the locks at Gatun, vessels proceed thirty-one miles to Pedro Miguel lock and are lowered thirty feet to Miraflores Lake, whence, by two more locks, they are lowered to the level of the Pacific Ocean, eight miles from deep water.

There is a 1,000-foot dry dock at the Pacific side, and the locks are each 1,000 feet long and double. The time of transit

through the canal of an ordinary ocean-going vessel is from nine to eleven hours. Passage through the locks is aided by electric "mules" or locomotives on tracks at each side, and vessels may proceed under their own steam at the entrances and through Gatun Lake.

The toll rate is \$1.20 per net ton, about the same as the charges for passage through the Suez canal (\$146, \$148).

The canal puts the United States on an equal footing with Europe in trading with Australia, New Zealand, China, Japan, Hawaii and the Philippines. A ten-knot ship can now run by way of the canal from New York to Yokohama in fifteen days less than it takes to go by the Suez route, bringing the Japanese city nearer to New York than Liverpool by 1,805 miles.

From New York to all Pacific American ports north of Panama, there will be a uniform reduction by way of the canal of 8,415 miles and to such ports south of Panama a uniform reduction of about 5,000 miles. Between New York and Hawaii or Manila the saving is about 5,800 miles. Distances from Liverpool and Antwerp to points on the Pacific coasts of North and South America are shortened about 6,000 and 2,600 miles, respectively. Wellington, New Zealand, by canal is 2,542 miles nearer New York, and the distance between them 2,759 miles less than between Wellington and Liverpool.

The chief engineer in charge of the work was Col. George W. Goethals, U. S. A. The construction of the canal was made possible largely through the sanitation work of Gen. W. C. Gorgas, U. S. A., under whose supervision the fever germs and disease breeding mosquitoes were eliminated at a cost to the government of more than twenty million dollars. The number of men on the work reached the maximum in March, 1913, when 44,733 were employed, of whom between 5,000 and 6,000 were Americans. From that date the number began to decrease. Work was begun in February, 1910. The official opening was set for Jan. 1, 1915, but work progressed so far beyond expectations that vessels and cargoes passed through six months earlier.

Early in May, 1914, cargoes of sugar from Hawaii were transferred to barges and towed through the canal, reloaded and landed in New York May 27th. June 8th, the *Allianca*, 4,000 tons, was towed through the locks. The question of the exemption of American coastwise vessels from payment of tolls is discussed by Presidents Wilson and Taft. (See also Hay-Pauncefote Treaty.)

The total cost of the work is about \$375,000,000. To pay three per cent interest on cost, one per cent for sinking fund and to provide for maintenance, operation and government of the zone and payments to Panama will require a revenue of nearly \$20,000,000. It is estimated that 10,000,000 tons of freight will pass through the canal the first year, one-fifth between American ports. (See also Suez Canal.)

The Canal toll earnings up to April 1, 1915, totaled \$2,891,300. The total cost of operation and maintenance during the same period was \$3,020,000, a deficit of \$128,700.

See illustrations opposite 7092, 7108, 7140, 7172, 7236, 7268.

 - By warships of belligerent nations, 8008.
 - Denied owners of ships violating anti-trust law, 7763.
 - To be in interest of public, 7762.

Panama Canal Commission, 7020.

Panama Congress.—A congress called by the several South and Central American Republics to meet at Panama in June, 1826, to consider the rights of those states. Only one preliminary meeting was held, and the adjourned session of the congress for 1827 never occurred. Among the objects of the proposed congress were the regulations of commercial intercourse, assent to the doctrine that free ships make free goods, and an agreement that "each will guard against the establishment of any future European colony within its borders." The failure of the congress demonstrated the inadvisability of an alliance between the United States and the smaller Republics. President Adams warmly favored the establishment of closer relations with the Central and South American Republics, and was supported in the Cabinet by Henry Clay, whose influence in Congress was considerable. In opposing the alliance of American Republics in a speech in the Senate in April, 1826, John Randolph referred to the coalition of Adams and Clay as a "coalition between the Puritan and the blackleg." This remark provoked a duel between Clay and Randolph.

Panama-Pacific Exposition in 1915.—An International Exposition to commemorate the opening of the Panama Canal to commerce and celebrate the four hundredth anniversary of the discovery of the Pacific Ocean will be held in the city of San Francisco, Cal., in 1915.

Congress, in February, 1911, decided the rival claims of San Francisco and New Orleans for Federal recognition as the site of the exposition in favor of the former city, the vote of the House of Representatives being 259 to 43. The act of Feb. 15, 1911, provided that "Whenever it shall be shown to the satisfaction of the President of the United States that a suitable site has been selected and that the sum of not less than \$15,000,000 will be available to enable the Panama-Pacific International Exposition Company, a corporation organized and existing under and by virtue of the laws of the State of California, for the purpose of inaugurating, carrying forward and holding an exposition at the city and county of San Francisco on or about Jan. 1, 1915," then the president is authorized to invite by proclamation all foreign countries and nations to such proposed exposition. By act of March 4, 1911, the president is further authorized to invite the representatives of foreign nations and their fleets to assemble at Hampton Roads, Va., and thence the representatives go to the city of Washington to be formally welcomed by the president, after which he will proceed with them to Hampton Roads and there review the assembled fleets as they start on their voyage for San Francisco.

In pursuance of this authority, President Taft, on Oct. 11, 1911, in the city of San Francisco, in the presence of a great assemblage, turned the first spadeful of earth at the fair site. The President, Governor of the State and Mayor of the city made addresses, the ships of the Pacific fleet in the harbor joined in the celebration and there was an extended military parade in the streets. The site of the permanent buildings of the exposition is Golden Gate Park, excepting an enormous convention hall to be located at the civic center of the city, Van Ness Avenue and Market Street.

The industrial buildings and other temporary structures will be placed on the bay shore overlooking the entrance to the harbor. The citizens of San Francisco have subscribed \$7,000,000, the state legislature has authorized an appropriation of \$5,000,000 and the municipality one of \$5,000,000 for the exposition. The various commercial and industrial bodies of San Francisco have interested themselves in the enterprise and numerous plans have been considered to make the occasion of the exposition attractive to the visitors who may be expected to come in throngs from all parts of the world, not only to witness the wonderful uprising of San Francisco from its desolation by fire, but to view the scenic splendors of the Pacific Coast region.

Panchita, The, seizure of, on African coast, 3017.

Panhandle State.—A nickname for West Virginia (q. v.). (See also States.)

Panics.—A word formed from the name of the Greek god of shepherds, who is said to have had the power of inspiring sudden fright without apparent cause. It is now commonly used to describe a state of fear bordering on frenzy, from whatever cause induced. In history great commercial crises are spoken of as panics. England, Holland and France have experienced them, and the United States has passed through several notable ones. Those most disastrous have usually followed general injudicious speculation in lands or inflated securities. The crisis of 1816-1819 in the United States, it is claimed, was due to the speculation and disorder following the War of 1812. The next occurred in 1825. A very memorable panic was that of 1837. The few years preceding had been marked by extraordinary speculation, carried on with an unsound banking system. Jackson's "specie circular" caused many banks to suspend, and credit was generally impaired throughout the country. Governmental aid was invoked by many financial institutions, but without avail, as Van Buren, who had succeeded to the Presidency, insisted upon individuals righting their own affairs. In 1857 another period of inflation was followed by another panic. Again in 1873 there was a severe monetary crisis. Just twenty years later occurred the last panic from which the country has suffered. (See also Black Friday.)

The crisis of 1873 is usually dated from the failure of Jay Cooke & Co., Sept. 18th. The New York Stock Exchange closed on the 20th and was not reopened until the end of the month. Clearing House loan certificates were issued in large quantities, the last of which were redeemed Jan. 14, 1874. There had been certain premonitory symptoms of the approaching collapse, and there followed a long period of depression, which did not reach its lowest point until three years later. The number of business failures reported by commercial agents in 1872 was 4,069, and by 1876, the year of the deepest depression, the number had steadily increased to 9,084.

The depression of 1893 was preceded by reckless investments in foreign securities and was brought on by the shipment of gold to Europe caused by the operation of the act of Congress of July 14, 1890, which required the purchase by the United States Treasury of 4,500,000 ounces of silver per month. When the gold reserve held in the Treasury for the redemption of United States notes fell to near \$100,000,000, panic seized the business centers of the country. Bank reserves in New York fell from \$25,439,925 in May to \$5,481,975

in June. The financial tension was rendered more acute by the news that the Indian government had suspended the public coinage of silver. This caused insistent demands for the repeal of the silver purchase law. President Cleveland called an extra session of Congress and the vicious measure was repealed, whereupon recovery was rapid, aided materially by imports of gold and easier money.

Renewed activity in all lines of manufacture and commerce succeeded the panic of 1893 and the year 1906 witnessed the culmination of the remarkable industrial expansion. In 1907 many great railway and industrial enterprises endeavored to sell securities to augment their working capital, with the result that the stock markets felt the oversupply and prices fell with a crash; bank loans were called in and debtors failing to respond were sold out. The crisis was accentuated by the efforts of a few men to corner certain stocks, and their failure caused the suspension of banks which held their securities as collateral for loans. It transpired that the market manipulators were in some instances officers of the banks making the loans, and criminal indictments were secured against them. This panic was relieved by J. Pierpont Morgan, who formed a pool of \$25,000,000 to lend on approved security. (See Currency Laws.)

Paoli (Pa.) Massacre.—After the retreat from Brandywine Washington moved out on the Lancaster road as far as Warren's Tavern. Finding that Howe did not contemplate an attack upon Reading, Washington stationed Gen. Anthony Wayne with 1,500 men at Paoli, a retired and well-chosen position, to be ready to fall upon the rear of Howe's army. On the night of Sept. 20, 1777, Wayne was surprised, through the treachery of the people of the country, and 300 of his men were killed, wounded, or captured, with a loss of only an inconsiderable number of the enemy. Wayne saved his artillery and most of his baggage.

Paper and Wood Pulp Industry.—Returns were received by the Department of Commerce from 727 establishments engaged in the paper and wood pulp industry in 1914. Of the total number, 503 establishments manufactured paper only, 63 wood pulp only, and 161 both paper and wood pulp.

The production of wood pulp in 1914 amounted to 2,894,650 tons, as compared with 2,498,955 tons in 1909, the increase being 15.8 per cent. In addition to the domestic production there were used 534,395 tons of imported pulp in 1914 and 301,392 tons in 1909, the increase for this item being 77.3 per cent.

The total value of the paper produced in 1914 was \$294,355,875, as compared with \$235,242,437 in 1909, the increase being 25.1 per cent.

The production of news paper in 1914 amounted to 1,313,284 tons, valued at \$52,942,774, as compared with 1,175,554 tons, valued at \$46,855,560, in 1909, the increase in quantity being 11.7 per cent., and in value, 13 per cent. There were manufactured in the later year 934,979 tons of book paper, valued at \$73,499,514, and in the earlier, 694,905 tons, valued at \$54,798,840, the increase in quantity being 34.5 per cent., and in value, 34.1 per cent.

The production of fine paper amounted to 247,728 tons, valued at \$34,054,918, in 1914, and to 198,213 tons, valued at \$29,076,638, in 1909, the increase in quantity being 25 per cent. and in value, 17.1 per cent.

The production of wrapping paper was 881,799 tons, valued at \$49,372,753, in 1914, and 766,760 tons, valued at \$42,456,427, in 1909, the increases being 15 per cent. in quantity and 16.3 per cent. in value.

* Decrease.

Location of Establishments.—Of the 727 establishments reported in 1914, 152 were located in New York, 86 in Massachusetts, 59 in Wisconsin, 54 in Pennsylvania, 48 in Ohio, 44 in Connecticut, 39 in Michigan, 38 in Maine, 34 in New Jersey, 31 in New Hampshire, 24 in Indiana, 23 in Vermont, 22 in Illinois, 13 in Maryland, 8 each in Minnesota, Virginia, and West Virginia, 7 in Delaware, 5 each in California and Oregon, 3 each in Iowa, Kansas, North Carolina, and Washington, 2 in Texas, and 1 each in the District of Columbia, Georgia, Mississippi, Rhode Island, South Carolina.

History.—Paper was manufactured in this country near Philadelphia as early as 1690. The growth of the industry, however, was slow until within the last forty years, during which time the introduction of improved machinery and the use of wood fibre as a material have brought about a remarkable growth in the industry. In the decade 1899-1909 the value of products increased \$140,330,802 or 110.2 per cent, this percentage being higher than that for any other decade since 1869. Some part of this increase, however, was due to advance in prices, particularly during the first half of the decade.

Up to 1899 native spruce and poplar were used almost exclusively for pulp wood. Since that time, however, the advancing price of the native stock has led to the increased importation of these woods from Canada and to the use of other and cheaper native woods.

Paper Currency. (See Currency; Finances discussed.)

Paraguay.—Paraguay proper is an inland state of South America, lying between the rivers Paraguay and Alto Paraná, and bounded on the north by the Brazilian province of Mato Grosso, while the Chaco territory lying between the rivers Paraguay and Pilcomayo (and bounded on the north by Bolivia), is also claimed to be Paraguayan, but forms the subject of a long-standing dispute between Paraguay and Bolivia. The whole country may be said to be bounded on the north by Bolivia and Brazil, on the east by Brazil and Argentina, and on the south and west by Argentina. The area is given as 172,000 square miles.

Physical Features.—The country consists of a series of plateaus. The Paraguay and Alto Paraná Rivers are navigable at all seasons. The Pilcomayo River is navigable for 180 miles from Asunción. The plateaus are covered with grassy plains and dense forest. The Chaco is practically a dead level, pierced by great rivers; it suffers much from floods and still more from drought.

History.—Paraguay was visited in 1527 by Sebastian Cabot, and in 1535 was settled as a Spanish possession. From that date to 1776 the country formed part of the vice-royalty of Peru, from which it was separated in 1776 and made an adjunct of the vice-royalty of Buenos Aires. In 1811 Paraguay declared its independence of Spain, and from 1814-1840 was governed by Francia, a Paraguayan despot, who was succeeded by Lopez, 1810-1862. In 1862 Francisco Solano Lopez succeeded his father, and in 1864 declared war against Brazil, Argentina and Uruguay being involved in the struggle. Against these three nations Lopez conducted a five years' war, which terminated in his defeat and death at the Battle of Cerro Corá, March 1, 1870. This dogged struggle reduced the country to complete prostration, and the population, which was 800,000 in 1857, is alleged to have fallen in

1870 to 250,000, of whom barely 30,000 were men.

Government.—The present constitution was adopted at the close of the war, and under its provisions the head of the executive is the President, elected by an electoral college for four years and ineligible for office for eight consecutive years after the expiration of his term. A Vice-President is similarly elected, and succeeds automatically in case of the death, expulsion or absence of the President. There is a Cabinet of five members. The republic is subject to frequent revolutions, of which those of 1911 and 1912 were exceptionally fierce and sanguinary. President (Aug. 15, 1912-1916): Eduardo Schaerer.

Congress consists of two houses. The Senate is composed of thirteen members, elected by direct vote for six years, one-third renewable every two years; the Chamber of Deputies contains twenty-six members, elected by direct vote for four years and renewable as to one-half every two years.

There is a supreme court at the capital with three judges, two courts of appeal, a court of juries, and nine judges of first instance.

Population.—The inhabitants of Paraguay are mainly of Guarani Indian descent. The old Spanish stock has, to a large extent, become mixed with the primitive inhabitants, but during the last fifty years a considerable number of Europeans have settled in the country. The Paraguayan Chaco is only partially explored and is inhabited almost entirely by tribes of nomadic Indians, estimated at 100,000. The population of Paraguay proper includes about 50,000 uncivilized Indians, and 20,000 to 30,000 foreigners, of whom about 10,000 are from Argentina, 10,000 to 15,000 are Italian, 3,000 German, 1,500 Brazilian, 1,000 Spanish, 750 French, 600 Uruguayan, and 400 to 500 British. Immigration is encouraged, but has fallen to about 500 yearly since 1909. The official language is Spanish, but Guarani is general, and little else is spoken away from the towns.

Production and Industry.—The chief natural products are timber and yerba maté (Paraguayan tea). Tobacco and fruit, chiefly oranges, are grown for export, sugar cane, roots and grain for home consumption. The chief industry is stock raising. The primitive conditions of the country and the scarcity of labor appear to be, at present, unfavorable to agriculture. The soil and climatic conditions, however, are said to be exceptionally promising.

Marble, lime and salt are found and worked in small quantities. Iron ore is said to exist in large quantities, but coal has not been found. Copper, manganese and other minerals exist, but the mineral resources are practically unexplored.

The principal exports are oranges, hides, tobacco, yerba maté, timber, dried meat, meat extracts, and quebracho extract. The imports are textiles, hardware, wines, foodstuffs, fancy goods, drugs and clothing. The principal sources of revenue are import and export duties, land tax, stamps, stamped paper and sundry internal taxes.

Finance.—The revenue of the country varies widely between 500,000 and 3,000,000 pesos, and the expenditures, while nearer constant, vary from 600,000 to 1,000,000 pesos. The gold peso, the standard of value, is equivalent to the dollar of the United States, the silver peso to \$0.435, and the current paper pesos of the country, of which 65,000,000 are in circulation, has depreciated to almost nothing. There is a debt of something over \$10,000,000.

Railways.—A railway (Paraguay Central) has been built and extended from Asunción, the capital, to Encarnación, a total distance of 232 miles. There is a through train service from Asunción to Buenos Aires, the coaches being conveyed across the intervening rivers by means of train ferries. The rolling stock is up-to-date and the sleeping and restaurant cars similar to those of European main lines. Under normal conditions vessels drawing ten feet can reach Asunción.

Trade with the United States.—The value of merchandise imported into Paraguay from the United States for the year 1912 was \$187,867, and goods to the value of \$58,285 were sent thither—a balance of \$129,582 in favor of the United States.

Paraguay Expedition. (See illustration opposite 2817.)

Paraguay, Treaties with.—A treaty of friendship, commerce, and navigation was concluded in 1859. Concessions to the United States include free navigation of the Paraguay River as far as the boundaries of Brazil and of the right side of the Paraná in the dominions of Paraguay on like terms as are conferred upon other nations; vessels may discharge all or part of the cargo at the ports of Pilar or may proceed to Asunción. Rights and concessions enjoyed by other nations are conferred

and shall accrue to the United States. Equitable imposition of charges, tolls, and fees; freedom of importation and exportation is equally enjoyed by the United States and Paraguayan vessels.

The rights of citizens of the United States to conduct trade, commerce, and to follow trades, vocations, and professions, in Paraguay are equal to those of subjects of Paraguay. The transfer and holding of property, succession to real or personal property by will or otherwise and free and open access to courts of justice are secured to citizens of the United States. The consular office may act as executors or administrators of estates.

No military exactions of service or forced loans or contributions other than those to which all subjects of Paraguay are lawfully subject shall be imposed. Consular appointment is provided for as in consular conventions. In the event of war it is agreed that citizens of each country residing or doing business within the confines of the other shall suffer no injustice, persecution, or spoliation and shall be free to continue in business or to close out as they may elect; nor shall debts, stocks, or interest be sequestered or detained. Religious freedom is secured to citizens or subjects in the dominions of the other contracting party.

International arbitration on the lines laid down by The Hague Convention of 1899 was agreed to by a treaty signed at Asuncion March 13, 1909.

Paraguay also became a party to the convention between the United States and the several republics of South and Central America for the arbitration of pecuniary claims and the protection of inventions, etc., which was signed in Buenos Aires in 1910 and proclaimed in Washington July 29, 1914. (See South and Central America, Treaties with.)

Parcel Post.—The agitation for a parcel post in the United States dates back to 1875 at least, and during the following thirty-five years (to quote Postmaster-General Wanamaker), only four objections have been raised against it, namely, the United States, the Wells Fargo, the American, and the Adams express companies.

In 1907 Postmaster-General Meyer advocated the establishment of a general and a local parcel post system. His plan for the general parcel post he described as follows: "The present rate for the transmission of fourth-class matter through the mails is 16 cents a pound, and the limit of weight is four pounds. Under our postal treaties the rate from any American post office to 29 foreign countries is 12 cents a pound, and the limit of weight to twenty-four of these countries is eleven pounds. The Department has simply recommended that our citizens be permitted to dispatch parcels to each other, in our own country, at as liberal a rate as that at which they are allowed to send them to a foreign country.

"The general parcels post system is in operation in Great Britain, New Zealand, Australia, Germany, Austria, France, Belgium, Italy, Holland, Chile and Cuba. The weight limit in each case (with the exceptions of Austria and Belgium) is eleven pounds. In England 26 cents will mail an eleven-pound package, the rate being 6 cents for the first pound and 2 cents for each additional pound. Germany has scheduled its rates by zones; thus all packages conveyed not more than 10 miles are charged 6 cents, and for greater distances they are charged 13 cents and when the parcels exceed 12 pounds, the rates are

for each additional 2 pounds carried 10 miles, 2 cents; 20 miles, 3 cents; 50 miles, 5 cents; 100 miles, 8 cents. The weight limits in Austria and Belgium are, respectively, 143 and 132 pounds."

As to the cost of a general parcel post system in the United States, Mr. Meyer, using the cost of handling fourth-class matter as a basis, estimated it as follows:

Revenue from postage	\$240.00
Expenditures:	
R. R. charge per ton	\$29.70
Labor charge per ton	103.87
Other conveyances	15.70
	149.27

Excess of receipts over expenditures \$90.73

The above figures being based on the average haul (540 miles), Mr. Meyer pointed out that \$90.73 excess would cover the transportation by rail of the entire ton over an additional 1,640 miles.

"This recommendation is founded upon the broad ground of the ability of the Government to render the service at a profit, yet with great advantage to the farmer, the retail merchant, and other patrons of the rural routes. The necessary machinery is at hand."

Postmaster-General Hitchcock, in December, 1910, recommended the establishment of a general parcel post throughout the country "as soon as the postal savings system is thoroughly organized." As the preliminary step he hoped that Congress would authorize the local parcel post, which, he said, would entail little if any additional expense, and which, if successful, might lead to the general one. However, he urged Congress to appropriate a fund for further investigation of the cost and possibilities of the general system at the time when it authorizes the local parcel post.

In accordance with an act of the Sixty-second Congress a parcel post system was inaugurated Jan. 1, 1913.

The limit of weight for parcels of fourth-class matter for delivery within the first and second zones was extended by act of Dec. 6, 1913, to fifty pounds, and delivery in other than the first and second zones is twenty pounds.

Parcels weighing four ounces or less are mailable at the rate of one cent for each ounce or fraction of an ounce, regardless of distance. Parcels weighing more than four ounces are mailable at the pound rates shown in the table on the following page, a fraction of a pound being considered a full pound.

The rate on parcels for Alaska, the Hawaiian Islands, the Philippine Islands, Guam, the United States Postal Agency at Shanghai (China), Tutuila (Samoa), and the Canal Zone (except for parcels weighing four ounces or less, on which the rate is one cent for each ounce or fraction thereof), is twelve cents per pound or fraction thereof.

Third-class matter can not be sent by parcel post. (See Postal Rates.)

Seeds, cuttings, bulbs, roots, scions and plants are matter of the fourth class, but are chargeable with the special rate of postage of one cent for each two ounces or fraction thereof, regardless of distance. Ordinary or parcel post stamps are valid for postage and for insurance and collect on delivery fees on fourth-class mail.

Packages mailed as first-class matter should be sealed. Fourth-class parcels must not be sealed.

Boxes to which the lids are nailed or screwed may be accepted for mailing at the fourth-class rates of postage, if, with reasonable effort, the lids can be removed

for the purpose of permitting examination of the contents.

Parcels in bags or cloth so stitched that the necessary examination can not be made will be regarded as closed against inspection.

In addition to the name and address of the sender which is required, it is permissible to write or print on the covering of a parcel, or on a tag or label attached to it, the occupation of the sender, and to indicate in a small space by means of marks, letters, numbers, names or other brief description, the character of the parcel, but ample space must be left on the address side for the full address in legible characters and for the necessary postage stamps. Inscriptions such as "Merry Christmas," "Please do not open until Christmas," "Happy New Year," "With best

wishes," and the like, may be placed on the covering of the parcel in such manner as not to interfere with the address.

Parcels may be remailed or forwarded on the payment of additional postage at the rate which would be chargeable if they were originally mailed at the forwarding office, in which case the necessary stamps shall be affixed by the forwarding postmaster. Payment must be made every time the parcel is forwarded.

A mailable parcel on which the postage is fully prepaid may be insured against loss in an amount equivalent to its actual value, but not to exceed \$25, on payment of a fee of five cents, and in an amount equivalent to its actual value in excess of \$25, but not to exceed \$50, on payment of a fee of ten cents in stamps, such stamps

* The local rate applies to parcels mailed under the following conditions: 1. At any post office for local delivery at such office. 2. At any city letter carrier office, or at any point within its delivery limits, for delivery by carriers from that office. 3. At any post office from which a rural route starts, for delivery on such route, or when mailed at any point on a rural route for delivery at any other point thereon, or at the office from which the route starts, or for delivery on any other rural route starting from the same office.

to be affixed. The amount of the insurance fee shall be placed on the receipt given the sender and on the coupon retained at the mailing office.

The sender of a mailable parcel on which the postage is fully prepaid may have the price of the article and the charges thereon collected from the addressee on payment of a fee of ten cents in stamps affixed, provided the amount to be collected does not exceed \$100. Such a parcel will be insured against loss without additional charge in an amount equivalent to its actual value, but not to exceed \$50.

Matter manifestly obscene, lewd, lascivious, or immoral is unmailable, also spirituous, vinous, malted, fermented, or other intoxicating liquors, or odorous, inflammable or otherwise dangerous substances.

Paris, Declaration of.—In the treaty of Paris, which was concluded March 30, 1856, between Russia and Turkey, Great Britain, France, and Sardinia, the following decla-

rations with regard to the conduct of war were subscribed to by all the parties to the treaty and have since been accepted by nearly all civilized nations: First, Privateering is and remains abolished. Second, Neutral goods in enemies' ships, enemies' goods in neutral ships, except contraband of war, are not liable to capture. Third, Paper blockades are unlawful. The United States refused to agree to this declaration on account of the clause doing away with privateers, as the country was compelled to rely largely upon such service in naval warfare. This refusal cost it heavily in the Civil War, although it was willing to subscribe to the declaration in 1861. In 1871 the declaration was censured by the British Parliament.

Paris, Monetary Conferences at.—

There have been three important international monetary conferences held in Paris. The first assembled June 17, 1867, at the solicitation of France, to "consider the question of uniformity of coinage and seek for the basis of ulterior negotiations."

The United States sent representatives, as did also nearly every European nation. The conference adjourned after about a month without having arrived at any definite conclusion.

August 16, 1878, a second international monetary conference convened at Paris, this time at the instance of the United States, "to adopt a common ratio between gold and silver for the purpose of establishing internationally the use of bimetallic money and securing fixity of relative value between those metals." The collective decision of the European delegates was that this would be impossible, monetary questions being governed by the special situation of each State or group of States. With this as the final conclusion the conference adjourned August 29.

The conference of April 8, 1881, assembled at the call of France and the United States to adopt a permanent relative value between gold and silver, but adjourned July 8 without arriving at any agreement. (See also Brussels, Belgium; Paris, France.)

Paris, Treaties of.—Paris has been the scene of numerous important diplomatic conferences, both between France and other powers and between neighboring nations, who found hospitable neutral ground of the French capital.

Among the most important of treaties of Paris is that of Feb. 10, 1763, between Great Britain on one side, and France, Spain, and Portugal on the other. France ceded to Great Britain Canada, Prince Edward Island, Cape Breton, Mobile, all the territory east of the Mississippi, Dominica, Tobago, St. Vincent and Granadina. England restored to France Guadeloupe, Martinique, St. Pierre, Miquelon and Pondicherry, and ceded St. Lucia to her. Spain ceded Florida to Great Britain, England restored Havana to Spain, and France ceded Louisiana to Spain.

The treaty of Paris of 1782-83 between Great Britain on one side and France, Spain, and the United States on the other, was arranged in 1782 and formally ratified Sept. 3, 1783. John Jay, John Adams, Benjamin Franklin, and Henry Laurens formed the American commission. The absolute independence of the United States was recognized; Florida and Minorca were returned to Spain; navigation of the Mississippi was made free to both Spain and the United States; the Americans relinquished their pretensions to the territory north of Lake Erie; the St. Lawrence River system from the western end of Lake Superior to the forty-fifth parallel was made the boundary between the United States and the British possessions (from the forty-fifth parallel to the sea the boundary followed the highlands after an uncertain fashion and was long a matter of dispute); loyalists and Tories were to be protected in America; English troops were to be withdrawn without destroying any property or taking away any negro slaves belonging to Americans; the right of fishing on the Canadian and Newfoundland coasts was granted to Americans. The portion of the treaty which directly affected America was signed at Paris, but that between Great Britain, France, and Spain was signed at Versailles, by which name the entire treaty is sometimes called.

At Versailles the region of Senegal was granted to France and neutral restitution of conquests in the West Indies was made.

In 1908 commissioners were appointed by the Governments of the United States and Spain to meet at Paris and frame a treaty of peace in accordance with the terms of the protocol signed Aug. 12, 1898.

The commissioners began their sessions Oct. 1 and ended with the signing of a treaty of peace, Dec. 10. (See also Treaties with the various countries.)

Paris Tribunal of Arbitration:

Failure of negotiations of, to protect fur seals of Alaska, 6182.

Reports of agent of United States to, transmitted, 5909.

Parks, National.—Congress has on several occasions set aside and exempted from sale certain territory because of its picturesque character or historic interest. The principal tracts thus appropriated to the use of all the people up to the present time are the Yellowstone National Park and the Yosemite National Park, which was made a national park by act of Congress passed June 30, 1864, and ordered to include the Mariposa Big Tree Grove. This park was granted by Congress to the State of California, conditional upon its being forever set aside as a place of public resort and recreation. It is about 155 miles from San Francisco, is six miles long by about a mile in width, and its perpendicular depth below the surrounding country is about a mile, though it lies 4,000 feet above the level of the sea. Yellowstone Park was created by an act approved March 1, 1872, which dedicated it as a pleasure ground for the benefit and enjoyment of the people. Its general elevation is about 6,000 feet, though mountains 10,000 and 12,000 feet high rise on every side. The region abounds in scenery of unparalleled grandeur. Tall columns of basalt rise to 1,000 feet in height; waters of different degrees of temperature and of untold therapeutic properties are met on every hand; acres of miniature volcanoes sputter and fume; giant geysers intermittently spurt columns of hot water and steam hundreds of feet into the air from basins of all sizes and most fantastic shapes and vivid colorings, while the Gardiner River plunges through a forbidding black hole into the Grand Canyon, whose precipitous walls of 2,000 feet in height have never been explored, and emerges, with an abrupt descent of 350 feet, to pursue its tranquil course over a fertile rolling prairie.

In 1890 three sections of land in Tulare County, Cal., containing giant trees, were reserved for a national park. In 1890 Congress provided for a park of 1,500 acres on Rock Creek, District of Columbia, half the cost (\$1,200,000) being paid by the people of Washington and half by the United States. Later Congress reserved the battle grounds of Chickamauga, Shiloh, Vicksburg, and others as public parks. The total area of the national parks amounts to 3,883,196 acres.

The national parks and reservations mentioned below are under the supervision of the Secretary of the Interior. General In-

formation, the annual administrative reports, copies of the rules and regulations, and compilations of the laws relating to the parks may be obtained from the Secretary of the Interior or from the superintendents of the parks.

Yellowstone National Park is in Wyoming, Montana, and Idaho, and has an area of 2,142,720 acres. The superintendent's address is Yellowstone Park, Wyoming. The park can be reached by the following railroads: Northern Pacific Railroad to Gardiner, the northern entrance, via Livingston, Mont.; Oregon Short Line Railroad to Yellowstone, Mont., the western entrance; Chicago, Burlington and Quincy Railroad to Cody, Wyo., from which the eastern entrance to the park is accessible. Stage and private transportation connections for the reservation are made at all these points. The tourist season extends from June 1 to Sept. 15, but accommodations are furnished at Mammoth Hot Springs the entire year.

Yosemite National Park, California, including the Yosemite Valley and Mariposa Big Tree Grove, embraces an area of 719,622 acres. The superintendent's address is Yosemite, Cal. The park can be reached from Merced on the Atchison, Topeka and Santa Fé and the Southern Pacific railroads, by way of Yosemite Valley Railroad, which runs to the western boundary, and by connections of the same roads to Raymond, on the southwest; stage lines run from the terminus of the Yosemite Valley Railroad and from Raymond to Yosemite Valley within the park.

Glacier National Park, Montana, has an area of approximately 915,000 acres, of which 15,000 acres have been surveyed. Within the limits stated there are 250 lakes, ranging from ten miles to a few hundred feet in extent. There are more than sixty glaciers between five square miles and a few acres in area. There are wild animals, plants, and rocks in numbers and quantity to satisfy the most ardent student, and views of great variety, beauty and grandeur to gratify the artist and the lover of nature. The park can be reached via the Great Northern Railway.

Mount Rainier National Park, Washington, has an area of 297,360 acres. The superintendent's address is Ashford, Wash. The park is reached by stage or private transportation from Ashford, Wash., on the Tacoma Eastern Railroad, and by trail from Fallfax, on the Northern Pacific Railroad. The tourist season extends from June 15 to Sept. 15.

Sequoia National Park, California, has an area of 161,597 acres. The address of the superintendent is Ranger, Cal., during the tourist months (June 1 to Sept. 15) and Three Rivers, Cal., the balance of the year. This park may be reached from Visalia, on the Southern Pacific and the Atchison, Topeka and Santa Fé railroads by way of the Visalia Electric Railroad Company to Lemon Cove, thence by stage or private conveyance.

General Grant National Park, California, has an area of 2,536 acres. This reservation is administered jointly with Sequoia National Park, and the tourist season extends from June 1 to Sept. 15. The address of the superintendent is given above. The park may be reached by stage and private conveyance from Sanger, on the Southern Pacific Railroad.

Crater Lake National Park, Oregon, has an area of 159,360 acres. The address of the superintendent during the tourist months (June 15 to Sept. 30) is Crater Lake, Ore., and during the balance of the year Klamath Falls, Ore. This park may be reached by steamer line and stage from

- Klamath Falls, Ore., or by private conveyance from Medford, on the Southern Pacific.

Wind Cave National Park, South Dakota, contains 10,522 acres. The superintendent's address is Wind Cave, S. Dak. This park may be reached by private conveyance from Hot Springs, on the Chicago, Burlington and Quincy and the Chicago and Northwestern railroads, or by similar conveyance from Custer, on the Chicago, Burlington and Quincy Railroad. The reservation is open to tourists the entire year.

Sullys Hill Park, North Dakota, on the shore of Devil's Lake, has an area of 780 acres. The address of the superintendent is Fort Totten, N. Dak. Devil's Lake, Narrows, and Tokio, on the Great Northern Railroad, are close to the park, and from these points the reservation can be approached by wagon, or by boat (private conveyance).

Platt National Park, at Sulphur, Oklahoma, has an area of 848.22 acres. Sulphur is the post-office address of the superintendent. The town is accessible by the Atchison, Topeka and Santa Fé and the St. Louis and San Francisco railroads. The park, which is open to tourists the entire year, is within walking or riding distance of the railroads.

Mesa Verde National Park, Colorado, has an area of 42,376 acres, and the five-mile strip under the park jurisdiction for the protection of ruins, which abuts the park, contains 175,360 acres. The address of the superintendent is Mancos, Col., the nearest railroad station, on the Rio Grande Southern Railroad. This station is about twenty-five miles from the ruins, which may be reached only by horseback or afoot.

Casa Grande Ruin, Arizona, a reservation, has an area of 480 acres. The nearest railroad station is Casa Grande, on the Southern Pacific Railroad. It may also be reached by private conveyance from Florence, Ariz., on the Phoenix and Eastern Railroad. The address of the custodian is Florence. The Mesa Verde National Park and the Casa Grande Reservation were set aside to protect the instructive prehistoric ruins and other objects of antiquity which they contain. These ruins are being excavated and repaired and are open for the inspection of visitors. Reports on the repair of such ruins have been issued by the Department of the Interior, and more detailed accounts are distributed by the Bureau of American Ethnology, Smithsonian Institution.

Hot Springs Reservation, Arkansas (the permanent reservation), has an area of 911.63 acres. Eleven bathhouses on the reservation and thirteen in the city of Hot Springs, as well as several hotels operated in connection with bathhouses, receive hot water from the springs, under lease with the Secretary of the Interior. The address of the superintendent is Hot Springs, Ark.

Rocky Mountain National Park, created by the act of Jan. 26, 1915, is in Colorado, about 45 miles in an air line northwest of Denver. It has an area of approximately 229,000 acres, and is on both sides of the Continental Divide in the neighborhood of Long's Peak. The park may be reached from Lyons, on the Chicago, Burlington and Quincy Railroad; from Loveland, on the Colorado and Southern Railroad, and from Granby, on the Denver and Salt Lake Railroad.

Lassen Volcanic National Park, the bill creating which President Wilson signed in August, 1916, is California's fourth national park. Lassen Peak, which showed volcanic activity only a few years ago, was set apart as a national monument in 1906. Cinder Cone, in its immediate neighborhood was

also thus distinguished at the same time. The new national park includes both of these remarkable volcanic monuments within its area of 82,880 acres.

Parks, National, establishment of Bureau of, recommended, 7724.

Parley.—In military parlance, a conference between army officers of belligerents.

Parliamentary.—In accordance with the rules laid down for the guidance of assembly deliberations; originally in accordance with the rules laid down for the guidance of Parliament.

Parliamentary Law. (See Parliamentary.)

Parole.—To permit or grant leave of absence, especially to a soldier.

Partizan (or Partisan).—Involving to a political party, or to a political principle; especially a blind follower of such party or principle.

Party.—In political parlance, a body of persons working together for the same political ends. (See Political Parties.)

Passamaquoddy Bay, between Maine and New Brunswick, commissioners to mark international boundary in, referred to, 6063.

Passport.—A document issued by competent civil authority, granting permission to the person specified in it to travel or authenticating his right to protection. In some nations no person is allowed to leave the country without a passport from his government; but the regulations of the different jurisdictions regarding the use of passports have greatly varied and of late years have exhibited a tendency toward a relaxation of stringency, extending in many countries to their total abolition. Passports of the United States, which are given under the seal of the Secretary of State, request that the person named therein be permitted to pass freely and safely, and in case of need that aid and protection be afforded him.

The extent to which an American passport held by a naturalized citizen of this country is recognized in his native land, depends principally upon whether that country has concluded a treaty of naturalization with the United States, although, under the law of this country, no distinction is made between native and naturalized American citizens so far as their right to protection is concerned. The United States has treaties of naturalization with the following European countries: Austria-Hungary, Belgium, Denmark, the German States, Great Britain, Norway, and Sweden.

Patents.—Literally, open letters. In England the word is applied to all licenses and authorities granted by the Crown. Patents

for titles of nobility were first granted by Edward III. in 1334. The earliest patent for the exclusive privilege of printing books was granted in 1591. The property right of inventors and discoverers to their arts and manufactures was first secured by letters patent by an act passed in 1623. In the United States a patent is generally understood to mean the right to the exclusive use for a limited number of years, of a new or useful invention or discovery by the inventor or discoverer or his heirs or assigns. A few patents had been issued by the states. In 1790 the first patent law was passed by the General Government, and granted letters patent for fourteen years to both citizens and foreigners. Application had formerly to be made to the Secretaries of War and State and the Attorney-General. In 1793 an act was passed permitting the issue of patents to citizens only and requiring a fee of \$50. The states were not permitted to issue patents. This was decided in the case of *Gibbons vs. Ogden* (q. v.), from New York. In 1836 the patent laws were revised and the present patent system in this country may be said to date from that year. One of the most important changes then introduced was the regulation requiring a preliminary examination of the novelty and patentability of an invention. In 1839 an inventor was given the right to use his invention before applying for a patent, but such use was limited to two years. Under the law of 1842 patents were granted for a term of seven years; the term was subsequently extended to fourteen years, and finally in 1861 the present seventeen-year term was granted. The patent laws were revised in 1870 and patents were allowed to all persons, both citizens and foreigners, who could prove the novelty and usefulness of their inventions. The salient features of the patent laws of to-day, however, are still those of the law of 1836. The number of patents granted annually is about 30,000. Since the year 1836, no less than 885,635 patents have been issued by the United States, while the combined total of foreign countries amounts to 1,863,836. (See also Department of the Interior.)

Patents are issued in the name of the United States, and under the seal of the Patent Office, to any person who has invented or discovered any new and useful art, machine, manufacture, or composition of matter or any new and useful improvement thereof, or any new original and ornamental design for an article of manufacture, not known or used by others in this country before his invention or discovery thereof, and not patented or described in any printed publication in this or any foreign country, before his invention or discovery thereof or more than two years prior to his application, and not in public use or on sale in the United States for more than two years prior to his application, unless the same is proved to have been abandoned, upon payment of the fees required by law and other due proceedings had.

Every patent contains a grant to the patentee, his heirs or assigns, for the term of seventeen years, except in the case of design patents, of the exclusive right to make, use, and vend the invention or discovery throughout the United States and the territories, referring to the specification for the particulars thereof.

If it appear that the inventor, at the time of making his application, believed himself to be the first inventor or discoverer, a patent will not be refused on account of the invention or discovery, or any part thereof, having been known or used in any foreign country before his invention or discovery

thereof, if it had not been before patented or described in any printed publication.

Joint inventors are entitled to a joint patent; neither can claim one separately. Independent inventors of distinct and independent improvements in the same machine cannot obtain a joint patent for their separate inventions; nor does the fact that one furnishes the capital and another makes the invention entitle them to make application as joint inventors; but in such case they may become joint patentees by means of a deed of assignment.

No person otherwise entitled thereto will be debarred from receiving a patent for his invention or discovery, by reason of its having been first patented or caused to be patented by the inventor or his legal representatives or assigns in a foreign country, unless the application for said foreign patent was filed more than twelve months prior to the filing of the application in this country, and four months in cases of designs, in which case no patent shall be granted in this country.

If an inventor wishes to file an application for patent, a copy of the Rules of Practice, containing forms and instructions, will be sent upon request. It is advisable, in every case, that the services of a competent registered patent attorney be secured, as the value of patents depends largely upon the skillful preparation of the specification and claims.

Applications for a patent must be made in writing to the Commissioner of Patents. The applicant must also file in the Patent Office a written description of the invention or discovery, and of the manner and process of making, constructing, compounding, and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art or science to which it appertains, or with which it is most nearly connected, to make, construct, compound, and use the same; and in case of a machine, he must explain the principle thereof, and the best mode in which he has contemplated, applying that principle, so as to distinguish it from other inventions, and particularly point out and distinctly claim the part, improvement, or combination which he claims as his invention or discovery. The specification and claim must be signed by the inventor and attested by two witnesses.

When the nature of the case admits of drawings, the applicant must furnish a drawing of the required size, signed by the inventor or his attorney in fact, and attested by two witnesses. The applicant, if required by the Patent Office, shall furnish a model of convenient size to exhibit advantageously the several parts of his invention or discovery, but a model should not be sent unless first called for by the Patent Office.

The applicant shall make oath that he verily believes himself to be the original and first inventor or discoverer of the art, machine, manufacture, composition, or improvement for which he solicits a patent; that he does not know and does not believe that the same was ever before known or used, and shall state of what country he is a citizen and where he resides, and whether he is the sole or joint inventor of the invention claimed in his application. In every original application the applicant must distinctly state under oath that the invention has not been patented to himself or to others with his knowledge or consent in this or any foreign country for more than two years prior to his application, or on an application for a patent filed in any foreign country by himself or his legal representatives or assigns more than twelve months prior to his application in this

country, or four months in cases of designs. If any application for patent has been filed in any foreign country by the applicant in this country or by his legal representatives or assigns, prior to his application in this country, he shall state the country or countries in which such application has been filed, giving the date of such application, and shall also state that no application has been filed in any other country or countries than those mentioned; that to the best of his knowledge and belief the invention has not been in public use or on sale in the United States nor described in any printed publication or patent in this or any foreign country for more than two years prior to his application in this country.

Every patent or any interest therein shall be assignable in law by an instrument in writing; and the patentee or his assigns or legal representatives may, in like manner, grant and convey an exclusive right under his patent to the whole or any specified part of the United States.

A reissue is granted to the original patentee, his legal representatives, or the assignees of the entire interest when, by reason of a defective or insufficient specification, or by reason of the patentee claiming as his invention or discovery more than he had a right to claim as new, the original patent is inoperative or invalid, provided the error has arisen from inadvertence, accident, or mistake, and without any fraudulent or deceptive intention. Reissue applications must be made and the specifications sworn to by the inventors, if they be living.

Fees must be paid in advance, and are as follows: On filing each original application for a patent, \$15. On issuing each original patent, \$20. In design cases: For three years and six months, \$10; for seven years, \$15; for fourteen years, \$30. On every application for the reissue of a patent, \$30. On filing each disclaimer, \$10. For certified copies of patents and other papers in manuscript, ten cents per hundred words and twenty-five cents for the certificate; for certified copies of printed patents, eighty cents. For uncertified printed copies of specifications and drawings of patents, five cents each. For recording every assignment, agreement, power of attorney, or other paper, of three hundred words or under, \$1; of over three hundred and under one thousand words, \$2; for each additional thousand words, or fraction thereof, \$1. For copies of drawings, the reasonable cost of making them. The Patent Office is prepared to furnish positive photographic copies of the drawings of pending patented or abandoned cases, in sizes and at rates as follows: Large size, 10x15 inches, twenty-five cents; medium size, 8x12½ inches, fifteen cents. Negative photographic copies of specifications and drawings of foreign patents, or of any page or part of page of any printed publication in the possession of the office, will be furnished on paper 7x11 inches, for fifteen cents per sheet. Fee for examining and registering trade-mark, \$10, which includes certificate. Stamps cannot be accepted by the Patent Office in payment of fees.

The receipts of the Patent Office during the year ending December 31, 1912, were \$2,118,158.30, and expenditures, \$2,022,066.11. Receipts over expenditures, \$96,092.19. Total net surplus to December 31, 1912, \$7,160,017.95. The number of new patents issued during 1912 was 37,573.

The total number of applications filed at the Patent Office in seventy-five years, 1837-1912, was 1,926,009; number of original patents, including designs and reissues issued, 1,106,235.

There is now no law permitting the filing of a caveat, the old law having been repealed July 1, 1910. Patent No. 1,000,000 was granted August 8, 1911, to F. H. Hooton, of Akron, O., for an automobile tire.

Patriotism.—Ardent devotion to the cause and purposes of one's country, usually accompanied by willingness to fight for that country.

Patrol.—A soldier who guards life or property. (See Picket, Sentry and Sentinel.)

Patrons of Husbandry.—A secret society organized for the purpose of establishing cooperation among farmers. In 1876 it took the name "Grangers" (q. v.).

Paul vs. Virginia.—An important case before the United States Supreme Court. The statutes of Virginia required the deposit in the State treasury of certain moneys in State bonds by insurance companies not incorporated under the State laws in return for licenses to do business in the State. This law was enacted Feb. 3, 1866, and later in the month a supplemental act

was passed. In the same year Samuel Paul, a citizen of Virginia, acting as agent for a New York insurance company, was indicted before the Circuit Court of Petersburg and sentenced to pay a fine of \$50 for refusing to comply with the above law. The court of appeals of Virginia affirmed the decree of the Circuit Court, and, the case having been taken to the Supreme Court of the United States, that tribunal affirmed the judgment of the State court of appeals on the ground that the State law in question did not conflict with that clause of the National Constitution which declares that "the citizens of each State shall be entitled to all privileges and immunities of citizens in the several States," nor with the power of Congress to "regulate commerce with foreign nations and among the several States." Justice Field, for the court, held that issuing a policy of insurance is not a transaction of commerce. The policies are local transactions and are governed by the local law. Justice Field stated that corporations are not citizens within the meaning of the Constitution.

Paulus Hook (N. J.), Capture of.—In the summer of 1779 the British had a garrison of 383 men stationed at Paulus Hook, N. J., opposite New York City. At 3 o'clock on the morning of Aug. 19, Maj. Harry Lee, with a force of 300 picked men, made a descent upon the fort and in a short engagement killed 30 men and took 160 prisoners. The British having retired to a small circular redoubt too strong for Lee's men, he returned to camp with his prisoners. Congress rewarded Lee with thanks and a gold medal.

Pea Ridge (Ark.), Battle of.—Called by the Confederates the battle of Elk Horn. In December, 1861, Gen. Samuel R. Curtis took command of the 12,000 Federal troops at Rolla, Mo., and advanced against Gen. Sterling Price, who retreated before him into Arkansas. Gen. Price was joined by Gen. Ben. McCulloch. In January Gen. Earl Van Dorn assumed command of the combined Confederate forces, estimated at 16,000, including some 5,000 Cherokee In-

dians recruited for the service by Albert Pike. Curtis had about 10,000 men in line and forty-eight pieces of artillery. March 7, 1862, Van Dorn attacked Curtis in his position on Pea Ridge, a line of bluffs along Sugar Creek, in Benton County, Ark. Skillful manipulation of the artillery in Sigel's division did much toward determining the result. Fighting continued all day, and during the night both armies changed positions. The battle was renewed at sunrise on the 8th, and after two hours Van Dorn's forces retreated. The Confederate Generals McCulloch and McIntosh were killed and Price and Slack were wounded. The Confederate losses were about 1,300. The Union army lost 1,351 in killed, wounded, and missing.

Peace Commission:

In 1867, treaties concluded by, 4005.

Peace Establishment of Navy. (See Navy.)

Peace, International.—The most powerful factors in the bringing about of universal peace have been democracy and education. The one has taken the powers of peace and war from sovereigns and ruling classes and has placed them in the custody of those on whose shoulders the scourge of war must inevitably fall—the masses. The other has dissipated the racial and religious bigotry bred by ignorance and instilled a wholesome broadness of view and charity for all men into the minds of the young of successive generations, so that, in the occidental world, there remains to-day scarcely a vestige of the old national antipathies.

Viewing the movement for international peace thus—as a movement in which the working masses of all races and all nations are interested—it is peculiarly pleasant to note that the first important instance of arbitration was afforded by the world's foremost popular governments, Great Britain and the United States. The story is told in the article entitled "Alabama Claims."

Since that glorious achievement the movement for arbitration, for universal peace, and for disarmament has progressed rapidly. The article, "Hague Peace Conference," describes a recent achievement of the propaganda.

The longest step forward was taken in August, 1911, when President Taft negotiated with Great Britain and France (see p. 7297) treaties contemplating the arbitration of *all* questions. They differed from previous pacts having for their purpose the arbitration of international controversies by frankly including in the differences susceptible of adjudication even questions involving national honor, theretofore the most elastic pretexts of war. An idea of the character of the treaties (which were the same in each case) may best be obtained by following the steps provided for therein in a supposititious case of an act contrary to the Monroe Doctrine on the part of Great Britain. Even though such an injury to our national pride aroused a fervor throughout the country as passionate as the popular sentiment that forced the government to declare war in 1898,

and even though public opinion and the administration were united in the belief that the question was not properly subject to arbitration, yet would we be bound by the treaty to request Great Britain, through diplomatic channels, to appoint three members to constitute with three American members the Joint High Commission of Inquiry provided for by the treaty. Either party might, according to the treaty, postpone convening the Commission until one year from the date of our request, thus affording opportunity for warlike preparations, for diplomatic negotiations, or for moderate counsels, as the case might be; but if neither party desires such postponement the Commission would convene immediately. The six Joint High Commissioners would hear the two sides of the controversy, subpoena and administer oaths to witnesses, and make a report which should elucidate the facts, define the issues, and contain such recommendations as it may deem appropriate. This report would not be considered as a decision on the facts or the law, and, if five or all of the six Commissioners considered the matter properly subject to adjudication, the controversy would, under the treaty, go to some arbitral tribunal like that at The Hague for settlement, no matter whether or not the people of both countries were unanimous in demanding war or not.

Germany's Reply to, 8193.

Peace Societies. (See Pacifist.)—Among the prominent peace societies in the United States may be mentioned the American Union Against Militarism; the Emergency Peace Federation (organized Feb. 7, 1917); the Women's Peace Party; the American Peace Society; the World Court League, which aims for the establishment of an international Supreme Court; the Carnegie Peace Foundation, which seeks to prepare the way for perpetual peace by education; and the League to Enforce Peace (q. v.). Of these, the only ones actively to oppose the entrance of the United States into the European War were the first two mentioned, which, after the declaration of war, devoted themselves to opposing such war measures as censorship and conscription. The American Committee on War Finance was a committee growing out of the American Union Against Militarism, and agitated for an increase in taxation which would enable the war to be met by the present, instead of by future generations. After war was declared, the Emergency Peace Federation called a Conference for discussing terms of peace on May 30, 1917. The Religious Society of Friends, who refuse to participate in war, also had their peace committees active during the war agitation.

Peace Treaties.—When William Jennings Bryan was appointed Secretary of State by President Wilson in 1913, he conceived a plan for the advancement of the cause of peace throughout the world by means of treaties pledging all nations to submit their grievances with other nations to representatives of disinterested nations for adjustment instead of resorting to war. They were on the same plan but on a broader scale than President Taft's treaties with Great Britain and France. These provided for a year's delay on request of either party before resort to arms, and in the meantime

a joint high commission of three to investigate the dispute. The senate eliminated so much of the Taft treaties as to make them valueless and they were never signed.

Bryan's idea was not so much arbitration as delay for a year, or at least six months, during which time investigations should be made and neither nation should increase its army or navy. It was informally advanced at a grapejuice banquet given to some forty members of the diplomatic corps in Washington in April, 1913. President Wilson acquiesced in the movement, and thirty-nine treaties were prepared. The text of the original treaties follows:

Article I.—The high contracting parties agree that all disputes between them, of every nature whatsoever, which diplomacy shall fail to adjust, shall be submitted for investigation and report to an International Commission, to be constituted in the manner prescribed in the next succeeding Article; and they agree not to declare war or begin hostilities during such investigation and report.

Article II.—The International Commission shall be composed of five members, to be appointed as follows: One member shall be chosen from each country, by the Government thereof; one member shall be chosen by each Government from some third country; the fifth member shall be chosen by common agreement between the two Governments. The expenses of the Commission shall be paid by the two Governments in equal proportion.

The International Commission shall be appointed within four months after the exchange of the ratifications of this treaty; and vacancies shall be filled according to the manner of the original appointment.

Article III.—In case the high contracting parties shall have failed to adjust a dispute by diplomatic methods, they shall at once refer it to the International Commission for investigation and report. The International Commission may, however, act upon its own initiative, and in such case it shall notify both Governments and request their cooperation in the investigation.

The report of the International Commission shall be completed within one year after the date on which it shall declare its investigation to have begun, unless the high contracting parties shall extend the time by mutual agreement. The report shall be prepared in triplicate; one copy shall be presented to each Government, and the third retained by the Commission for its files.

The high contracting parties reserve the right to act independently on the subject-matter of the dispute after the report of the Commission shall have been submitted.

*** Article IV.**—Pending the investigation and report of the International Commission, the high contracting parties agree not to increase their military or naval programs, unless danger from a third power should compel such increase, in which case the party feeling itself menaced shall confidentially communicate the fact in writing to the other contracting party, whereupon the latter shall also be released from its obligation to maintain its military and naval status quo.

Article V.—The present treaty shall be ratified by the President of the United States of America, by and with the advice and consent of the Senate thereof; and by the President of the Republic of Guatemala, with the approval of the Congress thereof; and the ratifications shall be

*** Article IV** was eliminated by most of the signatories.

Peace Treaties *Messages and Papers of the Presidents*

exchanged as soon as possible. It shall take effect immediately after the exchange of ratification, and shall continue in force for a period of five years; and it shall thereafter remain in force until twelve months after one of the high contracting parties has given notice to the other of an intention to terminate it.

In witness whereof the respective plenipotentiaries have signed the present treaty and have affixed thereto their seals.

Done in Washington on the twentieth day of September, in the year of our Lord nineteen hundred and thirteen.

After the elimination of Article IV and some other changes in phraseology thirty of the thirty-nine governments to which it had been submitted indicated tentative acceptance of the proposal. Of the nine which refused two later signed. By the time the European war was well under way, peace treaties had been signed by Italy, Argentina, Bolivia, Brazil, Russia, Norway, Persia, Portugal, Denmark, Chile, Costa Rica, Honduras, Nicaragua, The Netherlands, Switzerland, Salvador, Guatemala, Panama, Uruguay and Venezuela.

Peace Without Victory Address, President Wilson's, 8199.

Peach Tree Creek (Ga.), Battle of.—July 17, 1864. Sherman's army advanced across the Chattahoochee River and Johnston fell back toward Atlanta. Just at this time Johnston was superseded in command of the Southern army by Gen. John B. Hood. Before the Federal forces could be brought into line of battle before Atlanta they were attacked by Hood's army near Peach Tree Creek, July 20, 1864. The attack fell mainly upon Newton's division of the Fourth Corps, the Twentieth Corps, and Johnston's division of the Fourteenth Corps. After a severe battle the Confederates retired into their intrenchments, leaving upon the field 500 dead, 1,000 wounded, 7 stand of colors, and many prisoners. The Federal loss in killed, wounded, and missing was 1,500. Gen. Hood censured Hardee for the reverse.

Peacock, The.—A United States sloop of war, carrying eighteen guns, commanded by Capt. Lewis Warrington. On April 29, 1814, when off the coast of Florida, this vessel attacked the British brig *Eperrier*, also mounting eighteen guns. After a battle lasting forty minutes, in which 22 of her men were killed or wounded, the *Eperrier* surrendered. It proved a rich prize, as it had on board \$118,000 in specie. On June 30, 1815, the *Peacock* attacked and captured the *Nautilus*, of fourteen guns. This capture took place after the treaty of peace. Next day, on ascertaining this fact Capt. Warrington released the *Nautilus*, and returned home.

Pearl Harbor, Hawaii, improvement and fortification recommended, 7484.

Pearl River, Hawaiian Islands, improvement of harbor of, and establishment of naval station at, recommended, 5623.

Pelican State.—A nickname for Louisiana (q. v.). (See also States); sometimes also nicknamed the Creole State.

Pembina, Minn., proclamation granting privileges of other ports to, 2859.

Penitentiaries.—The first penitentiary in the United States was founded in Philadelphia in 1786 through the influence of the Society of Friends. This was followed

soon afterwards by the New York prisons at Sing Sing and Auburn. Sept. 23, 1789, Congress recommended to the several states to make it the duty of keepers of jails to receive prisoners committed under authority of the United States. In 1790 the legislature of Pennsylvania passed a law to try the system of solitary confinement of prisoners at hard labor as a reformatory measure. A society for the improvement of prison discipline and for the reformation of juvenile offenders was established in Boston in 1815, and in 1825 the House of Refuge on Blackwell's Island, N. Y., the first institution in the United States for reforming juvenile delinquents, was opened. The contract system of leasing prisoners to private parties began with the Mississippi penitentiary Feb. 21, 1867.

Federal Penitentiaries.—All territorial penitentiaries were placed under control of United States marshals and the Attorney-General was authorized to prescribe rules for their government by act of Congress of June 10, 1871. In 1874 the United States Military Prison was established at Fort Leavenworth. In 1886 a United States jail was located at Fort Smith, Ark. In 1891 Congress authorized three United States prisons, there being now, besides those mentioned above, a United States penitentiary at Atlanta, Ga., one on McNeil's Island, State of Washington, a United States jail in the District of Columbia, and a Territorial prison at Yuma, Arizona. There is also one penitentiary in Hawaii, and in the Philippine Islands two such institutions for the confinement of offenders against the civil law. In the several states, under state jurisdiction, there are altogether fifty-six prisons and penitentiaries. United States prisoners not confined in Federal institutions are kept in those of the various states.

Penitentiaries:

Military prison at Fort Leavenworth, use of, as discussed, 6161.

Recommended, 5969.

Penitentiary Congress, International, at London, 4162.

Pennant.—A streamer-like pointed flag.

Penn Yan, N. Y., special agent to take charge of post-office in, referred to, 3799.

Pennamite War. (See Wyoming Controversy.)

Pennsylvania.—One of the thirteen original states; nickname, "The Keystone State"; motto, "Virtue, Liberty and Independence." It extends from lat. 39° 43' to 42° 15' north and from long. 74° 40' to 80° 34' west. It is bounded on the north by Lake Erie and New York, on the east by New York and New Jersey (separated from both by the Delaware River), on the south by Delaware, Maryland and West Virginia, and on the west by Ohio and West Virginia. It has an area of 45,126 square miles. Pennsylvania was originally named Sylvania ("forest country"). In 1681 William Penn obtained a grant of 40,000 square miles of land from Charles II in payment of a debt of £16,000 due Penn's father, an admiral in the English navy. The King gave the territory the name of Pennsylvania in

honor of Penn. In 1682 the city of Philadelphia was laid out on plans drawn in England. Penn established a popular form of proprietary government and offered inducements to immigrants by his wise administration and honorable dealings with the Indians. His rights passed to his heirs, from whom they were purchased by the state in 1776. Pennsylvania had been settled by a colony of Swedes in 1638, prior to the grant of the territory to Penn. The United States Constitution was ratified by a state convention Dec. 12, 1787. A new state constitution was made in 1790, another in 1838, and the present in 1873.

The state is traversed from northeast to southwest by low parallel ranges of the Alleghenies, and is drained by the Ohio, Susquehanna, and Delaware Rivers. It is the first state in the production of petroleum and the manufacture of iron and second in general manufactures.

Pennsylvania so far exceeds all the rest of the states in the value of its mineral products as to stand almost alone. Exclusive of the value of pig iron, coke, and other derived or secondary products not included in the total, the value of Pennsylvania's mineral production is nearly one-fourth that of the entire country; and in 1913, according to figures of the United States Geological Survey computed in co-operation with the Pennsylvania Topographic and Geologic Survey Commission, it equaled the combined value of the production of West Virginia, Illinois, Ohio, and California, the next four states in the value of their mineral products.

Pennsylvania derives its mineral wealth almost entirely from nonmetalliferous mining operations. Except for a small amount of copper it produces none of the precious or semiprecious metals, and the only other metal which figures in the total production of the state is iron, of which a small quantity (less than 500,000 tons of ore in 1913) is mined. In addition, however, to being the premier state in the production of coal, Pennsylvania leads also in the manufacture of cement, the burning of lime, and the production of mineral paints, sand, slate, and stone. It is second in the value of clay products and natural gas, and sixth in the production of petroleum.

Although not an iron-ore state, Pennsylvania is by far the leading producer of pig iron, which is obtained from the Lake Superior ores. The production in 1913 was 12,871,349 long tons, valued at \$197,726,314. If the value of the pig iron made in Pennsylvania were added to the value of the other products of the state, the total values for 1913 would have exceeded \$700,000,000, which is more than one-fourth of the value of the total mineral production of the United States.

The production of coal in Pennsylvania in 1912 amounted to 246,227,088 short tons, valued at \$346,993,123; in 1913 the value was \$388,220,933, an increase of \$41,227,810, or 12 per cent, over 1912.

Second in importance among Pennsylvania's mineral industries is the manufacture of Portland cement, closely followed by the clay-working industry. The production of cement in 1913 was 28,060,495 barrels, valued at \$24,268,800, against 27,625,340 barrels, valued at \$18,945,835, in 1912. The value of the clay products, exclusive of raw clay mined and sold, increased from \$21,537,221 in 1912 to \$24,231,482 in 1913. Although ranking second in the total value of its clay products, Pennsylvania is first in the production of brick and tile. A large part of the fire clay is mined in connection with coal min-

ing and becomes in reality a by-product of that industry.

Fourth in importance among Pennsylvania's mineral products is natural gas, in the production of which Pennsylvania was the leading state until 1910. In 1910 West Virginia attained first place in the production of this fuel, and she has continued to hold it, but Pennsylvania continues to rank first in its consumption, making up for the shortage in its own production by bringing in gas from West Virginia. The value of the natural gas produced in Pennsylvania increased from \$18,539,672 in 1912 to \$21,695,845 in 1913.

Up to 1894 Pennsylvania was the leading state in the production of petroleum, but in 1895 it was exceeded by Ohio, the production of Pennsylvania having begun to decline in 1891, while Ohio was approaching its maximum, which was attained in 1896. In more recent years West Virginia, Texas, California, Illinois, and Oklahoma have all risen rapidly and passed Pennsylvania in the production of petroleum. On account of the higher grade of Pennsylvania's oil, however, it still ranks fifth in value of production. The output of petroleum in Pennsylvania increased slightly in quantity, from 7,837,948 barrels in 1912 to 7,963,282 barrels in 1913, with an increase of over 50 per cent in value, from \$12,886,752 to \$19,805,452.

The number of manufacturing establishments in Pennsylvania having an annual output valued at \$500 or more at the beginning of 1915 was 27,521. The amount of capital invested was \$3,149,411,000, giving employment to 1,060,562 persons, using material valued at \$1,688,921,000, and turning out finished goods worth \$2,832,349,000. Salaries and wages paid amounted to \$672,563,000.

Pension Vetoes. (See Cleveland, Grover; Grant, Ulysses S.)

Pensions.—The word "pension" is derived from the word *pensio*, a payment, and refers to allowances of money paid in fixed amounts at certain intervals by a government to such persons as have rendered some valuable public service, or to the dependent relatives of such. In England pensions are granted to those "who by their useful discoveries in science and attainments in literature and the arts have merited the gracious consideration of their sovereign and the gratitude of their country." Aug. 26, 1776, the Continental Congress passed an act to provide by pension for the disabled soldiers of the Revolution. It was also resolved during the same year that all the officers who should continue in the service until the end of the war should receive half pay for seven years after peace had been established. A few years later the widows and orphans of those who had died were included in the provision of this act. In 1785 Congress recommended that the several states provide for invalid soldiers. By laws passed in 1789 and 1808 the United States assumed the pension obligations of the several states.

Officers and seamen of the Navy disabled

in service were placed on the pension lists by act of July 1, 1797, and by acts passed in 1799 and 1800 money accruing from prizes was made to constitute a fund for the payment of naval pensions. By an act passed April 24, 1816, the rate of pension for total disability was fixed at \$17 per month for first lieutenants, \$15 for second lieutenants, and \$8 for non-commissioned officers and privates. In 1818 an act was passed granting pensions to all who had served nine months or more in the Revolutionary Army and were in indigent circumstances. More claimants applied than could possibly have survived from Washington's army. The amount required to be paid the first year was eleven times what had been estimated, and the second year seventeen times the estimate. In 1868, when all the Revolutionary pensioners had died, there remained 888 widows of such soldiers. There remained on the pension rolls as late as 1908 two daughters of Revolutionary soldiers. Acts of July 14, 1862, and subsequent dates provided pensions for soldiers and sailors disabled in the Civil War and for the dependent relatives of those who had died. Under these acts expenditures for pensions reached \$34,443,855 in 1871, and then declined until, on Jan. 25, 1879, the arrears act was passed, allowing back pay on all claims theretofore allowed. In two years this act doubled the total annual sum paid for pensions. Meanwhile, in 1871, another act had pensioned all who had served a certain time in the War of 1812, and their widows if married before the treaty of Ghent. The last survivor of the War of 1812 who was on the pension rolls was Hiram Cronk, of Ava, N. Y., who died May 11, 1905, at the age of 105 years.

The act of June 27, 1890, pensioned all who served ninety days in the Civil War, and were honorably discharged, and who were incapacitated for manual labor, and the widows, children, and dependent parents of such.

The fiscal year ending June 30, 1910, began with 946,194 pensioners, and 29,219 having been added and 54,330 dropped, the year closed with 921,083 pensioners, a net reduction of 25,111 having taken place. \$159,974,056.08 was paid to pensioners during the year, which sum was smaller by \$2,000,000 than that disbursed for the same purpose the preceding year. The administrative cost for the year was \$2,657,673.86. Pension disbursements by the government now total \$4,191,419,304.49. Up to June 30, 1865, the Government had expended for pensions only \$96,445,444.23, but from July 1, 1865, to June 30, 1910, it paid out for pensions \$4,091,973,860.26.

The first section of the act of April 19, 1908, provides that from and after its passage "the rate of pension for widows, minor children under the age of sixteen years, and helpless minors as defined by existing laws, now on the roll or hereafter to be placed on the pension roll and entitled to receive a less rate than hereinafter provided shall be \$12 per month." The second section of the act grants pensions at the rate of \$12 per month to the widows of persons who served ninety days or more in the army or navy of the United States during the Civil War and were honorably discharged, without regard to their pecuniary condition, provided they were married prior to June 27, 1890. All pensions granted under the second section of this act commence on the date the applications are filed in the bureau of pensions. The conditions of title under this section of the act are identical with those imposed upon widows by the act of June 27, 1890, as amended by the act of

May 9, 1900, with the exception that the requirements as to dependence are eliminated. This act therefore supersedes the act of June 27, 1890, in so far as the claims of widows are concerned, and pensions are not now being granted to widows under the act of 1890 upon applications executed and filed on or after April 19, 1908.

There is no law granting service pensions to any person for service rendered since 1858, aside from the allowances made under the provisions of sections 4756 and 4757, Revised Statutes, for twenty years' and ten years' service, respectively, in the United States Navy or Marine Corps.

There were added to the rolls during the year ended June 30, 1911, the names of 26,200 new pensioners. The number of pensioners lost from the rolls during the year was 55,185, showing a decrease of 28,985 on the rolls, as compared with the close of the fiscal year 1910. There were 892,098 pensioners on the rolls June 30, 1911. The pension disbursements for the fiscal year ending June 30, 1914, were 172,417,546.

The dollar-a-day pension law of May 11, 1912, provides that any person who served ninety days or more in the military or naval service of the United States during the late Civil War, and who has been honorably discharged therefrom, and who has reached the age of sixty-two years or over, on making proof of such facts is entitled to receive a pension as follows: Age sixty-two years—For a service of ninety days, \$13.00 per month; six months, \$13.50; one year, \$14.00; one and one-half years, \$14.50; two years, \$15.00; two and one-half years, \$15.50; and three years and more, \$16.00. Age sixty-six years—For a service of ninety days, \$15.00 per month; six months, \$15.50; one year, \$16.00; one and one-half years, \$16.50; two years, \$17.00; two and one-half years, \$18.00, and three years and more, \$19.00. Age seventy years—For a service of ninety days, \$18.00 per month; six months, \$19.00; one year, \$20.00; one and one-half years, \$21.50; two years, \$23.00; two and one-half years, \$24.00, and three years and more, \$25.00. Age seventy-five years—For a service of ninety days, \$21.00 per month; six months, \$22.50; one year, \$24.00; one and one-half years, \$27.00, and two years and more, \$30.00. And such pension shall commence from the date of filing the application in the Bureau of Pensions. Any person who served sixty days or more in the war with Mexico, and who received an honorable discharge, is entitled to \$30.00 per month. Any person who was wounded in battle or in line of duty in the Civil War, and is now unfit for manual labor by reason thereof, or who from disease or other causes incurred in line of duty resulting in his disability, is now unable to perform manual labor, is entitled to \$30.00 per month.

The following are the rates for total disability from causes incident to the service:

Army.—Lieutenant-colonel and all officers of higher rank, \$30; major, surgeon, and paymaster, \$25; captain, provost marshal, and chaplain, \$20; first lieutenant, assistant surgeon, and deputy provost marshal, \$17; second lieutenant and enrolling officer, \$15; enlisted men, \$8.

Navy.—Captain and officers of higher rank, commander, lieutenant commanding and master commanding, surgeon, paymaster, and chief engineer, respectively ranking with commander by law, \$30; lieutenant, surgeon, paymaster, and chief engineer, respectively ranking with lieutenant by law, and passed assistant surgeon, \$25; master,

professor of mathematics, assistant surgeon, assistant paymaster and chaplain, \$20; first assistant engineer, ensign, and pilot, \$15; cadet midshipman, passed midshipman, midshipman, clerks of admirals, paymasters, or other officers commanding vessels, second and third assistant engineers, master's mate, and warrant officers, \$10; enlisted men, \$8.

Civil Service.—President Taft on several occasions advocated pensions for civil employees of the government, which should be provided by a fund jointly accumulated by the government and the employees. (See pages 7931, 8077 and 8134.) His argument was based on the grounds of justice to the employee and improvement of service. A bill was introduced to that effect, but failed of passage.

Marine Corps.—Lieutenant-colonel and officers of higher rank, \$30; major, \$25; captain, \$20; first lieutenant, \$17; second lieutenant, \$15; enlisted men, \$8.

The number of pensioners and the amounts paid each year from 1869 to the fiscal year ended June 30, 1913, as reported by the Commissioner of Pensions, follows:

Year	Number of Pensioners on the Rolls			Paid as Pensions
	Invalids	Widows, etc.	Total	
1869	82,859	105,104	187,963	\$28,513,247.27
1870	87,521	111,165	198,686	29,351,488.78
1871	93,394	114,101	207,495	28,518,792.62
1872	113,954	118,275	232,229	29,752,716.81
1873	119,500	118,911	238,411	26,982,063.89
1874	121,628	114,613	236,241	30,206,778.99
1875	122,989	111,832	234,821	29,270,404.76
1876	121,239	107,898	232,137	27,936,209.53
1877	128,723	103,381	232,104	28,182,821.72
1878	131,649	92,349	223,998	26,786,009.44
1879	138,615	104,140	242,755	33,664,428.92
1880	145,410	105,392	250,802	56,689,229.08
1881	164,110	104,720	268,830	50,583,405.35
1882	182,633	103,064	285,697	54,313,172.05
1883	206,042	97,616	303,658	60,487,732.81
1884	225,470	97,286	322,756	57,912,387.47
1885	247,146	97,979	345,125	65,171,937.12
1886	270,346	95,437	365,783	64,091,142.90
1887	306,298	99,709	406,007	73,752,997.08
1888	343,701	108,856	452,557	78,950,501.67
1889	373,699	116,026	489,725	88,842,720.58
1890	415,654	122,290	537,944	106,093,850.39
1891	536,821	139,339	676,160	117,312,690.50

The amounts that have been paid for pensions to soldiers, sailors, and marines, their widows, minor children, and dependent relatives on account of military and naval

Pensions

Messages and Papers of the Presidents

service in the several wars and in the regular service since the foundation of the government to June 30, 1915, are as follows:

War of the Revolution (estimate).....	\$ 70,000,000
War of 1812 (service pension).....	45,972,895
Indian wars (service pension).....	13,315,227
War with Mexico (service).....	49,618,948
Civil war.....	4,614,643,267
War with Spain and insurrection in the Philippine Islands.....	49,944,441
Regular establishment.....	35,472,408
Unclassified.....	16,508,447
Total.....	\$4,895,475,637

Pensions:

Act—

For relief of dependent parents and honorably discharged soldiers and sailors now disabled and dependent, vetoed, 5134.

To allow pension of \$37 per month to soldiers losing arm and leg, returned for amendment, 4382.

To provide for settlement of claims barred by limitations, opinions regarding, referred to, 115, 125.

Acts granting, vetoed. (See Cleveland, Grover; Grant, Ulysses S.)

Army officers not allowed, except in certain cases, 1005.

Civil retirement and contributory pension system, 7697.

Civil Service, for age and disability, approved, 7754.

Disability, pension act dismissed, 5552, 5762, 5883, 5977.

Discussed by President—

Adams, J. Q., 874, 927, 958.

Arthur, 4645.

Cleveland, 4945, 5108, 5382, 5883, 5977, 6168.

Grant, 3995, 4066, 4156, 4207, 4254, 4307.

Harrison, Benj., 5484, 5550, 5552, 5639, 5762.

Jackson, 1019.

Johnson, 3560, 3650, 3652, 3774, 3880.

Lincoln, 3253, 3452.

McKinley, 6345, 6388, 6452.

Madison, 482.

Monroe, 588.

Roosevelt, 6803.

Taft, 7697, 7754.

Tyler, 1902.

Expenditures for. (See Discussed, *ante*.)

Foreign pensioners, provision for payment of expenses of obtaining evidence regarding, recommended, 4668.

Frauds discussed. (See Pension Laws.)

Laws in regard to. (See Pension Laws.)

Names and ages of pensioners should be taken with census, 1744.

Naval pensioners and pension fund referred to, 1810, 1837, 4408, 6283.

Transfer of payment of, to Navy Department recommended, 4060.

Pension obtained by fraud. (See Pension Laws.)

Payments to invalids, order regarding, 6308.

Pensioners entering Confederate army should be stricken from rolls, 3253.

Pensioners in Southern States, recommendations regarding restoration of certain, 4254.

Report regarding, transmitted, 3061, 4408.

Revolutionary War—

Amount paid pensioners of, referred to, 602, 927.

Compensation to agents in paying, referred to, 2354.

Sums paid to, and residences of pensioners referred to, 602.

Pensions, Bureau of.—Up to 1833 the disbursement of pensions had been under the supervision of the Secretary of War and the Secretary of the Navy. In that year Congress established the Pension Bureau and placed J. L. Edwards in charge. He immediately assumed the business theretofore under the War Department, and in 1840 the pension affairs of the Navy Department were transferred to this Bureau. In 1849, when the Department of the Interior was created, the Pension Bureau was placed under its jurisdiction. The chief officer of this Bureau is called the Commissioner of Pensions.

Pensions, Bureau of:

Expenditures of. (See Pensions discussed.)

Good work of, 6803.

Increase in clerical force of, 5552.

Recommended, 4673.

Transfer of, from Interior Department to War Department recommended, 4060.

Pensions, Commissioner of, provision for continuance of, recommended, 1789.

Peoples Party. (See Populist or Peoples Party.)

Peoria Indians. (See Indian Tribes.)

Pequot, or Pequod Indians. (See Indian Tribes.)

“Perdicaris Alive or Raizuli Dead.”—

In 1904, Ion H. Perdicaris, an American citizen, was held for ransom by Raizuli, a bandit in Morocco. After mild negotiations had failed to obtain the release of Perdicaris, John Hay, then Secretary of State, by direction of President Roosevelt sent to Mr. Gummere, the American Consul at Tangier, the famous ultimatum cablegram: “We want Perdicaris alive or Raizuli dead.” The result was the immediate release of Perdicaris.

Perjury.—In law the willful giving, under oath lawfully administered in a judicial proceeding, of false testimony in regard

to a matter or thing material to the issue or point of inquiry. The early Romans threw perjurers from the Tarpeian Rock. The Greeks branded them with a mark of infamy. After the Empire became Christianized any person who swore falsely upon the Gospels was sentenced to have his tongue cut out. The canons of the early church imposed eleven years' penance. In some countries the perjurer was liable to any punishment to which his false testimony had exposed an innocent person. In England perjury was punished by fine, the pillory, and imprisonment. It is now in both England and America a statutory offense, punishable by fine or imprisonment, or both.

Permanent Taxation. (See Revenue, Public; Taxation.)

Pernicious Activity.—A phrase contained in an Executive order of President Cleveland. It occurred in the following sentence: "Individual interest and activity in political affairs are by no means condemned. Officeholders are neither disfranchised nor forbidden the exercise of political privileges, but their privileges are not enlarged nor is their duty to party increased to pernicious activity by officeholding." (5079.) (See Obtrusive Partisanship.)

Perpetual Emigrating Fund Co., suit instituted by Government for termination of, discussed, 5379.

Perry's Victory Exposition.—The one hundredth anniversary of the victory of Commodore Oliver Hazard Perry over the British fleet under command of Captain Barclay in the battle of Lake Erie, Sept. 10, 1813, was celebrated by an historical and educational exposition at Put-in-Bay Island during the summer of 1913 and a dedication of a national memorial to Commodore Perry and the American seamen who perished in that conflict, the remains of many of whom have reposed in unmarked graves on Put-in-Bay Island for nearly a hundred years. The memorial cost more than a million dollars. Congress has appropriated \$250,000.

The State of Ohio took the initiative in the project by necessary legislation providing for the appointment of commissioners to carry forward such plans as they deemed advisable, and since that time Pennsylvania, Michigan, Illinois, Wisconsin and other states, nine in all, by legislation and the appointment of commissioners, joined in the enterprise.

The officers of the Ohio Commission were: President, William H. Reinhart, Sandusky; Vice-President, George H. Worthingham, Cleveland; Secretary, Webster T. Huntington, Columbus; Treasurer, S. M. Johansson, Put-in-Bay. Among the other members of the commission were Lieut.-Gen. Nelson A. Miles, Rear-Admiral Charles E. Clark, Col. Henry Watterson, Myron T. Herriek and Richmond P. Hobson.

The exposition opened July 4, 1913, and closed Sept. 10. Its historical and educational interests were under the direction of the historical societies and the universities and colleges of the states participating. The only industrial feature related to an exhibit for the promotion of the shipping interests of the great lakes. In conjunction with the permanent memorial to Commodore Perry the exposition commemorated the one hundredth anniversary of Gen. William Henry Harrison's northwestern campaign.

Perryville (Ky.), Battle of.—Oct. 1, 1862, the Confederate forces under Bragg and Kirby Smith having united at Frankfort, Ky., Bragg issued a proclamation calling the people of Kentucky to his assistance. He inaugurated a provisional government at Frankfort, with Richard Hawes as governor. Buell's army, divided into three corps, under McCook, Gilbert, and Crittenden, advanced against the Confederates by way of Louisville. Oct. 8, McCook's corps was attacked near Perryville, and after a fight lasting all day Bragg's army was repulsed. The engagement, while not general all day, was severe. During the night the Confederates retired, and later retreated to Cumberland Gap, leaving 1,200 wounded and sick behind. The Federal losses were 916 killed (including Generals Jackson and Terrell), 2,943 wounded, and 489 missing, a total of 4,348. The Confederates lost 510 killed, 2,635 wounded and 251 missing—a total of 3,396.

Persia.—Persia is a kingdom in the west of the continent of Asia, and is bounded on the north by Russian Transcaucasia, the Caspian Sea, and Russian Transcaspia, on the east by Afghanistan and British Baluchistan; on the south by the Arabian Sea and the Persian Gulf; and on the west by Asiatic Turkey. The territory thus defined lies, approximately, between 44°-63° E. longitude, and between 25°-39° 45' N. latitude, an area of 630,000 square miles. It is called Iran by the natives, and is referred to in the Bible as Elam.

Physical Features.—The kingdom occupies the western and greater portion of the Iranian Plateau (which extends between the valleys of the Indus and the Tigris), and consists of a series of plateaus. The coast of the Caspian is low lying and forest clad; the shores of the Persian Gulf and Arabian Sea are low and sandy, but elsewhere the country between the mountain ranges is elevated. In the southeast are two volcanoes, Kuh i Basman (dormant), about 12,000 feet in height, and Kuh i Nushadar (active), a triple-peaked cone of 12,681 feet. The Kizil Uzun, the Herhaz, the Gurgan and the Atrek rivers flow into the Caspian Sea. Many rivers into the Persian Gulf and Arabian Sea. The salt swamps of the depressions of the interior are watered by many streams, which soon lose themselves in the saline swamps or dry salt area. There are many lakes, the largest being Lake Urmia, about 4,000 feet above sea level, its area being close on 1,000 square miles and its waters so salt that fish cannot live therein.

History.—The country now known as Persia formed part, at various times, of a much greater kingdom, and under Cyrus (560-528 B.C.) was included in a mighty empire extending from Asia Minor and Syria to the Indies. Attempts at a westward extension under Darius (521-485 B.C.) and Xerxes (485-465 B.C.) were checked by the victories of the Greeks at the battles of Marathon (490), Thermopylae (480), Salamis (480) and Plataea (479 B.C.). Under a later dynasty (226-651 A.D.), known as the Sassanians (Assassins or Isma'ilites), the Persian empire was extended once again, to be consolidated by Chosroes (or Khosra), over an area from the Red Sea to the Indus, and from Arabia into the heart of Central Asia. From the eighth to the tenth centuries A.D. Persia fell under Moslem rule, and with a short interval of independence was afterwards overrun by the Mongols from the north-east, forming part of the territories of Jenghiz Khan at his death in 1272. A further period of independence was inter-

raptured by the conquest of Persia by Timur (Tamburlane the Great), from whose death (1405) to the present time the kingdom has been independent, under the rule of a Shah, the reign of Nadir Shah (1736-1747) being the most brilliant in the annals of modern Persia. After the death of Nadir, Afghanistan asserted its independence, and the nineteenth century witnessed the gradual decay of the kingdom. The rule of the Shah was absolute and despotic from the earliest times, but many internal dissensions, culminating in the revolution of 1905-1906, have marked the later years of Persian history and have further weakened the powers of resistance to external forces. Owing to increasing popular discontent with a corrupt and incompetent administration and an extravagant Court, a nationalist movement began in December, 1905. Owing to the vacillation of the Shah and the anarchical state of affairs, England and Russia made strong representations in favor of the restoration of a constitutional régime. A Russian force eventually crossed the frontier, while the revolutionary bands concentrated on Teheran, which was occupied without much fighting on July 13, 1909. The Shah was deposed by the National Council, and his son, aged eleven years, appointed to succeed him. It declared its intention of strengthening the army, punishing disorders, reforming the police and law courts, improving education and provincial administration, and employing foreign advisers in certain offices. In October, 1910, England demanded the restoration within three months of security on the southern trade routes, failing which she would take over the policing of the Bushire-Isfahan route. In 1911 the ex-Shah invaded Persia from Russian territory, but after he was defeated and driven out, his followers continued the struggle. Russia and England despatched further troops; and while the Russian troops remain in the country, the British troops were withdrawn, as Great Britain preferred to give the Persian Government time to restore order themselves, and, with that view, strongly support the gendarmerie being formed under Swedish officers.

Government.—In August, 1906, the Shah, admitting the need for reforms, granted a Constitution. The first elections for the Mejliss (National Council or Consultative Assembly) were held in October, 1906. A Cabinet of eight responsible Ministers was formed in September, 1907. In October, 1907, the Shah signed a new Constitution limiting the sovereign prerogatives and ecclesiastical authority, and granting liberty of conscience, of the person, of education, of the press, of association, and of speech. But he broke his pledges and violently dissolved the Mejliss. A fresh nationalist movement sprang up, Tabriz being the centre of revolt. Ruler: Sultan Ahmed Mirza, Shah in Shah (King of Kings); born at Tabriz, Jan. 20, 1898; succeeded to the throne July 17, 1909. Regent: Aboul Kasim Khan, Nazer-ul-Mulk; appointed Sept. 25, 1910. The young King was crowned at Teheran July 21, 1914. The Executive government is entrusted to a cabinet of seven ministers.

Under the constitution outlined in the rescript of Shah Muhammad Ali (who abdicated on July 16, 1909, and was succeeded by his son, the present ruler), issued on August 5, 1906, a legislature (mejliss) was to be inaugurated, consisting of an upper house, or Senate, of sixty members (thirty appointed and thirty elected), and of a National Council of 156 members elected for two years and meeting annually on October 8.

The administration of justice is entrusted to co-ordinate authorities, offences under the written or religious law being dealt with by the Sheikhs-ul-Islam and subordinate priests, and those against customary law by the governors, lieutenant-governors and their subordinates.

By the Anglo-Russian Convention of Aug. 31, 1907, Great Britain and Russia mutually engaged to respect the integrity and independence of Persia, while marking out certain regions in southeastern and northern Persia, in which each had, for geographical and economic reasons, special interests. Russia engaged not to seek political or commercial concessions (for railways, mines, etc.) beyond a line running from the Afghan frontier via Gazik, Birjand and Kermah, to Bunder Abbas, while Great Britain made a like engagement as regards a line running from Kasr-i-Shirin via Isfahan, Yazd and Kakhk, to the point of intersection of the Russian and Afghan frontiers. In the so-called Neutral Zone either of the contracting parties is at liberty to obtain concessions. This includes the provinces of Arabistan and Fars, an area of 200,000 square miles, containing a million and a half of population. The Russian sphere covers 300,000 square miles, and includes the provinces of Ardahan, Astrabad, Azerbaijan, Gilan, Hamadan, Irak Ajuni, Isfahan, Karmanshah, Kasvin, Khamseh, Khorasan, Luristan, Mazandaran, Teheran and Yazd. Karman is solely British and Kuhistan is jointly British and Russian.

The debt consists of Russian and British loans to the amount of some \$36,000,000. The capital is Teheran.

Persia:

Diplomatic relations with, 2977, 4678, 4718, 4761, 5088.

Diplomatic representation of, in United States, 5368.

Minister of United States to, recommended, 2977.

Legation established, 5088.

Protection of American citizens in, referred to, 4678.

Resources of, developed by American citizens, discussed, 5471.

Treaty with, 2682, 2956.

Referred to, 2977.

Persia, Treaties with.—A treaty of friendship and commerce was concluded in 1856. Provision is made for the reception and protection of ambassadors and diplomatic agents on terms of the most favored nation; freedom of travel is secured to all citizens, and of trade in conformity with the laws of the country in which such is carried on. Such privileges as may at any time be conferred upon other powers are to be enjoyed by citizens and subjects of the two contracting powers. No exceptional or discriminating tax upon import or export is to be charged. Suits and disputes are to be tried before the proper Persian officer in the presence of the consul or of his agent or representative at the place of consular residence. Disputes between citizens of the United States are to be settled by and before the consul.

Disputes between citizens of the United States and subjects of other powers in Persia are to be settled by their consuls. The goods and effects of a citizen or subject dying in the country of the other shall be delivered to his heirs or successors; when such are not represented, the effects shall be delivered to the consul for disposi-

tion. Each country shall appoint a diplomatic agent to reside at the seat of government of the other, and three consuls, those of the United States to reside at Teheran, Bender Bushhr, and Tauris; those of Persia at Washington, New York, and New Orleans. No greater number of domestic agents may be retained by the diplomatic agent in Persia than are allowed to Russia by treaty.

Personal-Liberty Laws.—A name given to laws passed by some of the northern states for the purpose of impeding the operations of "fugitive-slave laws." In 1840 and the years immediately prior and subsequent thereto most of the northern states enacted statutes for the protection of negroes within their borders. Indiana and Connecticut had previously provided that fugitive slaves might have trial by jury. After the Prigg decision many of the states forbade the use of their jails for the detention of fugitives. The bitter opposition in the north to the fugitive-slave law of 1850 induced many of the state legislatures to enact personal-liberty laws. Besides prohibiting the use of state jails, these laws forbade state judges and officers to assist claimants or issue writs. Trial was to be given all alleged fugitives. Such acts were passed by Vermont, Connecticut, Rhode Island, Massachusetts, Maine, Michigan, Wisconsin, Kansas, Ohio, and Pennsylvania, and heavy penalties were provided for their violation. New Jersey and California alone of the northern states sanctioned the return of fugitives. It was claimed by the people of the South that these laws were in violation of Article IV., section 2, of the Constitution, which reads as follows: "No person held to service or labor in one state, under the laws thereof, escaping into another, shall, in consequence of any law or regulation therein, be discharged from such service or labor, but shall be delivered up on claim of the party to whom such service or labor may be due."

Perthshire, The, appropriation to owners for detention of, recommended, 3247.

Peru.—Peru is a maritime country on the northwest of the South American Continent, between 1° 31'-17° 47' S. latitude (the territory between 17° 47'-19° 13' being the department of Tacna, occupied by Chile), with a coast-line on the Pacific of about 1,200 miles. It is bounded on the north by Ecuador and Colombia, on the east by Bolivia and Brazil, and on the south by Chile.

Physical Features.—The country is traversed throughout its length by the Andes, running parallel to the Pacific coast, the highest points being Huascaran (22,050 feet), Huandoy (21,100 feet), Arequipa (or Misti) volcano (20,013 feet), Hualean (20,000 feet), and Lirima, Tocator, and Sarasara, all over 19,000 feet. There are four distinct regions, the costa, west of the Andes, a low arid desert except where watered by transverse mountain streams, but capable of irrigation; the sierra or western slopes of the Andes, the punas or mountainous wastes below the region of perpetual snow, and the inward slopes and boundless forests of the Amazonian basin.

History.—Peru was conquered in the sixteenth century by Francisco Pizarro, who subjugated the Incas (a tribe of the Quichua Indians), who had invaded the country some 500 years earlier, and for nearly three centuries Peru remained under the Spanish rule. A revolutionary

war of 1821-1824 established its independence, declared on July 28, 1821.

AREA AND POPULATION

Departments	Area in English Sq. Miles	Estimated Population 1906
Amazonas.....	13,911	53,000
Ancachs.....	16,659	317,000
Apurimac.....	8,186	133,000
Arequipa.....	21,947	172,000
Ayacucho.....	18,188	227,000
Cajamarca.....	12,545	333,000
Callao.....	14	34,000
Cuzco.....	131,305	313,000
Huancavelica.....	9,264	168,000
Huanuco.....	13,896	109,000
Ica.....	8,685	68,000
Junin.....	23,314	306,000
Lambayeque.....	4,593	93,000
Liberdad.....	10,190	188,000
Lima.....	13,278	250,000
Loreto.....	254,507	120,000
Madre de Dios.....	24,615	16,000
Moquegua.....	5,714	32,000
Piura.....	14,822	151,000
Puno.....	41,900	403,000
San Martin.....	31,243	33,000
Tacna.....	12,590	39,961
Tumbes.....	1,930	8,000
Total.....	692,616	3,569,961

If the total may be assumed at 3,500,000 the races may be approximately stated at: Whites, 480,000; Indians (Quichua and Aymara tribes and "wild" Indians of the forests of the eastern interior), 2,000,000; Half-castes (Cholos or Spanish Indian and Zambos or Spanish Negro), 875,000; Negroes, 87,500; and Asiatics (mainly Chinese), 60,000.

Government.—The constitution rests upon the fundamental law of Oct. 18, 1856 (amended Nov. 25, 1860), and is that of a democratic Republic. The President and two Vice-Presidents are elected for four years by direct vote of the people, and are ineligible for a succeeding term of office. President (1912-1916): Señor Guillermo Billinghurst, installed Sept. 25, 1912, for four years.

Congress consists of a Senate and Chamber of Deputies, and meets annually on Independence Day (July 28) for ninety days. The Senate is composed of fifty-two members, the Chamber of 116 members, in each case elected by the direct vote of all male citizens aged twenty-one who can read and write or possess a small property or tax-paying qualification.

There is a Supreme Court at Lima, the members of which are appointed by Congress, and Superior Courts at Arequipa, Ayacucho, Cajamarca, Cuzco, Huaraz, Piura, Puno, and Truxillo.

The twenty Departments and three Provinces are subdivided into Provinces (410 in all), which again are parcelled out into 850 districts. At the head of the Department is a Prefect, with a sub-Prefect over each Province.

Army.—By a law of Dec. 27, 1898, service in the Army is compulsory for all citizens. (For the Army, see *Armies of the World*.)

Navy.—The Peruvian Navy consists of 2 modern protected cruisers (Almirante Grau and Coronel Bolognesi), one modernized cruiser (Lima), and two submarines; with certain miscellaneous craft, school ships, sailing vessels, etc.

Production and Industry.—The eastern provinces are of vast extent and fertility with a tropical climate, while the valleys running from the Andes to the coast are very fertile and are capable of development by irrigation. The staple agricultural

product is sugar, while cotton is grown in large and increasing quantities. The medicinal products of the eastern provinces are valuable, and include cinchona (Peruvian bark), sarsaparilla, copaiba, cocaine, etc. India rubber is a product of the Amazonian basin, and coffee and cocoa are increasingly grown, while the sugar plantations are mainly in the costa west of the Andes. The Live Stock includes herds of guanaco, llama, and alpaca, the wool being a valuable item of the export trade. Guano is brought from the Lobos and other islands on the Pacific coast.

The mountains are rich in minerals, among which silver, quicksilver, copper and coal (of inferior quality) are conspicuous; while in the department of Tumbes, in the northwest, there are important beds of petroleum. Gold is found in many districts, but especially in the province of Carabaya, where mining on an important scale is carried on. An American syndicate has bought four-fifths of the whole mineral zone of Cerro de Pasco and many others in neighboring mining districts, and has constructed a railway from Oroya to Cerro de Pasco.

There is a lack of industrial development, but many openings exist for capital so soon as the rich land on the inward slopes of the Andes is taken up by suitable colonists.

The principal imports are coal, cotton, woollen, linen, and silk goods, drugs, earthen and stone wares, machinery, explosives, metals and manufactures thereof, oils, stationery, paper manufactures, timber, and wheat. The chief exports are sugar, copper and other ores, guano, gold, silver, cotton, llama and alpaca wool, rubber, and cocaine.

Finance.—The average revenue for four recent years was 3,164,954 libras, and the expenditures for the same time average 3,201,372 libras. The libra, the unit of value, is equivalent to the English pound or \$4.8665 of United States money.

During September, 1916, the Congress of Peru had under consideration the proposed budget for the fiscal year 1917. The proposed appropriations for the various branches of the government were as follows, the amounts being in Peruvian libra, which are now quoted at par, \$4.8665: Ministry of Fomento, £198,736; Foreign Relations, £58,667; Government, £553,749; Justice, £554,565; Legislative, £108,322; Treasury, £1,296,589; War and Marine, £641,609; total expenditures, £3,412,237.

The estimated revenues are based on the actual receipts during the first half of the present fiscal year, with the exception of revenues provided for in recent laws, such as the taxes on inheritances and mineral export duties. No revenue is estimated from the opium monopoly this year, as it is the desire of the executive to prohibit the sale of this drug except for medicinal purposes. The estimated revenues were as follows: Maritime customs duties, £852,680; mineral duties, £66,000; export duties on agricultural and mineral products, £296,890; taxes, £812,587; monopolies, £774,500; postoffice, £105,100; telegraph, £32,000; wireless, £1,500; impost on circular checks, £23,000; education funds, £161,500; various revenues, £286,480; total revenues, £3,112,237.

Cities.—Capital, Lima, on the mountain stream Rimac, with a magnificent cathedral founded by Pizarro in 1510. Population (1908) 143,500. Other towns are Callao (34,346), Arequipa (40,000), Cuzco, the ancient capital of the Incas, Ayacucho and Iquitos.

Peru, Treaties with.—A convention declaring the rights of neutrals at sea was concluded in 1856. Both parties recognize the principle that free ships make free goods and that the property of neutrals on an enemy's vessel is not subject to detention or confiscation unless contraband of war. The rights resulting from a formal recognition of these principles shall be conferred upon all other countries who desire to accede. Arbitration and naturalization conventions are also in force. (For extradition terms of 1899, see *Extradition Treaties*.)

Peru also became a party to the convention between the United States and the several republics of South and Central America for the arbitration of pecuniary claims and the protection of inventions, etc., which was signed in Buenos Aires in 1910 and proclaimed in Washington July 29, 1914. Petersburg, Va., explosion of mine in front of, referred to, 3471.

Petersburg (Va.), Siege of.—When Grant crossed the Rapidan, May 4, 1864, with the Army of the Potomac to operate against Lee, he ordered Ben. Butler, with the Army of the James, to proceed up the James River toward Richmond. Butler's army consisted of the Tenth and Eighteenth army corps, under Generals Gillmore and W. F. Smith, and numbered 38,648 officers and men and ninety guns. May 5, he occupied City Point and Bermuda Hundred, eighteen miles south-east of Richmond. On the evening of May 13 and the morning of the 14th he carried a portion of the first line of defenses of Richmond at Fort Darling, on Drury's Bluff. On the 16th Butler was attacked and driven back to Bermuda Hundred. June 10 he sent a force under Gillmore and Kautz against Petersburg. The cavalry entered the town, but were driven back, and the expedition returned to Bermuda Hundred. June 15, after a march of fifty-five miles from Cold Harbor in two days, Grant was ready to cross the James. The army of 130,000 men crossed by pontoon bridge in three days. The two armies were now united and pre-

pared for final operations against Richmond. The first step toward taking Richmond seemed to be the occupation of Petersburg, twenty-two miles to the south, on the Richmond and Petersburg Railroad. June 16, 1864, after the junction of the Army of the James and the Army of the Potomac, an attack was made on Petersburg by W. F. Smith's corps. The assaults were continued for four days. Reinforcements were sent from Richmond to defend the place, and the attempts cost Grant 7,881 men.

During parts of June and July a powder mine was dug beneath portions of the Petersburg intrenchments. It was intended to explode this and make an assault through the breach thus made. The mine, known as "the Crater," was charged with 8,000 pounds of powder, and at 4 o'clock A. M., July 30, 1864, was exploded. A Confederate battery and most of a regiment were blown up. The assault, which was made by 50,000 men under Burdette, Warren, and Ord, was a total failure, and 4,000 men were lost in it. Gen. Mahone commanded the Confederate force that recovered the line broken by the explosion. During this siege a number of brilliant sorties were made. The losses in Lee's army are not fully reported. Elliott's brigade lost 677 men. Petersburg was not surrendered until April 3, 1865, nearly a year afterward.

Petition.—The Constitution prohibits Congress from making any law to abridge "the right of the people peaceably to assemble and to petition the Government for a redress of grievances." Feb. 11, 1790, a petition signed by Benjamin Franklin was offered to Congress, praying for the abolition of slavery, but no notice was taken of it. Between 1830 and 1844 numerous petitions from Abolitionists poured into Congress. May 26, 1836, the House resolved, by a vote of 117 to 68, that "all petitions, memorials, resolutions, propositions, or papers relating in any way to the subject of slavery or the abolition of slavery shall, without being printed or referred, be laid on the table, and that no further action be taken thereon." This was the first of the famous "gag rules" of Congress. John Quincy Adams championed the cause of the Abolitionists and opposed the gag rules for ten years, finally securing their repeal. In 1837 he presented a petition to Congress purporting to come from slaves. This was the first of the kind ever offered, though in 1800 Congress was thrown into an uproar of debate by a petition from freed negroes.

In his annual message to Congress, Dec. 2, 1835, President Jackson asserted that publications addressed to the passions of slaves and stimulating them to insurrection were being circulated through the mails, and suggested laws to prohibit, under severe penalties, such circulation (1394). One of the most noted laws under this recommendation was the Atherton gag, introduced by K. G. Atherton, of New Hampshire. It was rescinded in 1845. The rules of Congress now provide that petitions, when presented, shall be indorsed with the name of the member presenting them and the committee to which they were referred. They are entered by the Clerk on the Journal and then transmitted to the proper committee.

Pettaquamscut Purchasers.—In 1660 John Hull, who had become well known through his coinage of pine-tree money

Pettaquamscut Messages and Papers of the Presidents

(q. v.), organized a company and purchased a tract of land from the Narragansett Indians, about Pettaquamscut Rock, on the south shore of Rhode Island, between Point Judith and Wickford. About the same time lands near Wickford had been purchased by a company headed by Humphrey Atherton, of Massachusetts, the two companies claiming the same territory. When the boundary line between Connecticut and Rhode Island was settled, in 1662, the Atherton Company had its region placed under the government of Connecticut. In 1665 the royal commission ordered the Indians to return the price paid by the Atherton Company, and that the lands be returned to them. The disputed territory became the King's province. It was later made part of Rhode Island and was known as King's County until the Revolution, when the name was changed to Washington County. It was a subject of contention between Connecticut and Rhode Island for fifty years.

Pewter Muggers.—A faction of the Democratic party in New York City which in 1828 bolted the Tammany candidates. These dissatisfied Democrats held their meetings over a resort in Frankfort Street, New York, locally famous for its refreshments served in pewter mugs; hence the name.

Philadelphia, The:

Attacked by vessel of Morocco, 352.
Disavowal of, by Emperor of Morocco, 353.

Wrecked on coast of Tripoli, 356, 362.
Claims of officers and crew arising out of, 1025.

Philadelphia (Pa.), Occupation of.—The defeat of Washington's army at Brandywine Creek and the disaster to Wayne's forces at Paoli rendered Howe's occupation of Philadelphia merely a successful maneuver. Sept. 25, 1777, he entered Germantown, and the next day sent Cornwallis to occupy Philadelphia. The occupation was effected without a battle.

Philippine Commission, mentioned, 6692, 6861.

Philippines.—The Philippine group, lying off the southern coast of Asia, extending almost due north and south from Formosa to Borneo and the Moluccas, between longitude $116^{\circ} 40'$ - $126^{\circ} 34'$ and latitude $4^{\circ} 40'$ - $21^{\circ} 10'$, approximately numbers about 3,141 islands and islets, of which 1,668 are listed by name, while 1,473 are, so far as known, without names. The actual land area is about 115,026 square miles. The six New England States, New York, and New Jersey have about an equal area. The island of Luzon, on which the capital city (Manila) is situated, is the largest, most populous, and wealthiest member of the group, being about the size of the State of New York. Mindanao is nearly as large, but its population is very much smaller. There are two islands with areas exceeding 10,000 square miles each, namely, Luzon with 40,969, and Mindanao with 36,292. There are nine islands each of which has an area of more than 1,000 square miles and less than 10,000. There are twenty between 100 and 1,000 square miles, seventy-three between 10 and 100 square miles, and two hundred and sixty-two between 1 and 10 square miles. The remaining number, 2,775, or seven-eighths of all, have areas less than a square mile each.

The area of the larger islands with population ascertained by the latest United States census follows:

Island	Area	Population 1903
Luzon.....	40,969	3,798,507
Mindanao.....	36,292	499,631
Samar.....	5,031	222,690
Panay.....	1,611	713,646
Mindoro.....	3,851
Leyte.....	2,722	357,641
Negros.....	4,881	460,776
Cebu.....	1,762	562,247
Bohol.....	1,441	213,118

The capital of the Archipelago is Manila, with 231,469 inhabitants. Other towns are: In Luzon, Baguio (39,094), Lipa (37,931), Laoag (31,154), Batangas (33,131), San Carlos (27,166), Tulaoco (21,946); in Samar, Calbayog (15,895); in Panay, Ja-

ninay (20,738), Miagao (20,656), Iloilo (19,054); in Cebu, Argao (35,438), Cebu (31,079), Butil (31,617), Carcar (31,895), Sibonga (25,848); in Leyte, Baybay (22,990), Ormoc (16,128).

A census of the Philippines was taken in 1903 under the auspices of the Census Office. The population returned was 7,635,426. Of this number about seven millions are more or less civilized. The wild tribes form about 9 per cent. of the entire population. Racially the inhabitants are principally Malays. The civilized tribes are practically all adherents of the Catholic Church, the religion being that introduced into the country by the Spaniards when they took possession of the islands in 1565. The Church has since then been a strong ruling power and the priesthood is numerous. The Moros are Mohammedans.

The density of population in the Philippines is 67 per square mile. In Continental United States it is 26 per square mile. Foreigners number about 50,000, of whom nearly three-fourths are Chinese. Exclusive of the army there are 8,135 Americans in the islands, nearly one-half being located in the city of Manila. There are about twenty-five different tribes in the islands, speaking fifteen or sixteen distinct dialects, the largest tribe being the Visayans, who form nearly one-fourth of the entire civilized population (3,219,030). The Tagalogs, occupying the provinces in the vicinity of Manila (1,460,695), rank second in number and the Ilocanos (803,942) the third.

Education has been practically reorganized by the Americans. The total annual enrolment is 440,050. Seven thousand six hundred and seventy-one teachers are employed, of whom 658 are Americans and 7,013 Filipinos. English is very generally taught, and the next generation of Filipinos will probably speak that tongue. Pauperism is almost unknown in the islands. In 1902 there were only 1,668 paupers maintained at public charge. Vital statistics are as yet restricted to Manila. The death rate in the city of Manila is 24.20 per thousand. The birth rate is 36.51 per thousand.

In 1912 there were 70 newspapers and periodicals published in the islands, 19 being in English, 16 in Spanish, 15 in native dialects, 7 in Spanish and English, 11 in Spanish and native dialects and 2 in Spanish, English, and native dialects. The assessed real estate property value in 1912 was 484,037,327.10 pesos. The reported value of church buildings, mostly Catholic, is 41,698,710 pesos.

The climate is one of the best in the tropics. The thermometer during July and August rarely goes below 79° or above 85°. The extreme ranges in a year are said to be 61° and 97°, and the annual mean 81°.

Although agriculture is the chief occupation of the Filipinos, yet only one-ninth of the surface is under cultivation. The soil is very fertile, and even after deducting the mountainous areas it is probable that the area of cultivation can be very largely extended and that the islands can support population equal to that of Japan (42,000,000).

The chief products are hemp, rice, corn, sugar, tobacco, coconuts, and cacao, hemp being the most important commercial product and constituting 43 per cent. of the value of all exports. Coffee and cotton were formerly produced in large quantities—the former for export and the latter for home consumption; but the coffee plant has been almost exterminated by insects and the home-made cotton cloths have been

driven out by the competition of those imported from England. The rice and corn are principally produced in Luzon and Mindoro and are consumed in the islands. The cacao is raised in the southern islands, the best quality of it at Mindanao. The sugar cane is raised in the Visayas. The hemp is produced in Southern Luzon, Mindoro, the Visayas, and Mindanao. It is nearly all exported in bales. Tobacco is raised in many of the islands, especially Luzon and Negros.

In the year ending June 30, 1913, the exports of domestic merchandise from the United States to the Philippines were \$25,360,646, and the total imports from the Philippines for the same period were \$21,010,248.

The imports of merchandise from foreign countries, year ending June 30, 1913, were \$30,948,498, and the exports were \$33,834,438. The principal foreign countries trading with the Philippines are Great Britain, French East Indies, China, and Spain.

On July 1, 1902, Congress passed (chapter 1369) "An act temporarily to provide for the administration of the affairs of civil government in the Philippine Islands." Under this act complete civil government was established in the Archipelago, except that portion inhabited by Moros, comprising part of Mindanao and the Sulu Islands, and the office of Military Governor was terminated. Wm. H. Taft was appointed Civil Governor by the President, the title being subsequently changed to that of Governor-General. Governor Taft was succeeded by Luke E. Wright in December, 1903, by Henry Clay Ide in 1905, James F. Smith in 1906, W. Cameron Forbes in 1909, and Francis Burton Harrison in 1913. The government was composed of a Civil Governor and seven commissioners, of whom four were Americans and three Filipinos. By act of Congress, approved May 11, 1908, the commission was increased by one member, to be appointed by the President, making the commission nine members in all, including the Governor-General, who is President of the Philippine Commission. There are four executive departments—Interior, Finance and Justice, Commercial and Police, and Public Instruction. There are thirty-eight provinces, each with a Governor, a Treasurer, and prosecuting attorney (provincial fiscal). Local governments have been established in about 75 towns. The officials consist of a President, Vice-President, and Councilmen (the latter varying in number according to the population) and are elected by the qualified voters of the municipality and serve for four years. The Judiciary consists of a Supreme Court, with seven Judges; Courts of First Instance, Justice of the Peace Courts, and a Court of Land Registration. There are seventeen Judicial Districts. In each province there is a Court of First Instance and a Court of the Justice of the Peace in each organized municipality in every province where there is a Court of First Instance. Two resident commissioners are elected to represent the islands in the House of Representatives at Washington. The Presidential appointees are members of the Commission.

In March, 1907, the President, in accordance with the act of Congress, directed the Commission to call a general election of delegates to a Philippine Assembly. The new Assembly was chosen July 30, and was opened October 16 by Secretary of War Taft. The total vote recorded at the election for delegates was 104,000, which is only 1.4 per cent of the population. The second election was held on November 2,

1909. The number of persons registered was 208,845 and the number of votes cast 192,975, which is 2.81 per cent of the population. The third election was held on June 4, 1912. Incomplete returns showed 248,154 registered voters and 235,786 votes cast. By act of February 15, 1911, the members of the Philippine Assembly are elected for four years from the 16th day of October following their election, and the resident commissioners for four years, their term of office beginning on March 4 following their election. The next election will take place about June 1, 1916.

At the first session of the Sixty-first Congress an act was passed and approved August 5, 1909, readjusting the custom duties on imports from all countries, including the United States, on the basis generally of reductions. By act of Congress approved March 23, 1912, the act of July 1, 1902, to provide for the administration of the affairs of civil government in the Philippine Islands, was amended to read:—"That all inhabitants of the Philippine Islands continuing to reside therein who were Spanish subjects on the eleventh day of April, eighteen hundred and ninety-nine, and then resided in said Islands, and their children born subsequent thereto, shall be deemed and held to be citizens of the Philippine Islands and as such entitled to the protection of the United States, except such as shall have elected to preserve their allegiance to the Crown of Spain. *Provided*, That the Philippine Legislature is authorized to provide by law for the acquisition of Philippine citizenship by those natives of the Philippine Islands who do not come within the foregoing provisions, the natives of other insular possessions of the United States, and such other persons residing in the Philippine Islands who could become citizens of the United States, under the laws of the United States if residing therein.

The Philippine Constabulary, which is distributed throughout the Archipelago in 119 stations, consists of 323 officers and 4,157 enlisted men.

There are in operation 587 post-offices, free delivery municipal letter-carrier service in 397 municipalities, 253 money-order offices, and 47 postal-savings banks, with 35,802 accounts. Of the 35,751 depositors, 29,555 are Filipinos.

The total kilometrage of telegraph and cable lines on June 30, 1912, was 9,010.84, and the number of telegraph offices 267. There are also four wireless stations operated. The total kilometrage of railroads in operation is 1,014.3.

Of the legislation enacted by the legislative authority in the Islands during the last two years might be mentioned that fixing the gold-standard fund at a sum equal to 35 per cent of the money of the Government of the Philippine Islands in circulation and available for that purpose, exclusive of the silver certificates in circulation protected by gold reserve; that providing for the apportionment between the Insular, provincial, and municipal governments of taxes paid by grantees or franchisees; that embodying certain provisions concerning the building and operation of railroads, and that providing for the establishment of an irrigation system.

The Philippine Islands came into the possession of the United States as a result of the war with Spain through the treaty of Paris, Dec. 10, 1898. Two days before the ratification of the treaty the Filipinos, under Aguinaldo, attacked the American soldiery in Manila and an insurrection was set on foot which lasted for two years.

Philippine Independence.—The Philippine bill as reported from conference, with the

Clarke amendment providing for independence of the Islands within four years eliminated, but containing a promise of freedom whenever the Filipinos have demonstrated their ability to maintain a stable government, finally was approved by the Senate August 16 and passed the House August 18, 1916. The vote was 37 to 22 in the Senate. All those who voted for the measure were Democrats and twenty-one of the twenty-two Senators who opposed the bill were Republicans. The only Democrat to vote against the bill was Senator Lane of Oregon. The Philippine Commission, which had been in charge of the Islands' affairs since their annexation, was dissolved by the bill. In its place was set up in general legislative control of the Philippine legislature of two houses—both elected by the native people. Twenty-four of the twenty-six members of the upper house, or Senate, are now chosen by the electorate. All were formerly appointed by the Governor-General. In accordance with the doctrine of offering as wide an opportunity as possible for self-education in government, the electoral franchise was also extended to include all those who speak and write a native dialect. Formerly property ownership or the ability to speak and write English or Spanish were the requirements. The change increased the electorate from 250,000 to approximately 800,000 or 900,000 voters. The executive departments, with the exception of that of Public Instruction, were placed entirely in the hands of the new Legislature. The Vice-Governor is to be head of that department. He, with the Governor-General, an auditor, assistant auditor, and the Justices of the Supreme Court, will be the only officers appointed by the President of the United States. The Governor-General has the same veto power over the native Legislature as that enjoyed by the Executive in the American form of government, and all acts of the Philippine Government are subject to the jurisdiction of the President, Congress, and Supreme Court of the United States. Americans on the islands are required to give up American citizenship before voting there. President Wilson signed the bill August 29.

Trade with the United States.—The value of merchandise imported into the Philippine Islands from the United States for the year 1913 was \$25,384,793, and goods to the value of \$21,010,248 were sent thither—a balance of \$4,374,545 in favor of the United States.

 General located at, 6704.

Phonograph.—The word phonograph is in-
 discriminately applied to all talking ma-
 chines or instruments used for the repro-
 duction of previously recorded sounds,
 whether of the voice or of musical instru-
 ments. A pencil attached to one prong of
 a tuning fork and passed lightly over a
 sheet of paper while the fork vibrated pro-
 duced the first recorded sound. The earliest
 device for registering speech was made by
 Leon Scott in 1855. He called his machine
 the phonautograph. It consisted of a sort
 of cone, the larger end of which was open
 to receive the sound. From the smaller
 enclosed end, projected a tube, across which
 was stretched a flexible membrane. To this
 membrane was attached a bristle which
 moved in consonance with the slightest mo-
 tion of the membrane. In front of the
 membrane was a horizontal cylinder or roll
 of paper covered with lampblack, against
 which the bristle touched lightly. Sound
 waves entering the open end of the cone
 were transmitted to the bristle by the vibra-
 tions of the membrane, and as the blackened
 cylinder was made to revolve and advance
 slowly the faintly moving bristle cut
 through the lampblack, leaving a white
 wavy line which was an exact graphic rec-
 ord of the sounds entering the cone.

In 1877 Edison constructed a form of this
 machine, substituting a metal diaphragm
 for the membrane, a sharp metallic point for
 the bristle and a wax or tin-foil-covered
 cylinder for the lampblack coated paper. In
 this machine the microscopic sound waves
 were indented instead of traced on the sur-
 face of the cylinder.

By reversing the machine and causing the
 metal point to retrace the indentations pre-
 viously made in the cylinder the original
 sound was reproduced by the diaphragm.

Charles S. Tainter and C. A. Bell in 1885
 substituted a wax cylinder for the tin-foil,
 and an up and down line was cut rather
 than indented in the wax.

In 1887 Emil Berliner, a German-Ameri-
 can of Philadelphia, patented the gram-
 ophone, wherein the sound waves of a dia-
 phragm are recorded on a disk as a wavy
 line in a horizontal plane, instead of as a
 vertical cut in a cylinder. As this line is
 cut in a continuous spiral, no feed screw
 is necessary to propel the metal point or
 the recorded sound waves, only a clock
 spring being necessary to rotate the disk.
 This was incorporated in the machine by
 Eldridge R. Johnson. With the expiration
 of the Tainter and Bell patents on wax
 records the etching process was abandoned
 for the wax cutting process, which now be-
 came common property, but horizontal re-
 cording was retained. Berliner made elec-
 trotyped reverses of these wax records, and
 from the plates so obtained duplicate copies
 of the records may be turned out like
 printed sheets from the printing press. The
 records, formerly stamped in celluloid or
 vulcanized rubber, are now printed on light
 fibrous compositions similar to paper pulp
 coated with shellac.

The manufacture of disk records began
 in 1897, and soon became recognized as an
 important industry. The cylinder machines
 remained in use under the names dictaphone
 and dictograph, and are used for recording
 conversation for future reproduction, such
 as testimony, instruction, commercial corre-
 spondence, etc., and the reproductions have
 been accepted as legal evidence by judges of
 criminal courts.

Opera singers, orators, musicians, orches-
 tras, bands, and other entertainers were
 soon in demand for making records for re-
 production, and the voice that once en-
 thrilled a contemporaneous audience but a

Phonograph Messages and Papers of the Presidents

brief hour may now become immortal and be heard by millions after life has left the human tones. The field thus widened has afforded new and increased popularity and earning power for all who sing or talk or play an instrument for hire. Some of the favorite singing artists are paid outright for the records of their voices, while others receive a percentage of the price of every record sold. An idea of the extent of the business may be had from the statement that the royalties of an individual singer have exceeded \$100,000.

In 1889 there were but two establishments in the country making records and reproducing instruments. In ten years the number had increased to eleven, with a capital of \$3,348,282, and a yearly output valued at \$2,246,274. In 1909 there were 18 establishments with a total capital of \$14,363,361, and an output valued at \$11,725,996. In 1914 the eighteen establishments turned out products which they valued at \$27,115,916, an increase of 139.7 per cent. in five years. Although the number of records and blanks increased but one-tenth of 1 per cent. in the five years the declared value of the goods increased from \$5,007,104 to \$11,111,418, an increase of 121.9 per cent. This is said to be due to the increased price obtained for disk records over cylinders.

Phosphates discovered on coast of Brazil, 4795.

Piankeshaw Indians. (See Indian Tribes.)

Pichon, Citizen, letter of Charles M. Talleyrand to, regarding United States ministers to France, 273.

Picket.—1. A soldier placed on guard to discover the movements of the enemy, and to give warning in case an enemy approaches. 2. A small number of soldiers sent out after comrades who have over-stayed their leave of absence. 3. A small force of soldiers kept ready, under arms, to meet a surprise attack by the enemy. 4. A selected member of a labor union organization sent out to reason with non-union workers or strike-breakers, or to intimidate them, in the effort to prevent them from working under non-union conditions. 5. A selected member of the National Woman's Party (see Woman Suffrage) detailed in 1917 to guard the entrances to the White House for the purpose of impressing the President with the seriousness of their intentions. (See Patrol, Sentinel and Sentry.)

Piegán Indians. (See Indian Tribes.)

Pierce, Franklin.—1853-1857.

Seventeenth Administration—Democratic.

Vice-President—William R. King.

Secretary of State—

William L. Marcy.

Secretary of the Treasury—

James Guthrie.

Secretary of War—

Jefferson Davis.

Secretary of the Navy—

James C. Dobbin.

Secretary of the Interior—

Robert McClellan.

Postmaster-General—

James Campbell.

Attorney-General—

Caleb Cushing.

Nomination.—Pierce was elected as a Democrat. At the national convention which met at Baltimore in June, 1852, thirty-five ballots were taken for a Presidential candidate without a choice being reached and without mention of Pierce's

name. Up to that point Lewis Cass and James Buchanan were leaders in the balloting. Virginia then presented Pierce's name and he was chosen on the forty-ninth ballot.

Platform.—The platform of the Democratic party commended rigid economy in public expenditure and a tariff for revenue and for the gradual payment of the public debt; opposed the national banking system as being unconstitutional; favored free immigration and ease of naturalization; deprecated Federal interference in domestic affairs, and especially in imposing restrictions upon slave-holding; supported the Fugitive Slave Act; characterized the war with Mexico as just and necessary; and condemned monopolies and exclusive legislation for the benefit of the few.

Opposition.—The Whig National Convention at Baltimore, in June, 1852, nominated General Winfield Scott on the fifty-third ballot, over Millard Fillmore and Daniel Webster. The party stood upon a platform embodying strict construction of the Constitution; freedom from entangling alliances with foreign countries; a tariff for revenue and for the encouragement of American industry; internal improvements, and support of the Fugitive Slave Act. The Free-Soil Democrats met at Pittsburg in August, 1852, and nominated John P. Hale, on a platform setting forth strict construction of the Constitution; "no more slave states, no slave territory, no nationalized slavery, and no national legislation for the extradition of slaves"; the abolition of slavery; the repugnance of the Fugitive Slave Act to the Constitution; the inconsistency with Democracy of the Compromise Measures of 1850; the natural right of all men to the soil; the holding in trust of the public lands for the landless settlers; the keeping of government funds separate from banking institutions; the provision by Congress of internal improvements; the hostility of the Free Democratic party to both the Whigs and the Democrats; and embodying the principles of the party in the phrase "Free Soil, Free Speech, Free Labor, and Free Men."

Vote.—The popular vote in thirty-one states—California participating for the first time—gave Pierce, 1,601,274; Scott, 1,386,580; and Hale, 155,825. The electoral vote, counted on Feb. 9, 1853, gave Pierce 254 votes, and Scott 42.

Party Affiliation.—Pierce gave his earliest political allegiance to the cause of General Jackson, whom he supported throughout. In Congress he opposed the abolition of slavery within the District of Columbia, and the policy of internal improvements. When he left Congress and retired temporarily to private life, he favored the annexation of Texas; and led the Democrats of his state in the memorable struggle against John P. Hale. In 1850, he reluctantly supported the several compromise measures, including the Fugitive Slave Act and the admission of California as a free state. He was thus in hearty accord with the principles enunciated by his party when elected to the Presidency.

Political Composition of Congress.—In the Thirty-third Congress the Senate was composed of 62 members, of whom 38 were Democrats, 22 Whigs, and 2 Free-Soil. The House was composed of 231 members, of whom 159 were Democrats, 71 Whigs, and 4 Free-Soil. In the Thirty-fourth Congress the Senate, of 62 members, was made up of 42 Democrats, 15 Republicans, and 5 Americans. The House, of 234 members, was divided as follows: 83 Democrats, 108 Republicans, and 43 Americans.

Finance.—The platform of the Democratic

party upon which Pierce was elected committed the administration to a policy of rigid economy in the expenditure of the public funds. The practice of this economy, and opposition to internal improvements, curtailed the expenditure and left a surplus in the Treasury, which was applied to the reduction of the public debt, and made the subject of an argument in favor of a reduction in the tariff. The condition of the public finances is referred to and discussed in each of the annual messages, but as the statements cover dissimilar periods, the following table will better show the financial status of the country during the administration at the end of each fiscal year:—

Year.	Public Debt, Less Cash, in Treasury.	Receipts, Total Net, Ordinary.
1853.....	\$59,803,117.70	\$61,587,032.00
1854.....	42,212,222.42	73,800,341.00
1855.....	35,586,956.56	65,350,575.00
1856.....	10,965,933.01	74,056,699.00

Year.	Expenditures, Total Net, Ordinary.	Total Money in Circula- tion.
1853.....	\$44,078,156.00	\$402,238,107.00
1854.....	51,967,528.00	425,551,240.00
1855.....	56,316,198.00	418,020,247.00
1856.....	66,772,528.00	425,846,625.00

Foreign Policy.—In his Inaugural Address (page 2730) President Pierce advocated the cultivation of peace with the nations of the world. He said: "The rights, security and repose of this Confederacy reject the idea of interference or colonization on this side of the ocean by any foreign power beyond present jurisdiction as utterly inadmissible." During this administration, no fewer than twenty-eight treaties with foreign powers were signed. Among the most important of them was that with Japan by Commodore Perry; the settlement with Great Britain of the fisheries rights in Canada, and the free navigation of the St. Lawrence, and the Gadsden Treaty with Mexico. Complications with Nicaragua caused the bombardment of Greytown in the spring of 1854, by the United States vessel *Cyane*, in retaliation for property stolen from Americans; and in 1856, William Walker conducted a filibustering expedition against Nicaragua with such temporary success that President Pierce recognized the Minister sent by him to the United States. The British Minister and the Consuls at New York, Philadelphia, and Cincinnati were dismissed by President Pierce for complicity in recruiting in the United States for the Crimean War, in 1854 and 1855. Bills for the reorganization of the diplomatic and consular systems were signed by the President in 1855. The attempts to gain Cuba from Spain, in which the Ostend Manifesto (*q. v.*) was an incident, in 1854, proved abortive by reason of the unfriendly attitude of European powers and the excitement at home over the Kansas-Nebraska Bill. In his Fourth Annual Address he said (page 2950): "In foreign relations we have to attempt our power to the less happy condition of other Republics in America and to place ourselves in the calmness and conscious dignity of right by the side of the greatest and the wealthiest of the Empires of Europe."

Slavery.—In his Inaugural Address (page 2730) the President set forth his conviction that slavery was constitutional, as was also the Fugitive Slave Act, and denounced slavery agitation. "Such," he says, "have been, and are, my convictions,

and upon them I shall act. I fervently hope that the question is at rest, and that no sectional or ambitious or fanatical excitement may again threaten the durability of our institutions or obscure the light of our prosperity." Doubtless he was sincere in his hopes and wishes, but the enforcement of his policies was fraught with tremendous and lasting results. The two most important pre-slavery measures supported by the Pierce administration were the Ostend Manifesto and the Kansas-Nebraska Bill. President Pierce reviews the historical and constitutional aspects of slavery in his Third Annual Message (page 2860), and, in concluding his denunciation of abolitionist reformers, says: "I know that the Union is a thousand times stronger than all the wild and chimerical schemes of social change which are generated one after another in the unstable minds of visionary sophists and interested agitators."

In his Fourth Annual Message (page 2930) he is especially severe in his arraignment of the slavery reformers, of whom he said: "They are perfectly aware that the change in the relative conditions of the white and black races in the slave-holding states which they would promote is beyond their lawful authority; that to them it is a foreign object; that it cannot be effected by any peaceful instrumentality of theirs; that for them and the states of which they are citizens the only path to its accomplishment is through burning cities, and ravaged fields, and slaughtering populations, and all there is most terrible in foreign, complicated with civil and servile, war; and that the first step in the attempt is the forcible disruption of a country embracing in its broad bosom a degree of liberty and an amount of individual and public prosperity to which there is no parallel in history, and substituting in its place hostile governments, driven at once and inevitably into mutual devastation and fratricidal carnage, transforming the new peaceful and felicitous brotherhood into a vast permanent camp of armed men, like the rival monarchies of Europe and Asia."

But for the wanton opening of the slavery question, Pierce's administration would have been one of the most creditable in the nation's history. But for the repeal of the Missouri Compromise and the popular excitement attending the whole question of slavery the defection from the Democratic party and the formation of the Republican party in 1856 would have been at least longer delayed.

Internal Improvements.—In his First Annual Message (page 2751) President Pierce declares that the subject of internal improvements "has stood as a deep graven line of division between statesmen of eminent ability and patriotism"; refers to President Jackson's message of May 27, 1830, on the subject; and asks Congress for a reconsideration of the subject, with a view to adopting a settled standard of action. In vetoing certain bills making appropriations for works coming under this head (page 2790), the President fully discusses the several phases of the question and clearly defines his opposing attitude, summing up with these words: "On the other hand, so long as those improvements are carried on by appropriations from the Treasury the benefits will continue to inure to those alone who enjoy the facilities afforded, while the expenditure will be a burden upon the whole country and the discrimination a double injury to places equally requiring improvement, but not equally favored by appropriations." He

EXTENT OF THE UNITED STATES DURING THE ADMINISTRATION OF PRESIDENT PIERCE, 1853-1857.

(NOT INCLUDING TERRITORIES)

FLAG OF 1857

seeks to illustrate the difficulty of knowing what improvements may properly be provided by the national government and what should be left to individual or state enterprise, by concrete examples of railroads and harbor improvements. Again, in 1856, several bills of the same nature were vetoed by the President. In fact, nearly all of the vetoed measures during this administration were bills of this nature.

Commerce.—In his Second Annual Message (page 2808) President Pierce was able to say: "Our foreign commerce has reached a magnitude and extent nearly equal to that of the first maritime power of the earth, and exceeding that of any other." Especial emphasis was laid in this message upon the necessity of securing by treaty with the other world powers a recognition of the rights of neutrals in time of war as the best means of conserving the commercial interests and safety of the country. Great progress was made by the administration in securing from European nations a treaty agreement to the principle that free ships make free goods, except in the case of articles contraband of war, and that neutral property other than contraband, though on board enemy's ships, shall be exempt from confiscation. The condition of the commercial aspects of the country during the four years' administration is presented in the following table:

	1853	1854
Imports.....	\$263,777,265	\$297,803,794
Exports.....	203,489,282	237,043,764
Miles of Railway.....	15,300	16,720
Tons of Vessels Built.....	427,494	536,046
No. of Immigrants....	368,645	427,833
	1855	1856
Imports.....	\$257,808,708	\$310,432,310
Exports.....	218,909,503	281,219,423
Miles of Railway.....	18,374	22,016
Tons of Vessels Built.....	583,430	469,293
No. of Immigrants....	200,877	195,857

Tariff.—In his First Annual Message, President Pierce (page 2747) asks the attention of Congress to the consideration of a decrease in duties, in view of the surplus in the Treasury. Again, in his Third Annual Message he says (page 2871): "The conspicuous fact that the annual revenue from all sources exceeds by many millions of dollars the amount needed for a prudent and economical administration of public affairs, can not fail to suggest the propriety of an early revision and reduction of the tariff of duties on imports." In his Fourth Annual Message (page 2941) he urges a reduction so that the revenue from customs should not exceed forty-eight or fifty millions. Congress accordingly passed the act of March 3, 1857, "reducing the duty on imports, and for other purposes."

Army.—In his Second Annual Message President Pierce (page 2819) urges that the forces be increased to prevent the Indian atrocities on the frontier, and adds: "Without increase of the military force these scenes will be repeated. It is to be feared, on a larger scale and with more disastrous consequences." At the previous session of Congress a bill was passed increasing the pay of the rank and file of the Army, which the President reports "has had beneficial results, not only in facilitating enlistments, but in obvious improvement in the class of men who enter the service." He regrets that the increase had not been extended to the officers. To meet the present needs of the nation, he asks for four new regiments, two of infantry and two of cavalry. Several suggestions are made in this message to re-

form the Army organization, especially in the direction of the creation of a retired list in order to provide for officers who, having rendered distinguished or even meritorious service, would by the standard of seniority be promoted to posts which impairment by age would render them unfit to fill. He asks that a test of one year be made of the efficacy of the plan proposed. The organization of the artillery is subjected to criticism because the force as then organized required infantry duty from the force, because of its arrangement in regiments instead of batteries.

In his Fourth Annual Message (page 2941) he commends the work of the Army in suppressing the hostile demonstrations of the Indians and reiterates his recommendation for the adoption of measures of reform in the organization and in the increase of the force which "during the past year has been so constantly employed against the hostile Indians in various quarters that it can scarcely be said to have been a peace establishment."

Navy.—The Navy was substantially increased during this administration by the addition of six new steam frigates, of which the President says (page 2942): "The condition of the Navy is not merely satisfactory but exhibits the most gratifying evidences of increased vigor. . . . The new frigates ordered by Congress are now (1856) afloat and two of them are in active service. They are superior models of naval architecture and with their formidable battery add largely to public strength and security."

Among the reforms in the organization of the Navy carried through by this administration were the apprentice system by which boys were trained for service on a three years' cruise in national vessels, the permission granted to honorably discharged seamen to enlist after a few months without cessation of pay, and the law for the promotion of discipline in the naval force.

Pilgrim Fathers.—A name given by William Bradford in his journal to certain emigrants under the leadership of Bradford, Brewster, Cushman, Carver, and Miles Standish, who came to New England early in the seventeenth century on account of religious differences in England and founded the colony of Plymouth. Those who came in the first three ships are also called "old comers" or "forefathers." The first ship, the *Mayflower*, arrived on the coast in December, 1620, and had on board 108 souls. The *Fortune* came in November, 1621, with twenty-nine, and the *Anne* and *Little James* came in August, 1623, bringing forty-six persons. In religion the Pilgrims were Separatists or Independents, while the settlers of Massachusetts Bay were Puritan, who at first adhered to the Church of England and endeavored to purify it.

Pillage. Plunder, especially that captured from the enemy in war. (See Plunder.)

Pinchot-Ballinger Controversy.—James R. Garfield, Secretary of the Interior under Roosevelt, and Gifford Pinchot, Chief

Forester, attacked the policy and conduct of Mr. R. A. Ballinger, Secretary of the Interior under President Taft, in the matter of the conservation of the natural resources in the public domain, using as their principal text the course of Mr. Ballinger with reference to the coal lands in Alaska.

The principal items in the indictment of Mr. Ballinger were as follows:

(1) That, in 1907, as Land Commissioner under President Roosevelt, he ordered the so-called Cunningham claims prepared for patent, though to his knowledge there were on file three reports by field agents that these claims were fraudulent, and that shortly thereafter he urged a Congressional Committee to favor a law which would have validated the claims.

(2) That he violated a statute by aiding in the prosecution of a claim which was pending while he was Land Commissioner within two years after leaving that office.

(3) That, by unwise administration, Mr. Ballinger caused the nation the loss of valuable water-power sites on the public domain.

Congress, in January, 1910, appointed a committee consisting of six members from each house to investigate the charges. In September the four Democratic members and one "insurgent" Republican met in Minneapolis, and drafted a report recommending the dismissal of Mr. Ballinger. The seven "regular" Republican members issued a majority report, Dec. 7, 1910, in which it was declared that the evidence did not exhibit Mr. Ballinger as being anything but a competent and honorable gentleman, honestly and faithfully performing the duties of his high office with an eye single to the public interest. The most important finding of the committee was that coal mines on the public land should be leased, not sold, by the Government.

Pine-Tree Money.—On May 27, 1652, the general court of Massachusetts passed an act establishing a mint at Boston. John Hull was appointed mint master, and he began the coinage of shillings, 6d. pieces, and 3d. pieces. This was called pine-tree money from a design on the obverse of a pine-tree encircled by a grained ring, with the legend "Massachusetts. 1n." The coinage was discontinued on the death of the mint master, Oct. 1, 1683.

Pine Tree State.—A nickname for Maine (q. v.). (See also States); sometimes also nicknamed Down East State and Lumber State.

Pines, Isle of, Cuba, referred to, 6739.

Pioneer.—One who blazes the way for a new settlement or movement. He may or may not become a permanent fixture. In the development of America, pioneers have played a tremendously important role, going into new sections of the country and risking their lives among savages, wild animals, and expansive woods or prairies, with nothing but faith to assure safety. The development of the great West has been due in large measure to intrepid pioneers. (See Explorer.)

Pioneering. (See illustration opposite 2929, and description on back.)

Piracy.—Robbery on the high seas. In the law of nations the essential element of piracy is the intention of preying indiscriminately on the human race, and not a desire to interfere with the trade of some distinct power. As the high seas are not under the jurisdiction of any one state,

the crime of piracy is triable in any court. The difference between a pirate and a privateer consists in these facts, that whereas the former is a sea rover who preys on the vessels and goods of any nation he may chance to run across, or who makes descents upon land for purposes of plunder, a privateer, on the other hand, has for his purpose the preying upon the commerce of a hostile nation only; he is under bond to the state whose flag he flies and of which he carries the commission or letter of marque granting him a share in the prizes taken. A privateer exceeding his commission might not be considered a pirate, but one with commissions from two opposite belligerents would be, for it would be apparent that his motive would be plunder of both. A vessel of a part of a country organized for rebellion has been held to be piratical because, although it may have a commission, such commission issued by an unknown and unrecognized power can not be admitted as valid, as it offers no guaranty of legal belligerent behavior. Piracy in the international sense of the word, however, is a crime against all nations; but any nation may class other crimes under this head.

The United States in 1820 made the slave-trade piracy for any of its citizens on any ship and for persons not citizens on any of its vessels. Notwithstanding this law passed by the United States, slave trading was not piracy in the international sense of the word. Search of a vessel by a public ship of another state is a war right only, but the right to search on suspicion of piracy exists at all times. The usual penalty for piracy is the confiscation of the vessel and hanging of the crew, while the penalty for privateering is at most imprisonment. (See also Privateering.)

Piracy:

Plant Industry, Bureau of.—This bureau of the Department of Agriculture conducts experiments in economic botany, physiology, and diseases of plants and forest trees; plant

breeding; soil bacteriology; biophysics; acclimatization and adaptation of plants. It also studies farm management; demonstration work with farmers in improved farm practice; conditions of agriculture under dry land, irrigation and other special conditions. It also collects and tests seeds and plants from foreign countries. It engages in the purchase and distribution of seeds, largely through members of Congress; makes tests of imported and domestic seeds, and establishes standard grades of grain and cotton. It takes care of department parks and conservatories, and manages the Arlington Experimental farm.

There are more than 6,300,000 farms in the United States. The primary function of this bureau is to assist the farmer to increase the output per acre and at the same time to build up and maintain the fertility of the soil.

Study of the diseases of forest trees, plants, fruit, potatoes, cotton and truck crops engage the attention of the bureau. In one recent year \$2,730,892 was expended in fighting diseases of plants. Standard grades of cotton and corn have been established by the bureau and enacted into law by Congress to the advantage of both buyer and seller.

Plaster of Paris, restriction on importation of, removed by proclamation, 603, 605.

Platforms.—In politics the platform of a party is the public declaration of the principles that the party represents. In May, 1832, a national assembly of young men was held in Washington, D. C., to indorse the nomination of Henry Clay by the National Republican party. They agreed to the first platform ever adopted by a national convention. In 1844 both the Whigs and Democrats drew up platforms, but in 1848 the Whigs refused to commit themselves by a platform. After this time the adoption of party platforms by national conventions became general.

Platt Amendment. (See Cuba.)

Platt National Park. (See Parks, National.)

Plattsburg, The, surrender of persons charged with murder on board of, referred to, 1808.

Plattsburg (N. Y.), Battle of.—The overthrow of Napoleon by the allied powers in 1814 released many British soldiers from service in Europe, and several thousand of them were sent to reinforce the little army in Canada. By Aug. 1, Governor-General Prevost had 15,000 troops under his command at Quebec, most of them hardened veterans from the Peninsula. One brigade was sent west. The remainder were held for a contemplated invasion of New York. Wilkinson and Hampton had been retired from the American Army and Gen. George Izard was placed in command of the right wing of the Army of the North, May 4, 1814, with headquarters at Plattsburg, N. Y., near the head of Lake Champlain. Notwithstanding it was evident that the British contemplated a descent upon New York by way of Lake Champlain and the Hudson, Izard was detached from his command and sent with 4,000 men to the Niagara frontier, leaving Gen. Macomb in command with about 3,500 men. Sept. 6, 1814, the British army, fully 14,000 strong, already upon American soil, marched toward Plattsburg. Maj. Wool, with a body of about 300 regulars, met the invading army at Beekmantown, about four miles north of Plattsburg,

and subjected it to a harassing fire all the way to the Saranac River. Wool's retreating column crossed the stream to South Plattsburg and destroyed the bridges. Though in overwhelming force, the British army was checked, with a loss in killed and wounded of more than 200 men. The American loss was 45.

From Sept. 7 to 11, Prevost's army rested, preparatory to acting in conjunction with the fleet on Lake Champlain. On the 11th, while the forces of Macomb and Prevost contended on land, a desperate naval battle was fought on Lake Champlain between the American and British fleets, the former under Macdonough and the latter under Downie. This battle lasted for two hours, resulting in victory for the Americans. The British lost 200 men and the commodore of the fleet. The news of the naval victory reached the contending armies at a critical point of the battle and turned the tide in favor of the Americans. Prevost fled with his army to Champlain, leaving behind his sick and wounded and large quantities of stores. Sept. 24 the British returned to Canada, having lost in the expedition about 2,000 men. (See Lake Champlain, Battle of.)

See illustration opposite 583.

Plattsburg, N. Y., battle of, British troops defeated in, 534.

Plattsburg Training Camp—The wave of Preparedness (q. v.) which swept over the country in 1914, 1915, and 1916, was responsible for the establishment of a training camp for college graduates and business and professional men at Plattsburg, N. Y., in 1915. The camp was under the direction of the United States Regular Army, and directly under Major-General Leonard Wood, commander of the Department of the East. The camp was so successful and attracted so much attention that other similar camps were established in different parts of the country during the following year. The Plattsburg camp was held again in 1916, and in 1917 was used as a training center for officers volunteering for service in the European War. Attendance at the camp was voluntary, and did not increase the attendant's military obligations to the Government; and the camp was established primarily for those men who wished to increase their potential military effectiveness for the country, but who were unable to assume service in the National Guard.

Pleasant Hill (La.), Battle of.—After the defeat of the Federal army under Gen. Banks at Sabine Cross Roads, April 8, 1864, it retreated by way of Pleasant Grove to Pleasant Hill, about eighteen miles south, where Banks was joined by Gen. A. J. Smith with 10,000 men. Occupying a strong position here, the Federals awaited the pursuing force under Kirby Smith and Dick Taylor. April 9, about 4 o'clock in the afternoon, the Confederates came up and began the attack. In the battle which ensued they were checked and some of the guns they had taken the day before at Sabine Cross Roads were retaken. Banks now returned to the Red River at Grand Ecore, having lost in the campaign 18 guns, 5,000 men, 130 wagons, 1,200 horses, and many small arms.

Pleuro-Pneumonia among cattle, discussed, 4578, 4508, 4771, 5112, 5383, 5764, 5887.

Plumed Knight of Maine.—A soubriquet given to James G. Blaine.

Plunder.—In military parlance, belongings taken by force, usually those of a non-military character. (See Pillage.)

Plurality.—The excess in votes obtained by the winning candidate over the votes obtained by the second best candidate when there are more than two candidates in the field; same as majority in case of two candidates.

Plutocracy.—Government controlled by the people of wealth; also applied to characterize the wealthy classes generally.

Plymouth Colony.—The earliest settlement in Massachusetts. It was founded by a party of English Separatists who arrived in this country Dec. 21, 1620, and landed for permanent settlement in the following January. These Separatists were dissenters from the Church of England. Unlike the Puritans, who sought to purify the church, they regarded such purification as hopeless, and therefore advocated and practiced separation. The Plymouth colonists came to America from Delft, Holland, whither they had emigrated from Plymouth, England. One of the chief objects in coming to America was to enjoy their religion without molestation. The company named their settlement Plymouth, partly because it had been so called by Capt. John Smith, who had previously surveyed the harbor, and partly because the people of Plymouth, England, had treated them kindly. Miles Standish was made captain, with military authority, soon after landing, and John Carver was chosen the first governor of the colony. They entered into a treaty with Massasoit, chief of the Wampanoags, which was faithfully kept for fifty-five years. No royal charter was ever granted. With the arrival of the ship *Fortune* and twenty-nine immigrants in 1621 came a land patent from the Council for New England. The patent did not fix territorial limits, but allowed 100 acres of land to each immigrant and 1,500 for public buildings, and empowered the grantees to make laws and set up a government. After enduring many hardships and privations the first colonists were joined by others from England and material prosperity followed. Plymouth Colony became a member of the New England Confederation in 1643. By the Massachusetts charter of 1691 it was united with the Colony of Massachusetts Bay.

Plymouth Company.—In 1606 a company of merchants of Bristol and Plymouth, England, were incorporated under a charter granted by James I. and called the North Virginia Company. They became a rival of the London Company. In 1607, having obtained a grant of land between Long Island and Passamaquoddy Bay, they sent out two ships carrying a company of colonists commanded by George Popham. A settlement was attempted on the Kennebec, but Popham died and the other colonists returned home. The company continued to exist till 1620, when it was reorganized as the New England Company or Council for New England.

Plymouth, N. C., capture of, referred to, 3458.

Pocket, The, convention with Texas, for adjustment of claims in case of, 1686.

Pocket-Borough.—An opprobrious term referring to a political division supposed to be completely controlled by a leader or boss;

especially with the implication that it is controlled by the use of money from his pocket.

Pocket Vetoes. (See the several Presidents; the several messages.)

Point Barrow, Alaska, refuge station established at, 5476.

Poland.—A country of northeastern Europe bounded by Russia, Prussia and Austria. It is said to have become a duchy under Lechus or Lesko 1, 550; and a kingdom under Boleslas, about 992; the natives belong to the great Slavonic family. The word Pole is not older than the 10th century. This kingdom in its best days embraced a territory of about 284,000 sq. miles, and extended 713 miles north and south and 693 east and west.

Its destruction as a separate nationality and the absorption of its territory by Austria, Prussia, and Russia, commencing in 1772 (when it embraced an area of about 282,000 sq. miles, with a population of not far from 12,000,000) and finished in 1795, the aid of Poland herself, and while sympathy is aroused at the needless destruction could not have been accomplished without of a nation, still it was due (1) to the inveterate jealousy and feuds of the Polish nobility among themselves; (2) the absence of a middle or national class, which the nobles made impossible; (3) the intolerance of the Jesuitical Romish party; (4) total incapacity of its later rulers; (5) no natural frontier boundaries. Its history as a nation ceased in 1795 with Stanislas II, when Courland was annexed to Russia and the King resigned his crown at Grodno. This followed the suppression, by the Russians, of an insurrection of Poles under Kosciusko, after his return from America, where he took part in the Revolution. Napoleon I wintered his army in Warsaw, the ancient capital, in 1806-7. The central provinces were constituted a kingdom under Alexander of Russia in 1815. In 1831 another revolution broke out, and after its suppression the Polish language was prohibited in the courts of law and in public places. In 1841 Poland was declared a Russian province.

During the European war beginning in 1914 Warsaw was occupied by the Germans and the Russians were expelled from the province. November 5, 1916, a joint proclamation by the Emperor of Germany and the Emperor of Austria established the Polish districts and provinces into a national state with a hereditary monarchy and a constitutional government. The exact delimitation of the frontiers of the revived kingdom were left to the future for decision, as was also the question of who should be placed upon the throne.

Polar Congress, International, at Hamburg, Germany, 4535.

Policy, Foreign. (See Foreign Policy.)

Poliomyelitis. (Infantile Paralysis.)—So far as can be discovered, this disease is of recent origin. At least, the first serious poliomyelitis outbreak occurred in New York in 1907. The disease, which is acutely infectious, is caused by a strong virus which distributes itself generally throughout the body, but attacks in particular the brain and the spinal cord. Infection may be either direct, as from the nose or mouth of a person suffering from the disease or carrying the virus without injury to himself; or indirect, as from the use of a towel or drinking glass after such a person. The name of infantile paralysis, generally used to de-

scribe the disease, owes its origin to the fact that the disease usually attacks young children, especially those under five; and to the fact that paralysis, complete, partial, or slight, often is an after-result. However, so many cases of infantile paralysis pass unnoticed because of the absence of evil after-effects that it has been estimated that paralysis does not occur in the majority of cases, although it may well occur in the majority of those cases where the infection is strong enough to make its presence evident. The most frequent symptoms are fever, stiffness of the neck, digestive disturbances, and vomiting. If paralysis is to develop, it usually occurs from 2 to 8 days after the illness of the patient has become pronounced.

The most severe epidemic of poliomyelitis in the world occurred in New York City in the summer of 1916, and to a lesser extent in different parts of the country. It is estimated that 12,000 cases broke out in that period, of which almost 25% were fatal. All efforts to find a cure proved futile—drugs being useless and the best results being obtained by injecting into the spinal canal of the patient a blood serum from a person who had had the disease some years previously. The best treatment would seem to be scientific after-care, and convalescence should last for from one to two years after the disease has departed.

Political Economy. (See Economics.)

Political Expenses, appropriation for, suggested, 7106.

Contributions from corporations should be prohibited, 7370.

Political Parties.—The following is a list of the principal political parties extant and heretofore existent in the United States. (See respective names): Abolition, American, Anti-Federalists, Anti-Masonic, Democratic, Democratic-Republican, Federalists, Free Soil, Greenback, Independence, Independent National, Liberal Republicans, Liberty, National, National Anti-Slavery Society, National Republican, National Silver, Patrons of Husbandry, People's Progressive, Prohibition, Populist, Populist or People's, Republican, Social-Democrat, Socialist, Socialist Labor, Sound Money Democrats, Strong Government Men, Tory, Whig.

Political Prisoners. (See Civil War.)

Politician.—A person, in or out of office, who helps to direct political affairs; especially one who helps another person as a candidate in an effort to secure office for himself either by election or appointment.

Polk, James K.—1845-1849.

Fifteenth Administration—Democratic.

Vice-President—George M. Dallas.

Secretary of State—

James Buchanan.

Secretary of the Treasury—

Robert J. Walker.

Secretary of War—

William L. Marcy.

Secretary of the Navy—

George Bancroft.

John Y. Mason.

Postmaster-General—

Cave Johnson.

Attorney-General—

John Y. Mason.

Nathan Clifford.

Isaac Toucey.

Polk was elected by the Democratic party, Nov. 5, 1844. He was the first "dark-horse" candidate ever nominated by a prominent party. At the Democratic National Convention held in Baltimore, May 27-29, 1844,

EXTENT OF THE UNITED STATES DURING THE ADMINISTRATION OF PRESIDENT POLK, 1845-1849.

(NOT INCLUDING TERRITORIES)

FLAG OF 1849

Van Buren and Cass were the leaders in the first eight ballots. On the ninth ballot, Polk's vote rose from 44 in the eighth to 233, sufficient for the nomination.

Platform.—The platform of the party reaffirmed the nine sections of the platform of 1840 and added three more sections. These specified that the public lands should be held as the Constitution provides, and that proceeds from the sale should not be distributed among States; that the veto power of the President should in no wise be curtailed; and that all of Oregon belonged to the United States, and that Texas should be reannexed as soon as practicable.

Opposition.—At the Whig National Convention held at Baltimore in May, 1844, Henry Clay was endorsed for the Presidency, and the first Whig national platform was formulated. It advocated a well-regulated currency, tariff for revenue and protection, distribution of the money derived from sales of public lands, a single term for the Presidency, curtailing of Executive Power, and an effective, careful, and economical government. The Liberty party met at Buffalo in convention on Aug. 30, 1843, and nominated James G. Birney for the Presidency. The platform adopted at that convention announced belief in human brotherhood, the abolition of slavery.

Vote.—The popular vote cast by twenty-six States gave Polk, 1,337,243; Clay, 1,299,068; and Birney, 62,300. The electoral vote, counted on Feb. 12, 1845, gave Polk 170 and Clay 105.

Party Affiliation.—Polk was brought up a Jeffersonian in politics and, during the whole period of Jackson's administration, he was a leading supporter of his policies. As Speaker of the House (1835-1839) he supported Van Buren's administration. His opposition to the reforms advocated by the anti-slavery party was firm but not rabid. As Governor of Tennessee (1839-1841) he opposed the national bank, Federal taxation for revenue surplus, and the policies of the Abolitionists. He strongly favored the re-annexation of Texas, and it was upon this issue that he was elected President.

Political Completion of Congress.—In the Twenty-ninth Congress (1845-1847) the Senate, of 56 members, was composed of 30 Democrats, 25 Whigs, and 1 vacancy; and the House, of 225 members, was made up of 141 Democrats, 78 Whigs, and 6 Americans. In the Thirtieth Congress (1847-1849) the Senate, of 58 members, was composed of 37 Democrats and 21 Whigs; and the House, of 227 members, was made up of 108 Democrats, 115 Whigs, and 4 Independents.

Public Debt.—The public debt of the United States during the years of Polk's administration stood as follows: 1846, \$15,550,202.97; 1847, \$38,826,554.77; 1848, \$47,044,862.23; 1849, \$63,061,858.69.

In his First Annual Message (page 2252) President Polk referred to the total extinguishment of the public debt by a previous administration and cherished the hope that, by especial effort, his administration might bring about the same most desirable result. But the expenses due to the wars in which the country became involved soon dispelled all hope of accomplishing his purpose.

Tariff.—In his First Annual Message (page 2253) President Polk discusses the tariff in theory and the scale of the tariff of 1842 specifically. He points out the difference between the revenue standard and the protection standard, and says: "It does not follow that Congress should levy the highest duty on all articles of import which they will bear within the revenue standard, for such rates would probably produce a much larger amount than the economical administration of the Government

would require." Such incidental protection as a tariff for revenue carries with it should in his opinion be so regulated that the tax may be made to bear equally upon consumers, and should be so arranged as to justly protect all industries alike. He refers to the fact that the tariff of 1842 was passed by a majority of only one vote in the Senate and two in the House (page 2255). He recommends a reduction in the tariff and prefers the *ad valorem* to the specific duty. "Such a system, when once firmly established, would be permanent, and not be subject to the constant complaints, agitations, and changes, which must ever occur when duties are not laid for revenue, but for the protection merely of a favored interest."

In a special message of June 16, 1846, the President presents a plan from the Secretary of the Treasury for the modification of the duties. He says (page 2301): "The high duties at present levied on many articles totally exclude them from importation, whilst the quantity and the amount of others which are imported are greatly diminished. By reducing these duties to a revenue standard, it is not doubted that a large amount of the articles on which they are imposed would be imported, and a corresponding amount of revenue be received at the Treasury from this source." On July 30, 1846 Congress passed an act "reducing the duty on imports, and for other purposes." This act went into effect on Dec. 1, 1846. In his Third Annual Message to the President (page 2403) reports the satisfactory working of this act in its first year, and says: "All the beneficial effects which were anticipated from its operation have been fully realized." The revenue for the year was increased over \$8,000,000. "While the repeal of the prohibitory and restrictive duties of the act of 1842 and the substitution in their place of reasonable revenue rates levied on articles imported according to their actual value has increased the revenue and augmented our foreign trade, all the great interests of the country have been advanced and promoted." These results are reported as continuing during the following year (page 2497). The President's attitude on the question of protection is fully enunciated in his discussion of the American System in his Fourth Annual Message (page 2504).

Foreign Policy.—On the annexation of Texas and the possible interference by foreign powers, the President said in his Inaugural Address (page 2230): "I regard the question of annexation as belonging exclusively to the United States and Texas. They are independent powers competent to contract, and foreign powers have no right to interfere with them or to take exceptions to their reunion. Foreign powers do not seem to appreciate the true character of our government. . . . Foreign powers should therefore look on the annexation of Texas not as the conquest of a nation seeking to extend her dominions by arms and violence, but as the peaceful acquisition of a territory once her own, by adding another member to our confederation, with the consent of that member, thereby diminishing the chances of war and opening to them new and ever-increasing markets for their products." In his First Annual Message (page 2237) the President, in referring to the same subject, said: "We may rejoice that the tranquil and pervading influence of the American principle of self-government was sufficient to defeat the purposes of British and French interference, and that the almost unanimous voice of the people of Texas has given to that interference a peaceful and effective rebuke. From this example, European governments

may learn how vain diplomatic arts and intrigues must ever prove upon this continent against the system of self-government which seems natural to our soil, and which will ever resist foreign interference." In the same message he reviews the conditions of the war with Mexico.

War with Mexico.—The proclamation of war against Mexico (page 2320) was issued by President Polk on May 13, 1846. In his Second Annual Message (page 2321) the President goes fully into the Mexican War history.

In his Third Annual Message, in speaking of the Mexican War (page 2394), he says: "I am persuaded that the best means of vindicating the national honor and interest and of bringing the war to an honorable close will be to prosecute it with increased energy and power in the vital parts of the enemy's country." In his Fourth Annual Message (page 2481), in speaking of the effects of the Mexican War, the President says: "One of the most important results of the war into which we were recently forced with a neighboring nation is the demonstration it has afforded of the military strength of our country. . . . The great results which have developed and been brought to light by this war will be of immeasurable importance in the future progress of our country. They will tend powerfully to preserve us from foreign collisions, and enable us to pursue uninterruptedly our cherished policy of peace with all nations, entangling alliances with none."

Panama.—A special message (page 2361) accompanies the treaty with Granada, which by its thirty-fifth article confers upon the United States the right of passage across the Isthmus of Panama. The President says: "The importance of this concession to the commercial and political interests of the United States can not be easily over-rated. The route by the Isthmus of Panama is the shortest between the two oceans, and from the information herewith communicated it would seem to be the most practicable for a railroad or a canal."

Slavery.—In his Fourth Annual Message President Polk gives his views on slavery (page 2491) in these words: ". . . No duty imposed on Congress by the Constitution requires that they should legislate on the subject of slavery, while their power to do so is not only seriously questioned but denied by many of the soundest expounders of that instrument. Whether Congress shall legislate or not, the people of the acquired territories, when assembled in convention to form State constitutions will possess the sole and exclusive power to determine for themselves whether slavery shall or shall not exist within their limits. . . . Any and all of the states possess this right, and Congress can not deprive them of it. The people of Georgia might if they chose so alter their Constitution as to abolish slavery within its limits, and the people of Vermont might so alter their Constitution as to admit slavery within its limits."

Poll.—(a) The receiving and counting of votes, or the act of voting. (b) The place where votes are cast and received.

Poll Tax.—An individual or head tax levied upon the male citizens of some foreign countries and a portion of the United States. The Federal Government has the power to levy such a tax in proportion to the census (20) but has never exercised it. Before the Revolution the Colonies levied poll taxes at various times. In 1898 twenty-seven states and territories levied and collected a poll tax. Some states, as South Carolina, have constitutional provisions for levying the poll tax. In Ohio and some other states any tax on polls is prohibited by the constitution. In others, as in Massachusetts and Tennessee, its payment is made a qualification for voting. Many of the states devote their revenue from poll taxes to free schools.

Ponca Indians. (See Indian Tribes.)

Poncarar Indians. (See Indian Tribes.)

Pontiac's War.—A war between the English garrisons and settlers on the western frontier and a confederacy of the Delaware, Shawnee, Mingo, Ottawa, Chippewa, and

other Indian tribes, led by Pontiac, an Ottawa chief. Pontiac assembled a great council of Indians near Detroit April 27, 1763, and unfolded his plans for retarding or preventing white settlers locating west of Pittsburgh. To capture Detroit was Pontiac's special task, and May 7 was the date selected, but the commander of the post was warned of the plot by an Indian girl, and the attempt was not made. The town was surrounded, however, and July 31 the garrison made a night attack on the Indians in which 59 English were killed or wounded. Oct. 12 Pontiac raised the siege and retired. Forts Sandusky, St. Joseph, Miami, Ouatanon, Mackinaw, Presque Isle, Le Beauf, and Venango were taken and their garrisons massacred by the Indians in this war. A treaty of peace was made in 1766. Pontiac was murdered by a Kaskaskia Indian in 1769.

Pontifical States. (See Italy; Papal States.)

Pontoon-Bridge.—A bridge for small bodies, as the support of a flooring or road.

Poor Richard's Almanac.—In 1732 Benjamin Franklin began the publication of Poor Richard's Almanac. It contained many homely but very striking maxims, and for this reason became famous.

Pope of Rome, sentiments of regard for President, conveyed, referred to, 2761.

Popular Vote.—Vote of the people. The popular vote has been gradually extended, and by the XVII Amendment provision was made for the election of United States Senators by direct popular vote. (See Amendments.)

Population.—The first United States census having been taken in 1790, all population figures previous to that date are based upon estimates.

Early estimates, of somewhat doubtful accuracy, give the following population figures for the colonies and states since incorporated into the Union:

1688.....	200,000	1760.....	1,695,000
1714.....	434,000	1770.....	2,312,000
1750.....	1,260,000	1780.....	2,945,000

The number of immigrants added to the population was estimated for different periods as follows:

From 1654 to 1701.....	134,000
From 1702 to 1800.....	492,000
From 1801 to 1820.....	178,000
From 1821 to 1890.....	15,000,000

The people of New England were almost purely English; those of New York largely Dutch. Pennsylvania and the countries to the southward attracted many Germans, Scotch, Irish, and Huguenot immigrants, the latter settling largely in South Carolina and Georgia.

Population, Center of.—(See Center of Population.)

Population of the United States from 1790 to 1917. (See table on following page.)

Populist or People's Party.—In December, 1889, a meeting of the Farmers' and Laborers' Union of America was held at St. Louis, Mo., for the purpose of consolidating the various bodies of organized farmers which had been formed at different times and places in the United States since 1867, and which were known

POPULATION OF THE UNITED STATES AT TEN-YEAR INTERVALS BETWEEN 1790 AND 1910, AS SHOWN BY THE FEDERAL CENSUS, TOGETHER WITH ESTIMATES FOR JULY 1, 1915, AND 1917, BASED ON INCREASES SHOWN FROM 1900 TO 1910.

under the general name of Grangers (q. v.). The consolidated body was called the Farmers' Alliance and Industrial Union. On Dec. 2, 1890, a national convention was held at Ocala, Fla. Thirty-five States and Territories were represented by 163 delegates. Independent political action was decided upon, and a platform was adopted advocating free silver, the sub-treasury plan, equal taxation, a graduated income tax, election of President, Vice-President, and Senators by direct vote, and prohibition of alien ownership of land.

The second convention was held at Cincinnati, Ohio, May 19, 1891. Thirty States and Territories were represented by 1,418 delegates. At this convention the Ocala platform was heartily indorsed and the name People's party was adopted. A third national meeting was held at St. Louis, Mo., in February, 1892. It was decided to put in the field candidates for President and Vice-President, and on July 2, 1892, a national body of delegates met at Omaha, Neb., and nominated Gen. James B. Weaver, of Iowa, for President, and James G. Field, of Virginia, for Vice-President. Weaver obtained a popular vote of 1,041,028 and an electoral vote of 22.

In 1896 the People's party met at St. Louis, Mo., and nominated for President William J. Bryan of Nebraska, and for Vice-President Thomas E. Watson, of Georgia. Mr. Bryan had been previously nominated for the Presidency by the Democratic party. In the popular vote the Bryan and Watson ticket (straight Populist) received 245,728 votes, and Bryan and Sewall ticket (Democratic and straight fusion ticket) 6,257,198 votes. In the electoral college McKinley and Hobart (Republican candidates) received 271 votes, Bryan, 176, Sewall 149, and Watson 27. On May 10, 1900, a convention of the fusion wing of the party met at Sioux Falls, S. D., and nominated William J. Bryan for President and Charles A. Town for Vice-President. Mr. Town withdrew in favor of Adlai Stevenson, the Democratic candidate, and on Aug. 28th the executive committee nominated Mr. Stevenson. The anti-fusion wing of the party met at Cincinnati on May 10th and nominated Wharton Barker for President and Ignatius Donnelly for Vice-President. The Democratic and fusion nominees received 6,374,397 popular votes and 155 electoral votes. The anti-fusion (middle of the road) wing of the People's party received 50,373 popular votes. In 1904 the People's party nominated Thomas E. Watson for President and Thomas H. Tibbles for Vice-President and they received 120,903 votes. In 1908 Watson and Samuel Williams of Indiana were nominated to head the ticket. The vote this year fell to 33,871.

Pork-Barrel.—A term applied, in comparatively recent years, to the Congressional appropriations for local improvements, with the insinuation that they are not vital to the cause of the country, but that they are obtained as a result of "log-rolling" (q. v.) and favoritism, and for the purpose of impressing constituents with the importance of their Congressmen or Senators,—such as appropriations for rivers and harbors, post-office buildings, etc.

Pork Products. (See Animals and Animal Products.)

Port Gibson (Miss.), Battle of.—On the night of April 16, 1863, the Federal gunboats under Admiral Porter succeeded in running past the batteries at Vicksburg. Grant ordered Sherman to make a feint on the Confederate batteries at Ilnaines Bluff,

above Vicksburg, while Porter covered the landing of McClernand's and McPherson's corps at Bruinsburg, a few miles below Grand Gulf. Immediately upon landing McClernand pushed forward toward Port Gibson. A march of eight miles brought him in sight of the Confederates, whom he forced back until dark. The next day (May 2) the Confederates held a strong position, which they stubbornly defended. That night the troops slept on their arms. During the night the Confederate forces retired across the Bayou Pierre, pursued next day by McPherson's corps. The Federal loss was 131 killed, 719 wounded, and 25 missing—a total of 875. One thousand prisoners and 5 cannon were taken from the Confederates.

Port Hudson (La), Surrender of.—As early as August, 1862, Confederates began to fortify Port Hudson, a point on the Mississippi River in Louisiana, at the terminus of the Clinton and Port Hudson Railroad, twenty-five miles above Baton Rouge and one hundred and forty-seven above New Orleans. Dec. 14, 1862, Maj.-Gen. N. P. Banks took command of the Department of the Gulf, and in March, 1863, made a demonstration against Port Hudson while Farragut's fleet attempted to run the batteries to assist Porter in the naval investment of Vicksburg. The attempt was a failure. May 26, 1863, Banks again invested Port Hudson, and was reinforced by Maj.-Gen. Augur, Brig.-Gen. T. W. Sherman, and Gen. Welzel, increasing his forces to 12,000 men. An unsuccessful assault was made on the 27th, which showed the place to be strongly fortified. Banks lost 2,000 men in the assault. June 14 a second assault was made after a bombardment of several days by Farragut's fleet. This was also repulsed, with a loss of 700 killed and wounded. Banks now invested the place by a series of approaches. July 6 the news of the surrender of Vicksburg reached Port Hudson, and three days later Gardner surrendered, with 6,340 men and 51 guns. Besides, the garrison lost about 500 prisoners or desertors before the surrender, and about 700 killed and wounded.

Port Republic (Va.), Battle of.—June 9, 1862, the morning after the skirmish between the forces of Ewell and Frémont at Cross Keys, Jackson drew in Ewell, crossed the branch of the Shenandoah, and destroying the bridges cut off two brigades of Shields's advance from Frémont, defeated them in battle, and captured some 450 prisoners and 800 muskets.

Port Royal (S. C.), Expedition to.—Oct. 29, 1861, a strong naval and military expedition left Hampton Roads under command of Commodore Samuel F. Du Pont and Gen. Thomas W. Sherman. The first was composed of the steam frigate *Wabash*, fourteen gunboats, twenty-two first-class and twelve smaller steamers, and twenty-six sailing vessels. The land forces under Sherman consisted of thirteen regiments of volunteers, forming three brigades and numbering 10,000 men. After a tempestuous voyage the fleet arrived off Port Royal, S. C., Nov. 3. Upon each side of the mouth of the Broad River is an island on which the Confederates had built forts. On Bay Point Fort Beauregard mounted twenty-three guns, and on Hilton Head, opposite, Fort Walker had six, some of them of the largest caliber. A fleet of eight steamers lay inside the harbor. The guns of the fort were fully manned by 1,700 South Carolinians, and a field battery with 500 men supported one of them. On the 7th Du Pont brought his gunboats into action. He manœuvred his fleet

in a circle around the harbor between the forts, firing broadsides as he passed the Confederate batteries. His shells wrought havoc in the works, but the moving ships were little damaged. For four hours the battle raged, when the garrison retreated leaving everything behind. Forty-three guns were captured. Hilton Head was made the center of later naval operations.

Port Royal, S. C., blockade of, removed by proclamation, 3290.

Portage Lake, Mich., act authorizing establishment of new harbor lines in, returned, 5506.

Portland Company, bill for relief of, vetoed, 5527.

Porto Rico.—The island of Porto Rico, over which the flag of the United States was raised in token of formal possession on October 18, 1898, is the most eastern of the Great Antilles in the West Indies and is separated on the east from the Danish Island of St. Thomas by a distance of about fifty miles, and from Haiti on the west by the Mona passage, seventy miles wide. Distances from San Juan, the capital, to important points are as follows: New York, 1,411 miles; Charleston, S. C., 1,200 miles; Key West, Fla., 1,050 miles; Havana, 1,000 miles.

The island is a parallelogram in general outline, 108 miles from the east to the west and from 37 to 43 miles across, the area being about 3,600 square miles, or somewhat less than half that of the State of New Jersey (Delaware has 2,050 square miles and Connecticut 4,990 square miles). The population according to an enumeration made by the United States Government in 1900 showed a population of 953,243, of whom 589,426 are white and 363,817 are colored. The density was 260 to the square mile in 1900; 83.2 per cent of the population could not read. The population in 1910 is reported as 1,118,012.

Porto Rico is unusually fertile, and its dominant industries are agriculture and lumbering. In elevated regions the vegetation of the temperate zone is not unknown. There are more than 500 varieties of trees found in the forests, and the plains are full of palm, orange, and other trees. The principal crops are sugar, coffee, tobacco, and maize, but oranges, bananas, rice, pineapples, and many other fruits are important products. The largest article of export from Porto Rico is sugar. The next is tobacco. Other exports in order of amount are coffee, fruits, molasses, cattle, timber, and hides.

The principal minerals found in Porto Rico are gold, carbonates, and sulphides of copper and magnetic oxide of iron in large quantities. Lignite is found at Utuado and Moca, and also yellow amber. A large variety of marbles, limestones, and other building stones are deposited on the island, but these resources are very undeveloped. There are salt works at Guanica and Sallua on the south coast, and at Cape Rojo on the west, and these constitute the principal mineral industry in Porto Rico.

The principal cities are Mayaguez, with 16,939, Ponce, 35,027 inhabitants; and San Juan, the capital, with 48,716. The shipments of domestic merchandise from the United States to Porto Rico, year ending June 30, 1913, were \$32,223,191. The exports of domestic merchandise to the United States were \$40,529,665. The foreign trade, year ending June 30, 1913, was: Imports, \$3,745,057; exports, \$8,564,942.

An act providing for a civil government for Porto Rico was passed by the Fifty-sixth Congress and received the assent of the President April 12, 1900 (page 6678).

Under this act a civil government was established which went into effect May 1, 1900. There are two legislative chambers, the Executive Council, or "upper house," composed of the Government Secretary, Attorney-General, Treasurer, Auditor, Commissioner of the Interior, and Commissioner of Education, and five citizens appointed by the President, and the House of Delegates, or "lower house," consisting of thirty-five members, elected by the people. The island is represented in the Congress of the United States by a Resident Commissioner.

President Roosevelt in messages to Congress Dec. 5, 1905 (page 7018), Dec. 3, 1906 (page 7051), Dec. 3, 1907 (page 7104) and Dec. 8, 1908 (page 7233) recommended the granting of United States citizenship to the Porto Ricans, and a bill was introduced in the Sixty-second Congress providing for the same, but failed to reach a final vote.

The Legislature of 1912 enacted a sanitation law establishing an insular board of health, and a general sanitary organization, provided a bureau of labor, and authorized investment by the treasurer of \$200,000 in first mortgage bonds of a corporation to be organized for the construction of a modern hotel in San Juan. It also authorized a bond issue of \$500,000 in connection with port improvement at San Juan. The Legislature of 1913 provided for the retirement on three-quarter pay of the Justices of the Supreme Court of the island after ten years' service, and upon reaching sixty-five years of age, and ordered the establishment of an insular hospital in each of the seven districts in which the island is divided, for those suffering from transmissible and contagious diseases.

Portsmouth, Treaty of.—A treaty of peace between Russia and Japan, at Portsmouth, N. H., Sept. 5, 1905, bringing to a close the war that had been waged between those two countries since Feb. 11, 1904.

Shortly after the battle of the Japan Sea, May 27-29, 1905 (see Japan), President Roosevelt, after conference with the Russian Ambassador and the Japanese Minister, sent identical notes to the Governments of the two countries, urging them to begin direct peace negotiations with each other, and offering the services of the United States in bringing their envoys together. Japan accepted the proposition two days later, and Russia within a week. Various places were proposed for the meeting: Paris, The Hague, Chefoo, Geneva, and Washington. As the summer heat made the latter place unsuitable, the United States Government offered the use of a building at the United States Navy Yard, at Portsmouth, N. H., and the offer was accepted. The envoys appointed were, on the part of Japan, Baron Komura, Minister of Foreign Affairs, and Kogoro Takahira, Minister to the United States; and on the part of Russia, Count Sergius Witte and Baron Rosen, Ambassador to the United States.

On Aug. 5 the envoys assembled on the United States cruiser, *Mayflower*, near Oyster Bay, L. I., and were introduced by President Roosevelt. The sessions of the conference began Aug. 9, when the Japanese presented their terms: I. Recognition by Russia of the preponderating influence of Japan in Korea; II. Simultaneous evacuation of Manchuria by Russia and Japan; III. Transfer to Japan of the Russian leases of Port Arthur and Dalny; IV. The return of Manchuria to China according

to the previous agreement between Russia and China; V. The cession of Sakhalin Island to Japan; VI. The transfer to Japan of all public property in Port Arthur and Dalny, rights of private property to be respected; VII. The transfer to Japan of the Manchurian railroad between Port Arthur and Dalny and Harbin; VIII. Russia to retain the main line in Vladivostok; IX. The reimbursement of Japan for the expenses of the war; X. The surrender to Japan of the Russian warships interned at neutral ports; XI. Limitation of Russia's naval strength in the Pacific; XII. Fishing rights for citizens of Japan in Russian waters.

To some of these Russia agreed at once; but the questions of indemnity and the cession of the Island of Sakhalin still remained open, and by the 19th of August the negotiations seemed certain to end in failure. The pressure of neutral nations, brought to bear on both parties, and especially the influence of President Roosevelt, led to a compromise. Japan waived the question of indemnity, and withdrew her demand for the interned warships; while Russia consented to the surrender of the southern half of the Island of Sakhalin. Each nation agreed to pay the cost of the maintenance of its prisoners of war, an arrangement much to the advantage of Japan. An agreement was reached August 29, and the formal treaty was signed Sept. 5, 1905. Ratifications of the treaty were exchanged on Oct. 14, 1905. (See also Japan.)

Portugal.—Continental Portugal occupies part of the maritime district of the Iberian Peninsula, between 6° 15'-9° 30' W. longitude, and 37°-42° 8' N. latitude, and is bounded on the north and east by Spain, and on the south and west by the Atlantic Ocean. The Azores and Madeira Islands form an integral part of Portugal for administrative purposes.

Physical Features.—Portugal is generally hilly, but with no great heights, and there are many plains. The principal rivers are Douro, Tagus, Guadiana and Minho. The climate is equable and temperate, the southwestern winds bringing an abundant rainfall. Lisbon has an annual mean temperature of 61° F., but there is a difference of 50° F. in the extremes.

History.—From the close of the eleventh century until the revolution of 1910 the government of Portugal was a monarchy, and in the year 1500 the King of Portugal was "Lord of the conquest, navigation, and commerce of India, Ethiopia, Arabia and Persia," the territories of the Empire including also the Vice-Royalty of Brazil, which declared its independence in 1822 (see Brazil). In 1910 an armed rising drove the King and the Royal family into exile, effected a separation of Church and State and set up a Republic.

Government.—The National Assembly of Aug. 21, 1911, sanctioned the Republic and adopted a Constitution, with a President elected by Congress for four years, a Congress of two Chambers, and an Executive appointed by the President but responsible to the Legislature. The Republic was formally recognized by the Powers on Sept. 11, 1911. President of the Republic (Aug. 24, 1911-1915), Dr. Manoel d'Arriaga. There is a Congress of two houses, the Senate and the Chamber of Deputies. The Senate consists of seventy-one members, elected by the Municipal Councils of the Republic for six years, one-half renewable every three years. The Chamber of Deputies (or National Council) consists of 164 members, elected by direct vote for three years.

There are Courts of first instance in each

of the 193 judicial districts or comarcas, with Courts of Appeal (tribunaes de relacao) at Lisbon and Oporto and at Ponta Delgada in the Azores. There is a Supreme Court of Appeal at Lisbon.

The Republic is divided into twenty-one Districts (Continental Portugal seventeen, Azores three, Madeira one), governed by an appointed Governor, a District Auditor and an elective council of three members.

In 1911 there were 41,197 foreigners resident in Portugal, of whom 20,517 were Spanish, 12,143 Brazilians, 2,516 British, 1,832 French, 1,645 Americans.

For the army see Armies of the World and for the navy see Navies of the World.

Production and Industry.—The principal products are wheat, barley, oats, maize, flax and hemp, while the vine is extensively cultivated, the best wine being produced in the elevated tracts, and the commoner kinds in the low-lying country. In the plains and lowlands rice, olives, oranges, lemons, citrons, figs, and almonds are abundantly grown. The vine and the olive are the chief branches of industry, the rich red wine known as "port" being grown in the Paiz do Vinho and carried down the Douro partly in sailing vessels but mainly by rail, for shipment at Oporto. The Live Stock (1910) included cattle, sheep, pigs, and horses.

There are extensive forests of oak, chestnut, scapine, and cork, covering nearly 27 per cent of the cultivated area of the country, and cork products are largely manufactured for export, while the wine trade requires much timber for the numerous cooperages, much of which, however, is imported from abroad.

The value of the fish landed annually is about 6,000,000 milreis, including tunny fish and sardines and fresh water salmon, 8,298 vessels employing 26,892 men, are engaged in the deep-sea and coast fisheries.

Education.—Primary is free and nominally compulsory between the ages of seven and fifteen, but attendances are not strictly enforced, and over 75 per cent of the population above seven years old are illiterate. The University of Coimbra (founded in 1291 at Lisbon and transferred to Coimbra in 1527) has a library of 150,000 volumes. In 1910 there were 1,100 matriculated students at the University.

Finance.—The average annual revenue for the five years ending with 1913 was 72,000,000 escudos, and the expenditure for the same time averaged 76,000,000 escudos. The escudo, the unit of value, is the ancient milreis, and is equivalent to \$1.08 United States money. The debt was stated on Jan. 1, 1913, at \$64,018,000, with carrying charges of \$21,701,000.

Railways, etc.—In 1910 there were 1,760 miles of railway open and working, of which 680 miles were State owned. The principal lines cross the Spanish border to the ports of Lisbon and Oporto, and a coastal system runs from the northern boundary to Faro on the south coast. The principal waterways are the Lower Tagus and the Douro, the latter traversing the wine district, which provides most of the traffic.

Cities.—Capital, Lisbon, on the Tagus. Population (1911) 435,359. Oporto had a population (1911) of 194,664. There are no other large cities.

Trade with the United States.—The value of merchandise imported into Portugal from the United States for the year 1913 was \$4,167,158, and goods to the value of \$6,870,223 were sent thither—a balance of \$2,703,065 in favor of Portugal.

PORTUGUESE INDIA has an area of 1,470 square miles, with an estimated population of 605,000. The Portuguese dominions consist of Goa on the western coast of India, about 265 miles southeast of Bombay; Damão, on the east side of the Gulf of Cambay, and of Diu, a town and fort on an island on the west side of the same gulf. These settlements form a single administrative province under a Governor-General.

MACAO is a settlement on the western side of the estuary of the Canton River, occupied by the Portuguese in the sixteenth century, and finally ceded by China in 1887.

PORTUGUESE TIMOR consists of the northern portion of Timor, a large island in the Malay Archipelago, of an enclave on the northwest coast of the island, and of the neighboring island of Pulo Cambing, with area of 7,450 square miles, and an estimated population of 300,000.

CAPE VERDE ISLANDS are an archipelago of the west African coast, between 14° 47'–17° 13' N. latitude and 22° 40'–25° 22' W. longitude, consisting of twelve islands. They were settled by the Portuguese, who imported negroes from the African coast to work the plantations, slavery being finally abolished in 1876. The inhabitants are mainly negroes and mulattoes, who speak a debased form of Portuguese, and belong to the Roman Catholic Church. Coffee is the principal product, maize, millet, sugar cane, manioc, oranges, tobacco and cotton being also grown. The exports are coffee, physicums, millet, sugar, spirits, salt, live animals, skins and fish: the imports being coal, textiles, food stuffs, wine, metals, tobacco, pottery, machinery and vegetables.

PORTUGUESE GUINEA extends along the west coast of Africa between the Casamand district of Senegal (French) and French Guinea. The settlement includes also Orango, Bolama, Bissao and other islands, and has a total area of about 14,000 square miles, with an estimated population of 300,000 to 500,000, of various negro tribes. The interior is dense forest with palms, ebony and mahogany.

SÃO THOMÉ and **PRINCIPÉ** are two islands in the Gulf of Guinea. The principal product of both islands is cocoa, the exports of which were about one sixth of the world's supply in 1907. Exaggerated reports as to the conditions of indentured laborers stopped the cocoa exports from 1909–1910, but the conditions have now been radically altered.

ANGOLA lies south of the Kongo River in West Africa and extends eastward as far as Rhodesia. The northern boundary is that of the Belgian Kongo, and the southern boundary is continuous with German Southwest Africa.

PORTUGUESE EAST AFRICA lies between German East Africa on the north and Natal on the south. The area is estimated as 300,000 square miles, with population not exceeding 3,200,000, of whom about 10,000 are Europeans. Of the natives, 90 per cent are Bantu negroes. The Province of Mocambique is administered by a Governor-General, with headquarters at Lourenço Marques. Large portions of the territory are leased to the Companhia de Mocambique (headquarters, Beira), the Companhia di Zambezila (Quelimane), and the Companhia do Nyasa (Porto Amelia). The mineral resources include coal and ironstone, malachite, copper, gold, petroleum and bitumen. The agricultural products are wheat and other cereals, sugar-cane, rice, ground-nuts, coffee and tobacco. The exports are principally rubber, sugar, coal, beeswax, coco-nuts, copra and mangrove bark, ivory, cattle, skins and hides, ground-nuts, cotton, tobacco and gold; the imports being cotton goods, hardware and foodstuffs. The special trade of the Province is about 30,000,000 escudos annually, the transit trade being of approximately the same value, on the way to and from the Transvaal (via Lourenço Marques and Beira).

Portugal (see also Lisbon; Oporto):

Blockade established by, claims of United States growing out of, 1098, 1113, 1243.

Brazil, questions with respecting escape of insurgent Admiral Da Gama, 5956.

Vice-consul of, to United States, exequatur of, revoked, 4038.

Wines of, duties on, referred to, 2127, 2250.

Portugal, Treaty with.—A reciprocal commercial arrangement was made with Portugal in 1900. It provides for a preferential tariff on goods (chiefly wines, their products, and works of art) coming into the United States; and on certain classes of goods (chiefly food-stuffs, machinery, oils, tar, and pitch) entering Portugal, the Azores, and Maderias from the United States. Should the United States at any time impose high duties on crude cork and coffee from Portugal, that country reserves the right to arrest the operation of this convention on three months' notice. Arbitration, extradition and naturalization conventions are also in force.

Post-Office. (See Post-Office Department.)

Post-Offices.—First-class post-offices are those in which the postmaster receives a salary of more than \$3,000 yearly; second class, those in which the postmasters' salaries are between \$3,000 and \$2,000 yearly; third class, those in which the postmasters' salaries are between \$2,000 and \$1,000 yearly; and fourth-class, those in which the postmasters' salaries are below \$1,000 yearly. The salaries of postmasters in the first three classes depend upon the gross receipts of their offices, although third-class postmasters receive an additional three cents for each money order they issue. Fourth-class postmasters receive a commission on the cancellation of stamps in their offices. The scale provides that fourth-class postmasters receive the full amount of their cancellation up to \$50 quarterly, with sliding scales between this amount and cancellation up to \$250 quarterly, and in addition they receive rents of boxes in their offices. (See Post-Office Department.)

Referred to, 1798.

Uniform standard in amount of gross receipts to fix right of community to, recommendations regarding, 5377.

Post-Office Department.—This department of the executive branch of the federal government was established under the Constitution Sept. 26, 1789, but the work then officially taken up by it had been in continuous operation from early colonial times. Up to 1693 the postal service was entirely carried on by the towns and villages. From that year until 1707 it was administered under the patent granted Thomas Neale by the King in 1691. Andrew Hamilton having been appointed Postmaster-General of America, he established a weekly service from Portsmouth, N. H., to Virginia, and so successful was his administration that he has been called "The Father of American posts." He was succeeded by his son, John Hamilton, in 1703.

On Dec. 25, 1774, Postmaster-General Foxcroft announced the end of the British postal system in North America, and on July 26, 1775, nearly a year before political independence was declared, the Continental Congress appointed Benjamin Franklin Postmaster-General of the Colonies. When Franklin was sent to Europe in 1776, Richard Bache, his son-in-law, was made Postmaster-General. In the passage of the postal ordinance of Oct. 18, 1782, which unified all previous postal acts, Congress required the payment of postage in silver or

its equivalent, and newspapers were admitted to transportation in the mails. The rates were fixed at 7.4 cents for single letters carried less than sixty miles; 11.1 cents for distances between sixty and a hundred miles and three cents for each additional hundred miles. It was in this year that the Post-Office Department, in distinction from the postal service, was practically created, and from this time the modern American post-office dates its origin. In the same year Ebenezer Hazard was appointed Postmaster-General. Under his administration an American Atlantic service was established and the domestic service perfected and extended, until, at the end of his term, 1789, there were eighty-five post-offices in the country and 2,399 miles of post-roads, the volume of business being about 300,000 letters a year.

Up to this time the means of transportation had been almost entirely by horseback, but an act of Congress of Sept. 6, 1785, gave the Postmaster-General power to make contracts for the transmission of mail by stage-coach. After the establishment of the Constitution, in 1789, the postal service was for a time carried on under the direction of the Treasury Department, although the postal ordinance of 1782 remained in force until 1792, when a new postal law reforming the postage tariff was passed.

The law permanently and definitely establishing the Department was passed May 8, 1799. In 1810 the office of Second Assistant Postmaster-General was created, a new postage tariff (8 to 25 cents, according to distances for single letters, and one cent each for newspapers not going beyond the State of publication) was established, and the various post-routes connected in one system. In 1811 the Department established a service between Baltimore and Philadelphia in coaches owned by the Government, and two years later the Postmaster-General was authorized to make use of steamboats in the transportation of mail.

The organic law of the Department was again changed in 1825, provision being made for the building of a General Post-Office at the seat of Government, and the Postmaster-General being given great powers in the conduct and development of the service. In 1827 the salary of the Postmaster-General was made \$6,000 a year, the same as that of heads of the other Executive Departments, and two years later he was called to a seat in the Cabinet.

The present extent and recent growth of the service is shown in the following table:

FISCAL YEARS	Number of Post-Offices	Revenue of the Department	Expenditure of the Department	AMOUNT PAID FOR—	
				Compensation of Postmasters	Transportation of the Mail
1900.....	76,688	\$102,354,579	\$107,740,268	\$19,112,097	\$56,374,206

1914.....	56,810	287,931,565	283,543,769	29,968,515	98,002,421
1915.....	56,380	287,248,165	298,546,026	30,400,145	104,701,260
1916.....	55,935	312,057,688	306,204,033	31,135,230	102,189,229

Of the whole number of post-offices at the close of the fiscal year, June 30, 1915, 8,920 were Presidential offices and 47,460 were fourth-class offices.

* The Postmaster-General was not considered a Cabinet officer until 1829.

By the act of July 2, 1836 the accounting was transferred to the Auditor of the Treasury for the Post-Office Department, and it was required that all revenues of the Department be paid into the United States Treasury. Until the passage of this act all postmasters had been appointed by the Postmaster-General, but from this time those whose commissions amounted to \$1,000 or more a year were to be appointed by the President, with the advice and consent of the Senate, for a term of four years. The four assistants are appointed in the same way.

Railway mail service was authorized in 1838.

Postage rates were fixed on a weight basis in 1845, but with distance limitation, half ounce 300 miles, five cents.

Stamps were authorized in 1847. (See Postage, Postage Stamps, Postage Rates.)

Postal Savings Banks were authorized by act of June 25, 1910, and the Parcel Post began operations Jan. 1, 1913.

The money-order system was established on May 17, 1864; and the special-delivery system on Oct. 1, 1883.

The free rural-delivery system was begun in 1897, and two years later the registry system was extended in cities so that letters might be registered at the home of the sender.

For more detailed information as to the scope and activities of the Post-Office Department consult the Index references to the Presidents' Messages and Encyclopedic articles under the following headings:

5376, 5756, 5881, 5971.

Post Roads. (See Mail Routes.)

Postage.—The price established by law to
be paid for the conveyance of a letter
or other mailable matter by a public post.
Rates of postage were fixed by the Con-
tinental Congress in 1789 as follows: Sin-
gle letters under 60 miles, 7.4 cents; be-
tween 60 and 100 miles, 11.1 cents; be-
tween 100 and 200 miles, 14.8 cents, and
3.4 cents for each additional 100 miles.
As early as 1794 a delivery system was
inaugurated, a fee of 2 cents being re-
quired for each letter delivered. In 1814
the rates of postage were increased by 50
per cent, but the old rate was restored in
1816. Mails were first carried on horse-
back, later by stage coach, and in 1834 by
railway. July 7, 1838, Congress declared
every railroad to be a mail route.

The free-delivery system was established
in 1872 in cities of 50,000 population or
over, and in 1887 the system was extended.

Rural Free Delivery.—In 1896 the experi-
ment of free delivery in rural districts was
tried and proved to be a success; since that
date the principle has been adopted and is
being extended all over the country. (See
also Post-Office Department.)

The following table exhibits the growth
of the rural delivery service from 1898 to
1915:

Year	Carriers (Number)	Daily Mileage	Annual Cost
1898.....	148	2,960	\$50,241
1900.....	1,276	28,685	420,433
1901.....	4,301	100,299	1,750,321
1903.....	15,119	332,618	8,051,599
1904.....	24,566	552,725	12,645,275
1905.....	32,055	721,237	20,864,885

Postage Stamps.—An official mark or
stamp affixed to or embossed on letters
sent through the mails as evidence of the
prepayment of postage. Adhesive stamps
were made as an experiment by James
Chalmers in his printing office in Dundee
in 1834, but they were not made public
till November, 1837. In February, 1837,
Sir Rowland Hill proposed a postage stamp
for prepayment of letter postage. In 1840
Mulready's envelope was introduced, bear-
ing an allegorical design of England at-
tracting the commerce of the world, but
this was soon superseded by the adhesive
stamp. Local stamps were in use in var-
ious cities in the United States as early as
1842—in New York, St. Louis, Baltimore,
and Brattleboro. By act of May 3, 1847,
the use of postage stamps was authorized,
and issues of 5 and 10 cent stamps were
made by the Government bearing, re-
spectively, designs of the heads of Frank-
lin and Washington. In 1851 three new
values were added—1, 3, and 12 cents.
From this time till 1860 a complete series
was issued in values from 5 to 90 cents.
In 1869 a new series was brought out in
various designs, such as a horseman, a
locomotive, eagle, steamship, landing of
Columbus, Declaration of Independence,
heads of Franklin, Washington, and Lin-
coln. The series of 1870-72 bore heads of
Franklin, after Ruprecht's bust; Jackson,
after Powers; Washington, after the bust
by Houdon; Lincoln, after Volk; Stanton,
from a photograph; Jefferson, after
Powers's statue; Clay, after the bust
by Hart; Webster, after the Clevenger
bust; Scott, after the bust by Coffee;
Hamilton, after Cerraachi; and Perry, from
Walcott's statue.

At the International Postal Conference
held at Berne, Switzerland, in 1874, the
Universal Postal Union was formed, with
rates of 5 cents per half ounce on all let-
ters passing between the countries compos-
ing the union. In 1875 a 5-cent stamp was
issued for this foreign service, bearing the
head of Jackson, taken from a photograph,
and in 1882 another of the same value
with the head of Garfield. Stamped en-
velopes were issued in 1852 and postal
cards in 1872.

Postal Congress, International, at—
Berne, 4250.

Lisbon, 4938.

Paris, 3387.

New convention adopted by, 4453.

Washington, 6164.

Postal Conventions.—At the instance of
Montgomery Blair, Postmaster-General of
the United States, an international confer-
ence of postal delegates was held at Paris,
in May and June, 1863. Hon. John A.
Kasson represented the United States. The
objects of the conference were to facilitate
postal intercourse between nations and to

inaugurate a general system of uniform international charges at reduced rates of postage and to form the basis of future conferences. President Johnson, in his third annual message of Dec. 3, 1867 (page 3775), reported the ratification of postal conventions with Great Britain, Belgium, the Netherlands, Switzerland, the North German Union, Italy, and the colonial government of Hong Kong, largely reducing the rates of ocean and land postage to and from and within those countries.

In October, 1874, the general postal union at Berne, Switzerland, reduced international letter postage generally to five cents per half ounce. A third convention for a Universal Postal Union was signed at Paris, June 1, 1878, by John N. Tyner and Joseph H. Blackfan on behalf of the United States. The postal congress at Lisbon in April, 1886, confirmed the international rate of five cents per half ounce for prepaid letters and two cents for postal cards. The next congress was held at Vienna in 1891. President Hayes gave a good idea of the extent of the Postal Convention in his second annual message of Dec. 2, 1878 (page 4453). The rate of postage or letters to foreign countries now is five cents for the first ounce or less (each additional ounce three cents), except Great Britain, Germany, Canada, Cuba and Mexico, where the rate is two cents.

In Canal Zone, order relating to, 7964.

Postal Currency.—During the Civil War, when silver became very scarce, a substitute for fractional currency was invented by Gen. Spinner, United States Treasurer under President Lincoln. It consisted of postage stamps pasted upon paper used for Government securities and representing different sums. These pieces of paper were circulated among the clerks of the Department and became for a while the medium of exchange in a small way.

Postal Matter, abuse of classification of, 6675.

Postal Notes. (See Money-Order System.)

Postal Savings Banks.—To encourage people of small means to deposit their savings where they would be immediately available in emergency, and at the same time be secure from misappropriation while earning a small interest, postal savings banks have been established in most other progressive countries, and in the United States the question was long discussed before being put in operation.

Post-office savings banks were established in England in 1861 to meet the growing wants of the people for a secure and convenient place of deposit for savings.

President Roosevelt said, in his Seventh Annual Address, Dec. 3, 1907 (page 7102): "I commend to the favorable consideration of the Congress a postal savings bank system, as recommended by the Postmaster-General. The primary object is to encourage among our people economy and thrift and by the use of postal savings banks to give them an opportunity to husband their resources, particularly those who have not the facilities at hand for depositing their money in savings banks. Viewed, however, from the experience of the past few weeks, it is evident that the advantages of such an institution are still more far-reaching. Timid depositors have withdrawn their savings for the time being from national banks, trust companies, and savings banks; individuals have hoarded their cash and the workmen their earnings; all of which money has been withheld and kept in hiding or in safe-deposit box to the detriment of prosperity. Through the agency of the postal savings banks such money would be restored to the channels of trade, to the mutual benefit of capital and labor."

In continuation of Mr. Roosevelt's policy and in accordance with the declarations of the platform on which he was elected, Mr. Taft, in his Inaugural Address, March 4, 1909, said (page 7373): "The incoming Congress should promptly fulfill the promise of the Republican platform and pass a proper postal savings bank bill. It will not be unwise or excessive paternalism. The promise to repay by the Government will furnish an inducement of savings deposits which private enterprise cannot supply and at such a low rate of interest as not to withdraw custom from existing banks. It will substantially increase the funds available for investment as capital in useful enterprises. It will furnish absolute security which makes the proposed scheme of government guaranty of deposits so alluring, without its pernicious results."

Congress appropriated \$100,000, June 25, 1910, to start the postal savings system, and named as trustees the Postmaster-General, the Secretary of the Treasury, and the Attorney-General. On Jan. 2, 1911, a selected post-office in each of the forty-eight states was prepared to accept deposits. (See Banks, Postal Savings.)

An act of Congress approved June 25, 1910, authorized the establishment of postal savin^gs depository offices, created a board of trustees, consisting of the Postmaster-General, the Secretary of the Treasury, and the Attorney-General, with power to designate such post-offices as they may select to be postal savings depository offices. Accounts may be opened by the deposit of a dollar or a larger sum in multiples of a dollar, or by purchasing a postal savings card for ten cents and affixing thereto, at convenience, nine specially prepared postal savings stamps costing ten cents each. The holder, on presenting the card, is entitled to open an account with one dollar to his credit. Additional deposits may be made in like manner, but no person may deposit more than \$100 in any one month, and the

balance to the credit of any person shall never exceed \$500, exclusive of accumulated interest. The Treasurer of the United States is treasurer of the Board of Trustees, and five per cent of the deposits are to be deposited with him as a reserve. The funds received at any depository are to be deposited in any local bank willing to receive the same under the terms of the act and pay 2½ per cent interest thereon. The Government pays the depositor 2 per cent on all sums on deposit for one year, computed monthly, and it is assumed that the ½ per cent difference between the amount paid the depositor and the 2½ per cent paid by the bank will pay the cost of administering the law. Provision is also made for converting deposits in postal savings banks, in amounts of \$20 or multiples thereof, into United States bonds bearing interest at 2½ per cent, payable semi-annually. The board may at any time withdraw 30 per cent of the funds and purchase bonds or other securities of the United States, and, under direction of the President, may withdraw the other 65 per cent and similarly invest the amount. At first only one post office in each state was designated as a depository. On Nov. 1, 1911, 4,747 banks had been established. The postal savings banks have done even better than had been expected. Their record is said to surpass even that of the postal savings banks of Great Britain following their opening. Two predictions of their advocates have been fulfilled. First it has encouraged thrift among the young, many children becoming depositors; and, second, it has checked the outflow of money to Europe by foreigners who are suspicious of privately conducted savings banks.

The law of June 24, 1910, was amended on May 18, 1916, to allow deposits up to \$1,000 deposited at any time and in any amount. Government bonds at 2½% purchased with postal savings are not counted toward the limit of \$1,000. On June 30, 1916, postal savings deposits amounted to \$86,619,885, representing 602,937 depositors, with an average deposit of \$142.67. At that time there were provisions for receiving postal savings in 8,421 depositories, including 854 fourth-class post-offices, and 5,634 banks were also authorized to receive postal savings. The postal savings system is under the supervision of the third assistant postmaster-general (q. v.). (See Post-Office Department: Postal Service.)

At the close of the year 1911, there were 5,185 post-offices accepting deposits, and these showed a balance on hand of \$10,614,676. At the end of the next year the report showed 12,177 post-offices accepting deposits, and the total deposits had reached \$28,057,059.

Balance to the credit of depositors June 30, 1911, \$43,444,271; deposits during fiscal year, \$70,314,858; deposits withdrawn during the fiscal year, \$18,074,421; balance to credit of depositors June 30, 1915, \$65,684,708; balances on deposit in banks June 30, 1915, \$60,086,318.94.

Postal Service.—The first mention of a postal service in the United States is that of the General Court of Massachusetts in 1639: "It is ordered that notice be given that Richard Fairbanks, his house in Boston

is the place appointed for all letters which are brought from beyond the seas, or are to be sent thither to be left with him, and he is to take care that they are to be delivered or sent according to the direction. And he is allowed for every letter a penny, and must answer all miscarriages through his own neglect in this kind." Out of this humble beginning grew the present post-office department, with nearly sixty thousand offices, earning a revenue of \$266,619,525 for the past year.

Postmaster-General.—The head of the Post-Office Department, and as such the director of the entire postal service of the country. The postmaster-general has been a member of the Cabinet since 1829, and his salary is \$12,000 a year. By act of June 8, 1872, his tenure of office is during the term of the President by whom he is appointed and for one month thereafter, unless removed with the advice and consent of the Senate. His powers over his department are particularly untrammelled and broad. He appoints all the important officers in his department, except the assistant postmasters-general (q. v.) and the purchasing agent, who are appointed by the President. He makes the contracts with railroad lines, steamship companies and other agents of transportation for the conveyance of the mails; and concludes postal contracts with other countries, although these latter must receive the approval of the President. He adds new post-offices to the list and abandons old ones, according to his judgment; and his discretion is the sole factor in enlarging or contracting the postal system in its various details. (See Post-Office Department.)

Potato.—The so-called Irish potato is native to the west coast of South America, and is said to have been introduced into

Ireland by Sir Walter Raleigh, who grew the roots on his large estate in County Cork. Though now so universal an article of food it was scarcely known prior to the 17th century, and was not generally cultivated until the middle of the 18th.

Prairie Grove (Ark.), Battle of.—Sept. 19, 1862, President Lincoln directed that Missouri, Arkansas, Kansas, and the eastern portion of Indian Territory should constitute the Department of the Missouri, to be commanded by Brig.-Gen. Samuel R. Curtis. The only important engagement that occurred in this department while Curtis was in command was at Prairie Grove, Ark. The Confederate General Thomas C. Hindman was on his way north into Missouri with a large force when, on Dec. 7, 1862, he encountered the united forces of Generals James G. Blunt and Francis J. Herron. During the engagement which ensued the Federals lost 1,148 and the Confederates, 1,317. The latter retired during the night.

Prairie State.—A nickname for Illinois (q. v.). (See also States); sometimes also nicknamed Sucker State.

Prayer, special day of, set apart for nations engaged in war, 8007.

Preachers of Discontent, discussed by President Roosevelt, 7033.

Preemption Laws.—The first law regulating the preemption of and payment for public lands was passed March 3, 1801. It was a special act affecting the Symmes colonization scheme on the Miami River. A number of preemption laws were passed, most of them of a more or less special nature. The first general law was passed in 1830. The law of 1811 granted, in consideration of residence and improvement, freedom of entry upon 160 acres of public lands to any person over twenty-one years of age; twelve to thirty-three months were allowed for payment, and the amount to be paid varied with the situation and value of the tract preempted. (See *Lands, Public*.)

Preemption Laws:

Discussed, 1713, 1753, 3651, 4064, 5484.

Recommended, 1606, 2259.

Amendments to law recommended, 2408, 2500.

Recal of preemption act recommended, 4770, 4837, 5107.

Preparedness.—Few movements in all our history have so gripped the minds and hearts of the American people as the movement for adequate preparation on land and sea, either for aggressive or defensive purposes in case of war. The Preparedness movement cannot be said to have originated among those men in the public eye who for years had been urging the need for a larger army and navy. It originated rather among citizens who formerly had been deaf or antagonistic to the cry for increased appropriations for war purposes; and it originated as a direct result of the European War. For the supreme lesson in military tactics taught by that vast conflict was the impossibility of preparing adequately on short notice, and the necessity for carefully-planned and matured preparations for any new forces which a nation might need at any given time. Preparedness was brought home to America also as a fact, and not a theory, by diplomatic differences between the United States and the belligerent European countries, especially Germany, when the entrance of the United States into the struggle became no longer debatable, and passed from a probability to a certainty.

For the position which the United States occupied among the nations of the world in respect to military strength, see the articles *Armies of the World* and *Navies of the World*. From these tables, it will be understood that the first direction taken by the Preparedness movement was inevitably towards an extensive increase in our land forces. The unwieldiness and the lack of centralized authority in the National Guard, so far as availability for Federal purposes was concerned, were well revealed by the mobilization of troops on the Mexican border in 1916. (See *Mexico*.) The smashing victories of the Teutonic armies early in the European War could be explained only by the attention long paid military preparedness by Germany, while the same explanation arose for the sturdy resistance of the French and the immediate and complete domination of the English Navy over all the seas. On the other hand, the length of time taken by England to get her land fighting-machine under way, despite the most earnest efforts, proved the weakness of a country which waited until the declaration of war in order to prepare. Accordingly, along with the Preparedness movement went a movement for universal military service and for military training in the public schools. (See *Compulsory Military Service* and *Military Training in the Schools*.)

As the danger of America being plunged into the European vortex daily became more acute, the Preparedness movement also devoted itself largely to the question of making our Navy better available for service. The prominent part played by submarines and aeroplanes in the European War had almost revolutionized naval tactics, and grave doubts arose whether our navy, despite its strength, was sufficiently prepared in the newer fields of naval activities.

Preparedness became almost the leading subject of discussion in private as well as in public gatherings all over the United States. The resignation of Secretary of War Garrison on Feb. 10, 1916, because of a difference of opinion with President Wilson concerning the federalization of the National Guard, created intense excitement; and the country was virtually divided into two camps on the issue involved. Many new organizations such as the National Security League and National Defense Society were created in order to assist the preparedness movement, while organizations like the Navy League redoubled their efforts for naval Preparedness. Mass-meetings and parades were held all over the United States in support of Preparedness, and there were few meetings of public or semi-public bodies in which the subject was not discussed. An idea of the amount of interest involved may be gathered from the fact that the great Preparedness Parade held in New York on May 13, 1916 took 12 hours to pass a given point, and consisted of no less than 125,683 men and women marching in support of the cause. Preparedness became a political event of the first magnitude, not only in the national election of 1916, but also in state and municipal elections. One result of the agitation arose in the establishment of a large training camp for volunteers at Plattsburg, N. Y. (q. v.). The motto of the movement was early "In times of peace, prepare for war;" but as the sinking of American vessels by German submarines seemed to many persons to constitute acts of actual warfare, the motto became "In times of war, prepare for war."

On the other hand, the opponents of Preparedness were by no means few or inactive. To some extent, the opposition came from citizens and non-citizens of Teutonic descent, called in this crisis, fairly or unfairly, German-Americans (q. v.); but the majority of the opponents, although not necessarily those most active in the propaganda against Preparedness, were Americans sincerely convinced that Preparedness was the first step towards a war which they wished to avoid. The Women's Peace Party, the Emergency Peace Federation, and the Union Against Militarism were particularly active. The position taken by them and by their supporters was that the European conflict arose from the fact the countries of Europe had been prepared for it. They asserted furthermore that by resorting to Preparedness America was betraying the interests of peace, and was abandoning the position which would logically accrue to her after the war was over as the nation which had shown by her record that she, and she alone, could be entrusted to lead the warring nations to a new and perpetual peace. It was claimed, in addition, that America was geographically not involved in a European quarrel, and that her geographical position made aggression against her an impossibility.

On October 6, 1915, in a speech in New York, President Wilson definitely committed himself to the Preparedness program; and his administration devoted itself to having enacted many measures carrying out the Preparedness idea. The army re-organiza-

Preparedness Messages and Papers of the Presidents

tion act, approved on June 3, 1916, made new and elaborate increases in the army of the United States (q. v.), nor could it be said that the Administration neglected the navy of the United States (q. v.). Many administrative changes in behalf of preparedness, such as the organization of new boards for industrial and scientific integration and preparedness, were made; but even with all this preparation, when the United States finally entered the conflict on April 6, 1917, she was still only partially prepared to assume her burden of the conflict; and many months elapsed in the formation and completion of the plans necessary to place a strong American army on the battlefields of Europe.

Preparedness Means Peace.—A catchphrase much used during the European War, and prior to the President's message of April 2, 1917, asking Congress to declare the existence of a state of war.

Preparedness Societies.—(See Preparedness.) Among the many societies called into existence by or aiding in the Preparedness movement in this country may be mentioned the following: The Navy League, the first preparedness society, with 330,000 members in 1917, which was organized in 1902, to assist in the enactment of laws constantly making for the increased efficiency of the Navy, until it becomes the greatest navy in the world; The Army League, which is organized to promote interest in and legislation for the increased efficiency of the Army; The Universal Military Training League, organized for the establishment of Compulsory Military Service (q. v.) and of a National Defense Commission; the National Security League, which was organized on Dec. 1, 1917, and has an enrollment of 100,000 members in its program for increased military preparation for the United States; the American Rights Committee, organized to end the violation of American rights on the high seas. All these bodies are represented on the National Committee of Patriotic and Defense Societies. (See Preparedness.)

President, The.—Previous to the War of 1812 American commerce had suffered considerably at the hands of British cruisers, which hovered about our coasts and captured many United States vessels bound for France. These cruisers also made many impressments of sailors. In May, 1811, Commodore John Rodgers, commanding the American frigate *President*, was ordered to put to sea from Chesapeake Bay and protect our commerce. When thirty miles off Cape Charles, May 16, Rodgers gave chase to the *Little Belt*, a British frigate. The latter fired upon the *President*, attempted flight, and failed to show her colors. The fire was returned by the *President*, and in eighteen minutes the *Little Belt* was disabled. A dispute arose as to which of the commanders was at fault, but it was never decided, as the discussion was dropped by mutual agreement. In September, 1814, the *President*, under Decatur, was captured by the *Endymion*, and other British vessels.

President of a State.—Some of the earlier organized states provided for a president as the executive head. To avoid misunderstanding and confusion, this was afterwards changed to governor. The first constitutions of Pennsylvania and New Hampshire, adopted in 1776, provided for an executive council of which one member was president. Delaware, South Carolina and the New Hampshire constitution of 1784 provided for a single head, but called him

president. South Carolina in 1778, Pennsylvania in 1790, and Delaware and New Hampshire in 1792 altered the title to governor.

President of United States.—The title of the Chief Executive of the United States. In 1696 William Penn proposed a plan for a general government for the Colonies in America. The plan comprehended a chief executive with the title of president. The Albany Convention proposed that of president-general. The Continental Congress had its president. In the Convention of 1787 it was decided that there should be a single executive to whom the title of president was given. In order to be eligible, the president must be thirty-five years of age, a native-born citizen of the United States, and a resident within the United States for fourteen years. He is elected for a term of four years by electors chosen by the different states. These electors are chosen by direct vote of the people, on ballot tickets usually headed by the names of the candidates voted for as president and vice-president, followed by the names of the electors, who are pledged to vote for these candidates only. (See Electoral Colleges.)

The president's duties and powers under the Constitution are to approve or veto bills; to grant reprieves and pardons for offenses against the United States, except in case of impeachment; to make treaties; to nominate ambassadors and other public ministers, consuls, judges of the Federal courts, etc., and, by and with the consent of the Senate appoint such officers; to fill vacancies that may occur during the recess of the Senate by granting commissions which shall expire at the end of the next session; to convene one or both Houses of Congress, and to adjourn Congress to such a time as he may deem proper in case it can not agree upon an adjournment. He is also commander-in-chief of the army and navy and of the militia of the several states when called into the service of the United States. He is required to give information to Congress from time to time regarding the state of the Union and recommend to its consideration such measures as he shall judge necessary and expedient; receive ambassadors and other public ministers; see that the laws are faithfully executed, etc. He receives a salary of \$75,000 per annum. Up to the time of the ratification of the twelfth amendment (1804) the president and vice-president were not separately voted for, but the candidate for president who received next to the highest number of votes was made vice-president. Jefferson and J. Q. Adams were elected by the House of Representatives, as provided by the Constitution, neither presidential candidate having a majority of the electoral vote.

Title and Term of the President.—The address of the president is simply "The President of the United States." In the First Congress, there was debate over a title and it was proposed by some members that he be addressed as "His Excellency" and by others as "His Highness," but a committee reported that "it is not proper to annex any style or title other than that expressed in the Constitution." In the Constitutional Convention the first report fixed the term of office at seven years without eligibility to re-election. In debate various periods from "during good behavior" to twenty years were favored. The limit to four years was finally adopted in grand committee and ratified by the convention.

Presidential Flag. It is usual in other countries to have a special ensign to designate the presence on a vessel of the ruler of the nation. It was not until lately that

the United States had such a flag. President Arthur suggested it in the early part of 1882, and, as his Cabinet concurred in his suggestion, decided on the design of a blue ground with the arms of the United States in the center. The Navy Department ordered that this flag should be displayed at the mainmast of any vessel that bore the president. Arthur first used it in 1883.

The theoretical model for the President of the United States was the King of England, but the practical model used by the framers of the Constitution was a composite of the colonial governors and the executive heads of states already formed. Popular confidence in Washington was all that prevented further limitation of the powers of the Chief Executive. The ultimate position of the American President was not determined until the end of Jackson's administration. Washington established and maintained the office upon a broad national basis, but even he could not render it strictly nonpartisan. Jefferson first exemplified the methods of a brilliant statesman and a successful party leader. Under the weaker partisanship of his immediate successors the congressional caucus usurped many of the prerogatives of the Executive.

The strong will and determined character of Jackson soon restored the presidency to a position equal to if not superior in power to the legislative and judicial branches of the government. It was during his administration that the congressional caucus declined before the growing power of the national convention, and the development of party machinery based upon executive patronage. This national party machinery later became a source of weakness by securing the election of second-rate party men over first-rate statesmen of unavowed party loyalty.

The arbitrary military powers of the President reached their highest development under Lincoln. As commander in chief of the land and naval forces he declared the existence of insurrection, suspended the civil law and denied the writ of habeas corpus to prisoners hundreds of miles from the scene of the disorder.

The Constitution requires the President to execute the laws and vests in him the power of appointment of executive officers and consequently the power of removal. These, with the veto power, in the hands of a judicious leader give him more power than is wielded by most constitutional monarchs of Europe.

Although the Constitution requires all treaties with foreign powers to be concluded "with the advice and consent of the senate," the President may direct the writing of treaties, and if amended by the Senate against his wishes he need not submit them to the diplomats of other nations. He has the power to recognize the independence of a revolutionary faction in a foreign country and thus establish or destroy a nation.

President of United States (see also the several Presidents):

Act—

Fixing salary of, vetoed, 4334.

Of Congress approved but not signed, whether in force discussed, 836.

Of Congress duly certified and approved which had not passed discussed, 1353.

Providing for performance of duties of, in case of death, etc., of

Vice-President and, returned, 5674.

Appointing power of. (See Executive Nominations.)

Appointment of members of House by, in whose election they have been officially concerned discussed, 1011, 1120.

Appointments of, referred to, 1965.

Arbitration of boundary dispute between Brazil and Argentine Republic submitted to. (See Cleveland, Grover.)

Arbitrator of claim of Italy against Colombia. (See Cleveland, Grover.)

Bills considered by, time allowed for, discussed, 2993, 3060.

Cabinet of. (See Cabinet.)

Civil service extended over employees in office of, 6232.

Communications of, to Congress not to be questioned by foreign power, 1397.

Compensation due, referred to, 889.

Conduct of public officers, request of House for documents concerning, declined, 847.

Constitutional amendment—

Designating officer to succeed, in event of vacancy in Presidency and Vice-Presidency recommended, 3837, 3889. (See also Successor to, *post*.)

Regarding election of, recommended, 1010, 1081, 1120, 1168, 1253, 1336, 1395, 1478, 3838, 3889, 4196, 4397.

Regarding selection of electors recommended, 5644.

Relative to approval of separate items of bill and veto of others recommended, 4196, 4725, 4774, 4840.

Constitutional function as commander of Army, act interfering with, discussed, 3670.

Repeal of, recommended, 3871.

Constitutional meaning of "inability to discharge powers and duties of office of," discussed and recommendations regarding, 4652, 4734, 4774, 4840.

Death of. (See Garfield; Harrison, W. H.; Lincoln; Taylor.)

Discretionary authority of, to—

Invite nations to conference on subject of coinage recommended, 5877.

Retaliate in cases of discriminating duties levied on American vessels recommended, 4763, 5205.

Send delegates to foreign conventions, recommendations regarding, 4714, 4763, 4827, 5546, 6325.

* Elected. (a) The first Republican Party is claimed by the present Democratic Party as its progenitor. (b) No candidate having a majority of the electoral vote, the House of Representatives elected Adams. (c) Candidate of the Anti-Masonic Party. (d) There being no choice, the Senate elected Johnson. (e) Eleven Southern States, being within the belligerent territory, did not vote. (f) Three Southern States disfranchised. (g) Horace Greeley died after election, and Democratic electors scattered their votes. (h) There being a dispute over the electoral vote of Florida, Louisiana, Oregon, and South Carolina, they were referred by Congress to an electoral commission composed of eight Republicans and seven Democrats, which, by a strict party vote, awarded 185 electoral votes to Hayes and 184 to Tilden. (i) Free Soil.

1796.—John Adams, Federalist, 71; Thomas Jefferson, Republican, 68; Thomas Pinckney, of South Carolina, Federalist, 59; Aaron Burr, of New York, Republican, 30; Samuel Adams, of Massachusetts, Republican, 15; Oliver Ellsworth, of Connecticut, Independent, 11; George Clinton, of New York, Republican, 7; John Jay, of New York, Federalist, 5; James Iredell, of North Carolina, Federalist, 3; George Washington, of Virginia; John Henry, of Maryland, and S. Johnson, of North Carolina, all Federalists, 2 votes each; Charles Cotesworth Pinckney, of South Carolina, Federalist, 1 vote. John Adams was chosen President and Thomas Jefferson Vice-President. (b)

1800.—Thomas Jefferson, Republican, 73; Aaron Burr, Republican, 73; John Adams, Federalist, 65; Charles C. Pinckney, Federalist, 64; John Jay, Federalist, 1 vote. There being a tie vote for Jefferson and Burr, the choice devolved upon the House of Representatives. Jefferson

received the votes of ten states, which being the largest vote cast for a candidate, elected him President. Burr received the votes of four States, which being the next largest vote, elected him Vice-President. There were 2 blank votes.

1804.—The Constitution having been amended, the electors at this election voted for a President and a Vice-President, instead of for two candidates for President. The result was as follows: For President, Thomas Jefferson, Republican, 162; Charles C. Pinckney, Federalist, 14. For Vice-President, George Clinton, Republican, 162; Rufus King, of New York, Federalist, 14. Jefferson was chosen President and Clinton Vice-President.

1808.—For President, James Madison, of Virginia, Republican, 122; Charles C. Pinckney, of South Carolina, Federalist, 47; George Clinton, of New York; Republican, 6. For Vice-President, George Clinton, Republican, 113; Rufus King, of New York, Federalist, 47; John Langdon,

Presidential *Messages and Papers of the Presidents*

of New Hampshire, 9; James Madison, 3; James Monroe, 3. Vacancy, 1. Madison was chosen President and Clinton Vice-President, 1812.—For President, James Madison, Republican, 128; De Witt Clinton, of New York, Federalist, 89. For Vice-President, Elbridge Gerry, of Massachusetts, 131; Jared Ingersoll, of Pennsylvania, Federalist, 86. Vacancy, 1. Madison was chosen President and Gerry Vice-President.

1816.—For President, James Monroe, of Virginia, Republican, 183; Rufus King, of New York, Federalist, 34. For Vice-President, Daniel D. Tompkins, of New York, Republican, 183; John Eager Howard, of Maryland, Federalist, 22; James Ross, of Pennsylvania, 5; John Marshall, of Virginia, 4; Robert G. Harper, of Maryland, 3. Vacancies, 4. Monroe was chosen President and Tompkins Vice-President.

1820.—For President James Monroe, of Virginia, Republican, 231; John Q. Adams, of Massachusetts, Republican, 1. For Vice-President, Daniel D. Tompkins, Republican, 218; Richard Stockton, of New Jersey, 8; Daniel Rodney, of Delaware, 4; Robert G. Harper, of Maryland, and Richard Rush, of Pennsylvania, 1 vote each. Vacancies, 3. James Monroe was chosen President and Daniel D. Tompkins Vice-President.

1824.—For President, Andrew Jackson, of Tennessee, Republican, 99; John Quincy Adams, of Massachusetts, Republican, 84; Henry Clay, of Kentucky, Republican, 37; William H. Crawford, of Georgia, Republican, 41. No candidate having a majority of the electoral vote, John Quincy Adams was elected by the House of Representatives. For Vice-President, John C. Calhoun, of South Carolina, Republican, 182; Nathan Sanford, of New York, Republican, 30; Nathaniel Macon, of North Carolina, Republican, 24. Andrew Jackson, of Tennessee, Republican, 13; Martin Van Buren, of New York, Republican, 9; Henry Clay, of Kentucky, Republican, 2; Calhoun was chosen Vice-President.

Presidential Electors.—Persons chosen by the people of the several states to elect the President and Vice President. As a matter of custom, though not of legal requirement, the electors exercise the choice in accordance with the expressed wish of the voters at the polls.

Presidential Electors:

Constitutional amendment regarding selection of, recommended, 5644.

Method of appointment of, and effect of gerrymander discussed, 5643.

(See Electors; Electoral Colleges).

Presidential Primaries.—The presidential primary is a device to enable the voters at large to record their choice for candidates for the presidency. It was little heard of previous to 1911, but in that year it became a leading topic of political discussion. Provisions for the presidential primary exist as statutes in six States—New Jersey, Wisconsin, Nebraska, North Dakota, Oregon, and California. The California law, which is typical of the others, provides that the name of any person may be put upon the ballot at the presidential primary election to be held in May, preceding an election for president, through the filing of a petition signed by one per cent of any party in each Congress district. The chief merit of such a primary, in the opinion of those who support it, would be the practical elimination of the national nominating conventions and the opportunity given the people at large of recording their choice for the presidency. The main objections urged by the opponents of the

presidential primary are that it would intensify factional bitterness and add to the expense of elections. The presidential primary had its chief supporters in 1911 among the members of the progressive wings of both Democratic and Republican parties. An attempt was made to indorse the idea at the meeting of the National Republican Committee held in Washington in December, 1911, but it failed. In addition to the states which have provided for presidential primaries by statute South Carolina and Louisiana observe them as party rules, and some other states have what is equivalent. Pennsylvania delegates to the National Conventions are elected by direct primaries and candidates for delegate are permitted to print on the ballot the name of the candidate for the presidency they wish to support.

Presidential primaries or some equivalent expression of opinion were held in 1912 in California, Illinois, Maryland, Massachusetts, Nebraska, New Hampshire, New Jersey, North Dakota, Ohio, Oregon, Pennsylvania, South Dakota and Wisconsin, and upon the results in these states Mr. Roosevelt based his assertion that he was the people's choice, but it was found that only two-thirds of the voters expressed their choice.

Presidential Succession.—The Constitution provides for the succession of the vice-president in case of the death, removal, resignation, or disability of the president, and gives Congress power to provide what officer shall succeed in case of the death, removal, etc., of the vice-president. In 1793 Congress enacted that in such case the president of the Senate should succeed, and then the speaker of the House of Representatives. This was attended with some inconvenience and danger and there was some doubt of its constitutionality. An act of Congress, approved Jan. 19, 1886, provided that the succession should pass to the members of the Cabinet in the following order: Secretary of State, Secretary of the Treasury, Secretary of War, Attorney General, Postmaster-General, Secretary of the Navy, and Secretary of the Interior. The Secretaries of the Department of Agriculture, and of the Department of Commerce and Labor, whose offices have been created since the passage of the Succession Act, are not eligible for presidential succession. The following Vice-Presidents have succeeded to the Presidency on account of the death of the President: John Tyler, Millard Fillmore, Andrew Johnson, Chester A. Arthur, and Theodore Roosevelt. (See Vice-Presidents, and Cabinet, also Atchison, D. R., in Index.)

Presiding Ladies of the White House.

(See biographies and portraits in text volumes at the beginning of the administrations of the respective Presidents.)

Presque Isle, Pa.:

Obstructions to entrance of harbor of port of, 786.

Title to, proffered by marine hospital of Pennsylvania, 4735.

Press, Freedom of.—The first amendment to the Constitution, introduced in the First Congress, established freedom of speech, religion, and the press. Though the Federal Constitution was originally silent upon the subject, nearly all of the states inserted in their constitutions clauses permitting freedom of speech and publication to every citizen. Abuses of this liberty

were punishable under the common law. New York and New Jersey made no provision in their first constitutions, but clauses were later embodied insuring the widest liberty of expression. During British rule of the Colonies this freedom was much restricted by the star chamber press censorship regulation of 1637, which was confirmed by Parliament in 1643.

Princeton (N. J.), Battle of.—The beginning of the year 1777 found the British army of 7,000 or 8,000 men encamped at Princeton, N. J. On Christmas night, 1776, Washington had turned back his retreating army, recrossed the Delaware, overcome the Hessians at Trenton, and again crossed the Delaware into Pennsylvania. To relieve Cadwalader he again crossed the river and was ready to march upon Princeton. Cornwallis, who had been sent by Howe from New York, advanced to meet him with most of his army. Washington skillfully passed around the left wing of Cornwallis's army, and on Jan. 3, 1777, encountered the British rear guard, consisting of three regiments and three troops. These were scattered, with the loss of about 500. The American loss was 25 or 30, besides officers. Cornwallis retreated to New Brunswick and Washington occupied a strong position at Morristown, remaining there until the latter part of May.

Printing and Engraving. (See Engraving and Printing, Bureau of.)

Printing and Publishing.—At the close of the Revolutionary war the printing trade was carried on almost exclusively in the Atlantic coast cities. The earliest establishments set up in inland cities were at Lexington, Ky., Pittsburg, Pa., and Cincinnati, Ohio. The main printing centers have always been New York, Philadelphia, Chicago and Boston.

The growth of the business has been accelerated by the invention of electrotyping, stereotyping, type-setting machines, the cylinder press and the web press (printing from a continuous roll of paper, instead of separate sheets.) The manufacture of wood pulp paper cheaply in large quantities has also been an important factor. Governmental encouragement, in the form of special rates of transportation by the Postoffice, has always been a large asset of the publishing business.

According to the census of 1910 there were 31,445 establishments engaged in printing books, periodicals, newspapers, music and job work in the United States. These were capitalized at \$588,345,708, and gave employment to 388,466 persons, paying them in wages and salaries an aggregate of \$268,086,431. The value of the output is placed at \$757,876,087.

Printing has been the most generous contributor to human progress, and perhaps the most powerful factor in making the nineteenth century the leader of all centuries in genius and invention. The construction of the 10-cylinder press by Robert Hoe in 1853 was considered one of the greatest steps forward recently made in

printing. The first practical improvement upon typesetting was made by Mergenthaler with his linotype machine, by which a row of brass matrices assembled in a line of desired length by means of a keyboard became the mould in which the writer's words were cast in softer metal ready for the ink and press. Other type-composing machines were invented, and new methods of cutting and casting ornamental styles and sizes of display type gave artistic tone to the printed page.

The greatest advances in press building since 1880 have been made in perfecting presses. These machines are now constructed of such enormous size and with such great capacity that it is possible to obtain at short notice a newspaper press which will produce 100,000 impressions per hour printed in twelve colors.

In 1862 the kind of news paper ordinarily used was made of cotton rags. It was imperfect, poor in color and made in the crudest manner. The price was 24 cents a pound. At present wood pulp paper of uniform quality can be bought for two cents per pound.

The volume of advertising circulars, booklets and pamphlet literature was never before so large or of such mechanical excellence as during the last decade.

Machinery for folding printed sheets, gathering, stitching and building them into book form has been so perfected that the costliest literary treasures of the past generation may be reproduced and placed in the reader's hands today at trifling cost.

A notable feature of the printing industry of the past decade has been the growth of monthly magazines. By sensational articles on timely subjects, wide circulation and enormous sales have been secured. This brought increased advertising, and the transportation of this class of merchandise through the mails at reduced rates granted for the purpose of disseminating learning caused President Taft to call attention to the propriety of increasing the rates to offset a deficit in the Postoffice Department. (See pages 7433, 7528, 7733.)

According to the census classification the printing and publishing industry is made up of three branches, comprising: (1) establishments whose chief business is book and job printing, book printing and publishing, or book publishing only; (2) establishments whose sole or chief business is music printing, or music printing and publishing, or music publishing only; and (3) establishments which are engaged in the printing and publishing, or in the publishing only, of newspapers and periodicals, some of the first-named doing job work also. The number of establishments in this industry in 1914 aggregated 31,612, and the total value of their products amounted to \$810,508,111. Of the 31,612 establishments canvassed for 1914, those engaged in the printing and publishing or in the publishing only of newspapers and periodicals numbered 19,317. Those engaged chiefly in the printing and publishing of books and pamphlets or in job printing, or both, numbered 12,115, and the number engaged solely or chiefly in music printing, or music printing and publishing, or music publishing only, numbered 180. The total value of products reported for 1914, of establishments printing and publishing newspapers and periodicals, was \$495,905,984. The value of products of establishments engaged chiefly in book and job work of all kinds aggregated \$307,330,861 in 1914. The value of products of establishments engaged chiefly in music printing and publishing in 1914 aggregated \$7,271,266. The value of products of the newspaper and periodical branch of the industry formed 61.2 per cent of the total in 1914; of the

book and job branch, 37.9 per cent; and of the music printing and publishing branch, nine-tenths of 1 per cent. The daily newspaper, according to the census definition, is a publication issued on each of the secular days of the week, Sunday editions being excluded. A morning and an evening paper issued by the same plant are counted as two papers. A total of 2,580 dailies was reported for 1914. The aggregate circulation of the dailies in 1914 was 28,436,030. The number of Sunday papers published in the United States in 1914 was 570, as compared with 520 in 1909; and their combined circulation in the later year, 16,445,820, represented an increase of 23.2 per cent as compared with the corresponding figure for the earlier year. The number of weekly newspapers and periodicals reported for 1914, 15,166, shows a slight increase as compared with the corresponding number in 1909, 15,097. The 1914 circulation of such publications was 59,454,738, an increase of 23.6 per cent as compared with 1909.

Privateers.—Armed vessels owned and officered by private persons, but acting under commissions from the government known as letters of marque. It was formerly the custom of all nations in time of war to legalize private vessels to assist the regular navy in blockading the ports of an enemy, intercepting supplies, and capturing prizes. Vessels so employed are called privateers and are supplied with letters of marque on condition of their conforming to the rules and usages of war. Herein lies the difference between privateers and pirates (q. v.). These vessels and crews may be hired or impressed by the government or they may be owned, officered, and sent to sea at private expense under government commission. The latter has been a favorite way of employing sailors and merchant ships when commerce has been hampered by war, and to a nation with a small navy it affords protection against formidable naval foes.

The practice of privateering has long been looked upon as an evil by the most advanced nations. At the Declaration of Paris in 1856 (q. v.) one of the rules of warfare subscribed to was that "privateering is and remains abolished." The United States refused to agree to this clause of the declaration on the ground that without privateers it would have no adequate sea force in time of war. As the agreement was only binding on parties thereto, American commerce was left a prey to the ships of all other nations. In 1861 Secretary Seward, on behalf of the United States, made an offer to England and France to come under the operation of the rules of war subscribed to in the Declaration of Paris, but the offer was refused on the ground that it would impose an international rule of warfare upon the Confederate States then in rebellion. In the colonial wars Great Britain derived much support from colonial privateers. Upward of 400 were fitted out and ravaged the French West Indies and made numerous captures along the coast of France.

In March, 1776, the Continental Congress accorded permission to citizens to fit out privateers against the British. During that year 342 British vessels fell a prey to privateers fitted out at Salem, Cape Ann, Newburyport, Bristol, and other seaports. This sort of warfare became so lucrative that sailors could hardly be induced to enter the regular service. Jan. 28, 1778, an American privateer surprised and captured the British fort of New Providence, in the Bahamas, and a 16-gun man-of-war. During the War of 1812 some 500 privateers were fitted out. They were mostly schooners or brigs of 200 or 300 tons and carried from 80 to 100 men. Of 400 British vessels captured in 1813 four-fifths were taken by privateers. Later in this war larger vessels like the *Reinder*, *Iron*, and *Blackden* were built. They did not

confine themselves to merchant vessels, but attacked and frequently captured British war ships. They hung about the coasts of Great Britain, Ireland, and the Canary and West Indian Islands, and greatly aided the American cause.

Prize Agents, accounts of, referred to, 773, 816.

Prize Court (International), ratified by United States, 7670.

Prize Courts.—Courts which adjudicate the property in vessels captured at sea from a belligerent. The general rule is that when a captor brings home a prize the tribunal of his own country has sole jurisdiction over it and the decision rendered is binding everywhere. A prize court differs from other courts in that the property of foreigners is brought within its jurisdiction, not voluntarily, as in ordinary courts, but by force. During the colonial wars prize cases were adjudged by the admiralty courts held by colonial governors as vice-admirals, or by judges whom they appointed, with appeal to commissioners in England. With the outbreak of the Revolution the states established admiralty courts to hear prize cases. The Continental Congress established a court of appeals for such cases when in dispute between the states. Under the judiciary act of 1789 the United States district courts were made prize courts, with appeal to the Supreme Court.

Prize Money.—A dividend from the proceeds of a captured vessel and her cargo, etc., paid to the captors. Prior to March 3, 1899, prize money in the United States was distributed according to an act of June 30, 1864. If the prize was equal or superior to the captor, it became the sole property of the latter. If inferior, the United States took half and the captors divided the remainder. Privateers with letters of marque kept the whole of the prize unless otherwise stipulated in their commissions. By the Navy personnel act of March 3, 1899, the law authorizing the distribution of prize money among the captors of vessels was repealed.

Prize Money referred to, 2570.

Pro-Ally.—Favoring the Entente Allies (q. v.) in the European War, or a person favoring them.

Pro-German.—Favoring Germany in the European War; a person who favors Germany in the European War.

Pro-Teuton.—Favoring the Teutonic powers in the European War as against the Allies (q. v.); pro-German (q. v.).

Proclamations. (See the several Presidents or the several subjects.)

Products. (See Agricultural Products; Animals and Animal Products.)

Progressive Labor Party.—At the annual session of the United Labor party held at Syracuse, N. Y., Aug. 19, 1886, the radical or socialistic element withdrew and formed the Progressive Labor party. They advocated a common inheritance of land, wealth, and industries and upheld all the tenets of extreme socialism.

Progressive Party.—Theodore Roosevelt having been defeated for the Republican nomination for President at the hands of the National Convention in June, 1912, called a convention of his own followers

and people in general who were dissatisfied with the Republican party and its managers to meet in convention in Chicago in August, 1912. This convention formed the Progressive party and nominated Mr. Roosevelt for President and Hiram W. Johnson, of California, for Vice-President.

They adopted a platform declaring in favor of direct primaries; nation-wide Presidential preference primaries; direct election of United States Senators; the short ballot and the initiative, referendum, and recall in the States; a more easy and expeditious method of amending the Federal Constitution; the bringing under effective National jurisdiction of those problems which expand beyond the reach of the individual States; equal suffrage for men and women; limitation of campaign contributions and expenditures, and publicity before as well as after primaries and elections; laws requiring the registration of lobbyists, publicity of committee hearings, and recording of all votes in committee; prohibiting Federal appointees from taking part in political organizations and political conventions.

Popular review of judicial decisions on laws for securing social justice; the review by the Supreme Court of the United States of decisions of State courts declaring legislative acts unconstitutional; the reform of legal procedure and judicial methods; the prohibition of the issuance of injunctions in labor disputes when such injunctions would not apply if no labor dispute existed, and jury trial for contempt in labor disputes except when the contempt was committed in the presence of the court; effective legislation looking to the prevention of industrial accidents, occupational diseases, overwork, involuntary unemployment, and other injurious effects incident to modern industry; the fixing of minimum safety and health standards for the various occupations and the exercise of the public authority to maintain such standards; the prohibition of child labor; minimum wage standards for workingwomen, to provide a "living wage" in all industrial occupations; the general prohibition of night work for women and the establishment of an eight-hour day for women and young persons.

One day's rest in seven for all wage-workers; the eight-hour day in continuous twenty-four-hour industries; the abolition of the convict contract labor system; substituting a system of prison production for governmental consumption only, and the application of prisoners' earnings to the support of their dependent families; publicity as to wages, hours, and conditions of labor; full reports upon industrial accidents and diseases, and the opening to public inspection of all tallies, weights, measures, and check systems on labor products; standards of compensation for death by industrial accident and injury and trade-disease which will transfer the burden of lost earnings from the families of working people to the industry, and thus to the community; the protection of home life against the hazards of sickness, irregular employment, and old age, through the adoption of a system of social insurance adapted to American use; the establishment of continuation schools for industrial education; industrial research laboratories; a Department of Labor; the development of agricultural credit and cooperation; the encouragement of agricultural education; the establishment of a Country Life Commission; full and immediate inquiry into the high cost of living, and immediate action dealing with every need disclosed thereby.

A National Health Service; establish-

ment of a strong Federal administrative commission to maintain permanent active supervision over industrial corporations, as the Government now does over National banks and, through the Interstate Commerce Commission, over railways; the strengthening of the Sherman Law by specific prohibitions; the enactment of a patent law to prevent the suppression or the misuse of patents in the interest of injurious monopolies; giving the Interstate Commerce Commission the power to value the physical property of railways; the abolition of the Commerce Court; prompt legislation for the improvement of the National currency system which shall give the Government full control over the issue of currency notes; the appointment of diplomatic and consular officers solely for fitness and not for political expediency; the retention of forest, coal, and oil lands, water and other natural resources in the ownership of the Nation; a vigorous good roads campaign through the construction of National highways; the extension of the rural free delivery service.

The retention of the natural resources of Alaska in ownership by the Nation, and their prompt opening to use upon liberal terms requiring immediate development; for Alaska the same measure of local self-government that has been given to other American territories; the comprehensive development of waterways; the operation of the Panama Canal so as to break the transportation monopolies now held and misused by transcontinental railways; a protective tariff which shall equalize conditions of competition between the United States and foreign countries both for the farmer and the manufacturer, and which shall maintain for labor an adequate standard of living; an immediate downward revision of the tariff; a non-partisan, scientific tariff commission; a graduated inheritance tax.

The ratification of the Amendment of the Constitution giving the Government power to levy an income tax; introduction of judicial and other peaceful means of settling international differences; an international agreement for the limitation of naval forces, and, pending such an agreement, the maintenance of the policy of building two battleships a year; protection of the rights of American citizenship at home and abroad; governmental action to encourage the distribution of immigrants, and to supervise all agencies dealing with them, and to supervise and promote their education and advancement; a wise and just policy of pensioning American soldiers and sailors; a parcel post, with rates proportionately to distance and service; the rigid enforcement and extension of the Civil Service Act; a readjustment of the business methods of the National Government, and a proper coordination of the Federal bureaus; governmental supervision for the protection of the public from fraudulent stock issues.

At the presidential election the following November the party polled a popular vote of more than 4,119,507 votes, carrying the States of Michigan, Minnesota, Pennsylvania, California, South Dakota and Washington, thus winning 88 electoral votes. This split of the Republican vote resulted in the election of Wilson, the Democratic candidate, to the presidency.

No presidential candidate was nominated in 1916.

During July the greater part of the Progressive party followed the lead of Col. Roosevelt and the national committee in endorsing Hughes for the presidency. Local organization in several states, however, re-

fused to be reconciled. John M. Parker, vice-presidential nominee of the Progressive convention held in Chicago in June, issued a call for a new Progressive ticket July 15, to be drawn up at a convention scheduled to open in Chicago Aug. 5. He declared:

"The Bull Moose led his loyal followers into the wilderness—and there deserted them. Let us eternally bury their emblem, and adopt as the new emblem of the progressive party the national bird, the American eagle, which will always be a patriotic inspiration to look upward, and a constant reminder to be true to those sterling principles which have made America great, and brought to this country the bravest and most adventurous spirits of the Old World. These, and their descendants, are truly loyal and patriotic Americans."

The insurgent element was successful at the Syracuse meeting of the New York state committee, July 22, and managed to prevent an endorsement of Hughes. The insurgents then made preparations for a second Bull Moose National Convention in Chicago on August 5.

Plans for the reorganization and perpetuation of the Progressive Party as a national political organization were adopted at Indianapolis, August 3, at a conference of Progressive representatives. The conference decided against reassembling the party for a national convention to fill the vacancy on the national ticket, caused by Theodore Roosevelt's declining the nomination for President. Instead, the organization decided to put up an electoral ticket in every State where there is the nucleus of an organization left, bearing the name of John M. Parker of Louisiana, nominee for Vice-President, in the hope of perhaps electing enough presidential electors, who might prove the balance of power in the event of a close contest between the two parties. The endorsement of Hughes was severely criticized by the party leaders.

Prohibition, National.—Prohibition first appeared as a national political issue in 1869, and since 1872 the Prohibition party has placed presidential tickets in the field. The party candidates since 1872 with the popular vote polled have been as follows:

1872—James Black, Pennsylvania...	5,608
1876—Green Clay Smith, Kentucky...	9,522
1880—Neal Dow, Maine.....	10,305
1884—John P. St. John, Kansas....	150,369
1888—Clinton B. Fiske, New York...	249,506
1892—John Bidwell, California....	255,841
1896—Joshua Levering, Maryland...	131,312
1900—John G. Woolley, Illinois....	208,555
1904—Silas C. Swallow, Pennsylv-	
ania.....	258,838
1908—Eugene W. Chafin, Illinois....	211,252
1912—Eugene W. Chafin, Arizona...	207,928
1916—J. Frank Hanly, Indiana....	225,101

In 1896 the party split on the silver question, those favoring the free coinage of silver at the ratio of 16 to 1, forming the National party and nominating Charles E. Bentley, who received 13,968 votes.

Prohibition, State.—The prohibition of the manufacture and sale of alcoholic drinks has long been a subject of political discussion in America. Long before the Revolution the liquor traffic was taxed, and the Continental Congress advised the states to pass laws prohibiting the distillation of grain. Prohibition became a purely state political issue first in the Maine legislature in 1827, when a prohibitory bill was introduced and defeated. In 1816 a bill with the same purpose became a law, but did not serve the purpose and was succeeded in 1851 by a more effective measure drafted by Neal Dow. This law provided for search

and seizure, but the Prohibitionists lost their majority and the law was repealed. Later a second law was passed which was made a part of the state constitution in 1884 and is still in force.

Between 1849 and 1856 prohibitory laws were passed in the following states and were repealed or made inoperative as indicated below: Illinois repealed in 1853; Rhode Island repealed in 1863; Pennsylvania repealed in 1866; Delaware repealed in 1867; Massachusetts repealed in 1868; Connecticut repealed in 1872; Michigan repealed in 1875; New York declared unconstitutional; Iowa amended in 1894 so as to be ineffective; Vermont repealed in 1902; New Hampshire repealed in 1903.

Including those States which decided at the election of 1916 to prohibit the manufacture and sale of intoxicating liquors, twenty-three are now denominated "dry." The strictly prohibition States are: Alabama, Arizona, Arkansas, Colorado, Georgia, Idaho, Iowa, Kansas, Maine, Michigan, Mississippi, Montana, Nebraska, North Carolina, North Dakota, Oklahoma, Oregon, South Carolina, South Dakota, Tennessee, Washington, West Virginia, Virginia.

Besides these, Florida and Utah in 1916 elected Governors pledged to enforce prohibitory liquor laws. Including those states made partially dry under local option, more than 60 per cent of the people of the country and 85 per cent of the area are under prohibition. The popular vote of Alaska in 1916 favored abolition of the liquor traffic.

The Prohibition National Convention of 1916 was held at St. Paul, Minn., July 19-21. J. Frank Hanly, former governor of Indiana, was nominated for president by a vote of 440 to 181 for William Sulzer, former governor of New York, his nearest competitor. Dr. Ira D. Landrith, of Nashville, Tenn., was nominated for vice-president.

The platform expressed opposition to the "wasteful military programs of the Democratic and Republican parties," but favored "preparedness for peace." It suggested a "compact among nations to dismantle navies and disband armies," but until "such court and compact are established we pledge ourselves to maintain an effective army and navy and to provide coast defenses entirely adequate for national protection."

It also favored legislation to encourage the establishment of an adequate fleet of American merchant ships. It opposed war with Mexico, pledged aid to the protection of American lives, and favored use of force when necessary.

Projectile.—A shell or other missile to be thrown into the ranks of the enemy, usually by the use of cannon, but sometimes by hand.

Proletariat.—Used by the Romans to designate the lower classes, or plebeians, as distinguished from the patricians. It is now generally used, especially in the philosophy of Socialism (q. v.), to designate the industrious poor.

Prometheus, The, firing into and seizure of, by British vessel, 2675, 2680.

Property at Sea:

International agreement to regard, as exempt from capture by belligerent powers, recommended, 6338.

International conference at Washington for security of life and, 5468, 5493, 5498.

Treaty with Italy regarding, 4098.

Property, Captured:

Cotton captured and forfeited referred to, 3666.

Should not be adjudged without regular investigation, 485.

Property, Industrial, international convention at Paris for protection of, 4560, 4794, 4857, 5118.

Property, Private:

Seizure and confiscation of, referred to, 3831.

Shall not be taken for public use without just compensation, 435.

Proprietaries.—American territory was parceled out by the various crowned heads of Europe to personal friends or favorites or in recognition of some useful service to the sovereign. Persons to whom these grants were made established what were known as proprietary governments. The proprietor appointed the governor, and in general performed all those acts of government which are usually the prerogative of the Crown. New York, New Jersey, Pennsylvania, the Carolinas, Delaware, and Maryland were proprietary governments. The laws of Pennsylvania and Delaware were subject to the supervision of the Crown, but those of Maryland were not.

Prosperity.—A condition where there is abundant fulfilment of all desires, including work at good wages,—as distinguished from hard times, where so many people are out of employment that charity has to be widely extended to ameliorate the suffering. The word "prosperity" is much played upon in political campaigns, as it is the most alluring condition which can be promised constituents.

Prosperity, National, discussed, 6709, 6710, 6894, 6973.

Protection.—In political economy the principle or system of imposing such duties on imported goods as will protect or foster domestic industries. Tariffs are either chiefly to produce revenue or to afford protection. Nearly all American tariffs previous to that of 1824 come under the former head. But the preamble of the first tariff act of 1789 declared that one of its objects was "the encouragement and protection of manufactures," and the principle of protection was ably advocated by Secretary Hamilton, in his elaborate report on manufactures, in 1791, and by many members of Congress from that time to the present. The tariff of 1816 was claimed as protective and proposed as such by northern members, while Calhoun and other southerners advocated it. Later the relative views of north and south were radically changed, and the north became protectionist, while southern members (except Clay and his Whig followers) were for a low tariff for revenue only. The tariff bill introduced in the House of Representatives in 1820 by Representative Baldwin, of Pennsylvania, from the Committee on Manufactures was frankly stated to be a protective measure, and at that time the question of a protective duty was first suggested to be unconstitutional. This bill did not pass, but in 1824 a tariff bill became a law with average duties of 37 per cent. The protectionists claimed that many of the duties were too low for effective protection, and in 1828, after a prolonged commercial depression, a congress opposed to protection passed a high protective tariff, which satisfied neither party,

and was denounced as "a bill of abominations." The failure of another act, passed in 1832, to sufficiently reduce the rates of the tariff of 1828 was the chief cause of the nullification movement (q. v.). The Clay-Calhoun tariff of 1833, known as the "Compromise of 1833," gradually reduced duties to a revenue basis. The act of 1842 was protective; that of 1846 (the Walker tariff) was strictly a revenue tariff. The Morrill tariff of 1861 and all subsequent tariff acts have been protective. The duties have been high, running from an average of 18 per cent to 48 per cent ad valorem on all dutiable articles.

In 1908, President Taft was elected on a platform which advocated a revision of the Dingley Tariff. Immediately after his election he called an extra session of Congress (7379) and recommended a reduction of duties. Congress, after deliberating nearly all summer, passed a tariff law, taking away all protection from hides, and making reductions of 10 to 15 per cent on leather, lumber, paper, coal, iron and steel sheets, and chemicals. The principle of protection was abandoned in the Democratic tariff law of 1913. (See Tariff; Import Duties.)

Protection of Industrial Property Union, acts of international conference, 7671.

Protective Tariff. (See Protection and Import Duties discussed.)

Protestant Church at American embassy at Rome, removal of, referred to, 3662, 3717.

Protestant Episcopal Church in Alexandria, Va., act incorporating, vetoed, 474.

Protests.—The official papers of the Presidents as they are sent to Congress are properly designated "messages," but on several occasions the Chief Executives have sent papers known as "protests." They are sent in the customary message form, but contain the formal protest of the President against the actions of Congress as a whole or of one or the other of the two Houses.

Protests of President—

Buchanan to proceedings of House, 3145, 3150.

Jackson to resolutions of Senate charging him with violating Constitution and laws, 1288.

Additional statement regarding, 1312.

Johnson to act depriving him of command of Army, 3670.

Tyler to action of House in adopting report assailing his official conduct, 2043.

Proteus, The.—The vessel in which Gen. Adolphus W. Greely, with twenty-four men, sailed from St. Johns, Newfoundland, July 7, 1881, and reached Discovery Harbor (lat. 81° 44' north, long. 61° 45' west), Aug. 12, 1881, where he established his station. The *Proteus* was lost in Smith Sound, midway between Cape Sabine and Cape Albert, July 23, 1883, while attempting to reach Lady Franklin Bay with a relief party for Greely.

Proteus, The, loss of, and court of inquiry regarding, 4790.

Protocol.—A preliminary agreement between countries or other conflicting forces,—reached by diplomatic negotiation, and executed by the signatory powers,—upon which to base a permanent treaty or contract.

Providence Plantations.—In 1636 Roger Williams and his followers, who advocated complete separation of church and state and toleration for all creeds, were banished from Massachusetts Bay Colony. They journeyed southward and founded Providence. Two years later the followers of Anne Hutchinson founded Portsmouth, and in 1639 Newport was settled. In 1644 Williams obtained from the parliamentary commissioners a patent which associated the three towns in one community. Both Plymouth and Massachusetts claimed the territory, but failed to make their claims good. In 1663 a new charter was granted, which united Rhode Island to the Providence Plantations and remained substantially the fundamental law until 1842.

Providence Plantations. (See Rhode Island.)

Providencia, The, appropriation for seizure of, by American steamer recommended, 3263.

Provincial.—Peculiar to a confined section,—usually a rural section. (See Provincialism.)

Provincialism.—A state of mind, expression, or manners peculiar to a confined section, especially a province or rural district.

Provisional Courts in Louisiana, order regarding, 3323.

Restoration referred to—

Arkansas, 3423, 3452.

Louisiana, 3423, 3452.

Provisions, importation of, into foreign countries and rates of duty on, referred to, 5503.

Prussia.—A Kingdom of northern Germany. It is bounded on the north by the North Sea, Denmark, Oldenburg, and the Baltic, on the east by Russia, on the south by Austria, Saxony, etc., and on the west by Luxembourg, Belgium, and the Netherlands. In the northern and eastern portions the country is generally level, but in the south and southwest it is hilly or mountainous. The chief agricultural products are rye, wheat, oats, potatoes, barley, millet, fruit, beet root, tobacco, and maize. Prussia is very largely engaged in manufacturing. The government is a hereditary constitutional monarchy administered by a King and a Landtag consisting of two chambers.

Prussia is the principal State of the German Empire. It has seventeen votes in the Bundesrath and 236 members in the Reichstag. Hanover, Frankfort, Nassau and some

other states were acquired by Prussia in 1866. This resulted in forming the North German Confederation. As a result of the war between France and Germany, 1870-71, the German Empire was formed, with the crown hereditary in the Prussian dynasty.

The agricultural area of Prussia is 28,479,739 hectares, divided, in 1905, into 3,308,651 separate holdings or farms, about two-thirds of which were of less than ten hectares (twenty-five acres) in area. These farms supported a population of 10,918,476. The chief crops were rye, hay, oats, potatoes, wheat and barley. There were vineyards of 18,033 hectares, yielding 370,107 hectolitres of wine.

In 1905-6, 286 establishments consumed 12,596,787 metric tons of beet root in the manufacture of 1,861,970 metric tons of raw sugar and 260,859 metric tons of molasses; 4,326 breweries made 33,600,000 hectolitres of beer—ninety litres per head for the population; 6,404 distilleries produced 3,722,032 hectolitres of alcohol.

Prussia yields about half of the world's zinc; copper, lead and coal are also mined. During 1910 there were 663,534 persons employed in the mines and their wages were 800,392,890 marks. (German mark = 23.8 cents.)

The area of Prussia is 135,134 square miles, and the population (1910), 40,165,210.

Vessels of—

Application for rights regarding, 621.

Suspension of discriminating duties on, recommended, 969.

Vessels of United States, discriminating duties on, abolished by, 969.

Prussia, Treaties with.—Of the treaty of 1785 the only article that has survived is that on the neutrality of vessels. The treaty of amity and commerce of 1799 contained many articles which expired by limitation in 1810, and some others were revived by treaty of 1828. Contraband goods may be detained; ves-

sels are to be distinctively marked for recognition in time of war by passport and other specified documents. The examination and search of vessels in time of war is to be conducted with ease, freedom from embarrassment and annoyance, according to specified methods. Vessels taken by an enemy and recaptured by one of the parties thereto are to be restored to the other of these parties. Humane treatment is to be extended in cases of distress on shipboard and in wrecks. Citizens of the one party are not to act offensively against the other when at war with a third party. The neutrality of vessels and the principle that free ships make free goods are fully recognized. In case of war between the parties thereto, citizens of the one in the country of the other shall be fully protected in life, property and business. Prisoners of war are not to be sent to unsafe or unhealthy localities but are to be cared for humanely and with regard to safety of life and health.

The treaty of commerce and navigation of 1828 extended freedom of trade without discrimination in shipping charges or import duties by reason of the nationality of the carrying vessels. The coastwise trade is excepted from provisions. All commercial privileges are upon the basis of the most favored nation. The establishment of consuls and consular agents is permitted and prescribed with full powers regarding the arrest and detention of deserters and the administration of the affairs of deceased persons. (For extradition terms, see Extradition treaties.)

Prussianism.—A term applied to the militarism (q. v.) which many observers characterize as the prevailing spirit of the German Empire, of which the foundation is Prussia (q. v.).

Public Information Committee.—By order of President Wilson on April 13, 1917, a committee on Public Information was created. The committee is composed of the Secretaries of War, Navy and State, with a civilian director. The appointment of civilian director went to Mr. George Creel, formerly Director of Public Safety in Denver, Colorado, and later a writer of prominence on political and social questions. Secretary of State Lansing announced, on May 8, 1917, that all further news from the State Department would be given out through the newly-created Bureau of Intelligence within that department, and that all employees of the Department were forbidden to give out to any one information of any character. (See Censorship.)

Public Lands Division, Justice Department.—This bureau enforces the laws respecting the public lands (q. v.). (See also Justice Department.)

Publications, Division of, Agriculture Department.—An office in the Department of Agriculture to which is entrusted the editing of agricultural publications, particularly the *Year Book* of the department. This office also has charge of all the printing and illustrating done for the Department of Agriculture, as well as the distribution of the documents after they are printed. The publications include regular "Farmers' Bulletins," "Experiment Station Record," "Month-

ly Weather Review," and "Crop Reporter," also works of more special character. These are given free to scientific institutions and to collaborators of the department, libraries, colleges and experiment stations. The expenditures of the bureau in this line amount to about \$4,500,000 per year.

Publications, Official. (See Records and Documents.)

Puebla (Mexico), Battle of.—After Gen. Scott had proceeded on his march to the City of Mexico, Gen. Rea, a guerrilla chief, was joined by Santa Anna. Col. Childs, commandant of the Puebla garrison left by Scott, sent Capt. Blanchard with thirty-three men to capture a band of guerrillas. Blanchard and twenty-two men were ambuscaded and killed the latter part of August, 1847. Sept. 25 Santa Anna demanded the surrender of the forts at Puebla. Childs, who had only about 360 men, refused and maintained his position in spite of an almost continuous fire of the Mexicans, until relieved by reinforcements under Gen. Lane, on Oct. 12.

Puget Sound.—An arm of the Pacific extending into the State of Washington southward from the Strait of San Juan de Fuca, by which it is connected with the Pacific. The sound is divided into two parts—Puget Sound proper and Admiralty Inlet. The latter is to the north and the former to the south. Fine harbors are found along the sound, the water generally being quite deep. It is about eighty miles long.

Pure Food Act. (See Food and Drugs Act.)

Purity Federation.—The object of this Federation is to unite in national co-operation all those forces in America that are striving to promote purity in the life of the individual and in social relations through preventive educational, reformatory, rescue, law enforcement, legislative and sanitary lines of effort. It is in every sense non-sectarian, and is open to all who are sincerely and seriously striving to promote its object. Many of the leaders in religious, philanthropic and reform movements in the United States are officially connected with this Federation. Each year a largely attended national purity congress is held under the auspices of the Federation.

Quapaw Indians. (See Indian Tribes.)

Quarantine.—A term derived from the French word "quarantaine" (m. Lat. quarantena), meaning "forty days." Passengers on vessels arriving at Venice from the Levant were formerly required to remain forty days in the House of St. Lazarus or Lazaretto. This regulation was afterwards adopted by other ports in southern Europe, and, with various changes in the period of detention, extended to travelers from all ports whence contagion might be carried. In the United States quarantine enactments were passed by the colonial legislatures and subsequently for many years by the states. The first national quarantine act was passed Feb. 23, 1799, and required Federal officers to aid in the execution of state or municipal quarantine regulations. In 1878, however, a national quarantine law was passed authorizing the establishment, in certain contingencies, of national quarantines. In March, 1883, \$100,000 was appropriated by the Federal Government for maintaining quarantine stations along the coasts, and the authority for declaring quarantine was conferred upon the President. Most of the quarantine stations are under state supervision. The mode of procedure is as follows: On the arrival of a vessel she is visited by the health officer, who examines her bill of health, musters the passengers and crew, and inspects the vessel in every part. If free from contagious disease, and if she does not hail from an infected port, she is allowed to proceed without further detention. If she hails from an infected port, she is detained until the expiration of the period of incubation of the disease prevalent at the port whence she sailed. If disease is found on board, or if the vessel is in an unsanitary condition, the diseased persons are removed to a quarantine hospital and the vessel allowed to proceed after a thorough purification.

Quarantine Regulations (see also Contagious Diseases: International Sanitary Conference):

Jefferson, 371.

Monroe, 854.

Roosevelt, 6914, 6948, 7104, 7228.

Quarter-Deck.—The deck used for promenade by officers of a war vessel.

Quarter Dollar.—In 1786 the Continental Congress decided upon certain coins. Among these was a quarter dollar, to be made of silver. The United States Mint was established in 1792 and began coinage in 1793. It was not until 1796, however, that the silver quarter was issued. Its weight was fixed at 104 grains. It was reduced to 93 grains in 1853, and by the coinage act of 1873 was raised to 96.45

grains, or 0.200 of an ounce, the present weight, and 900 fine. The coin is legal tender to the amount of \$10. The quarter dollar of 1827 is one of the rare coins of the United States. There were no issues of this coin during the years 1798 to 1803, 1808 to 1815, nor during 1817, 1824, 1826, and 1830.

Quarter Eagle.—A gold coin of the United States authorized in 1792 and first coined in 1796. It is legal tender in any sum. The present weight of the coin is 0.134 ounce, or 64.5 grains, and the fineness 900. It is coined under an act of Congress of June 28, 1834.

Quartering Acts.—Certain acts of the British Parliament distasteful to the American colonists. The first was passed in 1765 and compelled the Colonies to provide the garrisons in America with fire, candles, vinegar, salt, bedding, cooking utensils, and liquors. This was the first act requiring the colonists to tax themselves for imperial object. In 1774 an act was passed legalizing the quartering of imperial troops in Boston.

Quartermaster-General. (See War Department and Army.)

Quartermaster-General of Army, fire-proof building for records in office of, recommended, 4524.

Quebec (Canada), Battle of.—After taking Montreal Gen. Montgomery proceeded down the St. Lawrence River to Quebec, where on December 5, 1775, he joined the expedition which had been sent 37 way of the Kennebec and Chaudière rivers under Benedict Arnold. Their combined forces amounted to about 3,000 men, supported by about a dozen light guns. Carleton had for the defense of Quebec one company of regulars, a sloop of war, and a few marines, together with as many of the citizens as could be induced to enlist—in all something like 1,600 men. On the night of Dec. 31 the city was attacked. Montgomery was killed, Arnold was wounded, and the troops retired in confusion. Three thousand troops were sent to reinforce Arnold, and 4,000 occupied Montreal, St. Johns and Chambly. May 6, 1776, three brigades of infantry, besides artillery, stores, ammunitions, transports, and men-of-war, arrived from England and the Americans retired, leaving Canada as it was before the invasion. (See also Montreal (Canada), Capture and Loss of.)

Queen Anne's War.—The name of which the War of the Spanish Succession was known in America. It broke out in 1702 and was ended with the treaty of Utrecht in 1713. The New England Colonies suffered from frequent inroads of French and Indians from Canada, but the New York Colony was protected by the barrier of the Six Nations of Indians, then at peace with the English. Aug. 10, 1703, Indians under French leaders attacked Wells, Cape Porpoise, Saco, Casco, Scarborough, Spurrwink, and Purpoodeuk, completely destroying the last two. In 1704 and 1705 James Moore, of South Carolina, with 50 whites and about 1,000 Creek Indians, attacked and destroyed several Spanish settlements in Florida. Col. Church organized an expedition in Maine in 1704 and proceeded up the coast as far as the Bay of Fundy, destroying all the settlements and taking 106 prisoners, with the loss of only 6 men. Feb. 28, 1704, about 350 French-Canadians and Indians burned the town of Deerfield, Mass., massacring 40 persons and taking 100 prisoners. After

three attempts by the New England troops Acadia was finally captured. July 30, 1711, Gen. Nicholson left Albany with an army of 4,000 men and Hovenden Walker sailed from Boston with a fleet and 7,000 men, as well as a fine train of artillery, to attack Quebec and Montreal. The fleet was driven upon the rocks at the mouth of the St. Lawrence, losing eight transports and more than 1,000 men. The survivors sailed for England and the army disbanded.

Queenston Heights (Canada), Battle of.

—Early in October, 1812, Gen. Van Rensselaer resolved to invade Canada from western New York. His headquarters were at Lewiston, opposite Queenston, Canada. The American army consisted of 3,650 regulars and 2,650 militia. The British force on the western bank of the Niagara River numbered 1,500, including about 250 Indians under John Brandt. Maj. Gen. Brock, who had taken Detroit in August, had returned to the east and established his headquarters at Fort George. He posted batteries every mile along the river from there to Queenston. On the morning of Oct. 13, 1812, the invasion was begun prematurely, insufficient boats having been provided for transportation. Reinforcements came so slowly that the advance guard was forced to surrender. Gen. Brock was mortally wounded. Van Rensselaer was disabled and the American command fell upon Captain Wool. British reinforcements and Indians pressing hard upon the Americans, they were forced to surrender. About 900 Americans were taken prisoners, 90 were killed, and about 100 wounded. The British lost in killed, wounded, and captured about 130. The number of Indians killed is not known.

Querétaro, Treaty of. (See Guadalupe Hidalgo, Treaty of.)

Quids.—A name applied to the anti-Madison faction of the Republican party, led by John Randolph from 1805 to 1811. Jefferson strongly favored the succession of Madison and the Quids declared war upon the administration, charging "backstairs" influence. They opposed the restrictive system and nominated Monroe in 1808.

Quint.—One of the silver coins presented by Robert Morris to the Continental Congress in 1783 for consideration as a national

coin. It weighed 5 pennyweights and 15 grains and was equal to about 35 cents. On the obverse was an eye, 13 points crossing (equidistant) a circle of as many stars, and the legend "Nova Constellatio"; on the reverse, "U. S. 500," surrounded by a wreath and the legend, "Libertas Justitia." This coin was not accepted and afterwards, with the mark, became known as the Nova Constellatio coinage.

Qui-nai-elt Indians. (See Indian Tribes.)

Quil-leh-ute Indians. (See Indian Tribes.)

Quo Warranto.—The legal writ served upon public officers calling upon them to show cause why they should not perform certain duties, or why they should not be removed from office, whether they have acquired the office legally or illegally.

Quorum.—A word adopted from the Latin, meaning in the original tongue "of whom." Legally it denotes a certain specified number out of a large number necessary to act for certain purposes. Business in charge of trustees or committees might often be retarded on account of the absence of one or more members if the actions of a quorum were not legal. Unless otherwise stipulated, a majority of the members of any body is considered a quorum. In parliamentary usage a quorum is the number that must be present in order that business may be transacted. It is sometimes less than 1 per cent of the members, as in the case of the British House of Lords, where 3 out of 450 members constitute a quorum. According to the Constitution, a majority of either branch of Congress constitutes a quorum. For the first fifty Congresses the presence of a constitutional quorum in the House was determined by a count of votes. No matter how many members were present, unless a majority voted it was considered there was not a quorum present. This sometimes led to obstructive tactics. In 1890, during the first session of the Fifty-first Congress the Speaker of the House ruled that a quorum was present when enough members were visible to constitute a quorum, whether they voted or not. The Senate enforces the rule which requires a majority of the body to vote in order that a quorum may be counted.

Radical.—In politics, a person who advocates extreme doctrines,—the antithesis of conservative; in the plural a group, or party, urging extreme reforms.

Radio. (See Wireless Telegraph.)

Radio Service, Navy Department.—The name of this service has recently been changed to the "Naval Communications Service." It is in charge of the Government Radio Service, and of all telegraph, telephone, and cable communications connected with the naval service. It also maintains a censorship over all radio stations in time of war, and in time of peace it maintains such a censorship to the point of enforcing the neutrality (q. v.) of the United States. There are 51 radio stations in service, which are operated both on shore and on light vessels. There is an extensive radio system operated from various points on the coasts in order to control the movements of the United States fleet, and the Navy Department is connected at all times with all its naval stations, navy yards, and radio stations in the United States by means of telephone, telegraph and cable connections. In 1916, the naval communications service carried 628,997 official messages and 97,084 commercial messages. By act of Congress approved August 13, 1912, radio stations within the jurisdiction of the United States may be taken over by the Government for use in naval communications, to the exclusion of other control and use; and all radio stations not necessary to Naval communications may be closed for radio communication. By order of April 6, 1917, President Wilson issued an order to this effect, to be operative during the war with Germany.

Railroads and Equipment.—The first railway in the United States is said to have been the three-mile private tramway running from the Quincy (Mass.) granite quarries to tidewater at Neponset, over which was hauled the stone to build Bunker Hill monument. The road was completed in 1826 at a cost of \$34,000 and the cars were drawn by horses. This was followed chronologically by the Mauch Chunk (Pa.) switchback in 1827. The first railroad, however, on which cars were actually drawn by a locomotive was the Carbondale Railroad, built in 1828, by the Delaware and Hudson Canal Company from their coal mines to Honesdale, Pa., a distance of sixteen miles. In 1829 a locomotive named the "Stourbridge Lion," built in England from plans of Horatio Allen, an American engineer, was brought over and began running regularly on this road. Within the year the multi-tubular boiler engine, which succeeded the Allen type, was perfected by Robert Stephenson, an English minor. It was this locomotive, named the "Rocket," that made the present day railroad possible.

The first American locomotive to run over an American railroad was the "Tom Thumb," invented and built by Peter Cooper and driven by him over the Baltimore and Ohio Railroad in 1830. This locomotive was defeated by a horse on one of its earliest trial trips, much to the humiliation of its inventor.

The regular motive force of the Baltimore and Ohio Railroad at that time was horse power, and for some miles the stage route ran alongside the tracks. While making an exhibition run in the "Tom Thumb," Mr. Cooper encountered the proprietor of the stage route at the point where the two roads became parallel. The latter had been awaiting an opportunity with one of his fleetest horses, and entered upon the race with a determination to show the superior-

ity of horseflesh over steam. Mr. Cooper fired up his little furnace to its fullest capacity and the "Tom Thumb" whirled along exceeding the speed limit of those days, if they had one. He was showing a bright pair of wheels to the ambitious stage-driver when suddenly the belt which passed over one of the wheels of the carriage and worked a pair of bellows to blow the fire, broke, the fire blackened and died down and the stage coach driver drew ahead in triumph.

The second American locomotive was built at the West Point foundry, near Cold Spring, N. Y., (where the Parrott guns were cast during the Civil war) after plans by E. L. Miller, and was equipped with a common vertical boiler. It attained a speed, unattached, of thirty to thirty-five miles an hour; and, with a train of five cars, fifteen to twenty miles an hour. This locomotive named the "Best Friend" was built for the South Carolina Railroad, which ran between Charleston and Hamburg.

The bursting of the boiler of the "Best Friend" caused the introduction of the "barrier car" on this road. This was a car loaded with bales of cotton coupled between the locomotive and the passenger coaches, to protect the travellers from being scalded by steam in case of an explosion.

Among other very early American railroads were the Baltimore and Susquehanna, dating from 1830; the little four-and-a-half mile line between New Orleans and Lake Pontchartrain, starting the same year; the Boston and Lowell, incorporated in 1830; the Boston and Providence, and Boston and Worcester, incorporated in 1831; and the Mohawk and Hudson, which commenced running in September, 1831.

See illustration opposite 1295.

The possibilities of the railway were at once recognized by the rival seaports of the Atlantic—New York, Boston, Philadelphia and Baltimore. The Erie Canal penetrating to the interior of the continent on the line of least elevation above tidewater, had made New York the national port of entry and chief center of distribution. Even New Orleans, with the Mississippi River as a feeder, felt the diversion of trade through the Erie Canal. It was the effort to recover this trade that caused the Baltimore and Ohio Railway to be projected. Philadelphia, too, began reaching toward the west with a railway, and the Boston and Worcester penetrated the Berkshire hills toward Albany. New York capitalists, to maintain the supremacy of the seaport, supplemented the Erie Canal with the Erie Railroad. The New York Central Railway was formed in 1852 by the consolidation of five small railways. The rapid increase of railway mileage from 1830 is shown in tabular form as follows:

1830	23	1870	52,922
1835	1,098	1880	93,296
1840	2,818	1890	166,706
1845	4,633	1900	194,262
1850	9,021	1910	243,107
1855	18,374	1915	246,816
1860	30,626		

Prior to 1850 there were few railroads west of the Alleghanies. The first to be built in the Mississippi Valley were the Clinton and Port Hudson, incorporated, in 1833, and the Bayou Sara and Woodville road, incorporated in Louisiana in 1831, as the West Feliciana Railroad. These pioneer railroads of the South have been operating continuously since 1840. A system of land grants did much to foster railroad building in the West. The general government allotted certain alternate sections of public lands to the several States in the West and

these States ceded them under conditions, in the nature of a subsidy, to the railroads. The Illinois Central and the Mobile and Ohio were the first to obtain these advantages. During the Civil war railway building was impeded but the westward stride was resumed in 1865, and only fell off during the financial panic of 1873. Adverse legislation checked the extension of railways between 1911 and 1915.

Transcontinental Lines.—April 1, 1850, a meeting was called in Philadelphia to discuss the feasibility of a railroad to the Pacific coast. The discovery of gold in California turned all Eastern eyes on the newly acquired territory won from Mexico. From a little known region where traders bartered for hides with the indolent Mexicans the Pacific coast became the El Dorado where the Eastern thousands longed to go; and venturesome miners early on the spot clamored for supplies the East was anxious to exchange for Western gold. The only communication between the Atlantic and Pacific was around Cape Horn, across the Isthmus of Panama, or over land across the plains and mountains, beset by hostile Indians, hunger, thirst, and the parching sun of the intervening prairies. The Philadelphia meeting was twenty years ahead of its time. The second step toward transcontinental railways was taken during the administration of President Pierce, when Jefferson Davis, Secretary of War, organized and carried out a great survey, laying out several routes across the continent.

See illustration opposite 3658.

In response to the repeated demands Congress July 1, 1862, incorporated the Union Pacific, which, in its junction, seven years later, with the Central Pacific near Ogden, Utah, completed the first transcontinental line. (See Pacific Railroads.)

Railroad statistics for 1911 as presented by Poor's Manual are as follows:

Cost of roads and equipment	\$15,872,462,792
Number of miles operated..	246,655
Passengers carried one mile	33,565,339,282
Tons of freight moved one mile	258,599,943,687
Revenue from earnings, etc.	\$1,085,951,595
Paid in taxes, dividends, interest, etc.	957,829,792
Surplus for the year.....	128,121,863
Capital stock.....	8,582,463,256
Bonded debt.....	10,989,608,551

Reports to the Interstate Commerce Commission for the fiscal year ending June 30, 1913, by roads having gross operating revenues of \$100,000 or more for the year showed 244,418 miles of single track in use. Of the total number (63,378) of locomotives 14,296 were passenger and 37,924 freight. The number of cars was 2,415,508, of which 51,700 were passenger, and 2,273,564 freight.

The average rate of interest on railroad bonds has been steadily declining from 4.94 in 1883 to 3.74 in 1911. The average dividend rate declined from 2.76 in 1883 to 1.51 in 1897, and then advanced to 3.64 in 1911.

Equipment.—In 1831 Matthias W. Baldwin, a maker of bookbinders' tools in Philadelphia, was engaged to build a model locomotive for exhibition in a local museum. The success of this model resulted in Mr. Baldwin being engaged to construct a locomotive for the Philadelphia, Germantown and Norristown Railway Company. This engine, "Old Ironsides," attained a speed of thirty miles an hour with train, and, detached, is said to have made sixty miles. This was the pioneer of the Baldwin Locomotive Works, later owned by Burnham, Williams & Co. The Rogers Locomotive

Works were established in Paterson, N. J., in 1836, and the Schenectady works in 1848. After the war the Pittsburg works, those at Providence, R. I., the Brooks shops at Dunkirk, N. Y., and the Richmond, Va., works were established. The total number of locomotives in use on the railways of the United States, Canada and Mexico in 1894 was given by Poor's Manual as 55,813. The number of establishments engaged in the manufacture was thirteen.

The real progress in locomotive building has been increasing the weight of trains which can be hauled with certainty at rates of speed previously regarded as phenomenal. September 11, 1895, a locomotive of the New York Central hauled the Empire State Express from New York to East Buffalo, 436 1-2 miles, in 407 2-3 minutes, an average speed of 64.26 miles an hour.

The Erie Railroad conducted a test at Binghamton, N. Y., on July 24, 1914, of the pulling power of the new Centipede locomotive, which weighs 410 tons and has 24 driving wheels. The officials in charge kept adding car after car of coal to the train until it consisted of 250 fully loaded steel cars, with a total weight of 21,000 tons. The locomotive pulled this train 40 miles at the rate of 15 miles an hour.

In 1857 Thomas Hall, of Boston, constructed and exhibited a small electric locomotive, which took its current from a stationary battery by means of the rails and wheels. Electrical locomotives were tried on the New York elevated railroad in 1886. After 1890 electric locomotives were common, especially on suburban lines.

The first passenger coach, used in Pennsylvania in 1832, was a stage coach slightly enlarged. With the increased speed of the locomotive attention was drawn to the wheels, and Messrs. Knight, Edgar, Winans and Davis of Baltimore developed and improved the flange. The sleeping car had its origin as early as 1838. In 1858 two sleeping cars were run between Cleveland and Buffalo, but they were not popular. It was while riding in one of these that George M. Pullman designed the improvements which have revolutionized railway travel. His first car, the "Pioneer," was built in 1863. This car was used to convey President Lincoln's body from Chicago to Springfield, Ill., for interment, and shortly afterward by General Grant to go from Detroit to Galena, Ill.

In the winter of 1868-69 the first Westinghouse air brake was used on the Schenectady accommodation train running on the Pittsburg, Cincinnati & St. Louis Railroad.

The transportation of various kinds of products, such as live stock, coal, dressed meat, oil, and timber, has called into being cars especially adapted to each class of freight, and steel is gradually supplanting wood in the construction of all cars.

Speed Records.—The fastest single mile on record for a railway train was 32 seconds, made by the Empire State Express on the New York Central Road, at Crittenden, N. Y., in May, 1893, which was at the rate of 112.5 miles per hour. Numerous instances are recorded of short runs (five miles or less) at a rate of more than a hundred miles an hour. The best record for the longest distance was made by the Chicago, Burlington & Quincy train in running from Chicago to Denver, 1,025 miles, in 18 hours and 52 seconds, a rate of 58.71 miles an hour, in February, 1897. The New York Central trains have repeatedly made the distance between New York and Chicago, 960 miles, at an average speed of more than 60 miles an hour.

Among the fastest regular trains in the United States are believed to be the New

York Central "Empire State Express," between New York and Albany, 143 miles in 175 minutes, and the "Congressional Limited," on the Pennsylvania Railroad, which makes the run from Jersey City to Washington in 4 hours and 46 minutes, a distance of 227 miles. The "Pennsylvania Special," over P. R. R., which runs from Jersey City to North Philadelphia, 84 miles in 83 minutes; from Jersey City to Harrisburg, Pa., 194 miles in 196 minutes. The Royal Blue Line from New York to Philadelphia (Reading Terminal), 91.1 miles, in 1 hour, 50 minutes. (On November 25, 1913, a special train, consisting of a locomotive and two cars, ran from Washington, D. C., to Jersey City, 227 miles, in 4 hours, the fastest trip ever made between the two cities.)

In October, 1905, the "Harriman Special" made the run from Oakland to Jersey City (3,239 miles) in 73 hours, 12 minutes, or 44.30 miles per hour. In May, 1906, the "Harriman Special" made the run from Oakland, Cal., to New York City in 71 hours, 27 minutes. The "Scott Special" left Los Angeles, Cal., July 9, 1905, and arrived in Chicago (2,415.5 miles) July 11, having made the run in 44 hours, 54 minutes, maintaining an average speed while in motion of 51 miles an hour.

The Jarrett and Palmer special theatrical train, Jersey City to Oakland (San Francisco), 3,311 miles, June, 1876, 83 hours, 45 minutes; average speed, 39.53 miles per hour.

On November 15, 1907, at Clayton, N. J., in a trial test on Pennsylvania R. R. between steam and electric locomotives, the steam engine made 93.6 miles an hour on a specially built seven mile curved track, while the electric locomotive made but 90 miles an hour.

Returns for 1914 were received from 242 establishments which manufactured 138,178 steam and electric cars, valued at \$165,071,427. These totals include figures for 118 railroad repair shops which reported the construction of 11,049 new cars, valued at \$12,811,087, and 7 establishments engaged primarily in other lines of manufacture but which produced 4,481 railway cars, valued at \$3,178,677, as subsidiary products.

In 1914 there were built 135,357 steam-railway cars, valued at \$155,029,539. The number of steam passenger cars built in 1914 was 3,558, and their value was \$45,027,083. Of freight and other cars for use on steam railroads, the output in 1914 was 131,799, valued at \$110,002,456.

The number of electric cars manufactured in 1914 was 2,821, and their value was \$10,041,888. The output of electric cars in 1914 comprised 2,583 passenger cars, 110 freight cars, and 128 other cars.

Eight Hour Day.—A strike vote among the 300,000 members of the four-train service brotherhoods on the question of an eight-hour day and time and a half for overtime was taken during July. The vote followed the failure of the conference in June with the representatives of the railroads of the United States.

The National Conference Committee of the railroads made public, July 25, a summary of findings on wages paid by the roads, together with the conclusion that their employees constitute one of the highest paid groups of workers. Railroad accountants had been examining the payrolls of every road in the country for six months. The purpose of the railway managers was to combat the effort of the four brotherhoods to obtain raises in pay. They held that the men were paid sufficiently high not to need an increase in wages.

The average yearly wage payments to all Eastern train employees (including those

who worked only part of the year), as shown by the 1915 payrolls, were:

	Passenger.	Freight.	Yard.
Engineers	\$1796	\$1546	\$1381
Conductors	1721	1401	1238
Firemen	1033	903	814
Brakemen	1018	858	990

Three-quarters of these men (including all those who put in a full year's service) earned these wages:

Engineers (road), \$1585 to \$3224; (yard), \$1303 to \$2178.

Conductors (road), \$1552 to \$3001; (yard), \$1145 to \$1991.

Firemen (road), \$933 to \$1762; (yard), \$752 to \$1633.

Brakemen (road), \$862 to \$1707; (yard), \$834 to \$1635.

For the whole country, the average wages of three-quarters of the employees were:

	Passenger.	Freight.	Yard.
Engineers	\$2067	\$1892	\$1526
Conductors	1850	1719	1310
Firemen	1203	1117	924
Brakemen	1095	1013	1076

Declaring a break inevitable unless some strong measures of intervention were speedily introduced, an appeal was made to President Wilson August 2, to take action in the matter of the threatened railroad strike. It was backed by as large a number of business men as had ever been heard on a single subject. The spokesman was Harry A. Wheeler, of Chicago, chairman of the committee on the railroad situation of the Chamber of Commerce of the United States.

On the 3d, the President designated G. W. W. Hanger, assistant commissioner of mediation and conciliation, to be a member of the United States Board of Mediation and Conciliation. This filled the one vacancy on the board and placed it in a position to take up the railroad matter just as soon as the trouble should come to a crisis.

Ninety-four per cent of the 400,000 railway workers voted for a strike if the carriers should fail to grant their demands at a conference in New York August 8. The vote was as follows, in favor of a strike:

Locomotive engineers—	Per cent
Southern District.....	98.72
Western District.....	90.35
Eastern District.....	94.51
Firemen and enginemen.....	98.10
Railway trainmen.....	97.00
Railway conductors—	
Western District.....	84.03
Eastern District.....	84.08
Southern District.....	93.04
General officers.....	85.06

The services of the Federal Mediation Board were accepted by both sides August 9, and conferences were arranged at once, but by the 15th the Federal Mediators announced the failure of their efforts. President Wilson then proposed several White House conferences, after which he submitted, on the 16th, the following proposals:

"Acceptance by the railroad managers of the eight hour day.

"Abandonment by the employees of their demands for time and one-half for overtime, and the acceptance of pro rata for overtime.

"Abandonment by the railroad managers of their contention that the entire controversy be submitted to arbitration either by the Board of Mediation or a board appointed by the President.

"Appointment of a commission to investigate the operation of the eight hour day, to determine its cost to the railroads, and to make recommendations concerning the collateral problems involved and the payment of time and one-half for overtime."

These proposals were rejected by the Managers' Committee the next day, whereupon President Wilson summoned the railroad presidents, who, on the 18th, failed to accept the settlement plan. The plan was formally accepted by the four railway brotherhoods. A delegation of railroad executives went to the White House August 22, and discussed with President Wilson a modified acceptance of his proposals.

It was learned that the President told the railroad presidents that he would not act as mediator between the brotherhoods and the railroads beyond the proposal for settlement he had made and which had been accepted by the brotherhoods.

The special committee of railroad executives drew a compromise proposal, August 24, which provided:

"The eight-hour basic day should be granted to the trainmen.

"The administration should make every effort to obtain a freight rate increase for the roads.

"Congress should be asked to enact legislation to insure settlement of future labor disputes through an investigating commission."

After lengthy conferences President Wilson announced, August 28, that he would go before Congress to ask for legislation to stop the impending strike. He appealed to the brotherhood heads to have the strike order for Labor Day rescinded, but was told that the order was beyond recall. His appeal to Congress was made August 29. He upheld the Brotherhoods' attitude, placed blame on the railway managers and suggested the following six propositions:

"1. Enlarge the membership of the Interstate Commerce Commission from seven to nine, as provided for in the Adamson bill, which passed the House some time ago.

"2. Establish an eight-hour day as a basis for wage and work on all interstate carriers.

"3. Appoint a small commission to observe the results of the eight-hour day and report to Congress without recommendation.

"4. That Congress signify its approval of an increase in freight rates as a basis of compensating the railroads for the extra cost of the eight-hour day.

"5. That the powers of the Board of Mediation and Conciliation be increased so as to give it authority to investigate labor troubles and to make a report thereon, in the meantime making it unlawful for a strike or lockout to occur while this work is going on.

"6. Give the President authority to use the military forces of the Government to keep the roads running in case of a strike and give the President power to draft men into the military service for this purpose."

Measures taken by Congress Aug. 31, with the active assistance of President Wilson, insured the passage of both houses of a bill that would satisfy the brotherhoods.

The impending railroad strike was averted, Sept. 2, by the passage of the Adamson eight-hour bill.

Railroad officials declared that the action of Congress would cost them \$60,000,000 a year in increased wages to the trainmen. Brotherhood officials, however, said the enactment would mean not more than an annual increase of \$20,000,000.

The Adamson eight-hour bill passed the House, Sept. 1, by a vote of 239 to 56, and the Senate on the following day by a vote of 43 to 28—almost a strict party vote. The bill was passed without amendments amid stirring scenes, after many Senators, Democrats and Republicans, had fought desperately to amend the measure by provisions designed to prevent industrial disasters in the future. Some Senators, thoroughly aroused, declared Congress was being coerced

into enactment of legislation which it did not desire and which it knew would return to plague it in the future.

In both Houses the measure was signed within few minutes after the final vote in the Senate, and it was sent at once to the White House, where President Wilson signed it at 7:30 o'clock Sunday morning. That there might be no question as to the legality of the measure as a result of its having been signed on Sunday, the President also affixed his signature upon his return to Washington on the following Tuesday.

Three hours after the measure passed the Senate, the heads of the four great railroad employees' brotherhood canceled the strike orders which were to have taken effect on Sept. 4.

The bill provided that after Jan. 1, 1917, eight hours should be regarded as a basis of reckoning for a day's pay of men engaged in the operation of railroad trains in interstate commerce (excepting roads less than 100 miles long and electric lines), that they should receive pro rata pay for work in excess of eight hours, and that their rate of compensation should not be changed pending an investigation for from six to nine months of the effect of the eight-hour day upon the railroads by a commission to be appointed by the President.

"Adamson Law.—Section 1. That beginning Jan. 1, 1917, eight hours shall, in contracts for labor and service, be deemed a day's work, and the measure or standard of a day's work for the purpose of reckoning the compensation for service of all employees who are now or may hereafter be employed by any railroad which is subject to the provisions of the act of Feb. 1, 1887, 'An act to regulate commerce,' as amended, and who are now, or may hereafter be actually engaged in any capacity in the operation of trains used for the transportation of persons or property, on railways from any state or territory of the United States or the District of Columbia to any other state or territory of the United States or the District of Columbia, or from one place in a territory to another place in the same territory, or from any place in the United States to an adjacent foreign country, or from any place in the United States through a foreign country to any other place in the United States.

"Section 2. That the president shall appoint a commission of three, which shall observe the operation and effects of the institution of the eight-hour standard work-day as above defined, and the facts and conditions affecting the relations between such common carriers and employees during a period of not less than six months nor more than nine months, in the discretion of the commission, and within 30 days thereafter such commission shall report its findings to the president and Congress. That each member of the commission created under the provisions of this act shall receive such compensation as may be fixed by the president. That the sum of \$25,000, or so much thereof as may be necessary, be and hereby is appropriated out of any money in the United States treasury not otherwise appropriated to be immediately available and to continue available until the close of the fiscal year ending June 30, 1917, for the necessary and proper expenses incurred in connection with the work of such commission, including salaries per diem, traveling expenses of members and employees and return, furniture, office fixtures and supplies, books, salaries and other necessary expenses, the same to be approved by the chairman of said commission and audited by the proper accounting officers of the treasury.

"Section 3. That pending the report of the

commission herein provided for, and for a period of 30 days thereafter, the compensation of railway employees subject to this act for a standard eight-hour workday shall not be reduced below the present standard day's wage, and for all necessary time in excess of eight hours such employees shall be paid at a rate not less than the pro rata rate for such standard eight-hour workday.

"Section 4. That any persons violating any provision of this act shall be guilty of a misdemeanor and upon conviction shall be fined not less than one hundred dollars and not more than one thousand dollars, or imprisonment not to exceed one year, or both."

E. P. Ripley, president of the Atchison, Topeka & Santa Fe Railway, declared in a formal statement, Sept. 6, that the Santa Fe did not intend to comply with the Adamson law.

The determination of the railroads to oppose the 8-hour law is consistent with their opposition to all regulation of their affairs by federal laws. They opposed the creation of the Interstate Commerce Commission and the extension of its authority to regulate rates. They declared the Hepburn law confiscatory and therefore unconstitutional. They opposed the national workmen's compensation act and the building of the Panama Canal. They fought the law requiring use of safety appliances on freight and passenger trains, and all legislation putting a limit to continuous service of employees. They opposed and later evaded the order to separate coal mining from transportation. These regulations were embodied into law only when the abuses complained of were no longer tolerable.

Discussed, 5488.

Discussed, 5882.

Railway Mail Service, Division of.—An act of Congress of September 6, 1785, authorized the Postmaster-general to contract for the delivery of mail by stage-coach. In 1811, the Post-Office Department established a system of mail service between Baltimore and Washington in stage-coaches owned by the Government, and in 1813 the Postmaster-general was authorized to use sailing vessels in the transportation of mail. The first railway post-office was established in 1862 and the first definite railway mail service was inaugurated in 1864, although railway post-offices had been suggested to the Postmaster-general by assistant postmaster-general Hobbie, as early as 1847. The present service is in operation over 217,462 miles of railroad, and covers 327,069,708 miles of actual service. It is estimated that 15,000,000,000 pieces of matter are transported and assorted by the railway mail service in the course of a year. The appropriations for this branch of the post-office service in 1917 were \$31,931,669, and the estimate for 1918 is \$31,108,410. The service is administered under the second assistant postmaster-general (q. v.), and comprises 34 officers, 114 chief clerks, and 18,649 permanent railway postal clerks. The special cars used in the service are virtually traveling post-offices, and although they are furnished by the railroads, they are manned by the Government postal service. In addition to transportation by railroad, mail is transported by the Department by wagon, by special messenger, by electric car, by steamship lines, by dog sled, by motor vehicles, by pneumatic tubes, and by aeroplane. (See Post-Office Department, Postal Service.)

Railway Postal Service. (See Postal Service; Railway Mail Service.)

Rain-Getter Dyrenforth. (See Rain-Maker.)

Rain-Maker.—In ancient times a priest or sorcerer who claimed the power to bring rain by prayer or incantations. During the years of the intensified settlement of the then arid states of Kansas and Nebraska, the United States Government tried out the experiment of causing the condensation of moisture, with consequent rain-fall, by the use of explosives. R. G. Dyrenforth was the leader of the movement for this experiment, and thus acquired a sobriquet derived from his initials, Rain-Getter Dyrenforth.

Raizuli. (See "Perdicaris alive or Raizuli dead.")

Raleigh, The, mentioned, 6297.

Rally.—A large gathering of people, especially in political campaigns, for the purpose of arousing or rallying enthusiasm for a political or other cause, or for the success of party candidates. In certain sections party leaders frequently organize rallies in the nature of picnic parties, accommodating their followers with boat or other transportation to the rallying place, and there serving a feast, accompanied by music and speech-making.

Rambouillet Decree.—March 23, 1810, after the American Congress had repealed the non-intercourse act of March 1, 1810, Napoleon ordered the immediate seizure and sale of all American vessels in the ports of France or the ports of her territories occupied by French armies. In this decree

Napoleon avowed his determination to prohibit any commercial intercourse with the enemies of France which was not enjoyed by that country also. Under this decree 132 vessels, with their cargoes, valued at \$8,000,000 were ordered sold. (See also Berlin Decree; Embargo; Milan Decree; Nonintercourse Acts.)

Rampart.—A breastwork of earth or other substance, thrown up around a fort, as protection against the shells of the enemy.

Ramsey & Carnick, claims of, referred to, 3065.

Ranger, The, referred to, 1030.

Raritan, The, postponement of sailing of, referred to, 2129.

Ratification of Constitution.—The Constitution, by its terms, was not to become binding until ratified by nine of the thirteen states. It was signed by the delegates in convention Sept. 17, 1787, and by them submitted to Congress. Congress immediately ordered copies sent to all the states. Hamilton, Jay and Madison took leading parts in bringing about the ratification by the states. Gen. Washington's great influence was also thrown into the scale. The commercial classes in most of the states favored its adoption, but there was much opposition to it on all sides. Delaware was the first state to ratify the new document, taking favorable action thereon Dec. 7, 1787. It was then ratified by the other states in the following order: Pennsylvania, Dec. 12; New Jersey, Dec. 18; Georgia, Jan. 2, 1788; Connecticut, Jan. 9; Massachusetts, Feb. 6; Maryland, April 28; South Carolina, May 23; New Hampshire, June 21; Virginia, June 25; New York, July 26; North Carolina, Nov. 21, 1789, and Rhode Island, May 29, 1790. The Constitution went into effect March 4, 1789, before North Carolina and Rhode Island had ratified it.

Ration.—(Usually in the plural.) The food served in specified quantities to soldiers and other persons under military government. In times of military stress and scarcity of rations, soldiers are permitted to forage. (See Forage.)

Ratification of Constitution. (See Constitution; Admission of States.)

Raymond (Miss.), Battle of.—May 7, 1863, Sherman effected a junction with Grant, swelling the force about to proceed to the siege of Vicksburg to 50,000 men, including infantry, cavalry, and artillery. Grant immediately ordered a general movement on two parallel roads on the southeast of the Big Black River. McPherson, advancing on the road nearest the river, met two brigades of the enemy, under Gregg and Walker, at Raymond, fifteen miles southwest of Jackson, on May 12, and after a sharp engagement defeated them. The Confederate loss was 103 killed and 720 wounded and missing. McPherson lost 69 killed, 341 wounded, and 32 missing.

Reaction.—In political parlance, the political tendency after progress to become conservative to the extent of retiring from advanced theories and to go back to original conditions.

Reactionary.—A victim of reaction (q. v.); one opposing progress.

Rear-Admiral.—This is a naval grade created by act of Congress in 1862. This

grade in the Navy ranks with that of major-general in the Army. Until the special acts creating the grades of admiral and vice-admiral, that of rear-admiral was the highest naval office. There are now fifteen rear-admirals ranking with major-generals in the Army, and nine rear-admirals ranking with brigadier-generals.

Rear-Admiral, rank of acting, conferred upon certain officers inquired into, 4848.

Rebates, apparent conflict of decisions by district judges concerning, 7024. New York Central and Hudson River R. R. convicted for giving, 7026.

Holt (Judge), opinion and sentence quoted, 7025.

Letter showing illegal payment in California, 7135.

Rebecca, The, seizure and sale of, at Tampico, 5123, 5502.

Rebel.—One who resists government or other authority, often with force.

Rebellion.—Forebible antagonism to the organized government or other authority.—in military parlance amounting to an ineffectual or full-fledged war.

Rebellion Records. (See War of Rebellion, Official Records of.)

Rebellion, War of. (See Civil War.)

Rebellions. (See Illegal Combinations.)

Reciprocal Trade Agreements. (See Foreign Import Duties.)

Reciprocity.—Reciprocity is the granting by one nation of certain commercial privileges to another, whereby the citizens of both are placed upon an equal basis in certain branches of commerce. A reciprocity agreement between the United States and Canada was concluded in 1854 and terminated in 1866. A similar one was made with Hawaii in 1875. Other treaty arrangements of a reciprocal character were made from time to time. The subject derived the greatest interest from attention directed to it in 1888 and the final incorporation of the principle in the tariff of 1890. For many years previous to this time the anti-protection or tariff-reform party had attacked the existing tariff regulations on the ground that by levying high duties on the products of South American Republics those countries had not only to send their products elsewhere for sale, but as a natural consequence, to purchase their goods in other markets than those of the United States; in other words that a vast trade was diverted from us to Europe because of the restrictions imposed upon commerce by our tariff.

This discussion led to the adoption of a reciprocity arrangement with Central and South American countries. The first step toward this end was the calling of the Pan-American Congress (q. v.). Among the numerous subjects of mutual interest discussed at this congress was a recommendation for reciprocity treaties. In June, 1890, the Secretary of State, James G. Blaine, sent a letter to the President for transmission to Congress, calling attention to the proposed scheme. He suggested a practical and prompt test of the reciprocity principle by an amendment to the McKinley tariff bill, then pending (see Tariff), authorizing the President to declare the ports of the United States free to all the products of any nation of the American

hemisphere upon which no export duties are imposed whenever and so long as such nation shall admit to its ports, free of all national, provincial, municipal, and other taxes, certain specified articles from the United States. The "reciprocity section" was incorporated in the tariff law approved Oct. 1, 1890. This clause was held to be constitutional by the Supreme Court, and the first treaty negotiated under it was with Brazil, Feb. 5, 1891. Treaties were also negotiated with Spain (for Cuba and Puerto Rico); with England (for some of her West Indian possessions); with Santo Domingo, Guatemala, Salvador, Costa Rica, Honduras, Nicaragua, Germany, Austria-Hungary.

These treaties were abrogated by the passage of the Wilson bill (see Tariff) in 1894. The Dingley law of 1897 provided for reciprocity treaties, to be made by the President, with regard to a limited number of articles; and for broader treaties to be negotiated by the President, subject to the ratification of the Senate. Of the first class, agreements were made with France, Italy and Switzerland; of the second class treaties were negotiated with France, Great Britain (for Jamaica, Turks and Caicos islands, Barbados, and British Guiana), Denmark (for the Danish West Indies), San Domingo, Nicaragua, Ecuador and the Argentine Republic, but none of them secured the ratification of the Senate. A reciprocity treaty with Cuba was ratified by the Senate in March, 1903, and the additional legislation necessary to put it in force was passed in December of the same year.

The tariff law passed in 1909 contained the maximum and minimum feature, which prescribed certain rates to be enforced for one year, at the end of which time 25 per cent ad valorem was to be added as the maximum duty. The President is then authorized to apply the minimum rates to the imports from a country which gives its best rates to the products of the United States, and which accords to the United States treatment which he considers reciprocal and equivalent. (See Tariff.)

On Jan. 26, 1911, President Taft sent to Congress a special message transmitting an agreement between the Department of State and the Canadian Government, obligating both parties to attempt to secure legislation which will reciprocally lower tariff rates on about six hundred items. (See p. 7961.) In urging the passage of the treaty, the President recalled Canada's neighborliness and friendship as shown in the settlement of all disputes and in the co-operation between the boards of railway control on both sides the border, dwelt upon the necessity of conserving our own resources by buying those of our neighbor, pointed out the similarity in labor and transportation conditions here and there, mentioned the harm to Americans which will accrue if the "imperial preference" doctrine becomes a tenet of Canadian political faith, maintained that the accession of a new supply of raw materials would inure to the benefit of all sections and, in prophetic vein, characterized the agreement as a step toward closer friendship between peoples related by blood, common sympathies and identical moral and social ideas. Animals, poultry, food stuffs, products of farm, garden and dairy, fruits, fish, oysters, salt, mineral waters, lumber, machinery, minor metal manufactures, coal, meats, flour, meal, farming utensils, fruit trees and Portland cement are the articles on which the tax is to be lowered or entirely removed. The effect of the proposed treaty, according to 1910 figures, would be to decrease the revenue of the United States

by \$4,849,933, and that of Canada by \$2,560,579. On July 26, 1911, the reciprocity measure, having been passed by both Houses, was signed by the President and became law. Sept. 1, 1911, the Canadian Parliament had not yet ratified the agreement. (See Reciprocity.)

Reciprocity, maximum and minimum feature of, expected to remove European discriminations, 7668.

Agreement with Germany discussed, 7502.

With Netherlands, 6961.

With Spain, 6966.

(See Canada, Reciprocity with.)

Reclamation Service, Interior Department.—The Reclamation Service was established by act approved June 17, 1909, in order to redeem arid lands by irrigation (q. v.). The act created a Reclamation Fund from the sale of certain public lands. In 1914, 761,271 acres were irrigated, and plans made for the irrigation of 500,000 more acres. The average crop value on the land thus newly redeemed for profitable cultivation was \$23.50 per acre. (See Interior Department.)

Reclamation Service, discussed, 6801, 6908. (See Irrigation.)

Reconcentrados.—The name given the agricultural inhabitants of Cuba who were by the edict of Feb. 16, 1896, of Captain-General Weyler concentrated within the lines of the Spanish armies and cities of that island. This resulted in great suffering to the persons thus herded together, many of them dying of disease and from starvation. The mortality was so frightful and their suffering so intense that their condition excited universal pity. On the suggestion of the President of the United States, Congress made an appropriation for their relief.

Reconcentrados:

Appropriation for, recommended, 6292.

Policy of Gen. Weyler regarding, discussed, 6256, 6283, 6284, 6308.

Revoked, 6285.

Reconstruction.—In American politics a term signifying the restoration of those states which had seceded of local self-government and normal relations with the Union. The period of reconstruction embraced the Administrations of Johnson and Grant and presented some perplexing problems to the statesmen of the reunited country: Were the states still in the Union, with no other disability than that of having no legal governments, or had their act of secession reduced them to the condition of territories subject to the Union? Did reconstruction mean their erection into new states or their restoration with their old names and boundaries? Did the power to reconstruct lie in the states themselves or in the General Government; and if in the General Government, did it lie with Congress or with the Executive? If it lay with the people of the disorganized state, who or what defined that people and decided who might and might not vote in the reorganization? If it lay with Congress, could the Executive, without the authority of Congress, proceed to reconstruct, simply leaving it to Congress to accept or reject the states so reconstructed? President Lincoln had proceeded upon the

theory that nothing more was necessary than that a sufficient number of loyal citizens should form a state government of which the officials were loyally desirous of maintaining constitutional relations with the Union (3423). President Johnson proceeded upon nearly the same theory.

The view held by the majority in Congress was that the southern states could be readmitted only on such terms as that body should impose. The ground taken in support of this view was that the substantial results of the war respecting the civil rights of the negro could not be secured in any other way, because of the reluctance of some legislatures to accept these results. Before Congress met in December, 1865, President Johnson had recognized provisional governments in all the southern states except one, on their acceptance of the thirteenth amendment. Congress then proposed the fourteenth amendment and insisted upon its acceptance as a prerequisite to readmission to the Union. The same body on March 2, 1867, passed over President Johnson's veto, the military reconstruction bill introduced in the House by Thaddeus Stevens. Under this law the south was divided into five military districts under the command of the generals of the Army, who were to effect a registration of voters, including negroes and excluding those persons who had been disqualified by the fourteenth amendment. These voters were to make and ratify a constitution and submit it to Congress, and if it was acceptable the state should be reinstated whenever its legislature had ratified the fourteenth amendment. (See illustration opposite 3754.)

Tennessee was readmitted to the Union in 1866. Alabama, Arkansas, Florida, Georgia, Louisiana, North Carolina, and South Carolina in 1868, and Mississippi, Texas and Virginia in 1870. (See also Restoration.)

Reconstruction Acts:

Interpretation of, 3750.

Proceedings of President and Cabinet regarding, as set forth in *National Intelligencer*, discussed, 3725.

Repeal of, recommended, 3760, 3870.

Vetoed. (See Reconstruction.)

Reconstruction of Southern States (see also Restoration):

Act providing for more efficient government or rebel States vetoed, 3696.

Acts supplementary to, vetoed, 3729, 3734.

Assignments under, 3749, 3750, 3754, 3755, 3859, 3860, 3861, 3862, 3863, 3864, 3866, 3869.

Expenses of carrying act into effect discussed, 3719, 3725, 3764.

Joint resolution to carry act into effect approved and reasons therefor, 3719.

Joint resolutions to carry acts into effect vetoed, 3713.

Acts to admit certain Southern States into Union vetoed, 3846, 3848.

Discussed by President—

Grant, 3965, 3982, 4050.

Referred to, 4354.

Hayes, 4394, 4410, 4445.

Johnson. (See Restoration.)

Government for Tennessee, more efficient for, and other rebel states vetoed, 3696.

Ratification of fourteenth amendment proclaimed—

Alabama, 3857.

Georgia, 3858

Louisiana, 3856.

North Carolina, 3854.

South Carolina, 3855.

Record, Congressional. (See Congressional Record.)

Documents in care of legations referred to, 4070.

Laws for punishing persons abstracting or mutilating, recommended, 2683, 2713, 3940.

Recruit.—One who enlists for service, especially in the Army or Navy. (See Army and Navy.)

Red Cloud Agency, Nebr., deficiency in supplies at, 4312, 4313.

Red Cross, American National.—The Red Cross is "a confederation of societies in different countries for the amelioration of the condition of wounded soldiers in the armies, in campaigns on land or sea." It carries on its work under the sign of a red cross on a white ground used as a flag, always with the national flag, or as an arm badge. By Article 7 of the Geneva Convention this sign protects its wearers as neutral. The society originated with Henri Dunant after the battle of Solferino in 1859, Gustave Moynier of Geneva, president of the "Society of Public Utility of Switzerland," called a meeting "to consider the formation of permanent societies for the relief of wounded soldiers." This was held Feb. 9, 1863, and resulted in an international meeting Oct. 26, following, and a treaty between twelve European governments, assuring neutrality and protection to all working under the Red Cross. This treaty was concluded at Geneva, Aug. 22, 1864. It was adopted by Great Britain, Feb. 18, 1865; Prussia, June 22, 1865; Turkey, July 5, 1865; and Russia, May 22, 1867. The United States Senate acceded to it, March 16, 1882, and it was proclaimed by President Arthur, July 26, 1882. The treaty is now generally observed by civilized governments of the world.

The American National Association of the Red Cross was organized at Washington, D. C., May 21, 1881, and was incorporated for twenty years, July 1, 1881. Miss Clara Barton was elected first president. It was reincorporated April 17, 1893, for the relief of suffering by war, pestilence, famine, flood, fires, and other calamities of sufficient magnitude to be deemed national in extent. The officers of the American organization are: **Board of Consultation**—The President of the United States and Members of the Cabinet. The association was reorganized and incorporated by Congress, 1905. National Headquarters, Room 341, War Department, Washington, D. C. **President**—Woodrow Wilson. **Treasurer**—Sherman Al-

len. **Secretary**—Charles L. Magee. **Chairman of Central Committee**—Maj.-Gen. Geo. W. Davis. **National Director**—Ernest P. Rickenell. **Executive Committee**—Miss Mabel T. Boardman, James Tanner, Charles Nagle, Huntington Wilson, Brig.-Gen. George H. Torney, U. S. A.; Surg.-Gen. Chas. F. Stokes, U. S. N. Associate societies in the various states have done noble work in aiding sufferers by calamity from forest fires, floods, fevers, etc.

On May 10, 1917, President Wilson, President of the Red Cross, appointed a Red Cross War Council of seven members to prepare the organization for the demands to be made upon it by the European War, including the raising of funds. Mr. H. P. Davison, a prominent New York financier, accepted the chairmanship of the War Council.

Red Cross, American National:

Aid furnished Cubans by, discussed, 6284, 6308.

Work accomplished by, in Spanish-American War, discussed, 6320.

Red Cross Association, international conference of:

Held at Karlsruhe, Baden, referred to, 5205.

Report of, referred to, 4856.

Red Cross, International, proposition of Switzerland to extend compact of, in Spanish-American War, discussed, 6336.

Red-Line Map.—An early map of part of North America, discovered by Jared Sparks in the archives of Paris and sent to Daniel Webster during treaty negotiations with Great Britain over the northeastern boundary question. It had been executed in 1746 by D'Anville, and later (1782) sent to the French minister, Vergennes, by Franklin. A strong red line drawn near the ridge in which the Kennebec and Penobscot rivers rise more than favored the English claims respecting the northeastern boundary of the United States. The map was displayed in a secret session of the Senate and before the Maine commissioners, and was, in part at least, the ground on which the Webster-Ashburton treaty was signed.

Red Mud State.—A nickname for New Jersey (q. v.). (See also States): Dominion State was formerly used as a nickname for New Jersey.

Red River:

Exploration of, 386.

Unsuccessful, 396.

Improvement of, progress made in, 1442.

Red, White and Blue Book: 8282.

Redemptioners.—A name applied to a class of indentured servants who came to the American Colonies under bond for a certain number of years in payment for their passage hither. Many were kidnapped and placed in forced slavery for a term of years. They usually served from four to seven years. On their release these redemptioners were awarded fifty acres of land and became free citizens. The system was introduced into Virginia with the first colony in 1607, and in Massachusetts in 1631. It obtained also in Maryland, New York, Connecticut, and Pennsylvania, but was discontinued in 1750.

Referee Board of Consulting Scientific Experts, Agriculture Department.—This is a Federal board under the jurisdiction of the Department of Agriculture which makes researches on scientific questions involved in the food and drug inspection.

Feb. 20, 1908, the Secretary of Agriculture appointed Dr. Ira Remsen, president of Johns Hopkins University; Dr. Russell H. Chittenden, dean of the Sheffield Scientific School, Yale University; Dr. John H. Long of Northwestern University; Dr. Alonzo Taylor, of the University of California; and Dr. Christian A. Herter, of Columbia University, consulting scientific experts of the Department of Agriculture, and four days later organized them into what is known as the Referee Board. This board was appointed in response to a request made to President Roosevelt by a number of manufacturers of articles of food. These manufacturers assured the President that they would discontinue the use of sulphur dioxide, saccharin, and benzoate of soda in food if such a board found them harmful.

It was made the duty of this board to submit to the Secretary of Agriculture opinions independent of those expressed by the Bureau of Chemistry in cases where a great number of food manufacturers of the country claim that the opinions of the Bureau of Chemistry are at variance with the scientific knowledge of the present day.

Questions as to the harmfulness of the use in foods of the following substances were referred to the Referee Board: Benzoate of soda, saccharin, sulphate of copper, sulphur dioxide, and alum. The report of this board led the Secretary of Agriculture to the decision that benzoate of soda may be used in the preservation of food, provided the amount used is clearly stated upon the package of food containing it.

As to saccharin, the board reported that the use in small quantities (0.3 gram per day, or less) added to food is without deleterious or poisonous action, while taken in larger quantities, especially exceeding a grain a day is liable to induce disturbance of digestion. Its substitution for cane or other sugar, must be regarded as substitution.

Conclusions reached in regard to copper salts used as coloring matter for vegetables were that the quality or strength of the food were not injuriously affected. A daily dose of 100 grains of coppered peas or beans would not contain more than 100 or 150 milligrams of copper. Such a bulk of vegetables is so large, however, that it would not likely be maintained as a diet for many days in succession.

Reform Schools. (See District of Columbia.)

Reformer.—A person who endeavors, either by speech or action, to bring about in civilization certain reforms which seem to him to be needful.

Refunding.—The process of substituting a series of low-interest-bearing bonds for those of a higher rate or for a floating debt not funded. Aug. 31, 1865, the debt of the United States amounted to \$2,845,907,626, of which sum only \$1,109,568,192 was funded. By December, 1867, the floating debt, compound interest notes, seven-thirties, and United States notes had been converted into a funded debt of nearly \$700,000,000. The refunding act of 1870 authorized the issue of a certain amount of 5, 4½, and 4 per cent bonds to take the place of the existing bonds, most of which were bearing 6 per cent interest. During the next ten years this substitution was

carried to an extent that decreased the annual interest charges from \$82,000,000 to \$62,000,000. In 1881 the annual interest was decreased nearly \$20,000,000 more by the Windom refunding scheme, which converted \$460,000,000 5 and 6 per cent bonds into bonds bearing 3 and 3½ per cent interest.

Regiment. (See Army and Navy.)

Register of Debates.—A record of the Congressional debates and proceedings from December, 1824, to October, 1837. It was a continuation of the Annals of Congress and contains many valuable state papers as well as the routine Congressional work. The Register of Debates was succeeded by the Congressional Globe. (See also Annals of Congress; Congressional Globe; Congressional Record.)

Register of the Treasury. (See Treasury Department.)

Registered Mails. (See Division of Registered Mails.)

Registration.—A precaution taken in certain states to prevent frauds in elections. It consists of the preparation of lists of the electors of every precinct, voters being required to present themselves before the registrar on specified days prior to election to have their names recorded and to answer questions as to their qualifications as electors. These lists are open to inspection and scrutiny by the public.

Registration Bureau of naturalized citizens, recommended, 4828, 4921, 5099, 5370.

Registry, American, repeal of law denying, to ships built abroad and owned by Americans, recommended, 5985.

Regular U. S. Army and Navy Union.—A patriotic, fraternal, and beneficial organization, chartered under act of Congress, for soldiers' and sailors' rights and benefits. Headquarters, 4 Warder Street, N. W., Washington, D. C. Membership is confined to regulars of the United States Army, Navy, or Marine Corps, whether discharged, retired, or in the service.

Regulators.—In 1768 the people of Orange County, N. C., oppressed by the unjust acts of Edmund Fanning, clerk of the court of Orange, formed an association, headed by Herman Husband and William Hunter, for regulating public grievances and abuse of power. They sent messengers to the governor with a statement of their grievances. The governor and council decided that the course of the Regulators tended to high treason, and on their reassembling in July to hear the report of the messengers, the governor, at the head of a body of troops, compelled them to take the oath of allegiance to the Crown and disperse. Some of the leaders of the Regulators were held to answer in the courts for their actions. The following year another petition was rejected. The Regulators offered an organized resistance to the troops, under Governor Tryon, and at Alamance, on the Haw River, they were routed by the governor and their leaders arrested. Some of these leaders were executed. Martin, the next governor, compromised with the Regulators.

Relations, Foreign. (See the several powers.)

Relief Party.—A political faction in Kentucky politics between 1820 and 1826. The party was composed of debtors and included a majority of the voters. It advocated relief of delinquent debtors and disputed the constitutionality of the replevin act. In 1823 the Supreme Court decided the replevin act to be unconstitutional and in 1824 the legislature of the state repealed the court of appeals act and organized a new court. The Relief party then became known as the New Court party. The Anti-Relief or Old Court party, securing a majority in the legislature in 1827, restored the old court, and the issue was not renewed.

Religious Establishments:

Baptist church in Mississippi Territory, act for relief of, vetoed, 475.

Protestant church at American embassy at Rome, removal of, referred to, 3662, 3717.

Protestant Episcopal church in Alexandria, Va., act incorporating, vetoed, 474.

Separation of church and state, recommendation to declare, 4310.

Value of church property, discussed and taxation of, recommended, 4288, 4310.

Religious Freedom.—The First Amendment to the Constitution of the United States (q. v.) requires that "Congress shall make no law respecting the establishment of religion, or prohibiting the free exercise thereof." Religious freedom doubtless had its greatest inspiration from James Madison while he was in the Virginia Legislature. An attempt was made to levy a tax upon the people of that state "for the support of teachers of the Christian religion." Madison wrote what he called a "Memorial and Remonstrance," in which he appealed to the people against the evil tendency of such a precedent, and which convinced people that Madison was right. A bill was passed providing "that no man shall be compelled to frequent or support any religious worship, place, or ministry whatsoever * * * nor shall suffer on account of his religious opinions or belief; but that all men shall be free to profess, and, by argument, maintain their opinions in matters of religion, and that the same shall in nowise diminish, enlarge, or affect their civil capacities." The religious tests to which many of the states put their office-holders were gradually abandoned, and the final separation of church and state in America came in 1833, when Massachusetts discontinued the custom of paying preachers.

Religious Test. (See Religious Freedom.)

Remonetization.—Legally to re-establish as legal tender anything of value used as money.

Removals from Office.—The Constitution gives the President power to make appointments to civil office by and with the advice and consent of the Senate, but is silent on the subject of removals. Debate on this point arose in Congress in 1789, and it was concluded to allow the power of removal to rest with the President alone. This continued to be the policy of the Government until 1867. In this year charges

were preferred in the House of Representatives against President Johnson, alleging corrupt use of the appointing, pardoning, and veto powers, corrupt disposition of public property, and interference in elections. The charges were referred to the Judiciary Committee and a bill was prepared and passed over the President's veto providing that, with certain exceptions, every officer appointed by the President should retain his office until a successor should in like manner be appointed. This is known as the Tenure-of-Office Act (q. v.). Johnson's suspension of Secretary Stanton in violation of this act led to his impeachment in 1868. The law was repealed in 1887.

Removals from Office (see also Executive Nominations):

Act regulating tenure of certain civil offices, vetoed. (See Tenure-of-Office Act.)

Discretionary authority of President regarding, discussed by President—

Cleveland, 4960.

Grant, 3992.

Jackson, 1351.

Johnson, 3690, 3767, 3820.

Tyler, 1905, 1941.

For partisan purposes, discouraged, 1941.

Partisan interference in elections cause of removal, 1905.

Referred to, 1796, 1911, 1912.

Resolution of Senate regarding, and reply of President Hayes, 4433.

Reno, Jesse L., major-general in Army, nominations of, and reasons therefor, 3362.

Repatriation.—Again to become a citizen after expatriation (q. v.).

Repeal.—To make null, by legislative action, a law previously enacted.

Repeater.—In politics, a person who casts, or undertakes to cast, more than one vote for a given measure, a given candidate, or a set of candidates. Repeating is made a penal offense by state laws.

Representatives.—The constitutional designation of the members of the House of Representatives. They are elected by direct vote of the people, in representative districts fixed by state law, according to the apportionment made every ten years by Congress as to the quota of each state. Representatives must be at least twenty-five years of age, residents of the state in which chosen, and citizens of the United States for seven years previous to their election. (See also Congress; Apportionment; and House of Representatives.)

Representatives:

Appointment of, by President in whose election they have been officially concerned, discussed, 1011, 1120.

Appointments office, relation to of to. (See Executive Nominations.)

Apportionment of—

According to census of 1890 necessary, 5553.

Representatives *Messages and Papers of the Presidents*

Bill for—

Approved and reasons therefor, 2012.

Vetoed, 116.

Delay in making, referred to, 2681.

Election of—

Federal supervision of, recommended, 5490, 5562, 5766.

Gerrymander, discussed, 5643.

Law appointing day for, recommended, 3103, 3181.

List of, appointed to office, referred to, 591, 911, 1196, 2360.

Loyal Senators and, denied admission to seats in Congress, discussed, 3644.

President declines to give names of, applying for office, 1958.

Representatives-at-Large. — Representatives in Congress elected on general tickets, as distinguished from those elected on district tickets, in cases where the state has failed to redistrict after it has become entitled to additional representation in Congress. (See Apportionment; House of Representatives.)

Representatives, House of. (See Congress.)

Republic, Grand Army of the. (See Grand Army of the Republic.)

Republican Party.—In the early days of the Republic Thomas Jefferson became the leader of a party opposed to the monarchical ideas of the Federalists. This party was first known as the Democratic-Republican, and the adherents were called both Democrats and Republicans, usually the latter, until the Jackson-Adams contest.

The Republican party of later days was formed in 1854, with opposition to slavery as its chief tenet. The compromise of 1850 (q. v.) had disrupted the Whig party. The passage of the Kansas-Nebraska act materially influenced the general coalition that followed of Whigs, Free-Soilers, Abolitionists, and Know-Nothings. They assumed the name of Republicans and at once won a plurality in the House of Representatives. They held their first national convention in Philadelphia in 1856, and nominated Fremont and Dayton for President and Vice-President. At the election which followed they were defeated, but in 1859 again came into control of the House.

In 1860 they elected Mr. Lincoln to the Presidency. For the next fourteen years the party was supreme. It enlarged the powers of Congress by a broad construction of the Constitution, carried on the Civil War, abolished slavery, reconstructed the governments of the seceding states, maintained a protective tariff, and refunded the national debt. The party nominees during this period were: 1860, Abraham Lincoln, of Illinois, and Hannibal Hamlin, of Maine; 1864, Abraham Lincoln, of Illinois, and Andrew Johnson, of Tennessee (Johnson becoming President on the death of Lincoln); 1868, Ulysses S. Grant, of Illinois, and Schuyler Colfax, of Indiana; 1872, Ulysses S. Grant, of Illinois, and Henry Wilson, of Massachusetts.

In 1872 those who opposed General Grant's administration left the party and formed the Liberal Republican party (q. v.). In 1874 the party lost control of the House of Representatives and did not regain it until 1880. In 1876 it elected Rufus B. Hayes, of Ohio, and William A.

Wheeler, of New York (see Electoral Commission). In 1880 James A. Garfield, of Ohio, and Chester A. Arthur, of New York, were elected (Arthur becoming President on the death of Garfield), but the party lost control of the House in 1882.

In 1884 James G. Blaine, of Maine, and John A. Logan, of Illinois, were defeated, but the party retained control of the Senate. In 1888 Benjamin Harrison, of Indiana, and Levi P. Morton, of New York, were the candidates and were successful on a tariff issue. The party also regained control of the House in that year. Dissatisfaction with the McKinley tariff law led to the loss of the House by the Republicans in 1890, and in the Presidential campaign of 1892 President Harrison (Whitelaw Reid, of New York, being the Vice-Presidential candidate) was defeated for reelection, and the party lost control of the Senate. In 1894 the Republicans again regained control of the House.

In 1890 the free coinage of silver appeared as an issue and the platform of the Republican convention at St. Louis declared against free coinage "except by international agreement with the leading commercial nations of the world" and favored the gold standard "until such agreement could be obtained." As a result of this opposition to the gold standard many western Republicans left the party and supported William J. Bryan, the Democratic candidate. The Republicans were successful, however, William McKinley, of Ohio, and Garret A. Hobart, of New Jersey, being elected, their popular vote being 7,111,607 and the electoral vote 271.

In 1900 the issues were "Imperialism" (defined by the Democrats as the tendency of the Republic, under Republican rule, to move away from the old democratic practices and beliefs), silver, the tariff and trusts. The Republicans were again successful, William McKinley, of Ohio, and Theodore Roosevelt, of New York, being elected, receiving 7,208,244 popular votes and 292 electoral votes. President McKinley was assassinated Sept. 6, 1901, and died on the 14th of that month. Theodore Roosevelt then succeeded to the Presidency.

During the administration of McKinley and Roosevelt the party passed the Dingley tariff law on protective lines (see Tariff); the Spanish War was carried to a successful conclusion; the rebellion in the Philippines extinguished and the islands given a stable civil government; Hawaii was annexed; and a currency bill establishing the gold standard was passed. During this administration also our new possessions in the far East brought the United States into the group of world powers.

In 1904 there were no well defined issues, the silver and tariff questions being in abeyance. The Republican candidates, Theodore Roosevelt, of New York, and Charles W. Fairbanks, of Indiana, were successful, the popular vote being 7,624,982 and the electoral vote 336.

Besides the suppression of slavery the Republican party has favored full citizenship to emancipated slaves, prompt payment of the national debt, tariff for protection as well as revenue, free ballot, generous pension legislation, increase of the Navy and the strengthening of the coast defenses, a system of national bank currency based on United States bonds deposited with the Secretary of the Treasury, a national circulating medium based on a gold standard, a vigorous foreign policy, a liberal interpretation of the Monroe Doctrine, national protection of timber, encouragement of irrigation, and the build-

ing of the Panama Canal by the United States.

In 1908 the National convention was held at Chicago, June 16 to 19. William H. Taft, of Ohio, was nominated for President, and James S. Sherman, of New York, for Vice-President. The platform adopted declared in favor of equality of opportunity; revision of the tariff; a more elastic currency; the establishment of postal savings banks; an employers' liability law; amending the rules of procedure in Federal courts; conserving the natural resources of the country; the extension of foreign commerce, etc. Taft and Sherman received a plurality of 1,233,494 of the popular vote and a majority in the electoral college of 269.

The national convention of the party met in Chicago in June, 1912, and nominated President Taft for President and James S. Sherman for Vice-President. The platform adopted declared in favor of upholding the courts, for sound banking laws and the usual declaration in favor of the tariff. By the defection of ex-President Roosevelt and his followers, who formed the Progressive party, the Republican ticket was defeated in 1912, and a Democratic President and Congress were elected. The popular vote for President was: Taft, 3,484,956; Roosevelt, 4,119,507; Wilson, Dem., 6,293,019. The electoral vote stood: Wilson, 435; Roosevelt, 88; Taft, 8.

The 1916 convention met in Chicago in June, and after conferences with the Progressive party, which met at the same time in the same city, Mr. Roosevelt's name was rejected and Supreme Court Justice Charles E. Hughes was nominated to head the national ticket, and Charles W. Fairbanks was named for vice president. The platform advocated woman suffrage as a measure of justice to one-half the adult people of the country. At the election in the following November, Mr. Hughes was defeated by President Wilson by a popular vote of approximately 9,120,700 to 8,539,000.

Republican River, bridge over, reconstruction of, recommended, 4777.

Republican Valley Railroad, right of way across Otoe and Missouri Reservation, Nebr., for, bill for, 4681.

Repudiation.—The refusal of a state or government to pay or to be bound by debts contracted by a previous administration. In 1790 the debts of all the states of the Union were assumed by the National Government, partly on the ground of justice, because they had been contracted in the prosecution of the Revolutionary War, and partly on the ground of expediency, as this action tended to strengthen the credit of the states. For forty years thereafter the states remained almost free from debt. Bonds of the several states were easily disposed of abroad, and by 1840 an aggregate of \$200,000,000 had been sold. In that year Indiana found it impossible to pay the interest on her outstanding bonds, and it was only by strong efforts that Ohio managed to meet her obligations. In 1842 the Bank of Pennsylvania failed, and soon afterwards Pennsylvania, Maryland, Mississippi, Michigan, Louisiana, Indiana, and Illinois found themselves almost bankrupt. They all suspended payment of interest on their debts, but Mississippi, Michigan, Louisiana, and North Carolina felt constrained to repudiate the capital as well as interest.

It was in Mississippi that the word "repudiation" originated in this connection. Governor McNutt, in a message to the legislature, suggested a plan for "repudiating

the sale of certain of the state bonds on account of fraud and illegality." The bonds fell into default and an appropriation for their payment was overwhelmingly defeated at the polls in 1852. Michigan repudiated certain canal bonds. The southern states came out of the Civil War with heavy indebtedness and diminished resources, and were in some instances almost bankrupt. In the years immediately following the close of the Civil War most of the southern states compromised or readjusted their bonded indebtedness, and in some states the legislature declared certain bonds fraudulent, illegal, and void. During the depression following the panic of 1873 some cities, towns, and counties endeavored to repudiate their bonds, but the Supreme Court of the United States gave judgments against them.

The eleventh amendment forbids suits against the states. In 1903 certain of the repudiated bonds of North Carolina came into the possession of the State of North Dakota, and North Carolina was sued in the Supreme Court by the latter State for payment. The Supreme Court, by a decision of Feb. 1, 1904, held that North Carolina was liable for and must pay both principal and interest on the bonds in question. Some European countries have also at times repudiated their obligations.

Requisitions.—Under the Articles of Confederation the Continental Congress had only one means of raising money—by requisitions upon the states. Between 1782 and 1786 requisitions amounting to more than \$6,000,000 had been made. Only one-sixth of this had been paid by March, 1787. Under the Constitution the President may make requisitions upon the state for men to assist the National Government in time of war, but there is no provision for requisitions of money. Instead that instrument provides for the expenditures of the Government by duties on imports and taxes collected from the citizens.

Resaca (Ga.), Battle of.—March 14, 1864, Gen. Sherman was placed in command of the military Division of the Mississippi, which was composed of the Army of the Cumberland, under Maj.-Gen. Thomas; the Army of the Tennessee, under Maj.-Gen. McPherson, and the Army of the Ohio, under Maj.-Gen. Schofield, and numbered a total of 98,797 men and 254 guns. The Confederate forces under Gen. Johnston were estimated at 60,000. After the battle of Chattanooga the Confederates had retreated to Dalton, Ga., thirty-nine miles southeast of Chattanooga and ninety-nine miles northwest of Atlanta. May 4, Sherman made a demonstration in front of the Confederate position on Rocky Face Mountain, northeast of Dalton, while McPherson, with some 40,000 men, attempted to turn the Confederate left and occupy Resaca. Johnston thereupon, on May 13, evacuated Dalton and fell back upon Resaca. Polk was posted on Johnston's left, resting on the Oostanaula River. Hardee in the center, and Hood on the right. Sherman laid a pontoon bridge across the Oostanaula and sent a division across to threaten Johnston's connections with Rome, while the main body of the army pressed Resaca in front. May 14 an attack by a portion of Sherman's force was repulsed with a loss of 1,000 men. Johnston attempted to turn Sherman's left flank, which gave McPherson a good position, to recover which the Confederates fought stubbornly till 10 o'clock at night. Skirmishing was renewed the next morning and continued all day. During the night of the 15th Johnston again retreated. Sherman's losses

during the two days were between 4,000 and 5,000 in killed and wounded and missing. Johnston's losses aggregated 2,500.

Resaca de la Palma (Tex.), Battle of.—On May 9, 1846, the day following the battle of Palo Alto, Gen. Taylor's army of 2,200 proceeded on the way toward Fort Brown. When about three miles from the Rio Grande River, Arista's army of 5,000, which had been slowly retreating before the advancing Americans, halted in the valley of Resaca de la Palma (dry river bed of the palm) and prepared to give battle. At 3 o'clock in the afternoon the action began. Before dark the Mexicans were completely routed. They fled in disorder across the river to Matamoras. Eight pieces of artillery, large quantities of ammunition, 3 standards, and about 100 prisoners, including Gen. La Vega and other officers, fell into the hands of the Americans. The total casualties in the Mexican army were 755. The American loss was 107.

Resaca de la Palma, Tex., battle of, referred to, 2295, 2300, 2342.

Reservations. (See Indian Reservations; Lands, Indian; Military Reservations; Reservations, Public; Washington City.)

Reservation, Public:

Discussed 6346.

Lands set apart as, by proclamation of President—

Cleveland, 5859, 5864, 6122, 6205, 6207, 6209, 6211, 6213, 6215, 6216, 6218, 6219, 6221, 6222, 6225, 6227.

Harrison, Benj., 5577, 5590, 5595, 5686, 5695, 5705, 5719, 5722, 5786, 5792, 5795, 5797, 5804, 5810, 5811, 5814, 5815.

Reserve Bank. (See Currency Law.)

Reserve Banking System.—The banking and currency law, known as Federal Reserve act, was passed Dec. 23, 1913.

Under the system known as the National banking system, which was inaugurated at the latter end of the civil war, the National banknote currency was based upon Government bonds deposited in the Treasury, and the currency thus issued has been classed by economists as bond-secured currency. This plan was evolved not only to nationalize and unify the currency, which had theretofore consisted of notes issued by State banks, but as well to create a market for United States bonds, and in this way to sustain their value. It was entirely successful for the latter purpose, but has outworn its usefulness as a banking system because of its entire want of elasticity.

The Federal Reserve act is the result of a long discussion by statesmen, financiers, economists and bankers, and is a constructive measure based upon and growing out of many bills which have been introduced within the past twenty years. Under it twelve cities known as Federal Reserve cities, are established, and the (continental) United States is divided into twelve geographical districts, each district containing one of the reserve cities. The twelve districts and their respective reserve cities are as follows:

Federal Reserve Districts.—No. 1.—Maine, New Hampshire, Vermont, Massachusetts, Rhode Island, and Connecticut. Federal Reserve City, Boston, Mass.

No. 2.—The State of New York. Federal Reserve City, New York.

No. 3.—New Jersey and Delaware; all that part of Pennsylvania east of the western boundary of McKean, Elk, Clearfield, Cambria, and Bedford Counties. Federal Reserve City, Philadelphia, Pa.

No. 4.—Ohio; all that part of Pennsylvania west of district No. 3; Marshall, Ohio, Brooke, and Hancock Counties, W. Va.; all that part of Kentucky east of the western boundary of Boone, Grant, Scott, Woodford, Jessamine, Garrard, Lincoln, Pulaski, and McCreary Counties. Federal Reserve City, Cleveland, Ohio.

No. 5.—District of Columbia, Maryland, Virginia, North Carolina, and South Carolina; all of West Virginia except Marshall, Ohio, Brooke, and Hancock Counties. Federal Reserve City, Richmond, Va.

No. 6.—Alabama, Georgia, and Florida; all that part of Tennessee east of the western boundary of Stewart, Houston, Wayne, Humphreys, and Perry Counties; all that part of Mississippi south of the northern boundary of Issaquena, Sharkey, Yazoo, Kemper, Madison, Leake, and Neshoba Counties; all of the southeastern part of Louisiana east of the western boundary of Pointe Coupee, Iberville, Assumption, and Terrebonne Parishes. Federal Reserve City, Atlanta, Ga.

No. 7.—Iowa; all that part of Wisconsin south of the northern boundary of Vernon, Sauk, Columbia, Dodge, Washington, and Ozaukee Counties; all of the southern peninsula of Michigan, viz., that part east of Lake Michigan; all that part of Illinois north of the southern boundary of Hancock, Schuyler, Cass, Sangamon, Christian, Shelby, Cumberland, and Clark Counties; all that part of Indiana north of the southern boundary of Vigo, Clay, Owen, Monroe, Brown, Bartholomew, Jennings, Ripley, and Ohio Counties. Federal Reserve City, Chicago, Ill.

No. 8.—Arkansas; all that part of Missouri east of the western boundary of Harrison, Daviess, Caldwell, Ray, Lafayette, Johnson, Henry, St. Clair, Cedar, Dade, Lawrence, and Barry Counties; all that part of Illinois and Indiana not included in district No. 7; all that part of Kentucky not included in district No. 4; all that part of Tennessee and Mississippi not included in district No. 6. Federal Reserve City, St. Louis, Mo.

No. 9.—Montana, North Dakota, South Dakota, and Minnesota; all that part of Wisconsin and Michigan not included in district No. 7. Federal Reserve City, Minneapolis, Minn.

No. 10.—Kansas, Nebraska, Colorado, and Wyoming; all that part of Missouri not included in district No. 8; all that part of Oklahoma north of the southern boundary of Ellis, Dewey, Blaine, Canadian, Cleveland, Pottawatomie, Seminole, Oklahoma, McIntosh, Muskogee, and Sequoyah Counties; all that part of New Mexico north of the southern boundary of McKinley, Sandoval, Santa Fe, San Miguel, and Union Counties. Federal Reserve City, Kansas City, Mo.

No. 11.—Texas; all that part of New Mexico and Oklahoma not included in district No. 10; all that part of Louisiana not included in district No. 6; and Pima, Graham, Greenlee, Cochise, and Santa Cruz Counties, Ariz. Federal Reserve City, Dallas, Tex.

No. 12.—California, Washington, Oregon, Idaho, Nevada, and Utah; all that part of Arizona not included in district No. 11. Federal Reserve City, San Francisco, Cal.

Every National bank is required to become a stockholder in the Federal Reserve bank of the district in which it is situated, and any state bank or trust company which

complies with certain specified requirements is permitted to become a member bank. There are at the present time approximately 7,500 National banks in the United States which have thus been required to become member banks.

The largest district, in respect to number of member banks—the seventh or Chicago district—has 952 member banks. The smallest district—the sixth or Atlanta district—has 372 member banks. The number of member banks may largely increase in the near future from the addition of State banks and trust companies as member banks.

Each member bank is required to subscribe to the stock of the Federal Reserve bank of its district in the amount equal to 6 per centum of its paid-up capital stock and surplus. The Federal Reserve bank does not do business with the public in the sense that banks usually do; it may better be described as a bank of banks. It is made a depository for a certain proportion of the reserve of all the member banks, and in addition may also be a depository for Government funds. An important function is as a bank of issue and redemption of currency, for it may secure from the Treasury Government notes known as Federal Reserve notes, which it is authorized to issue against commercial paper with a minimum gold reserve of 40 per centum. Besides this, Federal Reserve banks are granted certain powers in the matter of operations in the open market, such as the purchase of commercial paper, foreign exchange, etc., and in a general way are expected to perform important functions as clearing houses between their member banks.

Each Federal Reserve bank has nine directors, three of whom represent the member banks, three represent commercial, agricultural or other industrial pursuits (these six being chosen by the member banks), and finally three Government directors chosen by the Federal Reserve Board. These nine directors are charged with the duty of appointing all necessary officers, including the active manager of the bank, who is designated as its President or Governor.

Under the act the whole system is under the supervision of a central board in Washington, known as the Federal Reserve Board, consisting of the Secretary of the Treasury and the Comptroller of the Currency acting ex-officio, and five members named by the President with the approval of the Senate. The five members first selected (who took oath of office August 10, 1914) are as follows:

Charles S. Hamlin, Governor, term of office, 2 years.

Frederic A. Delano, Vice-Governor, term of office, 6 years.

Paul M. Warburg, term of office, 4 years.

W. P. G. Harding, term of office, 8 years.

A. C. Miller, term of office, 10 years.

At the termination of the term of office of these five members all subsequent appointees will be named for ten-year terms, except, of course, those who may be selected to fill unexpired terms.

The salary of the members of this board is \$12,000 per annum each, which salaries, together with all other expenses of operating the system, are assessed against the Federal Reserve banks in proportion to their capital stock and surplus. Secretary to the board, H. Parker Willis; Assistant Secretary, Sherman Allen. Headquarters, Washington, D. C.

When organized, the capital of the Reserve banks of the system was as follows:

Dist. No. 1 (Boston)	\$9,924,543
Dist. No. 2 (New York)	20,687,606
Dist. No. 3 (Philadelphia)	12,500,738
Dist. No. 4 (Cleveland)	12,100,384
Dist. No. 5 (Richmond)	6,512,713
Dist. No. 6 (Atlanta)	4,702,558
Dist. No. 7 (Chicago)	12,967,701
Dist. No. 8 (St. Louis)	6,367,006
Dist. No. 9 (Minneapolis)	4,702,925
Dist. No. 10 (Kansas City)	5,600,977
Dist. No. 11 (Dallas)	5,655,924
Dist. No. 12 (San Francisco) ...	8,115,494

Resolute, The, restoration of, to British Government, discussed, 2953.

Restoration of Southern States (see also Reconstruction):

Acts regarding, vetoed. (See Reconstruction.)

Discussed by President Johnson, 3551, 3570, 3593, 3643, 3696, 3729, 3734, 3756, 3781, 3846, 3848, 3870.

Provisional governor appointed for—Alabama, 3521.

Florida, 3527.

Georgia, 3516.

Mississippi, 3512.

North Carolina, 3510.

South Carolina, 3524.

Texas, 3519.

Restraint of Trade.—Conduct in the industrial or commercial world which is calculated to diminish the sum-total of trade, or to prevent freedom of trade by all persons desiring to engage in it. The restraint is effected by monopoly or by action tending to monopoly. (See Anti-Trust Law and Sherman Act.)

Resumption. (See Specie Payments.)

Retroactive.—Imposing a punishment for an act performed prior to the passage of the law. A retroactive law, while permissible as to civil conduct, is inhibited by the Constitution as to criminal conduct. (See Ex Post Facto.)

Returning Boards.—Boards established in certain states for the purpose of canvassing the returns of an election. The reconstructed state governments of South Carolina, Florida, and Louisiana, created by statute returning boards to canvass and certify to the returns of elections held in those states. In violation of the generally accepted principle of state government, these returning boards were clothed with judicial as well as ministerial powers. This subject is of interest chiefly in relation to the Presidential election of 1876, in which the result depended upon the action of these boards.

Revenue Cutter.—A small armed vessel owned and used by the Government to enforce customs regulations.

Revenue-Cutter Service.—The Revenue-Cutter Service is a military arm of the Government attached to and under the direction of the Treasury Department. The Service was organized in 1790 and constituted the original naval force of the country. There being at that time no Navy Department, the Service was placed under the Treasury Department, where it has remained ever since. It is charged with the enforcement of the navigation and customs laws of the United States, the assistance of vessels in distress, the protection of the sealing industry in Alaska, the en-

forcement of the quarantine laws, the destruction of derelicts and other floating dangers to navigation, and numerous other duties appropriate to its class of vessels. Each winter, by direction of the president, a number of the cutters patrol the coast for the special purpose of assisting vessels in distress. The Service cooperates with the Navy when directed by the president and has so cooperated in every war in which the United States has been engaged.

The officers of the Service are commissioned by the president and hold rank by law with officers of the Army and Navy as follows: Captain-Commandant with Colonel in the Army and Captain in the Navy; Senior Captains and Engineer-in-Chief with Lieutenant-Colonels in the Army and Commanders in the Navy; Captains with Majors in the Army and Lieutenant-Commanders in the Navy; First Lieutenants with Captains in the Army and Lieutenants in the Navy; Second Lieutenants with First Lieutenants in the Army and Lieutenants (Junior Grade) in the Navy; Third Lieutenants with Second Lieutenants in the Army and Ensigns in the Navy.

There are now in the Service 228 commissioned officers and cadets on the active list, and 1,500 petty officers and enlisted men. Commissioned officers of the line are appointed from Cadet graduates of the School of Instruction at New London, Ct. The Cadet course covers three years and embraces profession and academic subjects. Cadets are appointed after competitive examinations, conducted by boards of commissioned officers of the Revenue-Cutter Service.

Appointments to the Engineer Corps are made after competitive examination, and successful candidates are appointed Cadet Engineers for a period of six months prior to being commissioned Third Lieutenants of Engineers in the Service. Candidates for the Engineer Corps must be not less than twenty-one nor more than twenty-six years of age.

In January, 1915, the Revenue Cutter Service was combined with the Life-Saving Service to form the Coast Guards. (See Coast Guards.)

Revenue-Cutter Service:

Act relating to revenue cutters and steamers vetoed, 2219.

Land reserved for use of, 6701.

Organization of, 1088.

Retirement of officers in, 6708.

Steam vessels in, employment of, recommended, 1121.

(See also Treasury Department of.)

Revenue Flag.—The last act of the Fourth Congress, March 2, 1799, was to pass a law to regulate the collection of duties and tonnage and to establish ports of entry. In order that the vessels of the collection officers might be easily recognized, Congress ordered that vessels in the revenue service carry a flag of sixteen perpendicular stripes, alternate red and white, the union of the ensign bearing the arms of the United States in dark blue on a white field beneath a semicircle of thirteen blue stars.

Revenue Inspectors, salary of, 127.

Revenue Officers, official conduct of, referred to, 912.

Revenue, Public.—In a political sense the revenue of a state is the annual income derived from taxation, customs, and other sources, to be appropriated to governmental expenditures. The principal sources of

revenue of the United States are customs, internal revenue, sale of public lands, and miscellaneous receipts. Customs receipts have always formed the bulk of the revenue. In 1789 the total revenues of the Government amounted to \$4,410,000. This total gradually swelled to \$56,000,000 in 1860. Then the increased duties of all kinds, imposed as war measures, augmented the revenues to hundreds of millions, reaching the maximum of \$520,000,000 in 1866. Then it declined to an average of about \$350,000,000 between 1878 and 1898. In 1901 the revenue, increased by a Spanish-American War tax, was \$587,685,338.

The income tax law of 1913, during the first year of its operation, yielded but \$28,253,000 in revenue, a little more than half the amount estimated by Treasury officials. It was disclosed upon analysis that nearly 58 per cent of the total was paid by residents of three States—New York, New Jersey and Pennsylvania.

The corporation excise tax of 1909, modified in 1913, produced for the fiscal year 1913-14 a total of \$43,127,000.

The decline in customs duties consequent upon the European war in 1914 caused Congress to enact, upon the urgent recommendation of President Wilson (page 7980), a special war revenue tax, to be in effect for one year.

ORDINARY RECEIPTS BY FISCAL YEARS

Years Ending June 30	Customs	Internal Revenue	Miscellaneous Items	Total Ordinary Receipts
1902..	\$254,444,708	\$271,800,122	\$36,153,403	\$562,478,233

Revolution.—The overthrow of an established political system or a radical change of government effected by extra legal means is known as a political revolution. Among the most important revolutions of modern history are the English Revolution of 1642-1649, which culminated in the execution of Charles I and the establishment of the Protectorate under Cromwell; the second English Revolution, resulting from the Stuart tyranny after the Restoration known as the "Glorious Revolution of 1688," which, under William III, firmly established the principles of free constitutional government in Great Britain; the American Revolution which resulted in the establishment of the Republic of the United States in 1776; the French Revolution, which broke out in Paris in 1789 and was followed by a reign of blood and terror, terminating with the execution of Robespierre in 1794; the French Revolution of 1830, which exiled Charles X and elevated Louis Philippe to the throne; the uprising of the French people in 1848, which deposed Louis; the Italian Revolution of 1859-60, whereby the various minor sovereigns of the peninsula were driven into exile and the whole territory came under the dominion of King Victor Emmanuel; the insurrections which established the third French Republic in 1870 and the Republic of Brazil in 1889.
Revolutionary Convention. (See Convention, Revolutionary.)
Revolutionary Pensions. (See Pensions.)
Revolutionary War.—The war for redress of grievances, and later for independence, waged by the thirteen American Colonies against the mother country, Great Britain. The Revolution had several causes. Increase in population in America naturally caused a desire for independence, especially after the expulsion of the French. In 1763 the Government of George III resolved to enforce more strictly the navigation act and other laws restricting American trade in the

Revolutionary Messages and Papers of the Presidents

Interest of England, to station garrisons in America, and to pay a part of the expense by a stamp tax. The Stamp Act aroused violent opposition, expressed through the Stamp Act Congress of 1765. Taxation without representation in Parliament was declared illegal and tyrannous. The British Government persisted in the principle, taxing various imports from 1767 to 1770 and tea thereafter. The Boston Tea Party led Parliament to pass acts retaliating on that city and altering the charter of Massachusetts. The Colonies were by this time united, through their committees of correspondence, in opposition to the Crown. Sept. 5, 1774, the First Continental Congress was convened in Philadelphia. It published a declaration of rights, protested to the King and Parliament, and entered into a non-importation agreement. April 19, 1775, Gen. Gage, the British commander in Boston, met with the first armed resistance at Lexington and Concord, and war was begun. The Colonists were assisted by France, Spain, and in the later years of the struggle, by the Netherlands.

Following are the principal events of the Revolution: Boston Massacre, March 5, 1770; Boston Tea Party, Dec. 16, 1773; First Continental Congress, Sept. 5, 1774; battles of Lexington and Concord, April 19, 1775; meeting of the Second Continental Congress and capture of Ticonderoga, May 10; Mecklenburg Declaration of Independence, May 20; battle of Bunker Hill, June 16 and 17; evacuation of Boston, March 17, 1776; British repulse off Charleston, June 28; Declaration of Independence, July 4; battle of Long Island, Aug. 27; battle of White Plains, Oct. 28; loss of Forts Washington and Lee, retreat through New Jersey and battle of Trenton, end of 1776; battle of Princeton, Jan. 3, 1777; battle of Bennington, Aug. 16; battle of Brandywine, Sept. 11; battle of Stillwater, Sept. 19; battle of Germantown, Oct. 4; battle of Saratoga, Oct. 7; Burgoyne's surrender, Oct. 17; adoption of the Articles of Confederation, Nov. 15; treaty with France, Feb. 6, 1778; battle of Monmouth, June 28; storming of Stony Point, July 16, 1779; victory of Paul Jones, Sept. 23; British capture Charleston, May 12, 1780; battle of Camden, Aug. 16; Arnold's treachery exposed, Sept. 23; battle of King's Mountain, Oct. 7; battle of the Cowpens, Jan. 17, 1781; Articles of Confederation ratified by the last of the States, March 1; battle of Guilford Court-House, March 15; battle of Entaw, Sept. 8; surrender of Cornwallis at Yorktown, Oct. 19; peace of Paris, Sept. 3, 1783; evacuation of New York, Nov. 25, 1783. The United States then comprised the territory from Canada to Florida and from the Atlantic Ocean to the Mississippi River. The total number of enlistments in the American army during the war was 368,410; the total cost was \$135,193,703.

Rhode Island.—One of the thirteen original states of the Union and the smallest of the United States; nicknamed, "Little Rhody;" motto, "Hope." It lies between lat. 41° 18' and 42° 1' north (not including Block Island) and long. 71° 8' and 71° 53' west. It is bounded on the north and east by Massachusetts, on the south by the Atlantic Ocean, and on the west by Connecticut, and has an area of 1,248 square miles. It is an important manufacturing state, being first in proportion to its population in the manufacture of cotton, woolen, worsteds, etc., and second only to Massachusetts in the production of cotton goods.

Rhode Island was visited by Verrazano in 1524 and probably by Norse navigators in the twelfth century. Roger Williams made the first permanent settlement at Providence in 1636. The first charter was granted in 1643 and a more liberal one in 1663. Rhode Island ratified the Federal Constitution in 1790. The official name of the state is "The State of Rhode Island, and Providence Plantations."

Statistics of agriculture collected for the last Federal census place the number of farms in the state at 5,292, comprising 443,308 acres, valued, with stock and improvements, at \$32,990,739. The value of domestic animals, poultry, etc., was \$3,276,472, including 54,148 cattle, valued at \$1,309,088; 9,547 horses, \$1,424,177; 14,038 swine, \$123,647; 6,789 sheep, \$32,637; poultry, \$368,018. The yield and value of field crops in 1911 was: Corn, 11,000 acres, 495,000 bushels, \$470,000; oats, 2,000 acres, 58,000 bushels, \$34,000; potatoes, 5,000 acres, 550,000 bushels, \$583,000; hay, 61,000 acres, 61,000 tons, \$1,470,000. Stone is the principal mineral product of the state. Manufacturing made great progress during the decade ending in 1910 when the last census was taken. At the end of this period there were 1,944 establishments, with an aggregate capital of \$289,416,000; consuming raw materials which cost \$158,652,000, paying wages totaling \$18,130,000 to 112,565 employees, and selling the output for \$279,438,000. The leading industry is cotton spinning, 2,055,912 spindles, capitalized at \$43,527,584, producing an output of \$30,628,843. In worsted goods manufacture \$38,789,543 was invested, which produced \$14,377,596. Foundries capitalized at \$23,728,295 produced a finished product valued at \$13,959,283. The dyeing and finishing industry, closely allied with the textile manufactures, involved \$16,969,936 capital and added \$9,981,457 to the value of goods. Jewelry manufacture is capitalized at \$11,199,233, and produces an output selling at \$14,131,756. The manufacture of silverware is capitalized at \$8,552,489, and produces \$5,323,264. The latest industry to take on large proportions is the manufacture of rubber goods. The bonded debt of the state in 1910 was \$4,800,000. The real and personal property was valued at \$511,960,122. The receipts and expenditures of the State Treasurer each

vary between \$2,000,000 and \$2,500,000. The population according to the Federal census of 1910 was 542,610. (See also Providence Plantations.)

Rich Mountain (W. Va.), Battle of.—

Soon after the ordinance of secession had been ratified by the State of Virginia, Maj.-Gen. George B. McClellan, who had been assigned to the command of the Federal forces in the Department of the Ohio, issued an address to the loyal citizens of western Virginia. Many enlistments from that State followed, and he determined to occupy at least part of it with Federal troops. Accordingly, May 23, 1861, the First Virginia Regiment, 1,100 strong, which had been organized in Cincinnati by Virginians, crossed the Ohio with the Fourteenth and Sixteenth Ohio regiments and took possession of Parkersburg. The Confederates, commanded by Governor Wise under the immediate direction of Col. Porterfield, retired after several skirmishes to the base of Rich Mountain, near Beverly, in Randolph County. McClellan's forces in the neighborhood amounted to more than 30,000 men on July 4, while the Confederates could scarcely muster 10,000. July 11, Gen. Rosecrans made a detour of the mountain and forced the surrender of 600 men under Col. Pegram, and Gen. McClellan defeated the main body of the Confederates under Gen. Garnett. The Union losses in the actions at Rich Mountain were 11 killed and 35 wounded. The loss to the Confederates was 200 killed and 1,000 prisoners. Seven pieces of artillery also fell into the hands of the Union forces.

Richmond (Ky.), Battle of.—After the Confederates had evacuated Corinth, Miss., in the summer of 1862, they began to concentrate in the vicinity of Chattanooga, Tenn. By the middle of August they had collected an army estimated at from 55,000 to 65,000 under Gen. Braxton Bragg. Gen. E. Kirby Smith, with about 20,000 men, passed up the Cumberland Mountains on the east, and, going through the gaps, invaded Kentucky. At Richmond he encountered Gen. Manson (Aug. 30), who was defending the place with a garrison of Buell's army. Manson was defeated and Smith proceeded to Frankfort. Loss about 5,000 on each side.

Richmond, Va., Government of Confederate States transferred to, 3225.

Riders.—Objectionable legislative measures likely to be vetoed if passed as separate bills, but which are made part of important bills, such as appropriations for current expenses, etc., in order to insure Executive sanction. The rider is an encroachment on the independence of the Executive. In many of the states a rider has been made an impossibility by confining each bill to a single subject or by permitting the veto of single clauses of appropriation bills. It has never been prohibited in Congress. Riders were numerous during the anti-slavery contest, the Civil War, and the conflict with President Johnson. A number of important bills have been passed as riders, among them the bill increasing salaries in 1873. The first use of the rider of national importance was the joining in 1820 of the bill for the admission of Maine to that permitting slavery in Missouri, so as to compel the acceptance of both or neither. These were afterwards separated. The Army appropriation bill of 1856 as sent from the House to the Senate had a rider prohibiting the employment of Federal troops for the enforcement of Territorial law in Kansas. Riders were added to all appropriation bills by the Democratic majority in the House during the first session of the Forty-seventh Congress in 1879; but all these bills were vetoed by the president and were finally passed without riders. The Platt Amendment (see Cuba) was a rider to the Army Appropriation Bill of 1901.

Right of Search.—Great Britain has always claimed the right to search vessels of other powers upon the high seas for deserting English sailors and for contraband goods in time of war. This has not been exercised with regard to the vessels of the United States since the War of 1812, though nothing was said in the treaty of Ghent about search and impressment of sailors. Before that war this right was exercised and search was made for English sailors, and many American seamen were impressed as deserters from the English navy, and search was made for such goods as were declared subject to confiscation in accordance with the paper blockade of the continent and the orders in council. This was one of the grievances that brought on the War of 1812. The right of search for the purpose of suppressing the slave trade was carefully regulated by several treaties between Great Britain and the United States.

Riparian Rights.—Rights to the usage of water-front for various purposes.

River and Harbor Bills.—There has always been some objection to appropriations for the improvement of rivers and harbors on the ground that the benefits, while mostly local, are paid for out of the general Treasury. The first bill for harbor improvements in the United States was passed March 3, 1823. Since 1854, appropriations for the improvement of rivers and harbors were frequently inserted in the regular appropriation bill. Separate bills for this purpose were vetoed by Presidents Tyler (2183), Polk (2310), Pierce (2789), and Grant (4236). In 1870 a \$2,000,000 appropriation was made. This was the largest up to that time. After this they gradually increased until they reached nearly \$19,000,000 in 1882-83. President Arthur vetoed the bill carrying this appropriation (4707), but it was passed over his veto. Biennial appropriations have since been the rule. The appropriation for 1891 was \$25,000,000. The expenditures of 1896, including the direct appropriations of about \$30,000,000 and the contracts for future ex-

penditures, amounted to a total of about \$80,000,000. The bill carrying this amount was vetoed by President Cleveland (6109), but was passed over his veto. River and harbor bills have since been passed in 1899, 1900, and 1902, and 1905.

River Crow Indians. (See Indian Tribes.)

River Raisin (Mich.), Battle of.—After Col. Lewis had occupied Frenchtown, Mich., Jan. 18, 1813, with 650 men, he was reinforced by Gen. Winchester with about 300 from the latter's camp on the Maumee River. These were stationed along the river outside the town. Before daylight on the morning of Jan. 22 they were attacked by 500 British under Col. Proctor, and 600 Indians under Round Head and Walk-in-the-Water. Some 200 Americans were killed or wounded in battle or massacred after their surrender and Winchester and 700 men were made prisoners. Only 33 of Winchester's detachment which arrived at Frenchtown are known to have escaped. The British lost 24 killed and 158 wounded.

Roads, Post. (See Mail Routes and Transcontinental Highways.)

Roads, Public.—The Sixty-second Congress made an initial appropriation of \$500,000 to aid the state in improving public high-

ways and an additional sum of \$25,000 was voted for a committee to investigate the subject of federal aid in state road-building.

History.—The majority of the main Roman highways were built at public expense. They were maintained in part by the labor of soldiers and convicts or slaves, or by enforced service, which, in some instances, took the form of taxation. But in whatever form the maintenance, it was at the expense of the district through which the road passed. Tolls as a means of repairing highways were unknown to the Romans. The supervision of the roads was intrusted to men of the highest rank. Augustus himself seems to have made those about Rome his special care. Cross roads were placed in charge of the local magistrates, although occasionally a portion of a road was assigned to some landowner to maintain at his own cost.

The present road system of France was founded by Napoleon. He built many roads through the empire, among them the road over the Simplon Pass, which was commenced in 1800 and required six years for completion. It was under him that the work was systematized and placed in the hands of a permanent body of engineers.

In 1775 Tresaguet, a French engineer, published a treatise on broken stone roads. His work preceded that of Macadam and Telford by about forty years.

The first record of road legislation in England goes back as far as 1285, and it provides that the trees and bushes on both sides of all roads for a distance of 200 feet shall be cut away to prevent robbers from lurking therein and rushing upon victims unawares.

In 1346 Edward III. authorized the first toll to be levied for the repair of roads. This commission was granted to the master of the Hospital of St. Giles and to John Holborn, authorizing them to levy toll on vehicles passing on the roads leading from the hospital to the old Temple of London, and also on an adjoining road called the Portal. In 1523 Parliament passed its first act relative to the repair of roads.

State Highway Construction and state aid for local highway improvements are being carried on by a number of states on a large scale. Massachusetts and New Jersey, which began state aid for work in the early nineties, continue to improve, while New York, Pennsylvania, Maryland and California are carrying on extensive operations, and altogether more than half the states of the Union have taken up highway improvement in some form. At the beginning of 1912 Massachusetts had built more than 880 miles of road at a cost of about \$9,000 per mile. In Delaware a state highway has been laid out from a point on the southern boundary to a point near Wilmington in the north, about a hundred miles. This road is to be built under the direction and at the expense of General Coleman Du Pont. New York State in 1912 voted an appropriation of \$50,000,000 for the purpose of road building.

Federal Aid.—President Wilson, July 11, 1916, signed a bill, authorizing an expenditure of \$85,000,000 in five years by the Federal government on condition that the states should expend amounts similar to those apportioned to them; \$75,000,000 was for rural post roads, and \$10,000,000 for roads and trails in national forests.

The Office of Public Roads in the Department of Agriculture issued a bulletin in 1909 showing the mileage of public roads in the United States as follows:

Total mileage of stone roads in United States.....	59,237
--	--------

Total mileage of gravel roads in United States.....	102,870
Total mileage of sand-clay, brick, bituminous-macadam and other improved roads in U. S.....	28,372
Total mileage of all public roads in United States.....	2,199,645
Total mileage of all improved roads in United States.....	190,476
Percentage of all roads improved.....	8.66

The same document gives the road mileage of the leading states as follows:

Indiana.....	24,955	Washington....	4,520
Ohio.....	24,106	Missouri.....	4,755
New York.....	12,787	South Carolina..	3,534
Wisconsin.....	10,167	Alabama.....	3,263
Kentucky.....	10,114	Pennsylvania....	3,364
Illinois.....	8,914	Tennessee.....	5,353
California.....	8,587	New Jersey.....	3,377
Massachusetts..	8,463	Florida.....	1,752
Georgia.....	5,978	Maryland.....	2,142

(See also Transcontinental Highways.)

Roads, Public and Rural Engineering, Office of, Agriculture Department.—This is a bureau of the Department of Agriculture devoted to the collection and dissemination of information regarding road management; experiments in road making and road improvement; and scientific tests of road materials. The office lends its aid to local organizations having for their object the improvement of public roads by supplying, upon request, drafts of tentative constitutions and by-laws and outlines of a working policy. The advice given depends largely upon the objects for which the association is formed and the prevailing local conditions. The advice given through correspondence is supplemented by the distribution of various publications on road-making and maintenance; and where the movement is of sufficient magnitude to warrant it, representatives of the Office of Public Roads and Rural Engineering are sent to address the local organizations and point out ways and means by which they can accomplish the best results.

Roanoke Island (N. C.), Expedition to.—Butler's Hatteras expedition of Aug. 26, 1861, had opened Pamlico Sound and the Confederates had retired to Roanoke Island. This island is about ten miles long and was the key to all the rear defenses of Norfolk. Four-fifths of the supplies for Norfolk passed its guns. It was defended by Ben. Wise with 3,000 men. Jan. 7, 1862, Gen. Burnside was ordered to unite with Flag Officer Goldsborough, in command of the fleet at Fortress Monroe, capture Newbern, reduce Fort Macon, and seize the Wilmington and Weldon railroad. On the night of Jan. 11 the expedition arrived off Hatteras and encountered a terrific storm. Several transports were lost and the *City of New York*, with her cargo, worth a quarter of a million dollars, went to pieces. By Feb. 7 the remainder of the expedition had crossed the bar and proceeded up Croatan Channel. The Confederate fleet was driven up the channel. Their flagship—the *Curlew*—was set on fire by a shell and Burnside landed 10,000 men on Roanoke Island. The garrison of 2,675 officers and men was captured and the Confederate fleet pursued to Elizabeth City and destroyed. Burnside lost 250 men.

Roanoke Island, N. C., thanks of President to forces capturing, 3305.

Robert College, establishment of, at Constantinople referred to, 3900.

Rock Creek, D. C., construction of bridge over, referred to, 1844.

Rock Island, Ill., bridge over Mississippi River at, 4148.

Rocky Mount (S. C.), Assault on.—July 13, 1780, Thomas Sumter, with about 75 men, made an attack upon the British post at Rocky Mount, thirty miles northwest of Camden, under command of Lieut.-Col. Turnbull. The post consisted of two log houses perforated for small arms. Three unsuccessful assaults were made. The Americans finally withdrew after a loss of 13 killed and wounded, including Col. Reed. The British loss was about the same.

Roorback.—A general term for political forgery, or a fictitious report for political purposes, generally promulgated before an election. The name comes from a certain political story circulated in 1844 as an extract from Baron Roorback's Tour Through the Western and Southern States.

Roosevelt, Theodore.—Sept. 14, 1901, to March 4, 1909.

(FIRST TERM, SEPT. 14, 1901-MARCH 4, 1905.)

Twenty-ninth Administration (continued) Republican.

Roosevelt became President on the death of President McKinley, and took the oath of office Sept. 14, 1901. McKinley's appointees were continued at the head of the executive departments for a time, the first change being the appointment of Leslie M. Shaw to succeed Lyman J. Gage as Secretary of the Treasury and Henry C. Payne to succeed Charles E. Smith as Postmaster-General, Jan. 8, 1902.

Vice-President.—At the Republican National Convention, at Philadelphia, in 1900, President McKinley received the whole 730 votes in nomination for President, and Roosevelt received 729 for Vice-President (he not voting). Roosevelt was the fifth Vice-President to succeed to the Presidency by the death of the President in office, and the third to succeed by the death of the President by assassination.

Thirtieth Administration—Republican.

(SECOND TERM, MARCH 4, 1905-MARCH 4, 1909.)

Vice-President—Charles W. Fairbanks.

Secretary of State—

John Hay (continued).

Secretary of the Treasury—

Leslie M. Shaw (continued).

Secretary of War—

William H. Taft (continued).

Attorney General—

William H. Moody (continued).

Postmaster-General—

Henry C. Payne, from Jan. 8, 1902.

Robert J. Wynne, from Oct. 10, 1904.

George B. Cortelyou, from March 6, 1905.

Charles J. Bonaparte from July 1, 1905.

Secretary of the Navy—

William H. Moody.

Paul Morton (continued).

Secretary of the Interior—

Ethan A. Hitchcock (continued).

Secretary of Agriculture—

James Wilson (continued).

Secretary of Commerce and Labor—

George B. Cortelyou.

Victor H. Metcalf (continued).

SECOND TERM—**Nomination.**—The Republican party in National Convention at Chicago, June 22, 1904, nominated President Roosevelt by acclamation. The platform of 1904 rehearsed the recent performances of the Republican administrations, the gold standard established, the results in the Philippines, the beginning of the Panama Canal, irrigation of arid lands, increase of the navy; pledged the enforcement of anti-trust laws; reaffirmed protection; favored extension of reciprocity; upheld the gold standard; urged the increase of the merchant marine; declared for a larger navy; endorsed the exclusion of Chinese labor; declared for civil service reform; favored international arbitration; urged inquiry into the constitutionality of negro enfranchisement; advocated equal laws for labor and capital; paid a tribute to the memory of President McKinley; and eulogized President Roosevelt.

Opposition.—The Democratic National Convention at St. Louis, July 9, nominated Alton B. Parker on the first ballot over William R. Hearst. The Prohibition party, at Indianapolis, June 30, nominated Silas C. Swallow by acclamation. The People's party, at Springfield, Ill., nominated Thomas E. Watson by acclamation. The Socialist party, at Chicago, May 5, nominated Eugene Debs by acclamation. The Socialist Labor party, at New York, July 4, nominated Charles H. Corrigan by acclamation. The United Christian party, at St. Louis, May 2; the Continental party, at Chicago, Sept. 1; and the National Liberty (Negro) party, at St. Louis, July 7, placed candidates in the field.

Party Affiliation.—President Roosevelt from his earliest connection with politics was attached to the Republican party. In his earliest days, as a representative to the State legislature of New York, he maintained a large degree of independence; yet he was chosen a delegate to the National Republican Convention in 1884, and was chairman of the delegation. He was an Independent Republican in 1886, as a candidate for the mayoralty of the City of New York. His identity with the Republican party became very close during the Harrison administration and as Assistant Secretary of the Navy under McKinley in 1897. In 1898 he was the Republican Governor of the State of New York.

Vote.—The popular vote ran: Roosevelt, 7,623,486; Parker, 5,077,971; Debs, 402,283; Swallow, 258,536; Watson, 117,183; and Corrigan, 31,219. The electoral vote gave Roosevelt 336 and Parker 140.

Political Composition of Congress.—In the Fifty-seventh Congress (1901-1903) the Senate, of 91 members, was composed of 29 Democrats, 56 Republicans, 1 Populist, 1 Silver party, 1 Fusionist, and 2 vacancies; and the House, of 357 members, was made up of 153 Democrats, 198 Republicans, 3 Populists, 1 Silver party, 1 Fusionist, with 2 vacancies. In the Fifty-eighth Congress

(1903-1905) the Senate, of 90 members, was composed of 32 Democrats and 58 Republicans, and the House, of 382 members, was composed of 174 Democrats, 206 Republicans, 2 Union Labor, with 2 vacancies. In the Fifty-ninth Congress (1905-1907) the Senate, of 90 members, was composed of 32 Democrats and 58 Republicans; and the House, of 386 members, was made up of 136 Democrats and 250 Republicans. In the Sixtieth Congress (1907-1909) the Senate, of 92 members, was composed of 31 Democrats and 61 Republicans; and the House, of 386 members, was made up of 164 Democrats and 222 Republicans.

Tariff.—President Roosevelt in his First Annual Message (page 6650) said: "There is general acquiescence in our present tariff system as a national policy. The first requisite to our prosperity is the continuity and stability of this economic policy. . . . Our experience in the past has shown that sweeping revisions of the tariff are apt to produce conditions closely approaching panic in the business world. . . . Reciprocity must be treated as the hand-maiden of protection. Our first duty is to see that the protection granted by the tariff in every case where it is needed is maintained, and that reciprocity be sought for so far as it can safely be done without injury to our home industries." In his Second Annual Message (page 6712) the President seeks to refute the argument that a reduction of the tariff would curb trusts. He says: "Many of the largest corporations, many of these which should certainly be included in any proper scheme of regulation, would not be affected in the slightest degree by a change in the tariff save as such change interfered with the general prosperity of the country. The only relation of the tariff to big corporations as a whole is that the tariff makes manufactures profitable, and the tariff remedy proposed would be in effect simply to make manufactures unprofitable. To remove the tariff as a punitive measure directed against trusts would inevitably result in ruin to the weaker competitors who are struggling against them." As a corrective to conditions, the President advises the extension of reciprocity treaties. "Wherever the tariff conditions," he says, "are such that a needed change can not with advantage be made by the application of the reciprocity idea, then it can be made outright by a lowering of the duties on a certain product." In his Special Session Message of Nov. 10, 1903, the President discusses the proposed reciprocity treaty with Cuba. In his Sixth Annual Message (page 7050) the President says: "I most earnestly hope that the bill to provide a lower tariff for or else absolute free trade in Philippine products will become a law. No harm will come to any American industry; and while there will be some small but real material benefit to the Philippines, the main benefit will come by the showing made as to our purpose to do all in our power for their welfare." In his Seventh Annual Message (page 7083) on tariff revision, the President says: "This country is definitely committed to the protective system and any effort to uproot it could not but cause widespread industrial disaster. . . . But in a country of such phenomenal growth as ours it is probably well that every dozen years or so the tariff laws should be carefully scrutinized so as to see that no excessive or improper benefits are conferred thereby, that proper revenue is provided, and that our foreign trade is encouraged. . . . This means that the subject can not with wisdom be dealt with in the year preceding a Presidential election, because, as a matter of fact, experience has conclusively shown that at such a time it

is impossible to get men to treat it from the standpoint of public good. In my judgment the wise time to deal with the matter is immediately after such election." In the same message the President favored the incorporation of both income tax and inheritance tax as a part of the system of Federal taxation. On page 7099, the President says: "There should be no tariff on any forest product grown in this country, and in especial there should be no tariff on wood pulp."

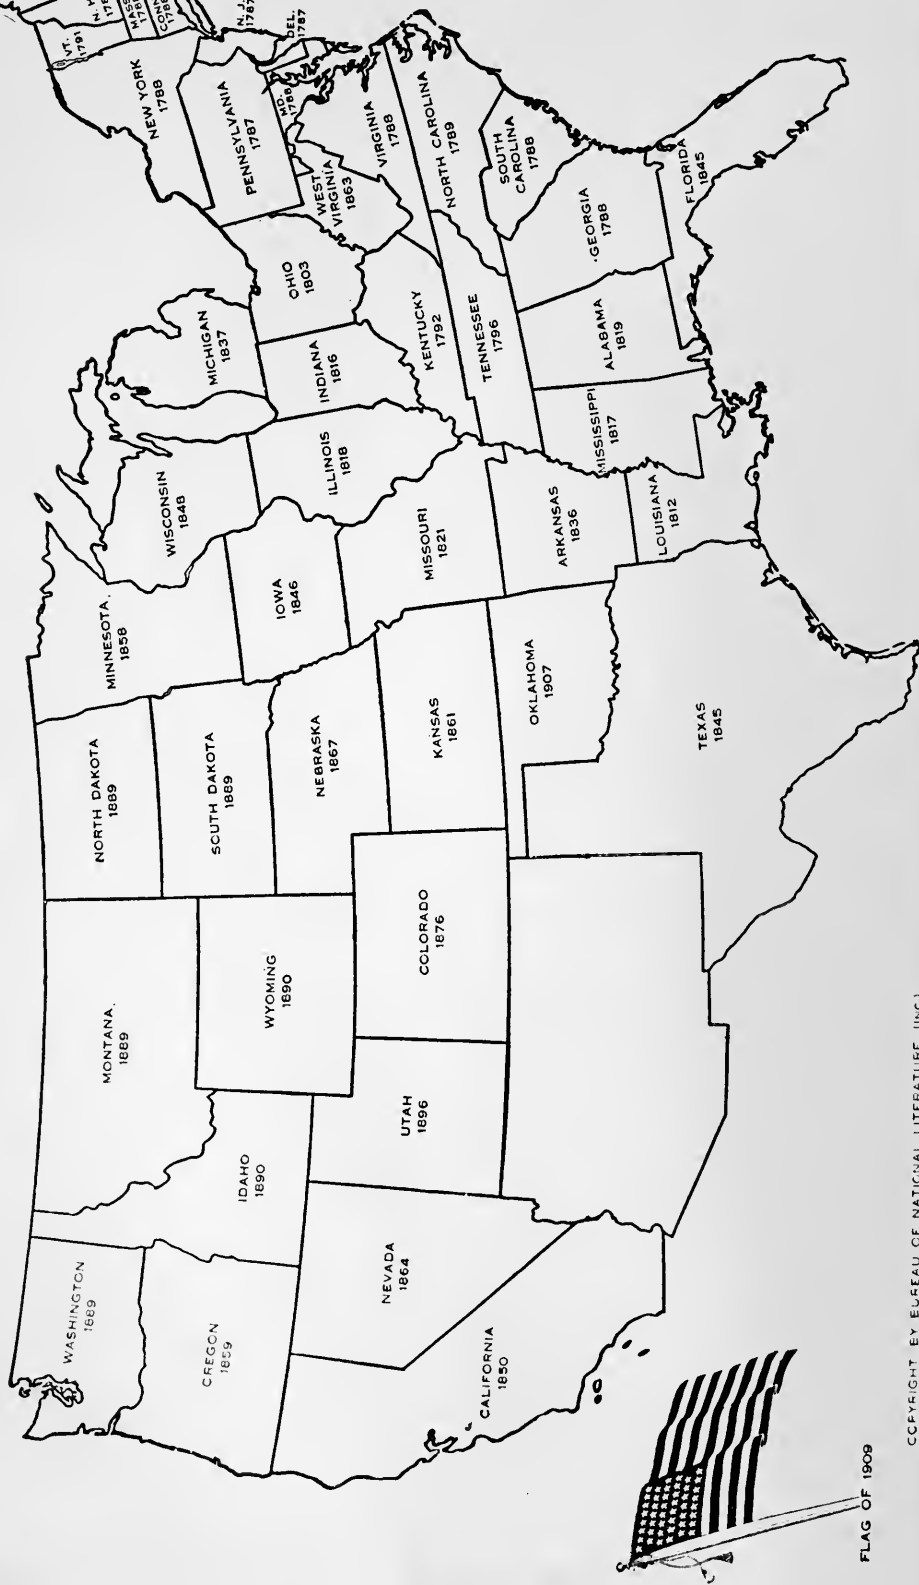

Civil Service.—In his First Annual Message President Roosevelt (page 6673) urged appointment in all possible cases upon the merit system, which he maintained was the only fair test of fitness; "all applicants should have a fair field and no favor, each standing on his merits as he is able to show them by practical test. In my judgment," he says, "all laws providing for the temporary employment of clerks should hereafter contain a provision that they be selected under the Civil Service law." In his Third Annual Message (page 6893) the merit system is reported as working most satisfactorily: "The completion of the reform of the civil service is recognized by good citizens everywhere as a matter of the highest importance, and the success of the merit system largely depends upon the effectiveness of the rules and the machinery provided for their enforcement." In his Fifth Annual Message (page 7011) the President says: "The question of politics in the appointment and retention of the men engaged in merely ministerial work has been practically eliminated in almost the entire field of Government employment covered by the civil service law." In a veto message of Feb. 5, 1909 (page 7176), the President urges that the employees engaged in the work of taking the thirteenth census be brought into the classified service and quotes Hon. Carroll D. Wright, who had charge of the census after 1890, as estimating that more than \$2,000,000 and over a year's time would have been saved had the force been so regulated.

Public Debt.—The public debt of the United States during the years of President Roosevelt's administration proper stood as follows: July 1, 1905, \$989,866,772.00; 1906, \$964,435,686.79; 1907, \$858,685,510; Nov. 1, 1908, \$897,253,990.00.

Commerce.—In his gubernatorial Message to the legislature of New York, in 1899, Governor Roosevelt took his stand upon the principle of taxing and regulating corporations and others who enjoyed franchises. To properly adjust taxation and to apply effective restriction were to be attained by investigation of conditions. "The first essential," he said, "is knowledge of the facts—publicity." This sentiment led to the desire expressed in his First Annual Message (page 6649) for the appointment of a Secretary of Commerce and Labor. "It should be his province to deal," he said, "with commerce in its broadest sense; including among many other things, whatever concerns labor and all matters affecting the great business corporations and our merchant marine." In his Second Annual Message (page 6712) he said: "I believe that monopolies, unjust discriminations, which prevent or cripple competition, fraudulent over-capitalization, and other evils in trust organizations and practices which injuriously affect interstate trade, can be prevented under the power of Congress to regulate commerce with foreign nations and among the several States through regulations and requirements operating directly upon such commerce, the instrumentalities thereof, and those engaged therein." In speaking of the working of the Department

EXTENT OF THE UNITED STATES DURING THE ADMINISTRATION OF PRESIDENT ROOSEVELT, 1901-1909.

(NOT INCLUDING TERRITORIES)

of Commerce and Labor, the President said in his Third Annual Message (page 6785): "Publicity in corporate affairs will tend to do away with ignorance and will afford facts upon which intelligent action may be taken. Systematic, intelligent investigation is already developing facts the knowledge of which is essential to a right understanding of the needs and duties of the business world. The Department of Commerce will be not only the clearing house for information regarding the business transactions of the Nation, but the executive arm of the Government to aid in strengthening our domestic and foreign markets, in perfecting our transportation facilities, in building up our merchant marine, in preventing the entrance of undesirable immigrants, in improving commercial and other industrial conditions and in bringing together on common ground those necessary partners in industrial progress—capital and labor." In his Fourth Annual Message (page 6901) he said: "Above all else we must strive to keep the highways of commerce open to all on equal terms; and to do this it is necessary to put a complete stop to all rebates." In his Fifth Annual Message (page 6974) the President said: "I am in no sense hostile to corporations. This is an age of combination, and any effort to prevent all combination will be not only useless, but in the end vicious, because of the contempt for law which the failure to enforce law inevitably produces. . . . The corporation has come to stay, just as the trade union has come to stay. Each can do and has done great good. Each should be favored so long as it does good. But each should be sharply checked where it acts against law and justice." The President's Special Message of May 4, 1906, explicitly sets forth the conditions of the Standard Oil Company and the railroads as they appear to the Bureau of Corporations. Stock Yard and Packing House abuses are dealt with in his message of June 4, 1906.

In his Sixth Annual Message (page 7078) the President said: "Among the points to be aimed at should be the prohibition of unhealthy competition, such as by rendering service at an actual loss for the purpose of crushing out competition, the prevention of inflation of capital, and the prohibition of a corporation's making exclusive trade with itself a condition of having any trade with itself."

Oct. 14, 1912, Mr. Roosevelt was shot by an assassin in Milwaukee, Wis., as he was leaving the Gilpatrick Hotel to make a political speech. The wound was supposed to be trifling, and Mr. Roosevelt proceeded to the hall and addressed a meeting for nearly an hour. The assassin, whose name was Schrank and who had been a saloonkeeper in New York, was seized immediately after the shooting and might have been lynched by the crowd had not Mr. Roosevelt protested against violence. The wound proved to be more serious than was at first supposed, and Mr. Roosevelt was taken to Chicago during the night and placed in a hospital and after a week's treatment removed to his home at Oyster Bay, Long Island, N. Y., where he recovered in time to engage in further activities in the campaign for president.

“Rules of Behavior.”—Rules set down by George Washington from time to time, some of them maxims copied from different authors. It is said that, for the greater part, this set of rules might well be taken for the guidance of any youth, and that the adoption of them by George Washington accounted in no small measure for his uprightness of character and his splendid poise. The theme of these rules is: “Labor to keep alive in your breast that little spark of celestial fire, *conscience*.”

Rum, Romanism and Rebellion.—At a meeting of clergymen of all denominations held in the Fifth Avenue Hotel, New York, during the Presidential campaign of 1884, Rev. Samuel D. Burchard, in an address favoring the election of the Republican candidate, described the Democrats as the party of Rum, Romanism and Rebellion. The phrase was immediately taken up and used to alienate many persons otherwise friendly to the Republican party, and as the party in that year suffered defeat by a very small margin many attributed it to the utterance of this alliterative phrase.

Rumania.—Rumania is situated in southeastern Europe, northeast of the Balkan Peninsula, and consists of the eastern territory of Dobrudja, on the Black Sea, the northern territory of Moldavia between the Carpathians and the river Pruthi, and the southern territory of Walachia, between the Transylvanian Alps and the river Danube. These territories lie between 43° 25' 48" 15' N. latitude and extend from 22° 25' 29" 40' E. longitude. The political neighbors of Rumania are Russia (Bessarabia) on the east, Hungary on the northwest and north, Servia on the west, and Bulgaria on the south.

Physical Features.—The country lies mainly in the basin of the Danube, the plain

consisting of rich pasture and agricultural land, the intermediate region of the vineyard and fruit districts and the higher slopes and valleys of birch, larch and pine forests.

The Danube enters the country at the junction of the Hungarian-Servian-Rumanian boundary in the extreme west, through the Iron Gates between the Balkans and Carpathians (Transylvanian Alps), and forms the southwestern boundary with Servia and the southern boundary with Bulgaria for nearly 300 miles. The “Iron Gates,” so called from the numerous rocks in the waterway, have been rendered navigable by blowing up the principal obstructions (see European Commission of the Danube post). The Danube flows north-east and north, and effects a confluence with the Sereth and Pruth before reaching the Black Sea through the delta of north-eastern Dobrudja. Many tributaries join the Danube from the foothills of the northern mountains across the Walachian Plain. The Danube is frozen over every winter, in some years for three months. The climate of Rumania is extreme, with intense cold and fierce summer heat.

History.—The Kingdom of Rumania has its origin in the union of the Danubian Principalities of Walachia and Moldavia and the addition thereto of a strip of southern Bessarabia, under the Treaty of Paris in 1856. The principalities were an integral part of the Turkish Dominions, but for many years a spirit of independence has been exhibited, although tribute was paid to the Sultan. In 1859 the Conventions of the two principalities met at Bucharest and Jassy and elected Prince Alexander John Cuza as ruler, under the suzerainty of the Porte. Prince Cuza reigned from 1859-1866, in which year he abdicated, and Prince Charles Antony of Hohenzollern-Sigmaringen was elected in his stead. By the Treaty of Berlin, July 13, 1878, the new Principality was recognized as an independent State, and the territory of the Dobrudja was recognized as part of the Principality. Rumania was forced into the Balkan war of 1913, and at its conclusion acquired further territory from Bulgaria. King Charles died in November, 1914, and was succeeded by his nephew, Ferdinand.

Government.—On March 14 (27), 1881, Rumania was raised to a Kingdom, and recognized as such by all the Great Powers, the Prince being crowned at Bucharest on May 9 (22), 1881. The crown is hereditary in the male line of the house of Hohenzollern-Sigmaringen, and by a law of March 14 (27), 1889, Prince Ferdinand of Hohenzollern, nephew of the King, was declared heir-presumptive to the throne. Rumania is not a Balkan State and took no part in the war against Turkey in 1912-1913, but secured a readjustment of her southeastern frontier while Bulgaria was at war with Greece and Servia in 1913.

Under the Constitution there is a parliament of two houses. The Senate consists of the Heir-Apparent, the two Archbishops and six Bishops, and the Rectors of the Universities of Bucharest and Jassy, with 109 senators, elected for four years by electoral colleges in each constituency. The Chamber of Deputies consists of 183 members, elected by three colleges, the first and second composed of direct electors on a property and educational franchise, the third being formed of the remaining taxpayers, of whom the illiterate vote indirectly, the remainder being direct voters with the other colleges.

The law is based principally upon the Code Napoleon, and the courts consist of communal and circuit courts with appeals to the sessional courts.

The kingdom is divided into thirty-three departments governed by Prefects, and are subdivided into sub-prefectures and communes.

Population.—The population may be estimated at 7,250,000 in 1913 (including the population of the territory ceded by Bulgaria), and of this total over 6,000,000 are Rumanians (Vlachs), the remainder being Jews, Armenians, Gipsies, Greeks, Germans, Turks, Tartars, Magyars, Servians and Bulgarians. The Jews and Armenians increase more rapidly than the Vlach or other racial elements. The Rumanian language is of Latin origin, with many borrowed words from Magyar or Greek sources. For the army see Armies of the World.

Navy.—The Navy consists (1913) of thirty vessels on the Black Sea and the Danube, and includes one cruiser of 5,000 tons and six gunboats; four torpedo-boat destroyers are being built in Italy. The Navy is manned by 140 officers and 2,200 seamen.

Finance.—The budget for 1914-1915 provided for an expenditure of the equivalent of \$91,877,000, in anticipation of a revenue of \$94,062,000. The debt in 1913 was stated at 1,814,991,615 lei, the lei, the unit of value, being equivalent to \$0.193 United States money.

Production and Industry.—The soil of the Walachian Plain, and of the lower districts of Moldavia, is among the most fertile in the world, and the productive vineyards (176,452 acres) had an output of 21,855,614 gallons of wine in 1911. There are close on 1,000,000 acres of meadow land for hay. The Live Stock includes cattle and buffaloes, sheep, goats, pigs, horses, mules and asses. Since 1886 State control has prevented the further depletion of the forest area, which lies principally in the mountain valleys of northwest Moldavia. Petroleum, salt, lignite and brown coal are found and largely worked, salt being a Government monopoly, while iron, copper, lead, mercury, cinnabar, cobalt, nickel, sulphur, arsenic, and china clay also occur. The petroleum (and ozokerite) industry is reviving, and now assumes first-class importance. Stone, granite, and marble are now largely worked, and amber is found in valuable quantities. There are many mineral springs, and some of the State-supported spas are much frequented, Balizateshte in particular being a favorite resort for invalids from eastern Europe.

Railways.—In 1910 there were 3,755 kilometers of line open for traffic, almost the entire system being State owned. There are five lines from the northern to the southern boundaries and there are east-west lines through the capital.

An International Commission was created by the Treaty of Paris (1856) with enlarged powers under the Treaty of Berlin (1878) for the control of the navigation of the Danube. The Commission exercises sovereign powers over the navigation of the river, the headquarters being at Galatz. The cost of administration is met by dues and amounts to about £60,000 annually. A large dock has been opened (1892) at Braila, and the Iron Gates were rendered navigable in 1896 by the destruction of the dangerous rocks in the waterway.

Entrance into European War.—The question of Rumania's entry into the war was settled Aug. 28, 1916, when a note declaring that Rumania from 9 o'clock on the evening of Aug. 27, considered herself in a state of war with Austria-Hungary was presented to the Austro-Hungarian Foreign Minister by the Rumanian Minister at Vienna.

According to the note the persecution of Rumanians by Austro-Hungarian officials

was alleged, and it was charged that agreements which existed between Rumania and the former members of the Triple Alliance had been broken in letter and spirit from the time Germany and Austria entered the war. Italy, the declaration said, was obliged to detach herself from Austria and Germany.

In conclusion, the communication set forth as follows the motives in compelling Rumania to enter the war:

First—The Rumanian population in Austrian territories is exposed to the hazards of war and of invasion.

Second—Rumania believes that by intervening she can shorten the world war.

Third—Rumania places herself on the side of those Powers which she believes can assist her most efficaciously in realizing her national ideal.

An official statement issued in Berlin said: "After Rumania, as already reported, disgracefully broke treaties concluded with Austria-Hungary and Germany she declared war yesterday against our ally. The Imperial German Minister to Rumania has received instructions to request his passports and to declare to the Rumanian Government that Germany now likewise considers herself at war with Rumania."

The entrance of Rumania into the European War turned out to be one of the most pathetic tragedies of the conflict. Facing the German charge of treachery but a feeble resistance was made to the advancing Teuton armies, and within six months the entire country was in the hands of the victorious Central powers.

Trade with the United States.—The value of merchandise imported into Rumania from the United States for the year 1913 was \$2,417,591, and goods to the value of \$348,481 were sent thither—a balance of \$2,069,110 in favor of the United States.

Rump Convention.—A name designating a meeting of the minority members of a party convention who secede from the convention, and declare for a different policy or different candidates. One of the most notable instances of rump conventions occurred when Senator Teller of Colorado, aided by Senator Cannon of Utah, led a party of Free Silver advocates out of the Republican Convention in 1896, and virtually delivered them to the Democratic party, because the Republican platform declared for the Gold Standard.

Russia.—The Russian Empire, which covers nearly eight and a half million square miles of the land surface of the globe, ex-

tends from the west limits of Poland, in 17° E. longitude, to East Cape, the extremity of the Continent of Asia, in 191° E. (169° W.) longitude, and from Cape Chelyuskin, in the Taimyr Peninsula (77° 40' N. latitude), to the frontier of Afghanistan, 35° N. latitude. Of this vast area Russia in Europe is bounded on the north by the Barents Sea; on the west by Scandinavia, the Gulf of Bothnia and the Baltic Sea, and by the German and Austro-Hungarian Empires and Rumania; on the south by the Black Sea and the Caucasus; and on the east by the Caspian Sea and the Ural Mountains.

European Russia has an area exceeding 2,000,000 square miles, and is 1,700 miles from north to south, and 1,400 miles from east to west. Asiatic Russia has an area of close on 6,500,000 square miles, and is 4,900 miles from east to west, and 2,400 miles from north to south (from the Kara Sea to the Pamir boundary).

In the Gulf of Bothnia are the Karlo, East Kvarken and Åland Islands of Finland; Dagö and Osel in the Baltic; Novaya Zemlya, Kolguev and Valgach, in the Barents Sea; the New Siberian Islands, Bear Islands, and Wrangel Land, in the Arctic Ocean; the Commander Islands off Kamchatka; and the Shantar Islands and the northern part of Sakhalin, in the Sea of Okhotsk.

Physical Features.—European Russia consists of a vast plain, the eastern Lowland of Europe, between the Ural Mountains and the Caucasus of the east and south and the Carpathians of the southwest. The Ural Mountains, which divide the Continents of Europe and Asia, and extend from the Kara Sea to the Caspian, culminate in Tollposis (5,400 feet), but the Caucasus, which run from the Black Sea to the Caspian, reach to 18,526 feet in Mount Elburz and 16,546 feet in Mount Kazbek.

Asiatic Russia is enclosed by mountain ranges within which lie the Plains of Turkestan and Siberia. The principal rivers of European Russia are the Volga, Don, Dnieper, Bug and Dniester, the Vistula, Niemen and Duna, the Neva, Onega, Dyina and Mezen, and the Pechora. Asiatic Russia contains the four great rivers, Ob, Yenisei, Lena, and Amur. Finland and the Baltic provinces contain innumerable lakes, Ladoga being the largest lake of Europe.

The climate of European Russia is typical of the most extreme Continental conditions, Moscow having a winter temperature of 12° F., while the summer temperature of the eastern portion is above 68° F. At Verkhoyansk the soil has been found to be permanently frozen to a depth of nearly 400 feet, although the summer mean temperature is higher than that of Paris.

History.—The vast Russian Empire is the outcome of the Tsardom of Muscovy, founded in the latter part of the fifteenth century by Ivan the Great, of the house of Rurik, who reigned from 1462 to 1505, and enlarged the Principality of Moscow into an autocratic kingdom over a wide territory. In 1613 the throne passed to a collateral branch of the house, Michael Romanov (1613-1645) being elected Tsar by the National Assembly. Since the accession of the Romanovs the boundaries of the Empire have been constantly extended. Little Russia, or the Ukraine, was annexed in 1667, and under Peter the Great (1689-1725) an outlet was acquired on the Black Sea by the capture of Azov from the Turks, and the Baltic Provinces and part of Finland were captured from the Swedes. The capital was transferred from Moscow to

St. Petersburg (now Petrograd) in 1711, and Peter the Great was proclaimed Emperor of All Russia. At the close of the eighteenth century the Empire extended from Courland to the Urals, and from the Arctic to the Black Sea. In the nineteenth century Russian rule was extended over the basin of the Amur and from the Caspian Sea to Chinese Turkestan, and at the beginning of the twentieth century the present limits from the Baltic to the Pacific, and from the Arctic to the Asiatic Plateau, were prevented from spreading to the Yellow Sea by the Russo-Japanese War of 1904-1905.

(See also European War of 1911, and Russian Revolution, below.)

Government.—From the establishment of the Principality of Moscow, which became the dominant force in Russian affairs at the downfall of the Tartar rule (1238-1462), until the beginning of the present century the government of Russia was an unlimited autocracy. Certain reforms were introduced from time to time. Serfdom was abolished in 1861, and elective provincial and municipal assemblies were created in 1864-1870, while the legal system was purged of many of its gravest abuses. The unsuccessful termination of the Russo-Japanese War of 1904-1905 led to the expression of a national feeling in favor of representative institutions, and on October 17 (30), 1905, the Tsar issued a manifesto promising a constitution. In 1906 the "Imperial Duma" was opened by the Tsar, but its demands were regarded as excessive, and it was dissolved. The second Duma (1907) met with a similar fate, and before the third Duma was elected the franchise and methods of representation were modified. The third Duma was elected on Nov. 1 (14), 1907, for five years, and has proved to be less revolutionary in character than its predecessors.

The crown is hereditary in the house of Romanov-Holstein-Gottorp. The Emperor must belong to the Orthodox Church, and must not wear a crown involving residence outside the boundaries of the Empire. But the Imperial theory that limits set to the power of the crown by imperial concession may be revoked by imperial decree scarcely justifies the term "Constitutional Monarchy." Many topics are withheld from discussion by the legislature, so that parliamentary government is far from complete, while the franchise is highly restricted, elections to the Duma are indirect, and ministers are responsible not to the legislature but to the Tsar. Ruler: Nicholas II. Alexandrovitch, Emperor and Autocrat of all the Russians, Tsar of Moscow, Kiev, Vladimir, Novgorod, Kazan, Astrakhan, Poland, Siberia, Tauric Chersonese, and of Georgia, Lord of Pskov, Grand Duke of Smolensk, Lithuania, Volhynia, Podolia and Finland, etc.; born at Petrograd, May 6 (19), 1868; came to the throne Oct. 20 (Nov. 2), 1894.

By Imperial rescript of Oct. 17 (30), 1905, the Emperor declared his intention of sharing the legislative power with an elected national assembly, or Imperial Duma, and by a proclamation of Feb. 20 (March 5), 1906, the Council of the Empire was associated with the Duma, as an Upper Chamber. The Council of the Empire consists of ninety-eight members appointed by the Emperor, and ninety-eight members elected by various bodies for nine years and one-third renewable triennially (six are elected by orthodox clergy, forty by provincial assemblies, sixteen by landowners, eighteen by the nobility, six by the Academy of Sciences and the universities, and twelve by commercial and industrial corporations). The judicial system consists of four sets of tribunals and a supreme court. (For the

army see Armies of the World and for the navy see Navies of the World.)

Russian Revolution, 1917.—The entire civilized world was thrilled by news from Petrograd (the name of the Russian capital since the outbreak of the Great European War—the old name, St. Petersburg, being discarded because of its German form) on March 16, 1917, announcing the destruction of the Russian autocracy and the establishment of a democratic form of government in Russia. For years and years, liberals, radicals, and revolutionists in the Tsar's empire had planned to overthrow the ruling dynasty, only to be crushed so mercilessly and thwarted so effectively that the days of democratic government in the largest of the countries of Europe had seemed to belong to the dim and distant future. The announcement of the complete overthrow of the Tsar's government was particularly timely in that it came but three weeks before the United States allied herself with Russia as the opponent of the Imperial German Government in the European War. Because of the fact that the new democratic form of government in Russia took long firmly to establish itself, and because of the difficulty of complete communication between Russia and America during the war, the facts of the revolution are not matters of definite general knowledge. The following statements, however, seem to be warranted:

Despite the thoroughness of the revolution, it was accomplished quietly, and with comparatively little bloodshed. Indeed, only the small number of persons possessing intimate knowledge of factors working below the surface in Russia were aware that any comprehensive steps toward revolution were being taken. In these respects, the Russian revolution furnishes a great contrast to the French Revolution. For the primary cause of the revolution, one must turn to the rise of the Duma in Russia. (See Russia—History), with the constant attempt of the Tsar and of the Russian oligarchy to limit its power. With the beginning of the European War, liberals and radicals in Russia temporarily abandoned their efforts for the democratization of the government, but soon were aroused again to active opposition to the forces in power because of the lack of vigor with which the Government was prosecuting the war. Not only was there inefficiency, but there was also every indication that the entire administration of the Russian army was overrun with graft and lack of patriotism, so that the sacrifices of the Russian people in both life and money were being made in vain. The army, disgusted with oligarchy, had become imbued with an intense longing for democracy. The strength of German influence at court also soon made itself felt. Two premiers appointed by the Tsar, who was considered a weak pawn in the hands of the unscrupulous nobility in power, were known to be protections in their sympathies, and fears were freely expressed that a separate peace with Germany would be negotiated. A coarse but shrewd Russian priest, Gregory Rasputin, had achieved marvelous power at court, and it was known that his influence was being used for German purposes; and other ministers appointed to power were reactionaries whom the liberals had long fought to discredit—notably the universally-hated Protopopoff.

Efficient and liberal forces in the Duma accordingly were moved to agitate for reforms, only to be met with absolute denial of their requests. By February, 1917, the maladministration and dishonesty of the Government had served to bring on a famine. Food was almost unobtainable and the people became desperate. In the

meantime, the army had seen itself rendered ineffective, and lent itself readily to the seeds of revolt sown quietly and effectively in its ranks—probably under the direction particularly of the premier of the new government soon to be established, Lvoff. Rasputin was assassinated. Early in March strikes and protest meetings sprang out everywhere in Petrograd, and the army openly sympathized with them. The police were unable to subdue the rioters, and on March 4, the troops were ordered to patrol the streets and the city was placed under martial law. But the troops soon sided with the strikers against the police. Finally, on March 9, 1917, the Duma, under the leadership of its president, Rodzanko, formally renounced allegiance to the Government.

The Tsar replied by dissolving the Duma, but the Duma refused to be dissolved, and appealed to the army and to the people for support. Hunger parades and democratic demonstrations filled the streets of Petrograd. The Tsar turned to his army for help, but the army itself had become transformed by the new spirit, and allied itself with the Duma. All over Russia, the mass of the peasants rose in support of the revolution, and in the Russian armies at the front and in the Russian navies on the seas the representatives of the old order were stripped of their authority practically overnight. Statements have been made that the revolt in the army and navy was accomplished quietly, but later reports seem to indicate that the old officers of the Tsar were not displaced without bloodshed. In Petrograd itself, however, the revolution was met with only weak resistance. Even the planners of the revolution seem to have been surprised at the strength it displayed, and at the weakness of the opposition of the autocracy, formerly believed almost impregnable in its strength. The part played by the Church is not clear. By March 11, the revolution was an accomplished fact. Nicholas II abdicated the throne for himself and for his son, thus ending the three hundred years' rule of the Romanov dynasty. Other members of the royal family were dispossessed and imprisoned. Grand Duke Nicholas was removed as commander-in-chief of the army, to be succeeded by General Alexeff. The red flag of Socialism was adopted as the official flag of Russia, although the Government so far established seems to be along the lines of representative democracy, with Socialistic proposals held, temporarily at least, in the background. Indeed, the moderation which the new government has shown has dissatisfied the more extreme elements in Russia, and the latter were responsible for an unsuccessful demonstration against the new ministry on May 3 and 4, 1917, led by the Socialistic Council of Workmen's and Soldiers' Delegates, representing more radical forces in Russia, who desire peace, although not a separate peace, and more radical reforms in the new government.

The Premier of the new cabinet is Lvoff, who more than any one man, seems to have been responsible for the revolution. The controlling forces in the new government, however, would seem to be Professor Paul Millukoff, Minister of Foreign Affairs, who would be called in America a liberal, and the more radical Socialist, Kerensky, Minister of Justice. Soon after the revolution, the throne of Russia was offered to Grand Duke Michael, but he refused to accept the offer unless the Russian people should elect him by universal suffrage. On assuming power, the new government announced that it would prosecute the war against the Central Powers with increased energy. Complete amnesty for all political and religious

offenses, universal manhood suffrage (with the status of woman suffrage in doubt), and a constitutional assembly similar to the American Congress have been proclaimed. All social and religious restrictions, especially all restrictions upon the Jews, have been abolished, all political prisoners have been released from Siberia, including many whose earlier but unsuccessful efforts made the present revolution possible, complete liberty of speech and press have been assured, and all workmen are to have the right to organize themselves into workmen's associations. The police are to be abolished, their places to be filled by a new militia answerable to the Government. And every effort is to be made to remove the economic distress from which the Russians have so long suffered, and to establish social and legislative reforms which will parallel the steps towards social justice being taken by all the other great countries of Europe and America.

Early in May, 1917, it was announced that commissions from Russia and the United States would exchange visits, both to consult about the prosecution of the European War, and also to give and receive advice on the perpetuation of the Russian Revolution. It was announced that the chairman of the American commission would be Elihu Root, former Secretary of State; the other members to be: Charles R. Crane, of Chicago, manufacturer; John R. Mott, of New York, International Secretary of the Young Men's Christian Association; Cyrus McCormick, of Chicago, President of the International Harvester Company; Samuel R. Bertron, of New York, banker; James Duncan, vice president of the American Federation of Labor; Charles Edward Russell, of New York, writer and Socialist; Major-General Hugh L. Scott, chief of staff, United States Army; Rear-Admiral James H. Glennon, United States Navy.

In the several months following the revolution, dissension broke out between the conservative element in control of the new ministry, and the radical and Socialistic element represented by the Council of Soldiers' and Workmen's delegates. The latter insisted that the Government put into effect more radical social and economic reforms than it had been considering, and also that announcement be made that Russia, although she would not consider separate peace with Germany, was anxious for and would work towards a universal peace with no annexations and no indemnities. Minister Milukoff had created much dissatisfaction by his earlier announcement that Russia was supporting all the aims of the Entente Allies in the war, and on May 16, Milukoff resigned, after Minister of War Guchkoff had tendered his resignation. The Ministry was willing to abdicate its position, and turn over the reins of government to the Council; but the latter did not feel itself prepared to accept them, although it succeeded in having passed its resolution for an immediate and universal peace without indemnities and annexations. For a time, it appeared as though the effects of the revolution would disappear in anarchy, but on May 17, it was announced that the Ministry and the Council had agreed upon a coalition government. Lvoff remained as premier, Tereschenko succeeded Milukoff as foreign minister, Kerensky became minister of war, and new vacancies in the Cabinet were recruited largely from the ranks of the Socialists.

Education—There are universities at Petrograd (with 9,000 students) and at Moscow, with the modern Shaniavski University of Moscow, and at Kasan, Kiev,

Kharkov, Odessa, Saratov, Tomsk, Warsaw, and Yuriev, with a total of about 41,000 students.

AREA AND POPULATION

Divisions	Area in English Sq. Miles	Population Jan. 1 (14) 1912
European Russia (the 50 Provinces).....	1,862,524	122,550,700
Poland.....	49,018	12,776,100
Finland.....	144,178	3,140,100
Caucasia.....	180,703	12,288,100
Central Asia.....	1,325,530	10,727,000
Siberia.....	4,786,730	9,577,900
Inland Seas and Lakes....	317,468
Khiva (Khiva).....	26,028	800,000
Bokhara (Bokhara).....	78,524	1,500,000
Total.....	8,770,703	173,359,900

Production and Industry.—The land area of the Russian Empire is estimated at 5,300,000,000 English statute acres, of which about 70 per cent is unfit for cultivation, 20 per cent is covered with forests, and 10 per cent is cultivated land. The total area under cereals, potatoes, etc., in 1912 was 361,045,636 acres. The number of live stock in 1912 was: Cattle, 48,896,000; sheep and lambs, and goats, 74,066,000; pigs, 13,508,000; horses, 33,169,000.

The area of woods and forests is estimated at close on 1,000,000,000 acres. Of the total area about 60,000,000 acres are under exploitation, yielding a net profit to the State in 1909 of 46,000,000 roubles. The fisheries are an important industry, on account of the numerous fast days in the Orthodox Church calendar.

The Obdorsk and Ural Mountains contain great mineral riches, and are the principal seat of the mining and metallic industries, producing gold, platinum, copper and iron of very superior quality. Silver, gold and lead are also obtained in large quantities from the mines in the Altai Mountains. Among the non-metallic minerals are petroleum, coal, rock-salt, marble and kaolin or china clay. Russia is now the largest producer of petroleum in the world, the output amounting to 530,000,000 poods (of thirty-six pounds) in 1910 and to 515,620,000 poods in 1911. An immense bed of coal, both steam and anthracite, and apparently inexhaustible, has been discovered in the basin of the Donetz (between the rivers Donetz and Dnieper). The coal output for the whole of Russia in 1911 was 1,420,160,000 poods (62 = 1 ton). Other mineral products in 1910 were gold ore (schlich), producing 3,606 poods of pure gold, platinum 335 poods, pig iron (171,000 poods in 1908), steel and rails (2,000,000 tons in 1906), copper (14,401,000 poods in 1907), and quicksilver (325 tons in 1904).

In 1910 the number of factories and works of all kinds open was 32,503, employing 2,080,896 hands. The principal manufactures are cottons, flax and silk, sugar, distilling (a Government monopoly) and brewing, tanning, shoes and gloves, furniture, paper, flour, tobacco and hemp. Other carving, metalwork, etc., and agricultural machinery is now manufactured on a large scale. The imports consist principally of raw materials and machinery; the exports are mainly food products and minerals. Home manufactures are protected by prohibitive duties on manufactured articles, but their development awaits cheaper fuel and improved transport services.

A great deal of the internal trade is carried on by itinerant vendors, but the principal agency is the fair, over 16,000 fairs being held annually, of which 85

per cent are in European Russia. The largest and most famous is that of Nijni-Novgorod, with a turnover of some 200,000,000 roubles, other large fairs being held at Irbit, Kharkov, and Menzelinsk in European Russia, and at Omsk and Ishim in Siberia.

Finance.—The budget for 1914 called for an expenditure of 3,558,261,499 roubles. The national debt of the empire was stated on Jan. 1, 1914, as 8,811,380,139 roubles. The amount of gold held by the Bank of Russia was 1,673,577,241 roubles. The free balance in the Treasury Jan. 1, 1913, was 434,000,000 roubles. The rouble, the unit of value, consists of 100 kopecks, and is equivalent to \$0.315 United States money.

Railways.—The total length of lines open for regular traffic on Jan. 1, 1913, was 46,839 miles (Russian Government 29,316 miles, private companies 14,096 miles, Finland 2,347 miles, Eastern China Railway 1,079 miles). Exclusive of Finland (*q. v.*) there are in European Russia about 150,000 miles of navigable rivers and canals and lakes. In Asiatic Russia there are 85,000 miles of waterway, of which 20,000 miles are navigable. Some 175,000 persons are engaged in the traffic.

Shipping.—The sea-going Mercantile Marine on Jan. 1, 1913, consisted of 716 steamers (790,075 tons) and 500 sailing vessels (184,105 tons), the steam fleet being valued at £15,300,000 and the sailing fleet at £1,700,000. Steam fleet was manned by 17,157 persons, the sailing ships by 12,333 persons.

Cities.—Capital, St. Petersburg (name ordered changed to Petrograd during the war with Germany in 1914), on the Neva. Estimated population (1913), 2,018,596. In 1910 there were in the Russian Empire 25 towns with a population exceeding 100,000 (European Russia 20, Asiatic Russia 5), 59 with a population between 50,000 and 100,000 (European Russia 46, Asiatic Russia 13), and 63 with a population between 30,000 and 50,000.

Trade with the United States.—The value of merchandise imported into Russia from the United States for the year 1913 was \$25,363,795, and goods to the value of \$26,958,690 were sent thither—a balance of \$1,594,895 in favor of Russia.

FINLAND.—The Grand Duchy of Finland, on the Gulf of Finland and Bothnia, was conquered by Russia from Sweden, and finally annexed in 1809. The country was formerly governed by the Imperial Finnish Senate, of twenty-two members, with a Diet of four estates elected by the people. This form of government gave way on Jan. 1, 1907, to a new Constitution involving a single Chamber elected by universal suffrage of both sexes. Women are likewise eligible for election to the Chamber. Finland is thus the first country to concede woman suffrage and representation, and it is noteworthy that it has been gained without agitation.

Education in Finland is on a very different footing from the remainder of the Russian Empire. Primary education is compulsory and free between the ages of seven to fifteen, and the schools are well attended. Special schools make a feature of cattle farming, dairying, and agricultural instruction. The University of Helsingfors has about 3,000 students.

BOOKHIA is a vassal state of the Russian Empire in Central Asia, and lies between 37°-41° N. latitude and 62°-72° E. longitude. Rice, wheat and other cereals, and tobacco, flax, fruits and hemp are grown, and large quantities of cotton are produced in the irrigated western plain. Silk is also a flourishing industry, cottons,

silks and woollens are manufactured in addition to leather and saddlery, and salt is produced in considerable quantities. The exports are mainly to Russia, and consist of raw cotton and silk, skins and hides, and carpets; the imports are principally manufactured goods and sugar from Russia, and cotton goods, tea, shawls, and indigo from British India. Trade is carried on mainly by camels and pack animals.

THE KHANATE OF KHIVA, a central Asian dependency of the Russian Empire, lies to the south of Amir Darya between Bokhara and Russian Trans-Caspia. As in Bokhara the Mohammedan Uzbeks are the dominant race, Native industries are leather work and embroideries of cotton and silk, and the manufacture of rough cottons and woollens. A considerable export trade is carried on with Russia.

 Whaling vessels of United States interfered with by, 3794.

Russia, Treaties with.—The convention as to the Pacific Ocean and the northwest coast of America was concluded in 1824. Free and unmolested fishing and trading rights in those parts of the Pacific Ocean as yet unoccupied are to be mutually enjoyed by both nations. Where stations are located, citizens of the one country may not resort for trade or fishing to the establishments of the other without express permission. Citizens of the United States may not erect any establishment on the northwest coast of America to the north of, nor shall Russia to the south of fifty-four degrees and forty minutes of north latitude. Spirituous liquors and firearms and other munitions of war are declared to be prohibited articles of sale to the natives or to others within the territory covered by this convention. Punishment for infraction of this article to be at the discretion of the contracting powers or their officers.

The treaty of commerce and navigation of 1832 conferred freedom of commerce, reciprocal treatment of vessels without discriminating duties by reason of the nationality of the carrying vessel, freedom of export and import (excepting the coastwise trade), the appointment of consular officers in terms of the usual consular conventions, with powers over deserters from ships and in the administration of affairs of deceased citizens, and, in general, the extension of large commercial privileges

upon the most favored-nation terms. The conditions of the treaty were applicable to Poland in so far as possible.

As certain especial privileges had been extended to Sweden and Norway in regard to Poland and Finland, it is specified that such preferential conditions shall not extend to the United States.

The treaty of 1854 established the rights of neutrals at sea on the principle that free ships make free goods and that the property of neutrals on board an enemy's vessel shall not be subject to confiscation. The provisions of this treaty are to be extended to all powers formally recognizing the principles and expressing a desire to accede to the treaty.

Alaska Cession.—The treaty of 1867 ceded Alaska to the United States. The details of the boundaries contained in the first article gave rise to the long disputes between the United States and Canada over the location of the boundaries which were the subject of later treaties with Great Britain. With the territory, Russia ceded all public property in Alaska with the records and archives of the government pertaining to affairs in Alaska, but reserved the right to make exact copies of them at any time. Citizens of Alaska who desired to retain their allegiance to Russia might return to that country within three years from the date of cession. The native tribes were to be subjected to such laws as the United States might in their interests and its own discretion make for their government. In consideration of the cession of territory and rights over it, the United States agreed to pay within ten months after ratification the sum of seven million two hundred thousand dollars in gold to Russia, at Washington. (For extradition agreements, see Extradition Treaties.)

In 1894 a *modus vivendi* was arranged in relation to the fur-seal fisheries in Bering Sea and the North Pacific Ocean, by which it was agreed that citizens of the United States might not fish within a zone of ten nautical miles from the shores of Russian possessions in Bering Sea and the Pacific Ocean, nor within thirty nautical miles of the Commander Islands and Robben Island. Vessels of the United States so infringing are to be seized by duly qualified Russian officers and handed over as soon as practicable to the United States authorities, who shall cause the cases to be tried by the ordinary courts. The Russian government agreed to limit the seal catch for the year 1894 in the vicinity of the islands named to thirty thousand head. The provisions of this treaty are in nowise retroactive.

Oct. 22, 1911, Russia became a party to the convention for the preservation of fur seals by signing the agreement with Great Britain, Japan and the United States.

In June, 1904, it was agreed that corporations having a legal existence in either country should be recognized in the other, and in 1905 an agreement for the protection of trade-marks was effected.

Russian America. (See Alaska.)

Russian Colony, desire of representatives of, to emigrate to United States discussed, 4207.

Russian Revolution, 1917. (See Russia.)

Russo-Japanese War.—Russia's occupation of Manchuria after the uprising of the Boxers (q. v.) was a matter of vital importance to Japan, as it endangered the independence of Korea, and brought Russia into dangerous proximity to Japan on the shores of the China and Japan seas. In April, 1902, Rus-

sia had promised to withdraw from Manchuria in eighteen months, but in September, 1903, she informed the Powers that it would be impossible for her to withdraw at the time specified.

In June, 1904, the Japanese Government opened negotiations with Russia, looking to the latter's withdrawal from Manchuria; but, losing patience at what she regarded as the dilatory tactics of the Russian officials, on Feb. 6, 1904, Japan broke off diplomatic relations with Russia, and four days later attacked the Russian fleet at Port Arthur, damaging several ships and driving the Russians into the harbor.

From that time until the fall of the port, Jan. 2, 1905, the Japanese fleet under Admiral Togo blockaded and bombarded Port Arthur, losing two battleships and several smaller vessels, but inflicting still more damage on the Russians.

Japan formally declared war on Feb. 11, 1904, and China and the United States issued proclamations of neutrality. Japanese troops at once occupied Korea, and on May 1 forced the passage of the Yalu River. Three days later the Japanese began to land troops on the Liao Tung Peninsula, north of Port Arthur, and moving down the peninsula defeated the Russians at Nanshan Hill and Kinchau, seizing Dalny at the end of the month. A Russian force from the north under Stackelberg, attempting a diversion in favor of Port Arthur, was decisively defeated at Vafangow, June 15, and while Generals Kuroki and Oku followed up the retreating Russians, General Nogai after driving General Stoessel, the Russian commander, from his outlying positions, laid siege to Port Arthur at the end of July. On Aug. 10, the Russian fleet in the harbor of Port Arthur, finding its position desperate, attempted to break out, a part of the vessels succeeding in reaching neutral ports, but the greater number being driven back into the port. Four days later the Russian squadron from Vladivostok, which had been making desultory raids on Japanese commerce, was defeated by a Japanese fleet, under Admiral Kamimura, one Russian vessel being sunk and the rest badly damaged. On Aug. 16, General Nogai demanded the surrender of Port Arthur, and, on General Stoessel's refusal, began an unsuccessful general assault which cost the Japanese 14,000 men. While Nogai's forces pressed the siege of the fortress the Japanese armies in the north, under the command of Marshal Oyama, the Japanese commander-in-chief, drove the Russians under Kuropatkin from Liao-Yang (Sept. 4), and checked a last attempt to relieve the city by repulsing a Russian advance over the Sha River (Oct. 14). By assaults and siege operations the Japanese steadily advanced upon Port Arthur, the capture of 203-meter Hill (Nov. 30) enabling them to bombard the fleet in the harbor, and on Dec. 31 they broke through the inner line of defenses. On Jan. 2, 1905, General Stoessel surrendered the city with 47,000 men. The Japanese loss during the siege was 50,000; the Russian not less than 20,000. The fall of Port Arthur left Nogai's forces free to join the army of the north under Oyama. After repulsing a Russian forward movement at the Hun River (Jan. 28), the Japanese assumed the offensive and again defeated Kuropatkin in a fifteen days' battle (Feb. 22-March 10) near Mukden, the ancient capital of Manchuria, and entered the city. About 750,000 men were engaged in this battle, operating on a front eighty miles long. The Russian loss was 90,000 killed and wounded, and 40,000 prisoners, the Japanese loss being less than half that of the Russian.

Meanwhile the Russian Baltic fleet, under Admiral Rogstvensky—their last naval

resource, for the Black Sea fleet was confined within the Dardanelles by treaty stipulations, and demoralized by a mutiny of its sailors—had sailed from Libau (October, 1904), and was making its way to the East in several divisions by way of the Suez Canal and Cape of Good Hope. An attack on an English fishing fleet in the North Sea (Oct. 21)—the Russians mistaking the fishing boats for Japanese torpedo boats—nearly involved Russia in war with England, the affair being finally settled by arbitration; and the prolonged stay of the Russians off Madagascar and in Kamranh Bay, Saigon, led to a protest from Japan to the French Government.

On May 27 the Russian fleet encountered the Japanese under Admiral Togo, at the entrance to the Sea of Japan, and was practically annihilated, only 1 cruiser escaping to Vladivostok, and 3 to Manila, where they were interned. Six battleships, a coast defense battleship, and 4 cruisers

were sunk; 2 battleships and 2 coast defense battleships surrendered; many torpedo boats and smaller vessels were sunk or captured; Admirals Rogestvensky and Nebogatoff were taken, with 3,000 of their men; and 14,000 Russians perished. The Japanese losses were inconsiderable. Shortly after the battle a Japanese force occupied the Island of Sakhalin.

On June 11, President Roosevelt, after conference with the Japanese minister and the Russian ambassador, sent to Tokyo and St. Petersburg identical notes, urging the two governments to open direct peace negotiations with each other. This action resulted in the ending of the war by the Treaty of Portsmouth (q. v.). Dissatisfaction with the result of the negotiations led to some rioting in Japanese cities. (See illustrations opposite 6836, 6886, 6948, 7028.)

Sabina, The, American seamen rescued by, compensation for, requested by owners of, 2005.

Sabine Cross-Roads (La.), Battle of.—Gen. N. P. Banks's army, which had been concentrated at Alexandria, La., advanced up the Red River March 25, 1861, by way of Natchitoches, Pleasant Hill, and Mansfield, toward Shreveport. April 8, arriving at Sabine Cross-Roads, on the Sabine River, the Federals encountered a part of the Confederate army under Gen. Kirby Smith, commanded by Gen. Richard Taylor. The Confederates attacked and Banks was badly defeated, losing 3,000 in killed, wounded, and missing. The Confederates captured 19 guns and an immense amount of ammunition and stores. The Confederate loss was reported by Gen. E. Kirby Smith as over 2,000 killed and wounded.

Sacketts Harbor (N. Y.), Attack on.—May 29, 1813, a British force of 1,000 or 1,200 regulars and a large body of Indians was conveyed from Kingston, Canada, to Sacketts Harbor, N. Y., by a squadron under Sir James Yeo, the whole expedition being under the command of Sir George Prevost, Governor-General of Canada. The Americans, mostly raw militia, were at first forced back, but later rallied and the British were driven to their boats, leaving their dead upon the field.

Sacketts Harbor, N. Y.:

Barracks built at, 653.

British attack on, repulsed, 524.

Sackville-West Affair.—Lord Sackville, the British Minister to the United States from 1881 to 1888, wrote a letter during the Presidential campaign of 1888 in which he advised an alleged naturalized citizen, of English birth, by the name of West, to vote the Democratic ticket, on the ground that the success of the Democratic party, with its free trade policies, would be beneficial to Great Britain. President Cleveland promptly rebuked Lord Sackville for his conduct, and in December handed him his passports. See 5365, 5396.

Sacramento Pass (N. Mex.), Battle of.

—When Gen. Kearny had established the supremacy of the United States authority at Santa Fé he dispatched Col. Doniphan with 800 men to join Wool in an expedition against Chihuahua. Dec. 27, 1846, Doniphan reached El Paso del Norte, a town of about 5,000 inhabitants on the road to Chihuahua, at one of the principal crossings of the Rio Grande. Here he was joined by Wightman's artillery, consisting of 100 men. He then proceeded toward the Sacramento River. Where the road to Chihuahua crosses the river the Mexican General Heredia was posted with 1,575 men. Feb. 28, 1847, he was attacked by the Americans and driven from his position with a loss of 110 pieces of artillery. Col. Doniphan and his little army entered the city of Chihuahua March 1 and 2.

Judgment of Supreme Court on, 6982.

Discussed, 6803, 6897.

Government inspectors under, 6982.

Safety at Sea:

Confirmation of convention for, 6982.

Safety Fund.—Owing to the unstable character of the currency issued and the insecurity of deposits of State banks, the New York legislature in 1829, upon the suggestion of Martin Van Buren, passed a law known as the safety-fund act. Under the provisions of this law banks chartered by the state were required to pay into the state treasury a certain percentage of their capital stock to serve as a fund out of which the liabilities of any of them that might fail should be made good. This was the beginning of reform in the banking system. Under this law there were ten bank failures, resulting in a loss of all their capital, amounting to \$2,500,000, which proved conclusively the inadequacy of the safety fund. In 1838 the free-banking system was adopted.

Sailors Creek (Va.), Battle of.—After the Confederate defeat at Five Forks and the retreat of Lee's army from Richmond and Petersburg, Lee made his way due west and reached the Danville Railroad at Amelia Court-House on April 4, 1865. Sheridan passed him and reached the railroad at Jetersville, 7 miles southwest. Lee, finding retreat cut off in this direction, moved westward toward Farmville. At Sailors Creek, April 6, Custer, joined by Crook and Devin, succeeded in piercing the Confederate column, took 16 guns, 400 wagons, and many prisoners. Ewell's corps and part of Pickett's division were thus cut off. The cavalry detained this force of between 6,000 and 8,000 until, having been surrounded by Wright with the Sixth Corps, Ewell surrendered. Five generals, more than 7,000 prisoners, several hundred wagons, and many guns were taken.

St. Thomas Island, treaty with Denmark for cession of, to United States transmitted and discussed, 3777, 3779, 3796, 3886.

Salaries, Congressional.—Under the Articles of Confederation each state paid its own members of Congress, but the Convention of 1787 made the members independent of the states in this respect. The first clause of Article I, section 6, of the Constitution provides that "The Senators

and Representatives shall receive a compensation for their services, to be ascertained by law and paid out of the Treasury of the United States." Members of the First Congress were paid \$6 per day and \$6 for each twenty miles of travel going and coming. The salaries have frequently been changed. From 1789 to 1815 they were \$6 per day; from 1815 to 1817, \$1,500 per year; from 1817 to 1855, \$8 per day; from 1855 to 1865, \$3,000 per year; from 1865 to 1871, \$5,000 per year; from 1871 to 1874, \$7,500 per year; from 1874 to 1908, \$5,000 per year. A mileage of twenty cents is allowed both ways. Senators and representatives have received the same salaries except during 1795, when senators received \$7 per day while members received but \$6. At present members of both houses receive \$7,500 per annum. The speaker of the House receives \$12,000 per year.

Salaries, Division of Postmasters', in Post-Office Department.—This division falls under the supervision of the First Assistant Postmaster-General (q. v.). (See Post-Office Department; Division of City Delivery; Civil Service; Division of Rural Delivery.)

Salaries, Executive.—Sept. 24, 1789, Congress fixed the salary of the President of the United States at \$25,000 per annum, at which figure it remained until 1873, when it was increased to \$50,000. The Constitution provides that the salary of the President shall not be diminished during his term of office, and for this reason that part of the "salary-grab" act of 1873 which increased his salary was not repealed in 1874 with the other provisions of that act. The salary of the Vice-President, placed at \$5,000 in 1789, was raised to \$8,000 in 1853, to \$10,000 in 1873, reduced to \$8,000 in 1874, and in 1908 increased to \$12,000, and the President's salary was fixed at \$75,000.

Of the Cabinet officers the Secretaries of State and the Treasury received in 1789 salaries of \$3,500 each, the Secretary of War \$3,000, the Attorney-General \$1,500, and the Postmaster-General \$2,000. In 1819 the pay of the four Secretaries (State, Treasury, War, and Navy) was made \$6,000, that of the Postmaster-General \$4,000, and that of the Attorney-General \$3,500. The Cabinet officers and Vice-President now receive \$12,000 per year. Washington at first declined to receive any pecuniary compensation as President. He asked that the estimates for his station be limited to such actual expenditures as the public good might be thought to require (page 45).

Salaries, Judicial.—In 1789, when the United States courts were organized, the Chief Justice of the Supreme Court was paid \$4,000 and the associate justices \$3,500 each. The district judges received from \$1,000 to \$1,800. These salaries have been increased from time to time. At the present time (1914) the Chief Justice of the Supreme Court receives \$15,000, the associate justices \$14,500, the circuit court judges \$7,000, and the district court judges \$6,000. The Chief Justice of the United States Court of Claims receives \$6,500 and the four associate judges \$6,000 each. The Constitution provides that the salaries of Federal judges may not be diminished during their continuance in office.

Salary Grab.—A popular name for the act of March 3, 1873, whereby the salaries of the President and Vice-President, members of Congress, justices of the Supreme Court and other Federal officials were materially increased. The provisions for the increase were introduced by Benjamin F. Butler, of Massachusetts, and made a rider to the appropriation bill. By this law the President's salary was increased from \$25,000 to \$50,000 per year; that of the Chief Justice from \$8,500 to \$10,500; those of the Vice-President, Cabinet officers, associate justices, and Speaker of the House from \$8,000 to \$10,000, and of Senators and Representatives from \$5,000 to \$7,500. Another act, passed the next day, made that part of the law relating to salaries of members of Congress retroactive, thus giving themselves \$7,500 instead of \$5,000 a year from March 4, 1871, to March 4, 1873, and following years. This excited the indignation of the people to such an extent that the laws were repealed the following year, except such provisions as related to the President and justices of the Supreme Court.

Salt Springs:

Cession of, to United States, 342.

Referred to, 803, 892.

Salt Works in Kentucky, act for relief of owners of, vetoed, 4170.

Salvador.—Salvador occupies part of the south coast of Central America, between Guatemala and Nicaragua (Gulf of Fonseca), the northern boundary being continuous with the Republic of Honduras, and the southern boundary being the Pacific Ocean. It is situated approximately between 13°-14° 20' N. latitude and 87° 45'-90° W. longitude, and is about 140 miles from east to west, and about 60 miles from north to south. The area is about 7,225 square miles.

Physical Features.—There are distinct areas in the low alluvial plains of the coast and the interior plateau, with a mean elevation of about 2,000 feet, broken in many places by volcanic cones, of which the highest are Santa Ana (8,300 feet) and San Miguel (7,120 feet). The lowlands are generally hot and unhealthy, but the climate of the plateau and mountain slopes is temperate and healthy. There is a wet season from May to October, and a dry season from November to April.

Hydrography.—The principal river is the Lempa, which rises in Guatemala and flows into the Pacific, being navigable for most of its course by small steamers. In the

eastern districts the Rio San Miguel rises near the Honduras boundary and flows into the Bay of Fonseca, and in the center of the Republic is the large volcanic lake Ilopango.

History.—Salvador was conquered in 1526 by Pedro de Alvarado, and formed part of the Spanish viceroyalty of Guatemala until 1821. In 1840 the Republic broke away from the federation of Central American States.

Government.—The constitution rests upon the fundamental law of 1864 (revised in 1886), the President and Vice-President being elected for four years by direct vote of the people, the President being ineligible for a successive term in either office. President (Feb. 9, 1913-1915), Carlos Melendez, born Feb. 1, 1861.

The National Assembly, consisting of a single chamber of forty-two Deputies (three for each Department) elected for one year by the direct vote of all adult male Salvadorians, meets annually from February to May, and elects a President and Vice-President for each session.

There are local courts of first instance, district courts, and a supreme court at the capital. Each of the fourteen Departments has a governor appointed by the central executive, but the municipalities have elective magistrates and officials.

For the army see *Armies of the World*.

Population.—There are fourteen departments with an estimated population of 1,200,000. Of the total population about 10 per cent are creoles and foreigners, 50 per cent half-castes, and 40 per cent Indians, the negro element being negligible. The language of the country is Spanish.

Production and Industry.—The principal products are coffee, sugar, indigo, "Peruvian" balsam (grown in Salvador, but formerly shipped from Callao in Peru), tobacco, cocoa, rice, cereals, and fruits. Cotton is being grown under a Government subsidy.

Gold, silver, copper, mercury, and lead are found, and there are indications of coal and iron, but only gold and silver are systematically worked, mainly in the department of Morazan.

Finance.—The average annual expenditure for the five years ending with 1913 were 13,230,002 pesos and the average revenue for the same period was 13,575,217 pesos. The national debt was stated on June 1, 1913, as \$6,917,000. The peso, the unit of value, is worth \$0.40 in United States money.

The capital is San Salvador, with a population of 60,000.

Trade with the United States.—The value of merchandise imported into Salvador from the United States for the year 1913 was \$2,389,971, and goods to the value of \$1,371,568 were sent thither—a balance of \$1,018,403 in favor of the United States.

War with Guatemala, 5543.

Salvador, Treaties with.—Our earliest treaty with Salvador, then known as the Republic of San Salvador, was a convention of amity, navigation and commerce, which was proclaimed April 18, 1853. This was superseded by the treaty of Dec. 6, 1870, which provided for reciprocal privileges in business, religious freedom, protection of persons and property in each country by the government of the other, consular prerogatives, and the usual restrictions of neutrality in case of war. It also contained the most favored nation clause. On notice given by Salvador this treaty was abrogated May 30, 1893. Dec. 19, 1901, a protocol for the arbitration of certain claims against Salvador by citizens of the United States was signed. Naturalization and arbitration conventions were concluded in 1908. The arbitration convention, which was for five years, was extended in 1914 for another five years. Salvador also became a party to the convention between the United States and the several republics of South and Central America for the arbitration of pecuniary claims and the protection of inventions, etc., which was signed in Buenos Aires in 1910 and proclaimed in Washington, July 29, 1914. (See South and Central America, Treaties with.)

Salvo.—1. The firing of a number of guns at the same time. 2. The striking, at the same time, of several missiles on the enemy's defense. 3. The simultaneous shouting of a body of people.

Samoan Islands.—A group of fourteen islands in the South Pacific Ocean. The principal islands are Savaii, Upolu, and Tutuila. The United States has a coaling station in the harbor of Pago-Pago, granted in 1872. The neutrality of the islands was guaranteed by the United States, Great Britain, and Germany in 1889 by treaty. This convention of treaty between the three countries provided for a foreign court of justice, a municipal council for the district of Apia, the chief town, with a foreign president thereof, authorized to advise the King; a tribunal for the settlement of native and foreign land titles, and a revenue system for the Kingdom.

In 1899 the kingship was abolished, and by the Anglo-German agreement of Nov. 14, accepted Jan. 14, 1900, by the United States, Great Britain and Germany renounced in favor of the United States all rights in the Island of Tutuila and others of the Samoan group east of 171° east, the islands to the west of that meridian being assigned to Germany. (See also Tutuila.)

Samoan Islands, Treaties with.—In 1899 a convention was made between the United States, Germany, and Great Britain, relating to settlement of claims of American citizens, German, and British subjects, for damage sustained by unwarranted military action in Samoa. It was agreed that the King of Sweden and Norway should be invited to act as arbitrator therein, and that his decision in the premises be final, and that the three governments be bound to make good the losses in accordance therewith. Oct. 14, 1902, Oscar II., King

of Sweden and Norway, as arbitrator, rendered his decision, in which he found the action of the United States culpable in bringing back the Malleteans after deportation, and supplying them with arms and ammunition without the knowledge of the German consul. For this and for other reasons, King Oscar held the British and United States responsible for damages.

The convention of 1899 contained the renunciation by Germany in favor of the United States of all claims and rights in respect to the island of Tutuila and all other islands of the Samoan group east of longitude 171 degrees west. The United States renounced all claims and rights in favor of Germany of the islands of Upolu, Savaii, and all other islands of the Samoan group west of longitude 171 degrees west. The three signatory nations continue to enjoy equal rights in respect of commerce and commercial vessels in the islands. (See also Germany.)

San Juan de Fuca Explorations.—Certain explorations on which are based the American claims to possession of territory bordering on the Pacific. The portion of the Pacific Coast between the parallels of lat. 40° and 50° north was visited on behalf of Spain in 1592 by a Greek pilot named De Fuca. In 1610 by Admiral Fonte, and sub-

sequently by other explorers, and maps of the coast line had been made. The treaty of 1790 between Spain and Great Britain only gave the latter fishing and trading rights in the vicinity of Puget Sound. The discovery and exploration of Columbia River by Capt. Gray, an American; the purchase from France in 1803 of the Louisiana territory; the exploration of Columbia River by Lewis and Clark, by order of the United States, in 1804-5, and the treaty of limits concluded with Spain in 1819, by which all the territory north of lat. 42° north was expressly declared to belong to the United States, were held to be sufficient proofs of the latter's title to the territory. Great Britain nevertheless claimed a large portion of the region, while the United States claimed the country to lat. 54° 40' north. In 1846 the boundary was settled at the forty-ninth parallel as far as the channel between Vancouver Island and the mainland, and from that point on a line through the middle of that channel and the Strait of Juan de Fuca to the Pacific. (See Northwestern Boundary.) Navigation of the channel was to be free to both countries. Under this treaty the United States claimed the Canal de Haro as the channel through which the boundary was to run, and Great Britain claimed Rosario Straits. San Juan and other islands were thus in dispute. To avoid conflict, the occupation by both nations of the island of San Juan at opposite ends was agreed upon. The Emperor of Germany, who was selected as arbitrator of the dispute, decided in favor of the United States in 1872 (4140). (See also "Fifty-four Forty or Fight.")

Sanders Creek (S. C.), Battle of.—Generally known as the battle of Camden. In the summer of 1780 Gen. Gates had been

appointed to the command of the Southern army, and, reinforced by Baron De Kalb, Armand's Legion, Porterfield's Virginia regiment, and Rutherford's North Carolina militia, his force numbered over 4,000, of whom less than 1,000 were regulars. Cornwallis, with about 2,000 British and Tories, of whom 1,500 were regulars, proposed to surprise Gates's army. Gates had determined to surprise Cornwallis. Both advancing, the two armies unexpectedly met at Sanders Creek, near Camden, S. C., on the night of Aug. 16, 1780. After some skirmishing hostilities were suspended until the morning, when, with the first British attack, the Virginia and South Carolina militia fled, after a feeble resistance, due in part to an imprudent order by Gen. Gates. Baron De Kalb bore the brunt of the battle and fell, being wounded 12 times. The American defeat eventually became a rout. Their loss in killed, wounded, and prisoners was upward of 2,000. The British lost 325 men, 68 of whom were killed. Previous to this action Sumter, with about 400 men, captured a British convoy with stores and 200 prisoners, but was himself surprised the next day by Tarleton, who recaptured the stores, killed 100 men, and took 300 prisoners. The British, in the Camden battle, came into possession of 7 pieces of artillery, 2,000 muskets, the entire baggage train, and nearly 1,000 prisoners, including Generals De Kalb, Gregory, and Rutherford.

Sandusky, Ohio, British attack on, repulsed, 524.

Sandy Bay, Mass., harbor of, referred to, 1040.

Sandy Creek (N. Y.), Battle of.—May 19, 1811, while the British squadron on Lake Ontario was blockading Sackett's Harbor, where Commodore Chauncey was fitting out a squadron for active service, certain heavy guns and cables destined for some of the American ships were yet at Oswego Falls. The blockade preventing their being conveyed by water to the harbor, Capt. Woolsey, commander of the *Onيدا*, volunteered to transport them by way of the Big Sandy Creek, partly overland, to their destination. Sir James Yeo, of the blockading squadron, sent 2 gunboats, 3 cutters, and a gig to intercept Woolsey. The latter had detailed 130 riflemen and the same number of Oneida Indians to proceed along the banks of the creek to assist in repelling any possible attack. May 30 the British gunboats sighted Woolsey's flotilla and began firing. Within 10 minutes the British squadrons, with officers and men to the number of 170, were prisoners and prizes. Not a single American life was lost. The British loss was 18 killed and 50 wounded. The cannon and cables were safely landed at Sackett's Harbor.

San Marino, the smallest republic in the world, is situated on the Adriatic, 14 miles southwest of Rimini, in northern Italy. It has an area of 2 English square miles.

Population (1910), 10,655. It is named in consequence of its traditional foundation by Saint Marinus, in the reign of the Emperor Diocletian (284-305 A. D.) and possesses a monastery founded in the ninth century. The independence of the republic has survived all attempts at suppression and is secured by a treaty with the King of Italy. The supreme power resides in the Arrhigo, or general assembly, which meets twice a year at the capital, the executive being entrusted to two *Capitani Reggenti*, selected every six months from the sixty members of the Great Council, who are elected by universal suffrage in three classes (twenty from the nobility, twenty from the landowners and twenty from the people) for nine years, and are renewable as to one-third every three years. There is a defence force of about 1,200 men, and all citizens between the ages of sixteen and sixty are liable for service. The revenue in 1909-1910 amounted to 398,900 lire. The exports are wine, cattle and stone. The Capital (San Marino, population 1,500) stands on Mount Titano, and has an impregnable castle.

Grant of land to, 6872.

Santa Fe Trail.—There is said to be in the ancient palace at Santa Fe a Spanish document proving the existence of a trail in the last quarter of the 18th century from the old French settlements in what is now Illinois, to some of the Spanish towns in New Mexico, and from one of these to California. In 1804 a merchant of Kaskaskia, Ill., dispatched a courier with goods to Santa Fe. In 1822 the Santa Fe trail proper was opened—a wonderful road some 800 miles in length, rising so imperceptibly for three-quarters of its distance as to seem perfectly level, and without a bridge from end to end. The eastern terminus was first at Franklin, Mo., then at Independence, and later at Westport, on the Missouri River. The early traders carried their merchandise on pack horses or mules, and in 1824 the prairie schooner appeared. Along this road General Kearny and Colonel Doniphan led the expedition which annexed the western states to the Union during the Mexican war. The Santa Fe railroad now closely follows the trail, which was the scene of many stagecoach robberies and Indian attacks. Wagon trains bound for the Pacific coast rendezvoused at Emporia, Kan., whence they were escorted by scouts or military guards.

Santa Maria, The, presented to United States by Spain discussed and recommendation regarding, 5872.

Santa Rosa Island (Fla.), Battle of.—Oct. 9, 1861, a force of 1,500 or 2,000 Confederates landed on Santa Rosa Island, Pensacola Harbor, Fla., and surprised the camp of Wilson's Zouaves about a mile from the fort. Maj. Vogdes was sent to the relief of the camp with two companies. He was captured, but the assailants retired to their boats under the heavy fire of the regulars after setting fire to the camp. The Federal loss was 60 killed and wounded. The Confederate loss was not reported.

Santiago (Cuba), Battle of.—On Monday, June 20, 1898, the American fleet of about 55 ships, including the naval convoy which had left Tampa, Fla., on June 7, came within sight of the town of Daiquiri, about fifteen miles east of Santiago, which was the point selected for the landing. Upon landing at Daiquiri, Gen. Wheeler's command of cavalry was ordered to take position on the road to Siboney. Gen. Young's brigade (about 965 men), during the night of June 23-24, passed Gen. Lawton's division, which was on the road from Siboney to Santiago.

About three miles from the former place, near Las Guasimas, June 24, they encountered the enemy posted in a strong natural position. The Spanish forces occupied a range of hills in the form of obtuse angles, with the salient toward Siboney. The attack, says Gen. Young, of both wings was simultaneous, and the junction of the two lines occurred near the apex of the angle, on the ridge, which had been fortified with stone breastworks flanked by blockhouses. The Spanish were driven from their position and fled precipitately toward Santiago. The American forces numbered about 965, the Spanish 2,000 to 2,500. American losses, 1 officer and 15 men killed; 6 officers and 46 men wounded. Forty-two dead Spanish soldiers were found on the field, while the Santiago (Spanish) papers the day after the battle gave their loss as 77 killed.

After this battle the Spaniards retired to the outer defenses of Santiago. These were the village of El Caney to the northeast, and the San Juan Hill extending south from that village and forming a natural barrier to the eastward of the city. July 1 these defenses were attacked by forces under Gen. Lawton, who was expected to take El Caney and then move toward Santiago and support the attack of Wheeler's and Kent's divisions upon the main Spanish army. The battle began at 6 A. M. and soon became general. The enemy fought with much obstinacy, but were slowly driven back. After Lawton had become well engaged, Grimes's battery, from the heights of El Poso, opened fire on the San Juan blockhouses, and Wheeler's and Kent's divisions moved forward, crossed the river, and formed for an attack on San Juan Hill. During this formation Col. Wilkoff was killed. The command of the Second Brigade then devolved upon Lieut.-Col. Worth, who was soon severely wounded, and then upon Lieut.-Col. Liscum, who fell a few minutes later, and Lieut.-Col. Ewers took command. The Spaniards strongly intrenched upon the hills in front of the American forces, San Juan Hill and Fort San Juan, the latter position being a few hundred yards nearer Santiago.

The American forces charged up San Juan Hill in the face of a heavy fire, captured this point, crossed the plain below, and charged Fort San Juan, driving the enemy before them. At midnight of July 1 Gen. Bates arrived with reinforcements, and at daylight on the 2d his brigade was placed on the ridge to the left of the American lines. Gen. Lawton's forces were placed on the right. All day a brisk fire was kept up by the two armies, part of the

time in a drenching rain. At nightfall the firing ceased, but at 9 P. M. a vigorous assault was made all along the lines, which was repulsed, the Spaniards retiring to their trenches. The following morning firing was resumed and continued until near noon, when a white flag was displayed by the enemy.

The total losses of the American forces during the three days' fighting (July 1, 2, and 3) were: Officers killed, 13; privates, 87; officers wounded, 36; privates, 561; missing, 62. The entire strength of the command which fought the battle of San Juan was 362 officers and 7,391 privates. The defenses of Santiago were constructed with much engineering skill, as were also the batteries in the harbor. The city was at once surrounded by the American army, so that the Spaniards could not escape. The ridge upon which the Americans were stationed was favorably located and overlooked the city. The fortifications and barbed wire fences could easily be seen. The Spaniards seemed to realize that their condition was hopeless, and on Sunday morning, July 3, their fleet steamed out of the harbor. The destruction of this fleet was complete.

On the 16th Gen. Toral informed the American commander that the Spanish Government at Madrid had authorized the surrender, and thereupon final terms of absolute capitulation were duly signed. The conditions of the surrender included all forces and war material in the division of Santiago. The United States agreed to transport, without unnecessary delay, all the Spanish troops in the district to Spain. Officers were to retain their side arms and officers and men their personal property. The Spanish commander was authorized to take the military archives of the district. The Spanish forces were to march out of Santiago with honors of war and deposit their arms at a point to be mutually agreed upon, to await the disposition of the United States Government, etc. The troops surrendered and returned to Spain were about 24,000.

Santiago Harbor (Cuba), Battle of.

This engagement, which is also known as the battle of July 3, was the decisive naval combat of the Spanish-American War. For six weeks the Spanish fleet under Rear-Admiral Pascual Cervera had been imprisoned in the harbor of Santiago by the American blockading squadron in command of Acting Rear-Admiral Sampson. On the morning of July 3, 1898, at about 9.30 o'clock, while the men of the American

vessels were at Sunday quarters for inspection, the Spanish fleet, consisting of the *Infanta Maria Teresa*, *Viccaya*, *Cristobal Colon*, *Almirante Oquendo*, *Pluton*, and *Furor*, attempted to escape. The ships, coming out of the harbor at the rate of eight or ten knots an hour, passed without difficulty the collier *Merrimac*, which had been sunk in the channel by Lieut. Hobson. Signals were at once made from the United States vessels, "Enemy's ships escaping," and general quarters were sounded. Rear-Admiral Sampson being about seven miles from the scene of battle, the command of the American vessels during the engagement devolved upon Commodore Schley. Under his direction, the squadron closed in on the fleeing vessels, and in about two hours the entire Spanish fleet was destroyed. The Spanish losses were 600 killed and about 1,400 prisoners, including the admiral. The loss on the American side was 1 killed and 1 wounded, while not a vessel was materially damaged. From this crushing defeat Spain was unable to recover, and her effort upon the ocean ceased. (See illustration opposite 6058.)

Santo Domingo.—The Republic occupies the eastern part of the island of Haiti, covering 18,045 square miles of its total area of 28,000 square miles, or rather more than two-thirds of the whole island, the remainder forming the Republic of Haiti (*q. v.*), and lies between 17° 37'-20° N. latitude and 72°-68° 20' W. longitude.

Physical Features and Climate.—Santo Domingo is distinctly mountainous. The highest point in the republic is Loma Tina (10,300 feet), an isolated mountain in the south of the island. Between the Sierra de Monti Cristi in the north and that of Cibao in the center is a vast well-watered plain, known as the Vega Real, from Samaná Bay in the east to Manzanillo Bay in the west, a distance of close on 150 miles. In the southeast is another great plain, stretching from Ozanam River to the east coast, about 100 miles distant.

The principal rivers are the Yaqui del Norte and the Yaqui del Sur, which rise on either side of the central range and flow into the Bays of Manzanillo (north-west) and Neyba (south), and the Yuna, which drains the Vega Real and flows into Samaná Bay; the Ozama, upon which the capital stands, is the most important of the lesser streams. The republic lies entirely with the tropics, but the climate has a wide range on account of the diversity of levels, and the capital, in particular, is healthy and comparatively cool. Rainfall is abundant and the wet and dry seasons are clearly marked. The prevailing wind is from the east, and the island is generally free from hurricanes.

History.—The Dominican Republic is the Spanish portion of the island of Haiti (or Santo Domingo), which was discovered by Columbus in 1492 and peopled by the Spaniards with imported African slaves, who soon exterminated the Indian tribes. In 1821 an independent republic was proclaimed and the Spaniards abandoned the country, but from 1822-1844 the territory was made part of the neighboring republic of Haiti.

There are twelve provinces with a total area of 18,045 square miles and an estimated population of 700,000.

Government.—In 1844 the Dominican Republic was founded, the present constitution resting upon a fundamental law of Nov. 6, 1844, since modified in many instances. The President is elected for six years by indirect vote. Provisional President of the

Republic, José Bordas (elected by Congress, April, 1913). Up to the close of 1916 he had been succeeded by Ellado Victoria, Ramon Baez, Juan Isidoro Jimenez, Desiderio Arias, Jacinto de Castro.

The revolutionary movement under Gen. Desiderio Arias caused the United States to intervene in the affairs of the island. Marines were landed, and a number of cities and forts occupied.

Congress consists of a Senate and a Chamber of Deputies. The Senate contains one member from each province, and the Chamber twice that number, the houses thus numbering twelve and twenty-four, elected in each case by indirect vote. Senators for six years, one-third renewable every two years, Deputies for four years, one-half so renewable.

Each of the twelve Provinces is administered by a Governor appointed by the President. The governing classes are mainly white.

There are three main elements in the population, the most numerous being mulattoes of Spanish-Negro descent, with many full-blooded negro descendants of slaves imported by Spain from the sixteenth to the nineteenth centuries, and native-born and settled whites, principally Spanish, but partly French and English, with a few Turkish Christians from Turkey. The religion of the country is Roman Catholic, but all creeds are tolerated. Spanish is the language of the Republic, with a sprinkling of French and English in the towns.

Finance.—In 1907 the Republic ratified a treaty with the United States, under which the latter country collects the customs and acts as an intermediary between the Dominican Republic and its foreign creditors. The Debt was stated on Jan. 1, 1912, at \$20,000,000.

The revenue and expenditure for the years 1908-1912 are stated as follows:

Year	Revenue	Expenditure
1908.....	\$3,984,300	\$3,990,000
1909.....	4,520,120	4,530,000
1910.....	4,700,000	4,650,000
1911.....	4,860,000	4,806,000
1912.....	5,809,785	5,845,994

Production and Industry.—The plains of the Republic and, in particular, the Vega Real and Santiago valley in the north, and Los Llanos or the plain of Seybo in the southeast, are well watered and extraordinarily fertile, and contain the finest sugar lands in the West India Islands, while the mountainous districts are especially suited to the culture of coffee, and tropical fruits may be grown throughout the Republic with a minimum of attention. The sugar industry is in a flourishing condition, and the exports are increasing and cacao is now the second most important industry; coffee, cotton, tobacco, and rice are grown with variable success. The country abounds in timber, including mahogany and other cabinet woods and dye-woods, but the industry is undeveloped and transport facilities are lacking. **Live Stock.**—The treeless prairies, or savannahs, are capable of supporting large herds of cattle, but they are mainly in a state of nature.

Gold and silver were formerly exported in large quantities, and platinum is known to exist, while iron, copper, tin, antimony, and manganese are also found; but copper is the only metal now produced, and one gold-washing plant is in course of construction. Of the non-metalliferous minerals the principal production is salt, of which great quantities exist in the Neyba district of the south.

Exports.—The principal exports in 1912 were sugar \$5,841,357, cacao \$4,248,724, and tobacco \$370,637; the principal imports being cottons \$1,608,465, breadstuffs, rice and provisions \$1,710,892, and iron and steel manufactures \$1,626,800. Sixty per cent of the total trade is with the United States, the share of Germany being 16 per cent. While the bulk of the sugar is entered in the Customs statistics as going to the United States, it is nearly all reexported, the United Kingdom receiving about 50 per cent and Canada 25 per cent.

Railways.—There were (1911) about 500 miles of railway open, of which 150 miles are government line, 80 miles belong to an English company and the remainder are private lines on the various plantations.

Shipping.—The mercantile marine consists of a few small sailing vessels and two small coasting steamers. In 1912, 1,076 vessels (783,893 tons) engaged in the foreign trade entered and cleared at the ports of the Republic. There is an excellent roadstead in Samaná Bay on the northeast coast.

The unit of value is the United States gold dollar.

Trade with the United States.—The value of merchandise imported into Santo Domingo from the United States for the year 1913 was \$5,802,767, and goods to the value of \$3,728,774 were sent thither—a balance of \$2,073,993 in favor of the United States.

Santo Domingo, Treaties with.—A convention of amity, commerce and navigation and for the surrender of fugitive criminals was concluded with the Dominican Republic in 1867. This provided for reciprocal privileges of citizens and the exchange of diplomatic and consular officers, and the extradition of criminals. This convention terminated Jan. 13, 1898, on notice from the Dominican Republic.

In 1903, by an arbitration protocol the claim of the San Domingo Improvement Company of New York was submitted to a board of arbitrators consisting of John G. Carlisle, Manuel de J. Galvan and Judge George Gray. These rendered an award July 14, 1904, providing for the redelivery of the various properties to the Dominican Republic and the payment by the republic of \$4,481,250 in monthly instalments to the financial agent of the United States and for the security for such payments the customs revenue and customs houses of Puerto Plata, Sanchez, Samaná and Monte Cristi, and all other ports of entry or custom houses now existing or as might thereafter be established on the coast or in the interior north of eighteen degrees and forty-five minutes and east of the Haitian boundary, were to be assigned and designated, which custom houses were to be turned over to a financial agent, to be appointed by the United States, who

was to have entire charge of such custom houses and of the collection of the revenues therefrom.

Receiver of Customs.—In 1907 a convention was concluded providing for the assistance of the United States in the collection and application of the customs revenues of the republic. In the preamble to this treaty it is stated that owing to the disturbed political conditions of the country, debts and claims had been created to the amount of more than \$30,000,000, and that these same conditions had prevented the peaceable and continuous collection of revenue, and that the debts were continually increasing. Fiscal agents of the republic effected a compromise whereby all its foreign creditors agreed to accept \$12,407,000 for debts and claims amounting to about \$21,184,000 of nominal or face value, and the holders of internal debts or claims of about \$2,028,258 nominal or face value agreed to accept about \$645,817 therefor, and the remaining holders of internal debts or claims on the same basis as the assents already given will receive about \$2,400,000 therefor, which sum the Dominican Government fixed upon as the amount which it will pay to such remaining internal debt-holders; making the total payments under such adjustment and settlement, including interest as adjusted and claims not yet liquidated, amount to not more than about \$17,000,000.

Part of the plan of settlement was the issue and sale of bonds of the Dominican Republic to the amount of \$20,000,000, bearing five per cent interest payable in fifty years and redeemable after ten years at 102½. It was agreed that the President of the United States should appoint a receiver to collect all the customs duties accruing in the several custom houses of the Dominican Republic until the payment and retirement of any and all bonds thus issued. It is also provided that until the whole of the public debt is paid no further obligations shall be incurred and no modification of internal or customs duties shall be made, except with the consent of the President of the United States.

Santo Domingo also became a party to the convention between the United States and the several republics of South and Central America for the arbitration of pecuniary claims and the protection of inventions, etc., which was signed in Buenos Aires in 1910 and proclaimed in Washington July 29, 1914. (See South and Central America, Treaties with.)

Savages Station (Va.), Battle of.—One of the Seven Days' Battles before Richmond. June 29, 1862. Sumner and Heintzelman retired from Fair Oaks and took up a position near Savages Station, on the Richmond and York River Railroad. After destroying the supplies there, Heintzelman moved south across the swamp. Magruder, in pursuit, finding Fair Oaks abandoned, advanced to Savages Station and made an

attack on Sumner's corps in the afternoon. The latter maintained his ground till dark. During the night he retreated into the White Oak Swamp, leaving 2,500 sick and wounded in the hospital at the station.

Savannah (Ga.), British Occupation of.

—Nov. 27, 1778, Commodore Hyde Parker convoyed a fleet of transports to Savannah, which carried about 3,500 British soldiers. The troops landed at Tybee Island, fifteen miles from Savannah, and captured the city Dec. 29. The American force under Gen. Robert Howe consisted of about 800 Continentals and 400 militia. The British loss was officially reported as 3 killed and 10 wounded. Eighty-three Americans dead and 11 wounded were found on the field. Some 450 were taken prisoners, while the others retreated up the Savannah River and reached South Carolina. Forty-eight cannon, 23 mortars, 94 barrels of powder, and a large quantity of provisions fell into the hands of the British.

Savannah (Ga.), Fall of. (See Fort McAllister, Ga.)

Savannah (Ga.), Siege of.—In 1779

Washington sent Gen. Lincoln to take command of the army in the South, and requested Count d'Estaing, in command of the French fleet in American waters, to co-operate in an effort to retake Savannah, Ga., Sept. 16, 1779; the latter appeared off Savannah with 33 vessels and 6,000 men. After the capture of 2 frigates and 2 store-ships a regular siege was commenced by the allies. The city was defended by a force of about 3,000 British troops under Gen. Prevost. On the morning of Oct. 9, 1779, about 3,500 French and 850 Americans advanced to the attack. The fighting was fierce for nearly an hour, when the assailants gave way after a loss of nearly 1,000 men. Count Pulaski was killed and Count d'Estaing was wounded. The loss to the garrison was only 56 in killed and wounded. Next to Bunker Hill this fight was the bloodiest of the war.

Savings Banks. (See Banks, Savings.)

Saxony.—A Kingdom of the German Empire, bounded on the north and east by Prussia, on the south by Bohemia, and on the west by Saxe-Altenburg, Saxe-Weimar-Eisenach, and Reuss. It is noted for its rich mines of coal, silver, tin, lead, iron, etc. For its size, Saxony is the busiest industrial state in the German Empire. It manufactures extensively machinery, textiles, tools, porcelain, glass, foundry products, beer and spirits. The government is a hereditary constitutional monarchy, administered by a King, an upper chamber, and a lower chamber of eighty-two deputies. Saxony sends four representatives to the Bundesrat and twenty-three to the Reichstag. It entered the North German Confederation in 1866 and became a state of the German Empire in 1871. Area, 5,787 square miles; population (1910), 4,508,601.

Saxony, convention with, 2267.

Saxony, Treaties with.—The convention of 1845 abolished the *droit d'aubaine* and all other taxes on emigration; provided for a period of two years in which an alien may close up the affairs of a legator from whom by alienage he is unable to inherit or hold property; settled questions of the disposal and holding of property by aliens, and the settlement of disputes concerning the same. (See German Empire.)

Scabbard.—A sheath for a sword or similar weapon.

Sea.—A general term referring to all the salt navigable waters. (See Freedom of the Seas.)

Sea Witch, The, wreck of, near Cuba, 2907.

Seacoast Defenses. (See Defenses, Public.)

Seal Fisheries. (See Alaska, Bering Sea Fisheries, Great Britain, claims against, and Russia, claims against.)

Seal of United States.—Immediately after the declaration of independence a committee was appointed to prepare a device for the great seal of the United States. The committee consisted of Benjamin Franklin, John Adams, and Thomas Jefferson. They reported various devices during several years. William Barton, of Philadelphia, was appointed to submit designs. Sir John Prestwich, an English antiquarian, suggested a design to John Adams in 1779. It was not until June 20, 1782, however, that a seal was adopted. This was by the Congress of the Confederation. It was a combination of the various designs of Barton and Prestwich, and consisted of: Arms—Paleways of thirteen pieces argent and gules; a chief azure; the escutcheon on the breast of the American eagle displayed proper, holding in his dexter talon an olive branch and in his sinister a bundle of thirteen arrows, and in his beak a scroll with the motto *E Pluribus Unum* (out of many, one). Crest—A glory or (gold) breaking through a cloud proper and surrounding thirteen stars, forming a constellation *argent* (silver) on an azure field. Reverse—A pyramid unfinished, symbolizing the strength and growth of the states; in the zenith an eye in a triangle surrounded with a glory proper; over the eye, around the rim, the words *Annus cœptis* (God has favored the undertaking); beneath the pyramid *MDCCLXXVI* and the words *Novus ordo sæclorum* (a new order of things). This seal has never been changed, and is in charge of the Secretary of State.

The seal is stamped upon all signatures of the President, attested by the Secretary of State.

Accompanying the report and adopted by Congress, were the following remarks and explanation: "The escutcheon is composed

of the chief and pale, the two most honorable ordinaries. The pieces pales represent the several states all joined in one solid compact entire, supporting a chief which unites the whole and represents Congress. The motto alludes to this union. The pales in the arms are kept closely united by the chief, and the chief depends on that union and the strength resulting from it for its support, to denote the confederacy of the United States of America and the preservation of their union through Congress. The colors of the pales are those used in the flag of the United States of America; white signifies purity and innocence; red, hardness and valor; and blue, the color of the chief, signifies vigilant perseverance and justice. The olive branch and arrows denote the power of peace and war, which is exclusively vested in Congress. The constellation denotes a new state taking its place and rank among other sovereign powers. The escutcheon is borne on the breast of an American eagle without any other supporters, to denote that the United States of America ought to rely on their own virtue. The pyramid on the reverse signifies strength and duration. The eye over it and the motto allude to the many signal interpositions of Providence in favor of the American cause. The date underneath is that of the Declaration of Independence, and the words under it signify the beginning of the new American era which commences from that date."

Seamen's Act.—The La Follette bill to promote the welfare of American seamen in the merchant marine of the United States was one of the much discussed administration measures of the Sixty-third Congress. It was signed by President Wilson, March 4, 1915.

General provisions fix the percentage of a crew that must be able seamen, the percentage of each department that must understand the language of the officers, and define seamen as men over nineteen years old having had three years' experience of a specified kind.

Perhaps the most important provision in the act imposes upon foreign vessels leaving American ports the same requirements as to life-saving appliances as are demanded of American ships. All ships built after July 1, 1915, must carry life-saving equipment for all persons on board, of which 75 per cent must be regular lifeboats and not more than 25 per cent life rafts or collapsible lifeboats. For the lake and river steamers a distinction is recognized between the excursion season, from May 15 to Sept. 16, when the restrictions are somewhat relaxed.

Another provision affecting foreign as well as American seamen is that providing that seamen reaching American ports may demand and receive half of their pay already earned. If this demand is refused the seaman is freed from his contract and is then entitled to all he has earned up to that time.

Other provisions abolish arrest and imprisonment as a penalty for desertion, and seek to abrogate treaty provisions in relation thereto.

The spirited controversy over navigation laws revealed the fact that not enough was known of the regulations of the principal countries to make an adequate comparison.

For example, emphasis is frequently laid upon the fact that our laws require that American ships be officered by American citizens, and complaint is made that this is unjust and unusual. Upon making a comparison of the laws in the Bureau's report, it is found that the laws of Japan provide that no foreigner may be employed as an

officer on a vessel of a subsidized company without Government approval. Norway and Germany do not expressly prohibit the employment of foreign citizens, but the fact that applicants for licenses as officers are required to pass examinations in Norwegian and German, respectively, practically excludes persons of other nationalities.

All the selected countries except Japan have laws requiring adequate quarters for the crew. Germany has since 1905 required 123 cubic feet of air space in the sleeping quarters for each sailor, and France has required the same space since 1908. England fixed its requirement at 120 feet in 1907, and Norway adopted this minimum in 1909. Requirements for American vessels were not raised to 120 feet until 1915.

The provision in the Act of March 4, 1915, for a new class of sailors designated as "certified lifeboat men" has been the subject of much discussion. The Bureau's report brings out the fact that a British Commission appointed especially to investigate the subject of lifeboat equipment recommended as far back as 1912 that two "efficient boathands" should be carried for each lifeboat and that "facilities should be given to enable all hands to prove their competency as efficient boat hands." However, Parliament has not yet adopted this recommendation. A German rule promulgated in March, 1898, requires that emigrant ships shall carry at least two adult persons in the crew for every collapsible boat; at least three for every ordinary rigid boat; and at least four for every regulation life boat.

Secession.—The act of going aside or withdrawing, as from a religious or political organization. The word has received world-wide notoriety from its use in connection with the secession of certain of the United States from the Union in 1860 and 1861. After the adoption of the Constitution in 1787 the idea of the sovereignty of the individual states remained familiar to the minds of many Americans. The Federalists of New England made threats of secession in 1811 and 1814, and secession was generally looked upon as an available remedy for Federal aggression. This claim has been advanced, directly or indirectly by many of the states in turn and has on such occasions usually been condemned by the others as treasonable. It was involved in or explicitly put forward by the Kentucky Resolutions, the Hartford Convention, and the South Carolina Nullification Ordinance (q. v.). While Jefferson condemned "secession," some of his writings admitted it to be a remedy of the last resort. As agitation against slavery became more intense secession was looked upon as the right and destiny of the southern states. South Carolina was ready to secede in 1850. The Nullification Ordinance of 1832 and other measures passed by that state were early steps in that direction.

Gen. Jackson, then President, felt that such a power lodged in a state would be fatal to the Union and altogether unconstitutional. His emphatic opposition, as expressed in his military preparations, as well as his strong message and proclamation on nullification, in 1833 (1166, 1203), checked this feeling for a time, but the postponement to a final test was perhaps chiefly due to the unpopularity of the nullification doctrine among the states-rights people themselves. Another reason why the South Carolina nullification movement was stopped was the adoption by Congress of the Clay-Calhoun compromise tariff bill, which gave satisfaction to the nullifiers and their states-rights friends in the south who did not accept nullification as a rightful or expedient remedy.

The secession doctrine was revived on the election of Lincoln in 1860. Many of the southern people felt that the triumph of the Republican party meant the adoption of a policy of such interference with the institution of slavery as to make it impossible for the southern states any longer to secure and enjoy their constitutional rights, within the Union.

Accordingly, Dec. 20, 1860, after the election of Lincoln, South Carolina, by convention, passed an ordinance repealing her adoption of the Constitution in 1788, and reviving her independence. Mississippi seceded Jan. 9, 1861; Florida, Jan. 10; Alabama, Jan. 11; Georgia, Jan. 19; Louisiana, Jan. 26; Texas, Feb. 1; Virginia, April 17; Arkansas, May 6; North Carolina, May 20; Tennessee, June 8, all by conventions. Op-

position to secession in many states was based rather upon the ground of inexpediency than unconstitutionality. The National Government never recognized the validity of the ordinances of secession adopted by the southern states. (See illustration opposite 3151.)

Buchanan, 3159, 3186.

Lincoln, 3206, 3221.

Second Assistant Postmaster-General.

(See Assistant Postmasters-General.)

Second Assistant Secretary, State Department.—The office of second assistant

secretary of state was created in 1866. This officer has charge of certain diplomatic affairs of great importance to the work of the Department of State. He is appointed by the President, by and with the consent of the Senate, and his yearly salary is \$4,500. Under his jurisdiction fall the Latin American and Mexican Division (q. v.), the supervision of mail (q. v.), the Diplomatic Bureau (q. v.), and the Citizenship Bureau (q. v.). (See State Department.)

Second Class Mail Matter, Commission on, report of, 7733.

Secret Lodges, proclamation against lawless incursions of, on northern frontier, 1925.

Secret Service.—The Secret Service of the United States is under the Department of the Treasury and is directly under charge of the assistant secretary of the treasury. The first formal appropriation for this service was made in 1865, to the amount of \$100,000 included in the Sundry Civil Appropriation Bill.

The original purpose of the Secret Service organization was that of detecting counterfeiting, but its functions have been enlarged and widened.

The Secret Service force has been called upon to protect the Presidents, especially after the assassination of McKinley; to gather evidence against violators of the Customs Laws and the Excise Laws; to gather evidence against land frauds, resulting in many arrests and convictions, as well as in the recovery to the United States of vast tracts of land illegally acquired by private individuals and public officials; and to gather evidence against violators of the anti-trust laws and generally against violators of any Federal Statutes.

An auxiliary arm of the Secret Service in the Department of Justice, directly under the administrative branch, is the Bureau of Investigation. Another auxiliary force consists of the Post-Office Inspectors, working under the Post-Office Department. Each of the departments can avail itself of the services of the Secret Service Department for detecting criminals.

During the Spanish-American War the confidential agents of Spain were detected by the Secret Service and evidence procured which caused the expulsion from Canada of the Spanish Legation, members of which were acting as spies.

The efficiency of the Secret Service Department as a whole was well illustrated immediately after the declaration of war with Germany in 1917, when the outbreaks caused by German spies and plotters were feared and confidently expected by many American citizens. The Secret Service, however, had thoroughly acquainted itself with

all the machinations of the German Spy System; and the Department of Justice, by the aid of the Secret Service, was enabled promptly to make wholesale arrests of the leaders of the German Spy System in America, which had the result of breaking down the German scheme, and of throwing consternation into its leaders. It is generally claimed that the United States has as effective a Secret Service as any country in the world. (See Treasury Department.)

Secret Service:

Amendment to law a benefit to criminals, 7225.

Assertion that Congress did not wish to be investigated by, 7226.

Complaint of amendments to law, 7225.

Defense of use of Secret Service men in discovering land frauds, 7245.

Evidence of land and timber frauds secured by, 7225.

Increase in salary of chief of, recommended, 7253.

Land frauds investigated by, 7249.

Report of special committee on President's message relating to, 7238.

Senator and member of Congress indicted on evidence secured by, 7226.

Secretaries.—By a series of acts passed in the early part of 1781 Congress organized the Government under several Departments, at the head of which were placed secretaries with duties similar to those of the secretaries of the British Government. The Secretary of the Navy was originally the Secretary of Marine. The Secretary of the Treasury was originally the Superintendent of Finance. Now all the heads of Departments, nine in number, are denominated secretaries, except the Attorney-General and the Postmaster-General. (See also Cabinet; Presidential Succession, and Administration.)

Secretary of Agriculture. (See Agriculture, Department of.)

Secretary of Commerce.—The first Secretary of Commerce of the United States was William C. Redfield, who was appointed when the Department was separated from the Department of Commerce and Labor on March 4, 1913. He is ninth in the Presidential succession (q. v.), and his yearly salary is \$12,000. He is charged with the general development and encouragement of American commerce, trade, and transportation, through the activities of the Commerce Department (q. v.).

Secretary of the Interior.—The office of Secretary of the Interior was definitely established by act of Congress approved March 14, 1862, but the duties of the office have never been carefully defined. The Secretary of the Interior has assumed the administration of various details of internal administration of the government, such as the administration of Indian affairs; supervision over mines, irrigation, pensions and patents; direction of the educational work of the country; government of the territories, Alaska and Hawaii; the direction of the General Land Office; and the adminis-

tration of the National Parks. In addition to his administration duties, he renders decisions on laws affecting public lands and pensions, and formulates the policy of the Department of the Interior thereon. (See Interior Department and list of sub-headings at end of article.)

Secretary of the Navy. (See Navy Department.)

Secretary of State. (See State Department.)

Secretary of the Treasury. (See Treasury Department.)

Secretary of War.—The office of Secretary of War was established in 1781, succeeding the Board of War which had been in military charge of the War of the Revolution. The Secretary of War is third in the line of Presidential succession (q. v.), and his yearly salary is \$12,000. He prepares estimates for and directs the appropriations and expenditures of the Department of War; and accordingly, although the President is the commander-in-chief of the Army, the Secretary of War and the War Department are responsible at any given time for the efficiency in war of the United States. Besides administration of the war forces of the country, the Secretary of War has supervision over the Military Academy at West Point (q. v.), over the Army War College at Washington, and over bridges across navigable streams and harbors. In addition, he has charge of the publication of the *Official Records of the War of the Rebellion*. (See War Department; Army.)

Sedition Law.—In 1798, when war between the United States and France was imminent, there were in the United States by estimate 30,000 Frenchmen organized into clubs, and 50,000 sympathizers with France, who had been English subjects. Many of the newspapers of the country at the time were controlled by aliens, mostly French, English, Irish, and Scotch refugees. Those alien residents who sympathized with France—the larger number—attacked the Government fiercely through the press for its attitude toward that country. In order to restrain this feeling, which excited bitter animosity among those Americans who resented the French attitude toward the United States, the Federalists in control of Congress passed the famous alien and sedition acts. The sedition act of July 14, 1798, was modeled on two English acts of 1795. It provided heavy fines and imprisonment for any who should combine or conspire against the operations of the Government, or should write, print, or publish any "false, scandalous, and malicious writings" against it or either House of Congress or the President, with intent to bring contempt upon them or to stir up sedition.

The penalties imposed were fines of \$5,000 and five years' imprisonment, and \$2,000 and two years' imprisonment, respectively. This, as well as the alien act, was regarded by the Republican party as unconstitutional and subversive of the liberty of press and speech. They called forth the Virginia and Kentucky resolutions (q. v.). The sedition act expired in 1801. (See also Alien and Sedition Laws.)

Seed Distribution:

Act making special, in draught-stricken counties in Texas, vetoed, 5142. Recommendations regarding, 5888, 5982, 6171.

Seigniorage:

Act for coinage of, vetoed, 5915. Discussed, 5875.

Seizures. (See Vessels, United States.)

Selden, Withers & Co., reimbursement of Indians on account of failure of, recommended, 2836.

Self-Government.—A democracy or a republican form of government as distinguished from a monarchy, autocracy or oligarchy, for the reason that in a democracy or a republican form of government the people direct the formulation of their own laws, and therefore govern themselves.

Seminaries of Learning (see also Education; National University):

Establishment of, discussed and recommended, 470, 878.

Power to establish should be conferred upon Congress, 587.

Seminole Indians. (See Indian Tribes.)

Seminole Wars.—After the War of 1812 the combined British and Indian stronghold known as the Negro Fort, on the Apalachicola River, was a constant menace to the Georgia settlers. During 1817 there were several massacres of whites. Gen. E. P. Gaines was intrusted with the task of subjugating the Indians. He destroyed an Indian village on the refusal of the inhabitants to surrender certain murderers, and the Indians retaliated by waylaying a boat ascending the Apalachicola with supplies for Fort Scott and killing 34 men and a number of women. Gen. Jackson took the field against the Indians in January, 1818, and in a sharp campaign of six months defeated them completely, destroying their villages and driving them from every stronghold. Among the prisoners taken were two English subjects, Arbuthnot and Ambrister, who were charged with inciting the Indians to hostilities. These were tried by court-martial and hanged.

Jackson pursued the Indians into Florida, which was then Spanish territory, captured Pensacola and St. Marks, deposed the Spanish government, and set up an American administration. This territory was later returned to Spain, but the outgrowth of the incident was the cession of Florida to the United States in satisfaction of the latter's claims, and the payment to Spain besides of \$5,000,000. The second Seminole war was the most stubborn and bloody in all the Indian wars. It originated in the refusal of part of the tribe to cede their lands to the whites and remove to the Indian Territory. Osceola, one of the chiefs opposed to immigration, was placed in irons by Gen. Thompson, an agent of the United States. Osceola regained his liberty, killed Thompson and others at Fort King, and cut to pieces a body of troops. Operations against Osceola and his warriors were conducted with great severity, but with varying success, under Scott, Call, Jessup, Taylor, and others. The Indians were supposed to be subjugated in 1837, but Osceola fled and renewed the struggle. He was taken by strategy in 1842 and the war ended. (See illustration opposite 1929 and description on back.)

Termination of, 1417.

Troops in, rations furnished, referred to, 611.

Senate.—The upper branch of the legislature of the United States. The Senate is composed of two representatives from each state, until 1913 chosen by the state legislature for a period of six years; accordingly the membership has varied in number, from time to time, from twenty-two members representing eleven states in the First Congress to ninety-six members representing forty-eight states in the sixty-third Congress. Senators must be thirty years of age, residents of the state they represent, and must have been citizens of the United States for at least nine years; they receive a salary of \$7,500 per annum and a small allowance for stationery and mileage. Should a vacancy occur in the Senate during a recess of the state legislature, the governor of the state makes a temporary appointment which is valid until the next meeting of the legislature. The Constitution provides that the terms of Senators shall so overlap that one-third of the members retire every two years. The presiding officer of the Senate is the Vice-President of the United States who votes only in case of the votes being equally divided. Besides the legislative functions, the Senate ratifies or rejects all treaties negotiated by the President; confirms or rejects all appointments to the higher Federal offices; exercises the functions of high-court of impeachment; and in case the electors fail to make a choice, elects the Vice-President of the United States from the two candidates receiving the largest number of electoral votes. The exercise of these wide powers given to it by the Constitution, has rendered the Senate more powerful than the House; the reverse being usually the case with upper houses.

In the Constitution adopted by Virginia in 1776 the name Senate was given to the Virginian upper chamber, but the term was not applied to the upper house of the Federal Congress until Aug. 6, 1787; which up to that time had been known as the "second branch." Since the name has been adopted in the Congress of the United States it has spread to all states whose legislatures are divided into two chambers.

The composition of the Senate is due to one of the most important proposals in the constitutional convention at Philadelphia, known as the "Connecticut Compromise" which was brought forward by Oliver Ellsworth and Roger Sherman. This compromise settled the conflicting claims of the large and small states by providing for equal representation of states in the Senate, the House being chosen on a population basis. The seventeenth amendment to the Constitution, adopted May 31, 1913, provides for the election of senators by direct vote of the people, instead of by the legislatures of the states as formerly. Some of

the states had already, before the adoption of this amendment, provided for the election of their senators by direct vote of the people.

See illustration, frontispiece, Vol. XI.

Senatorial Courtesy.—In order that the dignity of the body may be preserved, the Senate gives considerable attention to the personal wishes of its members. In addition to the observance of courteous address, polite language, and the exercise of those acts of kindness which tend to lighten official duties and render social life a pleasure, there is a tacit understanding as to the conventional privileges to be accorded to each in the official deliberations. Should the name of any former member of the Senate be presented to that body by the President for their advice as to his appointment to a Federal office, Senatorial courtesy requires immediate confirmation without reference to a committee. The privileges of speaking as long as he may choose on any question before the Senate is a courtesy granted each Senator, and though it is charged that undue advantage has sometimes been taken of this privilege it was not abridged until on the closing session of the Sixty-fourth Congress on March 5, 1917, a small group of Senators was enabled by employing a filibuster (q. v.) to prevent action upon President Wilson's request for power to use armed neutrality (q. v.). At the President's request, the Senate continued its meetings, and on March 8, by a vote of 76 to 3, adopted a rule whereby closure (q. v.) may be enforced. The rule provides that two days after notice in writing from sixteen Senators the question of closing debate on a particular bill shall be settled without debate, and if settled in the affirmative, by two-thirds, that bill shall be held before the Senate till its final disposition, and each Senator shall be limited to one hour's debate in all on the bill itself, amendments to it and motions arising from it. To prevent endless roll calls the rule further provides that after the two-thirds vote no amendment may be offered without unanimous consent.

Senators of United States:

Appointments to office, relation of, to. (See Executive Nominations.)

Constitutional amendment regarding election of, recommended, 3840, 3889.

Loyal Representatives and, denial of seats in Congress to, discussed, 3644.

Seneca Indians. (See Indian Tribes.)

Sentinel.—A soldier placed on watch, especially to give quick warning of probable attack.

Separatist.—Sometimes used as a synonym for secessionist. (See Secession.)

Sequoia National Park. (See Parks, National.)

Serbia. (See Servia.)

Servia.—Servia is situated in the north of the Balkan Peninsula and is bounded on the north by Hungary, on the south by Greece, on the east by Rumania and Bulgaria, and on the west by Bosnia, Montenegro, and Albania.

Physical Features.—The country is generally mountainous, and consists of extensive forest-clad slopes, uncultivated heaths, and fertile meadows and valleys. The

Transylvania Alps, the Balkans and the Rhodope ranges extend from Rumania and Bulgaria into eastern Serbia, while out-liers of the Bosnian and Albanian highlands cross the western border. In the north the Drina and Save effect a confluence at Belgrade with the Danube, which forms the remainder of the northern (and part of the northeastern) frontier, and is joined in the northeast by the Timok, which is also a frontier river for part of its course. The chief inland river is the Morava, which rises in Bulgaria and flows through Serbia, from south to north, into the Danube. The valleys of these rivers contain the most fertile districts of the kingdom. The principal river of Macedonian Serbia is the Vardar, which rises in the Shar Mountains on the Albanian frontier and flows southward to the Greek frontier and thence to the Gulf of Salonica. The climate is generally mild, but is subject to the continental extremes.

History.—The earlier Serb kingdom was extinguished by the Turks at the battle of Kossovo in 1389, and from that date until the early years of the nineteenth century the country formed a Turkish pashalik. After heroic struggles the pashalik was recognized as an autonomous principality by the Treaty of Adrianople (1829), and by the Treaties of San Stefano and Berlin (1879) the complete independence of the country was recognized, a kingdom being proclaimed on March 6, 1882. On May 29 (June 11), 1903, the descendant of the Obrenovich dynasty, which had ruled Serbia as Princes and Kings since 1830, was assassinated, and a grandson of Kara-george, a national hero of the risings of the early nineteenth century, was elected King by the Skupstina and Senate, and was crowned in September, 1904.

Oct. 19, 1912, the Balkan League (Bul-garia, Serbia, Montenegro and Greece) waged a successful war against the Otto-man Empire; in 1913 Bulgaria was en-gaged in a war with the other members of the League on a question as to the division of the conquered territories. Ser-via also became involved in a dispute about her western (Albanian) frontier, but withdrew her claims on the representations of the European powers. By the Treaty of Bucharest the Serbo-Bulgarian boundary was delineated, and agreement was also reached with Greece as to the line of the southern boundary.

July 28, 1914, following the assassina-tion of the Austrian Archduke and his wife by a Bosnian student, said to have been incited by Serbian societies and with Serbian official connivance, Austria declared war against Serbia. The government evac-uated Belgrade, which was soon occupied by the Austrians.

During the progress of the war the king-dom was completely overwhelmed by the Teutonic armies. King Peter escaped to France and the shattered armies joined the French at Salonika.

Ethnography.—In 1910 the total popu-lation of 2,911,701 was composed of 2,250,-000 Servians (Serbo-Croatian Slavonians), 160,000 Rumanians, 47,000 Gypsies, 8,000 Austro-Hungarians and Germans, and 6,000 Jews. The bulk of the Servians belong to the national (Orthodox Eastern) Church, there being 8,500 Roman Catholics and a small number of Protestant Christians. In the territory acquired in 1913 are large numbers of Mohammedans.

The mineral wealth of Serbia awaits development. Gold, silver, antimony, nickel, mercury, manganese, graphite, copper, iron, lead, and zinc are found, and coal, marble,

sulphur and oil are won in small quanti-ties. Mineral springs abound. The indus-trial population is small, the sixty prin-cipal establishments in 1910 employing 5,000 hands.

Railways, etc.—About 580 miles of rail-way were open for traffic in 1911, the main lines crossing the Danube at Bel-grade-Semendria, and uniting in a single route as far as Nish, whence they run via Pirot to the Bulgarian boundary and Sofia, and via Vranya across the Turkish frontier, both lines leading to Constanti-nople. In the territory acquired in 1913 a line runs along the Vardar valley to Sa-lonica (Greece), with eastern and western branches to Bulgaria and Albania.

Neutrality of United States in war with—

Austria-Hungary, 7969.

Treaty with, 4658.

Servia, Treaties with.—The convention of commerce and navigation of 1881 provided for freedom of commerce, navigation, and trade upon full, equitable, and reciprocal bases; established the rights of real and personal property holders; conferred trade privileges; restricted the prohibition of im-ports; exempted citizens of the one coun-try from enforced military service or con-tributions in the country of the other; granted terms of the most favored nation in matters of import and export duties; exempted goods from any form of transit duty; goods for the one country to be con-veyed over the railroads of the other on terms equal to those of the citizens of the country. (For terms of the consular con-vention of 1881, see Consular Conventions. For terms of the extradition treaty of 1901, see Extradition Treaties.)

Servitude.—State of being in slavery. (See Slavery.)

Sessions of Congress. (See Extraordi-nary Sessions of Congress.)

Settlement.—A community of individuals, especially one newly located.

Settlement Worker. (See Social Settle-ments.)

Settlements. (See Social Settlements.)

Settler.—One who takes up his abode in a new country. By custom the settlers of various communities in the United States have been alluded to by the second generation as Old-Settlers, and holidays have been set apart, or special occasions designated, for Old-Settlers' Days or Meetings. (See Old-Settlers' Meeting and Pioneers.)

Seven Days' Battles.—A series of battles fought in the Peninsular campaign, in the vicinity of Richmond, Va., between the Army of the Potomac, under McClellan, and the Confederate army under Lee. The first conflict occurred on June 25, 1862, and a battle was fought each succeeding day but one to July 1. June 25 McClellan's army before Richmond, numbering 115,102, received orders to advance. Lee's army on both sides of the Chickahominy aggregated 80,835. Hooker advanced beyond Fair Oaks and secured his ground. Meantime the Confederates had placed Richmond in a state of security and determined upon aggressive movements. Lee had succeeded Johnston in command, and it was determined to bring the mass of the army down the Chickahominy and threaten McClellan's communications with the York River. Jackson had moved out of the Shenandoah Valley and was at Hanover Court House, ready to render what assistance might be required. Some Federal historians say that McClellan determined to change his base of operations to the James River, seventeen miles south of Fair Oaks. The writers on the Southern side deny this. The retreat was accomplished with a loss to the Federal army of 15,249 men. The operations of the two armies are described under the headings Mechanicsville, Gaines Mill, Savage's Station, Frayser's Farm, and Malvern Hill. A few weeks later the Federal army was withdrawn from the James and the Peninsular campaign was ended.

Seven Nations. (See Indian Tribes.)

Seven Pines and Fair Oaks (Va.), Battle of.—From Williamsburg to Richmond, Va., the distance is about fifty miles. By May 30, 1862, Casey's and Conch's divisions of Keyes's corps of McClellan's army had crossed the Chickahominy and advanced respectively to Fair Oaks and Seven Pines, six and seven miles, respectively, from Richmond. Heintzelman's corps had also crossed and was encamped several miles to the rear of Conch on the Williamsburg road, and Sumner was ready to make the passage of the stream when a heavy rain, which occurred on the night of May 30, rendered this impracticable. Joseph E. Johnston, who was in command of the Confederate forces, sent Generals Longstreet, Huger, D. H. Hill and Gustavus W. Smith to attack this advance guard of the invading army. The fighting began at 1 P. M., May 31. The Federals gradually fell back. At 4:30 the arrival of Sedgwick's division of Sumner's corps turned the tide of battle. At sunset Gen. Johnston was severely wounded by a piece of shell, and the command devolved upon Gen. Smith. In the morning the Confederates renewed the attack. They were finally repulsed about noon. The Confederates lost 4,222. The Federals lost 5,739, of whom 800 were killed. Gen. Lee assumed command of the Confederate army the day following the battle. (See illustration opposite 3277.)

Seven Sisters.—New Jersey had long been known as the "Mother of Trusts" because

of the leniency of the state laws regulating combinations of capital. During Woodrow Wilson's term as Governor, and when supported by a Democratic Legislature, he stated in a message: "The laws of New Jersey, as they stand, so far from checking monopoly, actually encourage it. They explicitly permit every corporation formed in New Jersey to purchase, hold and assign the securities of any and all other corporations of this or any other state, and to exercise at pleasure the full rights of ownership in them, including the right to act as stockholders. This is the very method of forming vast combinations and creating monopoly against which the whole country has set its face."

In accordance with the Governor's wishes seven bills were introduced into the Senate Jan. 20, 1913, and, under his personal exhortation, passed in less than a month, and became Chapters 13 to 19, Laws of New Jersey, 1913. Their provisions are briefly as follows:

First.—A trust is defined as a combination or agreement between corporations, firms or persons for the following purposes: (1) creating or carrying out restrictions in trade, or acquiring a monopoly, either in intra-state or inter-state business or commerce; (2) limiting or reducing production and increasing prices; (3) preventing competition in production, transportation or marketing of any commodity; (4) fixing a standard price with a view to controlling the price of any commodity; (5) making any agreement by which, directly or indirectly, free and unrestricted competition among the parties to the agreement is precluded; (6) making any secret or oral agreement or understanding with the object of accomplishing any of the above-mentioned purposes. Violation of these provisions is made a misdemeanor and, in case of a corporation, the offence shall be deemed that of the individual directors, and the charter of the offending company may be revoked.

Second.—All corporations, firms or persons engaged in the production or sale of any commodity are forbidden to discriminate between different persons or sections or to charge one a lower price than another for the same service.

Third.—Corporations may purchase real and personal property and the stock of any corporation necessary for its business, and may issue stock in payment therefor in bona-fide transaction, but no fictitious stock can be issued for profits anticipated but not yet earned.

Fourth.—Persons incorporating with fraudulent or unlawful intent or for the purpose of restraining trade or acquiring a monopoly, shall be guilty of a misdemeanor.

Fifth.—In case two or more corporations are merged or consolidated, the consolidated corporation may issue bonds or other obligations "to an amount sufficient with its capital stock to provide for all the payments it will be required to assume in order to effect such merger or consolidation," provided that such bonds shall not bear more than six (6) per cent interest.

Sixth.—No corporation can "hereafter purchase, hold, sell, assign, transfer, mortgage, pledge or otherwise dispose of the shares of the capital stock or securities of any other corporation nor, as owner of such, exercise any of the privileges of ownership or the right to vote thereon. Provision is made that a corporation is not prevented from (1) acquiring the securities created by a non-competing corporation in payment of debt; (2) purchasing,

as a temporary investment, out of its surplus earnings, the securities of a non-competing corporation; (3) investing its funds in such securities when held by it for the benefit of its employees or any funds held for insurance, rebuilding or depreciation purposes.

Seventh.—Mergers of corporations shall not impair the rights of any creditor of either of the merged corporations. Approval for a merger of corporations must be obtained from the State Board of Public Utilities Commissioners and filed with the Secretary of State.

Seward's Folly.—The action of William H. Seward, Secretary of State, in negotiating the purchase of Alaska in 1867, was criticised severely by many people, and referred to as Seward's Folly. The value of Alaska to the United States has long since robbed the phrase of any but historical value. (See Alaska.)

Sewells Point, Va., evacuation of batteries on, referred to, 3313.

Shadrach Case.—One of many exciting fugitive slave cases of ante-bellum days. In May, 1850, Frederic Wilkins, a Virginian slave, made his escape and found his way to Boston, where he obtained employment under the name of Shadrach. Subsequently he was arrested and imprisoned in the United States court-house, pending trial. He was liberated by a body of colored people and assisted to Canada. Intense excitement prevailed in Boston, which spread over the entire country when Congress turned its attention to the infringement of the law. Clay introduced a resolution requesting the President to inform Congress of the facts in the case. President Fillmore issued a proclamation (2645) announcing the facts and calling upon the people to prevent future disturbances.

Shawane Indians. (See Indian Tribes.)

Shawnee Indians. (See Indian Tribes.)

Shays's Rebellion.—An insurrection of some people of western Massachusetts against the state government in 1786-87, under the leadership of Daniel Shays. After the close of the Revolution much discontent and actual want prevailed throughout New England, especially in Massachusetts. The annual state tax amounted to \$1,000,000. Riots and armed mobs were frequent. The chief grievances complained of were that the governor's salary was too high; that the senate was aristocratic; that lawyers' fees were extortionate and the taxes burdensome. The relief demanded was the issue by the state of paper money. This was refused. Shays, at the head of 1,000 armed men, took possession of Worcester, Dec. 5, 1786, and prevented the session of the Supreme Court. The court having adjourned to Springfield, the same men attempted to prevent the session there, but were forestalled by the militia. In January, 1787, three bodies of insurgents, under Shays, Luke Day, and Eli Parsons, marched upon Springfield with the purpose of capturing the Continental arsenal. Shays's army, numbering about

1,000, was attacked by about 4,000 militia under Gen. Benjamin Lincoln, and was put to flight with a loss of 3 killed and 1 wounded. Shays and some of his followers joined Parson's force, but were dispersed by the militia at Petersham in February, 1787. Shays escaped, but 150 others were captured and their leaders sentenced to death. All, however, were ultimately pardoned on laying down their arms.

Shell Castle Island, N. C., beacon to be erected on, 182.

Shenandoah, The.—Notwithstanding the provisions of the British foreign enlistment act of 1819, which forbids the equipment of any land or naval forces within British dominions to operate against any friendly nation, the *Florida*, *Alabama*, *Georgia*, *Shenandoah*, and other Confederate vessels were allowed to escape in spite of the protest of the United States minister. The *Shenandoah* sailed from London as the *Sea King* Oct. 8, 1864, commanded by Capt. James Iredell Waddell, of the Confederate navy. Making for Madeira her name was changed to *Shenandoah*. From Madeira she sailed for Melbourne, destroying a number of United States merchant ships on the way. Thence she went to Bering Sea and did great damage to whaling vessels. At the close of the war the *Shenandoah* was surrendered to the British Government, and later turned over to the United States. The depredations of the *Shenandoah* were made a part of the Alabama claims against Great Britain. (See also Alabama Claims.)

Reported surrender of, referred to, 3575.

Sherman Act.—A compromise financial measure introduced into Congress by Senator John Sherman, of Ohio, and passed July 14, 1890. It repealed the Bland Allison Act of 1878 and directed the Secretary of the Treasury to purchase silver bullion to the amount of 4,500,000 ounces per month, at the market rate, issuing Treasury notes in payment therefor. These notes were to be redeemed in coin at the Treasury on demand. The act also directed the coinage each month of 2,000,000 ounces of the bullion into standard silver dollars. The repeal of the Sherman Act was frequently urged. In the summer of 1893 the law was claimed to be a leading cause of the business depression, and President Cleveland summoned Congress to meet in special session Aug. 7. Congress, after a long debate, passed Nov. 1 the Voorhees bill, repealing the silver-purchasing clause of the Sherman Act, but affirming bimetallicism as a national policy.

Sherman Act:

Repeal of purchasing clause of, discussed, 5875, 6973, 6974.

Recommended, 5833.

Sherman's March. (See illustration opposite page 3437.)

Shilling.—The name of a coin in use in several European states, varying in its value. The English shilling is one-twentieth of a pound sterling, the Danish copper shilling is one-ninety-sixth of a rixdaler, and equal to one-fourth of a penny of English money. The Swedish shilling is twice the value of the Danish. In some parts of Germany the shilling is used as a fractional coin of the value of one penny sterling. In America this coin was first issued from the mint at Boston. The first struck were known as the New England shilling, Willow Tree, Oak Tree, and Pine Tree coins. One of the earliest coins used in America was the Bermuda shilling. Lord Baltimore had shillings coined in London for use in Maryland. As money of account the shilling varied greatly in the Colonies.

Shiloh, or Pittsburg Landing (Tenn.).

Battle of.—One of the most hotly contested battles of the Civil War. After the first line of Confederate defenses in the West had been broken by Grant, Gen. Beauregard was sent to establish another. He selected the line of the Memphis and Charleston Railroad. The Confederate army to the number of 45,000 was concentrated at Corinth, Miss., under command of Albert Sidney Johnston. Polk, Bragg, Hardee, and Breckinridge were there with their corps, and Van Dorn and Price were on the way from Arkansas with 30,000 more. After taking Fort Donelson, the Federal army under Grant proceeded up the Tennessee River to Pittsburg Landing, a point 219 miles from its mouth, on the west bank, near the intersection of the state lines of Alabama, Mississippi, and Tennessee, and about twenty miles from the Confederate camp at Corinth. Five divisions of Grant's army, under Generals W. T. Sherman, Hurlbut, W. H. L. Wallace, McCLernand, and Prentiss, were here encamped, and, including Gen. Lew. Wallace's division, about seven miles down the river, numbered 40,000 men. Buell's army of 40,000 was expected to reinforce them here, and it was the intention upon his arrival to proceed against Johnston at Corinth. The latter, however, without waiting for his own reinforcements, resolved to attack Grant before the arrival of Buell's forces. April 3, 1862, Johnston marched his army from Corinth and on the 6th attacked the Federal army. After a day's hard fighting Grant's army was driven back from the vicinity of Shiloh Church nearly to the river, a distance of three miles. A part of the expected reinforcements arrived just in time to help to check the last charge of the victorious Confederates. The battle was reopened on the morning of the 7th by Buell, who had arrived during the night with 20,000 men. The second day's fighting was as stubborn as the first had been, but the Confederates were outnumbered. At 2 P. M. Beauregard ordered preparations made for the retreat, which by 4 o'clock was under way. He was not pursued. The casualties were: Confederates—killed, 1,728; wounded, 8,012; prisoners, 959; total, 10,699. Federals—killed, 1,735; wounded, 7,882; prisoners, 3,956; total, 13,573. Gen. Albert Sidney Johnston was killed on the first day of the battle and was succeeded by Gen. Beauregard in the command of the Confederate army.

Shimonoseki Indemnity.—Shimonoseki is a seaport of Japan whose forts command a strait of the same name. In 1864 these forts were attacked and destroyed by a squadron of war vessels, representing the

United States, England, France and Holland, in retaliation for the firing on merchant vessels of those nations by the forts. The Japanese Government was compelled to pay damages for the injuries inflicted by the forts, besides an indemnity, amounting together to \$3,000,000. Our share in this sum was \$785,000. Only a small portion of it was needed for damages inflicted, and the remainder lay in our public treasury for some years. It was not applied to any public use, and finally, after repeated attempts to refund the extortionate excess, it was repaid to Japan in 1884.

Shinplasters.—During the war small change disappeared from circulation and the people resorted to postage stamps and private notes. The latter, representing ten, twenty-five and fifty cents, issued by retail dealers to facilitate trade, were of little value beyond the particular locality where they were issued, except as plasters for broken shins, and hence were called "shinplasters." The fractional notes printed by the government under the law of 1863 were also called "shinplasters," but merely because their forerunners had borne that name.

Ship Island, utility of forts on, for protection of Mississippi coast, 2266, 2293.

Shipbuilding.—A summary of the general results of the 1914 census of manufactures for the shipbuilding and boat-building industry, issued by the Bureau of the Census, Department of Commerce, consists of a detailed statement, relating to the United States as a whole and showing, for the years 1909 and 1914, the value of the work done on new vessels, whether launched or not during the census year; the value of repair work done; the kind, number, and tonnage of vessels of 5 gross tons and over which were launched during the year; and the number of power boats of less than 5 tons which were completed during the same period. The statistics relate only to work done in private shipyards and manufacturing establishments.

Reports were received from 1,145 establishments, whose products—that is, construction and repair work done—during the year were valued at \$88,682,971.

The total number of vessels of 5 gross tons and over launched during the census year decreased from 1,584 in 1909 to 1,113 in 1914, or by 29.7 per cent, and the gross tonnage decreased from 467,219 in 1909 to 424,660 in 1914, or by 9.1 per cent. Iron and steel vessels launched decreased from 158 in 1909 to 126 in 1914, or by 20.3 per cent, and in tonnage from 254,986 to 212,559, or by 1.9 per cent. The number of wooden vessels launched decreased from 1,426 in 1909 to 987 in 1914, or by 30.8 per cent, and the tonnage from 212,233 to 182,101, or by 14.2 per cent.

Steel merchant vessels building or under contract to be built in private American shipyards on December 1, 1916, according to builders' returns to the Bureau of Navigation, Department of Commerce, numbered 400 of 1,428,003 gross tons. On December 1, 1915, builders' returns of construction or contracts for the construction of steel merchant vessels aggregated 202 vessels of 761,511 gross tons. The tonnage building or ordered on December 1, 1916, however, is less (17 vessels of 51,913 gross tons), than on November 1, 1916. During November American yards finished 22 vessels of 68,922 gross tons, and made new contracts for 7 steel merchant vessels of 18,285 gross tons.

Decline in American, discussed, 4200.

Encouragement to American, recommended, 4060, 4255, 4727, 5984.

Shipping, American. (See Commerce discussed.)

Ship Purchase Law.—The administration's perfected shipping bill was introduced in the House, May 7, 1916, by Chairman Alexander of the Committee on Merchant Marine and Fisheries. It directed the Secretary of the Treasury to sell Panama Canal bonds to obtain the funds necessary to carry out the provisions of those sections of the bill authorizing the construction, equipment, lease or purchase of vessels, or the creating a \$50,000,000 shipping corporation, and directed the shipping board to investigate the navigation laws, with a view to their amendment, and the cost of building merchant vessels in the United States and abroad, the encouragement of investments in American shipping and other maritime questions, and report to Congress.

Drastic provisions are included to prevent illegal combinations in the shipping trade. The bill also gives the shipping board sweeping powers over rates and practices and clothes it with authority to require regular and special reports from water carriers engaged in carrying the commerce of the United States. The board is authorized to receive and hear complaints and to enforce reparation to the complainant for injury done. Records of investigations made by the board shall be competent evidence in all courts of the United States. The board is to have authority to compel the production of papers and to hear testimony under oath.

The Attorney-General is authorized to intervene on behalf of the board whenever any of its orders shall have been violated and to apply to the courts for the proper process to put such order into effect.

Democratic Senators in caucus July 8, reached an agreement on the bill, thus ending one of the most serious party divisions that occurred in the Wilson Administration.

The principle for which Chairman Alexander of the House committee fought in conference to have the government-owned ships operated in the coastwise as well as in the foreign trade of the United States met with approval at the hands of the Senate Democrats. The other amendments which the caucus agreed upon were as follows:

The Government shall not purchase ships from any of the belligerent nations, nor any ship already engaged in the American trade unless it is about to be withdrawn from that trade.

No ship shall be acquired by the government which is below 75 per cent of its original efficiency.

The government shall not undertake to operate its ships unless all efforts fail to negotiate satisfactory leases or sales to private corporations for that purpose, the government reserving the right, however, to prescribe conditions under which ships shall be operated and in what service they shall engage.

By a strictly party vote the Senate Commerce Committee, July 18, directed Senator Simmons to report the bill favorably to the Senate with the following amendments:

The Shipping Board shall be limited in

jurisdiction to vessels on the high seas and on the Great Lakes.

Ferrying, towing, transfer and lighterage are operations which are not subjected to this regulation.

The Secretary of Commerce and Secretary of the Navy are removed from the Shipping Board.

The government will not purchase any vessel—(a) engaged in American trade; (b) which flies a belligerent flag; (c) which is not adapted to the requirements outlined in the bill, and (d) which is not at least 75 per cent as efficient as when new.

The vessels may engage in the coastwise trade. In other words, the coastwise trade is opened up to foreign built vessels acquired by American citizens under this act.

No American vessel can be sold to a foreigner unless the Shipping Board first has its refusal and gives its permission.

The Shipping Board, though a government corporation, may not operate the government vessels in foreign trade unless it is impossible to lease such ships to private interests.

When in times of war the government commanders American vessels compensation therefor shall be based upon normal conditions.

The bill passed the Senate Aug. 18, 38 to 21, all in the affirmative being Democrats and all in the negative Republicans. All of the committee amendments were agreed to without a record vote, and other amendments were inserted. One amendment, the so-called anti-blacklist provision authorizing customs officials to withhold clearance to any ship refusing American cargo except for the reason of being fully laden, subsequently attracted the attention of the Allied Embassies. The provision was inserted at the last moment because of penalties attached to ships which carry blacklisted cargo. President Wilson signed the bill Sept. 7, 1916. The following were later nominated by the President to be members of the Board: William Denman, of San Francisco; Bernard N. Baker, of Baltimore; John A. Donald, of New York; John Barber White, of Kansas City, Mo., and Theodore Brent, of New Orleans.

Ship Purchase Bill:

Urged by Wilson, 8018, 8072.

Ships, foreign-built, admission of, to American registry, 8006.

Shire.—A division of the Kingdom of Great Britain, dating back to the time of the Saxon invasion. It is now taken to mean almost the same as county, as most of the English county names terminate in the word shire. The shire has been extended to Scotland and Wales. In 1643 the general court of Massachusetts Bay Colony ordered that the whole Colony, which then included the present State of New Hampshire, be divided into four shires—Essex, Middlesex, Suffolk, and Norfolk. The name was used for county in all the Colonies.

Shirt and Collar Industry.—A study of the shirt and collar industry reveals the fact that American manufacturers have the home market pretty much to themselves, as foreign competition in these lines is of very little importance. The largest import of collars and cuffs for any one year was \$70,000 in 1913, while the total production of these articles as far back as 1909 was \$17,200,000. The present output is much greater, but no statistics are available. The total value of the shirts produced in this

country in 1909 was \$82,400,000, compared with which the imports are insignificant.

Separate collars for men's shirts are said to have been first made about 1825 by the wife of a blacksmith in Troy, N. Y. This woman did the family washing and ironing, and realized that shirts with separate collars would not have to be washed as often as did shirts with collars attached. She applied the idea not only by making separate collars for her husband's shirts, but by making them also for sale. This innovation attracted the attention of the Rev. Ebenezer Brown, a retired Methodist minister, who kept a small dry-goods store in Troy. With the aid of the female members of his own family, the Rev. Brown, about 1829, began offering "string collars" for sale and soon developed a profitable new branch of his business. The demand for "store" collars increased and during the thirties and forties several companies were formed to carry on the manufacture of separate collars, cuffs, and shirt bosoms, either in connection with the manufacture of shirts or as a separate industry. The sewing machine was introduced into the collar industry in 1852, and steam power in 1855. Electric cutting machines were introduced about 1870, button-holing machines about 1880, and button-sewing machines about ten years later. The collar and cuff industry has been centered in Troy from the first. In 1909, 80.46 per cent of the collars and cuffs manufactured in the whole country was manufactured in that city.

The manufacture of shirts was founded as a systematic industry in 1832 in New York, and in 1909 that city manufactured 27.74 per cent of the total output of the country. Troy and Albany produced 8.85 per cent, Philadelphia 8.68 per cent, Baltimore 8.53 per cent, and St. Louis 4.07 per cent. New York State and Pennsylvania produced more than half the shirts made in the country.

The average percentages of manufacturing profit and final profit of all the 42 establishments were as follows: Manufacturing profit on capital employed in business, 12.32 per cent; on net sales, 6.20 per cent; final profit on capital employed in business, 11.46 per cent; on net sales, 5.85 per cent. Of the total number of establishments reporting, 2 had manufacturing losses and 4 had final losses; 27 earned 10 per cent or more of manufacturing profit and 24 earned 10 per cent or more of final profit on capital employed in business. The group of establishments manufacturing shirts in New York City shows a higher percentage of profit, both on capital employed in business and on net sales, than does the group located outside of New York City. The group with net sales under \$500,000 shows a higher percentage of profit than the group with net sales over \$500,000. Salaries of active officers and the drawing accounts of partners were included in the cost of production before profits were figured. In the case of individual owners of establishments the costs include the estimated amount an employee would have received for services such as the owner rendered.

Some establishments have such crude systems for cost finding, that they do not know exactly or even approximately their profit or loss on certain styles and may continue for a long time to sell particular styles at a loss without knowing it. Other establishments, however, knowing accurately what a certain style costs, will sell it on a small margin of profit, or even at a loss, for the purpose of attracting custom for more profitable styles. An establishment

may find it necessary to carry a complete line of styles in order to meet the demands of its customers and to hold its trade, and may consider it good policy to sell, at or below cost, old or standard styles to consumers who will buy higher-priced goods on which a profit is realized.

The percentage of cost of direct labor on the low-grade shirts is higher than on the high grades, the cost of materials is highest in silk negligee shirts and lowest in laundered shirts, and the cost of labor is relatively highest in the laundered shirts and lowest in the silk shirts. The higher percentages of profit are generally made on the high-grade shirts and not on the low.

Of the total sales of all of the 42 establishments reporting, 58.87 per cent was made to retailers, 38.76 per cent to jobbers, 0.68 per cent by mail order, and 1.69 per cent was exported. Practically all of the high-grade shirts were sold direct to retailers and that portion of the product which was sold to jobbers consisted of work shirts and other low-priced lines. The total expense of 26 establishments which sold all or the greater part of their product to retailers was 8.88 per cent, which is more than twice as large as the total selling expenses of the 12 establishments selling all or a greater part of their product to jobbers. However, the establishments which sold all or a greater part of their product to retailers had a manufacturing and final profit somewhat larger than the profits shown by the establishments which sold all or a greater part of their product to jobbers.

No figures are available showing the imports of shirts, except in the imports of cotton wearing apparel, which do not classify shirts separately. The American product so far exceeds that of foreign manufacture that there is no demand in this country for imported shirts. Of the four establishments that reported on collars and cuffs, two reported that they did some foreign business. One of these establishments reported that it exported 1 per cent and the other 1½ per cent of its net sales, the total export business of the two companies amounting to \$198,688. The exported collars went to Great Britain and the English-speaking nations all over the world, and to the West Indies, Mexico, Central and South America. While the exports of shirts from the United States are not very large, they are probably larger in proportion to the production than in any other branch of the clothing business. Fourteen of the 38 shirt-making establishments did some foreign business, the total for these concerns being \$576,222, or 5.87 per cent of their total business. These shirts went to Canada and our Latin-American neighbors.

Shoe-String District.—The Sixth Congressional District of Mississippi, as laid out in 1874, is so called because it consists of a narrow strip extending along the Mississippi River almost the entire length of the state. (See Gerry-mander.)

S'Homamish Indians. (See Indian Tribes.)

Short Pine Forest Reserve, So. Dak., proclaimed, 7278.

Shoshone Indians. (See Indian Tribes.) Treaty with, 3397, 3898.

Shoshone Reservation, Wyo., agreement for cession of portion of, 5649.

Shoulder Strap.—A decorative strap worn over the shoulder as an insignia distinguishing the rank of an officer; also distinguish-

ing one military or naval division from another.

Shrapnel.—A missile loaded with a quantity of smaller missiles, which scatter in the enemy's ranks by automatic explosion at any predetermined range.

Siam.—Siam occupies the central portion of the Indo-Chinese Peninsula, and lies between 4° 20'-20° 15' N. latitude and 96° 30'-106° E. longitude. The area is stated at 195,000 square miles. It is bounded on the north by British India and French Laos, east by French Laos and Cambodia, south by the Gulf of Siam and the British Malay States, and west by British India. East and west are Spheres of Influence, in which the French and British governments, while disclaiming any intention of annexing territory (Agreement of April, 1904), are entitled to obtain concession from Siam. Between these spheres is a Neutral Zone, which is declared to be inviolable by France and Britain.

Physical Features.—Northern Siam, which is occupied by Laos States under the suzerainty of the King of Siam, contains a series of parallel ranges of no great mean elevation, but with precipitous heights in the extreme north. These hills are covered with forests, from which most of the teak is obtained. Eastern Siam, which also contains Laos States, conquered by Siam about a hundred years ago, consists of a vast river basin encircled by hills, the central portions being sandy desert. Central Siam is also a great plain flanked on the west by high mountains (Mulai 6,886 feet), and contains the richest and most fertile tracts of the kingdom. Southern Siam extends down the Malay Peninsula, which has a broken range of mountains parallel with the coasts, and consists principally of dense and valuable forests.

The principal Siamese river is the Memam (Menam Chao Phaya), which rises in the northern hills and flows into the Gulf of Siam at the port of Bangkok. For six months in every year the river overflows its banks, leaving rich deposits of silt, which provide the most fertile tracts of the kingdom. The wet season lasts from May to October, when the heat is not excessive, and in the dry season the nights are cool.

History.—The Kingdom of Siam is believed to have been founded some time in the sixth century A. D., by a race that had migrated many years earlier from south-west China. The kingdom was extended over the Malay Peninsula toward the close of the twelfth century. Intercourse with Europe was first established at the beginning of the sixteenth century when the Portuguese conquered part of the Malay Peninsula and the French and English have gradually worked their way to the borders of the kingdom, relations with the latter having been always friendly, while the rival claims of France and Siam over the frontiers of Annam led to a Franco-Siamese war in 1893.

Ethnology.—The number of inhabitants in 1912 was 8,149,487. The majority of the population is Siamese and Lao. There is, however, a large number of Chinese and, in the south, Malays. There are no reliable figures showing the proportion of each race. The foreign residents number about 2,000, of whom nearly one-half are British, with 244 Germans, 218 French, 163 Danes, 135 Americans, 123 Italians. The Siamese, Laos and Cambodians, are Buddhists, but the Malays of the peninsula are almost all Muhammadans. The language of the central districts is Siamese; in the eastern and northern districts the Laos have their own

tongue, and the peninsular montons and states are partly Malay speaking.

Government.—The kingdom is now secured from further aggression by the Anglo-French Convention of 1896, under which Central Siam is declared to be inviolable, and each Power renounces the right to annex territory adjoining its borders, although preserving the right of commercial penetration. The Government is an absolute monarchy, and the sovereign appoints his successor from among the male members of the Royal Family. Ruler: Somdetch Phra Paramendr Maha Vajiravudh Mongkut Klao (King of Northern and Southern Siam and of all its Dependencies, and of the Laos, Malays and Karens), born Jan. 1, 1880; succeeded his father King Chulalongkorn, Oct. 23, 1910.

The Kingdom is divided into 17 Provinces or Montons, each under a High Commissioner controlled by the Minister of the Interior. These comprise several sub-provinces, which are subdivided into districts. Sub-divisions of the district are under village headmen. Bangkok is directly governed by the Minister of Local Government.

Recent reforms, including the final abolition of slavery in 1905, have brought into existence an organized system of local and divisional courts, with magistrates trained at a school of law and assisted by European advisers.

Service in the Army is universal and compulsory, and although the law is only partially applied there is a standing army of about 25,000 men.

Education.—Education is generally in the hands of the priests from the Buddhist monasteries scattered all over the country, and scarcely any adult Siamese are illiterate. Government effort is not only coordinate but is directed toward a general advance in the system practised by the monasteries. An estimate of the pupils of the various schools states their number at close on 160,000 throughout the Kingdom, exclusive of the capital, while government effort has provided accommodation for some 15,000 others, including secondary, special and technical schools. The English language is very generally taught in the capital and there are three English schools with English masters, while many Siamese are educated in Europe, particularly in England.

Production and Industry.—The principal industry is the cultivation of rice, which is the national food and principal commodity exported. Irrigation is bringing large areas of northern Siam into cultivation, and the standard of cultivation is being systematically raised. Siamese rice is in great demand abroad. Other crops are tobacco, pepper, coco-nuts, cotton and maize, while fruit is abundantly grown. The forests are productive and the teak industry is maintaining its importance.

Gold, silver, rubies and sapphires are won and exported, and tin, copper, iron, zinc, coal and other minerals are known to exist, the tin exports exceeding 5,000 tons annually, almost entirely from Moulmein. In 1911-1912 export of tin = 5,199 tons.

Finances.—The average annual revenue for the five years ending with 1912 was 61,076,000 ticals. The expenditure for 1912 was 61,581,897 ticals. The national debt consists of an Anglo-French loan of 11,000,000, an Anglo-French-German loan of 23,000,000, and a federated Malay States loan of 24,000,000. The tical, the unit of value, is equivalent to \$3,708 of United States money.

Railways.—On Nov. 1, 1913, there were 721 miles open for traffic, the principal line running from Bangkok along the Menam to a terminus at Dem Chai, near the town of Phré. A network of railways and canals affords easy communication throughout Central Siam, and the traffic is enormous. Northern and eastern Siam are less favorably situated, but southern Siam is to have a compensating system of railways.

Siam:

- American representative at coronation of King of, 7667.
- Claim of United States against, 6184.
- Adjustment of, 6336.
- Diplomatic relations with, 6336.
- Appropriation for, recommended, 4799.
- Gifts received from, referred to, 3267.
- Legation of United States in, premises for, presented by Government of, 4823, 4825, 4923.
- Appropriation for erection of building on, recommended, 5494.
- Liquor traffic in, agreement with, for regulation of, 4803.
- Minister of United States to, mission created, 4718, 4761, 4825.
- Treaty with, 1272, 1457, 1593, 2951, 3061, 3834.

Siam, Treaties with.—The convention of amity and commerce of 1833 was modified in some directions by the treaty of 1856. Freedom of commerce was extended to citizens of the United States except in importation of arms and munitions of war, and opium, and in the exportation of rice, which is prohibited. The duties payable on ships, it was agreed, should be those paid by the most favored nation; and should there be in the future any diminution in the same in favor of any foreign nation, the United States should share the favor. Humane treatment of shipwrecked mariners was provided for.

A subject of Siam in debt to a citizen of the United States or a citizen of the United States in debt to a subject of Siam shall be obliged to bring all of his goods for sale and apply the proceeds to the payment thereof; should the proceeds be insufficient, the debtor shall not be liable for the balance. Merchants from the United States may rent houses in Siam, but shall rent the king's factories and pay the usual rent therefor. Goods brought to Siam by merchants shall be reported in detail to the king, but no duty shall be charged thereon. Should any foreign country other than Portugal be privileged to appoint consuls at Siam, that privilege shall also be accorded to the United States.

The treaty of 1856 afforded full protection to merchants of the United States in Siam. As Siam has no ships of war, it was agreed that the vessels of war of the United States meeting a Siamese vessel at sea should render to it all possible aid not in violation of the laws of neutrality; and American consuls in foreign ports out of Siam shall render aid to the captains of Siamese vessels in such ports. Provision is made for the appointment of a consul at Bangkok. (See Consular Conventions.) American merchants may trade freely in any port of Siam, but shall reside permanently at Bangkok, where they may rent land, but may not purchase land with-

in two hundred seng (four English miles) of the city walls until they have lived for ten years in Siam or have permission so to buy. Apart from this, American merchants may buy or rent houses anywhere within twenty-four hours' journey from Siam, measured at the rate of speed at which boats travel. Freedom of conscience is allowed to all.

Vessels of war of the United States may enter the river and anchor at Paknam, but only with special permission may proceed to the docks. On articles of import the duty shall be three per cent, payable either in money or in goods. Unsalable and re-exported goods shall be entitled to a drawback. Opium may be imported free of duty, but may not be sold to the opium farmer or his agents. It may be re-exported without import or duty levied upon it. In times of threatened scarcity the Siamese government may prohibit the export of salt, rice, and fish, on thirty days' notice.

By an agreement of 1884 it is permitted to sell in Siam liquors of a strength allowed to be manufactured in Siam. Beers and wines may be sold on an import duty not to exceed ten per cent. The strength of liquors shall be tested by a Siamese official. The Siamese government may at any time stop the importation of liquors or spirits which, in their opinion, prove deleterious to the health of the people.

Silk and Silk Goods.—For many years after the Revolution premiums and bounties for planting mulberry trees and for producing raw silk were authorized by a number of states, especially in New Jersey, New York, Pennsylvania and the New England States. Dr. Ezra Stiles, president of Yale College, and Benjamin Franklin were among the notable early promoters of the movement. The establishment of the industry in England and France was due to royal patronage and it was considered not inconsistent with public policy here to extend state encouragement to an industry which, when established, would undoubtedly prove profitable. In December, 1825, the subject was introduced into Congress by Mr. Miner, of Pennsylvania, and the Secretary of the Treasury was instructed to prepare a well digested manual on the growth and manufacture of silk. This resulted in the publication by Congress of the document known as the "Rush Letter" of 220 pages, besides illustrations of machinery, and is a carefully executed work.

Sericulture gained the public ear, and for ten years all went well. Silk conventions and meetings were held in many states, and the agricultural literature of the country became suffused with descriptions of the Chinese mulberry tree and the possible profits in raising silk worms. Speculation began and the price of trees advanced far beyond the value of all the silk they could ever raise. Silk culture companies were organized and manufacturers and farmers were induced to invest in them. The bubble burst in 1839. One speculator who had put \$80,000 in trees and cuttings vainly offered them to his neighbors for pea brush at \$1 a hundred. Notwithstanding the favorable climatic conditions both in France and the United States for the growth of mulberry trees and the rearing of silk worms and cocoons silk culture has dwindled in both countries, because more remunerative occupations are afforded by other lines of industry. In other words, it don't pay. Although in France the raisers of cocoons and reellers of silk are protected by a considerable bounty, payable by the French government to her citizens as against the Italians, that country produces less than 4 per cent. of the world's supply of raw silk. Her silk manufacturers are well content to purchase, as America does, the raw silk from Italy, Japan and China, in all of which countries the ruling rates of wages are much less than in the United States. Both France and the United States pursue the same fiscal policy of admitting raw silk free of duty, and therefore both are on a par in this respect.

Meanwhile, step by step, but slowly, improvements have been effected here in the manufacture of silk goods. The making of sewing silk became a household industry in New England, at first by hand, and later by machinery. The manufacture of silk trimmings of various kinds was commenced in Philadelphia in 1815, and ribbons in Baltimore in 1829. These goods, together with fringes, gimps and tassels, and silk thread, especially suited for use on sewing machines, continued to be the principal products of the silk industry in the United States until the outbreak of the Civil war.

As reasons for the rapid as well as powerful development of the United States silk industry, notwithstanding the competition of well introduced imported goods and the splendid organization of the importers, and in spite of the mistrust which was felt by the consumers for a long time against the domestic goods, we find:

1.—The natural capability of the Ameri-

can merchant and manufacturer, his common sense, enterprise and self confidence.

2.—The capital which is always ready to support enterprise in this country, in the form of extensive and liberal credits.

3.—The support which is given all these undertakings by the people, by the city and state governments in the form of tax privileges, donations of lots, putting up mill buildings, and renting same at a low rate of interest; even in some cases by subscribing part of the working capital.

4.—The intellectuality of the American technician, who, through his inventions of time-saving machinery, which is simply constructed and easy to handle, is, perhaps, unequalled.

5.—The easy intercourse between manufacturer and dealer, which enables the first to get fully and promptly acquainted with the needs and wants of the consumer.

The American manufacturer is largely his own merchant and distributor. He is in close touch with the dealers and retailers, knows what they want, and manufactures accordingly.

In England the silk industry has suffered a great decline since 1860. In recent years leading manufacturers there have emphasized the importance of specially organized technical schools for the education of artisans and for teaching drawing and designing to selected pupils. In the United States every large silk plant is a school of design, a teacher of scientific and technical education. All such plants have a corps of special designers and many are in touch with artists and establishments abroad, whence is derived the latest information concerning novelties in all lines of manufacture. Skillful chemists are likewise attached to these plants.

The production of raw silk in China is an absolutely unknown quantity. When prices in Europe and America are relatively high the supply increases surprisingly. When prices are normal or low the supply decreases. It is obvious, however, that by closer attention to the United States market China could greatly extend its raw silk trade with this country. The vast amount of capital invested and the large number of operatives employed in the silk industry throughout the world should be a commercial stimulus to China, the greatest producer of raw silk, to perfect its silk reeling processes by the application of skilled labor so as to secure a larger share of the profits of a business in which the country has so many natural advantages.

China now contributes 41.8 per cent. of the world's supply of raw silk; Japan and Italy each 20 per cent.; France, 3.3 per cent. and all other countries 14 per cent.

The silk manufacturing industry includes two classes of establishments: (1) Those for making finished silk products, such as woven fabrics, braids and trimmings, sewing, embroidery, and wash silks; and (2) Those making silk yarn, known technically as organzine, tram, and spun silk. Organzine and tram constitute respectively the warp and woof of silk fabrics, and are made from the best grades of raw material by the process of throwing (doubling, twisting and winding the filaments into yarn.) Spun silk is produced by spinning, in much the same manner as wool fabrics are spun, the short fibered silk from pierced cocoons or from waste silk of any sort which cannot be thrown in the usual manner. The concerns engaged only in the manufacture of organzine and tram are known as throwsters and winders. Few establishments include the entire process of silk making, including both branches of the industry there were 852 establishments in operation in

1909. These were capitalized at \$152,158.002, and employed 105,238 persons, to whom \$46,097,364 was paid in salaries and wages. The total value of the finished product was placed at \$196,911,667.

American silk manufacturers, after the sudden outbreak of the European war in 1914, strove to provide against any stoppage of foreign importations of finished goods, raw material or dye stuffs. Commerce was threatened by warships of the hostile powers and insurance rates were high. A record consumption at home and abroad had absorbed reserve stocks, and there was a scarcity of raw material. This caused high premiums to be paid for ready stocks, but some of the mills were forced to suspend operations on account of inability to get orders for the spring trade.

In spite of depressed business conditions fifty-one new silk mills were built in 1914. Of these twelve were for the manufacture of ribbon, twenty-five for broad silk, and the remainder divided between throwing and yarn mills. Of the new mills twenty-one were built in Pennsylvania, and 19 in New Jersey, 12 of the latter in Paterson.

Returns were received from 900 establishments engaged in the industry in 1914, the products of which, for that year, were valued at \$253,764,170.

Silkworms, memorial from Count de Bronno Bronski regarding introduction of, into United States, 2584.

Silver.—One of the precious metals and the one most in use during historic times, both in the arts and as a medium of exchange. In the earliest ages, even before there was a record, as in prehistoric Greece and Italy, silver mines were worked, and the refined metal obtained from the ores was employed in ornamental and useful arts. It was not so early used as a money metal, and when finally its use as such was begun it was made into bars or rings and sold by weight. Shekels, or pieces of silver, are alluded to in the book of Genesis. Abraham, in the land of Canaan, bought a field for sepulture and paid for it in silver. But the best authorities state that the first regular coinage of either gold or silver was in Asia Minor, in Phrygia or Lydia. The Egyptians did not have coins in the earliest times, although otherwise their civilization was advanced. In ancient times silver was plentiful in Spain. Hannibal, it is stated, obtained 300 pounds per day from the mines there during the Carthaginian occupation of that country. At a much earlier day the Athenians had valuable silver mines at Laurium, in the territory of Attica. Silver, as well as gold, was employed in the erection of Solomon's Temple at Jerusalem. Silver drinking cups and silver ornaments on horn or ivory drinking cups were in use among the Vikings. In fact, all the civilized and semi-civilized nations and tribes of antiquity made free use of this metal. It was more common even than than gold, and therefore less precious. At a later period the Incas in Peru, the Toltecs and Aztecs in Mexico, and the Mayas in Yucatan employed it for ornamental purposes and for objects of utility, both in their temples and palaces. Among modern civilized and enlightened peoples its use is so common as to require no special remark.

The metal itself is found in almost every part of the globe, usually in combination with other metals. Take the whole historical period and it is found that the South American mines are the richest. Muhlball is authority for the statement that Mexico has produced more silver since 1523

than any other country within the last 500 years. He values the total output there for the period at \$3,050,000,000. Mexico has also the largest annual output, producing 60,808,978 oz. fine, valued at \$35,269,200; the United States follows next with 57,682,800 oz. fine, worth \$33,456,000. Large masses have been found in nuggets, as one of 370 pounds at La Paz, Bolivia, in 1749; another of 560 pounds at Königsberg, Norway, and still another of 800 pounds at Ihuantaya, Peru. Sonora, Mexico, however, claims to have extracted a huge lump of silver weighing 2,700 pounds.

The subject has entered into American politics, the Democratic party in 1896 having declared for the free coinage of the metals at the former ratio of 16 to 1. The French ratio was at 15½ to 1. The repeal in 1873 of the law providing for the free and unlimited coinage of silver was the beginning of an agitation for the restoration of bimetalism. (See also Bland-Allison Act; Coinage Laws; Sherman Act.)

SILVER PRODUCTION FROM MINES IN THE UNITED STATES: 1792 to 1915
(From Reports of the Director of the Mint, Treasury Department)

The ratio of silver to gold has varied greatly. 1,000 B. C. it was 12 to 1, if the best figures obtainable are to be relied upon. At the Christian era it was 9 to 1. 500 A. D. just twenty-four years after the downfall of the Western Empire of Rome, the ratio was 18 to 1, but in 1100 A. D. it had fallen to 8 to 1. At the close of the seventeenth century it was 10 to 1, and at the end of the last century 15 to 1. In 1850 the ratio was 15.4 to 1; in 1870, 18.40 to 1; in 1893, 26.49; 1909, 35.75. In the coinage of the United States mints the ratio of 15.988 to 1 of gold is maintained.

Silver. (See Gold and Silver.)

Discussed, 5474.

Repeal of act for issuance of, recommended, 4633, 4720.

Suspension of issuance of, recommended, 4830.

Silver Coinage. (See Coins and Coinage.)

Sinews of War.—The term is applied to funds used for war expenses.

Single Standard. (See Monometallism.)

Silver State.—Alternative nickname for Nevada. (See Sage-Brush State.)

Single Tax.—The doctrines of what is today called the single-tax seem to have been suggested first by the group of the French economists known as the Physiocrats, around the year 1775; but these doctrines disappeared in the rise of modern political economy with the publication of Adam Smith's *Wealth of Nations* in 1776. Hence it was Henry George who founded the modern single-tax philos-

ophy in 1879, which is the year when his *Progress and Poverty* was published. George was born in Philadelphia in 1839, and spent his early years as a sailor and printer. As a youth he emigrated to California, where he was engaged in newspaper work from 1858 to 1876. In 1869, he was moved and perplexed by the scenes of vast poverty opened before his eyes in a trip to New York, and during the next ten years he thought unceasingly of the problem of poverty, coming to the conclusion that it was due to the system of private ownership of land. *Progress and Poverty* was published in the midst of extreme poverty, and achieved little notice for several years. But eventually the eloquence and the passionate fervor of the writer would not be denied, and from 1882 to 1887 the book was the most popular book on economics ever written. From 1880 to 1890, George was a propagandist, running unsuccessfully for mayor of New York City in 1886, and dying just before the end of his second campaign for the same office in 1897. His son, Henry George, Jr., was elected to the House of Representatives from 1911 to 1915.

The following statement of the single tax principle was written by Henry George, Sr.: We are in favor of raising all public revenues for national, state, county, and municipal purposes by a single tax upon land values, irrespective of improvements, and all the obligations of all forms of direct and indirect taxation. Since in all our states we now levy some tax on the value of land, the single tax can be instituted by the simple and easy way of abolishing, one after another, all other taxes now levied and commensurately increasing the tax on land values until we draw upon that one source for all expenses of government, the revenue being divided between local governments, state government, and the general government, as the revenue from direct tax is now divided between the local and state governments, or by a direct assessment being made by the general government upon the states and paid by them from revenues collected in this manner. The single tax we propose is not a tax on land, and therefore would not fall on the use of land and become a tax on labor. It is a tax not on land, but on the value of land. Then it would not fall on all land, but only on valuable land, and on that not in proportion to the use made of it, but in proportion to its value—the premium which the user of land must pay to the owner, either in purchase money or rent, for permission to use valuable land. It would thus be a tax not on the use and improvement of land, but on the ownership of land, taking what would otherwise go to the owner as owner, and not as user.

In assessments under the single tax all values created by individual use or improvement would be excluded, and the only value taken into consideration would be the value attaching to the bare land by reason of neighborhood, etc., to be determined by impartial periodical assessments. Thus the farmer would have no more taxes to pay than the speculator who held a similar piece of land idle, and the man who, on a city lot, erected a valuable building, would be taxed no more than the man who held a similar lot vacant. The single tax, in short, would call upon men to contribute to the public revenues not in proportion to what they produce or accumulate, but in proportion to the value of the natural opportunities they hold. It would compel them to pay just as much for holding land idle as for putting it to its fullest use. The single tax, therefore, would: First, Take the weight of taxation off the agricultural

districts, where land has little or no value irrespective of improvements, and put it on towns and cities, where bare land rises to a value of millions of dollars per acre. Second. Dispose with a multiplicity of taxes and a horde of tax-gatherers, simplify government, and greatly reduce its cost. Third. Do away with the fraud, corruption, and gross inequality inseparable from our present methods of taxation, which allow the rich to escape while they grind the poor. Land cannot be hid or carried off, and its value can be ascertained with greater ease and certainty than any other. Fourth. Give us with all the world as perfect freedom of trade, as now exists between the states of the Union, thus enabling our people to share through free exchanges in all the advantages which nature has given to other countries, or which the peculiar skill of other peoples has enabled them to attain. It would destroy the trusts, monopolies, and corruptions which are the outgrowths of the tariff. It would do away with the fines and penalties now levied on any one who improves a farm, erects a house, builds a machine, or in any way adds to the general stock of wealth. It would leave every one free to apply labor or expend capital in production or exchange without fine or restriction, and would leave to each the full product of his exertion. Fifth. It would, on the other hand, by taking for public use that value which attaches to land by reason of the growth and improvement of the community, make the holding of land unprofitable to the mere owner and profitable only to the user. It would thus make it impossible for speculators and monopolists to hold natural opportunities unused or only half used, and would throw open to labor the illimitable field of employment which the earth offers to man. It would thus solve the labor problem, do away with involuntary poverty, raise wages in all occupations to the full earnings of labor, make overproduction impossible until all human wants are satisfied, render labor-saving inventions a blessing to all, and cause such an enormous production and such an equitable distribution of wealth as would give to all comfort, leisure, and participation in the advantages of an advancing civilization, in securing to each individual equal right to the use of the earth. It is also a proper function of society to maintain and control all public ways for the transportation of persons and property, and the transmission of intelligence; and also to maintain and control all public ways in cities for furnishing water, gas, and all other things that necessarily require the use of such common ways.

There is no single-tax political party organized in the United States, but many staunch advocates of the single-tax principle have been among our most prominent administrators of public office, including several mayors of large cities and members of the Cabinet. Several countries, notably New Zealand, tax unimproved land in accordance with the single-tax doctrine, and Germany also has levied partial, though not complete taxes upon the "unearned increment" of land value. Provision for this purpose was also made in England in the famous Lloyd-George budget of 1909. There are few political economists who favor the single tax, but many of its upholders have made notable contributions to American political and social science.

Sinking Fund.—An account or fund set aside for the payment of a debt or obligation. It is formed by successively appropriating or setting aside sums for the designated purpose. Alexander Hamilton made

an unsuccessful attempt under the Confederation to establish a sinking fund for the liquidation of the national debt. The first national sinking fund in this country was created by act of Congress Aug. 2, 1790. The present sinking fund to retire the national debt was established by an act of Feb. 25, 1862, and amended by later acts. It sets apart annually a special fund for the payment of interest on and for the purchase of a given per cent of the national debt. Bonds so redeemed are to be canceled and deducted from the outstanding indebtedness of the Government. In addition there is to be purchased annually an amount of Government bonds equal to the annual interest on bonds previously bought for the sinking fund. The sinking fund is thus, as far as interest is concerned, in the position of any other holder of the Government's obligations receiving interest on the bonds that have been purchased for its account, except that the bonds belonging to it have been canceled and the debt considered reduced by that amount. An act of April 17, 1876, provides that fractional currency, redeemed by the Treasury, shall constitute a part of the sinking fund.

Sinking Fund, repeal of law recommended, 5754.

Sinn Fein.—The name of an Irish society for Irish independence. The name is Gaelic, and signifies "Ourselves only." The Sinn Fein Society advocates the complete separation of Ireland from English and all other outside influences, not only in governmental but also in economic and literary activities. It stands for the official use of Gaelic in all Irish intercourse, and in other ways declines to be bound in any way with the English. Theoretically the society does not stand for active resistance to the English authorities, but many of its leaders were implicated in the rebellion breaking out in Dublin during the European War. (See Home Rule for Ireland.)

Sioune Indians. (See Indian Tribes.)

Sioux City, Iowa, acts for erection of public building at, vetoed, 5015, 5301.

Sioux Commission:

Discussed, 5480.

Report of, discussed, 5496.

Sixteen to One. (See Silver.)

Skagit Indians. (See Indian Tribes.)

Skai-wha-mish Indians. (See Indian Tribes.)

Skipwith, Fulwar, consul-general to France, nomination of and reasons therefor, 170.

Skirmish.—A small fight, between military enemies, not of sufficient magnitude or importance to be dignified by the name of battle.

S'Klallams Indians. (See Indian Tribes.)

Skope-áhmish Indians. (See Indian Tribes.)

Sk-táh-le-jum Indians. (See Indian Tribes.)

Sk-táhl-mish Indians. (See Indian Tribes.)

Slackers.—The term, originating in England, but thence spreading to other countries, used to describe those persons who did not volunteer for service in the European War through cowardice, laziness, or selfishness, but not through conscientious scruples. The term is not to be confused with "conscientious objectors" (q. v.).

Slaughterhouse Cases.—A series of five cases bearing upon the creation of monopolies or trusts and defining the scope of the Fourteenth Amendment. The Crescent City Live Stock, Landing and Slaughterhouse Co. was incorporated by the Louisiana legislature March 8, 1869. The Butchers' Development Association protested against this act of the legislature on the ground that it created a monopoly. Suit was brought against the State by Paul Esteben and others on the ground that their business was injured. It was claimed by the plaintiffs that the creation of a monopoly of this sort by the State legislature was in violation of the Fourteenth Amendment to the Constitution which prohibits State legislatures from enforcing laws "which shall abridge the privileges or immunities of the citizens of the United States." The Supreme Court of Louisiana decided that the law did not conflict with the amendment to the Constitution. The Supreme Court of the United States, April 14, 1873, and Jan. 24, 1887, affirmed the decision. In these celebrated cases the Supreme Court likewise decided that the fundamental character of the Government had not been changed in any way by the Civil War. The judgment of the Supreme Court of Louisiana was not entirely affirmed in the last case mentioned, that of the Crescent Live Stock Co. vs. Butchers' Union. That part which constituted a judgment against the Crescent City Live Stock Landing and Slaughterhouse Co. solely, for damages for the malicious prosecution, was reversed and the case remanded for further proceedings. In that case Justice Matthews delivered the

opinion, and there was no dissenting opinion. In the other cases Justice Miller rendered the court's judgment. Justice Field, for himself, and Justices Swayne and Bradley, delivered a dissenting opinion.

Slave Representation.—One of the most difficult problems encountered by the framers of the Constitution was the representation to be accorded in Congress to those portions of the country whose population consisted partly of slaves. It was contended, on the one hand, that, being persons, they should be represented, and, on the other hand, that, being property, they should be made the object of taxation. A compromise was finally reached providing that for purposes of reckoning a state's proportion of representatives, as well as its direct taxes, its population should be "determined by adding to the whole number of free persons, including those bound to service for a term of years, and excluding Indians not taxed, three-fifths of all other persons"—i. e., slaves. This method of computing population was first suggested in 1783 by the Continental Congress as a basis for the apportionment of contribution from the states, to be agreed upon as an amendment to the Articles of Confederation. It remained in force until the abolition of slavery.

Slave Trade. (See African Slave Trade.)

Slavery.—A slave is defined as a person who is the chattel or property of another and is wholly subject to his will. Slavery probably originated at an early period of the world's history in the accident of capture in war. It existed in all the ancient Oriental nations of which we have any record. In the Homeric poems it was the ordinary destiny of prisoners of war. The prevalence of Christianity tended to ameliorate the condition of the slave. Laws respecting the sale of slaves in England were made by Alfred the Great. The English peasantry were commonly sold for slaves in Saxon and Norman times; children were sold in Bristol market like cattle for exportation, many being sent to Ireland and Scotland. In 1574 Queen Elizabeth ordered her bondsmen in the western countries made free at easy rates, and in 1660 serfdom was finally extinguished in England. By the decision of Lord Mansfield, of the Court of King's bench, in the *Sommersett* case (q. v.), slavery was declared illegal in England. In Scotland bondage to the soil was not gotten rid of until the close of the last century.

Parliament abolished trade in negro slaves in 1807, and in 1833 an act was passed abolishing slavery throughout the British colonies. In pursuance of this act 770,280 negroes became free Aug. 1, 1834. About the time of the American Revolution societies of prominent men were formed for the purpose of ameliorating the condition of the negro slaves. Pennsylvania was the first state to organize such a society, in 1787, with Benjamin Franklin as president. New York followed with a similar society, John Jay as its first president and Alexander Hamilton as its second. Immediately after came Rhode Island, and Maryland in 1789, with such members as Samuel Chase and Luther Martin; Delaware, with James A. Bayard and C. A. Rodney; Connecticut, in 1790; Virginia, 1791, and New Jersey, in 1792. The most that was accomplished by these societies was the suppression of the slave trade in 1808. Pennsylvania provided for the gradual emancipation of her slaves in 1780;

Massachusetts, by a bill of rights prefixed to her constitution, the same year; New Hampshire, by her constitution, and Connecticut, and Rhode Island by enactment, in 1784; Vermont, by her constitution, and New York and New Jersey by gradual abolition, the former in 1799 and the latter in 1804. In 1817 New York enacted further legislation, decreeing total abolition on July 4, 1827. By this law 10,000 slaves were freed.

Following are some of the important steps leading to the Civil War in America, by which the institution of slavery was finally abolished: Passage of the ordinance for the government of the territory northwest of the Ohio containing the unalterable article forbidding slavery, 1787; Quakers present a petition to Congress praying for the abolition of slavery, 1794; important debate in Congress on the abolition of the slave trade, 1806; slave trade abolished, 1808; American Colonization Society organized at Washington to aid emigration to Africa, 1816; Missouri Compromise passed by Congress, 1820; anti-slavery societies organized in New York and Pennsylvania, 1833; passage of fugitive-slave law and compromise measures, 1850; negroes seized at Boston under fugitive-slave law, 1851; passage of Kansas-Nebraska bill, 1854; repealing of the Missouri Compromise; Kansas war, 1854; Dred Scott decision, 1857; John Brown's insurrection, 1859; election of Lincoln to the Presidency, 1860; secession of South Carolina, December, 1860, followed by other states in 1861; President Lincoln proclaims the abolition of slavery in all parts of the country in rebellion, Jan. 1, 1863 (3358); submission of the southern armies in April, 1865, and official announcement of the final abolition of slavery Dec. 18, 1865. (See illustration opposite 1837.)

Slavery (see also African Slave Trade; Compromise Measures of 1850; Kansas-Nebraska Act; Missouri Compromise; Negroes):

Abolition of (see also Emancipation *post*)—

Compensation to States for, recommended, 3255, 3269, 3292, 3334.
Draft of bill for, 3285, 3337.

Smalh-Kamish Indians. (See Indian Tribes.)

Smith Island Reservation for native birds, established, 7959.

Smithsonian Institution.—James Smithson, F. R. S., a natural son of the first Duke of Northumberland, and an eminent English chemist and mineralogist, died in 1829. He bequeathed £105,000 to the Government of the United States in trust to "found at Washington an establishment, under the name of the Smithsonian Institution, for the increase and diffusion of knowledge among men." This bequest became operative in 1835. In 1838 the United States Government received from the court of chancery of Great Britain \$515,169, which was increased by investment to \$703,000. After the discussion of numerous plans, Congress in 1846 created the present establishment. The institution has devoted itself to the two lines of work marked out in the terms of the bequest—the prosecution of original research and the publication and distribution of memoirs on subjects relating to science. During its existence it has originated many important scientific undertakings, which have later been taken up by the Government and prosecuted on broader lines under the con-

trol of special bureaus, some under the direction of the Institution, others independently. Out of its meteorological service the Weather Bureau has grown; in connection with its work in ichthyology the Fish Commission was established.

Under the direction of the Institution are the National Museum, which is the legal custodian of all government collections, the Bureau of International Exchanges, the Bureau of American Ethnology, the Astro-Physical Observatory, and the Zoological Park. The Institution maintains a table at the biological station at Naples, Italy, to which it sends students to conduct investigations. From time to time the Institution sends scientific expeditions, the most recent being those to Alaska to discover remains of mammoths and other large mammals, and to British Columbia to investigate and explore the glaciers there situated. The Institution has a library of 250,000 volumes. The direction of the affairs of the Institution is vested in a Board of Regents, consisting of the Chief Justice, the Vice-President, three senators, three representatives, and six other citizens, two of whom shall reside in Washington. The President of the United States and his Cabinet are members of the Institution. The secretary is elected by the Board of Regents. Joseph Henry, the first secretary, served from the founding of the Institution in 1846, till his death in 1878; he was succeeded by Spencer F. Baird, and upon the latter's death in 1887, Samuel P. Langley was placed in charge of the work. He was succeeded as secretary by Charles D. Wolcott. The Institution is located in Washington City and occupies an ornate building of Seneca brown stone, situated in a prominent place in the Mall, which extends from the Capitol to the Washington Monument. In 1904, the remains of James Smithson, who so far as it is known, had never visited this country, were brought from Geneva to Washington and placed in the Institution.

The entire consignment of pickled skins of animals killed in Africa by former President Roosevelt and his son, Kermit, was received at the Smithsonian Institution. Among the animals represented in this collection were rhinoceros, wild beeste bush buck, eland, wart hog, water buck, Impali zebra, giraffe, hyena, lion, Grant's gazelle, leopard, cheetah, reed buck, Thompson's gazelle, steinbuck, dik-ack, baboon, klipper springer and jackal.

Smithsonian Institution:

Bequest to United States by James Smithson for founding, 1406.

Fulfillment of objects of, suggested, 1723, 1942, 2124.

Prosecution of claim to, referred to, 1647, 1723.

Referred to, 1490, 6674, 6767, 7044. Medium for interchange of official publications, 4718.

Organization of, recommended, 2751.

Request of regents of, for appropriation for National Museum commended, 4431, 4458.

Smoke Abatement Exhibition at London referred to, 4695.

Smuggling.—In the United States the offense of smuggling is defined as "the act, with the intent to defraud, of bringing into the United States, or, with like intent, attempting to bring into the United

States, dutiable articles without passing the same, or the package containing the same, through the custom-house or submitting them to the officers of the revenue for examination." The penalties which may be enforced are a fine of not less than \$50 nor more than \$5,000, or imprisonment for not more than two years, or both, seizure and condemnation of the vessel or vehicle used, and various other special penalties. The British navigation laws of the latter part of the seventeenth and first half of the eighteenth centuries induced bold and extensive smuggling into the Colonies. Merchants and prominent public men otherwise respectable felt no hesitation about cheating the revenue by illicit trade with pirates and West Indian merchants. New York was the principal port for smugglers, though Boston, Philadelphia, and Charleston were also enriched by smuggled goods. This led the British Government to enforce the acts of trade which did much to precipitate the Revolution.

Smuggling:

Pernicious practice of, should be prevented, 644.

Practice of, criminal in free governments, 480.

Snake Indians. (See Indian Tribes.)

Sniper.—One who picks off enemy forces, one at a time, by sharp-shooting. (See Sharp-Shooter.)

Sno-ho-mish Indians. (See Indian Tribes.)

Snoqualmoo Indians. (See Indian Tribes.)

Soap.—The manufacture of soap has grown to be one of the hundred million dollar industries in the United States.

Reports were received by the Department of Commerce from 513 establishments that manufactured soap in 1914, the total products of which for the year were valued at \$135,340,499. Of these 513 establishments, the principal business of 371 was the manufacture of soap, and 142 were engaged primarily in other industries, such as slaughtering and meat packing and the manufacture of food products, cottonseed products, and patent medicines and compounds, and produced soap as a subsidiary product.

Soc Indians. (See Indian Tribes.)

Social-Democratic Party. (See Social-ist Party.)

Social Service.—One of the most illuminating evidences of the awakening of the social conscience in the last one hundred years has been the development in recent years of what is called social service. Social service, or social work, covers efforts being made for the improvement of the conditions of life, especially among those who are in want, suffering, or need of assistance. The term has broadened far beyond the earlier attempts merely to remedy distress by the application of charity or of other relief, and now covers for the greater part efforts being made all over the globe to prevent the existence of social misery. Social service has become a science, if not an exact science; and has its rules and theories applicable to social amelioration hardly less definite than the rules applicable in medicine to the attack on illness. Any attempt to enumerate the number of social service organizations or workers would be fruitless, as there is no sharp line to distinguish social endeavors

from other endeavors which are not altogether devoted to the pursuit of private profit in industry. For instance, social service covers such diverse fields of activities as the prevention of prostitution; family rehabilitation; legislation for higher wages and shorter hours; attempts to democratize industry, and to improve the working conditions in mines, factories, and on means of transportation; the acquisition of better mental hygiene; the attack on drunkenness; child labor and minimum wage legislation; the surveys of entire cities to determine the evils existing therein; the advance of a new science of penology; and the general education of the community to the ways in which "the other half lives."

Social Settlements.—Neighborhood centers established by persons anxious to improve conditions in neighborhoods where the inhabitants, either through their own faults or through the press of circumstances, are in need of assistance in order to attain the socialized development possible to them. Settlements aim, not so much to change or to revolutionize the life in the poorer urban sections where they are located as to develop the inherent beneficial qualities of that life to the best advantage. In other words, settlement workers attempt not so much to help others, as would the agents of a charitable institution, as to help others to help themselves. In pursuit of this ideal, many and varied activities are developed in a neighborhood settlement. Educational, literary, dramatic, musical and social clubs are organized and directed; physical training is made available; friendly visits are paid the families in the neighborhood; vocational guidance is provided for the children; free medical and nursing advice is given; and attempts are made to obtain new laws and working conditions which will accrue to the happiness of the poor.

Settlements seem to be developments primarily of the United States and of England, where Arnold Toynbee inaugurated the settlement by going down to live in the slums of Whitechapel, in the parish of Canon Samuel A. Barnett, in 1875. He soon associated with himself a group of other university men, who had also been inspired by the gospel of assistance to the needy as preached by John Ruskin; and Toynbee Hall, the first social settlement, was established by Canon Barnett in 1885. Stanton Coit established in 1887 the University Settlement in the East Side of New York, and his example was followed by Jane Addams, who established in Chicago in 1889 the most famous of all settlements, Hull House. Other well-known settlements in the United States are the Henry Street Settlement in New York, where Lillian Wald inaugurated visiting nursing in the homes of the poor, and the Chicago Commons, where Graham Taylor has wielded a strong intellectual and political influence in the life of all of Chicago. Hardly an American city of size is now without its settlement or settlements.

As originally established, settlements were centers where altruistic persons made their headquarters for their individual friendly work among the poor; but they soon passed from such centers of private influence into large and complex institutions. The way having thus been indicated, municipalities all over the country began to establish public civic and neighborhood centers, usually in the public schools; and the tendency of the settlement movement is hence to resign the institutional work to the public authorities, and go back to the original conception of a center of private influence.

Social Work. (See Social Service.)

Social Worker.—One engaged in social service (q. v.).

Socialism.—Few terms are more difficult to define than Socialism. Not only is the exactness of the word obscured by the fact that Socialism is an international movement, and represents different practices and theories in different countries; but also it must be recorded that the European War greatly altered the status of Socialism along with that of most other comprehensive conceptions. Starting, then, from the negative point of view, Socialism must be sharply differentiated from *Anarchy*, which would restrict the sway of government, whereas Socialism would extend it. Socialism must not be confused again with either vague and unformulated philosophies which are covered by the term *Utopianism*, or with even a radical liberalism which represents a reform rather than a revolutionary movement. Socialism as such must also be distinguished from

State Socialism.—This term again is hard to define, but may be considered as representing a vast and extensive system of social reform in behalf of the masses, carried into execution by a benevolent government under the present organization of society. It differs from Socialism—first, in that Socialism holds that the fundamental necessity for lasting improvement in the body social is the abolition of the present capitalistic organization of society; and secondly, in that Socialism believes that the vital reforms for the masses should be worked out not only for the masses, but also by them. State Socialism would embrace such reforms as old-age pensions; workmen's compensation; state illness, death, accident, and unemployment insurance; limitless educational scholarships; the assumption of governmental responsibility for all the deserving in need of assistance; enactments for minimum wages and minimum hours of employment; state control over, but not ownership of, large industry; stringent child labor regulations; a system of the state as landlord, both of farms and of houses; state artistic and literary subsidization; and similar other measures calculated to improve the social conditions of the mass of the workers in a country. State Socialism is essentially paternalistic. Germany before the war is usually considered the best example of State Socialism in any large modern country. Socialism must also not be confused with

Syndicalism.—Syndicalism, whose upholders are usually called in the United States Industrial Workers of the World (I. W. W.), differs from Socialism in that it is primarily an organization of industrial working-people believing in one universal industrial union, in the accomplishment of which end sabotage is justifiable. *Sabotage*, often called the philosophy of direct action, is the justification and the accomplishment of the destruction of property belonging to the privileged class against whose interests syndicalism is agitating. Syndicalism differs from the usual trade union philosophy as exemplified by the American Federation of Labor (see Trade Unions) in that the latter is organized into a system of individual unions according to craft, obtaining its ends by peaceful and legislative methods, whereas syndicalism believes in only one comprehensive, fighting, international organization. With syndicalism's views concerning the industrial organization of the working-class, Socialism has been in accord to a great extent, but is definitely opposed to sabotage. Socialism must be differen-

ated also from *Communism*, which in its various phases would provide for equality of income or of use of goods of economic value.

Having thus defined what Socialism is not, we may be in a better position to describe what it is. First, however, it must be pointed out that Socialism is not only a theory, but is a definitely-organized political movement. In this respect, it offers a great contrast to a philosophy like that of the single-tax (q. v.), which has organized no political movement to carry forth its message, and to the prohibition movement (q. v.), most of whose advocates in municipal, state and national elections vote for candidates of one of the two leading political parties, and not for the candidate of the Prohibition Party. And if the political aims of Socialism were to be described in one phrase, that phrase would be "the public ownership and control of all factors of production of social value." In other words, Socialism would do away with the present competitive system of private ownership of industry, and substitute a co-operative system of state production, in which the state would produce and sell all socially-necessary utilities without profit, and, eliminating profit and returns on capital, pay all workers salaries in proportion to services rendered. With this economic program as the keystone of the arch of Socialism, it will be seen that Socialism takes no stand upon questions like divorce, religion, and prohibition, although Socialists as individuals have usually well-defined ideas upon these issues. Indeed, there exists a sect within the Christian Church known as *Christian Socialists*, and a number of ministers of all denominations are members of the Socialist Party.

Among the objections usually offered by opponents of Socialism are the following: By destroying competition, Socialism would destroy incentive. By extending state control, individual freedom would be endangered. By abolishing the law of supply and demand, it would be difficult to substitute a workable basis upon which to determine the payment of salaries of those in industry. Public administration is notoriously corrupt and inefficient. Political economists, in addition, usually question the correctness of the assertion that of land, labor, and capital—the three elements of production—labor alone should receive reward in the shape of wages. To these objections, Socialists in the past have usually replied by asserting that the evils of the present system more than counterbalance the evils imputed to a Socialistic system; and since the outbreak of the European War have pointed to the incursion of Government into practically every field of private endeavor as proving the efficiency and workable value of the Socialist program.

Socialism, moreover, claims for itself the title of a science; and in asserting that its adoption is inevitable in the progress of civilization, bases its argument chiefly upon three creeds: (1) The materialistic interpretation of history, which claims that the course which human development assumes at any particular period is the result of the system of economic production prevalent in that period. This creed is usually accepted even by non-Socialists as sound to a great extent, being supported by many biologists, economists, and historians, and seemingly strengthened by no less an authority than Herbert Spencer. (2) The doctrine of class struggle, which claims that the interests of the workers and of the employers in modern society are diametrically opposed, and that the numerically-larger class of the workers will permanently improve their own conditions only by joining the political party of

the workers and thus becoming "Class-conscious." It is usually claimed by opponents of Socialism that this doctrine has degenerated into a doctrine of class-hatred. According to Karl Marx, the class-struggle would eventually divide all people into either an upper or a lower class; but the steady growth of a middle class in modern society, although it would seem to refute Marx's belief, nevertheless has not put a quietus upon the growth of Socialism. (3) The theory of surplus value, which claims that labor produces more than it receives, and that this surplus goes into the pockets of the owning-class.

Since the Socialist movement is a movement against the capitalistic system which prevails in all modern countries, Socialism is inevitably an international movement. Most Socialists accordingly have claimed in the past that the only war recognized by them as ethical is a struggle between the capitalist class on the one hand, and workers, or "proletariat," on the other hand. Nevertheless, although from this point of view, all struggles between nations as they are constituted at present are essentially civil warfare, nevertheless the various Socialist Congresses in the past have never definitely refused to allow Socialists in a given country to support a war waged by that country in case of invasion, and under certain other conditions. In that connection, the part played by Socialists in the European War was and is of especial interest (see below).

History.—The rise of what we call Socialism dates from the early years of the nineteenth century, as a result of the social misery prevalent at that time. The philosophy of Saint Simon as published in France in 1817 and the co-operative experiments of Robert Owen in England in the same year definitely began the Socialist propaganda, and were supported by the Utopian schemes of Fourier. The term Socialist was first applied in 1835 to the endeavors of Owen; but as then used the term was largely synonymous with the present-day term of "Utopian," as signifying an attitude which was visionary, and at first the term was indignantly repudiated by the founders of modern Socialism. The speculations of Blanc in 1844 in the field of political socialism, and the agitation of Lassalle later in Germany for social reform strengthened the foundation for the later Socialist movement, but the creation of a definite international Socialist movement was due to Karl Marx, assisted by Frederick Engels.

In November, 1847, a group of political refugees, mostly Germans, met in East London, and adopted the famous Communist Manifesto, as prepared by Marx and Engels, as the basis for the Socialist movement. For some years, however, the movement grew slowly. In 1864, the International Workingmen's Association was organized, but after some years of struggle, it died in 1876. During the later seventies, however, the Socialists began to make themselves felt as a political force in Europe. Scattered groups of Socialists became strongly organized—and the doctrine of Socialism began to take root even in countries outside of Europe. On July 14, 1889, the one hundredth anniversary of the fall of the Bastille, the first International Socialist Congress was held in Paris, and was attended by many leaders who were soon to impress the force of Socialism upon the actions of all European governments—Liebknecht, Bebel, Keir Hardie, John Burns, Victor Adler. Since that time, hardly a ministry in Europe has been organized without Socialists in its roster, including three premiers of France—Viviani, Millerand, and Briand, and a pres-

ent member of the English War Council. Indeed, the governing party in France is called the Socialistic Radicals. The "International," as the International Socialist organization is familiarly called, was formed in 1864, one year after the organization of the Social Democratic Party in Germany, under which name the Socialists are politically organized in that country. German immigrants to the United States began to organize Socialist groups in 1864, and in 1869 sections of the International were formed in different parts of the country. At the present time there would seem to be a large number of Socialists who disavow the teachings of Karl Marx (1818-1883) as the basis of their Socialism, but it is admitted that he was the founder, not only of the Socialist movement, but also of the trend towards a greater social emphasis in modern political economy. At no time does the enrolled membership of the Socialist Party approach the Socialist vote in different countries, but the Socialist organization is on record as asserting that its greatest desire at the present time is the education of the working-class to the particular "class-conscious" doctrine of Socialism.

The voting strength of Socialism is as follows:

	Vote	Percentage Members Congress	
		1914	1904
Austria	1,081,441	780,000	17% 2%
Belgium	483,241	305,361	22% 18%
Finland	310,593	100,000	45% 1%
France	1,106,047	860,827	13% 8%
Germany	4,238,919	3,010,771	28% 20%
Great Britain	529,193	100,000	6% 1%
Italy	822,280	326,016	12% 6%
Russia	500,000	4% ..%
Sweden	172,980	10,000	28% 2%
United States	931,381	441,776

In Germany.—It is in Germany that Socialism has become strongest, in spite of the fact that Germany before the European War had advanced farther along the lines of state socialism than any of its great rivals in the world. The Social Democratic Party before the war was the largest single political body in the Reichstag; and if the Reichstag were elected by a strictly proportionate, or one-man-one-vote method, there would be 138 Socialist members, or 35%, instead of the present number of 111. In 1914, the enrolled membership of the Party was 1,080,000, of whom practically 1,000,000 were men. In Hamburg, three-quarters of the voters are Socialists; in the kingdom of Saxony, a majority of the voters; and almost one-half in Berlin itself. Socialism in Germany both before and during the war was one of the strongest factors in the political life of the German people.

In France.—In 1914, in elections later than those given in the preceding table, 101 Socialists were elected to the Chamber of Deputies, or approximately one-sixth of the total membership. Socialism has given rise to many quasi-Socialist parties, such as the Independent Socialists and the Socialistic Radicals, the ruling political party. *In Russia,* determined Governmental opposition succeeded in stamping out Socialism as such, and Socialists, radicals, liberals, and revolutionists have worked together to stamp out autocracy. *In Great Britain,* Socialism as a political unit is very weak, but is well expressed in the British Labor Party, a federation of radical unionists with Socialist organizations. The total membership of this combination in 1914 was 1,895,498; and in it are included men of great influence throughout the land, such as John Burns and Keir Hardie. *In the United States,* the

Socialist Party as such was not organized until 1900, and represented an amalgamation of the Social Democratic Party and the greater part of the Socialist Labor Party (q. v.). The largest membership ever attained within the Party itself was 117,984, in 1912. The largest individual membership within the Socialist Party, though not the largest vote, in that year was in the State of Pennsylvania. The Presidential election of that year showed that the largest proportion of Socialist votes, in comparison with the total number of votes cast, occurred in Nevada, Alaska and Washington, with the smallest proportion in the Southern States. The largest individual vote was cast in the State of Ohio. For further details, see the article Socialist Party.

United States Platform.—The platform of the Socialist Party in the United States for 1912 is more typical of the Socialist program than the platform of 1916, which was affected greatly by the war situation. The 1912 platform reaffirms allegiance to the Socialist principles explained above, attacks the capitalist system, and declares that the benefits of prosperity accrue to the owning class, not to the workers. Definite proposals are for the collective ownership and democratic management of all transportation, telephone and telegraph, and express lines, and also of the banking system and of all large industry. The platform demands the immediate acquisition of all municipal food-handling agencies, and the addition of all mines, oil-wells and forests to the public domain. It asks immediate relief for unemployment by the extension of public works, the shortening of the working-day, the establishment of at least 1½ days rest in each week for all employed in industry, the prohibition of child labor under the age of 16, the application of the minimum wage, the abolition of official charity for a system of old-age pension and state insurance against illness, death, unemployment, accidents, and industrial diseases. It demands the extension of taxes upon inheritances, incomes, and corporations; and asks for the introduction into American national, state and municipal political life of the initiative, referendum and recall. It demands universal equal suffrage for women; the abolition of the United States Senate, of the veto power of the President, and of the right of the Supreme Court to pass upon the constitutionality of any act passed by the representatives of the people; the ending of the indirect method of Presidential elections; and the changing of the requirement for a three-fourths states' ratification vote to amendments to the Constitution, in favor of a majority vote. It calls for a constitutional convention to revise the Constitution, asks the curbing of the courts' power to issue injunctions, and pleads for the free administration of the law.

Socialists and the War.—The part played by Socialism in the Great European War must remain a matter of conjecture until the end of the war re-establishes free and unbiased communication between the countries of the world. The following description of the situation is merely an attempt to combine various opinions expressed by leading Socialists in America:—Because of the fact that the Socialist movement was the one great International movement which theoretically would refuse to ally itself with a war program, the weakness of the Socialist opposition to the war, especially in Germany, must be admitted. Historically, however, no International Socialist Conference has gone on record flatly against all war, and the anti-war resolution passed at the Stuttgart Conference in 1907 took a compromise position, declaring only against im-

perialism (q. v.) and militarism (q. v.). At that conference, Bebel, leader of the German Socialists, refused to assert that in the event of war between Germany and France, the German Socialists would not make war against their French comrades. The founders of Socialism were not pacifists (q. v.)—Marx justifying war under certain conditions, and Engels predicting in 1892 that a great European war, fought by the people, would lead to a general revolution in Europe. Socialists had long laid plans to forbid war by inaugurating a general strike, but the plans were not carried out when Germany began her march through Belgium in 1914. The Social Democratic Party of Germany had even voted for the Government's war budget in 1913.

On July 29, 1914, the International Socialist Bureau was meeting in Belgium, and devoted all of its energies to opposing the imminent struggle. On July 30, there were monster demonstrations against war, in which the German Socialists joined, even though Russia had already begun to mobilize. In Berlin itself on July 28 and 29, there were Socialist mass-meetings against war, and the executive committee of the Social Democratic Party opposed war even so late as July 30. On July 31 and on August 1, the latter date being the one on which it is generally agreed war formally began, the Socialist organ, the *Vorwärts*, came out against war. But there the Socialist opposition ended for some months. On August 4, the 111 delegates of the Social Democratic Party in the Reichstag voted for the war loan of the Government, although in the party caucus held just previously to the vote, 14 of the 111 opposed such action. Even on the second great war credit voted on December 2, 1914, the only Socialist registered in the negative, amid scenes of uproar and even violence, was Karl Liebknecht, who was severely censured by his own party for that independent action. But on the third war loan, passed March 20, 1915, there were 2 Socialist votes recorded in the negative, and 30 Socialists absented themselves from the Reichstag chamber as a protest against the loan. In April, May and June, the Party definitely split on the war question, and no longer acted with unanimity. The majority still supports the Imperial Chancellor, but the minority in opposition to the war is steadily growing in numbers. Liebknecht, who was denied a chance to express himself in the Reichstag until April 8, 1915, was finally expelled from the Party for his stand against the war, and some months later was expelled from the Reichstag on the charge of treason, and in company with the veteran Socialist leader, Rosa Luxembourg, was imprisoned. Haase, formerly the leader of the Party, was expelled in the course of the war, and now heads a party of his own, the leadership of the majority, which still supports the government, but with reservations, falling to Scheidemann. The leader Ledebour is now also definitely with the minority opposing the government. It would seem that the minority is only opposing certain schedules in the program of the Government, and that only a minority of the minority is with Liebknecht in opposition without compromise. The Socialist newspaper, the *Vorwärts*, is with the majority supporting the Government, but with reservations, while the trenchant opponent of the war, Maximilian Harden, with his paper, the *Zukunft*, can hardly be classed as a Socialist. On the whole then, it would seem that, although the greater number of the Socialists in Germany still are not ready to go so far as to oppose the Government's prosecution of the war, yet the sentiment for peace in the

Empire is definitely under the leadership of those Socialists who have broken, both with their own party and with the Government.

The Socialist movement in Austria is also well organized, but very little has escaped the censor concerning the activities of the Socialists in that country. The veteran leader, Victor Adler, was allowed to publish a plea for peace as early as February, 1915; and it may be surmised that the Austrian Socialists as a body are now united against the further participation of their country in the struggle. In France, the Socialists opposed a declaration of war until their country was invaded, since which time there does not seem to have arisen any peace sentiment among them. In Great Britain, the Independent Labor Party defeated a resolution against the further prosecution of the war, as early as April, 1915, by a vote of only 121 to 120. When war was announced, John Burns resigned from the Cabinet, but has never opposed the war; and George Bernard Shaw, a Fabian Socialist (q. v.), has created much opposition by his severe criticisms of England's position in the struggle, although he has not come out openly for England's retirement from it.

In the United States, the war question definitely has split the party into two camps. Even at the election of 1916, the great decrease in the Party vote was unquestionably due to the military question, and when war was declared, many prominent Socialists, with a large following, denounced and refused to be guided by the action of the forces in control of the Party, who at a convention in St. Louis declined to support the United States in its entrance into the struggle. This resolution was later submitted for endorsement to a referendum of the members of the Party, and there were many resignations from the Party membership.

No account played by the Socialists in the European War would be complete without mention of the Russian Revolution of 1917 (q. v.). From the little authentic news of the epochal event which can be gleaned during the war, the planners of the revolution were not prepared for anything more than a change from a reactionary to a liberal monarchy, and the transformation of the revolution into a successful attempt once for all time to abolish monarchy, and to establish in Russia a representative democracy would seem to have been due to the efforts and agitation of the elements in Russia which can be correctly described as Socialistic. (See European War; Socialist Party; Germany; France; England; Russia.)

Socialist Party.—This party was organized as the Social Democracy in 1897 by Eugene V. Debs, at Chicago. In 1898 the party's candidate polled, chiefly in Massachusetts, 9,545 votes. In 1900 Eugene V. Debs was the party's candidate for President and Job H. Harriman for Vice-President. The platform advocates state ownership of all means of production and distribution, with the public ownership of railways, mines, etc., also the initiative and referendum, and public work for unemployed. In that year the party vote was 84,003, many additions to the party being received from the Socialist Labor party (q. v.).

In 1901 at the Indianapolis convention the party formally united with the seceders from the Socialist Labor party, and took the name of Socialist party, except in some states, particularly in New York and Wisconsin, on account of certain provisions in the election laws of those states. In 1902 the party vote was 229,762.

In 1904 Eugene V. Debs and Benjamin

Hanford were the Presidential and Vice-Presidential candidates, and received 402,283 votes. The Socialist party has at times elected local officers in several states, and at one time had representatives in the Massachusetts legislature. In 1908 Debs polled 420,793 votes for President.

Victor Berger, of Wisconsin, became in 1910 the first Socialist Congressman to be elected to the United States House of Representatives, but was defeated for re-election in 1912. In 1914, Meyer M. London, Socialist, was elected to the House from New York City, and was re-elected in 1916. In 1912, Debs, candidate for President, received 901,873 votes, about 6% of the total vote cast. In 1916, Allen Benson, candidate for President, received 568,377 votes, or slightly above 3% of the total vote cast. In that year Milwaukee elected a Socialist Mayor for the second time and Minneapolis for the first time. In 1914, there were 31 Socialist members of the legislatures of 13 states. (See Socialism.)

Socialist Labor Party.—This party took its name at a convention held at Newark, N. J., in 1877. In 1883 a congress of Socialists met at Baltimore, Md., and formed a national party, but the growth of the organization was retarded by the anarchistic outbreak in Chicago in 1886. The party was reorganized in 1889, formally assuming the name Socialist Labor party, and their first national convention was held in New York City August 28, 1892. Simon Wing, of Massachusetts, was nominated for President, and Charles H. Matchett, of New York, for Vice-President. The platform advocated public ownership of all railroads, telegraphs, and other public utilities, the initiative and referendum, the recall of representatives, and the abolition of the Presidency, Vice-Presidency and Senate. In that year the party polled 21,532 votes.

In 1896 Charles H. Matchett was the candidate for President and Matthew Maguire for Vice-President. The platform advocated state ownership of all means of production. The vote in this year was 36,274. In 1898 the party in eighteen states cast 82,204 votes. In 1899 the Socialist Labor party split, most of its members going to the Social Democratic party or Social Democracy (now the Socialist party).

Society of American Florists, act incorporating, vetoed, 6010.

Society of Army of the Cumberland, statue of Gen. Garfield to be erected in Washington by, 4795.

Unveiling ceremonies, order regarding, 5162.

Society of Colonial Wars.—Instituted in 1892 to "perpetuate the memory of these events and of the men who, in military, naval, and civil positions of high trust and responsibility, by their acts or counsel assisted in the establishment, defense, and preservation of the American Colonies, and were in truth the founders of the Nation. With this end in view it seeks to collect and preserve manuscripts, rolls, and records; to provide suitable commemorations or memorials relating to the American Colonial period, and to inspire in its members the paternal and patriotic spirit of their forefathers, and in the community respect and reverence for those whose public services made our freedom and unity possible." Eligibility is confined to an adult male descendant of an ancestor who fought in battle under Colonial authority, from the settlement of Jamestown, Va., in 1607, to

the battle of Lexington, in 1775, or who served as Governor, Deputy-Governor, Member of the Council, or as a military, naval, or marine officer in the service of the Colonies, or under the banner of Great Britain, or was conspicuous in military, official, or legislative life during that period.

Society of Friends:

Management of Indians committed to, 3992, 4063, 4106, 4154, 4206, 4254, 4307.

Paper to President, from, on Indian affairs, referred to, 4075.

Societies of Spanish War Veterans.

Astor Battery Association.—Organized December, 1904. Composed of original members of the Astor Battery, which served in the Philippines campaign of 1898. Meets annually, Aug. 13, anniversary of the capture of Manila, at Reunion-Armory of the Philippines, and at the annual national encampment of the United Spanish War Veterans.

Naval and Military Order of the Spanish-American War.—Instituted Feb. 2, 1899. Membership is composed of persons who served on the active list or performed active duty as commissioned officers, regular or volunteer, during the war with Spain, or who participated in the war as naval or military cadets. Membership descends to the eldest male descendant in the order of primogeniture.

Society of the Army of the Philippines.—Composed of American soldiers who fought in any of the campaigns in the Philippine Islands.

Society of the Army of Santiago de Cuba.—Organized in the Governor's Palace at Santiago de Cuba, July 31, 1898. Annual dues, \$1; life membership, \$25. No initiation fee. There are branch societies in Massachusetts, New York, Ohio, Michigan, Illinois, California, and the District of Columbia.

United Spanish War Veterans.—National Encampment United Spanish War Veterans.—Organized April 18, 1904, by the consolidation of the National Army and Navy Spanish War Veterans, National Association of Spanish-American War Veterans, and the Society of the Service Men of the Spanish War. Soldiers and sailors of the regular and volunteer army, navy and marine corps who served honorably during the war with Spain or in the insurrection in the Philippines are eligible to membership.

United Volunteer Association.—All white soldiers and sailors who served honorably in the military or naval service of the United States during the war with Spain or the incident insurrection in the Philippines are eligible to membership. This society was organized at Chattanooga, Tenn., Aug. 17, 1899, and has a membership (1909) of nearly 38,000. It is national in scope and character.

Society of the Army and Navy of the Confederate States,

in the State of Maryland.—Organized in 1871, "to collect and preserve the material for a truthful history of the late war between the Confederate states and the United States of America; to honor the memory of our comrades who have fallen; to cherish the ties of friendship among those who survive, and to fulfill the duties of sacred charity toward those who may stand in need of them." The membership is 925.

Society of the Cincinnati. (See Cincinnati, Society of the.)

Societies of the Union Army of 1861-

65.—Society of the Army of the Tennessee.—Organized at Raleigh, N. C., April 14, 1865; the headquarters are at Cincinnati. Army of the Tennessee Association; organized at Washington, D. C., August, 1902; all who served in that army eligible to membership. Society of the Army of the Cumberland; organized in February, 1865, and its present membership is 350. Society of the Army of the Potomac; the Society was organized in 1868; the present membership is over 2,000. Association of the Thirteenth Army Corps; this Association was organized at Milwaukee, August, 1889.

Societies of the War of 1812.—The Veter-

an Corps of Artillery of the State of New York, Constituting the Military Society of the War of 1812. Instituted as a military society by the officers of the War of 1812, on Jan. 3, 1826, in the City of New York, and incorporated under the laws of the State of New York, by the surviving veteran members, Jan. 8, 1892. Consolidated Jan. 8, 1848, with the Veteran Corps of Artillery (instituted by officers of the Revolutionary War, Nov. 25, 1790). Hiram Cronk, last surviving Veteran member War of 1812, born April 29, 1800, died May 13, 1905. The original members comprise those who actually served in the military or naval forces of the United States during the War of 1812, or on vessels other than merchant ships which sailed under commissions of letters of marque and reprisals from the United States in that war. Eligibility to hereditary membership is confined by law to descendants of those who actually served in the War of 1812, and to descendants of former members.

General Society of the War of 1812.—Is composed of federated state societies, in Pennsylvania, Maryland, Massachusetts, Connecticut, Ohio, Illinois, District of Columbia, New York, New Jersey, and Delaware, the members of each of which state societies are borne upon the membership roll of the general society. Any male person above the age of twenty-one years who participated in, or who is a lineal descendant of one who served during the War of 1812-14 in the army, navy, revenue marine, or privateer service of the United States, offering satisfactory proof to the state society to which he makes application, and is of good moral character and reputation, may become a member. In case of failure of lineal descendants of an actual participant in said war, one collateral representative who is deemed worthy may be admitted to membership.

Sociology.—The status of this science is so vaguely defined that any definition must be a purely individual venture. Perhaps sociology may be described as the science of the relations existing between individuals and society in their social contacts, as distinguished from their economic and individualistic contacts. It may hence not inaccurately be described as the socialized side of economics (q. v.). One tendency of sociology has been to investigate and to deduce laws concerning the origins of society and of modern social organization. Another and later tendency has been to make sociology the theory on which social service (q. v.) must be based. Modern sociology is concerned with such subjects as the origin and basis of family life, the strength of sex appeal, the permanence and power of racial characteristics upon the life of the individual, the reaction of human beings to their environments, the psychological effect of

group-consciousness in determining the actions of an individual, and the effects of wages upon crime and immorality. From this list, it may be observed that, however sociologists may differ in the theories and methods they pursue, they all attempt in one way or another to describe the impulses which account for the actions of individuals, groups, and nations.

Sociology is an offspring of the latter half of the nineteenth century. It can not be altogether disassociated from economics, but its founders are often declared to be Comte and Saint-Simon, while the greatest impetus to sociological speculations was given by Herbert Spencer.

Soils, Bureau of.—A bureau of the Department of Agriculture devoted to the investigation, classification, survey and mapping of soils; studies in soil chemistry and physics; soil fertility; explorations to discover the sources of natural fertilizers; studies in the physical and chemical properties of soils and materials and methods of artificial fertilization, with their influence on the original soils. One of the special features of the bureau is the study of tobacco culture, curing, packing and exporting, as well as the introduction of new and improved varieties.

The soil survey is an institution devoted to the accumulation of a well-defined group of facts. These facts have a scientific as well as a practical value. The practical knowledge can be applied in many cases at once, and valuable economic and social results arise from it. This is the value that is usually emphasized—to be able to direct agricultural progress along proper lines, to point out natural adaptabilities of soil, and to suggest improved methods of cultivation based on a knowledge of the soil to be cultivated. These are some of the possibilities and actualities of the soil survey.

Soldier.—Any member of a military organization. In the United States soldiers are especially classified as regular soldiers attached to the regular army and volunteer soldiers who proffer their services in emergencies. (See Army and Navy, National Guard and Militia.)

Soldiers' Homes.—*Regular Army.*—The National Home for aged and disabled soldiers of the regular army of the United States is situated in Washington, D. C., occupying a beautiful site outside the city limits. It was established in 1851 with money raised by a levy on the City of Mexico during the Mexican War, and is supported by a regular tax on each soldier of the army.

All soldiers who have served twenty years as enlisted men in the army (including volunteer service, if any), or who have served in any war, and all soldiers of less than twenty years' service who have incurred such disability, by wound, disease, or injuries in the line of duty while in the regular army, as units them for further service, are entitled to the benefits of the Home.

A pensioner who enters the Home may assign his pension, or any part of it, to his child, wife, or parent, by filing written notice with the agent who pays him. If not so assigned, it is drawn by the treasurer of the Home and held in trust for the pensioner, to whom it is paid in such sums as the governor of the Home deems proper while he is an inmate of the Home, the balance being paid in full when he takes his discharge and leaves the Home.

Inmates are subject to the Rules and Articles of War, the same as soldiers in

the army. They are comfortably lodged, fed, and clothed and receive medical attendance and medicine, all without cost to them. There are 1,379 men now receiving the benefits of the Home.

Applications for admission to the Home may be addressed to the "Board of Commissioners, U. S. Soldiers' Home, War Department, Washington, D. C.," and must give date of enlistment and date of discharge, with letter of company and number of regiment for each and every term of service, and rate of pension, if any, and must be accompanied by a medical certificate showing nature and degree of disability if any exists.

Volunteers.—There are National Homes for disabled volunteer soldiers at Dayton, O.; Milwaukee, Wis.; Togus, Me.; Hampton, Va.; Leavenworth, Kan.; Santa Monica, Cal.; Marion, Ind.; Danville, Ill.; Johnson City, Tenn., and Hot Springs, S. Dak. The aggregate number of members cared for is about 35,000.

The Board of Managers of the National Home for Disabled Volunteer Soldiers informs the disabled soldiers and sailors of the United States that Homes have been established, at the places above named, for all such as are unable to earn a living by labor. All the ordinary comforts of a home are provided—chapels for religious services; halls for concerts, etc.; hospitals, with experienced surgeons and nurses; libraries and reading rooms; amusement halls; post and telegraph offices; stores, etc. Good behavior insures kind treatment.

Soldiers and sailors are especially informed that the Home is neither a hospital nor almshouse, but a home, where subsistence, quarters, clothing, religious instruction, employment when possible, and amusements are provided by the Government of the United States. The provision is not a charity, but is a reward to the brave and deserving, and is their right, to be forfeited only by bad conduct at the Home or conviction of heinous crimes. A soldier or sailor desiring admission may apply by letter to either of the managers, whereupon a blank application will be sent to him, and if he be found duly qualified, transportation will be furnished, or he can apply personally or by letter at the branch nearest to his place of residence.

President of the Board of Managers, Maj. James W. Wadsworth, 346 Broadway, New York City, N. Y.; Secretary, John M. Holley, Esq., La Crosse, Wis.

The requirements for admission are: (1) An honorable discharge from the United States service during a war in which it was engaged. (2) Disability which prevents the applicant from earning his living by labor. (3) Applicants for admission will be required to stipulate and agree to abide by all the rules and regulations made by the Board of Managers, or by its order; to perform all duties required of them, and to obey all the lawful orders of the officers of the Home. (4) A soldier or sailor must forward with his application for admission his Discharge Paper and when he is a pensioner, his Pension Certificate, which papers will be retained at the branch to which the applicant is admitted, to be kept there for him, and returned to him when he is discharged. This rule is adopted to prevent the loss of such papers and certificates, and to hinder fraudulent practices; and no application will be considered unless these papers are sent with it. If the original discharge does not exist, a copy of discharge, certified by the War or Navy Department, or by the Adjutant-General of the state, must accompany the application.

State Homes for disabled volunteer soldiers are maintained at the following places:

California—Yountville.	New Jersey { Kearny.
Colorado—Monte Vista.	{ Vineland.
Connecticut—Noroton H'ts.	New York { Bath.
Idaho—Boise.	{ Oxford.
Illinois—Quincy.	North Dakota—Lisbon.
Indiana—Lafayette.	Ohio { Sandusky.
Iowa—Marshalltown.	{ Madison.
Kansas—Fort Dodge.	Oregon—Roseburg.
Massachusetts—Chelsea.	Pennsylvania—Erie.
Michigan—Grand Rapids.	Rhode Island—Bristol.
Minnesota—Minnehaha.	South Dakota—Hot Springs.
Missouri—St. James.	Vermont—Bennington.
Montana—Columbus Falls.	Washington { Orting.
Nebraska { Grand Island.	{ Port Orchard.
{ Milford.	Wisconsin—Waupaca.
New Hampshire—Tilton.	Wyoming—Cheyenne.

Soldiers' Homes:

Erection of, recommended, 2559, 2624.

Recommendations of board of commissioners regarding, 4777.

Should be under jurisdiction of War Department, 7229.

Site for, selected, 2668.

Solicitor-General.—The office of solicitor-general was created by the act of June 22, 1870, which created the Department of Justice. The solicitor-general acts as attorney-general whenever the latter is unable to attend to the duties of his office. The position of the Solicitor-General is unique in that he is the "Court Lawyer" for the United States. He prepares and argues cases in which the United States Government is involved, and is assisted by various assistant attorneys-general. He represents the Government in all cases in the Supreme Court of the United States; he determines whether pending cases shall be prosecuted or abandoned, and, in a word, has charge of all Government litigation. He is appointed by the President, and his salary is \$10,000 a year. (See Attorney-General, Justice Department.)

Solicitor for the Department of State.

—This officer is appointed by the President, by and with the consent of the Senate. His yearly salary is \$5,000 and he is assisted by three assistants who are appointed by the Secretary of State at a yearly salary of \$3,000 each. The office was created in 1866 with the title of "Examiner of Claims," but in 1891 the title became "Solicitor for the Department of State." The Solicitor is under the jurisdiction of the Justice Department, but he also has duties assigned to him by the Secretary of State. He is the law officer of the State Department, and renders opinions on all matters referred to him. He also has supervision over claims, manages extradition proceedings, and is in charge of the legal aspects of Naturalization. (See State Department; Justice Department; Court of Claims, Extradition; Naturalization; Departmental Solicitors.)

Solicitors, Departmental, Justice Department.

—All departments of the Government have solicitors under the supervision of the Attorney-General, except the Departments of War and Navy, whose legal affairs are conducted by their judge advocates-general (q. v.). The departmental solicitors have offices in the buildings of the department to which they are assigned. In the Department of the Interior (q. v.), the assistant attorney-general handles appeals from the decisions of the General Land Office, prepares opinions, etc. The solicitor for the Department of State (q. v.) advises

the Secretary of State on matters of law, especially of international law; decides claims of United States citizens against foreign governments and claims of foreigners against the United States; and also is in charge of extradition proceedings. The solicitor for the Treasury Department (q. v.) handles revenue prosecutions, and other legal matters for his department. The solicitor in the Internal Revenue Office (q. v.), the solicitor in the Department of Commerce (q. v.), the solicitor in the Department of Labor (q. v.), all have charge of the legal affairs of their departments. The Post-Office Department (q. v.) also has an assistant attorney-general. The salaries of the departmental solicitors are \$5,000 yearly. (See Justice Department; Solicitor-General.)

Solicitor of the Treasury, office of, established, 1090.

Operations of, referred to, 2539.

Sommersett Case.—A negro slave named Sommersett accompanied his master from Boston to London in October, 1769. He became ill and was turned adrift by his master. His condition aroused the compassion of Granville Sharp, who cared for him until he was restored to health. He was then claimed by his master and taken before Lord Mansfield, of the court of King's bench. Here he was discharged on the ground that in England slavery could exist only by positive law, and in the absence of such a law a person could not be deprived of liberty on the ground that he was a slave. This decision determined the future course of England in the delivery of fugitives.

Sons of American Revolution.—A patriotic society composed of lineal descendants of soldiers, sailors, and conspicuous patriots of Revolutionary times. The society was organized in California July 4, 1875. Another society of the same name was organized in New York in 1889 and quickly outlived the older society; attempts to unite the two were made unsuccessfully in 1892 and 1897. The Eastern Society has thirty-eight branches in the states and branches in the District of Columbia and Hawaii. The total membership is about 11,000.

Sons of Confederate Veterans. (See Confederate Veterans, United Sons of.)

Sons of Liberty.—A society organized by the younger and more ardent patriots of Connecticut in 1755, to advance colonial liberty. They advocated non-importation, aided in the hanging in effigy of the stamp distributor Oliver in 1765, and in 1774 proposed the organization of a continental congress. The appellation is sometimes applied to the whole body of American patriots. Another organization calling themselves "Sons of Liberty" existed in 1862-1864 in Indiana and other states and actively opposed the efforts of the United States Government in the prosecution of the war for the preservation of the Union, and several leaders were tried and condemned by a military commission. (See also Milligan Case.)

Sons of the Revolution.—A society of the same nature as the Sons of the American Revolution. It was established in New York in 1875, and has now thirty-one state branches. The principal point of difference between the Sons of the Revolution and the Sons of the American Revolution is the matter of eligibility, which in both is

dependent on hereditary descent. In the latter society membership is contingent upon lineal descent from patriots of the Revolution, while in the former it is extended to collaterals.

Sons of Veterans, U. S. A.—Camp No. 1, Sons of Veterans, U. S. A., was organized in the City of Philadelphia, Sept. 29, 1879. The organization is composed of lineal descendants, over eighteen years of age, of honorably discharged soldiers, or marines who served in the late Civil War. There are now about one thousand camps, with a membership of fifty thousand, distributed among twenty-five divisions, corresponding to states, the general society or national body constituting the Commandery-in-Chief. Each camp has its own officers, the head officer being the commander. The principal officer of the division is the division commander. The Sons of Veterans Auxiliary is an association of women auxiliary to the above organization.

Sound Dues. (See Baltic Sea.)

Sound Money Democrats.—A group defecting from the Democratic Party in 1896. In convention they nominated John M. Palmer for President, and General Simon B. Buckner for Vice President; and their platform declared for the gold standard.

Soup-Houses.—Literally meaning houses where free soup is served to hungry and suffering people,—distinguished from bread-lines (q. v.) in that soup-houses are resorted to only on occasions of temporary distress due to panic or unemployment, and are utilized by self-respecting, industrious people who would willingly work, but who can find no opportunity; whereas the bread-line is ever present, and usually administrators only to the habitually-unemployed element.

South America.—The area is 6,750,000 square miles, a little more than one and three-quarter times that of Europe. The extreme longitudes are Cape Branco 35° W. and Punta Parina 81° W., and the extreme latitudes, Punta Gallinas, 124° N. and Cape Horn 56° S. South America is surrounded by the ocean, except where it is joined to Central America by the narrow isthmus of Panama.

The independent republics of South America are Argentina, Bolivia, Brazil, Chile, Colombia, Ecuador, Paraguay, Peru, Uruguay and Venezuela. Besides these are British, French and Netherlands' Guiana.

Islands adjacent to South America are the Falkland Islands, Galapagos Islands, Graham Land, Sandwich Group, South Georgia, South Orkneys and South Shetlands.

In the south Tierra del Fuego is separated from the mainland by the Straits of Magellan. The physical features consist of a Western Mountain belt and two Upland Plateaus.

The Upper Plateaus consist of the highlands of Brazil and Guiana, between which are the lowlands of the Amazon.

The extensive lowlands of the Orinoco, Amazon, and Paraná-Paraguay system were once inland seas, and afford great areas of level land. Ocean vessels can reach Iquitos on the Amazon, which is 2,300 miles from the ocean in consequence of the small fall of the river.

On the West Coast the rivers are generally too rapid to be navigable, in consequence of the proximity of the mountains to the sea, but they are invaluable in the dry regions for irrigation.

The Amazon has numerous tributaries, which are themselves great rivers, and oc-

South America *Messages and Papers of the Presidents*

cupies with its basin a large part of South America. Owing to the melting of the snows in February and the rains which mainly occur at this season on the Andean slopes, it has a marked flood season, reaching its maximum in June, when it overflows its banks.

The Plate Estuary is formed by the junction of the Paraná and Uruguay. A larger amount of water is brought down than by any other river system in the New World excepting the Amazon. The Paraná is navigable for some 1,200 miles by ocean vessels.

Quito, in Ecuador, at over 9,000 feet, and Bogotá, in the uplands of Colombia, at a little below 9,000 feet, have temperatures between 55° F. and 58° F. in both summer and winter, while Para, at the mouth of the Amazon, and Iquitos, on the Upper Amazon, are between 78° F. and 79° F. throughout the year. The diminution of temperature with altitude is shown most noticeably on the high Andean plateau, where La Paz, at over 12,000 feet, has a summer temperature of only 52° F., and near the margin of the Tropics, where Sao Paulo, in the coffee-growing uplands of southeast Brazil at about 2,500 feet, is about 9° colder than Rio at sea level. The local influence of the cold current is shown in the difference of temperature between points in the same latitude on the East and West coasts—Bahia, in latitude 12° S. is 10° warmer than Calhao.

Outside the Tropics the eastern side of South America has a high summer temperature, above 68° F. to south of 40° S. latitude, as a consequence of which wheat can be grown successfully to the south of Buenos Aires.

South American Republics, Recognition of.—In 1817 Henry Clay endeavored to se-

cure an appropriation from Congress for sending an accredited minister to Buenos Ayres, which had become a free and independent Republic. Congress, however, refused. March 8, 1822, President Monroe in a special message to Congress (685) recommended the recognition of Buenos Ayres, Chile, Colombia, and other republics, and the establishment of international relations with them. This Congress agreed to. The commercial relations between the United States and these republics have steadily improved since this action. A conference, known as the International American Conference (q. v.), representing the United States and these republics, met in Washington in 1889 to encourage closer business relations. This resulted in the establishment of the Bureau of American Republics (q. v.). The latest example of the recognition of a new republic by this country occurred in the year 1903, when the Republic of Panama proclaimed its independence of Colombia on Nov. 4 and received the recognition of the American government two days later.

South and Central American Countries, Treaties with.—At the Fourth International American Conference, held in Buenos Aires in August, 1910, representatives of Argentina, Brazil, Chile, Colombia, Costa Rica, Cuba, Santo Domingo, Ecuador, Guatemala, Haiti, Honduras, Mexico, Nicaragua, Panama, Paraguay, Peru, Salvador, Uruguay and Venezuela agreed upon several important points of international comity, among which was a convention for the submission of pecuniary claims to arbitration whenever such claims are of sufficient importance to warrant the expense of arbitration. They also agreed that decisions of such claims should be rendered in accordance with the principles of international law, and all controversies submitted to The Hague Court of Arbitration. This treaty was signed at Buenos Aires August 11, 1910, ratification advised by the Senate Feb. 1, 1911, ratified by the President of the United States March 21, 1911, and proclaimed by Wilson July 29, 1914.

Another convention between the same republics adopted at the same conference provided for the protection of inventions, patents, designs and industrial models. For the text of these treaties see President Wilson's proclamations, pages 8362 and 8364.

South Carolina.—One of the thirteen original states; nickname, "The Palmetto State;" motto, "Animis opibusque parati" ("Prepared in mind and resources"). It lies between lat. 32° 4' 30" and 35° 13' 2" north and long. 78° 28' and 83° 18' west. It is bounded on the north and northeast by North Carolina, on the southeast by the Atlantic Ocean, and on the southwest and west by Georgia (separated for most part of the distance by the Savannah River). It has an area of 30,989 square miles. The surface is level near the coast, undulating in the interior, and mountainous in the northwest. The state produces gold, porcelain, clay, phosphates, and other minerals, and is especially noted for the production of rice and sea-island cotton.

South Carolina was partially explored by the Spaniards in 1525, who named it *Chicora*. An unsuccessful attempt to colonize was made by the French under Ribault in 1562. The first permanent settlement was made by the English in 1670. Charleston was founded in 1680. Charles II. gave the territory between lat. 29° and 36° 30' north, to eight of his favorites in 1663, and two years later he issued a charter placing the control of the colony in their

hands. They employed John Locke, the philosopher, to draw up a constitution which should provide an ideal government. This "grand model" proved to be an attempt to set up the feudal system in America, and was abandoned by the proprietors in 1693. South Carolina became a royal colony in 1729.

The first constitution was adopted in 1776. The Federal Constitution was ratified May 23, 1788. The state seceded on Dec. 20, 1860, and was readmitted by act of Congress June 25, 1868.

Statistics of agriculture collected for the last Federal census, place the number of farms in the state at 176,434, comprising 13,512,028 acres, valued, with stock and improvements, at \$392,128,314. The average value of land per acre was \$19.89, against \$7.14 in 1900. The value of domestic animals, poultry, etc., was \$45,131,380, including 389,882 cattle, valued at \$7,888,259; 79,847 horses, \$10,147,178; 155,471 mules, \$23,830,361; 665,211 swine, \$2,552,344; 37,559 sheep, \$81,362, and poultry, \$1,206,615. The yield and value of field crops in 1911 was: Corn 1,790,000 acres, 32,578,000 bushels, \$29,646,000; wheat, 83,000 acres, 946,000 bushels, \$1,164,000; oats, 345,000 acres 7,038,000 bushels, \$5,067,000; rye, 3,000 acres, 30,000 bushels, \$44,000; rice, 10,000 acres, 117,000 bushels, \$88,000; potatoes, 10,000 acres, 700,000 bushels, \$854,000; hay, 64,000 acres, 69,000 tons, \$1,173,000; tobacco, 13,600 acres, 11,016,000 pounds, \$1,388,016, and cotton, 1,480,000 bales. The report of the State Treasurer for the fiscal year 1911 showed a balance Dec. 31, 1910, of \$648,730; receipts for year, \$3,208,790; expenditures, \$3,132,164; cash balance Dec. 31, 1911, \$725,356; public debt, \$6,528,485.

The number of manufacturing establishments in South Carolina having an annual output valued at \$500 or more at the beginning of 1915 was 1,885. The amount of capital invested was \$203,211,000, giving employment to 77,693 persons, using material valued at \$91,009,000, and turning out finished goods worth \$138,891,000. Salaries and wages paid amounted to \$29,052,000.

The turpentine and rosin industries, for which the state was formerly noted, are dying out, because of the exhaustion of the pine forests. The imports at the harbor of Charleston for 1907 were \$3,528,553, and the exports \$1,082,466. The population, according to the census of 1910, was 1,515,400.

Copies of proclamations for executive clerks, 3756.

Habeas corpus, writ of, suspended in certain counties, 4090, 4093.

Revoked as to Marion County, 4092.

South Carolina Inter-State and West Indian Exposition.—An industrial and educational fair, held at Charleston, S. C., from Dec. 1 to June 2, 1902. The site covered an area of 250 acres and the buildings were in the Spanish Renaissance style of architecture, covered with stucco, tinted an ivory white. The United States and many of the individual states made exhibits, as well as Cuba, Porto Rico, and Guatemala. Notable original groups of historical statuary exhibited were "The Aztec," "The Negro," and "The Huguenot." The total attendance was 674,806. The cost of the exhibition was \$1,250,000, and the receipts \$313,000.

South Dakota.—One of the western group of states. Nickname, "Coyote State." Motto, "Under God the people rule." It lies a little north of the center of the continent, between lat. 45° 57' and 42° 28' north (extreme southeast point: west of the Missouri) the southern boundary is 42° north and long. 96° 26' and 104° 32' west. It is bounded on the north by North Dakota, on the east by Minnesota and Iowa, on the south by Nebraska, and on the west by Montana and Wyoming. It has an area of 77,615 square miles. The Missouri River divides the state into two

nearly equal portions. The eastern part is generally smooth and rolling. West of the river the country rises more rapidly and culminates in the Black Hills, an elevated region some 60 by 100 miles in extent, the central point of which is Harney's Peak, 9,700 feet high. The Bad Lands, in the southeastern part, is an interesting geological formation, consisting of a desert region abounding in canyons, depressions, walls, and castles of white earth, rich in soil-making chemicals and interesting fossils.

The early history of the State is identical with that of North Dakota (q. v.), from which it was separated and admitted as a state in 1889. The total land area is 49,184,000 acres, of which 12,908,977 acres are reserved for the Indians. With the exception of the forests of the Black Hills the State is almost an arid plain. In 1902 about 12,107,114 acres were vacant land. In 1908 there remained unreserved and unappropriated 6,561,295 acres. About 40,000 acres are irrigated and the Federal plan of irrigation will reclaim 100,000 acres in the Belle Fourche Valley. United States Land offices are located at Aberdeen, Chamberlain, Lemmon, Mitchell, Pierre and Rapid City.

The value of domestic animals, poultry, etc., in 1910 was \$128,202,000, including 612,000 horses, valued at \$64,260,000; 10,000 mules, \$1,210,000; 656,000 milch cows, \$21,648,000; 1,131,000 other cattle, \$28,832,000; 829,000 sheep, \$3,316,000; 805,000 swine, \$8,936,000. The yield and value of field crops in 1911 was: Corn, 2,310,000 acres, 50,820,000 bushels, \$26,935,000; wheat, 3,700,000 acres, 14,800,000 bushels, \$13,468,000; oats, 1,540,000 acres, 11,396,000 bushels, \$4,900,000; rye, 13,000 acres, 130,000 bushels, \$99,000; potatoes, 56,000 acres, 4,032,000 bushels, \$2,822,000; hay, 459,000 acres, 252,000 tons, \$2,142,000. The gold output in 1911 was 359,444 fine ounces, worth \$7,430,367, most of which was produced at the Homestake mine, at Lead, in the Black Hills. The silver produced the same year was 206,188 fine ounces, valued at \$113,403. Natural gas, lead, stone and clay products are also found. The manufactures of the State are confined mainly to flour, lumber and dairy products. The report of the State Treasurer for the fiscal year ended June 30, 1911, showed receipts for the year, \$3,760,213; expenditures, \$4,001,626; cash balance, \$121,156. The population in 1910 was 583,888.

South Dakota:

Admission of, into Union, proclaimed, 5457.

Discussed, 5485.

Lands in—

Opened to settlement by proclamation, 5707, 6016.

Set apart as public reservation by proclamation, 6216.

South Mountain, or Boonsboro (Md.), Battle of.—After driving the Union army back upon the fortifications around Washington, Lee's army crossed the Potomac into Maryland. The Confederate commander issued an address to the people offering them the protection of his government and calling for volunteer soldiers. He sent the greater part of his army, about 25,000 men, under Jackson, to capture the garrison at Harpers Ferry. As soon as it became known at Washington that Lee had crossed into Maryland, McClellan was ordered to follow him with all the troops

not needed to defend Washington. Sept. 12, 1862, McClellan reached Frederick with a force estimated at from 80,000 to 90,000 men, just after it had been evacuated by Lee's army, which had passed west over the Catoctin Mountains toward South Mountain. The road from Frederick to Hagerstown, Md., passes through Turners Gap of this mountain. Here on Sept. 14, 1862, Gen. D. H. Hill, with a force of about 6,000 men, successfully resisted repeated assaults from Hooker's and Burnside's corps, fully 30,000 strong. At 3 P. M. Hill was reinforced by 1,900 men, and later in the day by Longstreet with six brigades, only four of which, numbering 3,000 men, were seriously engaged. The gap was contested from 8 A. M. until after dark. During the night the Confederates retired. Franklin took possession of Crampton's Gap, six miles below, held by the Confederates under Howell Cobb. The Federal loss at Turners Gap, South Mountain, was 328 killed and 1,463 wounded and missing, and at Crampton's Gap 115 killed and 418 missing. The Confederate loss at both aggregated 934.

South Polar Regions.—The Antarctic Ocean includes much more of the circum-polar ocean than the part south of the Antarctic Circle ($66\frac{1}{2}^{\circ}$ S.), as drifting pack ice is carried a long way to the north. Icebergs are often met with north of 45° S. It is now considered that the land which has been sighted at various points forms part of the Antarctic continent, probably loftier than Greenland and larger than Australia. This plateau is covered with a sheet of *névé* and ice which seems to be slowly creeping toward the sea. The icebergs differ completely from those of the Arctic, forming large flat-topped islands with perpendicular sides.

In the interior the plateau rises to over 10,000 feet and is remarkably level. On this some of the peaks exceed 15,000 feet. In Victoria Land there have been great volcanic eruptions in geologically recent epochs. To these are due the conical peaks of Erebus (12,760 feet), which is still active. Terror, Melbourne, and Discovery, and numerous isolated craters.

There are no land animals, but microscopic life has been found in ponds which can endure great extremes of cold and heat.

Exploration.—A southern continent was believed to exist in the sixteenth and seventeenth centuries, but it was not till 1774 that Cook crossed the Antarctic Circle and reached in his voyages $71^{\circ} 40' \text{ S.}$ – $106^{\circ} 54' \text{ W.}$ in 1774. This was the furthest point south attained in the eighteenth century. Bellingshausen, in a Russian expedition supplementing Cook's voyages, reached $69^{\circ} 25' \text{ S.}$ and $1^{\circ} 11' \text{ W.}$ in 1819, and in 1821 sighted the first land ever seen within the Antarctic Circle, to which he gave the name of Peter I. Island. In 1823 James Weddell reached $74^{\circ} 15' \text{ S.}$ and $34^{\circ} 17' \text{ W.}$ In 1831–1832 Biscoe discovered Graham Land. In 1835 an attempt was made to reach the Magnetic Pole by a French expedition that met with no success, though land was sighted inside the Antarctic Circle.

In 1839 the *Erebus* and *Terror*, the former commanded by Ross, entered pack ice in 74° E. , and succeeded in getting through the ice into open sea to the south. He discovered a chain of mountains south of Cape Adare in 71° S. , and the land was taken possession of as Victoria Land. The names of the two ships were given to the volcanoes. In 1842 an attempt was made to pass the Great Ice Barrier on the east, and the land was discovered now known as King Edward's Land.

There was no more exploration till 1874, when the first steamer, the *Challenger*, reached $66^{\circ} 40' \text{ S.}$ and $78^{\circ} 30' \text{ E.}$ In 1894 Borchgrevink, a sailor on board a Norwegian whaler, was one of a party that landed near Cape Adare, the first to set foot on the Antarctic continent. In 1895 interest in Antarctic exploration was aroused by the efforts of Sir Clement Markham, President of the Royal British Geographical Society, and the International Geographic Congress, and the modern era of South Polar discovery was inaugurated.

In 1899 Borchgrevink, in the *Southern Cross*, an expedition equipped by Sir George Newnes, took dogs and sledges to attempt to reach the Magnetic Pole, and landed near Cape Adare. It was found that the ice barrier had receded about 30 miles south since it had been mapped by Ross in 1841.

In 1901–1904 a national Antarctic expedition was organized under Scott. In 1902 Scott, Shackleton, and Wilson reached $82^{\circ} 17' \text{ S.}$ with dog sledges. An elevation of 9,900 feet was attained on the plateau. Nordenskjöld, in the *Antarctic*, and Bruce, in the *Scotia*, added to the knowledge of the South Polar regions. In 1904 Charcot, in the *François*, and in 1909 in the *Pourquoi Pas*, explored the Bellingshausen Sea. In 1909 Shackleton, in the *Nimrod*, attempted to land a shore party to winter on King Edward's Land but wintered near the base of Mount Erebus, about 20 miles to the north of the *Discovery's* winter quarters. An ascent of Mount Erebus was made. David reached the South Magnetic Pole, and Shackleton with his companions reached the upper plateau at about 10,000 feet, where they were obliged to return in $88^{\circ} 23' \text{ S.}$, 113 miles from the Pole. In 1910 Scott left in the *Terra Nova* for an extended period of scientific exploration. It was expected that he would be the first to reach the Pole, but Captain Amundsen attained the most southerly point on Dec. 16, 1911, after a remarkably rapid journey. He used dogs and skis and relied on depots of seal meat. The mountain range of Victoria Land was reached in about 85° S. and a path to the plateau found by the Devil's Glacier, between elevations of 12,000 to 15,000 feet. The plateau was 10,750 feet at its highest point, and sloped slightly downward to the Pole at 10,500 feet.

Captain Robert Falcon Scott, R. N., was born June 6, 1868, and reached the South Pole on Jan. 18, 1912, with four companions. On the return journey he perished with his party on (or about) March 29, 1912, the bodies being discovered by the relief expedition on Jan. 18, 1913.

South Sea Exploring Expeditions:

Delay in preparation of, 1646, 1683.

Expenses of, referred to, 994.

New continent discovered by, referred to, 1835.

Referred to, 1496, 1719.

Southern Claims Commission (see also Court of Claims):

Discussed, 4205.

Transfer of 4th of July claims to, recommended, 4361, 4425.

Southern Exposition at Louisville discussed, 4773.

Board on behalf of Executive Departments designated, 4819.

Instructions to, 4820.

Southern Indians. (See Indian Tribes.)

Southern States (see also Confederate States; Reconstruction; Secession; Slavery; Civil War):

Acts—

For admission of certain, vetoed, 3846, 3848.

To provide for more efficient government of, vetoed. (See Reconstruction.)

Blockade of ports of. (See Civil War.)

Revenue and postal laws in, referred to, 3580.

Union and Confederate flags, return of, to respective States recommended, 5163.

Proposition withdrawn, 5164.

Unlawful combinations in. (See Elections in, *ante*.)

Southwest Territory.—A region comprising portions of the present States of Tennessee, Kentucky, and Mississippi, together with a strip of land ceded to the General Government by South Carolina. Though never organized under one territorial government, it was known as the Southwest Territory. An unsuccessful attempt was made to organize a portion of this territory into a new state to be called Franklin (q. v.). With the admission of Tennessee and Kentucky and the organization of a Territorial government in Mississippi this territory went out of existence.

Spain.—The Kingdom of Spain occupies the greater portion of the Iberian Peninsula of southwestern Europe, and consists of Continental Spain, occupying eleven-thirteenths of the peninsula (the remainder being occupied by the Republic of Portugal and the British rocky fortress of Gibraltar), the Balearic Islands, the fortified station of Ceuta, and the Canary Islands. The Balearic and Canary Islands and Ceuta form an integral part of the kingdom, which also possesses certain colonies and dependencies. Continental Spain lies between 36°-43° 45' N. latitude and 4° 25' E.-9° 20' W. longitude, and has a total area of 191,893 square miles. The Balearic Islands are an archipelago of four large and eleven small islands in the Mediterranean. Of the four larger islands, Majorca has an area of 430 square miles; Minorca (260 square miles) possesses the magnificent harbor of Port Mahon and a former capital in Ciudadela; Iviza has La Ciudad as capital; and Formentera has an area of 37 square miles. The eleven small islands have an area of 985 square miles—a total for the Archipelago of 1,935 square miles. Ceuta is a fortified post on the Moroccan coast, opposite Gibraltar (the Straits of Gibraltar being 14 miles wide between the two fortresses), and consists of a promontory connected with the mainland by a narrow isthmus. At the seaward end of the promontory is the Monte del Haeck, formerly called Abyla, and one of the "Pillars of Hercules." Ceuta has an area of 5 square miles, with a population of about 13,000. The Canary Islands are an Archipelago in the Atlantic Ocean, about 60 miles from the coast of West Africa. The total area is 2,807 square miles and the population (1910) 419,809. The Archipelago consists of seven islands and six uninhabited islets. Of the seven inhabited islands, Tenerife has an area of 782 square miles and a population of close on 150,000. Its capital, Santa Cruz, having 53,403 inhabitants in 1910, and forming the administrative center of the group. Fuerteventura, Grand Canary, Lanzarote, Palma, Gomera, Hierro are the others.

Physical Features.—Central Spain consists of an extensive tableland, between the Cantabrian Mountains and the Pyrenees in the north and the Sierra Nevada in the south, with the Castilian Dividing Range running almost east and west in the middle of the plateau. Between the plateau and the Pyrenees is the northeastern lowland of the Ebro Valley, and in the southwest is the valley of the Guadalquivir. The principal rivers are the Tagus, Douro, Ebro, Guadiana, and Guadalquivir.

The early inhabitants were Celts and Iberians, with Phœnician colonists.

The climate of the tableland has great extremes, but that of the eastern (Mediterranean) provinces is more equable, while the southern provinces are sub-tropical, with great summer heat and mild winters, vegetation being at its best in midwinter. The

north and northwest have a mild and equable climate with abundant rainfall.

History.—Roman Spain was invaded in the fifth century by the Vandals, Visigoths, and Suebi, and early in the eighth century the country was conquered by Moslems from northern Africa, who remained the dominant power for nearly 700 years, but before their expulsion from Spain, at the instigation of the Inquisition in 1502, they had sunk from the position of conquerors to semi-servile trading communities. The greatness of the country began with the reign of Ferdinand and Isabella (1474-1516), under whom the Kingdom was consolidated and its dominions extended by adventurous conquerors, who carried the religion and flag of Spain over a territory many times greater than their native land. Toward the close of the sixteenth century the Netherlands passed to the Spanish crown by inheritance, and the zenith of Spain's grandeur may be said to have been reached. The religious wars in the Low Countries and in France and a war with England, marked by the disastrous expedition of the Great Armada (1588), were the beginnings of the decadence of Spain, which suffered from a century of weak kings, whose line ended in 1700 at the death of Charles II. The succession led to a great European war, which terminated in the Treaty of Utrecht, signed by England and France on April 11 (and by England and Spain on July 13), 1713, by which Gibraltar was ceded to England. At the beginning of the nineteenth century the country was an easy prey to the armies of Napoleon, who placed his brother upon the throne. Napoleon's generals occupied Spain and Portugal in 1812, but within two years the invaders were driven out by the genius of Wellington, and Ferdinand VII. was restored in 1814. The nineteenth century witnessed many upheavals, including the revolution of 1820, the revolt of the South American Colonies, 1821-1823, the Carlist Wars of 1840, 1860, and 1873-1876 (by which the adherents of Don Carlos, brother of Ferdinand VII., endeavored to obtain the throne for their leader and his successors), a revolution of 1868 and the institution of a Republic 1868-1874, the Bourbon restoration of 1874, the Cuban insurrections of 1869 and 1898, and the Spanish-American War of April-December, 1898, terminating in the Treaty of Paris (December 12, 1898), by which Spain renounced the sovereignty of Cuba and ceded Porto Rico, the Philippine Islands and other territory to the United States.

Government.—The government is that of a constitutional monarchy; hereditary in the male (and eventually in the female) line of the house of Bourbon-Anjou, the constitution resting on the fundamental law of June 30, 1876. Ruler: Alfonso XIII, King of Spain, of Castile, Leon, Aragon, the two Sicilies, Jerusalem, Navarre, Grenada, Toledo, Valencia, Galicia, Majorca and Minorca, Seville, Cerdania, Cordova, Coreaga, Murcia, Jaen, Algarva, Algeiras, Canary Islands, etc.; born (posthumously) May 17, 1886; assumed the government May 17, 1902; married May 31, 1906.

The legislative body, or Cortes, is composed of the Senate and the Chamber of Deputies. The Senate contains 360 members, of whom one-half are hereditary official or life members and one-half elective, in three classes: (1) Grantees of Spain, with incomes exceeding 60,000 pesetas, and high officials of the Church, Army, Navy, and judiciary; (2) Life members nominated by the Sovereign; (3) Members elected by the 49 provinces (3 each) and by the academies, universities, dioceses, and State cor-

porations, and renewable as to one-half every five years. The Chamber of Deputies consists of 404 members (1 for every 50,000 of the population) elected by universal suffrage of all male Spaniards aged twenty-five.

The Kingdom is divided into 495 *partidos judiciales*, each containing a court of first instance, from which appeals are heard by 15 *audiencias territoriales*. Criminal causes are determined by quarterly assizes in each of the 49 provinces. There is a Supreme Court of Cassation (with civil and criminal departments) at the capital.

Education.—Primary Education is nominally compulsory and is mainly free. There are universities at Barcelona, Granada, Madrid, Salamanca, Santiago, Saragossa, Seville, Valencia, and Valladolid.

Population.—The census of the forty-nine provinces taken in 1910 gave the population as 19,588,688, in an area of 194,700 square miles. The density of population (100.6 per square mile) bears no true relation to the resources of the Kingdom, which could easily support more than five times the present number of inhabitants. Included in the generic term "Spaniards" are about 500,000 Basques in the northern provinces, Catalans in the northeast and Galicians in the northwest.

Production and Industry.—The total area is estimated at 124,616,000 English statute acres, of which (in 1906) 53,606,114 acres were cultivated.

In 1911 there were 3,245,000 acres of vineyards, which produced 3,019,000 tons of grapes, and 3,587,790 acres of olive trees, which produced 1,729,894 tons of olives. In 1912 there were 525,833 horses, 928,920 mules, 829,410 asses, 2,561,894 cattle, 15,829,954 sheep, 3,116,226 goats, and 2,571,359 pigs. The year 1911 was one of the worst possible from the point of view of breeding. The coast fisheries include sardines, tunny, anchovies, salmon and cod, and employ over 70,000 fishermen, the value of the annual catch being about 50 to 60 million pesetas; the sardine-curing establishments employ a further 16,000 persons.

The mineral resources of the country are only partially exploited, and principally by foreign capital under foreign direction. In the production of copper ore, lead ore, mercury and silver, however, Spain is surpassed by no other European country, and its annual output of salt is exceeded only by that of Austria-Hungary. Coal is very plentiful, but the production is comparatively small, and among the other minerals are manganese, antimony, gold, cobalt, sodic sulphate, barytes, phosphorite, alum, sulphur, china clay, lignite, asphalt and various building stones. Over 150,000 persons are employed in mineral production, and the annual output exceeds 200,000,000 pesetas in value.

Cotton and linen manufactures are the most important industries, and increased efforts are being exerted to supply the home demand since the loss of the former colonial outlets, but the imports are still considerable. Tobacco (a Government monopoly), leather, paper, soap, chocolate, cork, distilling and fruit preserving are also considerable industries.

Finance.—The budget for 1913 provided for an expenditure of 1,146,901,171 pesetas from a revenue of 1,167,436,472 pesetas, leaving a surplus of 20,535,300 pesetas. The national debt was stated Jan. 1, 1913, as 9,497,141,705 pesetas, at 4 and 5 per cent. The unit of value, the peseta, is equivalent to 80.193, United States money, the same as the French franc.

Railways.—In 1912 there were 9,161 miles of railway open, all lines being owned by companies with a State guarantee.

Cities.—Capital, Madrid, on the river Manzanares. Population 571,539. At the census of 1910 there were 7 towns with populations exceeding 100,000, 15 others exceeding 50,000 and 13 more above 25,000.

Trade with the United States.—The value of merchandise imported into Spain from the United States for the year of 1913 was \$31,471,723, and goods to the value of \$23,220,012 were sent thither—a balance of \$8,251,711 in favor of the United States.

RIO MUNI (or Spanish Guinea) is a coastal settlement of West Africa between German Cameroon and French Congo, extending about 125 miles inland. The inhabitants are Bantu tribes. Cocoa, coffee, and bananas are cultivated, and rubber, palm-oil, palm-kernels, and other forest produce are exported.

RIO DE ORO is a possession on the north west coast of Africa, between Cape Bogador and Cape Blanco. The territory is part of the waterless Sahara, with a sparse population of wandering Muhammadan Arabs. There are valuable fisheries off the coast, and cattle, sheep, and camels are bred where vegetation permits.

SPANISH COLONIES exclusive of Ceuta and the Canary Islands, which form an integral part of Spain) consist of certain settlements and islands of western Africa, with a total area of close on 82,400 English square miles, and a population exceeding 275,000.

FERNANDO PO lies in the Bight of Biafra in 3° 12' N. latitude and 8° 48' E. longitude, about 20 miles distant from the west coast of Africa, and is a mountainous island (Pico de Santa Isabel, 10,800 feet), with forests of oil palm, ebony, mahogany, and oak, and sugar cane, cotton, and indigo. Cocoa, coffee, sugar, tobacco, vanilla, and kola nut are cultivated, and large quantities of cocoa and other products are exported. The capital is Basile, and the largest town Port Clarence (1,500 inhabitants). Dependencies of the island of Fernando Po are:—

Annopon Island, in the Gulf of Guinea, in 1° 24' S. latitude and 50° 35' E. longitude. The roadstead at the capital (San Antonio de Bala) is much frequented by passing vessels, which also obtain water and vegetables from the islanders.

Corisco Islands, consisting of Corisco, Bana, Elobey Grande and Elobey Chico, lie in Corisco Bay, and export ebony, logwood, and other forest produce.

MOROCCO AND THE SAHARA.—By a treaty signed on Nov. 27, 1912, between France and Spain, the latter acquired a zone or sphere of influence in North Morocco, the capital being Tetuan, where the Sultan's authority is represented by a Khalifa. The limits of the Rio de Oro and Rio Muni were also defined in the treaty with France (see "Morocco").

Melilla is a town on a rocky promontory of the Rif coast, connected with the mainland by a narrow isthmus. The population is about 9,000, and the settlement (which was conquered from the Moors in 1490) exports goatskins, eggs, and beeswax, and imports cotton goods and provisions.

Spain, Treaties with.—The treaties with Spain prior to the treaty of Paris were expressly annulled and abrogated in 1902, except the treaty of Feb. 17, 1833, which was continued in force. It provided for the payment of claims of the United States by the issuance by Spain of a series of inscriptions. The commission to determine the claims (appointed by Congress, June 7, 1836) awarded the sum of \$549,850.28 to the claimants. The payment of the interest on this sum is made perpetual by the convention.

The treaty of peace of 1898, known as the Treaty of Paris, closed the Spanish-American War. By it Spain relinquished all authority and claim of sovereignty to Cuba and ceded Porto Rico and Guam to the United States. In consideration of the payment by the United States, within three months of the ratification of the treaty, of twenty millions of dollars, Spain ceded to the United States the archipelago known as the Philippines. It was agreed that the United States should for the space of ten years from the signing of the treaty admit Spanish ships and merchandise to the Philippines on the same terms as United States ships and merchandise. Spanish soldiers taken as prisoners of war at Manila were to be sent back to Spain at the expense of the United States, with their arms restored to them. Spain should evacuate the Philippines as speedily as possible, taking with her, as her property, the movable munitions of war and arms, the larger arms to be left in position and purchased from Spain by the United States upon terms to be agreed upon. All prisoners of war to be released by both parties. No indemnity to be sought by either government from the other. The United States to settle all claims against Spain covered by the relinquishment of this treaty.

Spain relinquished to the United States all wharves, docks, barracks, and similar public property in Cuba, Porto Rico, Guam, and in the Philippines without prejudice to private interests therein. Provision was made for establishing the political status of subjects of Spain electing to remain within the ceded possessions. The right of establishing a consular office by Spain in any of the ceded districts was accorded by the treaty.

In 1900 an additional treaty was made to cover the cession of the outlying islands of the Philippines not specifically included in the treaty of 1898. These were particularly the islands of the Cagayan Sulu and Sibutu, for which cession the United States agreed to pay the sum of one hundred thousand dollars to Spain.

In 1902 a treaty of friendship and general relations was closed with Spain to cover largely the points in the treaties which had been abrogated by war. This treaty covered the points usual in treaties of commerce and navigation, and consular conventions.

An arbitration convention on the lines prescribed by The Hague Convention of 1899 was signed April 30, 1908.

Spanish-American Provinces. (See South American Provinces; South American Republics.)

Spanish-American War.—In February, 1895, the natives of Cuba, after years of oppression by their Spanish rulers, which was in no wise lightened by various unsuccessful revolutions, determined to throw off the yoke of Spain. They took up arms against the mother country, and quickly the entire island was in a state of insurrection. This revolution, like previous outbreaks which had occurred in the island, was not at first considered of sufficient importance to warrant interference or recognition on the part of the United States, although Americans were outspoken in their sympathy for Cuba and indignant at the stories of mistreatment of Cubans at the hands of Spanish governors.

A similar outbreak in the island occurred in 1868, during the Administration of President Grant. In his message to Congress Dec. 6, 1869, President Grant said: "The contest (in the island) has at no time assumed the conditions which amount to a war in the sense of international law, or which would show the existence of a *de facto* political organization of the insurgents sufficient to justify a recognition of belligerency" (page 3985). In a message of June 13, 1870, describing the conditions in the island, he said: "The insurrection itself, although not subdued, exhibits no signs of advance, but seems to be confined to an irregular system of hostilities, carried on by small and illly armed bands of men, roaming without concentration through the woods and the sparsely populated regions of the island, attacking from ambush convoys and small bands of troops, burning plantations and the estates of those not sympathizing with their cause" (page 4018). Again, Dec. 7, 1875, in a message to Congress he used the following language in respect to conditions in the island: "Considered as a question of expediency, I regard the accordance of belligerent rights still to be as unwise and premature as I regard it to be, at present, indefensible as a measure of right" (page 4293).

President Cleveland entertained an opinion in regard to the insurrection in Cuba arising in 1895 similar to those expressed by President Grant in regard to the insurrection of 1868, and in his message of Dec. 2 of that year he said: "Whatever may be the traditional sympathy of our countrymen as individuals with a people who seem to be struggling for larger autonomy and greater freedom, deepened, as such sympathy naturally must be, in behalf of our neighbors, yet the plain duty of their government is to observe in good faith the recognized obligations of international relationship" (page 6068). He insisted that belligerent rights should not be accorded to the insurgents, because of peril and injury to our own interests. He said in his message of Dec. 7, 1896: "Imperfect and restricted as the Spanish government of the island may be, no other exists there, unless the will of the military officer in temporary command of a particular district can be dignified as a species of government" (page 6151).

The foregoing expressions of opinion prove unmistakably that there was no reaching out on the part of the United States to interfere with the Spanish rule in Cuba. When President McKinley was inaugurated the insurrection described by his immediate predecessor still existed, and the grave questions which had confronted the latter were now presented for his con-

sideration. He declined to interfere in the troubles in the island in any way and expressly refused to recognize the independence of Cuba. He declared Spain should be given reasonable time in which to apply promised reforms. In pursuance of Spain's promise autonomous administrations were established in some of the larger cities, but subsequent developments demonstrated the futility of such action and the failure of the newly formed governments. The revolution dragged on, sapping the substance of the people as it progressed and rendering destitute the poorer classes. Crimes were committed on every hand, while desolation and disorder reigned.

To add to the horrors and atrocities of the struggle, the Captain-General of the island, Valeriano Weyler, Feb. 16, 1896, issued an edict initiating a cruel policy which he called "reconcentration." By Weyler's order the agricultural inhabitants were herded into the cities, their lands laid waste, and their homes destroyed. Crowded within the cities and lines of the Spanish armies, the non-combatant men, women, and children died from disease and starvation in untold numbers. Reports of the conditions in Cuba were from time to time brought to the United States, and the public mind throughout the country was greatly stirred. While this state of affairs existed the second-class battleship *Maine*, which had been dispatched to Cuban waters on a friendly mission, was on the night of Feb. 15, 1898, blown up in the harbor of Havana. In this catastrophe two officers and 258 sailors and marines perished (page 6295). A thorough investigation of this disaster was immediately instituted, and at its close a report was made to the effect that the destruction of the ship had been wrought by an explosion from without, produced by a submarine mine (page 6281).

The tension of the public mind, already great, was increased by this report and by the suspicion in the minds of many as to the cause of the disaster. The people could not much longer be held in check, and to those who were even casually observant it was apparent that a crisis in our affairs with Spain was imminent. Congress was in session and unanimously appropriated \$50,000,000 for the national defense. The coasts of the United States were poorly defended, the Navy needed ammunition and supplies and an increase in vessels, while the Army required enlargement in men and munitions. April 6 the continental powers, through their envoys in Washington, gave expression to the hope that an amicable adjustment of the impending troubles might be reached. The President replied to their representations, and with them shared the hope that peace might be preserved. The President in his message of April 11, 1898, announced the failure of diplomacy to bring about a satisfactory settlement of the difficulties and recommended to Congress forcible intervention (page 6281).

April 19, after refusing to recognize the government of Cuba, Congress with much unanimity declared the island independent of Spain and authorized forcible intervention (page 6297). The resolutions met with the approval of the Executive, and he signed them the next day. Spain regarded this act on the part of the United States as "equivalent to an evident declaration of war." The ministers of the two countries were recalled and diplomatic relations terminated. April 22 a blockade of Cuban ports was proclaimed (page 6472), and the following day a call was made for 125,000 volunteers (page 6473). A formal declaration of war was recommended by the Presi-

dent, and April 25 Congress declared the existence of war from and including April 21. Due notification of the existence of war was given to the various governments April 25, nearly all of which immediately responded with proclamations of neutrality.

May 25 there was a second call for volunteers, 75,000 in number (page 6477). Like the initial call for 125,000, this was responded to without delay. The regular army was largely increased, as was the enlisted force of the Navy. More than 100 vessels were added to the Navy by purchase. The coast defenses were rapidly strengthened, additional guns placed in position, and an auxiliary navy was created. About 1,500 submarine mines were placed at the most exposed points on the coast. Cable, telegraph, and telephone lines were constructed in many places. In addition to the national defense fund of \$50,000,000, which was expended in large part by the Army and Navy, Congress provided further means for prosecuting hostilities by the war revenue act of June 13, authorizing a 3 per cent popular loan not to exceed \$400,000,000 and levying additional imposts and taxes. Of the authorized loan \$200,000,000 was offered and promptly taken, the subscriptions far exceeding the call.

The first encounter occurred April 27, when a detachment of the blockading squadron made a reconnaissance in force at Matanzas, Cuba, shelled the harbor forts and demolished several new works in course of construction. The next engagement occurred May 1, at Manila, in the Philippine Islands. The American squadron at Hongkong, under Commodore George Dewey, had been instructed to proceed to the Philippine Islands and to capture or destroy the formidable Spanish fleet assembled at Manila. At daybreak of May 1 Dewey's fleet, successfully passing over the submarine mines, entered Manila Bay and after a few hours' engagement destroyed the entire fleet of ten warships and one transport, captured the naval station and forts at Cavite, and completely controlled the bay of Manila, with the ability to take the city at will. On the American side not a life was lost, the wounded numbering only seven, and not a vessel was materially injured. The Spanish loss in killed and wounded exceeded 400. Thus the first great battle of the war was a victory of the United States, magnificent in effect and extraordinary in detail, standing unequalled in the achievements of naval warfare. The effect of this remarkable victory gave a prestige of invincibility to the United States which, though long deserved, had never been appreciated by the great naval powers of the earth. Reinforcements, under Maj.-Gen. Wesley Merritt, were hurried to the Philippine Islands and firmly established within sight of Manila, which lay helpless before the American guns. The first expedition sailed from San Francisco May 25 and arrived off Manila June 30. Other expeditions soon followed, until the total force landed at Manila consisted of more than 15,000 officers and men.

In the meantime, large forces were assembled at various points along the coast of the United States to invade Cuba and Puerto Rico. San Juan, Puerto Rico, and the forts at the entrance to Santiago Harbor, Cuba, were shelled by the American squadrons, but none of the attacks had any appreciable result. On the night of June 3, in an attempt to blockade the mouth of Santiago Harbor, Assistant Naval Constructor Richmond P. Hobson, accompanied by seven men from the American squadron, sank the collier *Merrimack* across the narrow channel. This unparalleled act of heroism

thrilled not only the hearts of the American people, but challenged the admiration of the world. Under the protection of a portion of the American fleet a landing of 600 marines was effected at Guanatanamo Bay on June 10. This port was taken and held after severe fighting by the marines, who were the first organized forces of the United States to land in Cuba. By June 16 additional forces had been landed.

June 20 the advance of the American army under Maj.-Gen. William R. Shafter, landed at Daiquiri, about fifteen miles east of Santiago, and the next day began the movement against the city. The first serious engagement in which the American troops lost heavily occurred at Las Guasimas June 24. By nightfall of that day ground within five miles of Santiago was won. (See Santiago, Battle of.) The outworks of Santiago were taken July 1 after a severe battle, and on the next day El Caney and San Juan were captured after a desperate struggle. The investment of the city was now complete. The naval forces co-operated, shelling the town and the coast forts.

On the following day, July 3, occurred the decisive naval combat of the war. The Spanish fleet under Rear-Admiral Pascual Cervera, which had been confined in the harbor of Santiago for six weeks by the blockading squadron under acting Rear-Admiral William T. Sampson, attempted to escape. The Spanish vessels were intercepted and utterly destroyed by the American fleet under the immediate direction of Commodore Winfield S. Schley, who assumed command during the temporary absence of Rear-Admiral Sampson. The Spanish loss was 600 killed and about 1,400 prisoners, including the admiral.

Spain was unable to recover from the catastrophe, and her efforts upon the ocean virtually ceased. The capitulation of Santiago, which embraced the entire eastern end of Cuba, soon followed. July 17 the American army occupied the city. The number of Spanish soldiers surrendered was 22,000.

An expedition against Porto Rico, consisting of about 3,500 men, under command of Maj.-Gen. Nelson A. Miles, was immediately fitted out, and landed at Guanica July 25. Gen. Miles's force was subsequently increased to about 17,000. With the exception of a few slight engagements, there was no serious resistance, and the middle of August found much of the island in the possession of the American troops.

As early as July 26 Spain made overtures for peace through M. Jules Cambon, the French ambassador at Washington. August 12 the peace protocol was signed, by which hostilities were brought to an end.

August 15, the news of the signing of the protocol not having reached the Philippines, the battle of Manila was fought, and the last scene of the war was enacted when, after a brief assault by the American land and naval forces, the city was compelled to surrender.

The number of military forces engaged by the United States in the war, as reported to the Commissioner of Pensions, was: Regulars, 57,329; militia and volunteers, 223,235; navy, 31,959—total, 312,523.

The total casualties in killed and wounded during the war were—Army, officers killed, 23; enlisted men killed, 257—total, 280; officers wounded, 113; enlisted men wounded, 1,464—total, 1,577. Navy—killed, 17; wounded, 67; died as result of wounds, 1; invalided from service, 6—total, 91. In the entire campaign by land and sea the United States did not lose a flag,

gun, ship, or transport, and, with the exception of the crew of the *Merrimac*, not a soldier or sailor was taken prisoner.

August 7 the American troops in Cuba began to embark for home, and the entire force was returned to the United States by August 24, after an absence of only two months. A treaty of peace was signed at Paris by the commissioners of the two countries Dec. 10, 1898. It was ratified on the part of the United States Feb. 6, and on the part of Spain March 19, 1899. By the treaty it was provided that Spain relinquish all claim of sovereignty over and title to Cuba; that Puerto Rico and other West Indian Islands of Spain, one island in the Ladrones, and the entire Philippine group be ceded to the United States; and that Spain be paid \$20,000,000. The ratification of the two Governments were exchanged in Washington April 11, 1899, and on the same day President McKinley issued the following proclamation: "Whereas a treaty of peace between the United States of America and Her Majesty the Queen Regent of Spain, in the name of her august son, Don Alfonso XIII, was concluded and signed by their respective plenipotentiaries at Paris on the 10th day of December, 1898, the original of which, being in the English and Spanish languages, is word for word as follows: [Here the full text of the treaty is inserted.] And whereas the said convention has been duly ratified on both parts and the ratifications of the two Governments were exchanged in the city of Washington on the 11th day of April, 1899: Now, therefore, be it known that I, William McKinley, President of the United States of America, have caused the said convention to be made public, to the end that the same and every article and clause thereof may be observed and fulfilled with good faith by the United States and the citizens thereof."

Minister of United States to Spain, mentioned, 6257, 6284, 6286.

Withdrawal of, 6312.

Monument to soldiers killed in, at Arlington, 6706.

Neutrality preserved by foreign powers in, discussed, 6312.

Newcomb, Frank H., Commander of the *Winstow* rescued by the *Hudson*

in command of, at Cardenas, thanks of Congress to, recommended, 6304.

Officers and men compelled to remain in United States, tribute to, 6320.

Oregon, voyage and arrival of the, from San Francisco discussed, 6316.

Otis, Ewell S.—

Directed to avoid conflict with Philippine insurgents, 6584.

Directed to send troops to Iloilo, 6583.

Member of the Philippine Commission, 6584.

Suggestions from, regarding force, etc., for Philippine Islands requested by President, 6579.

Peace Commissioners on part of United States, 6322.

Peace negotiations discussed, 6320.

Protocol discussed, 6321, 6187.

Philippine Islands—

Cable communication with, recommended, 6354.

Commissioners to, and duties of, set forth by President, 6584.

Contributions to be levied upon, (See Military occupation of, *post.*)

Expeditions to, under command of Gen. Merritt, 6315.

Force, etc., for, suggestions from commanders regarding, requested by President, 6580.

Gen. Otis directed to avoid conflict with insurgents, 6584.

Government for. (See Military occupation of, *post.*)

Grants of public or corporate rights in, order regarding, 6583.

Military occupation of, by United States, and government for, orders regarding, 6569, 6571, 6572, 6581.

Joint occupation with insurgents not to be permitted, 6581.

Troops to be sent to Iloilo, order regarding, 6583.

Vessels of Spain from, discriminating duties on, suspended by proclamation, 5155.

Victory of—

American squadron over Spanish fleet in bay of Manila, discussed, 6297, 6315.

Commander of American squadron—

Appointed acting rear-admiral, 6297, 6568.

Sword to be presented to, and medals to men under, 6302.

- Thanks of Congress to, and men under, 6298.
 Recommended, 6297.
 Reply of, 6302.
 Thanks of President tendered, 6568.
 Referred to, 6297.
 Commander of the *Hugh McCulloch*, recognition of services of, recommended, 6305.
 American Squadron and land forces at Manila discussed, 6319.
 Thanks of President tendered, commanders and men, 6579.
 Popular loan for prosecuting, authorized by Congress, 6314.
 Postal communication with Santiago, order regarding, 6577.
 Postal service in, discussed, 6344.
 Powell, Joseph W., to be made ensign for attempting to rescue force of the *Merrimac*, 6306.
 Preparations for, by United States discussed, 6309, 6313.
 Privateering not to be resorted to by United States proclaimed, 6474.
 Proclamations regarding, 6472, 6473, 6474, 6477, 6481, 6487, 6491.
 Protection of American interests in Spanish jurisdiction confided to British representatives discussed, 6331.
 Puerto Rican campaign discussed, 6318.
 Red Cross work accomplished by, in, discussed, 6284, 6308, 6320.
 Red Cross, International, proposition of Switzerland to extend compact of, in, discussed, 6336.
 Reid, Whitelaw, peace commissioner on part of United States, 6322.
 Return of troops to United States discussed, 6319.
 Roosevelt, Theodore, in, 6637.
 Sampson, William T.—
 Member of military commission to Cuba, 6322.
 Sinking of the *Merrimac* by Lieut. Hobson, report of, on, discussed, 6305.
 Spanish fleet attempting to escape from Santiago Harbor destroyed by American squadron in command of, 6317. (See Enc. Art., Santiago Harbor, Battle of.)
 Thanks of President tendered, 6573.
 San Juan, Cuba, captured by American troops, 6317.
 San Juan, Puerto Rico, shelled by American fleet, 6316.
 Santiago—
 American army under Gen. Shafter lands near, 6317.
 British consul at, confiding of American interests to, and death of mentioned, 6331.
 Movement against, and subsequent capitulation of, discussed, 6317.
 Thanks of President tendered, commander and men, 6574, 6577.
 Postal communication with, order regarding, 6577.
 Santiago Harbor—
 Shelled by American squadron, 6316.
 Spanish fleet under Admiral Cervera in, 6316.
 Attempting to escape destroyed by American squadron, 6317. (See Enc. Art., Santiago Harbor, Battle of.)
 Thanks of President tendered officers and men of American squadron, 6573.
 The *Merrimac* sunk in, by Lieut. Hobson, 6305, 6316.
 Naval Cadet Powell to be made ensign for attempting to rescue force of, 306.
 Thanks of Congress to Lieut. Hobson and promotion of, recommended, 6306.
 Schley, Winfield S.—
 Member of military commission to Puerto Rico, 6322.
 Santiago Harbor shelled by American squadron under, 6316.
 Spanish fleet attempting to escape from Santiago Harbor destroyed by American squadron under direction of. (See Enc. Art., Santiago Harbor, Battle of; also, 6317.)
 Schwan, Theodore, Puerto Rican expedition reenforced by brigade of, 6318.
 Shafter, William R.—
 Army under, lands, near Santiago, 6317.
 Operations of, around and subsequent capitulation of Santiago, 6317.
 Thanks of President tendered, 6574, 6577.
 Signal Corps, services of, discussed, 6314.
 Suspension of hostilities proclaimed, 6487.
 Thanksgiving and prayer, address of President to people for, 6573.
 Thanksgiving proclamation of President McKinley, 6491.
 Treatment to be accorded foreign vessels by United States proclaimed, 6477.
 Discussed, 6312.

Treaty of peace proclaimed (see
Enc. Art., Spanish-American War),
6356.

Vessels of United States in Great
Lakes granted facilities by Cana-
da for returning, 6331.

Volunteers called for by proclama-
tion, 6173, 6177.

Discussed, 6296, 6312, 6313.

Mustered out, referred to, 6322.

To be mustered out, 6342.

Wade, James F., member of military
commission, to Cuba, 6322.

War-revenue act discussed, 6314.

Wheeler, Joseph, operations of cav-
alry division under, around Santi-
ago, discussed, 6317.

Wilmington, attempts of the, to si-
lence batteries at Cardenas, 6302,
6316.

Wilson, John M., Puerto Rican ex-
pedition reinforced by division of,
6318.

Winslow disabled in conflict in Car-
denas Bay, 6304, 6316.

Rescued by the *Hudson*, 6304.

Thanks of Congress to officers
and men of, recommended,
6304.

Woodford, Stewart L., minister to
Spain, mentioned, 6257, 6284,
6286.

Withdrawal of, 6312.

Young, Samuel B. M., operations of
brigade under, around Santiago
discussed, 6317.

Spanish Main, blockade of ports of, re-
ferred to, 776.

Spanish Milled Dollars referred to, 239.

Spanish Milled Doubloons referred to,
304.

Spanish West Indies referred to, 4113.

Speaker.—The title of the presiding officer
of the House of Representatives. The Con-
stitution provides that "the House of Rep-
resentatives shall choose their Speaker and
other officers." It is doubtful, however, if
the framers of the Constitution contem-
plated vesting the Speaker with the power
he now enjoys. The system of legislation
by committees which has gradually grown
up, carrying with it the prerogative of the
Speaker to name them, has greatly ex-
tended his influence. The first Speaker of
the modern sort—more of a leader of the
House than a presiding officer—was Henry
Clay. As the representative of the House
the Speaker presides over the deliberations
of that body, appoints its committees, su-
pervises its journal, certifies to the amount
of compensation due its members, signs the
bills, resolutions, warrants, subpoenas, etc.,
and has the right, as a member, to partici-
pate in debate after calling another mem-
ber to the chair. The Speaker rarely avails
himself of this privilege. He is chosen by
the House from among the members.

Following is the list of the Speakers of
the House: Frederick A. C. Muhlenberg,
Pennsylvania; Jonathan Trumbull, Con-
necticut; Jonathan Dayton, New Jersey;

Theodore Sedgwick, Massachusetts; Na-
thaniel Macon, North Carolina; Joseph B.
Varnum, Massachusetts; Henry Clay, Ken-
tucky; Langdon Cheves, South Carolina;
John W. Taylor, New York; Philip P. Bar-
bour, Virginia; Andrew Stevenson, Vir-
ginia; John Bell, Tennessee; James K. Polk,
Tennessee; Robert M. T. Hunter, Virginia;
John White, Kentucky; John W. Jones, Vir-
ginia; John W. Davis, Indiana; Robert C.
Winthrop, Massachusetts; Howell Cobb,
Georgia; Linn Boyd, Kentucky; Nathaniel
P. Banks, Massachusetts; James L. Orr,
South Carolina; William Pennington, New
Jersey; Galusha A. Grow, Pennsylvania;
Schuyler Colfax, Indiana; James G. Blaine,
Maine; Michael C. Kerr, Indiana; Samuel
J. Randall, Pennsylvania; J. Warren
Keifer, Ohio; John G. Carlisle, Ken-
tucky; Thomas B. Reed, Maine; Chas. F.
Crisp, Georgia; David B. Henderson, Iowa;
Joseph G. Cannon, Illinois; Champ Clark,
Missouri.

Special Agents, Treasury Department.

—These officials investigate the work of the
customs collectors, and make other investi-
gations relative to the customs service of the
United States. (See list of references under
Customs.)

Special-Delivery Stamps:

Discussed, 4836, 5881, 5971.

Special Session Messages of President—

Adams, John, 223.
Cleveland, 5833.
Hayes, 4404, 4472.
Lincoln, 3221.
McKinley, 6244.
Madison, 453, 511.
Pierce, 2927.
Roosevelt, 6741.
Taft, 7379.
Tyler, 1893.
Van Buren, 1451.
Wilson, 7871.

Specie Circular.—An order drafted by Sen-
ator Benton, of Missouri, and issued by
the Secretary of the Treasury July 11,
1836, by order of President Jackson (6329).
It was designed to check speculative pur-
chases of public lands. In it the officials
were directed to receive nothing but gold
and silver in payment for public lands.
The circular was issued in opposition to
the sentiment of Congress, which at the
next session passed a bill to rescind the
order, but Jackson defeated the bill by a
pocket veto. The President's action aroused
much indignation and, it is claimed,
hastened the panic of 1837.

Specie Payments.—The United States sus-
pended specie payments Jan. 1, 1862, and
Congress authorized the issue of large
quantities of United States notes to be a
legal tender. In this action the Govern-
ment had been preceded by most of the
banks of the country, following the ex-
ample of the New York banks. Jan. 14,
1875, the act authorizing the resumption
of specie payments of Government con-
tracts to begin Jan. 1, 1879, was approved
by President Grant in a special message
(4268). To this end the purchase of bul-
lion and the manufacture of subsidiary
coin was at once begun. The mints were
run overtime to supply the demand for
specie, and resumption became an accom-
plished fact.

Specie Payments:

Act providing for resumption of, approved and discussed, 4268.

Banks refused to pay Government demands in specie, 1810.

Discussed by President—
Cleveland, 6073.

By Chile discussed, 6059.

Discussed, 3879, 4379, 4510, 4567.

Recommended, 3983, 4061, 4102, 4239, 4247, 4301, 4310, 4413.

Suspension of, by banks discussed, 1541, 1751, 1757, 1777, 1789, 3330.

Specific Duty.—A duty on imported goods, based on the weight or quantity thereof.

Spies.—In war-times, a spy is a person who, in disguise or not wearing distinctive marks of the belligerent with whom he is connected, mingles with the enemy within the enemy's lines of fortifications or other territory in order secretly to procure information for his own country. Because of the fact that the status of spies had long been indefinite and because of the penalty of death involved, a series of regulations drawn up by The Hague tribunal indicates precisely that no person shall be considered a spy who is not wearing a disguise, who is carrying messages openly, or who obtains information concerning the enemy in air-craft. The regulations further provide that to be considered a spy a person must be travelling, (a) under false pretenses, (b) within territory occupied by the enemy, (c) for the proved purpose of obtaining information of use to his own forces. The regulations provide further that no person shall be convicted as a spy without fair trial or after he has rejoined the forces with which he is connected. In times of peace, a spy is a person who secretly endeavors to obtain information concerning the defenses, resources, etc., of a country in order to supply another country with such information. (See Espionage Law.)

Spitzbergen Islands, negotiations for adjusting claims in, 7670.

Spy Bill. (See Espionage Law.)

Spoils System.—The policy of bestowing public offices upon members of the party in power as rewards for political services. These official rewards once secured, the beneficiaries found it incumbent upon them to assist in keeping in power the party to which they owed their positions not only by a strict attention to the duties of their offices, but also by making friends and votes for their superior officer. Under the spoils system, it is charged, official duties are often made secondary to partisan obligations. This system is not confined to American politics, but is carried on in England, where Parliament has created a patronage secretary, who takes charge of the apportionment and keeps regular accounts with the members of Parliament of the positions which have been filled upon their recommendation. In the United States the system developed first in New York and Pennsylvania. Tammany Hall made effective use of the system in

its fight against the Clintons in the first quarter of the present century. It was extended to state politics by the "Albany Regency," established by Martin Van Buren in 1818. It was not until Jackson's time, however, that it became a feature of Federal politics. The spoils system derived the name commonly applied to it from a sentence used in a speech made by Senator William L. Marcy, of New York, while urging the Senate to confirm the nomination of Martin Van Buren as minister to England. In defense of the charge against Van Buren that he had introduced the custom of removal from office for opinion's sake, Mr. Marcy, speaking for the Democrats of New York, declared that "they see nothing wrong in the rule that to the victor belongs the spoils of the enemy." It has since been a regular feature of American politics in every Administration, tempered of late by the provisions of the civil-service act of 1883. (See also Civil Service.)

Spoliation Claims (see also France, claims against discussed):

Act providing for—

Ascertainment and satisfaction of, vetoed, 2316.

Ascertainment of, vetoed, 2840.

Spoliations (see also Alabama Claims; the several powers, claims against; Vessels, United States, seized):

Discussed by President—

Adams, John, 237.

Jefferson, 371, 383, 413.

Monroe, 765.

Washington, 138.

Spooner Act, mentioned, 7022.

Spot Resolutions.—When President Polk sent a message to Congress announcing that American citizens had been killed by Mexicans on American soil, and asked for a formal declaration of war, Abraham Lincoln, in the House of Representatives, introduced resolutions requesting the President to indicate the exact spot on American soil where the killing had taken place. Thus the name "Spot Resolutions." The results of Polk's message were negative, for the declaration of war was not voted.

Spottsylvania Court-House (Va.), Battle of.—After 2 days' fighting in the Wilderness, south of the Rapidan River, in Virginia, Grant attempted to turn Lee's right flank and advance toward Richmond by way of Spottsylvania Court-House. This resulted in a series of battles. Lee discovered the movement of Grant's army and reached Spottsylvania first. By May 9, 1864, Grant had his army concentrated near Spottsylvania. Hancock commanded the right, Warren the center, and Sedgwick the left. The latter was killed while placing his artillery on the 9th, and Wright succeeded him in command of the Sixth Army Corps. May 10 and 11 there was desultory fighting, skirmishing, and maneuvering for positions. Grant's losses during the 10th are supposed to have exceeded 10,000 men, and Lee's are also supposed to have been severe. The morning of May 12 opened with an advance by Hancock's column, which surrounded and captured with the salient an entire division (Gen. E. B. Ward Johnson's) of 3,000 Confederates, including 2 generals and between 30 and 40 guns. The fighting of this day was as severe as any during the war. Lee made five

furious assaults in quick succession, with the view of dislodging Hancock and Wright from the captured salient. From dawn till dusk the battle raged. The Federal assault on the Confederate line was checked. It was renewed without success on the 18th. After several days of maneuvering and having received reinforcements enough to make up for his losses, Grant, on the 20th and 21st of May, moved southward toward the North Anna River. The Federal losses in the battle of Spotsylvania Court-House, including the conflicts at Todd's Tavern, Corbin's Bridge, Alsop's Farm, Laurel Hill, Po River, Ny River, the angle of the salient, Piney Branch Church, Harris's Farm, and Guinea's Station, between May 8 and 21, 1864, were officially reported as 2,725 killed; 13,416 wounded, and 2,258 missing, a total of 18,399. The Confederate losses, only partially reported, were (Ewell's, Johnson's, and McGowan's divisions), 4,001 killed and wounded.

Springfield (N. Y.), Battle of.—June 6, 1780. Generals Sterling, Knyphausen, Mathews, and Tryon left Staten Island with 5,000 men to attack Washington's army at Morristown, N. J. Sterling was killed and Knyphausen took command. He advanced to within half a mile of Springfield, harassed all the way by the settlers and militia. Sir Henry Clinton returned to New York on June 17 from Charleston, S. C., and prepared to join Knyphausen. On June 23 the British advance was made in two columns. The American outposts were forced back upon Springfield, which the British burned, and then retreated to Staten Island. The British loss amounted to about 150, the American to 83.

Springfield, Ohio, act to establish port, of delivery at, vetoed, 5002.

Squadron:

Squier, E. George, treaties with Nicaragua and San Salvador concluded by, 2572.

Squin-ah-mish Indians. (See Indian Tribes.)

Staff of Army. (See Army.)

Stalwart.—A term embraced by certain members, or groups of members, of the Republican Party toward the latter part of the nineteenth century in the assumption of principles which they believed to be sturdy, or stalwart. Afterwards, in derision, the term was hurled back at them by their opponents as denoting lack of progress. (See Stand-Patters.)

"Stalwarts."—A term applied to the partisans who opposed the "Half-Breeds" (q. v.). The "Stalwarts" were opposed to the withdrawal of troops from the Southern States, and favored the Spoils System (q. v.) as against the Civil Service. When Garfield appointed a Collector of the Port of New York in defiance of the traditional method of first having a recommendation from the Senior Senator of the State of New York, Conkling, the Senior Senator from that state, resigned, as did also Platt, the Junior Senator. The bitterness engendered between the "Stalwarts" and the "Half-Breeds" may have been largely responsible for the assassination of Garfield.

Stamford Harbor, Conn., survey of, referred to, 1043.

Stamp Act.—An act of the British Parliament passed in 1765 and put into effect in the American Colonies Nov. 1 of that year. It levied on British subjects in America specific sums for each of the common transactions of business. Deeds, bonds, notes of hand, indentures, insurance policies, leases, contracts of sale, etc., were not to be enforced by courts unless written on stamped paper bought of the officers of the Crown. Without stamped wills testamentary dispositions would be void; without stamped receipts debts could not be acquitted; vessels at sea without clearances written on stamped paper were liable to seizure and confiscation if they fell in with one of the King's ships; only stamped newspapers could be exposed for sale; without stamped certificates marriages could not lawfully be contracted; unstamped writs and executions had no force or effect; in short, the American citizen must have been daily paying money into the British treasury at its stamp office or in respect to much of the protection which society undertakes to afford he was an outlaw. Under this act business was suspended. The people absolutely refused to use the stamps. Benjamin Franklin presented a petition of the colonists to the House of Commons, and on March 18, 1766, the stamp act was repealed. The agitation resulting from the act was one of the leading causes in effecting the Revolution.

Stamp-Act Congress.—A body which met at New York Oct. 7, 1765, composed of delegates from all the Colonies except Virginia, North Carolina, New Hampshire, and Georgia. There were 26 members, including 4 from New York, 2 each from Rhode Island and Delaware and 3 each from Massachusetts, Connecticut, New Jersey, Pennsylvania, Maryland and South Carolina. Timothy Ruggles, of Massachusetts, was chosen president. The manifestoes issued by this congress were "A Declaration of the Rights and Grievances of the Colonists of America," an address to the King, a memorial to the House of Lords, and a petition to the House of Commons, all of a loyal and respectful tone. The congress adjourned Oct. 25.

Stamps. (See Division of Stamps.)

Stand-Patters.—A term applied to members of political parties who can not be induced to subscribe to any change of policy or to progress. The term became used especially in the administration of Taft to describe those Republicans who opposed changes in the tariff and in other methods of government which were demanded by the more radical element among the Republicans.

Standard Oil Case.—Charges of dishonesty and unfair business methods have frequently been made against the Standard Oil Company. These were discredited or silenced by technical denials until it was found that the Standard Oil Company was trying to gain possession of the new and rich oil fields of Eastern Kansas and Northern Oklahoma, which had been opened during the winter of 1904-5. Many independent companies had been formed, both for producing oil and refining it, and the savings of thousands of people were invested in the business. It soon became apparent however, that the Standard Oil Company was endeavoring to control the field. Freight rates were so advanced that it was impossible to ship oil to refineries at Kansas City, and the producers were told that if they sold any oil to independent refiners, the Standard would refuse to take any surplus they might have. This seemed to indicate that the Standard was determined to crush all business rivals, as it was charged with having done in the Eastern oil fields. Congressman Campbell, of Kansas, introduced a resolution on the subject and in February, 1905, an investigation was ordered by the Bureau of Corporations. Commissioner Garfield submitted a report May 17, 1906. This showed that the Standard Oil Company had an advantage over all independent companies in the shipment of oil. The report says: "The Standard Oil Company has habitually received and is now receiving, secret rates and other unjust and illegal discriminations. Many of these discriminations were clearly in violation of the interstate commerce laws, and others, whether technically illegal or not, had the same effect upon competitors. These discriminations have been so long continued, so secret, so ingeniously applied to new conditions of trade, and so large in amount as to make it certain that they were due to concerted action by the Standard Oil Company and the railroads."

A second investigation of the Standard Oil Company was undertaken by the Interstate Commerce Commission at the request of Congress, and their report was submitted Jan. 28, 1907. It stated: "The sworn testimony before us abundantly confirms the conclusions reached by the Commissioner of Corporations. The ruin of competitors has been a distinct part of the policy of the Standard Oil Company in the past, systematically and persistently pursued. It has maintained a system of espionage over the shipments of its rivals; it has ruined competitors by means of local competition, that is by reducing prices in the field of operation of its rivals, while maintaining prices elsewhere; it has pursued the policy of molding public opinion by purchasing space in newspapers and printing innocent looking articles setting forth the benefits conferred by the Standard Oil Company; it has induced the railroads to purchase all their lubricating oil from it at a double price, thus securing a profit very much like a rebate; it has paid employees of its rivals for information, and has sold different grades of oil out of the same barrel."

Herbert Knox Smith, Commissioner of

Corporations, presented a report May 20, 1907, dealing mainly with the Standard Oil pipe lines. It showed these lines to consist of 40,000 miles of trunk lines and feeders; and it pointed out that, while the Standard Oil Company had no monopoly in the production of oil, it transported through its pipe lines 90 per cent of the oil from the Pennsylvania, Indiana, and Ohio fields, and 98 per cent of that from the Kansas-Oklahoma fields. Its monopoly was also shown to consist in the fact that it refined about 86 per cent of all the oil refined in the United States. The extent of these pipe lines was believed to prevent the construction of rival pipe lines. Commissioner Smith estimated that a charge of 20 cents per barrel would cover the cost of transportation from Lima, Ohio, to the seaboard, and yield 10 per cent on the investment. The actual charge was shown to be 52½ cents per barrel.

Early in 1907 the Attorney-General of the United States brought suit against the Standard Oil Company of Indiana, in the District Court at Chicago, under the Elkins law forbidding discrimination and the giving of rebates by common carriers engaged in interstate traffic. The action was based on the report of Commissioner Garfield, mentioned above, which related to the shipments of oil from the great refineries of Whiting, Indiana, to the southwestern market, by way of East St. Louis, Illinois, where the oil came into competition with the product of the Kansas and Oklahoma fields.

This region was reached by three competing railroads, the Chicago and Eastern Illinois, the Chicago, Burlington and Quincy, and the Chicago and Alton. Each road had filed with the Interstate Commerce Commission and kept posted at its freight offices a class rate of 18 cents per 100 pounds, but their books showed that they had given the Standard Oil Company a commodity rate on oil of 6 or 6½ cents per hundred. Each company had its own methods of concealing the true charge. Commissioner Garfield stated that the "whole scheme of the 6 cent rate, including both the failure to file tariffs with the Interstate Commerce Commission and the secret methods of billing, were devised at the suggestion and with the knowledge of the Standard Oil Company and primarily for the purpose of concealing the extraordinarily low rates from its competitors."

The defense plead that "these rates were not solicited nor accepted knowingly with the intention of violating the law; that the law did not forbid a shipper to take directly from a carrier a rate less than the published rate, the purpose of the law being to prevent indirect methods and secret devices; the company could have secured rates as low as those accepted over the Chicago, Burlington and Quincy or over the Chicago and Eastern Illinois, and that the Elkins law, under which the suit was brought, was nullified by the Hepburn law, subsequently passed." The case was based specifically on the transit of a car of oil from Whiting, Indiana, over the Chicago and Alton Railroad, at the six-per-cent rate, April 13, after deliberating two hours, the jury returned a verdict of guilty on 1462 counts. Before determining the amount of the fine, Judge Landis demanded evidence of the actual ownership of the Standard Oil Company of Indiana. This was shown to be the Standard Oil Company of New Jersey. Judge Landis then, on August 3, imposed the maximum fine of \$20,000,000 on each count, an aggregate of \$20,250,000. The defendant company appealed the case to the Circuit Court of Appeals for the seventh circuit, and on July 22, 1908,

Judge Peter L. Grosscup, of Illinois, two other judges concurring, handed down an opinion reversing the finding of the District Court, holding that the court below erred in its ruling that a shipper may be convicted of re-accepting a concession from the lawful published rate, even though it was not shown that the shipper knew what the lawful published rate was; its ruling that the number of offenses is the number of carloads of property transported, irrespective of the question whether each carload is the whole or only a part of a single transaction; and its ruling that the largeness of the fine imposed was due to the effect to reach and punish a party that was not before the court.

Judge Grosscup declared the fine imposed by Judge Landis "an abuse of judicial discretion." The validity of the courts' reasoning was universally discussed. President Roosevelt pronounced the ruling of Judge Grosscup "a gross miscarriage of justice." The Government applied to the Circuit Court of Appeals for a rehearing, which was denied, and on Nov. 20, 1908, Attorney General Bonaparte petitioned the United States Supreme Court for a writ of certiorari. This petition was dismissed Jan. 4, 1909, leaving the case to be retried in the District Court.

Judge McCall, in the United States Circuit Court of Jackson, Tenn., Nov. 17, 1910, instructed the jury to bring in a verdict of not guilty.

Standard Oil Corporation, statements made by, declared untruthful, 7133.

Standard Time.—According to the standard time, which was adopted by agreement at 12 o'clock on November 18, 1883, by all the principal railroads of the United States, the continent is divided into five longitudinal belts, and a meridian of time is fixed for each belt. These meridians are fifteen degrees of longitude, or one hour's time apart. The time divisions are called intercolonial time, eastern time, central time, mountain time, and Pacific time. Eastern Maine, New Brunswick and Nova Scotia use the sixth meridian; the Canadas, New England, the Middle States, Virginia and the Carolinas use the seventy-fifth meridian, which is that of Philadelphia; Alabama, Georgia, Florida, Texas, Kansas and the larger part of Nebraska and Dakota use the nineteenth meridian, which is that of New Orleans; the territories to the western border of Arizona and Montana go by the time of the one hundred and fifth meridian, which is that of Denver; and the Pacific States employ the one hundred and twentieth meridian. In passing from one time-belt to another a person's watch will be an hour too fast or too slow, according to the direction in which he is traveling. This new system, which has reduced the time standards from fifty-three to five, was suggested by Professor Abbe, of the Signal Service Bureau at Washington, and was elaborated by Dr. A. P. Barnard, of Columbia University, New York.

Standards, Bureau of. (See Bureau of Standards.)

Star Chamber.—Used as an adjective before "Proceeding," "Conference," "Deliberation," or the like, the term means that the session is secret and, presumably, for some selfish purpose,—not for the interest of the public.

Star Routes.—Star Routes are those mail routes of the United States Government on which, owing to lack of railroad or

steamboat facilities, the mail is carried on horseback or wagons. They are called star routes because in the route books of the Post-Office Department they are marked with three groups of four stars each, the groups being intended to signify "celerity, certainty, and security" in this method of carrying the mail. (See also Postal Service.)

Star Route Trials.—Early in 1881 vague rumors were in circulation of extensive fraud in this service. It was said that there was a "ring" to defraud the government. Included in it were some of the large contractors, the Second Assistant Postmaster-General, Thomas J. Brady, some subordinates in the department, Senator Stephen W. Dorsey, of Arkansas, and others. Brady resigned April 20, 1881. Proceedings in one of the principal cases were begun against the conspirators, but they were dismissed on account of irregularity in the form of the action. Early in 1882 several persons were arrested for furnishing fraudulent bonds on the bids for service, and indictments were found against Brady, Stephen W. Dorsey, John W. Dorsey, John M. Peck and John R. Miner, who had made the bids; H. M. Vaile, a sub-contractor; M. C. Rerdell, S. W. Dorsey's secretary; Turner, a clerk in Brady's office; and against one of the principal contractors. The method by which, as charged, the government was defrauded consisted in first obtaining the contracts for the routes, and in subsequently having the payments vastly increased, in compensation for additional mail trips per week, and faster time on each trip. This latter was called "expediting" the route. The Dorsey combination, as the conspirators were popularly called, controlled one hundred and thirty-four Star Routes, on which the original compensation was \$143,169. By increasing the number of trips beyond what the locality required and by "expediting" them, this amount had been increased to \$622,808. On one route the compensation had been increased from \$398 to \$6,133.50; the revenue derived therefrom by the government was \$240.

The cases came up for trial in the District of Columbia, June 1, 1882. The government employed special counsel to aid the district attorney, and the defendants, too, were represented by eminent lawyers. After a protracted trial, the case was submitted to the jury on Sept. 8; as they were not able to agree as to all of the defendants, they were kept out until Sept. 11, on which day the presiding judge, Wylie, deeming an agreement on all the defendants unlikely, accepted the verdict. Peck and Turner were found not guilty; Miner and Rerdell, guilty; as to the Dorseys, Vaile and Brady there was a disagreement. Preparations were at once made for a new trial in the cases in which there had been a disagreement and the motions of the counsel of Miner and Rerdell for a new trial were granted. The second trial began in December, 1882. Rerdell, on this trial, pleaded guilty and turned state's evidence. On June 12, 1883, the case was given to the jury, and on the 14th a verdict of not guilty was rendered. In April, 1883, W. P. Kellogg, ex-Senator from Louisiana, and Brady were indicted for receiving money for services in relation to a Star Route contract. The cases never resulted in a conviction.

At the conclusion of the first of these trials charges of attempted bribery of the jury, both on behalf of the government and of the defense, were made. The foreman of the first jury, Dickson, and another juror, claimed to have been approached on

behalf of the government, and still another juror on behalf of the defense. Before the first trial had ended Dickson had made a sworn statement of the facts in his case, and it was charged that he had used it in the jury-room for the purpose of influencing the verdict. The Department of Justice investigated the cases, and declared its belief that no government officials were involved; it implied that all the attempts had been for the purposes of the defense. Dickson was subsequently indicted for attempting corruptly to influence the jury.

Star Spangled Banner.—A patriotic song written by Francis Scott Key, of Baltimore (q. v.) on the night of Sept. 13, 1814, during the bombardment of Fort M'Henry by the British. Key had gone under a flag of truce to solicit the release of some friends who had been seized by the English Admiral Cochrane during the attack on the city of Washington. Upon Key's arrival the British fleet was about to begin the attack on Fort M'Henry, and though his request for the release of his friends was granted, Admiral Cochrane refused to allow him or his friends to leave the ship before the battle. During the excitement of the bombardment Key wrote the famous song on the back of a letter. It was published and sung at the theatres to the tune of "Anacreon in Heaven."

Stars and Bars.—The flag of the Confederate States of America. The first provisional Senate recommended that "the flag of the Confederate States shall consist of a red field with a white space extending horizontally through the center and equal in width to one-third the width of the flag." The Union was a blue square extending across the upper red and the white stripe, and the blue square nine stars were arranged in a circle. The bars were, by their colors, red and white, intended to express the qualities of courage and purity. The blue field of the union expressed fortitude, and the nine stars represented the number of States in the Confederacy. It was first displayed March 4, 1861, simultaneously with the inauguration of Lincoln, being unfurled over the statehouse at Montgomery, Ala. In 1863, the Stars and Bars too closely resembling the Stars and Stripes, the Confederate Congress adopted a white flag with one blue star in the center. Another variation commonly used was a white field with blue diagonal stripes and white stars, and a piece of fringe at the outer edge. Some of the army corps adopted a battle flag with a red ground, blue diagonal cross, and white stars.

Referred to, 1769.

Repudiation of contracts referred to, 1962.

State, Department of.—This Department of the federal government had its origin in a Committee of Correspondence, which was appointed Nov. 29, 1775, to invoke foreign aid in behalf of the American Colonies.

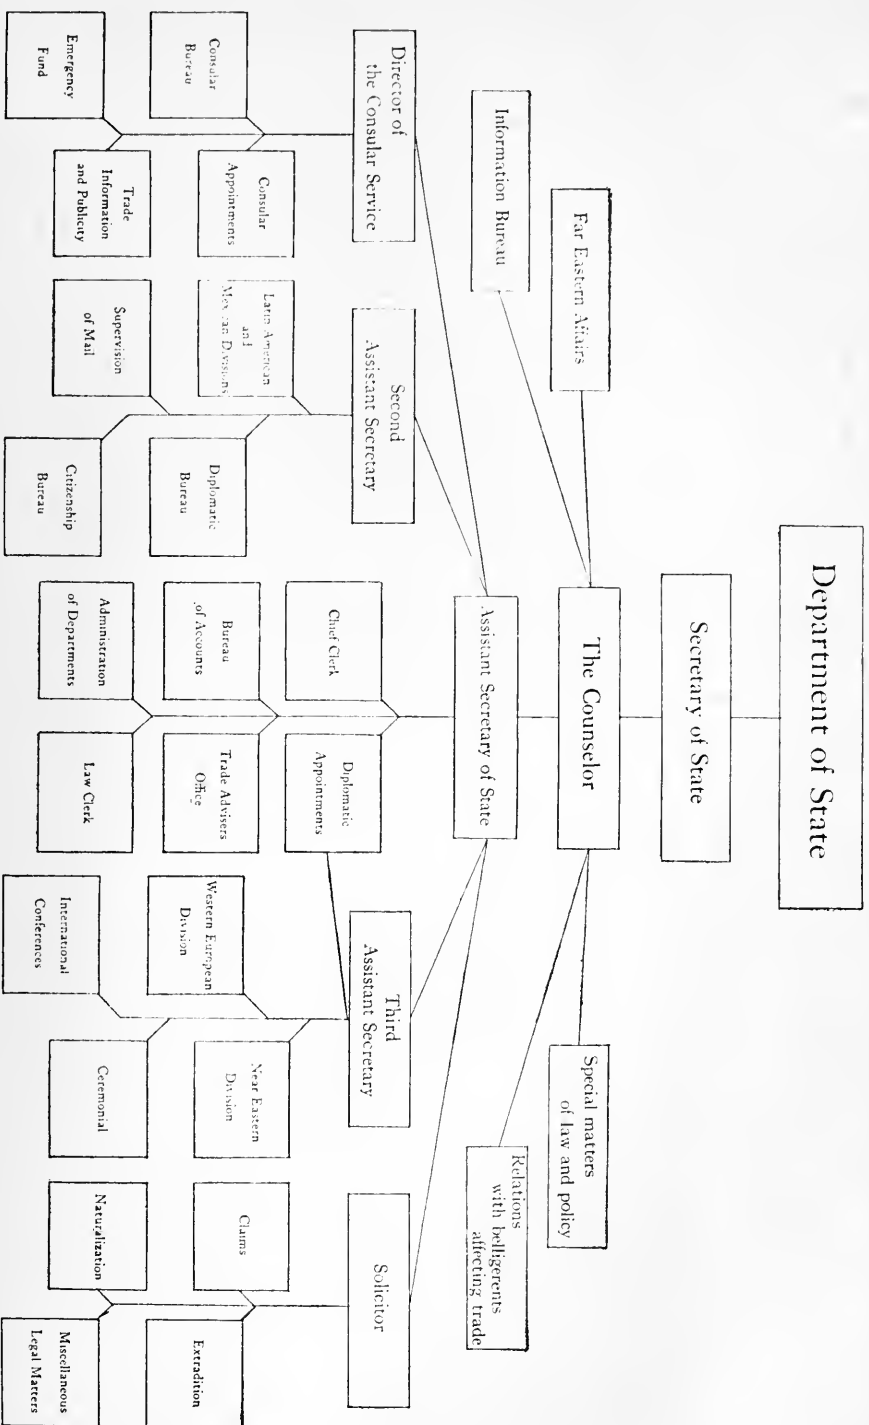

This committee was succeeded by the Committee of Foreign Affairs, which was created by an act of the Continental Congress, April 17, 1777. "A plan for the Department of Foreign Affairs" was reported to Congress in January, 1781, and the Department was organized Aug. 10 of that year; Robert R. Livingston was made Secretary and he filled the position until June 4, 1783. On the retirement of Livingston the Department of Foreign Affairs practically ceased to exist for about a year, Congress managing the foreign relations of the country through committees. Sept. 21, 1784, John Jay was appointed Secretary and the functions of the office were revived.

After the acceptance of the Constitution Congress passed a law entitled "an act for establishing an Executive Department to be denominated the Department of Foreign Affairs." This became a law on July 27, 1789, and John Jay, being in charge of the old Department, was continued temporarily in charge of the new one. The existence of this Department, however, was destined to be brief, for on Sept. 15 following, an act of Congress was approved which provided that "the Executive Department denominated the Department of Foreign Affairs, shall hereinafter be denominated the Department of State, and the principal officer shall hereafter be called the Secretary of State," and on Sept. 26 Thomas Jefferson was made Secretary.

The Secretary of State is charged, under the direction of the President, with duties appertaining to correspondence with the public ministers and the consuls of the United States, and with the representatives of foreign powers accredited to the United States; and to negotiations of whatever character relating to the foreign affairs of the United States. He is also the medium of correspondence between the President and the chief executives of the several states of the United States; he has the custody of the Great Seal of the United States, and countersigns and affixes such seal to all executive proclamations, to various commissions, and to warrants for the extradition of fugitives from justice. He is also the custodian of the treaties made with foreign States, and of the laws of the United States. He grants and issues passports, and exequaturs to foreign consuls in the United States are issued through his office. He publishes the laws and resolutions of Congress, amendments to the Constitution, and proclamations declaring the admission of new states into the Union.

The scope of the department has been so enlarged that it is now the most important branch of the government, though many of its original functions have been transferred to other departments.

According to the law of April 10, 1790, the Department was given charge of the patent business, which it retained until 1849, when the work was given over to the new Department of the Interior. A law passed May 31, 1790, made the Department of State the repository of maps, charts, and books for which copyright might be granted by United States district courts, but in 1859 these records were turned over to the Department of the Interior and later to the Library of Congress, where the business is now conducted. From 1790 until 1856 the Department also cared for the enumeration of the census, but in the latter year that work was given to the Department of the Interior, from which, in 1903, it was transferred to the Department of Commerce and Labor. Territorial affairs were also under

the care of the Department of State until the organization of the Department of the Interior in 1849.

In 1853 an Assistant Secretary of State was provided by law with power to act as Secretary during the latter's absence or during an interregnum. A Second Assistant Secretary was provided for in 1866, and in 1875 the office of Third Assistant Secretary was created.

In 1848 the office of Examiner of Claims was created, whose duties were to examine claims of our citizens against foreign governments and of foreigners against our Government, but when the Department of Justice was formed, in 1870, this office passed under its jurisdiction. In 1891 the title of this office was changed to Solicitor for the Department of State. In 1856 the Statistical Office of the Department of State was established; in 1874 the title was changed to Bureau of Statistics and a year later it was again changed to the Bureau of Foreign Commerce and in 1903 transferred to the Department of Commerce and Labor and made a part of its Bureau of Statistics. The Bureau of Indexes was established in 1870, the Bureau of Accounts in 1873; and the Bureau of Rolls and Library in 1874. Work originally done by the Home Bureau has since been given to the Passport Bureau and the Bureau of Appointments. Other important Bureaus are the Diplomatic Bureau which has charge of all correspondence between the Department and our diplomatic agents abroad and foreign diplomatic agents in the United States, prepares treaties, etc.; and the Consular Bureau. The Bureau of Trade Relations was established in 1903 to manage the work of the consular officials in obtaining reports for the Department of Commerce and Labor. Under this department are also placed the United States Representatives on International Tribunals of Egypt, and the Bureau of American Republics.

For more detailed information of the scope of the activities of the State Department consult the Index references to the Presidents' Messages and Encyclopedic articles under the following headings:

Admission of States.	Great Seal of the United States.
Ambassadors.	United States.
Archives.	Information Bureau.
Assistant Secretary of State.	Latin American and Mexican Divisions.

State Rights and State Sovereignty.—

"State rights" is the doctrine that every state is sovereign within the limits of its own sphere of action, made so by the declared will of the nation as expressed in the Constitution; and that the will of the nation, appropriately manifested, as provided in the Constitution, may change that sphere. "State sovereignty" is the doctrine that the states, at the formation of the Union, delegated a portion of their sovereignty to the National government, reserving the right to revoke the agency and to resume the exercise of all the elements of sovereignty at any time by seceding.

In the Constitution, the rights of the National government are distinctly stated; the rights of the state are limited only by the expressly declared national right. Previous to the Civil War the term "state rights" was used to designate the idea of "state sovereignty," and misuse has raised a prejudice in many minds even against the legitimate theory of "state rights" brought forward since that event. The arguments against "state sovereignty" may be summarized as follows: The colonies did not fight each for its own independence, but each for the independence of all, as is shown by their joint action throughout, in military as well as civil matters. The sovereignty acquired in that struggle was never individually exercised, but all remained under the national sovereignty raised by the common fight for liberty. All the elements and insignia of sovereignty were vested in the National government, as the power to declare war and peace and to coin money, and moreover the power to amend the Constitution, except in a very few particulars, was given to three-fourths of the states, and on the theory of state sovereignty this would imply the self-contradictory condition of a sovereign state voluntarily exposing itself to changes in its government without its consent to the change. It may be maintained that secession would afford the needed relief; but if this had been the intention, the consent of all the states to an amendment would have been required, since it must be presumed that the union was intended to endure.

The doctrine of "state sovereignty" was put forward at various times. (See Hartford Convention; Nullification.) Soon after the nullification troubles it became the ally of slavery, and the result of the Civil War put it to rest forever. State sovereignty and secession finally disposed of, the theory of state rights as above outlined could be developed. The danger of extreme particularism had been avoided; extreme centralization during the exercise of war powers by the President and Congress was inevitable. The Supreme Court holds the balance, and its adjudication has, since the war, laid down the relations of the states and the National government as above.

State Socialism. (See Socialism.)

States Relations Service, Agriculture

Department.—Under a plan of reorganization of the Department of Agriculture approved by law of May 8, 1914, the States Relations Service was created. It has general charge of the department's business with the State Agricultural Colleges and Experiment Stations, and of certain other related functions. The act provides for a nation-wide system of instruction for the farming population in agriculture and home economics outside of the schools and colleges.

The general lines of the extension system for the whole country have been well marked out, and embrace (1) the county agricultural agents, (2) the boys' and girls' clubs, (3) the movable schools, and (4) the supporting work of the college and department specialists.

The appropriation for this work for the first year of its existence (1914) was \$2,280,000. This was met by approximately \$2,653,000 from the states.

States Rights. (See Powers of Federal and State Governments.)

Statistical Congress, International:

At St. Petersburg, 4142, 4221.

The Hague, 4082.

Invitation to hold next meeting in United States recommended, 4142.

Statistics, Bureau of.—A Bureau of the

Department of Commerce and Labor. It was established in 1866 as a Bureau of the Treasury Department, but on the establishment of the Department of Commerce and Labor, in 1903, it was transferred to that Department. It collects and publishes from time to time statistics of the commerce of the United States with foreign countries, immigration statistics, etc. Its annual statistical Abstract of the United States and reports on commerce and navigation are important documents. (See also Agriculture, Department of, and Crop Estimates, Bureau of.)

Statistics, Bureau of, act to establish, referred to, 4807.

Statuary Hall, formerly the hall of the

House of Representatives, was established as Statuary Hall by act of Congress of July 2, 1864. By this legislation a National Hall of Statuary was created, and the President was authorized to invite each state to contribute to the collection to be formed; two statues, in either marble or bronze, of deceased citizens of the state whom "for historic renown or from civil or military services" the state should consider as worthy of commemoration in this National Hall of Statuary.

The following is a list of statues presented by the states:

Alabama—J. L. M. Curry.
Connecticut—Roger Sherman.
Connecticut—Jonathan Trumbull.
Florida—John W. Gorrie.
Idaho—George L. Shoup.
Illinois—James Shields.
Illinois—Frances E. Willard.
Indiana—Oliver P. Morton.
Indiana—Lew Wallace.
Iowa—James Harlan.
Iowa—Samuel J. Kirkwood.
Kansas—John J. Ingalls.

Kansas—George W. Gilck.
Maine—William King.
Maryland—Charles Carroll.
Maryland—John Hanson.
Massachusetts—Samuel Adams.
Massachusetts—John Winthrop.
Michigan—Lewis Cass.
Michigan—Zachariah Chandler.
Missouri—Francis P. Blair.
Missouri—Thomas H. Benton.
New Hampshire—John Stark.
New Hampshire—Daniel Webster.
New Jersey—Richard Stockton.
New Jersey—Philip Kearny.
New York—Robert R. Livingston.
New York—George Clinton.
Ohio—James A. Garfield.
Ohio—William Allen.
Pennsylvania—J. P. G. Muhlenberg.
Pennsylvania—Robert Fulton.
Rhode Island—Nathaniel Greene.
Rhode Island—Roger Williams.
South Carolina—John C. Calhoun.
Texas—Stephen F. Austin.
Texas—Samuel Houston.
Vermont—Ethan Allen.
Vermont—Jacob Collamer.
Virginia—Washington.
Virginia—R. E. Lee.
West Virginia—John E. Kenna.
West Virginia—Francis H. Pierpont.
Wisconsin—James Marquette.

Works of art in the Capitol Building, Washington, have been acquired by gift from private individuals interested in the preservation of the historical, biographical, or pictorial art of the nation; by the gift from states, as indicated by the statues of distinguished citizens forming the collection in Statuary Hall, and by purchase by the Government. A general supervision of the art works of the Capitol is exercised by the Joint Committee on the Library. This committee also has charge of accessions to the art works of the Capitol Building, except as otherwise provided by law.

Statues and Monuments:

Clinton, George, statue of, presented to Congress by New York, 4214.

Dinosaur proclaimed, 8087.

Garfield, James A., statue of, to be erected in Washington, 4795.

Unveiling ceremonies, order regarding, 5162.

Liberty Enlightening the World. (See Liberty Enlightening the World.)

Rawlins, John A., statue of, recommendations regarding erection of, 4124.

Thomas, George H., statue of, to be unveiled, 4509.

Washington, George, statue of—to be erected at Caracas, Venezuela, 4716.

To be placed in Capitol, 881, 1170, 1910.

Washington Monument. (See Washington Monument.)

Wooster, David, monument to memory of, information regarding, 801.

Yorktown, Va., monument at, referred to, 4850.

Statute of Limitations should be repealed in criminal cases, 1492.

Statutes of Limitations and Interest Laws.—The following table gives the legal and contract interest rates in the several

States, and the statutes of limitations of notes, judgments and accounts:

* Under seal, 10 years. † Unless a different rate is expressly stipulated. ‡ Under seal, 20 years. § Store accounts; other accounts 5 years; accounts between merchants 5 years. ¶ New York has by a recent law legalized any rate of interest on call loans of \$5,000 or upward, on collateral security. †† Becomes dormant, but may be revived. §§ Six years from last item. (a) Accounts between merchants 2 years. (b) In courts not of record 5 years. (c) Witnessed 20 years. (d) Twenty years in Courts of Record; in Justice's Court 10 years. (e) Negotiable notes 6 years, non-negotiable 17 years. (f) Ceases to be a lien after that period, unless revived. (h) On foreign judgments 1 year. (l) Ten years foreign, 20 years domestic. (m) Subject to renewal. (n) Not of record 6 years. (o) No limit. (p) Foreign. Domestic 6 years. (q) Varies from 3 to 30 years.

Penalties for usury differ in the various States. California, Colorado, Maine, Massachusetts (except on loans of less than \$1,000), Montana and Nevada have no provisions on the subject. Loss of principal and interest is the penalty in Arkansas and New York. Loss of principal in Delaware and Oregon.

Statutes of United States. (See Revised Statutes.)

Statutory.—By authority of the statute. Statutory law is law passed by the Legislature either of the nation or state. It is distinguished from common law in that it is interpreted by the judiciary, as nearly as ascertainable, according to the literal meaning intended by the legislators. (See Common Law.)

Steam Boiler Explosions:

Commission to inquire into causes of, 4213, 4434.

Examinations of inventions to prevent, referred to, 1726, 1728, 1732.

Steam Engineering, Bureau of, Navy Department. (See Bureau of Steam Engineering.)

Steam Power:

Accident in navigation resulting from criminal negligence in use of, discussed, 1253.

Use and development of, in naval warfare, discussed, 1901, 2122, 2132.

"Steam Roller" Tactics.—The action of the Republican leaders in the nominating convention of 1912 was characterized by their opponents throughout the campaign as "Steam Roller" Tactics, because it was alleged that the Committee on Credentials had arbitrarily seated contesting delegates regardless of the merits of the cases involved, and by so maneuvering had gained a majority for the platform and the candidates desired by the reactionaries.

Steamboat Inspection Service, Commerce Department.—This service is charged with the inspection of all vessels flying the United States flag which are not directly connected with the Navy Department. In addition to general inspection concerning safety, the Service investigates the serviceability of all vessels for the kind of service they are to render, sees that the accommodations for both passengers and crew are sufficient, and examines the safety of all the equipment, with especial attention to boilers. In 1916, the Service inspected and certificated 7,349 vessels, issued licenses to 18,102 officers and 24,425 seamen, tested and examined 203,017 life preservers, and reported that, on the vessels which are required to report the number of passengers they carry, 317,066,553 persons were carried. (See Commerce Department.)

Steamboat Inspection Service, discussed, 4931.

Steamboats, casualties in, discussed, 1611.

Steamship Mail Service. (See Postal Service.)

Steamships:

Australian line referred to, 4101.

Claims of German lines to interest on dues illegally exacted, 5084, 5367.

Construction of, into war vessels when needed, recommended, 2203.

Line of, between—

Havre and New York referred to, 2011, 2173.

San Francisco and Japan and China, 4101.

Naval reserve of, recommended, 5492.

Proposals for construction of iron steamships for trans-Atlantic service referred to, 4023.

Rapid service of, recommended by International American Conference, 5511.

Recommendations regarding, by President—

Harrison, Benj., 5491, 5559.

McKinley, 6310.

Steel. (See Iron and Steel.)

Ste'h-chass Indians. (See Indian Tribes.)

Steilacoom Indians. (See Indian Tribes.)

St-kâh-mish Indians. (See Indian Tribes.)

Stockbridge Indians. (See Indian Tribes.)

Stockholm, Sweden, International Prison Congress to be held in, discussed, 4406.

Proceedings of, referred to, 4464.

Stockton and Stokes, claims of, 1499.

Payment of, referred to, 1720.

Stoluck-whâ-mish Indians. (See Indian Tribes.)

Stone, Clay and Cement.—Stone suitable for building purposes is found in nearly all the States. In value of output for general purposes Pennsylvania takes the lead. In the matter of stone for building and monumental uses Vermont heads the list. Marketable grades of stone are really confined to a few states. Granite comes largely from the New England States, but California also ships considerable quantities. Slate is found mainly in Pennsylvania and Vermont. Marble is quarried in Vermont, Tennessee, Georgia, New York and Massachusetts.

In 1783 a marble quarry was opened at Dorset, Vt.; about 1800, marble quarrying and sawing was carried on at Marblehead, Conn., and Stockbridge, Mass. Sandstone, at present largely used for flagging, was first put on the market in the form of grindstones by John Baldwin; the first slate quarry in Vermont was opened in 1845 by Col. Allen and Caleb Ranney at Scotch Hill, Fair Haven. The granite industry had its beginning at Quincy, Mass., about 1820.

The value of the production of stone in the United States in 1914 reached the great total of \$77,412,292.

Clay Products.—The clay products industries are divided into two distinct classes: (1) Brick and tile making, including paving brick and sewer pipe; (2) pottery, terra cotta, and fire-clay products, including porcelain ware, earthen and stoneware, china and sanitary ware. There were 5,037 establishments engaged in the two branches of the business when reports were made for the census of 1910. They were capitalized at \$316,022,470, and gave employment to 146,786 persons, paying in salaries and wages \$78,144,116. More than four-fifths (83.7 per cent.) of these were engaged in making brick and tile.

Pottery.—The art of molding clay into articles for domestic use is one of the old

est of handicrafts, and doubtless developed shortly after or coincident with the carving of weapons. Specimens of clay molding carry fragments of the early history of all races. The Mound Builders of prehistoric America had distinctive pottery.

To the Chinese and the Egyptians we are indebted for a later development of earthenware fabrication. Josiah Wedgwood was the pioneer master of the ancient art in England. In 1744, Edward Heylyn, of the Parish of Bow, and Thomas Frye, of the Parish of West Ham, Essex, England, applied for a patent for the manufacture of chinaware, in which they specify that the material used is an earth produced by the Cherokee Indians of America. As early as 1765 South Carolina had a pottery which seriously threatened Wedgwood's American trade. Before 1800 the pottery business was fairly well established in Philadelphia and vicinity. The Jersey Porcelain Company of Jersey City was incorporated in 1825. In 1837 the Indiana Pottery Company was started at Troy, Ind., on the Ohio River. East Liverpool, Ohio, owes its prosperity to the discovery of potter's clay in the neighborhood by James Bennett, an English potter, who erected the first works there in 1839. Trenton, N. J., built its first pottery in 1852. The earliest ware was mostly plain white undecorated or yellow, followed by white, carrying blue designs.

The census of 1910 reported 822 establishments engaged in the manufacture of stoneware, earthenware, white and cream-colored ware, chinaware, delft and belleekware, porcelain electrical supplies, architectural terra cotta, fire brick, sewer pipe, etc. These turned out products valued at \$76,118,861, and employed 56,168 wage-earners, to whom they paid \$29,753,495 for the year.

Cement.—Two classes of cement are generally recognized in this country—hydraulic, or natural rock cement (made from a limestone containing a relatively high proportion of clay, by burning at a low heat, and grinding the product to powder); and Portland cement (made from an artificial mixture of carbonate of lime (either chalk, limestone or marl) with a certain proportion of clay, burning at a white heat and grinding the clinker to powder.)

Common natural rock, or hydraulic cement, is sometimes called Rosendale cement, because it is made in large quantities near Rosendale, Ulster County, N. Y. It is also made in Pennsylvania, Kentucky and Indiana, at several points in Illinois, and around Milwaukee, Wis. Recent annual outputs of these districts were: New York, 2,500,000 barrels; Indiana and Kentucky, 1,500,000; Pennsylvania, 1,340,000; Wisconsin, 330,000 barrels.

Portland cement was first made in England in 1824, and derives its name from its resemblance to the limestone of Portland Island, in the English channel. The industry was then taken up in Germany, where the annual output is something like 20,000 barrels, whereas England makes 9,000,000 barrels. Portland cement was first made in the United States at Copley, Pa., in 1878, and since then works have been established in more than a dozen other states.

The growth of the cement industry is one of the marvels of American progress. In 1885 we were able to make about 150,000 barrels. This amount was doubled every five years till 1900 when the demand, public and private, for concrete construction caused the production to jump to more than 11,000,000 barrels; two years later it exceeded 17,000,000. Today the best grades of American Portland cement are as good as those produced anywhere, and in effective-

ness of equipment, extent of output, and cheapness of production, the leading Portland cement plants of this country are models for the world. Not even in the development of our iron and steel industry have American energy, resourcefulness, and mechanical ability been more strikingly displayed.

Stone River, or Murfreesboro (Tenn.), Battle of.—Oct. 30, 1862, Gen. Buell was succeeded in the command of the Army of the Ohio by Gen. William S. Rosecrans. During December the Federal army of 41,421 infantry, 3,266 cavalry, and 2,223 artillery, with 150 guns, lay at Nashville, Tenn. The recent invasion of Kentucky by the Confederates under Gen. Bragg having proven unsatisfactory to the Confederate government, he was again ordered to the north soon after he had reached Chattanooga. By Christmas he was posted near Murfreesboro, about thirty miles southeast of Nashville, with an army of 37,000 men. Rosecrans had planned to assail the Confederate right early on the morning of Dec. 31, in front of Murfreesboro. Bragg, anticipating his design, attacked McCook on the Federal right and drove him from his position with considerable loss, including 3,000 prisoners and 28 guns. Some Federal accounts represent the Confederates as repulsed four times after their successful charge. Both armies rested on Jan. 1, 1863. On the 2d Rosecrans resumed his efforts to turn the Confederate right. Some statements are to the effect that Bragg attacked unsuccessfully. The one here followed says the Federals advanced, were forced back across Stone River, but later recovered the ground and threw up breastworks. Bragg retired from his position on the 3d and occupied Murfreesboro, which he evacuated on the 5th. He then fell back about twenty-five miles to Duck River. The Federal loss in the fighting about Murfreesboro was 1,723 killed, 7,245 wounded, and more than 3,000 prisoners—a total of about 12,000. The loss of the Confederates was about 11,000 men in killed, wounded, and missing. This battle is called by the Confederates the battle of Murfreesboro. It was one of the bloodiest of the Civil War.

Stono Ferry (S. C.), Battle of.—In the early summer of 1779 the British under Gen. Prevost advanced upon Charleston and demanded its surrender. They were driven off by the vigorous action of Pulaski, Rutledge, Moultrie, Laurens, and others. In his retreat toward Savannah, Gen. Prevost left a detachment in charge of Stono Ferry, ten miles below Charleston on the Stono River. June 20 these were attacked by Gen. Lincoln. In the absence of concerted action the assault failed and the Americans withdrew after losing 146 in killed and wounded.

Stony Creek (Canada), Battle of.—When the British were driven from Fort George, on the Niagara River, they fled westward under command of Gen. Vincent as far as Stony Creek, six miles southeast of the present city of Hamilton, and about fifty miles from Niagara River. Here they made a stand, having been reinforced by troops from Kingston. They were closely followed by 1,300 Americans under Generals Chandler and Winder. At midnight June 5, 1813, Vincent, with about 800 men, started for the American camp. The attack was made before daylight, and the combatants were unable to distinguish friend from foe. Chandler and Winder were both captured and Vincent was lost

in the woods. The British command then devolved upon Col. Harvey, who, despairing of driving the Americans from their position, withdrew from the attack while it was yet dark. The Americans fled to Forty-Mile Creek, where they were joined by 400 reinforcements. The total casualties of the battle were: Americans, 154; British, 178.

Stony Point (N. Y.), Storming of.—With a view to regaining possession of the Hudson, Gen. Clinton in June, 1779, occupied and fortified Verplanck's Point and Stony Point, garrisoning the latter with 600 men. To circumvent his movements Washington sent for Anthony Wayne and asked him if he could take Stony Point. His reply is said to have been: "I will storm hell if your excellency will plan it." Accordingly, Washington planned the assault, and on the night of July 16, 1779, Wayne, with about 800 men selected from three regiments of infantry, a detachment from West Point, and Col. Lee's light-horse, made a sudden assault upon the fort. The plans were carefully executed, the guns were carried off, and the works destroyed. The British casualties were 20 killed, 74 wounded, 58 missing, and 472 prisoners—a total loss of 624. The total American loss was only 15 killed and 83 wounded. Among the latter was Gen. Wayne. This, the boldest exploit of the Revolution, was initiated by the capture and gagging of a sentinel, the countersign having been obtained by a negro strawberry vender and by him communicated to the Americans. While the negro chatted with the sentry the latter was seized by the American advance party.

Straw Shoe Channel, steamers sailing under American flag prohibited from passing through, referred to, 3896, 3902.

Streight's Raid.—In the spring of 1863, about the time Col. Grierson's flying column of cavalry was organized at Memphis, Tenn., Col. A. D. Streight, of the Fifty-first Indiana, was permitted by Gen. Rosecrans to take a body of 1,800 cavalry from Tusculum, Ala., to attempt the destruction of railroads and other property in northern Alabama and Georgia. The raiders started out April 12 and were captured May 3, 1863, near Rome, Ga., having accomplished nothing. The capture was made by Forrest's cavalry.

Strict Constructionist.—In political parlance, a political party or individual insisting upon the precise application of the wording of the Constitution. The Anti-Federalists and their successors, the Democratic-Republicans, and, until very recently, the Democratic party have usually been regarded as strict constructionists.

Strike Commission:

Discussed, 5983, 7037.

Report of, transmitted, 5988.

(See also Arbitration, Labor and Labor Question.)

Strong Government Men.—A party organized in 1783 which favored a strong central government and a loose construction of the Constitution.

Subconstitutional Centennial Commission, memorial of, proposing to celebrate centennial anniversary of framing Constitution, discussed, 5118.

Subjugation.—The act of bringing another under control, usually by force of arms.

Submarine Cables. (See Ocean Cables.)

Submarine Telegraph Company, claim against United States, 6824.

Submarines.—Annalists trace the records of under-sea operations back to the days of Alexander the Great. Systematic study of attack below the water line was made as early as the thirteenth and fourteenth centuries, for several English ships were reported destroyed in 1372 by fire carried under water. The idea certainly is not a novel one, for what more natural suggestion could present itself than a thrust in the rear when a frontal attack fails against a foe. Passing over the earlier accounts of submarine boats for lack of confirmation, we find fairly reliable descriptions of such vessels in 1580, 1605, 1624, 1680, 1747, mostly built and operated in England.

The earliest attempts at submarine naval operations in America were made in 1775 by David Bushnell, who built an iron vessel shaped like a tortoise, water tight and with an air capacity sufficient for one man one hour. This was made to dive under water and propelled forward at a speed of two or three knots an hour by means of screws worked by the hands of the operator. There were automatic air tubes and a depth gauge, as well as an auger for boring holes in the hulls of vessels attacked and attaching torpedoes.

In this submarine, called the *Turtle*, Sergeant Lee was enabled to get beneath the English man-of-war *Eagle* in New York harbor. Lee's attack failed because his auger was not sharp enough to penetrate the copper-covered bottom of the *Eagle*. A later attempt to torpedo the British frigate *Cerberus*, at anchor off New London, was made in 1777, but the torpedo drifted astern and destroyed the schooner *Ramilles* and killed several men on board. This was the first vessel ever destroyed in this manner.

Between 1796 and 1810 Robert Fulton built submarine boats in America and France. On his *Nautilus* he once remained submerged five hours. His *Mule* had an armor plating and was propelled by a noiseless steam engine. Fulton's work was followed by more or less successful efforts in England, France, Germany and Russia; but the civil war in America furnished a notable stimulus to submarine architecture. A partially submerged Confederate vessel attacked the Federal *Ironclad* in 1863, and the same kind of a craft destroyed the *Housatonic* in Charleston harbor in 1864. These Confederate submarines were called "Davids," possibly in the hope that they would vanquish their giant foes of the United States Navy. Between 1878 and 1888 Garrett and Nordenfelt made successful experiments with submersible boats, and one by Gustave Zédé in 1888 was looked upon as a success; it was fifty-six feet long, thirty tons displacement, and had a speed of ten knots. George C. Baker made many submarine trips in Lake Michigan in 1892. Submarines built by Simon Lake in 1894 and 1897 remained submerged more than ten hours, and traveled 200 miles under the waters of Lake Champlain. These vessels were designed more for scientific exploration and the salvage of sunken cargoes than for offense.

Congress appropriated \$200,000 in 1892 to enable the Navy Department to build and test a submarine. The plans of J. P. Holland were accepted, and the tenth improvement on this type was ordered in 1900. It is fitted with three torpedo tubes, carries the largest Whitehead tor-

pedoes, and makes eight to nine knots speed. Eight of these boats were put in commission in 1903. Variations in the types are designated by letters (from A to M) and the number of vessels authorized has reached fifty-nine. (See Navy, Department of.) March 25, 1915, the F-4 was submerged in Honolulu harbor, Hawaii, and her crew of twenty-one men perished.

The Great European War increased so rapidly the power and the scope of the submarine that it is impossible to forecast the limits of its development. The submarine in the war has proved to be one of the determining factors in the conflict, although it has fallen below the expectations of its most ardent panegyrists, for example, Sir Percy Scott, the English naval expert, who predicted in a letter to the *London Times* in 1914 that the under-water boat would drive the above-water boat out of existence. Among the famous exploits of submarines in the war were the sinking of the English armored cruisers *Cressy*, *Hogue*, and *Aboukir*, each above 12,000 tons, by the German U-9 within the space of an hour and a half on September 22, 1914; and the entrance of the English B-11 into the Dardanelles early in 1915, where she sank a Turkish battleship, passing under five rows of submarine mines in her dash into and from the harbor. It was the actions of the German submarines which led to the entrance of the United States into the war, Germany announcing in 1917 that all ships of any country entering the war-zone which Germany had drawn around the British Isles would be sunk on sight after Feb. 1, 1917. Previously, the British liner *Lusitania* (q. v.) had been torpedoed without warning on May 7, 1915, with the loss of over 1,000 lives, 107 of them Americans. After spirited negotiations with the United States, the Imperial German Government had agreed to cease its destruction of ships without warning, and to safeguard lives on such vessels before destroying them; but these assurances, which were never given unqualifiedly, were annulled by the announcement of the campaign beginning February 1, 1917.

The submarine is built roughly in the shape of a cigar. Types constructed in Germany in 1917 are over 300 feet in length, and have accommodations for 60 or more men. Besides being equipped with tubes for the discharge of torpedoes, which, however, seem to be limited by the nature of the submarine's structure to eight in number, most of the larger submarines are armed with a machine gun, of at least 3-inch caliber; carry a wireless apparatus; have equipment for signaling both above and below the surface; and are equipped with more than one periscope. This latter is a tubular-shaped attachment which emerges from the surface when the submarine is submerged, and is fitted with lenses which enables those inside the submarine to sight objects on the surface. The compasses are gyroscopic compasses, which enable the boat to be steered in any position. The submarine is submerged either by admitting water into the ballast tanks, or by inclined planes, or by both methods. The air is purified during submergence by oxylytic powder, although the method is constantly subject to change.

The methods used in the European War to foil submarine attacks are still a matter kept in religious secrecy by the various governments; but there seems to be little doubt that a most effective method has been the use of wire netting. The direct enemy most to be feared by submarines would seem to be small and light, but speedy vessels

armed with a single 3-inch gun or six-pounder. Because of the extremely fragile nature of the submarine, it cannot withstand attack on the surface from even a lightly-armed vessel; and hence must attack secretly all ships except those carrying no defensive armament. The range of the submarine under the surface extends for hundreds of miles, the German submarine *Deutschland* arriving in Baltimore in July, 1916, after crossing the ocean in sixteen days, partly submerged and partly on the surface. (See *Deutschland*.) A few months later an armed German submarine arrived in New London, Connecticut. According to official tabulations of the State Department at Washington, German submarines from the beginning of the war on August 1, 1914, to a point shortly after the entrance of the United States into the conflict had sunk more than 700 vessels of neutral countries, of which number nineteen were American ships and more than 400 were Norwegian. At that time more than 250 American lives had been lost through submarine attacks upon both belligerent and neutral vessels. (See Mines.)

Subsidies to Railroads:

Discussed, 4064.

Information regarding, transmitted, 4958.

Subsidies to Steamships:

Discussed, 4151, 4306, 4938.

Views of Postmaster-General regarding, 3561.

Subsidy.—Derived from the Latin *subsidium*, originally the troops stationed in reserve in the third line of battle, from *subsistere*, to sit down. In Europe, after the period of its first use, it meant a sum of money paid to an ally to aid in carrying on war. In England it was a special tax levied upon persons and not upon property. It has now come to mean money paid by a government to individuals or companies, such as steamship or railway in excess of the value of services rendered and in aid of individual enterprise. Railways in the United States have been assisted by state and municipal subscriptions to their bonds. National aid to railways, with the exception of the Union and Central Pacific, has been in the form of land grants. In the case of the Pacific roads, in addition to 33,000,000 acres of land, the company was granted a money subsidy of more than \$25,000 a mile.

The first subsidized steamships were those of the Cunard Line, which in 1838 were allowed an annual subsidy of £81,000 by Great Britain. Two years later agitation was begun in the United States to have steamship mail lines established on the subsidy plan, and in 1845 the Postmaster-General was authorized to make contracts for carrying foreign mail in steamships sailing under the American flag. In 1847 an act was passed requiring the Secretary of the Navy to arrange for United States steamships to carry the mail from New York to Liverpool, to the West Indies and Gulf ports, and from Panama up the Pacific coast. By 1852 the Government was paying \$2,000,000 a year for foreign mail service, but Congress soon after put an end to all mail subsidies. An act of March 3, 1891, directed the Postmaster-General to pay \$4 a mile run for first-class vessels for carrying foreign mails and in consideration of their use as auxiliary naval vessels.

In 1898 Senator Hanna introduced into the Senate a comprehensive bill to provide

subsidies for all classes of American shipping. The bill passed the Senate in March, 1902, but failed to pass the House, although several small subsidies have been granted both before and since that date.

Subtreasury System.—The subtreasury system of the United States is an outgrowth of the panic of 1837. In his special session message to Congress that year President Van Buren strongly recommended such a system (1541). Silas Wright, of New York, introduced a bill in Congress in accordance with the President's recommendation. It prohibited Government agents from receiving anything but gold and silver. In 1840 the bill became a law and subtreasuries were established at New York, Boston, Charleston, and St. Louis, the mint at Philadelphia and the branch mint at New Orleans having been also made places of deposit. The law was repealed in 1841, and reenacted in 1846. The subtreasury at Charleston has been suspended, but subtreasuries have been established at Baltimore, Chicago, Cincinnati, and San Francisco.

Subtreasury System:

Modifications in, recommended, 2556.

Sucker State.—Alternative nickname for Illinois. (See *Prairie State*.)

Sudan. The Sudan extends from the southern boundary of Egypt, 22° N. latitude, to the northern shore of the Albert Nyanza, 2° 19' N. latitude, and reaches from the French Sahara about 18° 15' E. (at 22° N.) to the northwest boundary of Eritrea in 38° 30' E. (at 18° N.). The greatest length from north to south is approximately 1,400 miles, and from east to west 1,200 miles. The northern boundary is the twenty-second parallel of North latitude; on the east lie the Red Sea, Eritrea and Abyssinia; on the south lie the British Protectorate of Uganda and the Belgian Congo, and on the west the French Congo.

Physical Features.—The greater portion of the region consists of the Nubian Desert on the east and the Libyan Desert on the west, divided by the fertile valley of the Nile, which is nowhere of great width.

The Nile basin covers an area of nearly 1,100,000 square miles, and while part of the basin lies in Abyssinia and Eritrea, its course from the Central African Lakes to the Mediterranean is within the British Protectorate of Uganda and Central Africa, and the Anglo-Egyptian and Egyptian dominions.

From the Ripon Falls (on the northern shore of Victoria Nyanza) to Rosetta (on the Mediterranean) the length of the waterway is stated to be 3,475 miles. Between Khartoum and Wadi Halfa occur five of the six Cataracts, the remaining (first) cataract being in Egypt at Assuan.

The western banks of the White Nile and the interior of Kordofan Province afford pasture to countless herds of excellent cattle, and the gum forests of the latter province provide one of the principal exports of the Sudan.

Area and Population.—Area 984,520 English square miles. Estimated population 3,000,000. The inhabitants of the Anglo-

Egyptian Sudan are partly Arabs, partly Negroes, and partly Nubians of mixed Arab-Negro blood, with a small foreign element, including Europeans.

Government.—The Anglo-Egyptian Sudan is administered by a Governor-General, aided, since 1910, by a Council nominated from among the Officials of the Government. The Sudan does not fall under the jurisdiction of the Mixed Tribunals of Egypt, and has its own Civil and Criminal Codes, based on those of India and Egypt.

Suez Canal.—The idea of connecting the Red Sea with the Mediterranean dates back into remote Egyptian history more than thirteen hundred years before the Christian Era. During the reign of Seti I and Rameses II a canal was dug from the Nile to Lake Timseh and thence to the Red Sea. This became choked up with sand and a new canal was begun by Necho, a son of Psammetichus I, about 600 B. C. and completed by Darius Hystaspis a hundred years later. At the beginning of the Christian Era the canal was no longer navigable, but was probably restored under Trajan. After again becoming impassable the canal was restored during the seventh century by Amru, the Mohammedan conqueror of Egypt. When Napoleon invaded Egypt in 1798-99, he ordered surveys made for a canal, but was forced to abandon the country before its completion. An international commission made preliminary surveys for a canal in 1846, but one of the engineers recommended a railroad across the Isthmus and this was built by British capital in 1858.

Under the direction of Ferdinand De Lesseps plans for a canal were drawn in 1855 and submitted to an international commission. A concession was obtained from Said Pasha, Khedive of Egypt, and De Lesseps organized a stock company with £8,000,000 capital to build the canal. Work was begun April 25, 1859, and the canal was opened to traffic Nov. 17, 1869, the entire cost amounting to £16,632,953—about \$80,000,000. Under the terms of the concession the Khedive received nearly one-half of the stock issued. Becoming financially embarrassed in 1875, he sold his shares to the British government for \$20,400,000. This interest is now valued at something like \$170,000,000, and yields a revenue of some \$5,000,000.

The length of the canal from Port Said on the Mediterranean to Port Tewfik on the Gulf of Suez is eighty-seven statute miles—sixty-six actual canal and twenty-one miles of lakes. The original width was 150 to 300 feet at the water level, seventy-two feet at the bottom, and twenty-six feet deep. Successive enlargements have increased the depth to thirty-six feet and the width to from 213 to 262 feet, permitting the passage of 15,000-ton vessels. The net tonnage of the canal during the first year of its operation was 6,576. When the practicability of the Suez route to India became known the tonnage increased by leaps and bounds till in 1911 it reached 18,324,794, more than 11,000,000 of which was British. The toll rates are \$1.25 per ton.

Suffrage.—The privilege of participating in the government of a state or nation by voting at an election of officers or on a change in the fundamental law. Suffrage under the Constitution of the United States is exercised by such electors in each state as have the qualifications necessary for elector of the most numerous branch of the state legislature (15). The Constitution does not guarantee the suffrage to any citizen, but by the fourteenth and fifteenth amendments the states are forbidden to

abridge the privileges or immunities of United States citizens or to deny or abridge the right of suffrage on account of race, color, or previous condition of servitude. The age of twenty-one is universally fixed upon as that when suffrage may be exercised.

In some states ability to read and write is required, in some a small property qualification or tax is imposed, while in others aliens who have declared their intention to become citizens are allowed to vote. Until the present century suffrage was greatly restricted in America. Massachusetts and New Haven Colonies for a long time allowed none but church members to vote. There have been periods in the history of nearly all the Colonies when only freeholders were allowed to vote. When the states in the Federal Union first framed their constitutions some of them retained the church-membership qualification, while others permitted suffrage to freeholders only. In 1798 Georgia abolished the property qualification, and was followed by Maryland in 1801, Massachusetts and New York in 1821, Delaware in 1831, New Jersey in 1844, Connecticut in 1845, Virginia in 1850, North Carolina in 1854, South Carolina in 1865, and Rhode Island, except in municipal elections, in 1888. The new states have mostly provided for manhood suffrage from the first. Several of the southern states have adopted methods, varying from each other, but all with the single expressed purpose of excluding negroes from the franchise and yet avoiding the constitutional consequences of discriminating "on account of race, color, or previous condition of servitude."

In four states women possess suffrage on equal terms with men, namely, in Wyoming, Colorado, Utah, and Idaho. In Kansas women can vote in school and municipal elections. Women possess school suffrage in seventeen states; namely, in Arizona, Connecticut, Illinois, Massachusetts, Michigan, Minnesota, Nebraska, New Hampshire, New Jersey, New York, North Dakota, Ohio, Oregon, South Dakota, Vermont, Washington, and Wisconsin. In addition to school suffrage Montana and Iowa permit women to vote upon the issuance of municipal bonds; while Louisiana gives to women tax-payers the right to vote on all questions concerning the expenditure of public money. A modified and restricted form of suffrage is also granted in Kentucky and Texas, so that women have either full or partial franchise in twenty-seven states of the Union. (See also Woman Suffrage.)

Suffren, The, French seamen on, accidentally killed by salute from the *United States*, 1273.

Sugar.—The term sugar, strictly applied, means cane sugar, which is manufactured from sugar cane, sugar beets, maple sap and sorghum. Up to about 1840 most of the world's sugar was manufactured from sugar cane. This plant appears to have been a native of India and to have been introduced to the rest of the world by way of China. It was introduced into Santo Domingo soon after the discovery of America, and from there spread to Cuba and was carried to Louisiana by the Jesuits in 1751. Manufacture in the United States began in New Orleans in 1794.

Cane sugar was discovered in the beet root by Andreas Sigismund, Marggraf of the Berlin Academy of Science in 1747, and its extraction was developed by both French and Germans. Experiments in the culture and manufacture of beet sugar were begun in Philadelphia in 1830 but

failed. Successive failures are reported up to 1880, when the industry seems to have been firmly established.

The Census of 1910 reported 233 establishments engaged in the manufacture of sugar, with a capital of \$153,167,000, employing 15,658 persons, paying in wages and salaries \$9,876,000, converting \$247,583,000 worth of raw material into finished products valued at \$279,249,000.

The world's production of cane and beet sugar from 1900 to 1914 in English tons was reported by Willett & Gray of New York as follows:

Years	Cane	Beet	Total
1900....	3,056,294	5,590,992	8,647,286
1901....	3,646,959	6,066,939	9,712,998
1902....	4,079,742	6,913,504	10,993,316
1903....	4,163,941	5,756,720	9,920,661
1904....	4,234,203	6,089,468	10,323,631
1905....	4,594,782	4,918,480	9,513,262
1906....	6,731,165	7,216,060	13,947,225
1907....	7,329,317	7,143,818	14,473,135
1908....	6,917,663	7,062,474	13,920,137
1909....	7,625,639	6,927,875	14,553,514
1910....	8,327,069	6,597,506	14,914,575
1911....	8,422,447	8,560,346	16,982,793
1912....	9,066,030	8,820,266	17,886,296
1913....	9,215,637	8,965,127	18,180,764
1914....	9,865,016	8,908,470	18,773,486

MUNICIPAL BUILDING.—This building is of recent construction, situated at the corner of Pennsylvania Avenue and 14th Street. It is now occupied by the District Government and it is a long-felt want.

Municipal Building

CONSTRUCTED BY BUREAU OF
NATIONAL LITERATURE AND ART

Sunset State.—Alternative nickname for Oregon. (See Web-Foot State.)

Superintendent of Finances. (See Finances, Superintendent of.)

Superintendent of Immigration, report of, discussed, 5877.

Superintendent of Life-Saving Service. (See Life-Saving Service.)

Superior, Lake. (See Lake Superior.)

Supervising Architect, Treasury Department.—This officer plans and supervises the construction of all buildings of the United States Government, as well as the repairs therein.

Supervision of Mail, State Department.—The Division of Mail in the Department of State was created in 1873. It has control of a general nature over the official correspondence of the Department and its representatives, and is under the supervision of the second assistant secretary of state (q. v.). (See State Department.)

Supplies, Public:

Distribution of, referred to, 141.

Officer should be placed in charge of, 141.

Supreme Court. (See Court, Supreme.)

Supreme Court Justices. (See also Judiciary.)

Salaries of, increase in, 3996.

Should be exempted from other duties, 830.

Supreme Court Reports.—The opinions and decisions of the Supreme Court are recorded in 214 volumes, including the cases decided up to October, 1908. They comprise its work from its first session in 1790 to the present time. They begin with the volume numbered 2 Dallas and include 3 volumes by Dallas, covering the period between 1790 and 1800; 9 volumes by Cranch, 1800 to 1815; Wheaton, 12 volumes, 1816 to 1827; Peters, 16 volumes, 1828 to 1842; Howard, 24 volumes, 1843 to 1860; Black, 2 volumes, 1861 to 1862; Wallace, 23 volumes, 1863 to 1875. Up to that date the reports had reached 89 volumes by the different compilers. Since 1876 the reports have been styled 90 U. S., 91 U. S., etc.; 90 U. S. was reported by Wallace; 91 to 107 U. S. was reported by William J. Otto, from 1875 to 1882; 108 to 186 U. S., between 1882 and 1902, by J. C. Bancroft Davis, and the remainder by Charles Henry Butler. (See Dallas, in Biographic Index.)

Surgeon General. (See War Department and Army.)

Surgeon General, Public Health. (See Health Service.)

Surgeon-General of Army:

Building for library of, recommended, 4657, 4833.

Ordered to accompany ex-President Jackson home, 1540.

Surplus Revenue, Distribution of.—In his annual message of Dec. 1, 1834 (page 1316), President Jackson announced the extinguishment of the public debt. The compromise tariff measure of 1832, while it made some reduction in the revenue derived from import duties, produced a surplus in the Treasury. Jackson advocated the distribution of this surplus among the

states rather than the appropriation of it to other purposes. A bill providing for such disposition of the surplus was attached to the bill regulating public deposits and passed by Congress in 1836. Under this law all the money in excess of \$5,000,000 in the Treasury, Jan. 1, 1837, was to be deposited with the state in proportion to their representation in the electoral college, and in four installments. The states were required to give certificates of deposit payable to the Secretary of the Treasury on demand. None of the banks selected by the Government as the custodians of public funds was under any kind of official supervision by the states which chartered them or by the General Government. The sum to be divided was \$37,468,859. Three installments of the money were paid to all the states except the few that had refused to accept it on the conditions imposed. The return of these loans of the states has never been demanded.

Surplus Revenue in Treasury. (See Treasury.)

Surtax.—A tax over and above a previous tax already levied against persons or articles of the same class.

Surveyors, Public, punishment of persons interrupting in performance of the trusts confided to them, referred to and recommendation for penalty for the same, 1042.

Surveys, control and supervision of geographical and geological, discussed, 4218. (See also the several surveys.)

Susan B. Anthony Amendment.—The proposed amendment to the Constitution allowing women the same rights of suffrage as men. It has been introduced into all recent Congresses, but has either failed to come to a vote, or else has failed to receive the two-thirds vote of both Senate and House necessary to submit a proposed amendment to the Constitution for ratification by three-fourths of the states. The amendment is named after the founder of the woman suffrage movement in the United States. (See Woman Suffrage.)

Susan Loud, The, seizure of, by Spanish or Cuban authorities referred to, 2679.

Claims arising out of, referred to, 2721, 2900.

Suspension Bridge, N. Y., proclamation granting privileges of other ports to, 2859.

Susquehanna, The, repair of, referred to, 2764.

Susquehanna Company.—An organization, composed mostly of Connecticut farmers, formed in 1754 for the purpose of colonizing the Wyoming country. This was the name given to a strip of land bought by Connecticut from the Plymouth Company in 1631. Under the charter granted by James I. to the Plymouth Company in 1620, their territory extended from the Atlantic to the Pacific and from lat. 40° to 46° north. The grant of Charles II. to William Penn extended to 42° north, thus overlapping the Plymouth grant to more than the extent of the territory sold to Connecticut, which extended to 41° south. In 1754 the Susquehanna Company made a treaty with the Six Nations of Indians,

securing the right to settlement upon their purchase. Charles II. confirmed the sale to Connecticut, and Pennsylvania, though disputing the sale, made no effort to prevent a settlement. The first settlers in the disputed territory were driven off by the Indians in 1763. In 1769 some forty more settlers arrived in the Wyoming region and were arrested by Pennsylvania officials. For the next six years a sort of civil warfare was kept up between the settlers of the disputed tract, and only suspended during the Revolution, after which the dispute was arranged between the states and the titles to the land confirmed. (See also Wyoming Controversy.)

Susquehanna, or Conestoga Indians.
(See Indian Tribes.)

Sutler.—One who follows the Army and supplies the troops with necessities and luxuries, not as a patriotic service, nor in an official capacity, but purely for gain. (Same as Camp-Follower. Both terms are generally used in derision.)

Sutro Tunnel, referred to, 4148.

Swamp Lands. (See Lands, Swamp.)

Swash-Buckler.—One who struts in braggadocio fashion, especially a soldier who undertakes to intimidate civilians on account of assumed military authority.

Swanton, Vt., proclamation granting privileges of other ports to, 2859.

Sweden.—Sweden occupies the eastern and greater portion of the Scandinavian peninsula of northern Europe, and lies between 69° 3' 21"-55° 20' 18" N. latitude and 11° 6' 19"-24° 9' 11" E. longitude, with an extreme length of close on 1,000 English miles and a greatest breadth of about 250 English miles. The kingdom is bounded on the northeast by the Grand Duchy of Finland, on the east by the Gulf of Bothnia and the Baltic Sea, on the southwest by the Cattegat and Skagerrack, and on the west by the Kingdom of Norway. The coast is fringed with an island fence (skargard), the largest islands of the west coast being Orust and Tjörn, while Öland (519 square miles) and Gotland (1,220 square miles) lie off the southeast coast, in the Baltic Sea.

Physical Features.—The main Scandinavian range, known as the Kölen (keel), forms a natural boundary between Sweden and Norway from the northwestern boundary to the center of the kingdom, the greatest elevations being in the extreme north. Central Sweden consists principally of fertile and wooded plains, and includes the four great lakes of Hjälmaren, Mälaren, Vänern and Vättern. In the extreme south are the plains of Skåne, consisting of rich meadow land and occasional woods of beech.

The principal rivers of the north are the Torne, Kalix, Stora and Lilla Lule (on which is the famous cataract, the Harsprangi), the Pite, Skellefte, Ume and Vindel, Änzerman, Indal and Ljusnan. In the southern portion are the Dal and Klar, while the short Göta contains the celebrated falls of Trollhättan. The surface of the lakes and rivers of Sweden occupies about one-twelfth of the total area of the Kingdom.

About one-seventh of the Kingdom lies within the Arctic Circle, but the country receives a large measure of protection from the western mountain barrier, and the peninsula, as a whole, is warmed by the Atlantic Drift. Compensation for the shortness of the northern summer is afforded by atmospheric refraction, which increases the

time of sunshine and light, but from October or November to May or June navigation is impeded, and from December to April the coasts are ice-bound.

History.—In 1319 the Kingdoms of Sweden and Norway were united under one sovereign, but in 1397 the League of Kalmar formed tripartite kingdom under the hegemony of Denmark. Sweden broke from the League in 1523, and in 1814 the crown of Norway was ceded by Denmark to Sweden. In 1905 the King of Sweden renounced the crown of Norway.

Government.—The Government is that of a limited monarchy, hereditary in the male line (by primogeniture) of the House of Bernadotte, Prince of Ponte Corvo, who was elected to the succession by the Riksdag on Aug. 21, 1810, and ascended the throne on Feb. 5, 1818. The constitution rests upon the fundamental law of June 6, 1809, which declares the king to be irresponsible, invests in him the executive authority, and confers initiation and veto of legislation. Ruler: Gustav V., King of Sweden, of the Goths and Vandals; born June 16, 1858; succeeded December 8, 1907.

The Riksdag consists of two elective Chambers, of which the First Chamber contains 150 members elected by the Landsting, or Councils of the Län (prefectures), on a population basis, and with eligibility confined to those of Swedish birth, aged thirty-five years, who possess real property valued at 50,000 kronor, or annual taxed incomes exceeding 3,000 kronor. The Second Chamber consists of 230 members, and are elected for a maximum of three years by universal manhood suffrage.

The country is divided into 121 judicial districts, each with a court of first instance, consisting of a judge and twelve unpaid jurors, elected by the inhabitants. There are High Courts at Stockholm, Jönköping and Kristianstad, and a Supreme Court at the capital.

For the army and navy see Armies of the World and Navies of the World.

Population.—The country is divided into twenty-five prefectures, having a total area of 169,532 square miles. The Swedish people are Scandinavians, but the population includes, in the north, about 20,000 Finns and 7,000 Lapps. More than 99 per cent of the people belong to the Swedish Lutheran Church.

Education.—Primary education is compulsory and free, and is maintained by local taxation with State grants. Illiteracy is very rare, and good attendances at the schools are secured. In 1911 there were 15,200 primary schools, with 792,000 pupils. There are Special schools for technical instruction and navigation, and Universities at Uppsala (2,300 students) and Lund (1,250 students), as well as State and private facilities at Stockholm and Göteborg.

Production and Industry.—The common cereals and potatoes and fruits are grown and the live stock includes horses, cattle, sheep, pigs, reindeer, goats and fowls. The forests cover more than half the area of the kingdom, and consist of pine, birch and fir, producing timber, wood pulp, pitch, tar and fuel. In 1911 nearly 72,000 persons were employed in the various timber, wood work and wood pulp industries, the combined output being valued at close on 331,000,000 kronor.

The kingdom is rich in minerals, including iron of excellent quality (Dannemora iron being converted into the finest steel); gold and silver in small quantities; copper, lead, nickel, zinc, cobalt, alum, sulphur, porphyry and marble.

In addition to the industries in connection with the production of the forests and mines, there are flour and sugar mills, breweries and distilleries, tanneries and shoe factories, cotton and wool spinning and weaving establishments. The industrial output is considerable, and may be valued at close on 220,000,000 kronor annually.

Railways, Etc.—At the end of 1912 there were 14,300 kilometers of railway open, of which 4,700 kilometers were the property of the State. There were 3,837 post-offices in 1912 and 6,600 miles of telegraph line (exclusive of railway telegraph lines).

The Mercantile Marine of Sweden in 1911 consisted of 969 steam vessels of 852,520 tons, and 471 sailing vessels of 118,138 tons.

Finances.—The annual average expenditure for six years ending 1914 was 243,322,600 kronor, and the revenues for the same time averaged 244,489,000 kronor. The national debt was stated Jan. 1, 1913, as 602,000,000 kronor. Of this total almost the whole was raised for and expended in the construction of railways, which produced a net revenue in 1912 (after providing for working expenses, interest and amortization) of 20,295,000 kronor. The unit of value, the krona, is equivalent to \$0.268 in United States money.

Cities.—Capital, Stockholm; population (1912) 350,955. In addition to the capital, there were (1912) twenty-nine towns with a population exceeding 10,000.

Trade with the United States.—The value of merchandise imported into Sweden from the United States for the year 1913 was \$12,104,366, and goods to the value of \$11,174,419 were sent thither—a balance of \$929,947 in favor of the United States.

Revocation annulled, 3630.

Sweden and Norway, Treaties with.—

The treaty of amity and commerce of 1783 expired in 1796 by its own limitations. Some of its sections were revived by the treaty of 1816, which, in turn, expired by its own limitations in 1826, and was replaced by the treaty of commerce and navigation of 1827. By it freedom of commerce and trade was accorded to both nations, and for the ships of the island of St. Bartholomew, which was included. Equable imposition of charges, tolls, dues, and imposts was secured for the vessels of both nations; imports were to be taxed without regard to the nationality of the carrying vessel; and the coastwise trade was excluded from the terms of the treaty.

The consular office was created and provided for as in consular conventions. Humane provisions were made for the relief of the shipwrecked and for ships in distress. A naturalization convention was concluded in 1869. Upon the dissolution of the union of Norway and Sweden, the Swedish government agreed to continue in force and abide by all treaties with the United States. (For the extradition terms of the treaty of 1893, see *Extradition Treaties*.)

Swiss System of Military Training.—

During the agitation in the United States for universal military training, arising as a result of the European War, much interest was manifested in the system of military training as practised in Switzerland. Switzerland has no standing army, but military training is compulsory upon every citizen. (Switzerland, having no seacoast, has naturally no navy.) Switzerland, of about the same size and population as the State of Massachusetts, by virtue of its present system, completed in the year 1907, can muster almost immediately upon call a half million trained soldiers, with a larger number in reserve.

The Swiss boy begins his training for future service at the age of 8, when he begins a carefully-planned system of gym-

nastics. At the age of 11, he joins a cadet corps, in which membership is voluntary, but well-nigh universal. In the cadet corps, he receives his first practice in the "setting-up" exercises, and is put through simple drills. Each corps has a uniform of its own design, although the design is usually the same in each particular locality; and the state furnishes assistance only in the shape of the rifle and the ammunition used by the corps. From the age of 16-20, the Swiss youth is a member of a voluntary preparatory military organization, like the cadet corps, except for the fact that the rifle used is the standard army musket and the marksmanship practice becomes serious.

It is at the age of 20 that the Swiss youth enters upon compulsory military service. First, he must pass a physical and literary examination, and if he is rejected as unfit for service, he becomes liable to a rather severe special military tax. He receives his instruction at a field camp something like our own Plattsburg (q. v.), where the recruits are subdivided into the various branches of the service for which they are best qualified. This preliminary training lasts for a period of between 60 and 75 days, according to the branch of service, and during that time the recruit receives all his expenses and a pay of ten cents a day. Until the age of 32, these men are called together for sixteen days' additional training every year or two years, according to the branch of the service for which they have been trained. Between the ages of 32 and 40, the Swiss is a member of the Landwehr, or First Reserve, and after that of the Landsturm, or last reserve. Appointment as officers is open to men in the ranks. (See Compulsory Military Service; Australian System of Military Training; Preparedness.)

Switzerland.—The Federated Cantons of Switzerland lie in Central Europe between 47° 40' 2"–47° 48' 32" N. latitude and 5° 57' 26"–10° 29' 40" E. longitude, and are bounded on the north by the German Empire, on the east by the Austrian Empire and the Principality of Liechtenstein, on the south by the Kingdom of Italy, and on the west by the French Republic. The area is given as 15,950 square miles.

Physical Features.—Switzerland is the most mountainous country in Europe, having the Alps, covered with perennial snow and glaciers, and rising from 5,000 to 15,217 feet above the level of the sea, along the southern and eastern frontiers, and throughout the chief part of the interior, and the Jura Mountains in the northwest. The main chain of the Alps occupies the whole of southern Switzerland, the highest peaks being the Dufourspitze of Monte Rosa (15,217 feet), the Dom of the Mischabel range (14,942 feet), and the Finsteraarhorn of Bernese Oberland (14,026 feet). The highest summit of Europe (Mont Blanc, 15,782 feet) is in the Pennine Alps, across the French frontier. The Jura Mountains rise between the valleys of the Rhine and Rhone and form a natural barrier between France and Switzerland, the highest peaks being Mont Tendre (5,512 feet) and the Dôle (5,505 feet); while the highest peak of the range, Crêt de la Neige (5,653 feet), like that of the Alps, is in French territory.

Three great rivers rise in the mountains of Switzerland, the Rhone, Rhine, and Aar, while the Thur is a Swiss tributary of the Rhine. The Lakes of Switzerland include Geneva (225 square miles) in the southwest, and Constance (208 square miles) in the northeast, neither of which is wholly

Swiss; while Neuchâtel (93 square miles) is entirely within Swiss territory; Maggiore is partly Italian; Lucerne and Zurich are entirely Swiss; Lugano is mainly Swiss; Thun and Bienne lie wholly within the Canton of Berne; Zug lies in three of the northern cantons; Brienz, in the Canton of Berne; Morat lies in the Cantons of Fribourg and Vaud; Wallensee is in St. Gall and Glarus; and Sempach in the Canton of Lucerne.

History.—The Swiss Confederation is a collection of free States drawn together for mutual protection and for the preservation of their independence. The States so combined were at one time part of Germany, Italy or Burgundy, and have been in alliance since the thirteenth century; and to that alliance other States have been attracted. In 1291 the league consisted of the present Cantons of Schwyz, Uri and Unterwalden, to which five others were joined between 1332 and 1353. To these eight Cantons five more were added from 1481-1513, six in 1803, and three in 1815, in which year the perpetual neutrality and inviolability of Switzerland were guaranteed by Austria-Hungary, the United Kingdom, Portugal, Prussia and Russia, and a Federal Pact was drawn up at Zurich and confirmed by the Congress of Vienna. This Pact formed the basis of the Federal Constitution until 1848, when a new constitution was adopted by a majority of the Swiss people, and of the Cantons and demi-Cantons, and in the same manner, on May 29, 1874, the present constitution was ratified, since which date there have been fifteen partial revisions of the constitution, similarly ratified.

Ethnography.—The people of Switzerland, numbering 3,753,283, comprise four nationalities, distinguished by their language into German, 71 per cent; French, 21 per cent; Italian, 6 per cent; and Romansh (in the Grisons), 2 per cent.

Government.—Under the Constitution the Federal Government is supreme in external affairs, and regulates the army, postal and telegraph systems, the mint and paper currency and the systems of weights and measures, while it provides for a national revenue, regulates the tariff, and has power to legislate in matters of sanitation, citizenship, civil and penal law, copyright, bankruptcy, patents, universities and certain public works, such as the forest service, waterways and railways. The legislative authority is entrusted to a Federal Assembly of two chambers which elects a Federal Council as an executive authority. The Federal Assembly also elects for one year a President of the Swiss Confederation and a Vice-President of the Federal Council. The election takes place annually in December and the President and Vice-President take office on January 1st. The Vice-President is eligible for the office of President and is generally elected in succession. President (Jan. 1-Dec. 31, 1914): M. Motta.

The Bundesversammlung, or Assemblée fédérale, consists of two houses, the Ständerat or Conseil des états and the Nationalrat or Conseil National. The Ständerat consists of forty-four representatives, two from each Canton, chosen by the people in the majority (but by the Cantonal legislature in six) of the Cantons. The Nationalrat contains 189 members elected by the people of each Canton for three years, on a population basis of one for each 20,000 inhabitants. Electors are all adult male citizens, and all electors (except the clergy) are eligible. Parliament meets three or four times annually at the capital, and legislation may proceed in either house,

while a referendum to the electors may be secured by the petition of 30,000 electors or upon the request of eight Cantons.

The Bundesversammlung in common session of the two houses elects the Federal Executive (the Bundesrat, or Conseil fédéral), consisting of seven members elected for three years. The President of the Confederation (Bundespräsident) is chosen annually from amongst the seven members of the Federal Council and always holds the portfolio of Foreign Affairs, the remaining portfolios being redistributed annually amongst the remaining members of the Council.

The Federal Supreme Court (Bundesgericht, or Tribunal fédéral) consists of twenty-four full members (and nine substitutes) elected for six years by the two houses of the Federal Parliament, which also elects the President and Vice-President of the Tribunal for terms of two years.

Each of the twenty-two Cantons (Unterwalden, Appenzell and Bâle being subdivided into sub-Cantons, making 25 Cantons and sub-Cantons) is divided into administrative districts under prefects appointed by the Cantonal authorities, or by the people of the districts, and each canton has a legislature, executive and judiciary. The cantons are sovereign states (within the restrictions of the Federal Constitution), and federal citizenship can only be obtained by an alien by means of admission to one of the political communes and by the confirmation of such naturalization by the Cantonal authorities and the previous consent of the Federal Council. (For the army, see *Armed Forces of the World*.)

Education.—Education is controlled by the Cantonal and Communal authorities, and there is no Federal organization. Primary education is free and compulsory, and illiteracy is rare, especially in the Protestant Cantons. The school age varies, but is generally from six to fifteen years. Special schools: There is a Federal technical high school at Zurich of architecture, civil, mechanical and agricultural engineering, chemistry, forestry, mathematics, physics and science, with 1,333 students (466 foreigners) in 1911; and at Lausanne there is a Cantonal school of engineering. There are Universities at Bâle (founded in 1460), Zurich, Berne, Geneva, Fribourg (Catholic), Lausanne, and Neuchâtel, some of these having earlier foundations as academies. There is also a law school at St. Gallen. The matriculated students in 1911 numbered 6,600, of whom 2,000 were women.

Finance.—The average annual expenditure for the five years ending with 1912 was 134,056,373 francs, and the revenues for the same years averaged 134,063,804 francs.

Production and Industry.—The total area of the Confederation is estimated at 9,900,000 English statute acres, of which 5,682,214 acres were cultivated (Census of 1912) and 2,232,359 acres were woods and forests. All the common cereals are produced and the vineyards yielded 16,499,174 gallons of wine in 1911. Horses, cattle, sheep, goats and pigs are raised.

The area of the forests exceeds 2,100,000 acres (more than one-fifth of the area of the country), of which two-thirds are communal and cantonal property and one-third in private ownership. In 1910 nearly 2,000,000 cubic meters of timber were cut, and the industry employed nearly 20,000 persons.

Gold, silver, lead, iron, copper and coal are found, but the only important industries are asphalt in the Val de Travers of Neuchâtel, and the saline works on the

Rhine. There are numerous mineral springs. Mining and quarrying employed 13,000 persons in 1910. Textiles, watch-making, embroidery, machinery, chocolate, shoemaking, straw-plaiting, wood-carving, and various agricultural factories for condensed milk, cheese and soups and preserved meats, in addition to breweries, and distilleries and printing establishments, employed over 250,000 persons in 1910.

Railways.—In 1911 there were 3,154 miles of railway open and working, carrying 17,500,000 tons of goods, and 98,500,000 passengers, the gross receipts being 202,615,000 francs (1910) and the working expenses 136,332,000 francs.

Cities.—Capital of the Swiss Confederation, Berne. Population (1910) 85,650. In 1910 there were twenty-four communes with populations exceeding 10,000.

Trade with the United States.—The value of merchandise imported from the United States into Switzerland for the year 1913 was \$826,549, and goods to the value of \$23,260,180 were sent thither—a balance of \$22,433,631 in favor of Switzerland.

Switzerland, Treaties with.—The convention of friendship, commerce, and extradition of 1850 ran until 1899, when notice was given of intention to terminate some of its provisions. Others were terminated by the treaty of 1900. Those which persist provide for personal and property privileges of the citizens of the one country residing and trading in the country of the other, with all of the rights, privileges, and immunities of the citizens of the country. Freedom of conscience is granted to all; the right to hold, possess, acquire, and to alienate property, immunity from military service, and enforced military contributions, and free and open access to courts of justice are secured.

The taxes upon citizens shall be equitable. Passports shall be supplied in order to establish the character and the citizenship of persons traveling between the two

republics. The disposal, acquisition, and inheritance of property shall be free, easy, and unimpeded. When an heir to property is disqualified from holding it by reason of his alienage, the heir or other successor shall be granted the time permitted by the canton in which the property is situated to dispose of the same. Consuls shall be appointed under conditions common to consular conventions. (For terms of the extradition treaty of 1900, see Extradition Treaties.)

Arbitration of international differences on the lines laid down by The Hague Convention of 1899 was agreed to by treaty signed at Washington, Feb. 29, 1908.

Frank H. Hitchcock.

Secretary of the Navy—

George von Lengerke Meyer.

Secretary of the Interior—

Walter L. Fisher.

Secretary of Agriculture—

James Wilson.

Secretary of Commerce and Labor—

Charles Nagel.

Platform.—The platform of the Republican party in the Presidential campaign of 1908 on which Judge Taft based his candidacy declared for a downward revision of the Dingley Tariff Law; for statutory reform in injunction procedure so as to provide notice before the issuance of the writ; for Federal incorporation of interstate commerce corporations; for postal savings banks; for the settling of constitutional questions regarding the income tax; for the encouragement by mail subsidies of Pacific and South American lines; for the regulation of railroad stock and bond issues by the Interstate Commerce Commission, and the incidental physical valuation of railroads; for the legalizing of rate agreements when sanctioned by the Commission; for the reorganization of certain Bureaus so as to facilitate the execution of the Interstate Commerce and Anti-trust Laws; and for the continuance of the Roosevelt policies regarding the conservation of our natural resources. Summarizing his purposes, Judge Taft said: "The practical, constructive and difficult work, therefore, of those who follow Mr. Roosevelt is to devise the ways and means by which the high level of business integrity and obedience to law which he has established may be maintained and departures from it restrained without undue interferences with legitimate business."

Tariff Revision.—The first work to which the new administration addressed itself was tariff revision. Until Aug. 5, 1909, Congress in special session wrestled with its intricacies. The Payne-Aldrich Bill, passed on that date, was a downward revision, though in the President's estimation not sufficiently downward, and by its creation of a Court of Customs appeals and a Tariff Board was a distinctively progressive measure. The provision for an income tax on corporations with its incidental assurance of control and surveillance was the answer to the President's message of June 16, 1909 (page 7389). The attacks on the

measure drew from the President his speech at Winona, Minn. (page 7393), the most careful and thorough discussion of the subject which has appeared. (See Tariff; Income Tax.)

Postal Savings Bank.—The Postal Savings Banks were established, one in each of the forty-eight States, on Jan. 1, 1911, under the law passed June 25, 1910. The success of the plan has led the Postmaster-General to recommend extending the system to five hundred localities. (See Postal Savings Banks.)

Reform in Injunction Procedure.—The President urged upon Congress in his Inaugural Address and in his First and Second Annual Messages the passage of a law which would forbid the issuing of an injunction by any Federal Court without previous notice and hearing of the parties to be enjoined, unless in the Court's discretion the requisite delay would result in irreparable injury to the complainant (pp. 7377, 7431, 7524). (See Injunctions; Boycott.)

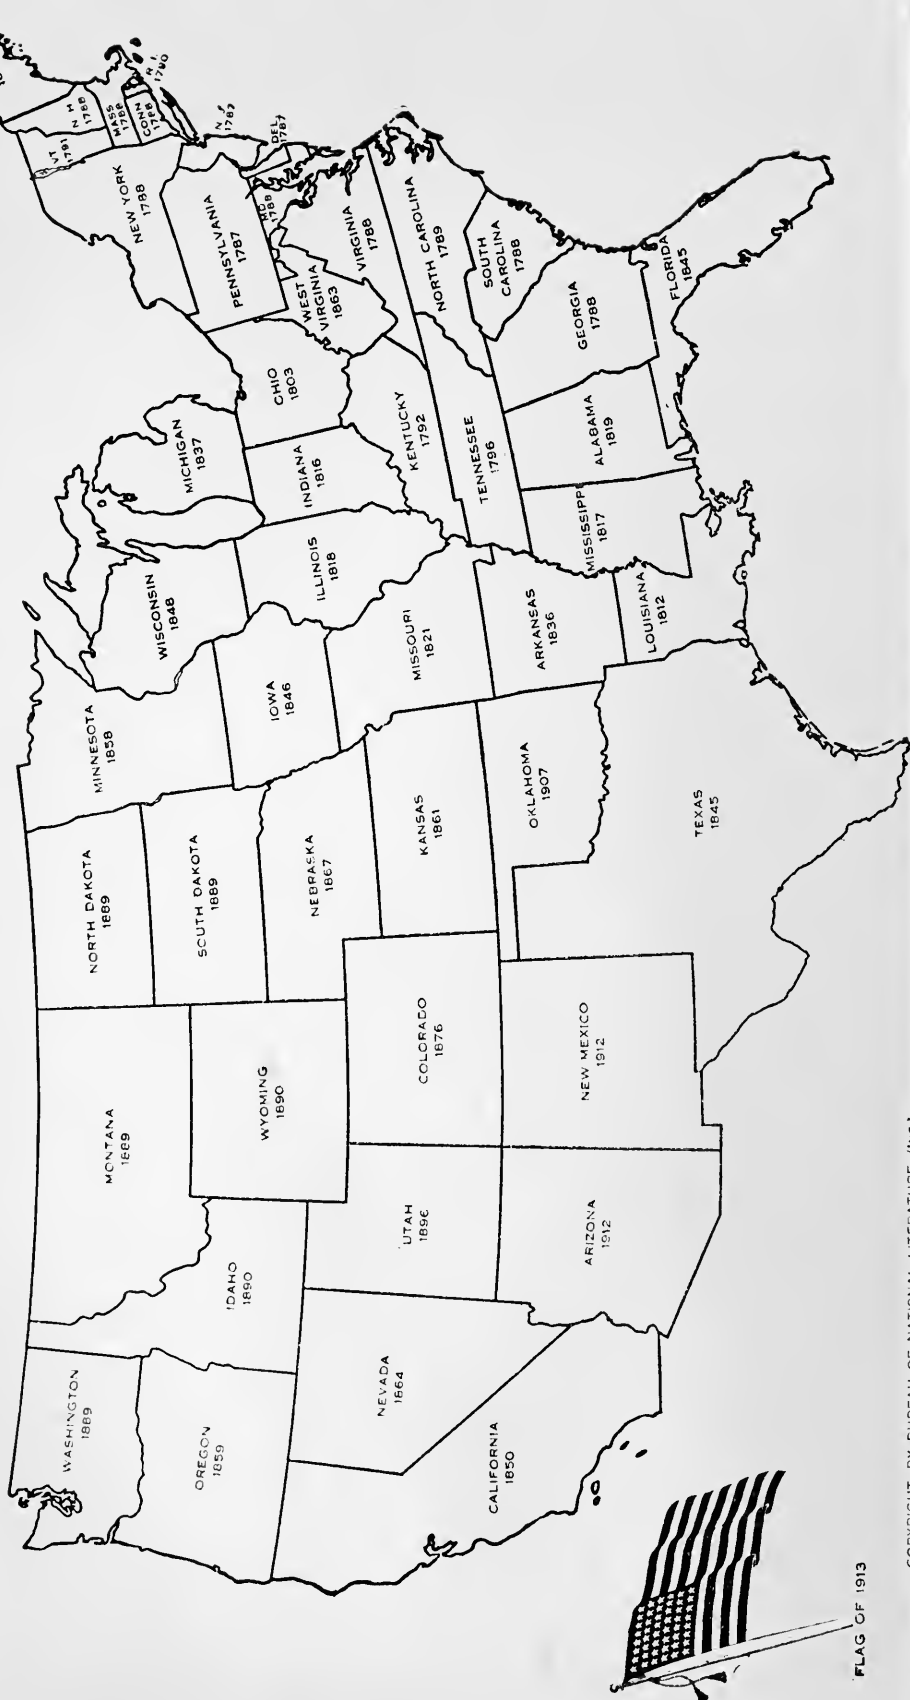

Federal Incorporation.—In his Message on the anti-trust law (page 7449), the President discussed the causes of the tendency of modern business to amass in ever-growing units, analyzed the beneficial and baneful effects of such amalgamation, defined direct and indirect restraint of trade, outlined the true intent and scope of the Sherman law as affecting monopolistic combinations, but not those actuated merely by desire to reduce production cost, condemned the Knight Sugar Trust decision, argued against amending the law, mentioned the inquiry into companies suspected of violations of the law which was contemplated by the Department of Justice if funds became available, and recommended the enactment of a law which would provide Federal charters for interstate commerce corporations and assure governmental supervision and control. (See Interstate Commerce.)

The Income Tax.—On the question of the income tax the President in his Message of June 16, 1909 (page 7389), recommended that, though he was convinced of the constitutionality of such a tax, it would be wiser not to contradict the Supreme Court by reenacting a law which in the Pollock case it had declared unconstitutional, but by a two-thirds vote to submit to the States an amendment to the organic law expressly conferring the requisite power. (See Amendments; Income Tax and Income Tax Cases.)

Interstate Commerce Law.—To make the Interstate Commerce Law a "complete and effective measure for securing reasonableness of rates and fairness of practices in the operation of interstate railroads, without undue preference to any individual or class over any others," adequate to "prevent the recurrence of many of the practices which have given rise in the past to so much public inconvenience and loss," the President on Jan. 7, 1910 (page 7441), sent to Congress a special message in which he recommended the creation of a new Court, to be called the United States Court of Commerce and to have jurisdiction over proceedings brought by carriers to nullify orders of the Interstate Commerce Commission. The President pointed out that carriers by injunctions could and did suspend the commission's orders for months and even years, and that few orders of any consequence escaped such tactics. By means of the new Court such proceedings could be promptly and consistently disposed of by Judges deeply versed in the intricacies of the subject. Its decisions were to be final excepting review by the Supreme Court, and even if it appealed from the order could not be stayed except by the Supreme Court. The President recommend-

EXTENT OF THE UNITED STATES DURING THE ADMINISTRATION OF PRESIDENT TAFT, 1909-1913.

NOT INCLUDING TERRITORIES

FLAG OF 1913

ed that the Commission be empowered to commence proceedings on its own initiative; that the law be amended so as to permit the changing of rates only after submission of the schedule to the Commission. In order that, if unsatisfactory, the proposed change might be stayed pending investigation; that its duties be confined to quasi-judicial functions, utilizing the Department of Justice to prosecute and defend suits under the law. By an act passed June 18, 1910, Congress put on the statute books the recommendations above summarized, but rejected two other suggestions of the President, first, that the issue of railroad securities be made subject to the Commission, and second, that rate agreements under certain circumstances be permitted. (See Interstate Commerce; Common Carriers.)

Conservation.—In the President's speech at St. Paul, Minn. (page 7935), he took the high ground that, as the successor to Theodore Roosevelt, he could not be other than an earnest advocate of every measure calculated "to prevent the continuance of the waste which has characterized our phenomenal growth in the past." But "conservation is national. It affects every man of us, every woman, every child. What I can do in the cause I shall do, not as President of a party, but as President of the whole people. Conservation is not a question of politics, or of factions, or of persons. It is a question that affects the vital welfare of all of us, of our children and our children's children." The President's conservation address, like his tariff speech, is replete with definite and detailed recommendations showing a minute study of the subject. The agricultural and mineral land laws should be left unchanged; the funds available for reclamation should be concentrated on selected projects, \$20,000,000 in bonds having been authorized for engineering purposes; the states severally must control the handling of the seventy-five per cent of existing forests which is privately owned; withdrawals had been legalized by a definite statute; oil, gas and phosphate lands, and the coal fields of Alaska should be conserved by a leasing system; and water-power sites should be conserved by leasing the Federal Government's riparian rights to users or transferring such rights to the states so as to complete their title to and control of both stream and site. (See Lands, Public; Conservation Commission.)

Ship Subsidy.—In President Taft's Inaugural and two Annual Messages he discussed the question of subsidizing steamship lines to South America under conditions assuring publicity by giving to them the profit on mail carried by them, urging that if action were not immediately taken we would be the only nation unable to avail ourselves of the Panama Canal when completed and that should war come we would find ourselves destitute of sailors and shipping, without which the navy is like arms without a body. The question of the subsidy was vigorously discussed in the last session of the Sixty-first Congress, but no action was taken. (See pp. 7374, 7435, 7503.) (See Subsidy; Merchant Marine.)

Navy Personnel Improved.—In order to match the superb vessels of the navy with efficiency in the personnel, Congress passed measures submitted and urged by President Taft in his Message of Feb. 25, 1910, which will reduce the ages at which line officers become captains and rear-admirals. (See page 7470.) (See Navy; Navy, Dept. of.)

Canadian Reciprocity.—On Jan. 26, 1911, the President sent to Congress a special message transmitting an agreement between the Department of State and the Canadian Government obligating both parties to at-

tempt to secure legislation which will reciprocally lower tariff rates on about six hundred items. (See page 7581.) In urging the passage of the treaty (which, as affecting tariff legislation, will have to pass both Houses) the President recalled Canada's neighborliness and friendship as shown in the settlement of all disputes and in the cooperation between the boards of railway control on both sides the border, dwelt upon the necessity of conserving our own resources by buying those of our neighbor, pointed out the similarity in labor and transportation conditions here and there, mentioned the harm to Americans which will accrue if the "imperial preference" doctrine becomes a tenet of Canadian political faith, maintained that the accession of a new supply of raw materials would inure to the benefit of all sections and, in prophetic vein, characterized the agreement as a step toward closer friendship between peoples related by blood, common sympathies and identical moral and social ideas. Animals, poultry, food stuffs, products of farm, garden and dairy, fruits, fish, oysters, salt, mineral waters, lumber, machinery, minor metal manufactures, coal, meats, flour, meal, farming utensils, fruit trees and Portland cement are the articles on which the tax is to be lowered or entirely removed. The effect of the proposed treaty, according to 1910 figures, would be to decrease the revenue of the United States by \$4,849,933, and that of Canada by \$2,560,579. (See Reciprocity.)

Turning to matters of administration, Taft took judicial appointments out of politics; made the taking of the thirteenth census non-political (page 7539); recommended and by executive order effected the extension of the civil service (pp. 7424, 7549); instituted a vigorous inquiry into the government service in the interest of economy and efficiency, which resulted in a \$52,000,000 saving in the 1911 estimates (pp. 7424, 7550); advocated as an improvement of efficiency the giving of pensions to supernannuated clerks (pp. 7425, 7551); and, in his message regarding the rivers and harbors bill of 1910, declared his intention of vetoing any future bill which does not concentrate the moneys thereby provided on a certain few projects which may then be carried to completion instead of diffusing at great cost temporary and futile activity over a multitude of projects (page 7489). President Taft was renominated by his party, but Mr. Roosevelt's candidacy split the party and resulted in the election of Wilson.

Taft, William H.:

- Agriculture, Department of—
 - Influence on foreign trade, 7374.
 - Operations of, in 1910, 7536.
 - Referred to, 7437.

- Zelaya, misrule of Nicaragua by, and overthrow of, 7500.
- Tahoe Forest Reserve**, proclaimed, 7307.
- Talladega (Ala.), Battle of.**—After the destruction of Tallasahatchee, Jackson was informed that 160 friendly Creek warriors, with their families, were hemmed in at Talladega, in Lashley's fort, by 1,000 hostile Indians. Nov. 8, 1815, Jackson set out with 1,200 infantry and 800 cavalry to raise the siege. By 4 o'clock the next morning they had surrounded the enemy, who, 1,080 strong, were concealed in the thickets. At daylight the battle began. It resulted in the complete rout of the savages. As many as 200 dead warriors were found and many others doubtless perished in the woods of the surrounding mountains. The number of the wounded could not be ascertained, but was large. The loss to the whites was 15 killed and 85 wounded.

Tallasahatchee (Ala.), Battle of.—The massacre at Fort Mims spread consternation throughout the region inhabited by the Creeks, and hardy volunteers came forward thirsting for vengeance. Gen. Jackson led the Tennessee militia across the line into Alabama. Upon his arrival at the Coosa he was informed that the Creeks were assembled at Tallasahatchee, a town in an open woodland, not far from the present village of Jacksonville, the county seat of Benton County, Ala., on the south-east side of the Tallasahatchee Creek. Jackson sent Gen. Coffee with 1,000 horsemen to destroy the town. Nov. 2, 1813, Coffee's men surrounded the place and the Indians came out to meet them. The battle was short, sharp, and desperate. The victory for the whites was complete. Every warrior was killed. None asked for quarter, and each fought to the death. At the close of the battle 186 bodies were counted on the plain. It is believed that 200 were killed. Eighty-four women and children were made prisoners. The loss to the whites was 5 men killed and 41 wounded.

Tammany.—In 1789 the Columbian Order was organized in New York City by William Mooney, as a counter move against the foundation of the so-called Aristocratic Society of the Cincinnati. In 1805 it was incorporated under the name of Tammany Society. This was in memory of Tammany, an aged, wise and friendly chief of the Delaware Indians. At this time charitable societies were also organized in Philadelphia and other cities and named in his honor. The only one of the number that survives is that in New York. William Mooney was the first grand sachem of Tammany, and was assisted by thirteen sachems, representing the governors of the thirteen states. The members wore Indian insignia. In 1811 the society built the original Tammany Hall, fronting on City Hall Park. Since then a local political party, favored by a majority of the members of the Tammany Society, has always had its headquarters in the house of the society, and has been popularly known as "Tammany Hall." In theory the Tammany Hall general committee has no relation to the Tammany Society save as tenant of the latter's edifice, yet in practice they are coordinate branches of one political system, the society being in effect the citadel of the controlling spirits of the Tammany Hall party. Tammany Hall claims to be the regular Democratic organization of the city and county of New York, though that claim has often been contested. By means of a thoroughly organized system of Tammany clubs and assembly district associations it has usually held a paramount place in city politics.

Taos (N. Mex.). Battle of.—Feb. 3, 1847, Col. Price, with about 400 Americans, arrived at the town of Don Fernando de Taos, on the top of the Taos Mountain, which had been the scene of the murder of Governor Bent and his party. The Mexicans, numbering 600, had taken refuge in a stone church and two other large buildings. They resisted the American assaults during Feb. 4 and on the morning of the 5th surrendered. The American loss was 54 killed and wounded; that of the Mexicans 152 killed and many wounded.

Tar Heel State.—A nickname for North Carolina (q. v.). (See also States); sometimes also nicknamed Old North State.

Target Practice. (See Navy.)

Tariff.—The word "tariff" is generally applied to the customs duties levied by Con-

gress on merchandise imported. Tradition identifies the word with the town of Tarifa, Spain. Here, during the Moorish occupancy of the country about Gibraltar, all vessels passing through the strait were compelled to put in and pay such duties as were demanded by the chiefs in possession. Among the Greeks and Romans a duty similar to the tariff of the present day was known, and in England, as early as 980, during the reign of Ethelred, duties on ships and goods were levied, to be paid at Billingsgate. Charles II. established a regular schedule of rates in 1663. After 1846 England gradually abolished her tariff duties, beginning with the repeal of the corn laws and continuing until 1891-1892, when revenue duties alone were collected, and those upon less than twenty articles.

In the United States the First Congress passed a tariff law levying on an average less than 8 per cent ad valorem on imports. This was approved by Washington July 4, 1789. Madison opened the discussion of this measure in Congress. South Carolina and Georgia favored a rate of 5 per cent, Pennsylvania one of 12 or more, while New England and Virginia succeeded in getting the rate raised a little above what the far south asked for, but placed it lower than the chief manufacturing states desired. The tariff of 1816 imposed duties of about 25 per cent on certain leading manufactures, under protest from the leading agricultural states of the south. In 1824 a new tariff act was passed, increasing among the changes made, duties on metals and agricultural products. Jan. 31, 1828, the "tariff of abominations," as it was named by its enemies, was introduced in the House. It embodied in part the recommendations of a national convention of manufacturers held at Harrisburg, Pa., but satisfied neither the friends nor the opponents of protection. This bill proposed a 41 per cent rate and was favored by Daniel Webster, who reversed his position of 1824. South Carolina protested against the proposed measure as unconstitutional and unjust and oppressive. North Carolina also protested, and Alabama and Georgia denied the power of Congress to lay duties for protection. July 14, 1832, President Jackson approved a bill reducing the tax on iron, increasing that on woollens, making some raw wools free, and leaving cotton unchanged. This bill retained the protective feature of the law of 1828, but reduced the taxes somewhat. South Carolina passed an ordinance nullifying this act (see Nullification), but her ordinance was rescinded after the approval of the compromise tariff of 1833. This measure, introduced by Clay and supported by Calhoun, provided for a gradual reduction of duties to a uniform rate, to be reached in 1842. It secured a revenue tariff by successive reductions. In 1842, the Whigs being in a majority, Congress enacted a protective tariff, which President Tyler vetoed (2033).

July 30, 1846, a tariff law was enacted which subordinated the principle of protection to that of revenue. It passed the House by a vote of 114 to 95 and the Senate by the casting vote of Vice-President Dallas. The average rate of duty was fixed at about 25 per cent. This was lowered to about 20 per cent by an act of 1857. In 1861 the principle of protection was reasserted in the Morrill Act, which increased the rates of 1857 about one-third. During the Civil War the tariff rates were repeatedly raised to meet the expenses of Government and stimulate manufacture. These rates were continued long after the

cessation of hostilities. In 1882 a tariff commission was appointed to visit different sections of the country in the interest of tariff revision. The commission recommended a reduction of 20 per cent in rates.

President Cleveland, in his message of Dec. 8, 1885 (page 4926), recommended a reduction of the tariff, and his message of Dec. 6, 1887 (page 5165), was devoted exclusively to this topic. From this time on, party lines began to be drawn on the tariff question, most of the Republicans favoring protection and the majority of advocates advocating a revision in the direction of lower duties. The Mills bill, framed largely in accordance with President Cleveland's views, passed the House, but failed in the Senate, where a bill embodying the ideas of the protectionists on tariff revision was substituted for it by the Republican majority. In the Fifty-first Congress, the Republicans being in control, passed the McKinley tariff act of 1890 raising the duties to an average of 48 per cent. By the elections of 1890 and 1892 the Democrats came into power, and in the Fifty-third Congress the House passed the Wilson bill providing for substantial reductions, especially on raw materials. Amendments were added in the Senate which essentially changed its character and the bill became law in 1894 without the President's signature. It provided for an income tax which was, however, declared unconstitutional by the Supreme Court.

The elections of 1894 and 1896 returned the Republicans to power, and in 1897 the Dingley law was passed, which imposed the highest rates of duty ever known in our history. It has been revised so far as concerned the Philippines in 1905, when a lower tariff came into force, and again in 1906, when the islands were given practically free trade with this country; of the few articles excepted, the most important were sugar, coffee, and tobacco.

The revision of the Dingley Tariff in 1909 is discussed by President Taft in his address at Winona (page 7393) which was evoked by the furious storm of criticism to which the tariff and its sponsors were subjected. This discontent produced a rupture in the Republican ranks, "insurgent" Congressmen lining up against "standpaters." The Federal patronage was employed to awaken insurgents to a sense of duty to the party, but without avail. Public sentiment on the question was expressed in the Democratic victory of 1910, the insurgent Republicans being mostly re-elected.

In the 1910 tariff, provision was made for the application of a maximum or minimum schedule of rates to the imports of a foreign country in accordance as it discriminates against or in favor of American goods; for corporation tax of one per cent of net earnings; for a revised tariff establishing free trade with the Philippines; for a Customs Court of Appeals consisting of five judges and six attorneys to prosecute customs cases before the Court; and for a tariff board.

The tariff board was conceded to be an advance, but its best friends were the foremost in terming it ineffectual. The kind of tariff board desired by President Taft is outlined in a bill introduced, Jan. 5, 1911, by Representative Longworth of Ohio, which provides for a permanent commission of five members to be appointed by the President and confirmed by the Senate, who, by the use of \$250,000 shall, in sittings here or abroad, investigate the cost of production of tariff-taxed goods, particularly as regards labor, for which

purpose they are to be vested with the power of issuing subpoenas, administering oaths, and taking testimony (Congress to act on cases of non-compliance with subpoenas), and, on demand expressed in a joint resolution, they shall report to Congress, or, on his demand, shall report to the President. (Page 7619.) (See also Foreign Import Duties; Import Duties, Tariff of 1913.)

With the election of President Wilson and a Democratic Congress in 1913 a downward revision of the tariff was assured, for Congress had already partially framed the Underwood bill, and President Wilson called an extra session April 8, 1913, and in his address called attention to the duty of the party in power, and urged immediate passage of the Underwood bill. Oct. 3, 1913, the President signed the bill. The main feature of the law was the income tax provision, and the next importance was the removal of all protection from agricultural products and meats. Duties on the manufacture of cotton and woolen goods were cut 10 to 50 per cent. Raw wool was admitted free, and sugar became free after three years. In the article Tariff of 1913 following the rates of the Wilson tariff are compared with those of the Payne-Aldrich act of 1909.

Tariff:

Bill to reduce duty on wool, vetoed by Taft, 7745.

Board of three members appointed to investigate maximum and minimum clauses, 7676.

Discussed by President Wilson, 7871. Engines and machine tools, reduction of rates on, vetoed, 7749.

Finished articles should not be put on free list when raw materials are dutiable, 7751.

Iron and steel, manufactures of, rates compared, 7750.

Iron and steel, manufactures of (Schedule C), vetoed, 7749.

Low rate on woolen goods would destroy fine goods industry, 7747.

Low rate on tops and yarn would disrupt industry, 7747.

Machine tools should be defined before being put on free list, 7751.

Minimum ad valorem rate should be 35 per cent, 7747.

Permanent board appointed, 7677.

Proposed reduction on wool would injure trade, 7748.

Protest of Germany against discriminating duty on sugar, recommendations regarding, 5957.

Rate on wool must offset difference in cost of production here and abroad, 7746.

Reduction of on wool in accordance with report of Tariff Board would give sufficient protection to industry, 7748.

Reduction of, should be based on non-partisan study of facts, 7751.

Schedule K (wool), 7677.

Wool, reduction of duty on, recommended, 7677.

Wool (Schedule K), 7677.

Tariff Board.—Section 2 of the Tariff act of 1909 provides that "from and after March 31, 1910, except as otherwise specially provided for in this section, there shall be levied, collected and paid on all articles when imported from any foreign country into the United States or into any of its possessions (except the Philippine Islands, Guam and Tutuila) the rates of duty prescribed by the schedules and paragraphs of the dutiable list of Section 1 of this act, and in addition thereto 25 per centum ad valorem, which rates shall constitute the maximum tariff of the United States. * * * To secure information to assist the President in the discharge of the duties imposed upon him by this section, and the officers of the Government in the administration of the customs laws, the President is hereby authorized to employ such persons as may be required."

Under this authorization President Taft on Sept. 15, 1909, appointed a non-partisan Tariff Board of three Republicans and two Democrats to perform the duties required by the act. Before the work of the board became available to Congress the Democratic party came into control and the Underwood tariff law was passed. (See Tariff of 1913.)

Wilson Tariff Board.—President Wilson expressed himself in favor of an out-and-out independent Tariff Board, Jan. 25, to Representative Claude Kitchin, chairman of the Committee on Ways and Means and chosen floor leader of the House Democrats.

As proposed by the President, such a commission would have specific powers to:

Investigate the administrative and fiscal effects of customs laws now in force or which may be passed in the future;

Determine the relations between rates of duties on raw materials and those on finished or partly finished products;

Investigate the effects of ad valorem and specific duties and of those which are a compound of ad valorem and specific;

Examine the arrangement of schedules of duties and the classification of the articles on the several schedules;

Investigate the provisions of law relating to the tariff, the regulations of the Treasury Department applying to invoices and other questions with application to the collection of customs duties;

Determine generally the working of the customs and tariff laws in their economic effects and administrative methods.

Foreign Trade Under the New Tariff.—Secretary Redfield transmitted to the Senate a detailed statement of the results of the Underwood-Simmons tariff act as reflected in the foreign trade of the country up to the time the war started in Europe. The statement was prepared in the Bureau of Foreign and Domestic Commerce in response to a Senate Resolution of Jan. 17, 1916, calling upon the Secretary of Commerce for information in regard to trade under the present tariff.

The report calls particular attention to the import trade for the fiscal year 1914, as that year covers 12 of the 13 months immediately preceding the outbreak of hostilities in Europe and is the period held to indicate most accurately the effect the new tariff has had upon American imports. According to statistics given in the report the increase in imports for 1914 amounted to \$81,000,000, or 4.5 per cent, as compared with 1913. This increase, the report states, is only \$20,000,000 in excess of the average

annual increase in imports for the 17 years from 1899 to 1915, and is less than the average increase during the last few years of that 17-year period. There was an increase in 12 of the 17 years, varying from \$245,000,000 in 1910 to \$80,000,000 in 1902.

Free goods, not dutiable goods, are responsible for the increased imports for the fiscal year 1914, the report states. Articles subject to duty, if considered as a single class, decreased perceptibly. Imports free of duty increased from \$988,000,000 to \$1,128,000,000, while the imports of dutiable goods fell off from \$825,000,000 to \$766,000,000. The increase in the total free imports was due largely to the transfer of many important articles from the dutiable list to the free list by the tariff act of 1913. Among the articles so transferred are iron ore, pig iron, Bessemer ingots, steel rails, baling and fencing wire, cotton ties, wool, flax, hemp, burlap, cotton bagging, lumber, chemicals, wood pulp, leather, boots and shoes, agricultural implements, food animals, corn, meat, milk, cream, and, when imported from countries that admit free of duty similar products from the United States, wheat, wheat flour, and potatoes.

The close correspondence between the estimated customs receipts and the actual receipts under the Underwood-Simmons tariff is remarkable, the report shows. It is estimated that the bill as it passed the House of Representatives would produce during its first full year of operation \$258,000,000; as it passed the Senate, \$248,000,000; and as finally enacted, \$249,000,000, or \$20,750,000 a month. Since the new rates on sugar and molasses became effective March 1, 1914, the law was in full operation only five months before the outbreak of the war. During the quarter from April 1 to June 30 the duties amounted to \$63,600,000, or \$21,200,000 a month. The receipts, therefore, exceeded the expected returns by \$450,000 a month, or at the rate of \$5,000,000 a year.

In comparing the import and export trade of the country, the report says:

"We import more than we export of crude foodstuffs and meat animals and of miscellaneous articles, while we export more than we import of the remaining groups—crude materials for use in manufacturing, foodstuffs partly or wholly manufactured, manufactures for further use in manufacturing, and manufactures ready for consumption. It is of interest to note the chief article of import and of export falling within each of these groups. Of crude materials for use in manufacturing, hides are most largely imported and cotton most largely exported. Of foodstuffs in crude condition, including food animals, coffee represents the largest import and wheat the largest export. Of partly or wholly manufactured foodstuffs, sugar leads in the importation and wheat flour in the exportation. Wood pulp stands first among the imports and copper in pigs and bars first among the exports of manufactures for further use in manufacturing. Of manufactures ready for consumption, manufactures of vegetable fibres other than cotton stand first among the imports and machinery first among the exports. In the miscellaneous group, clover seed is the chief import and horses the chief export. This comparison is based on the fiscal year 1914. The obvious lesson to be drawn from this comparison is the diversity of our import and export trade. Our imports consist largely of articles which for natural reasons can not be produced here or for economic or geographic reasons can be produced more cheaply abroad. The exports from this country represent the articles which, by reason of our agricultural or

mineral wealth, or by reason of our industrial organization, we can produce better or more cheaply than the producer in other countries."

The effect of the tariff on wages is one of the much-debated points on which the report touches. It is shown that there is a large number of industries in which, under the present tariff, the average duty collected on imports is greater than the average expenditure for wages by domestic manufacturers. This group includes such diverse lines as flour, sugar, butter, and condensed milk, soap, candles, and glue, hosiery, corsets, and buttons. Even in the case of pottery, where wages constitute nearly 40 per cent of the entire value of the output, the average ad valorem duty on competing products is still higher.

Another group consists of industries in which the payment for wages constitute a larger share of the product than does the import duty in the case of imported goods. This group covers some of our most successful industries. Rubber goods, steel works and rolling mills, carriage factories, bicycles, motor cycles, locomotives, clocks and watches and firearms and ammunition are among the industries in which the domestic producer has to pay proportionately more for wages than his foreign competitor pays in the shape of import duties.

Tariff Board:

Report of, submitted in justification of veto of wool bill, 7746.

Work of, commended by Taft, 7746.

Tariff Commission.—The plea long coming from all classes and parts of the country to "take the tariff out of politics" was finally met in the Tariff Bill passed by Congress on September 8, 1916. That bill provided for a Tariff Commission of 6 members, not more than 3 of whom are to belong to the same political party. The members are appointed by the President, by and with the consent of the Senate, for a period of 12 years' service, and command a yearly salary of \$7,500. Provision is made for power to subpoena witnesses, conduct investigations, etc., in order to make the work of the Commission effective. The duties of the Commission are to investigate and to report annually on the effect of the tariff rates to Congress, and at any other time when requested to the President or to the Tariff Committees of the House and the Senate. The members of the first commission appointed under the act of 1916 were: Prof. F. W. Taussig, of Harvard University, Chairman; ex-Congressman David J. Lewis, of Maryland; Edward P. Costigan, of Colorado; ex-Congressman William Kent, of

TABLE OF LEADING ARTICLES IMPORTED INTO THE UNITED STATES OR ANY OF ITS POSSESSIONS (EXCEPT PHILIPPINE ISLANDS, GUAM AND TUTUILA), GIVING RATES AT ENTRY BY THE TARIFF ACT OF 1913 COMPARED WITH THE TARIFF ACT OF 1909.

(The following table covers only the articles of principal importance imported.) (ad val.—ad valorem; n.s.p.f.—not specially provided for.)

ARTICLES	RATES OF DUTY UNDER	
	Law of 1909	New Law of 1913
<i>Schedule A—Chemicals, Oils and Paints:</i>		
Acids, n.s.p.f.....	25 p.c. ad val.	15 p.c. ad val.
Alcoholic compounds, n.s.p.f.....	60c. lb. and 25 p.c. ad val.	10c. lb. and 20 p.c. ad val. to 40c. lb. and 20 p.c. ad val.
Alkalies, alkaloids, and all chemical and medicinal compounds, preparations, mixtures and salts, and combinations thereof....	25 p.c. ad val.	15 p.c. ad val.
Ammonia, Carbonate of.....	11c. lb.	3c. lb.
Drugs.....	11c. lb. and 10p.c. ad val.	10 p.c. ad val.
Glue, value not above 10c. per pound.....	21c. lb.	1c. lb.
Oil, castor, gals.....	35c. gal.	12c. gal.
Oil, olive in bottles, etc., gals.....	50c. gal.	30c. gal.
Oil, whale, gals.....	8c. gal.	5c. gal.
Opium, crude and not adulterated, containing 9 per cent. and over of morphia, lbs.....	\$1.50 lb.	\$3.00 lb.
Perfumery, cosmetics, containing alcohol.....	60c. lb. and 50 p.c. ad val.	40c. lb. and 60 p.c. ad val.
Perfumery, cosmetics, not containing alcohol.....	60 p.c. ad val.	60 p.c. ad val.
Soap, Castile.....	11c. lb.	10 p.c. ad val.
Soap, toilet.....	50 p.c. ad val.	30 p.c. ad val.
Soda, bi-carbonate of.....	5-8c. lb.	1c. lb.
Sponges, not advanced in value by chemical processes.....	20 p.c. ad val.	10 p.c. ad val.

House or cabinet furniture, and manufactures of wood or bark, n.s.p.f.....	35 p.c. ad val.	15 p.c. ad val.
<i>Schedule E—Sugar, Molasses and Manufactures of:</i>		
Sugars and syrups of cane juice.....	Above 75 degrees polariscope 95-100 of 1c. per lb. and for each additional degree 35-1000 of 1c. per lb.	Not above 75 degrees polariscope 71-100 of 1c. per lb.; for every additional degree 26-1000 of 1c. per lb.
Saccharin.....	65c. lb.	65c. lb.
Sugar cane in its natural state, or unmanufactured.....	20 p.c. ad val.	15 p.c. ad val.
Molasses, not above 40 degrees.....	20 p.c. ad val.	15 p.c. ad val.
Maple sugar and maple syrup.....	4c. lb.	3c. lb.
Glucose or grape sugar.....	1½c. lb.	1½c. lb.
Sugar candy, valued more than 15c per pound, and chewing gum.....	50 p.c. ad val.	25 p.c. ad val.
<i>Schedule F—Tobacco and Manufactures of:</i>		
Tobacco, wrapper, filler, leaf.....	\$1.85 lb. to \$2.50 lb.	\$1.85 lb. to \$2.50 lb.
Snuff.....	55c. lb.	55c. lb.
Cigars and cigarettes.....	\$4.50 lb. and 25 p.c. ad val.	\$4.50 lb. and 25 p.c. ad val.
<i>Schedule G—Agricultural Products and Provisions:</i>		
Horses and mules and all live animals, n.s.p.f.....	25 p.c. ad val.	10 p.c. ad val.
Barley, bushel of 48 pounds.....	30c. bushel	15c. bushel
Barley malt, bushel of 34 pounds.....	45c. bushel	25c. bushel
Oatmeal and rolled oats.....	1c. lb.	30c. 100 lbs.
Oats, bushel.....	15c. bushel	6c. bushel
Rice, cleaned.....	2c. lb.	1c. lb.
Macaroni, vermicelli, and all similar preparations.....	1½c. lb.	1c. lb.
Butter and substitutes.....	6c. lb.	2½c. lb.
Cheese and substitutes therefor.....	6c. lb.	20c. p.c. ad val.
Hay.....	\$4 ton	\$2 ton
Honey.....	20c. gal.	10c. gal.
Hops.....	16c. lb.	16c. lb.
Seeds, flax seed, linseed and other oil seeds, n.s.p.f.....	25c. bushel	20c. bushel
Seeds, castor.....	25c. bushel	15c. bushel
Fish, except shell fish, packed in oil or in oil and other substances.....	1c. lb.	25 p.c. ad val.
Fruits, apples, peaches, quinces, cherries, plums and pears.....	25c. bushel	10c. bushel
Fruits, preserved, n.s.p.f.....	2c. lb.	1c. lb.
Fruits, oranges, grapefruit, lemons and limes in bulk.....	1c. lb.	½c. lb.
Pineapples, in bulk.....	\$8 per 1,000	\$5 per 1,000
Nuts of all kinds, shelled or unshelled, n.s.p.f.....	1c. lb.	1c. lb.
Spices, unground, n.s.p.f.....	Free list	1c. lb.
Chocolate and cocoa unsweetened, prepared or manufactured, n.s.p.f.....	Graduated rate	8 p.c. ad val.
Chocolate and cocoa, sweetened, prepared or manufactured, valued at 20c. per pound or less.....	Graduated rate	2c. lb.
<i>Schedule H—Spirits, Wines and Other Beverages:</i>		
Brandy and other spirits manufactured or distilled from grain or other materials, n.s.p.f.....	\$2.60 gal.	\$2.60 gal.
Champagne and all other sparkling wines, quarts.....	\$9.60 per doz.	\$9.60 per doz.
Wines, still, in casks, vermuth and similar beverages.....	45c. gal.	45c. to 60c. gal.
Wines, still, in bottles, quarts.....	\$1.85 per doz.	\$1.85 per doz.
Malt liquors, in bottles, jugs, gallons.....	45c. gal.	45c. gal.
Mineral waters, in bottles, quarts.....	30c. doz.	20c. doz.
<i>Schedule I—Cotton Manufactures:</i>		
Cotton thread, uncolored, according to numbers.....	2½c. lb. to 28c. lb.	5 to 25 p.c. ad val.
Cotton thread, colored, bleached, according to numbers.....	6c. lb. to 67c. lb.	7½ to 27½ p.c. ad val.

Tariff of 1913 Messages and Papers of the Presidents

TABLE OF LEADING ARTICLES IMPORTED INTO THE UNITED STATES—Continued

ARTICLES	RATES OF DUTY UNDER	
	Law of 1909	New Law of 1913
Cotton cloth, uncolored, according to numbers.....	1c. sq. yard to 8c. sq. yard	7½ to 27½ p.c. ad val.
Cotton cloth, colored, bleached, according to numbers.....	Graduated rate	10 to 30 p.c. ad val.
Cotton handkerchiefs or mufflers, hemmed or hemstitched, n.s.p.f.....	4¼c. sq. yard and 10 p.c. ad val.	30 p.c. ad val.
Cotton clothing, ready made.....	50 p.c. ad val.	30 p.c. ad val.
Cotton hosiery, pairs.....	70c. doz. to \$2 doz. and 15 p.c. ad val.	\$1.20 doz. pairs and 30 to 50 p.c. ad val.
Cotton shirts, drawers, and all underwear, n.s.p.f.....	60c. doz. and 15 p.c. ad val. to \$2.25 doz. and 35 p.c. ad val.	30 p.c. ad val.
Cotton, plushes, velvets, corduroys.....	9c. sq. yard and 25 p.c. ad val. to 12c. sq. yard and 25 p.c. ad val.	40 p.c. ad val.
Lace manufactures.....	60 p.c. ad val.	35 to 45 p.c. ad val.
<i>Schedule J—Flax, Hemp and Jute and Manufactures of:</i>		
Flax hamp or ramie single yarns, finer than 80 lea or number....	35 p.c. ad val.	10 p.c. ad val.
Mattings for floors.....	3¼c. sq. yard	2¼c. sq. yard
<i>Schedule K—Wool and Manufactures of:</i>		
Combed wool or tops, n.s.p.f.....	Graduated rate	8 p.c. ad val.
Yarns.....	Graduated rate	18 p.c. ad val.
Cloths, knit fabrics, felts not woven and all manufactures of every description, wholly or chiefly of wool, n.s.p.f.....	Graduated rate	35 p.c. ad val.
Blankets, n.s.p.f., and flannels.....	Graduated rate	25 to 30 p.c. ad val.
Dress goods, women's and children's.....	Graduated rate	35 p.c. ad val.
Clothing, ready made and wearing apparel of every description, n.s.p.f.....	44c. lb. and 60 p.c. ad val.	35 p.c. ad val.
Carpets, woven whole for rooms, and rugs.....	10c. sq. foot and 40 p.c. ad val.	50 p.c. ad val.
Plushes, velvets and all other pile fabrics, cut or uncut.....	Graduated rate	45 p.c. ad val.
<i>Schedule L—Silk and Silk Goods:</i>		
Silk partially manufactured, or spun silk.....	35 p.c. ad val.	20c. lb. to 35 p.c. ad val.
Silk, wearing apparel.....	60 p.c. ad val.	50 p.c. ad val.
Silk, yarns, threads.....	45c. lb. to 60c. lb.	35 to 60 p.c. ad val.
Silk, all manufactures of, n.s.p.f.....	Graduated rate	45 p.c. ad val.
<i>Schedule M—Papers and Books:</i>		
Printing paper, other than paper commercially known as hand-made or machine hand-made, valued above 2½c. per lb., n.s.p.f.....	3-10c. lb. to 8-10c. lb.	12 p.c. ad val.
Books, of all kinds, bound or unbound pamphlets, engravings, photographs, n.s.p.f.....	25 p.c. ad val.	15 p.c. ad val.
Paper, manufactures of, n.s.p.f.....	35 p.c. ad val.	25 p.c. ad val.
Playing cards.....	10c. pack and 20 p.c. ad val.	60 p.c. ad val.

THE FREE LIST (Subject to change by conference committee)

Acids (not provided for in above list under Schedule A).	Copper, in plates, bars, ingots or pigs, n.s.p.f. and ore.	Hemp, n.s.p.f.	Nux vomica.
Aconite.	Copperas.	Herbs, used as drugs, n.s.p.f.	Oakum.
Agates, unmanufactured.	Cork, unmanufactured.	Hides.	Oils not provided for in list under Schedule A.
Agricultural implements.	Corn.	Hones and whetstones.	Orange juice, peel, not preserved, candied or dried.
Albumen, n.s.p.f.	Corn-meal.	Hoop iron or steel, coated or not coated with paint.	Ore, cobalt, copper, emery, gold, iron, manganese, manganiferous iron, nickel, silver, tin, tungsten-bearing.
Alcohol.	Cotton and cotton bagging.	Hoops, iron or steel, cut to lengths.	Paper, printing, n.s.p.f. stock, crude.
Ammonia, nitrate and sulphate of.	Cotton gins.	Horns and parts of.	Paraffin and paraffin oil.
Animals brought into U. S. temporarily or for breeding purposes.	Cotton waste.	Horsehair.	Parchment.
Animals, wild.	Cottonseed oil.	Horseshoe nails.	Paris green.
Anthracite coal.	Cream.	Horsehoes.	Pearl, mother of, and pearl shells.
Antixins.	Croton oil.	Houshold effects.	Pebbles, Brazilian.
Aromatic (not garden) seeds.	Curry.	Ice.	Periodicals and newspapers issued within 6 months of time of entry.
Arrowroot, not manufactured.	Cyanide of potassium and soda.	India rubber, crude.	Personal effects.
Arsenic.	Darning needles.	Indigo.	Petroleum.
Art, works of.	Drawings.	Ingots.	Phosphates, crude.
Articles returned after having been exported.	Drugs, not advanced.	Insects' eggs.	Phosphorus.
Asbestos, unmanufactured.	Dyeing and tanning materials.	Instrumenta, philosophical and scientific.	Photographic, and moving picture films not exposed or developed.
Asphaltum.	Dyewoods, n.s.p.f.	Inventions, models of.	Pigs, copper, iron.
Bacon.	Engravings, n.s.p.f.	Iodine, crude and resublimed.	Pipe, cast-iron.
Barguing for Cotton, etc.	Etchings, n.s.p.f.	Ipecac.	Plants, fruits, tropical and semi-tropical, for propagation or cultivation.
Barred fence wire.	Evergreen seedlings.	Iron Ore.	Rapeseed.
Barks, n.s.p.f.	Explosive substances.	Iron or steel bands, cut to lengths and manufactures of.	Rattan.
Beans, n.s.p.f.	Extracts, n.s.p.f.	Iron or steel billets.	Reapers.
Beef, fresh.	Fans, common palm leaf.	Iron or steel nails, rails and scrap.	Reeds, unmanufactured.
Beeswax.	Fencing, barbed and galvanized wire.	Junk, old.	Regalia and gens, statuary and casts of sculpture.
Belted leather.	Ferro Manganese.	Jute.	Roots, n.s.p.f.
Benzine.	Fibres and grasses.	Kerosene.	Rye and rye flour.
Berries, n.s.p.f.	Films, moving picture.	Kindling wood.	Saddlery.
Bibles.	Firewood.	Lamb.	Safety lamps.

1909, discussed, 7618, 7625, 7631.

Tariff of 1913.—Shortly after his inauguration in 1913, President Wilson called Congress together in extra session, and in his opening address (page 7871) pointed out the duty laid upon the party by the recent elections, which had given the Democrats control of both branches of Congress and the Executive. The preceding tariff law was accordingly passed.

Tax, Income. (See Income Tax.)

Tax, Inheritance. (See Inheritance Tax.)

Tax, Poll. (See Poll Tax.)

Taxation.—The exaction of money from the individual for the use of the state is a function of all forms of government. The generally accepted theory of taxation in America is that money to be used in the service of all the citizens of the state is justly raised by taxation; that a tax which does not bear equally upon all or which, bearing equally upon all, is used only for the benefit of a few is unjust. The direction taken by all efforts at tax reform is toward self-annexation—i. e., the community as a whole to decide what is required of each individual for the public expense. Out of this principle grew the doctrine that no tax can be levied save by the representatives of the people who must pay it. It was in defense of this principle that the American colonists objected to the stamp tax imposed by Parliament and raised the claim that "taxation without representation" is tyranny. The tax levied by a conquering nation upon a vanquished foe is tribute. Direct taxation is authorized by the Constitution in proportion to the population. The first direct tax was for \$2,000,000, and was levied pro rata upon the sixteen states existing in 1798. Others have since been levied, notably that of 1861, when \$20,000,000 was levied in this manner for prosecuting the war. Three-fourths of this

amount was by act of March 2, 1891, refunded to the states. Congress is forbidden by the Constitution to lay any tax or duty on exports (page 20). States are forbidden to lay duties on either exports or imports, but may resort to direct taxation. Until the Civil War the federal government relied chiefly upon duties upon imports for its revenue, but since that time an internal-revenue tax has been collected. Income taxes have become established and inheritance taxes have been recommended. State taxation is direct and is assessed upon real and personal property, upon privileges, and upon individuals or polls. Before 1800 most of the states passed laws to regulate taxation. All except Delaware levied a tax on land, and nine of the original thirteen states collected a poll tax. The systems of county, state, and municipal taxation are numerous and constantly changing. According to the contention of those who favor the single-tax theory, taxation should be solely upon land values, exclusive of improvements. (See Income Tax; Inheritance Tax; Internal Revenue; Single Tax; Tariff.)

Taxes, Direct.—Section 8 of Article I of the Constitution authorizes Congress to lay and collect taxes. During the history of the Government it has not been deemed necessary to lay direct taxes but five times—in 1798, 1813, 1815, 1816, and 1862. The last time was during the Civil War, when a direct tax of \$20,000,000 was levied, to be proportionately assessed against all lots of ground with their improvements and dwelling houses. The operation of the act was suspended July 1, 1872, and by an act of March 2, 1891, \$15,000,000 of this amount was refunded to the states. The earlier direct taxes were levied on houses, lands, and slaves. (See also Income Tax; Inheritance Tax.)

Taylor, Zachary.—March 5, 1849–July 9, 1850.

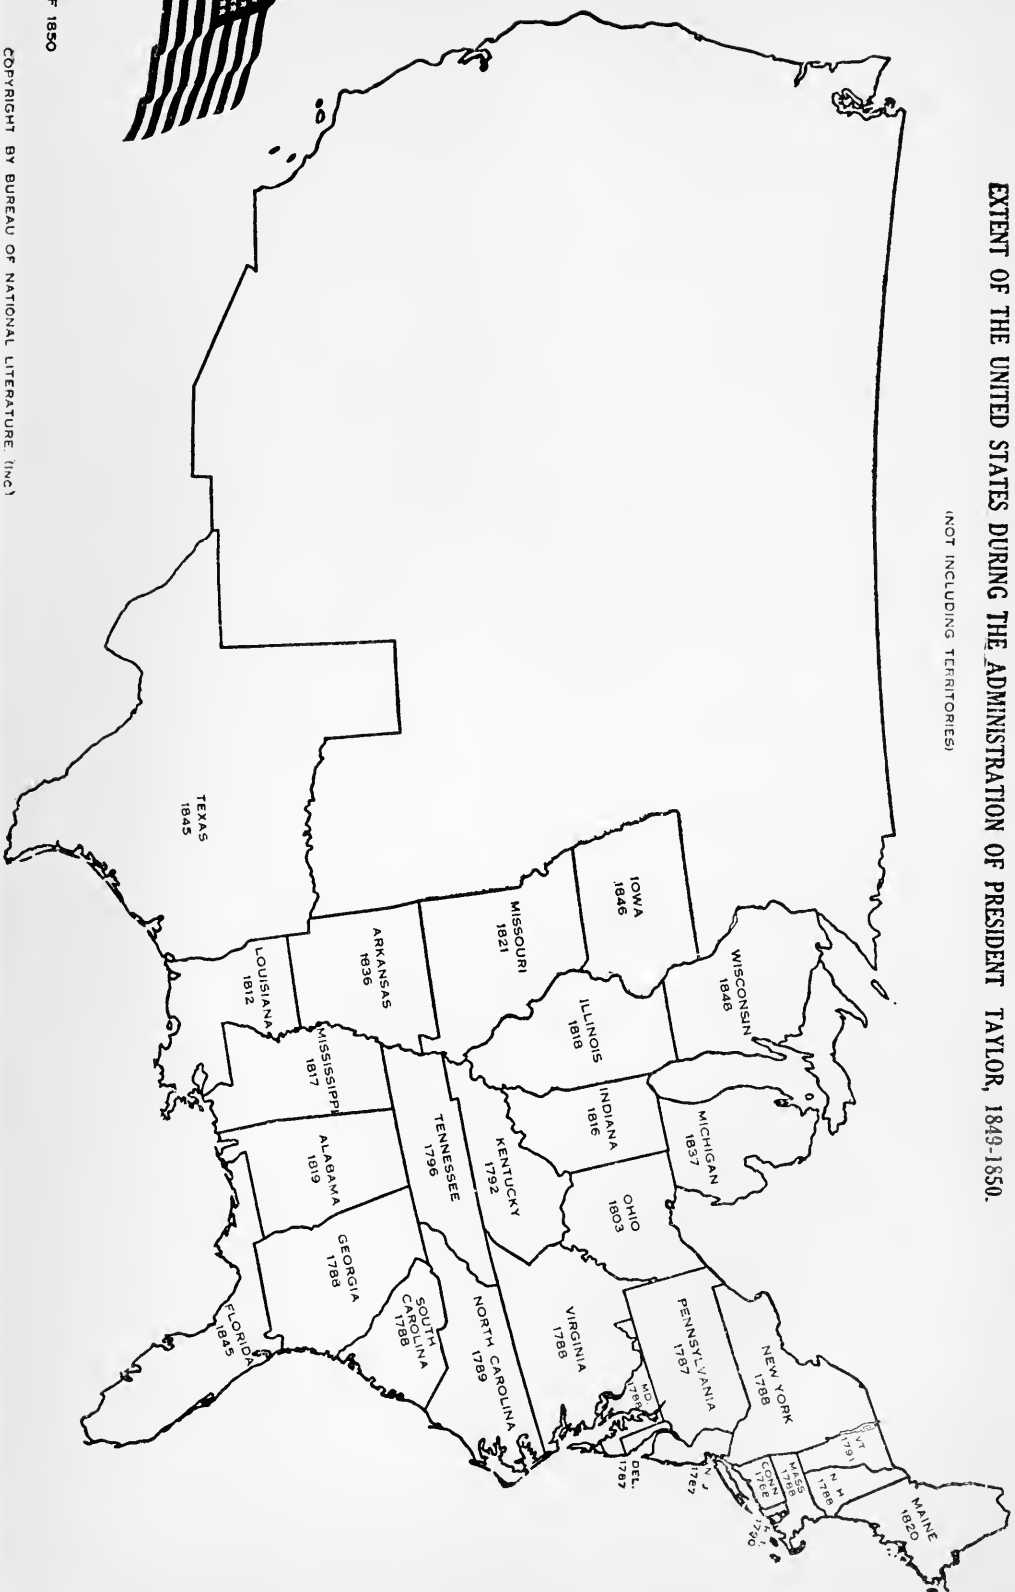

Sixteenth Administration.—Whig.
Vice-President—Millard Fillmore.
Secretary of State—
John M. Clayton.

EXTENT OF THE UNITED STATES DURING THE ADMINISTRATION OF PRESIDENT TAYLOR, 1849-1850.

(NOT INCLUDING TERRITORIES)

FLAG OF 1850

Secretary of the Treasury—

William M. Meredith.

Secretary of War—

George W. Crawford.

Secretary of the Navy—

William B. Preston.

Secretary of the Interior—

Thomas Ewing.

Postmaster-General—

Jacob Collamer.

Attorney-General—

Reverdy Johnson.

Taylor was elected by the Whig party, Nov. 7, 1848. He was nominated at the Whig National Convention at Philadelphia, June 7 and 8, 1848. Clay was the next most popular candidate for nomination.

Platform.—The platform endorsed General Taylor's candidacy, proclaimed Washington's administration as the model, supported the Mexican War, and solicited the support of the Whig party.

Opposition.—The Free-Soil Convention, or Barnburners, and the Abolitionists supported Van Buren. At the Free-Soil Convention at Buffalo, Aug. 9 and 10, Van Buren was formally nominated on a platform maintaining the rights of free labor against the slave power and the securing of a free soil for a free people, proposing no Federal interference with slavery, citing the Jefferson proviso of 1800 against the extension of slavery, advocating the prohibition of slavery in all new territory, demanding freedom in Oregon, cheap postage, and government retrenchment, supporting internal improvements, recommending free grants of land to settlers, and advising rapid payment of the public debt. The Democratic National Convention at Baltimore, May 22-26, 1848, nominated Lewis Cass on a platform which included the platforms of 1840 and 1844, endorsed and justified the Mexican War, expressed sympathy with the republicans of France, denounced monopolies and exclusive legislation, and heartily endorsed the policies of Polk.

Vote.—The popular vote cast by thirty States gave Taylor, 1,369,601; Cass, 1,220,544; and Van Buren, 291,263. The electoral vote, counted on Feb. 14, 1849, gave Taylor 163 and Cass 127.

Party Affiliation.—Taylor's continuous service in the army of the United States left him entirely free from party or sectional attachments. When his name was brought forward for nomination at the Whig convention, several resolutions were offered seeking to bind Taylor to the support of such Whig policies as the non-extension of slave territory, no more foreign acquisition by conquest, the protection of American industries, and opposition to the usurpation of authority by the Executive. But these resolutions were ruled out of order. Upon all of these questions, and upon Whig policies generally, Taylor had never distinctly declared himself. He was the only man available who could heal the breach in the party and unite all the discordant elements with possible hope of success. Although the Whigs had opposed the Mexican War with vehemence, they nevertheless chose as their candidate a man who had played the most important part in the prosecution of the war.

Political Composition of Congress.—In the Thirty-first Congress (1849-1851), the Senate, of 62 members, was composed of 35 Democrats, 25 Whigs, and 2 Free-Soil; and the House, of 227 members, was made up of 116 Democrats and 111 Whigs. In the Thirty-second Congress (1851-1853), the Senate, of 62 members, was composed of 36 Democrats, 23 Whigs, and 3 Free-Soil; and the House, of 233 members, was made up of 140 Democrats, 88 Whigs, and 5 Free-Soil.

Foreign Policy.—The ratification of the Clayton-Bulwer Treaty (see Great Britain, Treaties with) took place during the administration of President Taylor. The question of the Panama railway, upon which it bore, was referred to in President Taylor's First Annual Message (page 2555) and again in the message (page 2580) presenting the Clayton-Bulwer Treaty to the Senate for ratification. In expressing his reasons for the conclusion of this treaty, he says: "At the time negotiations were opened with Nicaragua for the construction of a canal through her territory I found Great Britain in possession of nearly half of Central America, as the ally and protector of the Mosquito king."

Finances.—The public debt on July 1, 1849, amounted to \$63,061,858.69. In speaking of the increase, President Taylor said (page 2555): "The extraordinary expenses of the Mexican War and the purchase of California and New Mexico exceed in amount this deficit, together with the loans heretofore made for these objects. I therefore recommend that authority be given to borrow whatever sum may be necessary to cover that deficit. I recommend the observance of strict economy in the appropriation and expenditure of public money." He leaves the matter of the sub-treasury system to the wisdom of Congress, and adds: "If continued, important modifications of it appear to be indispensable."

Tariff.—In his First Annual Message (page 2556) President Taylor advocated a revision of the tariff so as to increase the revenue. He said: "I do not doubt the right or duty of Congress to encourage home industry, which is the great source of national as well as individual wealth and prosperity. I look to the wisdom and patriotism of Congress for the adoption of a system which may place home labor at last on a sure and permanent footing and by due encouragement of manufactures give a new and increased stimulus to agriculture and promote the development of our vast resources and the extension of our commerce." He strongly recommends the placing of specific duties instead of *ad valorem*, and suggested the fixing of duties high enough "to afford substantial and sufficient encouragement to our own industry and at the same time so adjusted as to insure stability."

Tender.—The offer to a creditor of any kind of money which the law defines as legal. (See Legal Tender Cases.)
Tennessee.—One of the southern group of states. Nicknames: "The Volunteer State"; "The Big Bear State"; motto: "Agriculture; Commerce." It lies between lat. 25° and 36° 35' north and long. 81° 37' and 90° 15' west. Tennessee is bounded on the north by Kentucky and Virginia, on the east and southeast by North Carolina (separated by the Great Smoky and Bald ranges of the Alleghanies), on the south by Georgia, Alabama and Mississippi, and on the west by Arkansas and Missouri (separated by the Mississippi River). The area is 42,022 square miles. The eastern portion of the state is mountainous, while the extreme western part, bordering on the Mississippi River, consists of a flat alluvial plain, where vegetation grows with almost tropical luxuriance. Between these two extremes are the valley of the Tennessee in its southern course, an important agricultural region, and the Cumberland Plateau, a table-land with an elevation of 2,000 feet. Extending from this plateau to the Tennessee River in its northern course through the state lies the great central basin, sometimes called the Garden of the State. West of the Tennessee Valley rises another fertile plateau before the descent to the lowlands of the Mississippi. The leading productions are corn, wheat, cotton, and live stock. Tennessee produces some of the finest tobacco grown in the United States. Manufactures of cotton goods and iron have grown up since the Civil War. The capital, Nashville, is one of the greatest educational centers in the South.
 The first permanent settlement was made in 1769 at Watauga by immigrants from North Carolina. When North Carolina proposed to cede this territory to the General Government these settlers objected and organized a state under the name of Franklin

(q. v.). This government was overthrown and a Territory was organized in 1790. The state was admitted to the Union June 1, 1796. In January, 1861, a proposal to secede from the Union was defeated by popular vote, but carried in the election of June 8 of the same year. The state was the scene of some of the fiercest battles of the Civil War, including those of Island No. 10, Nashville, Lookout Mountain, Murfreesboro, Fort Donelson, Shiloh, Missionary Ridge, etc. It was readmitted into the Union in 1866.

Statistics of agriculture collected for the last Federal census place the number of farms in the State at 246,012, comprising 20,041,657 acres, valued, with stock and improvements, at \$612,520,836. The average value of land per acre was \$18.53 against \$9.93 in 1900. The value of domestic animals, poultry, etc., was \$110,706,078, including 996,529 cattle, valued at \$20,690,718; 349,709 horses, \$39,320,044; 275,855 mules, \$35,100,810; 1,387,938 swine, \$7,329,622; 795,033 sheep, \$3,009,196; poultry, \$3,757,337. The yield and value of field crops in 1911 was: corn, 3,400,000 acres, 91,120,000 bushels, \$55,583,000; wheat, 720,000 acres, 8,280,000 bushels, \$7,949,000; oats, 315,000 acres, 6,142,000 bushels, \$3,071,000; rye, 19,000 acres, 226,000 bushels, \$224,000; potatoes, 38,000 acres, 1,558,000 bushels, \$1,683,000; hay, 400,000 acres, 400,000 tons, \$6,680,000; tobacco, 77,000 acres, 62,370,000 pounds, \$5,301,450, and cotton, 420,000 bales. The State is a large producer of copper, the output of 1910 being 16,691,777 pounds. The coal output was 7,121,380 short tons.

The coal fields of the State have an extent of 4,400 square miles.

The number of manufacturing establishments in Tennessee having an annual output valued at more than \$500 at the beginning of 1915 was 4,775. The amount of capital invested was \$211,423,000, giving employment to 88,514 persons, using material valued at \$123,430,000, and turning out finished goods worth \$212,071,000. Salaries and wages paid amounted to \$44,910,000.

Tennessee (see also Confederate States; Memphis):

Major-General Jackson conducts operations against Indian allies of Great Britain, 533.

Murders committed by Indians in, 6269.

Ratification of amendment to Federal Constitution by, referred to, 240.

Relief for people in eastern section of, and address of East Tennessee Relief Association regarding, discussed, 3405.

Volunteers of—

Expenses incurred by, recommendation that Government pay the, 1454, 1474.

Number of, in Indian wars, greater than her proportion in general apportionment, 1453.

Operation of, under Maj.-Gen. Jackson against Indian allies of Great Britain, 533.

Recommendation that Government pay expenses incurred by, 1454, 1474.

Tennessee Bond Cases.—A series of seventeen cases decided by the United States Supreme Court in 1885. In 1852 the Tennessee legislature passed an act making certain railroad bonds a statutory lien upon the property on which they were issued. Holders of state bonds afterwards brought suit to establish their lien upon the property in question. The Supreme Court held that the lien was created for the benefit of the state and not of the holders of state bonds issued under that act.

Tennessee Centennial.—An exposition held in Nashville, Tenn., from May 1 to Oct. 30, 1897, to celebrate the one hundredth anniversary of the admission of the state into the Union. The site covered about 200 acres and a notable feature was a lawn of bluegrass, a characteristic of the region. There were more than one hundred buildings, containing exhibits of art, education, and progress in the various industries, as well as forms of amusement. The total attendance was 1,786,714. The total receipts were \$1,101,285, and the disbursements \$1,101,246.

Tennessee River:

Canal from the Altamaha to, referred to, 1027.

Survey of, referred to, 1128.

Tenure-of-Office Act.—Under the terms of the Constitution the power of making appointments is vested in the President, to be exercised with the advice and consent of the Senate. In the course of his disputes with Congress, President Johnson was charged with a corrupt use of the power of appointment and removal, and on the first day of the second session of the Thirty-ninth Congress a bill was introduced "to regulate the tenure of certain civil offices." It was passed over the President's veto March 2, 1867, and was repealed in 1887. This act provided that, with certain exceptions, every officer appointed with the concurrence of the Senate should retain his office until a successor should be in like manner appointed. Johnson was impeached for violating the act in 1868 with regard to Secretary-of-War Stanton.

Territories.—At the close of the Revolutionary War several of the states had claims to extensive tracts of land beyond their western borders. The claim was set up that these territories belonged to the United States, as having been won by all in common. Between 1781 and 1802 all these outlying tracts passed by acts of cession under the jurisdiction of the United States. Subsequent additions have been made by purchase or treaty. (See Alaska, California, Florida, Gadsden Purchase, Louisiana Purchase, Oregon, Texas, etc.) The Continental Congress resolved that the western territory to be ceded to the United States "shall be settled and formed into distinct republican states, which shall become members of the Federal Union and have the same rights of sovereignty, freedom, and independence as the other states." The Northwest Territory was organized in 1787, the Southwest in 1790. The Federal District of Columbia is governed directly by Congress, through a commission. An organized territory has a governor, appointed by the President, by and with the advice and consent of the Senate, for four years,

and a legislature composed of a council and a house of representatives chosen every two years by the people. A delegate to Congress, who may speak but not vote, is elected by the people for two years. Territorial legislation is subject to Congressional control. Territorial courts are provided for, the judges of which are appointed by the President for four years, and confirmed by the Senate, and over which the United States Supreme Court has appellate jurisdiction. Alaska has a form of government similar to that originally provided for organized territories, but has no legislature. The only remaining territories are Alaska, District of Columbia and Hawaii, of which Alaska and Hawaii are administered by the Interior Department. In Alaska, the Government is planning extensive railroad construction under its own management. The Interior Department regulates and patrols the fisheries (including the seal hatcheries) of Alaska, conducts two salmon hatcheries, supervises the reindeer industry, and conducts Government agricultural and mine experimental stations. (See Hawaii, Alaska, District of Columbia, Interior Department.)

Teton Indians. (See Indian Tribes.)

Texan War. (See Wars, Foreign.)

Texas.—The largest of the United States; nickname, "The Lone Star State." It lies between lat. 25° 51' and 36° 30' north

and long. 93° 27' and 106° 40' west. It is bounded on the north by Oklahoma, on the northeast by Arkansas, on the east by Arkansas and Louisiana, on the south and southeast by the Gulf of Mexico, on the south and southwest by Mexico, and on the west by New Mexico. It has an area of 265,896 square miles. It consists of a low coast region in the southeast, west of this a prairie country, a hilly region, elevated plains to the north and west, and a mountainous country west of the Pecos River. It is an important agricultural state, the leading products being cotton, corn, live stock, sugar and rice. The manufacture of lumber and timber products, cotton seed oil and grist and flour mill products are the chief industries. The discovery and development of the oil fields has added to the wealth and population of the State.

La Salle made a landing at Matagorda Bay and built a fort in 1685. By the treaty of 1819-1821 with Spain the United States surrendered her claim that Texas was included in the Louisiana Purchase. Meanwhile Mexico had declared her independence of Spain, and Texas with Coahuila formed a state of the Mexican Republic. Texas seceded from Mexico, proclaiming her independence March 2, 1836. After the defeat of the Mexican forces under Santa Anna, by General Houston in the battle of San Jacinto, April 21, 1836, the Republic of Texas was recognized by England, France, Belgium and the United States. Annexation was accomplished by a joint resolution of Congress Dec. 29, 1845.

The dispute over the Western boundary led to the Mexican War. On March 25, 1850, Texas ceded to the United States all claims to territory outside her present limits, receiving therefor \$10,000,000. An ordinance of secession was passed Feb. 1, 1861. The State was readmitted to the Union March 30, 1870.

In the eastern part of the state are valuable yellow-pine forests, and there are oyster and other fisheries on the coast.

Statistics of agriculture collected for the last Federal census, place the number of farms in the state at 417,770, comprising 112,435,067 acres, valued, with stock and improvements, at \$2,217,645,164. The average value of farm land was \$14.53 per acre against \$4.70 in 1900. The value of domestic animals, poultry, etc., was \$318,646,509, including 6,934,586 cattle, valued at \$122,985,879; 1,170,068 horses, \$84,024,635; 675,558 mules, \$73,979,145; 2,336,363 swine, \$11,639,366; 1,808,709 sheep, \$6,301,364; poultry, \$4,806,642. The yield and value of field crops for 1911 was: Corn, 7,300,000 acres, 69,350,000 bushels, \$55,480,000; wheat, 700,000 acres, 6,580,000 bushels, \$6,580,000; oats, 737,000 acres, 18,499,000 bushels, \$9,989,000; rye, 2,000 acres, 20,000 bushels, \$21,000; rice, 238,300 acres, 8,174,000 bushels, \$6,539,000; potatoes, 50,000 acres, 2,850,000 bushels, \$3,591,000; hay, 606,000 acres, 606,000 tons, \$7,211,000; tobacco, 300 acres, 195,000 pounds, \$39,000, and cotton, 4,280,000 bales. Texas ranks first among the states in the production of cotton. Petroleum to the extent of about 9,000,000 barrels was produced in 1911, showing a gradual decrease in the last few years. The coal mined was 1,892,176 short tons, valued at \$2,160,965.

The number of manufacturing establishments in Texas having an annual output valued at \$500 or more at the beginning of 1915 was 5,081. The amount of capital invested was \$283,514,000, giving employment to 31,111 persons, using material valued at \$253,090,000 and turning out finished goods worth \$361,279,000. Salaries and wages paid amounted to \$59,179,000.

- Texas vs. White et al.**—A case before the Supreme Court of the United States in which the acts of secession of the Southern States were declared void and the rights

of a State of the Union held to be unimpaired by the acts of a revolutionary government within the State.

In 1851 the United States issued to the State of Texas 5,000 coupon bonds for \$1,000 each, payable to the State of Texas or bearer, with interest at 5 per cent semi-annually, in settlement of certain boundary claims. Some of these bonds were seized by the officers of the State government during the Civil War and sold to White & Chiles and others of New York. The bonds were payable only when indorsed by the governor. The State convention in 1866 passed an ordinance looking to the recovery of these bonds. An act passed in October of that year authorized the governor to proceed in his discretion to carry out this intention. The agent appointed by the executive procured the filing of a bill the same year asking for an injunction and the recovery of the bonds in question. The case came before the Supreme Court of the United States at the December term, 1868, on the original bill. The injunction was granted on the general ground that the action of a revolutionary State government did not affect the right of Texas as a State of the Union having a government acknowledging her obligations to the Federal Constitution. The court pronounced the act of secession void, Chief Justice Chase rendering the opinion. Justice Grier dissented on all the points raised and decided. Justices Swayne and Miller concurred in dissenting on the capacity of the State of Texas, "in her present condition," to waive on an original suit. On the merits of the case they united with the majority.

Further hearing was accorded to certain parties, and both complainant and defendants were granted liberty in the decree to apply for further directions in its execution. In one place in the court's opinion the Chief Justice said it was a historical fact that in 1862 the government of Texas in control was its only actual government, its acts in almost all respects valid, though unlawful and revolutionary as to the United States. December, 1869, the additional part of this celebrated case, known in the reports as *Texas vs. Hardenberg*, arose, the Chief Justice deciding for the court that upon the whole case the decree must be for the complainant as to the bonds claimed by Hardenberg.

Further decisions of the Supreme Court on additional portions of the case are as follows, briefly: December, 1870, *In re Paschal*, Justice Bradley delivering the court's judgment, it was ordered that the motion to compel George W. Paschal to pay to the clerk of the court the money received by him be denied. An order was granted to discharge him as solicitor and counsel for the complainant in the second case. October, 1874, *In re Chiles*, Justice Miller rendering the court's opinion, Justices Field and Hunt dissenting, it was ordered that Chiles pay a fine of \$250 and the costs of the proceeding and stand committed to the marshal's custody until the same be paid. This was for contempt in disobeying the court's decree.

Textiles and Glass, report on cost of producing in United States and Europe transmitted, 5674.

Thames (Canada), Battle of.—After Perry's victory over the British fleet on Lake Erie, Gen. Harrison completed his preparations for the invasion of Canada. Sept. 21, 1813, the embarkation of the army on Perry's transports began. On the afternoon of the 27th the Army of the North-

west, consisting of 5,000 men, under the immediate command of Gen. Harrison and Gen. Shelby, governor of Kentucky, landed at Amherstburg (Malden), but found that Proctor's army, about 800 regulars and 1,200 Indians, had fled inland. Harrison started in hot pursuit. In response to the repeated demands of Tecumseh the British made a stand about eight miles north of the river Thames. Here they were attacked on Oct. 5 by about 3,000 Americans. A short but decisive battle took place, in which the British and Indians were completely routed and Chief Tecumseh was killed. The precise number of casualties in this battle is not known. The American loss was probably about 15 killed and twice that number wounded. The British lost about 18 killed, 26 wounded, and 600 taken prisoners, of whom 25 were officers. Proctor made his escape. Thirty-three dead Indians were found upon the field after the battle. (See the illustration opposite 569.)

Thetis, The. (See Schley, Winfield S.)

Third Assistant Postmaster-General. (See Assistant Postmasters-General.)

Third Assistant Secretary of State, State Department.—This office was created in 1875, and at the present time carries with it an annual salary of \$4,500. The third assistant secretary of state is appointed by the President, by and with the consent of the Senate. Together with the assistant secretary of state, he is in charge of the diplomatic appointments; and in addition has charge of the Western European Division (q. v.) and the Near Eastern Division (q. v.) of the Department. He attends also to the Departments' representation in International Conferences and to the ceremonial part of the diplomatic service. He is also in charge of the Bureau

of Rolls and of the Library of the Department. (See State Department.)

Three-Cent Piece.—A small silver coin authorized by Congress in 1851. It was coined from 1851 to 1873, inclusive, with the exception of the year 1857. Its weight was originally 12.375 grains, but in 1853 this was reduced to 11.52 grains. The three-cent coin was legal tender to the amount of thirty cents. March 3, 1865, Congress authorized another three-cent piece, to be made of an alloy of copper and nickel. With the exception of the year 1877, this piece was coined continuously till 1890. Its weight was thirty grains.

Three-Dollar Piece.—A gold coin of the United States, authorized in 1853. Its coinage was begun the next year and continued till 1890. The weight of the coin was 77.1 grains, and it was legal tender to an unlimited amount.

Ticonderoga (N. Y.), Capture of.—As soon as the events of Lexington and Concord became known it was decided by the Americans to seize the British fort at Ticonderoga, at the junction of Lakes George and Champlain. The place was garrisoned by 44 men under Capt. Delaplace. On the night of May 10, 1775, Col. Ethan Allen, with other officers and 270 Green Mountain boys, gained an entrance to the fort and Allen demanded its surrender, as traditionally reported, "in the name of the Great Jehovah and the Continental Congress." Finding resistance useless, Delaplace surrendered the garrison and 120 cannon, with muskets, ball, and powder. The surprise was so complete that not a man was lost.

Time, Regulation of. (See International Meridian Conference.)

Tippecanoe.—A nick-name given to William Henry Harrison on account of his victory at the Battle of Tippecanoe. (See Tippecanoe, Battle of.)

Tippecanoe and Tyler too.—The campaign cry used prior to the election of Harrison and Tyler in 1840, arising from Harrison's success at the Battle of Tippecanoe. (See Tippecanoe, Battle of.)

Tippecanoe, Battle of (Nov. 7, 1811).—In 1806, Tecumseh, chief of the Shawnee Indians, and his brother Elksawatana, called the Prophet, formed a plan for a great confederacy of all the western and southern Indians against the whites. Their doctrine was opposed to tribal rights, and they claimed that no part of the territory could be sold by any tribe to the whites without the consent of all the Indians.

William Henry Harrison, who had been on the staff of General Anthony Wayne at the battle of Maumee Rapids, and Secretary to General Arthur St. Clair, Governor of the Northwest Territory, was appointed in 1801, Governor of the Indiana Territory, from which was later formed the States of Indiana, Illinois, Michigan and Wisconsin. By the close of 1805 Harrison had extinguished Indian titles to 46,000 acres of land in the territory. Sept. 30, 1809, he concluded a treaty by which, for \$10,550, he secured nearly 3,000,000 acres along the Wabash and White Rivers. Tecumseh and the Prophet told the Indians they were cheated by the treaties, and appealed to their savage nature to turn against the whites. About 1808 Tecumseh established his council fire on the banks of the Tippecanoe River in Tippecanoe County, Indiana, near the site of the present village of Battle Ground. Harrison was aware of the hostile feeling among the Indians over the treaties of Vincennes and Fort Wayne, which he had negotiated, and began preparations for defense. While building a stockade on the site of the present city of Terre Haute, Oct. 11, 1811, one of the white sentinels was killed by an Indian in ambush. This determined Harrison to march against the camp at Tippecanoe. On the night of Nov. 6, 1811, he encamped within a mile of the Indian village, and the Prophet had agreed to a conference on the following day. Harrison's party consisted of about 800, including 500 Indians and Kentucky militiamen. The hostile Indians were estimated by Harrison at 700. They were under the command of White Loon, Stone Eater, and Winnemac, Tecumseh being then on a mission to the Creeks and Cherokees to induce them to join his confederacy. Without waiting for the promised conference or even the dawn of day, the savages made a furious assault on Harrison's camp, which they maintained with ferocious bravery for two hours. It was after daylight when the last of the Indians were driven from the field, leaving forty of their number dead on the battleground. The loss to the whites was 37 killed and 151 wounded. The entire loss of the Indians was never ascertained. Next day Harrison advanced to the town, found it deserted, destroyed it and returned to Vincennes. This disaster broke the power of Tecumseh. (See illustration opposite 457.)

Titles. (See Lands, Public.)

Tobacco.—A native American plant of the Nightshade family (*Nicotiana tabacum*), the leaves of which have strong narcotic effects. It was named from the Indian tobacco or pipe in which the aborigines smoked the leaves. The word was applied by the Spaniards to the herb itself. Its use was observed in Santo Domingo in 1492. It was introduced into European countries by the early voyagers, and the Virginia settlers made it their chief agricultural product, and even used it as the standard of value. Tobacco was unknown to the civilized world prior to the discovery of America. It is a sedative and narcotic, and is used by more people and among more nations than any similar substance, with perhaps the exception of tea. After its introduction into England in 1585, its habitual use soon spread over Continental Europe and into Asia, notwithstanding the determined efforts of ecclesiastic and civil authorities to prohibit it. When the period of persecution had run its

course, it was looked upon as a medicine and was prescribed for all sorts of human ailments. Its habitual use was looked upon as a luxury to be enjoyed only by the well-to-do. From 1619 to 1641 prices in London ranged from three pence to three shillings per pound. During the civil war in the United States, the price ranged from twelve cents to forty-five cents per pound.

Tobacco as a Revenue Producer.—Owing perhaps to its universal use and its general regard as a luxury, tobacco is the most heavily taxed article in the world. In this country the internal revenue tax is six cents per pound for the manufactured product. Cigars, large, are taxed \$3 per 1,000; small, and cigarettes, 54 cents per 1,000. The United Kingdom levies a tax of from 77 cents to 85 cents per pound; cigars, \$1.21 per pound. Norway taxes manufactured tobacco 22 cents per pound; Sweden, 12 cents; Switzerland, 22 cents; Germany, 9 cents; Holland, 14 cents; Russia, 38 cents. In France, Spain, Italy, Portugal, Austria, Turkey, Rumania the government monopolizes the trade in tobacco. It is also made the object of special excise taxes from time to time.

The production of tobacco in the United States as reported to the Department of Agriculture in the year 1913 was as follows:

States	Acres	Pounds	Farm Value Dec. 1
New Hampshire...	100	177,000	\$32,000
Vermont.....	100	170,000	31,000
Massachusetts.....	6,600	11,550,000	2,044,000
Connecticut.....	20,200	35,734,000	6,614,000
New York.....	4,600	5,980,000	718,000
Pennsylvania.....	33,100	47,995,000	4,080,000
Maryland.....	22,000	17,600,000	1,408,000
Virginia.....	175,000	113,750,000	10,238,000
West Virginia.....	10,800	8,856,000	974,000
North Carolina.....	265,000	172,250,000	19,809,000
South Carolina.....	50,000	36,500,000	3,540,000
Georgia.....	1,900	1,900,000	475,000
Florida.....	4,300	4,300,000	1,290,000
Ohio.....	86,800	78,120,000	6,875,000
Indiana.....	13,500	12,150,000	1,094,000
Illinois.....	600	468,000	56,000
Wisconsin.....	45,600	53,808,000	5,919,000
Missouri.....	4,100	4,920,000	640,000
Kentucky.....	400,000	364,000,000	30,576,000
Tennessee.....	77,400	63,468,000	4,760,000
Alabama.....	200	140,000	39,000
Louisiana.....	700	280,000	38,000
Texas.....	200	116,000	21,000
Arkansas.....	700	427,000	77,000
United States.....	1,223,500	1,034,679,000	\$101,411,000

The following table shows the production, consumption and revenue derived from other countries for the year 1913, as compared with the United States:

COUNTRIES	Production	Total Consumption	Total Revenue (Customs and Excise)
	Pounds	Pounds	Dollars
United States	953,734,000	2,550,429,000	106,879,000
Germany.....	56,952,951	271,205,899	45,072,123
Russia.....	233,451,159	202,503,424	41,109,511
France.....	35,780,658	116,304,079	104,840,422
United Kingdom...		95,983,525	86,804,340
Austria-Hungary...	6159,087,004	159,191,240	63,663,714

The revenue receipts from tobacco in the United States in recent years have been as follows:

FISCAL YEAR	REVENUE RECEIPTS	FISCAL YEAR	REVENUE RECEIPTS
1906.....	\$18,422,997	1911.....	\$67,005,951
1907.....	51,811,070	1912.....	70,590,150
1908.....	49,862,754	1913.....	76,769,424
1909.....	51,887,178	1914.....	79,986,639
1910.....	58,118,457	1915.....	77,470,757

The detailed statement of manufactured tobacco withdrawn for consumption in 1914 follows:

	Number
Cigars, weighing more than 3 lbs. per thousand	7,670,832,230
Cigars, weighing not more than 3 lbs. per thousand	1,036,793,000
Cigarettes, weighing more than 3 lbs. per thousand.	17,418,880
Cigarettes, weighing not more than 3 lbs. per thousand	16,409,667,136
Snuff	Pounds 32,766,741
Tobacco, chewing and smoking	412,505,213

Statistics of the last census show there were in 1909, 15,822 manufacturing establishments engaged in the tobacco industry. These were owned and operated by 17,634 proprietors or firm members, and employed 197,637 salaried employees and wage-earners, and used a total capital of \$245,660,000. These establishments converted \$177,186,000 worth of raw material into finished product valued at \$416,695,000. They paid in salaries and wages \$86,114,000.

Tobago, Island of, duties on vessels from, suspended by proclamation, 5598, 6502.

Toledo, Ohio, proclamation granting privileges of other ports to, 2859.

Toledo War.—A bloodless dispute between Ohio and Michigan in 1835 over the territory which contained the city of Toledo. Just previous to Michigan's making application for admission to the Union, Ohio proposed to assume control of the disputed tract. Michigan passed an ordinance making the occupation of Toledo by Ohio authorities a penal offense and appealed to the Federal Government to sustain the action. The militia were called out on both sides. When armed hostilities became imminent, Michigan was admitted as a State and awarded the Upper Peninsula in exchange for the Toledo tract in dispute.

Toledo War, controversy regarding boundary between Ohio and Michigan known as, 637, 1173, 1404, 1407.

Toll.—A fee collected for a privilege. This form of collecting has been employed as a means for paying the cost of building roads and bridges, usually when a county or other corporate body borrows the money on bonds to pay for the work involved, and then sets up toll gates, where, through a series of years, money is collected from travelers on the road for the redemption of the bonds. Sometimes, however, the building is done by private enterprise and paid for thereafter with tolls collected, both for re-imbursement and for profit. Toll-bridges and toll-roads are now almost extinct, the preferred method being that of taxation.

Tonawanda Indians. (See Indian Tribes.)

Tonga Islands:

Treaty between Germany and Great Britain and, referred to, 5121.

Treaty with, 5121.

Tonga, Treaties with.—The treaty of amity, commerce, and navigation of 1886 provides privileges to the citizens of the one country in that of the other equal to those of the most favored nation. Trade privileges, except in the case of laborers, shall in no case be more restrictive than those granted to others. Shipping charges shall be no higher than those paid by the national ships in home ports.

Ships-of-war of either power shall have free access to any of the ports; and to facilitate repairs the government of Tonga agrees to sell to the United States land on the islands to provide a coaling or other station. Mail steamers from the United States crossing the Pacific Ocean shall have full harbor privileges on payment of one-third the customary shipping charges, so long as the vessels so partaking of this privilege shall carry the Tonga mails free of charge. Whaling and fishing vessels are granted large privileges in the islands free of harbor charges so long as they do not trade or barter spirituous liquors, arms, or ammunition to the Tongans.

No United States citizen residing in Tonga shall be compelled to do military service, or to pay higher or other license fees than do the subjects of Tonga. Deserters are to be apprehended by the local authorities upon application from the consul or, when such is deficient, from the master of the vessel. Consular officers may be appointed in terms customary in consular conventions. Freedom of consular access is extended to all citizens of the United States in Tonga.

Tonnage Duties. (See Vessels, Foreign.)

Topeka Constitution.—The enactment of the Kansas-Nebraska bill, which, it has been claimed, in effect repealed the Missouri Compromise forbidding slavery north of 36° 30', left the question of slavery to be decided by the people of the territories before admission. The proslavery and antislavery advocates at once began a struggle for supremacy. Oct. 23, 1855, a constitutional convention representing the anti-slavery population of Kansas met at Topeka. This convention adopted the boundaries set by the Kansas-Nebraska bill, prohibited slavery after July, 1857, and conferred the right of suffrage on "white male citizens" and on "every civilized male Indian who has adopted the habits of the white man." This convention was dispersed by Federal troops. The bill to admit Kansas into the Union under the provisions of the Topeka constitution was introduced in the House of Representatives by Daniel Mace, of Indiana, April 7, 1856, and in the Senate by Lewis Cass, of Michigan, March 24. The bill passed the House, but failed in the Senate. (See also Leecompton Constitution; Wyandotte Constitution.)

Tory.—The terms "Whig" and "Tory" had been in use in English politics for a great many years anterior to the American Revolution. The term "Whig" designated the party opposing the royal prerogative and who were generally in favor of reforms; the term "Tory," the party upholding the prerogative and adhering to old institutions. In our colonial days the term "Tory" was applied to those who were adherents of the Crown, and the term "Whig" to the opponents thereof, and so the American sympathizers were known as Whigs, the supporters of England as Tories.

Town.—A word derived from the Anglo-Saxon word "tun," meaning "a place inclosed." The suffix still clings to the names of many English towns. In the United States the word has a varying signification. In Pennsylvania it is applied to any municipal government. In New York, Wisconsin, and most of the western states a town is a subdivision of a county, and is often called a township (q. v.), but the town is not necessarily always coextensive with the latter. In New England the town is the unit of civil organization, a county being simply an aggregation of towns.

Town Meeting.—A peculiarly democratic institution of New England and some of the newly formed western states. It is a meeting of the citizens to legislate for the town, levy taxes, elect the officers, usually a town clerk, selectmen, a treasurer, assessors, constables, overseers of the poor, and school commissioners. In some of the states the cities, by their aldermen, are authorized to transact the business formerly attended to by the town meeting. That it still has a legal existence was demonstrated as recently as 1881, when the Labor Reform Society of Boston secured a writ of mandamus to compel the city authorities to call a town meeting on petition, as required by its charter.

Towns, Seaport, protection for. (See *Defenses, Public, provision for.*)

Townshend Acts.—At the instance of Charles Townshend, chancellor of the exchequer, two acts were passed by the British Parliament providing for the appointment of commissioners to enforce more effectually the laws relating to taxes in the Colonies. They authorized writs of assistance and increased the duties on many articles already taxed, besides imposing others on glass, paper, colors, and tea. The object of these taxes was to support the civil government in the territories.

Township.—In the older United States counties are divided, without reference to their inhabitants, into townships varying in size from five to ten miles square. When in 1802 Col. Mansfield surveyed the

Northwest Territory he divided the entire public domain into land districts, made up of a varying number of tracts each six miles square. These were called townships. These townships were again divided into thirty-six equal squares, called sections, of one square mile each and containing 640 acres. A civil township may include more or less than one township in area.

Toynbee Hall. (See *Social Settlements.*)

Trade, with countries bordering on the Pacific discussed, 7052, 7108.

Trade Adviser.—The office of trade adviser was established by the State Department several months after the outbreak of the Great European War, in order to assist American merchants who were experiencing difficulties with shipments of goods consigned to or from them, because of embargo and other war regulations promulgated by foreign governments. The office, which is under the supervision of the assistant secretary of state (q. v.), later broadened out into a bureau of general information and assistance to American shippers upon trade regulations and requirements of foreign governments. (See *State Department.*)

Trade Commission.—Under the law introduced by Mr. Covington of Maryland and approved Sept. 26, 1914, the President is authorized to appoint a commission of five members, not more than three of whom shall be members of the same political party, to take the place of the Bureau of Corporations and the Commissioners of Corporations. Property, records and employees of the bureau are transferred to the new Commission, whose duty it is to regulate commerce by preventing persons, partnerships or corporations (except banks and common carriers, regulated by other laws), from using unfair methods of competition.

Commerce is defined in the act as commerce in any territory of the United States or in the District of Columbia or between the States or Territories, or with a foreign nation. A corporation is defined as an organization, incorporated or not, having a capital stock, divided into shares or not, formed to carry on business for profit.

Whenever the Commission shall have reason to believe that any person, partnership or corporation has been using unfair methods of competition, and that a proceeding would be to the interest of the public, it shall issue a complaint and set a day for a hearing. If found guilty, orders to desist from the specified violation of the law are issued. In case of failure of the guilty party to comply with the law as pointed out by the Commission, the latter shall apply to the Circuit Court of Appeals where the corporation resides or where the competition complained of takes place. The findings of the Commission as to the facts shall be conclusive and the decree of the court final, except for review by the Supreme Court upon certiorari. The jurisdiction of the Circuit Court of Appeals in regard to orders of the Commission shall be exclusive, and orders shall be expedited and given precedence. Processes of the Commission may be served by personal delivery, registered mail or left at principal place of business.

The powers of the Commission are to (a) investigate and gather information concerning business, and practices of corporations, etc.; (b) require certified reports at any time; (c) report to the Attorney General final decrees entered against de-

fendant corporations; (d) investigate upon direction of the President or either house; (e) make recommendations (upon application of the Attorney General), for the readjustment of the business of any corporation guilty of violation of the anti-trust laws, in order that the corporation may thereafter maintain its organization, management and conduct of business in accordance with law; (f) make public such information obtained by it, except trade secrets and names of customers, as it shall deem expedient to the public interest, make reports to Congress and recommend additional legislation; (g) classify corporations and make rules for carrying out the provisions of the law; (h) investigate trade conditions in and with foreign countries where such may affect the foreign trade of the United States.

Suits in equity before the Attorney General under the anti-trust acts may be referred to the Commission as a master in chancery to report an appropriate form of decree, and accepted at the option of the court. All departments of the government are required to furnish information relating to corporations. Agents and members of the Commission shall have access to evidence, are empowered to require attendance, administer oaths and take testimony at any place in the United States, with the aid and authority, when necessary of the Federal Courts. No person shall be excused from testifying before the Commission on the ground that his evidence might tend to degrade or criminate him, but no natural person shall be prosecuted on account of anything to which he may testify, and no natural person shall be exempt from punishment for perjury before the Commission. Refusal to testify is punishable by a fine of from \$1,000 to \$5,000. Failure to file reports when ordered subjects a corporation to a fine of \$100 for each day of neglect. A member or employee of the Commission who reveals information imparted officially is subject to a fine of \$5,000 or one year in prison.

The terms of the first Commissioners are to be three, four, five, six, and seven years, respectively, as designated by the President, and their successors are to be appointed for terms of seven years. The salary of the Commissioners is fixed at \$10,000, and a Secretary is provided for at \$5,000 per year.

Trade Dollar.—A silver coin issued by the United States from 1874 to 1878. It was coined for use in trade with China in competition with the Spanish and Mexican dollars. It was not intended for general circulation in the United States, though it was made a legal tender to the amount of \$5 at the time of issue. The legal-tender provision was repealed in 1876. The weight of the trade dollar was 420 grains, while the standard American silver dollar weighed 412½ grains. An act of March 1, 1887, authorized the Treasurer to redeem in standard silver dollars all trade dollars presented during the following six months.

Trade Dollars discussed, 1399, 1463.

Trade of Foreign Powers. (See Commerce of Foreign Powers.)

Trade Information and Publicity, State Department.—In 1842, Daniel Webster, Secretary of State, assigned a clerk to the task of arranging and keeping up-to-date all commercial information from abroad which might be of service to the United States. In 1854, this work was organized as the Statistical Office of the Department of State, and in 1897 the name was changed

to the Bureau of Foreign Commerce. When the Department of Commerce and Labor was organized in 1903, the Bureau of Foreign Commerce was transferred to the new department, and Secretary of State John Hay organized the Bureau of Trade Information and Publicity, to cover activities which the Department of Commerce and Labor could not advantageously prosecute. The duties of the new bureau were the supervision of trade reports and correspondence from American consuls and diplomatic officers, and also the publication of commercial information of interest. (See State Department; Consuls; Consular Service.)

Trade-Marks.—The ancient custom among merchants and manufacturers of using a special device for marking their goods or the packages containing them has long been recognized by the common law; and the right to exclusive use thereof has been sustained. The first statute providing for the protection of trade-marks in the United States by registration was the law of 1870. As this law was not restricted in its operation to trade between the states or with foreign nations, it was later held by the Supreme Court to be unconstitutional. Another general law was passed in 1905, based upon the commerce clause of the Constitution and amended in 1909. This law recognizes the right of a trader to stamp with his particular mark goods manufactured by him or selected or packed or in any way passing through his hands. The trade-mark then becomes part of the good will of a trader's business and he is protected against any use or infringement thereof by another the same as in any other property right.

The existing act provides that no trade-mark will be registered which consists of or comprises immoral or scandalous matter, or which consists of or comprises the flag or coat of arms or other insignia of the United States, or any simulation thereof, or of any state or municipality, or of any foreign nation or which consists of or comprises any design or picture that has been adopted by any fraternal society as its emblem, or of any name, distinguishing mark, character, emblem, colors, flag, or banner adopted by any institution, organization, club, or society which was incorporated in any State in the United States prior to the date of the adoption and use by the applicant: Provided, That said name, distinguishing mark, character, emblem, colors, flag, or banner was adopted and publicly used by said institution, organization, club, or society prior to the date of adoption and use by the applicant: unless it shall be shown to the satisfaction of the Commissioner of Patents that the mark was adopted and used as a trade-mark by the applicant or applicant's predecessors, from whom title is derived, at a date prior to the date of its adoption by such fraternal society as its emblem, or which trade-mark is identical with a registered or known trade-mark owned and in use by another, and appropriated to merchandise of the same descriptive properties, or which so nearly resembles a registered or known trade-mark owned and in use by another, and appropriated to merchandise of the same descriptive properties as to be likely to cause confusion or mistake in the minds of the public, or to deceive purchasers; or which consists merely in the name of an individual, firm, corporation, or association, not written, printed, impressed, or woven in some particular or distinctive manner or in association with a portrait of the individual, or merely in words or devices which are

descriptive of the goods with which they are used, or of the character or quality of such goods, or merely a geographical name or term; no portrait of a living individual will be registered as a trade-mark, except by the consent of such individual evidenced by an instrument in writing; and no trade-mark will be registered which is used in unlawful business, or upon any article injurious in itself, or which has been used with the design of deceiving the public in the purchase of merchandise, or which has been abandoned.

Any mark, used in commerce with foreign nations or among the several states or with Indian tribes, may be registered if it has been in actual and exclusive use as a trade-mark of the applicant, or his predecessors from whom he derived title, for ten years next preceding the passage of the act of February 20, 1905.

The fee for registration is \$10; this gives exclusive right to the trade-mark for twenty years, and it may be renewed for a like period.

Aliens may register trade-marks previously registered in their own country.

Application for a trade-mark must be made to the Commissioner of Patents, setting forth a description of the trade-mark and a drawing thereof, accompanied by an affidavit to the effect that the applicant does not know of any other person who has the right to use it.

Trade-mark Treaties with Foreign Nations.

—The following is a list of the Governments with which conventions for the reciprocal registration and protection of trade-marks have been entered into by the United States—Austria-Hungary, Belgium, Denmark, France, Germany, Great Britain (including colonies), Italy, Japan (including China and Korea), Luxemburg, Mexico, Rumania, Servia, Spain. The laws of Switzerland and the Netherlands being so framed as to afford reciprocal privileges to the citizens or subjects of any Government which affords similar privileges to the people of those countries, the mere exchange of diplomatic notes, giving notice of the fact, accomplishes all the purposes of a formal convention.

Trade Unions.—Combinations of working men to enable each member to secure the conditions most favorable to labor. The accumulations of the capitalist. It is claimed, afford him an advantage which the laborer without association does not possess.

The history of trades unionism in America began with the formation of the International Typographical Union in 1852, fol-

lowed in 1859 by the Machinists' and Blacksmiths' International Union and the Iron Moulders' Union of North America, and later by various other unions and organizations. The Knights of Labor, a secret order, was formed in 1869 in Philadelphia. It is in the nature of a trades union and includes all branches of labor.

The American Federation of Labor, formed at Columbus, Ohio, in 1886, is one of the largest labor organizations in the world, uniting the trades and occupations in the United States. To it are affiliated 113 national and international unions representing approximately 27,000 local unions, with an approximate paid-up membership of 2,000,000. There are also thirteen large national unions not affiliated to the American Federation.

Traitor.—One who commits treason. (See Treason.)

Transcontinental Highways.—In the days of the oxteam and prairie schooner, the plains and mountains were crossed by trails, usually along the lines of least resistance, keeping as close as possible to bases of supplies and water. The pioneers over what became known later as the "Santa Fe Trail" and the "Oregon Trail" were the first to leave permanent marks on routes now rapidly becoming highways between the Central-Western and the far-Western States.

With the increasing popularity of automobile touring and the consequent demand for good roads came the organization of numerous highway associations advocating the construction of public roadways. Many states responded to the demands and by connecting the roads of one state with those of its neighbors' transcontinental highways became established institutions.

Lincoln Highway.—Perhaps the most pretentious effort in this direction is that of the Lincoln Highway Association. This was formed by automobile interests of Detroit, Mich., under the leadership of Henry B. Joy to procure immediately the establishment of a continuous improved highway from the Atlantic to the Pacific, open to lawful traffic of all descriptions without toll charges, to be known as the Lincoln Highway, in memory of President Lincoln. The proposed route is from New York to Philadelphia and Pittsburg, across Northern Ohio, Indiana and Illinois, over the established roads of those states, through Iowa to Omaha, Neb., and following the course of the Platte River, it enters Wyoming, passes through Salt Lake, Utah, and by a route not yet determined, crosses the Rocky Mountains and ends at San Francisco, where connection may be made with the Pacific Highway. West of Chicago 95 per cent of the route of the Lincoln Highway is the Overland Trail. A large part of the route is designated by markers of red, white and blue, and it is the intention of the association to have it so marked throughout its entire course. The marker is used on eight telegraph poles to the mile. Memorial arches and large signs have been erected at the entrances of the Lincoln Highway into many cities along the route.

Automobile Routes.—Five distinct and predominant routes are being developed across the Continent; gradually each will become standard, and have its special advantages, depending principally on the nature of the country, and the time of the

year. These five routes may be summarized briefly as follows:

1. The "Overland Trail" crosses Illinois, Iowa, Nebraska, Wyoming, Utah and Nevada, following considerable portions of the old Oregon Trail; while there are some stretches of rough going in Wyoming, Utah and Nevada, as a whole it offers an average of fair-to-good traveling, and has hotel accommodations throughout. This is a mid-summer route, analyzed in greater detail under a separate head, farther along.

2. The "Trail to Sunset" starts at Chicago and runs to Los Angeles, along the Santa Fe Trail and across New Mexico and Arizona to Southern California, thence north to San Francisco. This route offers magnificent mountain scenery, Indian pueblos and reservations, prehistoric ruins, Mexican habitations, giant desert cactus and tropical vegetation in the irrigated regions. It is a fall and early winter route, and is being rapidly improved, though there are yet several rough stretches and a lack of hotel accommodations in some parts of New Mexico and Arizona, necessitating two or three nights camping out.

3. The "Midland Trail" crosses Pennsylvania, Ohio, Indiana, Illinois, Missouri, Kansas, Colorado, Utah and Nevada. It is a most interesting route historically and crosses the Rocky Mountains amid the most magnificent scenery. It is a spring, summer and fall route, not yet fully developed in Colorado and Utah.

4. The "Northwest Trail," through Wisconsin, Minnesota, North Dakota, Montana, Idaho and Washington, should eventually be a popular midsummer route and open up a fine territory to through automobile travel. There is an abundance of fine scenery, and the progressive inhabitants of the several states traversed heartily co-operate in the road improvements necessary to the permanence and popularity of this transcontinental trunk line.

5. The "All-Southern Route," through Virginia, North Carolina, Tennessee, Arkansas, Texas, New Mexico and Arizona, though as yet only partially developed, will ultimately be a popular fall and winter route, offering many scenic attractions and climatic advantages. It was surveyed in the fall of 1913, but its publication has been held back by present and prospective developments in the territory through which it passes.

Pacific Highway.—An interstate and international automobile route extending from San Diego, Cal., northward along the Pacific Coast through Los Angeles and San Francisco, by way of Portland, Ore., to Vancouver, B. C., whence it is intended to run through British territory into Alaska. The road is being constructed and maintained by co-operation of private and state enterprise.

Transcontinental, Memphis, El Paso and Pacific Railroad Co., referred to, 4006.

Trans-Mississippi Exposition.—From June 1 to Oct. 31, 1898, an exhibition of the resources of the middle west was held at Omaha, Neb. The site covered about 200 acres and the buildings were grouped around a court which extended through the middle of the grounds and surrounded a lagoon or canal which terminated in a lake, adorned by an electric fountain. The grounds were ornamented with trees, shrubs and flowers, and the buildings were covered with white staff. A special feature of ethnologic interest was the gathering of 500 Indians, representative of twenty-five tribes. The total attendance was 2,615,508, and the receipts \$1,924,077.

Transportation, Miscellaneous. (See Division of Miscellaneous Transportation.)

Treason.—The Constitution of the United States declares that "treason against the United States shall consist only in levying war against them, or in adhering to their enemies, giving them aid and comfort. No person shall be convicted of treason unless on the testimony of two witnesses to the same overt act or on confession in open court" (24). The penalty is death. Conspiracy alone does not constitute treason. A motion to give Congress the sole power of defining the crimes of treason failed in the Convention of 1787. An act of Congress of July 17, 1862, provided for the liberation of the slaves of a person convicted of treason. At the close of the Civil War there were no prosecutions for treason. Most of the state constitutions contain provisions similar to that of the National Constitution. A notable instance of treason against a state was Dorr's Rebellion (q. v.) in Rhode Island in 1840-1842. Dorr was convicted, but was pardoned in 1852. A celebrated case of trial for treason is that of Aaron Burr, in 1807, which occurred at Richmond, Va., and resulted in the acquittal of Burr.

Article II, sec. 4 provides that any official of the Government convicted of treason shall be removed from office. (23) A Civil War act, dated July 17, 1862, makes the punishment, at the discretion of the court, either death or imprisonment at hard labor for not less than five years, along with a fine of not less than \$10,000, and disability to hold office. No person is indictable for treason three years after the alleged act of treason was committed; nor, by constitutional interpretation, shall any one be open to the charge of treason unless he has voluntarily given actual assistance to those countries which are declared to be at war with the United States. (See Misprision of Treason.)

Treasury Board.—Feb. 17, 1776, the Continental Congress appointed a standing committee of five members on ways and means. They were given power over the Treasury office of accounts, the committee of claims, and some minor bureau and officials. This committee was known as the Treasury Board. Two years later provision was made for a building in which to transact the business of the board, and the Treasury office of accounts was superseded by a Comptroller, an Auditor, and a Treasurer, thus forming the germ of the present Treasury Department. The office of Superintendent of Finance (q. v.) was created to take the place of this board in 1781. After a trial of three years this office was abolished and the board reestablished and continued until 1789, when it was succeeded by the present Department.

- Plan of, discussed, 1515.

Treasury, Constitutional. (See Constitutional Treasury System.)

Treasury Department.—After the Department of State the most important executive branch of the National Government. It is more complex and extensive than any other Department, and its head officer, though ranking second to the Secretary of State, is not inferior in influence and responsibility to that Secretary.

The Treasury Department was virtually created Feb. 17, 1776, when the Continental Congress resolved: "That a standing committee of five be appointed for superintending the Treasury." April 1 of that year a Treasury Office of Accounts was established, to be carried on under the direction of the standing committee. Sept. 26, 1778, the Continental Congress established the offices of Comptroller, Auditor, Treas-

urer, and two Chambers of Accounts, to consist of three commissioners each, all of whom were to be appointed annually by Congress. Feb. 11, 1779, the office of Secretary of the Treasury was established (the holder to receive a salary of \$2,000 annually), but on July 30, following, this office was succeeded by a Board of Treasury consisting of five commissioners and an Auditor-General assisted by six Auditors. Again, Feb. 7, 1781, it was resolved by Congress that the finances of the Confederation should be under a Superintendent of Finance (see Finances, Superintendent of), who was later assisted by a Comptroller, a Treasurer, a Register of Auditors; and, May 24, 1784, the Superintendent of Finances was superseded by the Board of Treasury, consisting of three commissioners. This ended the effort to organize the Treasury Department under the Confederation.

The present Treasury Department was established Sept. 2, 1789, during the first session of the First Congress under the Constitution; and the act, drawn by Alexander Hamilton, was constructed with such precision and comprehensiveness that few radical changes have since been found necessary. The act provided that: "There shall be a Department of the Treasury, in which shall be the following officers, namely: a Secretary of the Treasury, to be deemed the head of the Department; a Comptroller; an Auditor; a Treasurer; a Register; and an Assistant to the Secretary of the Treasury."

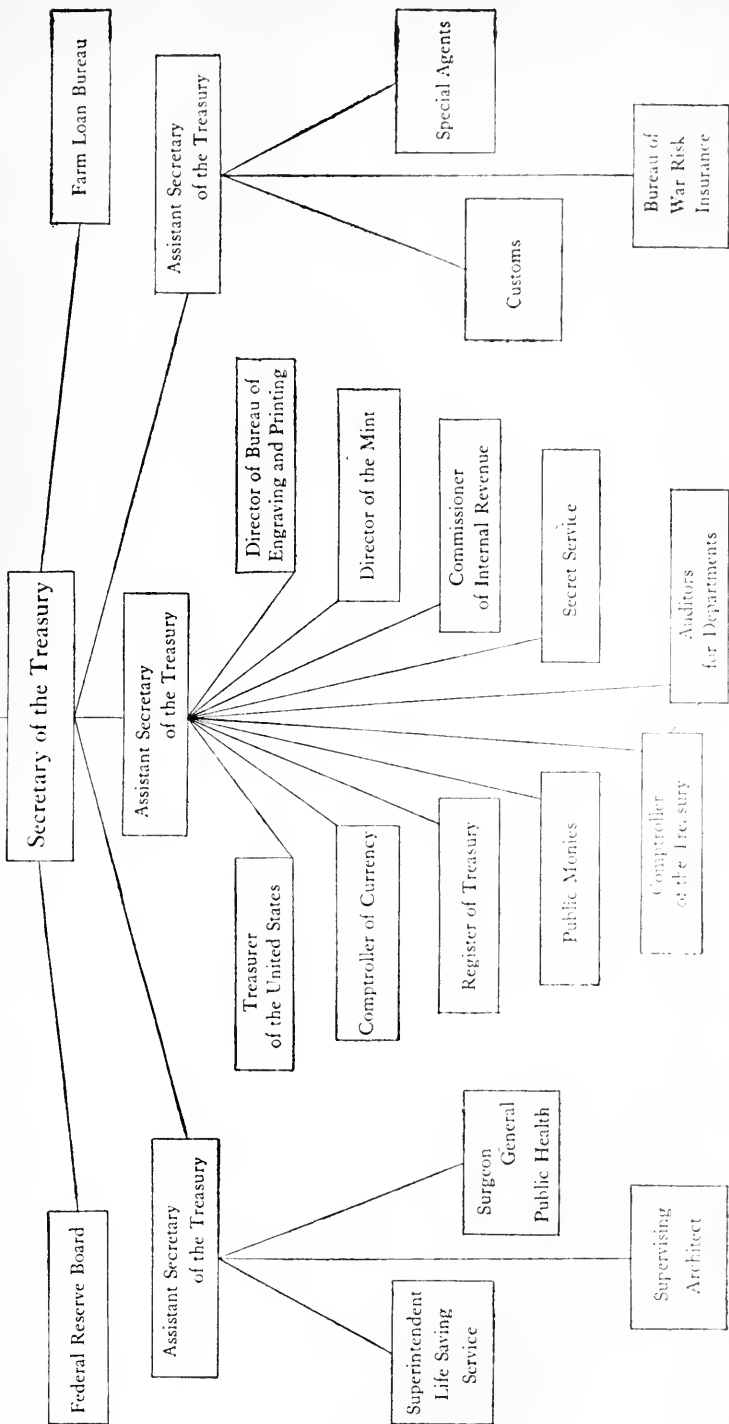

On May 8, 1792, the office of Assistant to the Secretary of the Treasury was superseded by the office of Commissioner of Revenue, whose duties were to collect internal revenue and direct taxes. This office was abolished by an act of Congress April 6, 1802, reestablished July 24, 1813, and again abolished Dec. 23, 1817.

The General Land Office, whose head was a Commissioner, was created in the Department of the Treasury April 25, 1812, and was transferred to the Department of the Interior in 1849. As at present organized, the work of the Department is divided among nineteen principal offices, bureaus and divisions.

As head of the Department the Secretary is charged by law with maintaining the revenue for the support of the public credit; superintending the collecting of the revenue and directing the forms of keeping and rendering public accounts; granting of warrants for all moneys drawn from the Treasury in pursuance of appropriations made by law, and for the payment of moneys into the Treasury; and annually submitting to Congress estimates of the probable revenues and disbursements of the Government. He also controls the construction of public buildings and the coinage and printing of money. There are three Assistant Secretaries. Up to 1817 the Comptroller of the Treasury revised the report of the Accountants of the other departments, but an act passed March 3, of that year, created the offices of Second, Third, Fourth, and Fifth Auditors, whose duty it was to perform this work. A Sixth Auditor was added in 1836.

In 1894 the designations and duties of the auditors were changed and definitely established as follows: That of the First Auditor, to Auditor for the Treasury Department; Second Auditor, to Auditor for the War Department; Third Auditor, to Auditor for the Interior Department; Fourth Auditor, to Auditor for the Navy Department; Fifth Auditor, to Auditor for the State and other Departments; Sixth Auditor, to Auditor for the Post-Office Department. According to the act of 1894 the offices of First and Second Comptroller were succeed-

Department of Treasury

ed by the office of Comptroller of the Treasury, whose principal duties are the rendering of decisions in cases of appeals from Auditors, heads of Departments or other officials, and the prescribing of forms for the keeping of public accounts.

Treasurer of the United States.—The Treasurer of the United States, whose office is a part of the Treasury Department, receives and disburses all public moneys deposited in the Treasury, sub-treasuries (q. v.) and in national banks that are United States depositories; is trustee for bonds that secure the national bank circulation and public deposits; has the custody of the Indian trust-fund bonds, and other public trusts; is fiscal agent for paying the interest on the public debt; and is ex-officio commissioner of the sinking fund of the District of Columbia. The duties of the Treasurer's office are distributed among eleven divisions.

Until 1894 the chief duty of the Register of the Treasury was the recording of the receipts and expenditures of the Government and the office was organized in several divisions, but in that year the number of divisions was reduced to two, viz., the Division of Loans and the Division of Notes, Coupons and Currency, the books relating to the recording of the receipts and expenditures of the Government being transferred to the Division of Book-keeping and Warrants, of the Secretary's office. At present the office of the Treasurer is charged with the issue, exchange, transfer, and redemption of bonds and the receiving and registering of redeemed notes, certificates, coupons, etc.

Comptroller of the Currency.—The office of Comptroller of the Currency was established in 1863, its chief function being supervision of the national banks, their organization, and the issue and redemption of their notes.

Revenue-Cutter Service.—The Revenue-Cutter Service is a military arm of the Government attached to and under the direction of the Treasury Department. (See Revenue-Cutter Service.)

Secret Service.—The Secret Service Division of the Treasury Department was created in 1861, but from 1862 until 1865 it was under the State Department. In the latter year it was permanently organized as a division of the Treasury Department. It is chiefly concerned with the detection of counterfeiting and of other frauds and crimes against the Government, but in time of war the scope of its duties is somewhat enlarged. Details are also furnished for the protection of the President of the United States, and in the frequent journeyings of the present President he is always accompanied by one or more secret-service men.

The arrest of counterfeiters number about 400 annually; other arrests are for bribery, impersonating United States Government officers, perjury, etc.

Supervising Architect.—The office of Supervising Architect, charged chiefly with the erection and maintenance of Government buildings, was created in 1864. Since 1853 this work has been done by a Division of Construction with an officer of the Engineer Corps of the army at its head.

Health Bureau.—The work of the Bureau of Public Health and Marine-Hospital Service was established in 1798 but was reorganized and the office of Surgeon-General created in 1872. This official has supervision of the health of seamen, the quarantine service, and the weekly publication of "Public Health Reports of the United States."

Following is a list of the Secretaries of the Treasury with the Presidents under whom they served:

Vacancy by death of head of, 5568.

Treasury Notes.—To meet the expenses of the War of 1812, \$36,000,000 in Treasury notes bearing 5½ per cent interest were issued. They were receivable for all duties to the Government, but were not legal tender. Beginning with the panic of 1837 and extending through the Mexican War, \$73,000,000 were issued, and following the panic of 1857 there was an issue of \$53,000,000. The exigencies of the Civil War required the issue of Treasury notes in large amounts. An act of Feb. 25, 1862, authorized the issue of \$150,000,000 of such notes with a legal-tender character and not bearing interest. These were called greenbacks (q. v.). The United States seven-thirties, of which \$830,000,000 were issued, were a variety of Treasury note. Treasury notes were issued to pay for the monthly purchase of bullion authorized by the Sherman Act of 1890.

Treasury Notes. (See also Currency.)

Appropriation to meet outstanding, recommended, 3073.

Issuance of, 549, 2119.

Vacancy occasioned by death of, recommendations regarding filling of, 5568.

Treasury, Solicitor of, office of, established, 1090.

Operations of, referred to, 2539.

Treaties.—The modern definition of a treaty is an agreement or covenant between two or more nations or sovereignties formally signed by duly authorized

commissioners and solemnly ratified by each. In ancient times terms of treaties were dictated rather than contracted. A conqueror with an army at the gates of a capital stated his terms and declared his intention of remaining and inflicting such punishment as he saw fit until he received satisfactory assurances that his wishes would be carried out.

In the fifteenth century a jurisprudence of political treaties began to grow and was closely connected with the development of European statecraft. The treaty of Westphalia, which ended the Thirty Years' War, marked the turning point between ancient and modern diplomacy. Up to this time treaty negotiations had been based upon rights which had once existed and were recognized before rupture. After the treaties of Münster and Osna-brück, the object of diplomacy was to establish a political equilibrium at the expense of preexistent rights and to maintain the *status quo*. The efforts of European diplomats during the early part of the nineteenth century were directed toward the suppression of the revolutionary spirit and the curbing of monarchical ambitions. Later the maritime rights of neutrals, suppression of slave trade, and the international emancipation of trade, navigation, arts, and labor became leading subjects for diplomatic consideration.

The popularity of the principle of arbitration marks the latest step in diplomatic progress. The proposition made by the Czar of Russia in 1898 for the general disarmament of the world and the settlement of international disputes by a court of arbitration points to a culmination of the science of diplomacy. In this connection may also be noted Secretary Bryan's peace treaties.

The first treaties of the United States were conceived before the Declaration of Independence was signed. Nov. 29, 1775, the Continental Congress appointed a committee on secret correspondence, charged with ascertaining whether, if the Colonies should be forced to form themselves into an independent State, France would enter into any treaty or alliance with them. On Feb. 6, 1778, two treaties were concluded in Paris with France—a treaty of alliance and a treaty of amity and commerce. On Oct. 8, 1782, a treaty of amity and commerce was concluded with the Netherlands, and April 3, 1783, a similar treaty with Sweden.

Jan. 20, 1783, an armistice with Great Britain was arranged at Versailles, followed Sept. 3 by a definitive treaty of peace, later concluded in London, recognizing the independence of the United States. This was signed by David Hartley on the part of Great Britain and by Benjamin Franklin, John Adams and John Jay on the part of the United States. Other treaties concluded before the adoption of the Constitution were a treaty of amity and commerce with Prussia, Dec. 10, 1785; a treaty of peace and friendship with Morocco in January, 1787, and a consular convention with France, Nov. 14, 1788.

In the United States the right of making and of ratifying treaties is, by Article II, Section 2, of the Constitution, vested in the President under the advice and with the concurrence of two-thirds of the Senate. The right of changing the terms and conditions of a treaty before ratification is claimed by the Senate.

International law or the law of nations is very clear upon the question of treaties and of all the interpretations of its conditions. No treaty may be made which will in any way or in the slightest degree override the Constitution, or which will bind

either nation to any terms or conditions that flagrantly sacrifice the interests of either, or cause the nation to do anything morally wrong in the fulfillment. A treaty becomes binding at the time of signature by duly authorized commissioners, and if the ratification is delayed, such ratification becomes retroactive; though it may be specified in the treaty that its terms become operative only upon ratification. Where an ambiguity of expression or possibility of other construction of the terms of a treaty exists, no strained interpretation is permitted and the common use of the words is followed unless this leads to an absurdity. Where two meanings are possible, that one is chosen which confers the least benefit upon the party who sought or demanded the insertion of the doubtful clause. When clauses impose hard conditions upon either party these are to be interpreted strictly so as to minimize the hard conditions; and where justice, equity, and humanity are favored by the doubtful clauses they are interpreted with broad construction, so as to confer the fullest benefits.

The term "convention" is limited to agreements which deal with subordinate questions. Treaties are classified as treaties of peace, alliance, truces, commercial treaties, extradition treaties, conventions and protocols—a name given to less formal agreements between nations. Defensive treaties are designed to defend the parties mutually against the encroachments of others. Offensive and defensive treaties or alliances obligate the parties to aid one another at all times during conflict of either of the parties against the encroachments of other nations. Treaties of neutrality obligate the contracting parties to take no part in conflicts between other nations.

Extradition treaties, which provide for the return of accused criminals, are described below:

When Washington was called to the Presidency he found the northern frontier of the United States occupied by British military posts and Spain making encroachments on the south. With the outbreak of the French Revolution, Spain joined England, and French sympathizers in America were attempting to fit out privateers to prey upon Spanish and English commerce. Washington was urged to cast the fortunes of the United States into one side of the struggle. To avoid any entangling alliances he sent John Jay, Chief Justice of the United States, as a special envoy to London (page 146). Nov. 19, 1794, Jay concluded the treaty which has since borne his name. In consequence of the irritating conduct of M. Genet, the French minister at Washington, Congress in 1798 abrogated the treaties and consular conventions with France. Another treaty was made in 1800, and in 1803 three conventions were signed, including the one ceding Louisiana. One of the most enduring treaties made by the United States was that of Oct. 27, 1795, with Spain, which stood for more than 100 years. This was the only treaty not swept away by the Napoleonic wars.

The treaty of Ghent, signed in 1814, was important as settling some disputed boundary questions, as well as concluding peace between the United States and England. No mention was made of the right of search and the impressment of American seamen, though these were the especial causes of the war. Other notable treaties made by the United States were the Webster-Ashburton treaty, signed at Washington in 1842, defining the northeastern boundary between Canada and the United

States, and the treaty of Guadalupe Hidalgo, in 1848, concluding the Mexican War, by which Mexico ceded territory now comprising Nevada, Utah, most of Arizona, a large part of New Mexico, parts of Colorado and Wyoming, and all of California. The treaty with Japan in 1854 secured humane treatment for American sailors shipwrecked on the coast of Japan and the right to appoint a consular agent; it also led to the establishment of important trading privileges with the United States and Great Britain in 1858.

The treaties of Tientsin, concluded in 1858, and the Burlingame treaty of 1868 opened China to foreign travel and gave protection to Christians within her borders. The treaty of Washington was signed in 1871, and settled questions pending between the United States and Great Britain. It submitted the Alabama claims to a commission of arbitration and adjusted the fisheries question on a reciprocity basis. There was also a concession of important privileges by each of subjects of the other in America, and the question of the northwestern boundary of the United States was submitted to the arbitration of the German Emperor.

At the close of the Spanish-American War, in 1898, Spain was forced to relinquish Cuba and cede to the United States the island of Porto Rico, together with the Philippine Islands and Guam. Under the Constitution treaties are made a part of the supreme law of the land and they have a legal status similar to that of contracts. Numerous treaties have been made with the Indians and with various countries on the subject of extradition. (See Foreign Relations and Treaties with the various nations following descriptions of the countries.)

Treaties (see Indians); for treaties with foreign nations, see the respective countries, using list "Nations."

Withdrawn, 1888, 4922.

Trent Affair.—In the autumn of 1861 the government of the Confederate States sent J. M. Mason and John Sidel as commissioners to Great Britain and France, respectively. They went first to Havana, where they took passage on the British merchant ship Trent for St. Thomas, on their way to England. Nov. 8 the vessel was stopped in the old Bahama Channel by the U. S. S. San Jacinto, Capt. Wilkes. The Confederate commissioners were seized and taken to Boston as prisoners. Wilkes's act was in violation of the rights of neutral nations, for which the United States had always contended. The British Government promptly instructed its minister at Washington to withdraw from the United

States unless the prisoners were set at liberty and an apology tendered within seven days. The United States disavowed the act of Capt. Wilkes and set the prisoners free.

Trent, The, removal of Confederate envoys from. (See Mason and Slidell.)

Trenton, The, loss of, at Samoan Islands, 5479.

Trenton (N. J.), Battle of.—Washington's retreat through New Jersey left him with scarcely 3,000 men on the west bank of the Delaware River on Dec. 8, 1776. On the night of Dec. 13, Dr. Charles Lee was taken prisoner at Baskingridge by the British, and his army added to that of Washington gave the latter some 6,000 able-bodied soldiers. On the night of Dec. 25, 1776, Washington, with about 2,500 men, crossed the Delaware River and on the morning of the 26th attacked an outpost of 1,500 Hessians at Trenton under Col. Rahl and captured about 1,000 of them and killed 40. The American casualties were 2 killed, 2 frozen to death, and 3 wounded. The effect of this victory and that of Princeton following it was electrical. The Americans were uplifted and the British discouraged.

Tranon Decree.—A secret edict issued by Napoleon at the Grand Tranon Palace, at Versailles, Aug. 5, 1810. It placed a duty of 50 per cent on colonial products and ordered the immediate confiscation of all American vessels and merchandise brought into French ports prior to May 1, 1810, the date of the approval of the act excluding French vessels from American waters. It also ordered that until Nov. 1 American vessels were to be allowed to enter French ports, but not to unload without his permission, offering at the same time to revoke the Milan and Berlin decrees Nov. 1. The revocation was not carried into effect, and American ships and cargoes availing themselves of the promised protection were confiscated. (See also Berlin Decrees; Embargo; Milan Decree; Orders in Council.)

Triple Alliance.—The popular name of three different political combinations of European powers: First—An alliance concluded at The Hague in 1668 between England, Holland and Sweden, having for its

object the checking of the conquests of Louis XIV. Second—An alliance concluded in 1717 between England, France and Holland against Spain. With the addition of Austria in 1718 it became known as the Quadruple Alliance. Third—The Dreikand, originally formed October 7, 1879, as a dual alliance between Germany and Austria-Hungary, on the basis of mutual assistance in case of an attack by Russia on either party, and friendly neutrality in case of an attack by any other power. Italy joined this alliance and with the beginning of 1882, it has been known as the Triple Alliance. The treaty between Italy and Germany provided for common action in case of French encroachments on either power, and that between Italy and Austria-Hungary for the maintenance of a friendly neutrality in case of hostilities between France and Italy or between Russia and Austria-Hungary. (See Central Powers and European War.)

Triple Entente.—One of the political alliances or understandings between the European nations. Although published treaties bound the powers to no political or military alliance, it was generally conceded that Russia had an understanding with France that in the event of hostilities the two nations would unite against Germany. Great Britain also became a secret ally of France in her diplomatic and commercial rivalry with Germany. At the outbreak of the European War of 1914, Germany came to the assistance of Austria-Hungary when the latter was menaced by Russia, agreeably to the terms of the Triple Alliance, and France made ready to attack Germany on behalf of Russia in accordance with the Triple Entente. Italy maintained neutrality when the other members of the Alliance became involved, and Great Britain joined France and Russia in their operations against Germany on the ground of the violation of the neutrality of Belgium. (See Entente Allies and European War.)

Tripoli.—An Italian province in northern Africa, wrested from Turkey by the war of 1908 and confirmed by the Treaty of Ouchy. It is bounded on the north by the Mediterranean Sea, on the east by Egypt, on the west by Tunis and on the south by the Desert of Sahara. Its exports consist mainly of products of the Sudan brought across the Sahara by caravan. The Oasis of Fezzan and some smaller oases are within its borders. It anciently belonged to Carthage and at a later date to Rome. It was overrun and conquered by the Arabs in the seventh century and by the Turks in the sixteenth century. It became an independent state in 1713, but was reconquered by the Turks about 1835. A war occurred between Tripoli and the United States, 1801-1805 (q. v.). Area, 398,000 square miles, the population is estimated at 1,000,000.

Tripoli:

Blockade of, by United States squadron referred to, 388, 389.

Citizens of United States imprisoned in, liberated, 373.

Claims of United States against, 1025. Corvette on coast of, destroyed by United States vessels, 353.

Ex-Bashaw of, treaty with United States relative to restoring family of, to, 418.

Hamet Caramilli, appeals of, to United States to place on throne of, in place of his younger brother, 380.

Philadelphia, wreck of the, on coast of, 356, 362.

Officers and crew of, fall into hands of citizens of, 356.

Treaty with, 235, 378.

War with. (See Tripolitan war.)

Tripoli, Treaty with.—The treaty of peace and amity of 1805 closed the Tripolitan War. By its terms freedom of commerce was granted to citizens of the United States upon conditions of the most favored nation. The Bashaw of Tripoli agreed to deliver to the commander of the American squadron all Americans in his hands in return for all of his subjects in the hands of the Americans. As the Americans to be released numbered about three hundred, and the Tripolitans in the hands of the Americans only one hundred, the United States agreed to pay the Bashaw of Tripoli the sum of sixty thousand dollars in compensation for the difference. The United States land forces should be immediately withdrawn without supplies; and the United States agreed to use her best offices to induce the brother of the Bashaw, her ally, to withdraw also. But the United States agreed not to use force to bring this about. Should the brother acquiesce, the Bashaw agreed to return his wife and child, held as hostages.

Passports should be granted to vessels of both nationalities, and provisions were made to render examination of passports and other papers as easy as possible. Humane provisions were made for a supply of food, repairs, and relief to distressed or shipwrecked sailors or vessels. The commerce, protection of merchants, and appointment of consuls in Tripoli were provided for on terms of the most favored nation. Freedom of conscience was guaranteed to all citizens of the United States.

Tripolitan War.—A war between the United States and Tripoli, 1801-1805. During the latter part of the eighteenth century the United States, following the custom of the leading European nations, paid an annual tribute to the rulers of the various Barbary States as the price of immunity from their piratical depredations. In consequence of a refusal on the part of the United States to increase the tribute the Bashaw of Tripoli, June 10, 1801, declared war (314). In anticipation of this event the United States had already sent a squadron to the Mediterranean. In October, 1803, the frigate *Philadelphia*, Capt. Bainbridge, while chasing a corsair into the harbor of Tripoli, struck a sunken rock and was captured with all on board. Commodore Decatur, of the *Intrepid*, ran his vessel into the harbor of Tripoli on the night of Feb. 16, 1804, and under the fire of the shore batteries burned the *Philadelphia*. Between July and September, 1804, Commodore Edward Preble made a series of attacks on the fortifications of Tripoli. Meantime Gen. William Eaton, United States consul at Tunis, joined Hamet, the rightful Bashaw of Tripoli, in an expedition against his usurping brother. Marching from Egypt across the desert, they took Derne April 27, 1805. The success of this expedition made it possible to extort a highly favorable treaty from the Bashaw June 4, 1805, the United States agreeing to pay \$60,000 ransom for the officers and crew of the

Philadelphia and Hamet being induced to retire.

Tripolitan War:

Blockade established by United States referred to, 388, 389.

Discussed, 314, 331, 358, 379, 380.

Establishing blockade, 388, 389.

Letter of American consul regarding, transmitted, 363.

Treaty of peace transmitted, 378.

Troops. (See Army; Militia.)

Trust.—In modern commercial usage an organization for the control of several corporations or establishments under one direction or in one combination, the object being to enable the trustees or managers to direct and govern all the corporations or establishments, so as to control and suspend at pleasure the work of any, and thus to reduce expenses, regulate production, and defeat competition. In later years these combinations or trusts have greatly multiplied and increased, both in number and capital involved. The first anti-trust enactment was a provision in the constitution of Georgia, passed in 1877 and directed against the formation of pools among railroads. The Interstate Commerce (q. v.) law passed by Congress in 1887 also prohibited the formation of railroad pools. In 1889 several states passed anti-trust laws, and in 1890 Congress passed what is known as the Sherman Anti-trust law. This declared combinations in restraint of trade among the several states or with foreign powers illegal and fixed a penalty of \$5,000 or one year's imprisonment. The operation of the Sherman law was not entirely satisfactory, and in 1903, on Attorney-General Knox's recommendation, Congress passed laws for expediting cases instituted under the Sherman Act, made the Interstate Commerce (q. v.) Act more effective and created the Bureau of Corporations in the new Department of Commerce and Labor (q. v.) to investigate corporations other than railroads engaged in interstate or foreign commerce. The latest enactment of Congress on the subject of trusts is the Clayton law passed in 1914.

The decisions of the United States Supreme Court, March 14, 1904, in the Northern Securities case prevented the combination of the Great Northern and Northern Pacific Railroads, declaring that a corporation organized to vote the majority of the stocks of the two railroads was not a mere holding company but a combination in restraint of trade, and ordered it dissolved. On July 1, 1905, five corporations and seventeen individuals engaged in the meat-packing industry were indicted at Chicago by the Federal Grand Jury for violation of the Sherman anti-trust law, and later pleaded guilty and were fined. The largest trust is the United States Steel Corporation, organized in 1901, which in 1908 had securities outstanding to the amount of \$1,432,597,873.31, and assets aggregating \$1,703,168,118.40. Moody's "Manual of Corporations" mentions some 1,500 trusts, and states that 440 large industrial and transportation trusts are active, and have a floating capital of \$20,379,162,511.

Trust Funds:

Discussed, 4920.

Referred to, 4990.

Trusts, evils of monopolies and, discussed and recommendations regarding, 5358, 5478, 6176, 6240, 6360. (See also Anti-Trust Law.)

Tunis.—A French protectorate in northern Africa. It is one of the Barbary States. Tunis is bounded on the north and northeast by the Mediterranean Sea, on the southeast by Tripoli, on the south and southwest by the Desert of Sabara, and on the west by Algeria. It produces grain and fruits (principally dates and olives), and has important fishing interests. It is peopled by Arabs, Berbers, and Jews. Tunis formed a part of ancient Carthage, and later, as Roman Africa, it became the leading seat of Latin Christianity. It passed successively under the dominion of the Vandals, Greeks and Arabs. It was made a Turkish province in 1575. For a long time it was noted as a piratical state. It became a French protectorate in 1881. Area, 45,779 square miles; estimated population, 1,500,000.

Tunis:

- Blockade of Tripoli, 388, 389.
- Claims of, against United States, 388, 389.
- Condolence of Bey of, on death of President Lincoln, 3565.
- Consul of United States in, 169, 379, 833, 2611.
- Convention with, 833.
- Differences with, unsettled, 374.
- Gratuity promised to, by United States partially delivered, 325.
- Peace negotiations with, 389.
- Questions with, regarding blockade of Tripoli, 388, 389.
- Relations with, uncertain, 395.
- Treaty with, 192, 253, 359, 821, 833, 852.
- War with, threatened, 388.

Tunis, Treaties with.—The treaty of amity, commerce, and navigation of 1797 was in some respects modified by the latter treaty of 1824. Both, in turn, were superseded by the treaty with France regarding Tunis of May 9, 1904. By this latter the consuls of the United States residing in Tunis are no longer governed by the conditions of the former treaties, but are to be regulated in all cases by international law. The government of France agrees by this treaty to accord to the said consuls all of the rights, privileges, and immunities so provided. (See France, Treaties with.)

Turin, Italy, Hygienic Congress at, 4626.

Turkey.—The Turkish or Ottoman Empire, in southeastern Europe and in Asia and Africa, embraces a total area of 1,058,041 English square miles, with an estimated population of 31,580,000. Of this total, about 700,000 square miles, with a population exceeding 21,000,000, are directly under Turkish government.

TURKEY IN EUROPE.—Turkey in Europe occupies the eastern portion of the Balkan Peninsula and lies approximately between 40°-42° 50' N. latitude and 26°-29° 10' E. longitude. The only political neighbor in Europe is Bulgaria on the north and west. The southern coast is washed by the Ægean and the Sea of Marmora, and the northeast coast by the Black Sea. The principal towns are Constantinople, the capital of the Empire, with a population estimated at 1,100,000, Adrianople (120,000), Rodosto (35,000), Gallipoli (25,000), Kirk-Kilissh, Choru, and Enos.

TURKEY IN ASIA.—Anatolia is practically coincident with Asia Minor, a peninsula of western Asia, bounded on the north by the Black Sea, on the west by the Ægean, and on the south by the Mediterranean; and separated from Turkey in Europe at the northwestern extremity by narrow straits known as the Dardanelles, which mark the entrance to the Sea of Marmora, and the Bosphorus, which forms a gateway to the Black Sea.

Physical Features.—In the western vilayets are the Graicous and Scamander, which rise in Mount Ida, 5,750 feet, the latter flowing through the plains of Troy; and the Meander, whose winding course to the Gulf of Millets, on the Ægean coast, is the classical symbol of purposeless wandering.

Production and Industry.—The country is rich in minerals, including gold, silver, nickel, mercury, copper, iron, lead and coal, but its resources are almost entirely undeveloped; the forests of the northern mountains contain pine, fir, cedar, oak and beech, and the lower slopes and plains of the west produce figs, olives and grapes in abundance, while fruit trees flourish in the north. Cereals, cotton, rice and tobacco are cultivated, and buffaloes, camels, horses, sheep and goats form the principal wealth of the inhabitants. Carpets, rugs and cottons and mohair and silk stuffs are manufactured. Coffee, textiles and other manufactures, petroleum and salt are the principal imports. The Anatolian Railways, built by German enterprise, run from the coast to Angora, to Brusa, and to Konha, whence an extension is being built as a section of the Bagdad line (see Mesopotamia). There are also English and French lines in the west; these railways have given a great impetus to the trade of Anatolia.

Islands.—Almost all the Turkish islands have been occupied by Greece and Italy. Samothrace, Lemnos, Mitylene, Chios, Psara, Samos, Nikaria and smaller islands were seized by Greece during the Balkan War of 1912-1913; while Rhodes, Carpathos, Cos and other islands were occupied by Italy in 1912. Under the treaty of Ouchy (1912) Italy has undertaken to restore the occupied islands when all Ottoman troops have left Tripoli and Benghazi. Lemnos, Imbros, and Samothrace lie close to European Turkey, in the Ægean Sea, while Thasos, which lies near the coast of Salonica, is the personal property of the Khedive of Egypt, and is excluded from the Archipelago administration. Rhodes contains the old headquarters of the Archipelago vilayet; the island is particularly fertile, and the climate delightful, the land producing a profusion of fruits, grapes, and grain, and providing rich pastures. Mitylene, or Lesbos, north of the Gulf of Smyrna, has an area of about 680 square miles and a population estimated at 130,000, of whom all but 10,000 are Greek Christians; its products are olives, mules and cattle. Chios is about 250 square miles in extent and has a population about 70,000; its products are figs and wine. Crete, or Candia, claimed to be part of the Hellenic Kingdom at the outbreak of the war of 1912-1913, has since been incorporated by Greece. Samos, which was semi-independent, now forms part of the Hellenic Kingdom. Cyprus has been administered by Great Britain since 1878.

Turkish Armenia and Kurdistan lie between Anatolia on the north and west and Asiatic Russia and Persia on the east. Armenia occupies the northwestern corner of the Iranian Plateau, with a mountain range

running diagonally from southwest to northeast and culminating in Mount Ararat (16,920 feet), which is the meeting-point of the Armenian, Russian and Persian boundaries. Kurdistan lies between Armenia and Mesopotamia. In the Armenian plateau several rivers have their source. The Euphrates (which has a length of 1,800 miles from its source to its outflow in the Persian Gulf). The Tigris has a total length of 1,150 miles from its source to its junction with the Euphrates, 70 miles from the Persian Gulf. Other rivers are the Aras and the Churuk Su. The great lake of Van (about 2,000 square miles in area) occupies the central portion of the vilayet of that name, in Kurdistan.

Mesopotamia, or the land of the Tigris and the Euphrates, which includes the vilayets of Mosul, Bagdad, Basra, and part of the vilayet of Zor, consists of broad, undulating plains, in which wheat and barley are abundantly grown. It extends southwest to the deserts of Arabia, and southwest to the mouth of the Euphrates.

This vast district is the subject of two important schemes, both of either of which would tend to agricultural development and security. One proposal is the Bagdad (or Euphrates Valley) Railway for which a concession has been granted to a German syndicate to extend the Anatolian line from Konia, via Mosul and Bagdad, to the Persian Gulf, but there are international difficulties in the way of the completion of the line, which has not yet entered the Euphrates valley. The Mesopotamia Irrigation scheme of Sir William Willcocks will bring a vast area once more into cultivation thus reviving the prosperity of a district containing traces of close settlement in bygone days; part of the scheme is already completed, and some 300,000 acres have been made available for tillage. South of the city of Bagdad is Kerbela, the most sacred center of pilgrimage for the Shia (Persian) Muhammadans.

Syria includes several vilayets with the mutessarifliks of Jerusalem and Lebanon, extending eastward to the deserts of Arabia, and south to the Sinai Peninsula. A Franco-Turkish agreement was signed in September, 1913, under which railway and other concessions in Syria are granted to France in return for facilities for raising loans in Europe. Wheat, tobacco, fruit, and wine are produced, but, except in the Palestine littoral, there is little cultivation without irrigation.

Palestine.—Of special interest to Christians is the district known as Palestine, a strip of land along the Mediterranean shore, and lying approximately between 31° 28' 33" 20' N. latitude. Palestine is divided into the maritime plain and mountainous region of the west, and the almost unexplored region of eastern Palestine. Western Palestine contains the rivers Orontes and Jordan, of which the Orontes (170 miles) rises in the north and flows westward to the coast; while the Jordan flows almost due north and south (generally below the level of the sea) from its source, in the neighborhood of Mount Hermon, to its mouth in the Dead Sea. In a winding course of close on 200 miles, during which it flows through the Sea of Galilee. The Jordan irrigates large tracts of country during the rainy season, when it overflows its banks. Palestine now forms the mutessariflik of Jerusalem and part of the vilayet of Beyrout. The Church of the Holy Sepulchre at Jerusalem is visited annually by large bands of Christian pilgrims, principally of the Orthodox and Coptic churches, and the site of Solomon's Temple is occupied by the Mosque of Omar, which con-

tains a relic of the Prophet and the sacrificial stone of Abraham. Recent excavations on the site of the city of Jericho have proved that the walls are still standing for the greater part of the perimeter. Damascus in Syria contains the Mosque of the Ommayyedes, where is the tomb of Saladin.

The principal towns of Asiatic Turkey are Smyrna (260,000), Bagdad (150,000), Damascus (150,000), Aleppo (125,000), Beyrout (120,000), Scutari in Anatolia (80,000, and Broussa (80,000).

History.—The Ottoman Turks are descended from Asiatic tribes, who migrated westward under the pressure of the Mongol invasion, and spread from Asia Minor into southeast Europe at the beginning of the fourteenth century. The Turks captured Constantinople in 1453, and spread over the whole of the Balkan Peninsula, their name of Osmanli, or Ottoman Turks, being derived from Othman, or Osman, a notable Turkish leader in the thirteenth century. Early in the sixteenth century the Ottoman Empire was spread over Egypt and northern Africa, and penetrated northward into Hungary, a great part of which was incorporated with the Turkish dominions until 1699, when the Peace of Carlowitz freed the country from Turkish rule. In the nineteenth century the outlying African dominions, with the exception of Tripoli, broke away from their suzerain, or were occupied by other Powers, and in the latter part of the century the northern states of the Balkan Peninsula asserted their independence, under guarantees of the Christian Powers.

The revolution of 1908-1909 aimed at the restoration of the constitution granted in 1876, but withdrawn by the Sultan in 1877, from which date the rule of the Sultan was a despotism, tempered only by religious observances and the fear of a popular rising or of intervention by other Powers. The 1876 constitution, restored on July 23, 1908, consists of a monarchy and of an Assembly of two houses. During the process of constitutional reforms, which drove the Sultan Abdul Hamid (1876-1908) from the throne, war broke out between Italy and Turkey, and Tripoli and Benghazi were ceded to Italy under the Treaty of Ouchy. These events were followed in the autumn of 1912 and early months of 1913 by a disastrous war with the States of the Balkan League (Bulgaria, Montenegro, Serbia, and Greece). At the outbreak of hostilities the European dominions of Turkey extended westward to the Adriatic and northward to Bosnia-Herzegovina, thus including the districts known as Macedonia, Thrace, and Albania. By the Treaty of London (1913), the northwestern boundary of European Turkey was a line drawn from Enos, on the Adriatic coast, to Midia on the Black Sea, thus excluding Adrianople, which had capitulated (after a long siege) to the Bulgarian forces. At the outbreak of the second Balkan war (in which Serbia and Greece were allied against Bulgaria by Rumania), Turkey took advantage of the military difficulties of Bulgaria and reoccupied Adrianople, thus recovering a part of the lost dominions. Ruler (Sultan), Mehmed V., born Nov. 3, 1844, proclaimed April 27, 1909, in succession to Abdul Hamid II. (reigned 1876, deposed 1908). The present Sultan is the thirty-fifth in descent from Othman, the founder of the Empire, in whose line the succession is vested. During the European war of 1914, Turkey was induced to assume the offensive against Russia, and on Nov. 1, bombarded Odessa and began hostile operations in the Black Sea. In consequence the allied powers of

Russia, France and Britain dismissed the Turkish ambassadors. (See European War.)
Government.—The Turkish Parliament consists of two houses. The Senate consists of members appointed by the Sultan. The Chamber of Deputies contains 280 members, elected by delegates (chosen for the purpose by the registered voters) for a maximum of four years.

At the capital (Constantinople) there is a Court of Cassation, with a *section de requêtes*, and civil and criminal sections; a court of civil and criminal appeal; and a tribunal of first instance.

Turkey in Africa—Egypt.	363,181	11,400,000
Grand Total.....	1,058,041	31,580,000

Some twenty or more races are represented in the Turkish Empire, the Osmanlis or Turks being the most numerous. Other races are Bulgarians, Vlachs, Kurds, Circassians, Armenians, Arabs, Jews, and Gipsies. Of the total population more than half are Muhammadans and about 36 per cent Christians, while 300,000 are Jews, 300,000 Druses, and 200,000 Gipsies (about equally divided between the Moslem and Christian faiths.)

Production and Industry.—Wheat is largely grown in European Turkey, in South Eastern Anatolia and in the vilayets of Basra and Syria; maize, millet and sesame are largely grown in Anatolia. The vine is very generally cultivated, and dates, figs, olives, oranges and fruit of almost every kind are grown, particularly in northern Anatolia. Basra is the principal center of the date industry, and Adrianople of

the wine trade. Roses are very largely grown in Adrianople for the production of perfume. Cotton is now largely grown, and tobacco is almost universal, the trade being centered at Smyrna. The silk-worm industry is encouraged, and large quantities of silk are produced in Adrianople and in northwestern Anatolia.

The mineral wealth of Turkey is believed to be immense in both sections of the empire; gold, silver, lead, copper, iron, mercury, corundum and zinc, and coal, salt and borax are known to exist; and salt, silver, lead and copper mines are successfully exploited. Petroleum is obtained in the Adrianople coast district of the Sea of Marmora.

The principal industries are tanning and the manufacture of muslin, velvet, silks and carpets, attar of roses, and ornamental metal-work.

For the army and navy see *Armies of the World* and *Navies of the World*.

Cities.—Capital Constantinople. Population, 1,200,000. There are forty towns in the Ottoman Empire with a population exceeding 25,000.

Trade with the United States.—The value of merchandise imported into Turkey in Europe from the United States for the year 1913 was \$2,217,073, and goods to the value of \$9,917,890 were sent thither—a balance of \$7,700,817 in favor of Turkey.

Tuscaloosa, Ala., bill to provide for purchase of site and erection of public building at, vetoed, 5521.

Tuscany.—A compartmento of the Kingdom of Italy. Tuscany corresponds nearly to the ancient Etruria. It was ruled by the Romans, Goths, Byzantine Greeks, Lombards, and Franks. It became completely disintegrated about the eleventh century, but was afterwards erected into the Grand Duchy of Tuscany. After several changes in its government it was taken by France and became a part of that country about 1808, and was restored to the Hapsburg-Lorraine line in 1814. Tuscany was annexed by Italy in 1860. Area, 9,304 square miles; population (1901), 2,548,154; estimate for 1909, 2,675,500.

Tuscany:

Treaty with France, 185.

Vessels of, discriminating duties on, suspended by proclamation, 1452.

Tuscarora Indians. (See Indian Tribes.)

Tutuila (American Samoa).—Tutuila, the Samoan island which with its attendant islets of Manula, Olosega, Ofu, Annuu and Rose, became a possession of the United States by virtue of the tripartite treaty with Great Britain and Germany in 1899, covers, according to the Bureau of Statistics of the Department of Commerce and Labor, fifty-five square miles, and has (by census of Feb. 1, 1912) 7,251 inhabitants. It possesses the most valuable island harbor, Pago-Pago, in the South Pacific, and perhaps in the entire Pacific Ocean. Commercially the island is unimportant at present, but is extremely valuable in its relations to the commerce of any nation desiring to cultivate trans-Pacific commerce.

The Samoan Islands, in the South Pacific, are fourteen in number, and lie in a direct line drawn from San Francisco to Auckland, New Zealand. Tutuila is 4,160 miles from San Francisco, 2,263 miles from Hawaii, 1,680 miles from Auckland, 2,354 miles from Sydney, and 4,200 miles from Manila. Germany governs all the group except the part owned by the United States. The inhabitants are native Polynesians and Christians of different denominations.

Ex-Chief Justice Chambers, of Samoa, says of Pago-Pago that "the harbor could hold the entire naval force of the United States, and is so perfectly arranged that only two vessels can enter at the same time. The coaling station, being surrounded by high bluffs, cannot be reached by shells from outside." Capacity of coaling station, 4,200 tons.

The civil government is administered by a Governor, a naval officer nominated by the Navy Department and appointed by the President. All civil affairs are under the jurisdiction of the Navy Department. (See also Samoan Islands.)

Tutuila Island, agreement regarding establishment of naval station in, 4122. (See also Samoan Islands.)

Twenty-Cent Piece.—A silver coin of United States of the weight of 77.16 grains. It was authorized in 1875 and designed principally for use in the Pacific states. It was a legal tender to the amount of \$5. Coinage of it was discontinued in 1878.

Two-Cent Piece.—A bronze coin of the United States of the weight of 96 grains. It was first issued in 1864, and was the first coin to bear the motto "In God we

trust." It was legal tender to the amount of 25 cents. Coinage of the 2-cent piece was discontinued in 1872.

Two-Penny Act.—A law passed in 1755 by the Virginia assembly. The principal medium of exchange had up to this time been tobacco, it being considered more substantial than the paper money of the Colony. Under the provisions of the two-penny act, or option law, all debts payable, in tobacco were made payable, at the debtor's option, in money of the Colony at the rate of 16s. 8d. per hundred-weight of tobacco. This was equivalent to 2d. a pound. On appeal to the Crown the law was vetoed.

Tygris, The, detention of, admitted by Great Britain, 2111.

Tyler and Luckett (assignees), act for relief of, vetoed, 4334.

Tyler, John.—April 6, 1841-March 3, 1835.

Fourteenth Administration—continued—Whig.

Harrison died April 4, 1841; Vice-President Tyler took oath of office April 6.

Postmaster-General—
Francis Granger (continued).
Charles A. Wickliffe.

Attorney-General—
John J. Crittenden (continued).
Hugh S. Legaré.
John Nelson.

John Tyler was elected Vice-President by an electoral vote of 234—equal to that received by President Harrison. He succeeded to the position of President on the death of President Harrison, which occurred in a little more than one month after his inauguration. As this was the first break in the Presidential office since the organization of the Government, some dispute arose as to Tyler's title. Leading statesmen of both parties were actively discussing whether he was President or only Acting President. But Tyler settled the question for all time by signing his first message, "John Tyler, President."

Party Affiliation.—In the early part of his political career, Tyler was a strong supporter of President Madison's policies. In 1811 he opposed in the Virginia Assembly the recharter of the first Bank of the United States. As a member of Congress he was a strict constructionist; voted against Calhoun's internal improvement bill, the Missouri compromise, and protective tariff. In the Senate he opposed the "tariff of abominations" (1828). In 1832 he supported Jackson as the least objec-

tionable candidate, but this support was only temporary. His nomination to the Vice-Presidency with Harrison was an effort to secure for the ticket the assistance of the dissatisfied Democrats.

Finance.—The great financial event of President Tyler's administration was his famous struggle with the Whig majorities in Congress over the Fiscal Bank and Fiscal Corporation, both of which measures he vetoed. In his opening message (page 1896) he recounted the history of the United States Bank, the sub-treasury system of President Van Buren, and other financial aspects. He uttered a note of warning to Congress which passed unheeded. He said: "I shall be ready to concur with you in the adoption of such system as you may propose, reserving to myself the ultimate power of rejecting any measure which may, in my view of it, conflict with the Constitution or otherwise jeopard the prosperity of the country, a power which I could not part with, even if I would, but which I will not believe any act of yours will call into requisition." Both houses passed, and the President signed, a bill to abolish Van Buren's sub-treasury plan. The fight for the national bank then came on. President Tyler had always maintained that the Federal Government had no Constitutional right to establish a national bank within a state without first having obtained the consent of that state. Both houses passed an act incorporating a bank of the United States without providing for the consent of the states, and the President vetoed it. It failed to secure the necessary two-thirds vote and died. The "fiscal corporation" bill was then brought forward incorporating such a bank in the District of Columbia, with power to establish branches in other states. Pressure of all kinds was brought to bear upon the President to compel him to either sign this bill or to resign. But he was neither to be hoodwinked nor bullied. The bill passed both houses in September, 1841; but the President promptly vetoed it. Whereupon the majority of his Cabinet resigned, Webster alone remaining. No hoped-for embarrassment followed, for the President promptly filled the vacancies, and his nominations were at once confirmed. The great effect of the undoubted victory which Tyler won was the death-blow to paternal government.

Public Debt.—The public debt of the United States during the Tyler administration stood as follows: Jan. 1, 1842, \$20,601,226.28; 1843, \$32,742,922.00; 1844, \$23,461,652.50; 1845, \$15,925,303.01.

Tariff.—In the second year of Tyler's administration the strife between Congress and the President was renewed. Instead of the bank question, the tariff formed the matter of dispute. The importations were insufficient to supply the Government with means, and the reduction of duties by the compromise tariff had been so great that there was not money enough to meet the expenses. A bill was passed restoring the high protective tariff of 1833 and providing that the surplus revenues that were sure to accrue therefrom should be divided among the states. The President vetoed this bill on the ground that the compromise tariff provided that the protective tariff should come to an end in 1842, and because of the provision for distributing the surplus. Congress then framed another bill based on a tariff for revenue plan, with an incidental provision for protection and distribution. The President gave great offence to Congress by vetoing this bill also. There were threats of impeachment for unwarrantable assumption of authority; but the Whigs were afraid to go

EXTENT OF THE UNITED STATES DURING THE ADMINISTRATION OF PRESIDENT TYLER, 1841-1845.

(NOT INCLUDING TERRITORIES)

before the people for election in the autumn without settling the tariff, and they were obliged to pass a bill without the distributing clause. This the President promptly signed. Later, an attempt was made to pass the distributing clause in a separate bill, but the President vetoed that. In the next Congress, the Whig majority of 25 was replaced by a Democratic majority of 61.

Internal Improvements.—Congress passed two bills for river and harbor improvements, one for the eastern part of the country, and the other for the Mississippi section. The eastern bill President Tyler vetoed (page 2183); the Mississippi bill he signed. The discrimination was on the ground that the Mississippi was a great national highway, and therein differed from all other rivers, and was on that account a feature for the consideration of the Federal Government. An attempt to override the President's veto in this matter was not successful.

Tyranny.—The act of one ruling in a wilful manner by reason of authority, standing ready to use force or cruelty as the only sanction.

U-Boat.—A submarine; so-called from the German practice of designating their submarines by numbers attached to the letter U, the first letter of the German word, "Untersee," "under-ocean;" viz.: U-5, U-59, etc. (See Submarine.)

Umatilla, The, rewards to Osette Indians for rescuing, recommended, 4803.

Umatilla Indians. (See Indian Tribes.)

Umpqua Indians. (See Indian Tribes.)

Un-American.—Action which is unlike that characteristic of America.

Uncle Sam.—A personification of the United States Government. Several explanations have been given as to the origin of this expression, but the most plausible is the following: During the War of 1812 Elbert Anderson, an army contractor, bought large quantities of provisions for the Army and had them shipped to himself at Troy, N. Y. The shipping mark was "E. A." above and "U. S." below. One of the inspectors at Troy was Samuel Wilson, popularly known as "Uncle Sam" Wilson. A workman was asked the meaning of the initials "U. S.," which at that time were rarely used as an abbreviation for the United States. The prompt reply was "Elbert Anderson and Uncle Sam," referring to Sam Wilson. This interpretation became current among the workmen, many of whom afterwards enlisted and communicated the explanation to their comrades from all parts of the country as the mystic cipher elicited inquiry. The story went the rounds of the press and "Uncle Sam" became the popular appellation of the Government.

Uncle Tom's Cabin.—A novel written in 1851 by Harriet Beecher Stowe. Its successful purpose was to show the evils of slavery, and its wide popularity contributed greatly to the abolition sentiment.

"Uncle Woodrow."—A sympathetic nickname given to President Wilson.

Uncompahgre Forest Reserve, Col., proclaimed, 7246.

Uncompahgre Reservation, bill to change boundaries of, vetoed, 5522.

Unconstitutional.—Contrary to the fundamental law laid down in the Constitution.

Underground Railroad.—A name commonly applied before the Civil War to an arrangement whereby fugitive slaves were assisted to escape to Canada. The idea originated in some one of the northern states, and the plan consisted in harboring fugitives during the day and at night conducting them to the next "station" till they finally reached the border line. This "railroad" had many branches and the stations were a night's journey apart. The principal routes were from Kentucky, across Virginia and Ohio, and from Maryland through Pennsylvania and New York. This system of aiding escaping slaves was partially organized in 1838, but did not attain its highest activity until the passage of the fugitive-slave law, about 1850. A Quaker, Levi Coffin, the reputed president of the organization, is said to have aided in the escape of a large number of slaves annually for many years. A colored woman named Harriet Tubman is said to have made many journeys north, conducting bands of fugitives.

Underwood Tariff Act.—The Tariff Act passed in 1913. (See Tariff.)

Union Flags, return of Confederate and to respective States, recommended, 5163.

Proposition withdrawn, 5164.

Union Labor.—Labor, that is, laboring people, who are members of trade unions (q. v.).

Union Labor Party.—A successor of the Greenback party. It was organized at Cincinnati Feb. 23, 1887, and promulgated a platform embodying the principles of the Knights of Labor. In 1891 it united with the Farmers' Alliance and other elements to form the Populist party.

Union of South Africa.—The provinces of the Union extend from the southernmost point of the African Continent to the watershed of the Limpopo River, i. e., from 34° 50'-22° S. latitude, and include all the British territory within those limits, with the exception of Basutoland and the Swaziland and Bechuanaland Protectorates, while provision is made for the future inclusion within the Union of those territories and of the territories of the British South Africa Company.

Physical Features.—The southernmost province contains many parallel ranges, which rise in steps toward the interior. The southwestern peninsula contains the famous Table Mountain (3,582 feet), while the Great Zwarte Bergen and Lange Bergen run in parallel lines from west to east of the southern province. Between these two ranges and the Roggeveld and Nieuweveld to the north is the Great Karoo Plateau, which is bounded on the east by the Sneeuwbergen, containing the highest summit in the province (Compassberg, 7,800 feet). In the east are ranges which join the Drakensbergen (11,000 feet), between Natal and the Orange Free State.

The Orange Free States presents a succession of undulating grassy plains with good pasture-land. Transvaal is also mainly an elevated plateau. The eastern province of Natal has pastoral lowlands and rich agricultural land and the interior rising in terraces as in the southern provinces.

The Orange, with its tributary the Vaal, is the principal river of the south, rising in the Drakensbergen and flowing into the Atlantic between German Southwest Africa and the Cape of Good Hope. The Limpopo, or Crocodile River, in the north, rises in the Transvaal and flows into the Indian Ocean through Portuguese East Africa. Most of the remaining rivers are furious torrents after rain, with partially dry beds at other seasons.

History.—The Cape of Good Hope was discovered in 1486 by Bartholomew Diaz, the commander of one of the many expeditions sent out by successive Kings of Portugal to discover an ocean route to India. Diaz merely doubled the Cape and returned home. Eleven years later, in 1497, Vasco da Gama not only doubled the Cape and landed in what is now Natal, but successfully accomplished the voyage to India. In 1652 the Netherlands East India Company took possession of the shores of Table Bay, established a fort, and occupied the adjacent lands, in order to be always ready with supplies for their passing ships. In 1814 the Cape was formally ceded to the British Crown.

Natal derives its name from the fact of its discovery on Christmas Day, 1497,

by the celebrated Portuguese navigator, Vasco da Gama. The first European settlement was formed (1824) by a party of Englishmen, who established themselves on the coast, where Durban now stands. Natal was then a part of the great Zulu kingdom. Between 1835 and 1837 another settlement was formed by a body of Dutch Boers, who came with their wagons overland from the Cape Colony and settled in the northern districts, where to this day the Boers preponderate. In the year 1843 Natal was proclaimed British and annexed to the Cape Colony. In 1856 it was erected into a separate colony, with representative institutions, and in 1893 acquired responsible government.

The Transvaal was formed as the South African Republic by parties of Dutch Boers from the English colonies who "trekked" into the interior of the continent and wrested the land across the Vaal River from the native chiefs. The discovery of the gold fields within its borders led to the settlement of large numbers of foreigners, and eventually to hostilities with the British Government. A war of nearly three years' duration was fought with great tenacity, and its close was marked by the inclusion of the South African Republic within the British Empire, "responsible government" being granted almost immediately.

The Orange Free State was founded, in much the same way as the Transvaal, by Boer emigrants from Cape Colony, and its independence was granted in 1854.

Government.—The Union of South Africa is constituted under the South African Act, passed by the Parliament of the United Kingdom on Sept. 20, 1909. In terms of that Act the self-governing Colonies of the Cape of Good Hope, Natal, the Transvaal, and the Orange River Colony became united on May 31, 1910, in a legislative Union under one Government under the name of the Union of South Africa, those Colonies becoming original Provinces of the Union under the names of the Cape of Good Hope, Natal, the Transvaal, and the Orange Free State respectively.

The Union Government is seized of all State property, and the Railways, Ports, Harbors, and Customs are administered by Union Commissioners for the benefit of a Consolidated Revenue Fund. The former debts of the Provinces are administered by and form a first charge upon the funds of the Union. Provision is made in the Act for the admission to the Union of Rhodesia, and for the transfer to the Union Government of the administration of protected and other native territories. The Union was inaugurated by His Royal Highness, the Duke of Connaught, in 1910. The seat of the Government is Pretoria; the capital is Cape Town. The Executive is vested in a Governor-General appointed by the Sovereign, and aided by an Executive Council, with a Legislature of two Houses. Governor-General (Pretoria), His Excellency the Rt. Hon. Viscount Gladstone.

The Senate consists of forty members. For ten years after the establishment of Union eight are nominated by the Governor-General in Council and thirty-two are elected, eight for each Province.

The House of Assembly consists of 121 elected members, fifty-one of whom represent the Cape of Good Hope, seventeen Natal, thirty-six Transvaal and seventeen the Orange Free State. Members of both Houses must be British subjects of European descent.

AREA AND POPULATION

Provinces	Area in English Sq. Miles	Population Census of 1911
Cape of Good Hope.....	276,995	2,564,965
Natal.....	35,290	1,194,043
Transvaal.....	110,426	1,686,212
Orange Free State.....	50,389	525,174
Total.....	473,100	5,973,394

Ethnography.—Of the total 5,973,394 persons (1911), 3,069,392 were males, and 2,904,002 females. The increase for the Union (1904-1911) was 15.41 per cent. For the Provinces it was as follows: Cape, 6.44 per cent; Natal, 7.69 per cent; Transvaal, 32.78 per cent; Orange Free State, 36.37 per cent. The population comprised (1911) 1,276,242 Europeans or whites (591,078 females), 4,019,006 natives (1,996,057 females) and 678,146 other colored races (316,867 females). In 1904 the figures were: Europeans, 1,116,806 (increase, 1904-1911, of 14.28 per cent; natives, 3,491,056 (increase, 1904-1911, of 15.12 per cent); and other colored races 567,962 (increase, 1904-1911, of 19.40 per cent). The total non-European increase (1904-1911) was 15.72 per cent. The proportion of Europeans in the total population in 1904 was 21.58 per cent; in 1911, 21.37 per cent.

Union Station, Washington, D. C. (See illustration opposite 6980.)

Union Veteran Legion.—Organized at Pittsburgh, Pa., March 1884, and the National Organization was perfected Nov. 17, 1886. Encampments are now organized in twenty-one states and the District of Columbia, numbering 152 encampments. The membership is over 20,000. To become a member, the applicant must have been an officer, soldier, sailor or marine of the Union army, navy, or marine corps, during the late Civil War, who volunteered prior to July 1, 1863, for a term of three years, and was honorably discharged for any cause, after a service of at least two continuous years; or was, at any time discharged by reason of wounds received in the line of duty; also those who volunteered for a term of two years prior to July 22, 1861, and served their full term of enlistment, unless discharged for wounds received in the line of duty; but no drafted person, nor substitute, nor any one who has at any time borne arms against the United States, is eligible. A statement by the Adjutant-General of the Legion says: "It is believed that those who entered the service prior to July, 1863, had but one object in view, and that was the preservation of the Union. There were no bounties prior to that date, nor were there any fears of a draft; consequently, those who shouldered a musket or wielded a sabre felt that it was a sacred duty to offer their lives in defence of their country's honor."

United Confederate Veterans.—An association the objects and purposes of which are set forth in the constitution as finally adopted at the Houston reunion, May 23, 1895. It is a federation of all associations of Confederate veterans, soldiers and sailors. The purposes are the cultivation of ties of friendship between those who have shared common dangers, sufferings, and privations; the encouragement of the writing, by the participants therein, of narratives, episodes, occurrences, etc., of the Civil War; the collection of authentic data for an impartial history, and the pres-

ervation of war relics and mementoes, and the record, as far as possible, of every Confederate soldier who is dead; caring for the needy survivors and assisting and protecting Confederate widows and orphans; the erection of enduring monuments and marking with headstones the graves of Confederate dead, and instilling into descendants proper veneration for their fathers. Membership is by camps, and the latter are organized into departments, divisions, and brigades. There are three departments—Army of Northern Virginia, Army of the Tennessee, and Army of the Trans-Mississippi. The number of members is about 55,000.

United Daughters of the Confederacy.

—The United Daughters of the Confederacy was organized at Nashville, Tenn., Sept. 10, 1894. It is composed of the widows, wives, mothers, sisters, and lineal female descendants of men who served honorably in the army and navy of the Confederate States, or who served in the civil service of the Confederate States or one of the southern states, or who gave personal services to the Confederate cause. There are local federations, governed by state divisions, which in turn are subordinate to the general organization. The objects of the United Daughters of the Confederacy, as stated in the constitution of the society, are "social, literary, historical, monumental, benevolent, and honorable in every degree, without any political signification whatever." It will endeavor: (1) To unite in the federation all bodies of southern women now organized or that may hereafter be formed. (2) To cultivate ties of friendship among our women whose fathers, brothers, sons, and, in numberless cases, mothers, shared common dangers, sufferings, and privations; and to perpetuate honor, integrity, valor, and other noble attributes of true southern character. (3) To instruct and instill into the descendants of the people of the south a proper respect for the pride in the glorious war history, with a veneration and love for the deeds of their forefathers which have created such a monument of military renown, and to perpetuate a truthful record of the noble and chivalric achievements of their ancestors. All with the view of furnishing authentic information from which a conscientious historian will be enabled to write a correct and impartial history of the Confederate side during the struggle for southern independence. The organization now has 1,380 chapters in the United States, north and south, with 80,000 members.

United Hatters. (See Loewe vs. Lawlor, et al.)

United Labor Party.—A local political party organized in New York City in 1886. It nominated Henry George for mayor on a platform based upon his theory that values arising from the growth of society belong to the community as a whole, and that therefore land values should bear the burden of taxation (see Single Tax).

United Sons of Confederate Veterans. (See Confederate Veterans, United Sons of.)

United States.—The United States is a federal republic consisting of forty-eight states and one federal district, besides the outlying territories of Alaska, Hawaii, the Philippine Islands, Porto Rico, Guam, Tutuila Group (Samoa), Wake and other islands and the Panama Canal Zone. Continental United States occupies the south-

ern portion of the North American Continent, between the Atlantic and Pacific Oceans, in latitude 25°-49° North and longitude 67°-124° 30' West, its northern boundary being Canada and the southern boundary Mexico.

Physical Features.—The coast-line on both oceans has an estimated length of about 15,610 miles, besides 3,620 miles on the great lakes and 5,744 on the Gulf of Mexico. The principal river is the Mississippi-Missouri, traversing the whole country from north to south, and having a course of 4,500 miles to its mouth in the Gulf of Mexico, with many large affluents, the chief of which are the Yellowstone, Nebraska, Arkansas, Ohio, and Red Rivers. The rivers flowing into the Atlantic and Pacific Oceans are comparatively small; among the former may be noticed the Hudson, Delaware, Susquehanna, Potomac, and Savannah; of the latter, the Columbia, Sacramento, and Colorado. The Mobile and Colorado of Texas fall into the Gulf of Mexico, also the Rio Grande, which partly forms the boundary with Mexico. The chain of the Rocky Mountains separates the western portion of the territory from the remainder, all communication being carried on over certain elevated passes, several of which are now traversed by railroads; west of these, bordering the Pacific coast, the Cascade Mountains and Sierra Nevada form the outer edge of a high table-land, consisting in great part of stony and sandy desert, and in which occurs the Great Salt Lake, extending to the Rocky Mountains. Eastward the country is a vast, gently undulating plain, with a general slope southward towards the marshy flats of the Gulf of Mexico, extending to the Atlantic, interrupted only by the Alleghany Mountains, in the eastern states. Nearly the whole of this plain, from the Rocky Mountains to some distance beyond the Mississippi, consists of immense treeless prairies. In the eastern states large forests of valuable timber, as beech, birch, maple, oak, pine, spruce, elm, ash, walnut; and in the south, live-oak, water-oak, magnolia, palmetto, tulip-tree, cypress, etc., still exist, the remnants of the wooded region which formerly extended over all the Atlantic slope, but into which great inroads have been made by the advance of civilization. The Mississippi valley is eminently fertile. The mineral kingdom produces in great abundance iron, copper, lead, zinc, and aluminum; the non-metallic minerals including immense quantities of coal, anthracite, petroleum, stone, cement, phosphite rock, and salt. Precious metals include gold and silver, raised mainly in Colorado, California, and Alaska (gold), and Colorado, Montana, Utah and Idaho (silver); while precious stones are worked in great variety, including the turquoise, sapphire, tourmaline, and garnet.

History.—United States history may be said to commence with the colonizing expeditions from Europe in the sixteenth and seventeenth centuries; for, although Columbus discovered America in the fifteenth century (Oct. 12, 1492), no definite European settlement was attempted until the last quarter of the sixteenth century, when England, Holland, Sweden, France, and Spain made determined efforts to bring in to account the potential wealth of the newly discovered continent. Of these nationalities the English secured a paramount influence amongst the nations of Europe. In the seventeenth century a chartered company founded Jamestown (1607), and many Royalist settlements were established in the district which had been named Virginia, after Queen Elizabeth, in the previ-

ous century. But step by step with the Church and Royalist foundations in the south a similar series of Puritan and Separatist centres was established in the north. The small band of "Pilgrim Fathers" in their 180-ton *Mayflower*, from Southampton, England, to Plymouth, Massachusetts (1620), was soon followed by a stream of well-to-do merchants from Boston, Lincolnshire, and other east coast English towns, and New England became rapidly prosperous. Between these two settlements the Dutch had established themselves in New Netherlands (1621), and the Swedes in New Sweden (1638). Other English foundations were Maryland (1632), Carolina (1663), New York (1664), New Jersey (1665), and Pennsylvania (1681). Georgia (1732) was the last of the English settlements.

The Spaniards began colonizing with the second voyage of Columbus, but their settlements were mostly in Cuba, Haiti, Mexico and the Islands of the Caribbean Sea and in South America. The few colonies planted on the main land were never of hardy growth. The discoveries of Cabot and Cartier opened the mouth of the St. Lawrence to French enterprise, and Champlain founded Quebec in 1608. Traversing the Great Lakes Jesuit missionaries and explorers descended the Mississippi River and established posts at St. Paul, Dubuque, Kaskaskia, and St. Louis, finally reaching New Orleans, thereby confirming the claim of France to the whole interior of the country.

A continuous struggle was waged between the English and French settlements in America, but until the War of 1754-1763 little part was taken by Great Britain in the actual campaigns. The issue of this war decided the fate of America. The British Government levied an excise tax on many articles in everyday use in the colonies. The colonists resisted in arms, and bloodshed ensued at the first engagement at Lexington, April 19, 1775, and continued until the Capitulation of Yorktown, Oct. 19, 1781, when Lord Cornwallis surrendered with the whole of his forces to General Washington. When peace was concluded, Sept. 3, 1783, between America and Great Britain, no vestige of territory over which the dispute had raged remained under British rule. On July 4, 1776, the delegates of the various American colonies adopted the Declaration of Independence. (See Revolutionary War and the various battles.)

The Declaration of Independence (q. v.) was followed by the framing of a Constitution, which was ratified in 1787 to 1790 by the thirteen Original States (Delaware, Pennsylvania, New Jersey, Georgia, Connecticut, Massachusetts, Maryland, South Carolina, New Hampshire, Virginia, New York, North Carolina, and Rhode Island). (See Admission of States.) This Constitution established a legislature of two houses, and vested the executive power in an elective President; and on April 30, 1789, George Washington entered office as the first of a line of Presidents of the United States of America.

The maritime war of Britain and France led to the outbreak of hostilities between the former and the United States, owing mainly to the rival interpretation of the law of allegiance in connection with impressment of British subjects from American ships to serve in the British Navy. On June 18, 1812, the United States declared war against Britain, in which the latter was generally successful on land and the United States almost inevitably victorious on the sea. Peace was concluded by the Treaty of Ghent, on December 24, 1814, after a purposeless war.

The war with Mexico and the civil war between the states are described under separate headings.

Government.—1. the Constitution (q. v.) of Sept. 17, 1787 (to which seventeen amendments (See Amendments) have been added), the government of the United States is entrusted to three separate authorities—the Executive, the Legislative, and the Judicial.

The Executive power is vested in the President, advised and assisted by the heads of ten executive departments. The description and history of these departments will be found under the headings, State, Treasury, War, Attorney General, Postmaster-General, Navy, Interior, Agriculture, Commerce, and Labor. (See also President.)

The Legislative power is vested in two Houses, the Senate and the House of Representatives, the President having a veto power, which may be overcome by a two-thirds vote of each House. Two Senators from each state are elected by the people thereof for the term of six years; and Representatives are chosen in each state, by popular vote for two years. The number of Representatives for each state is allotted in proportion to its population—at present one for 212,407. (See articles on Apportionment, Congress, Senate and House.)

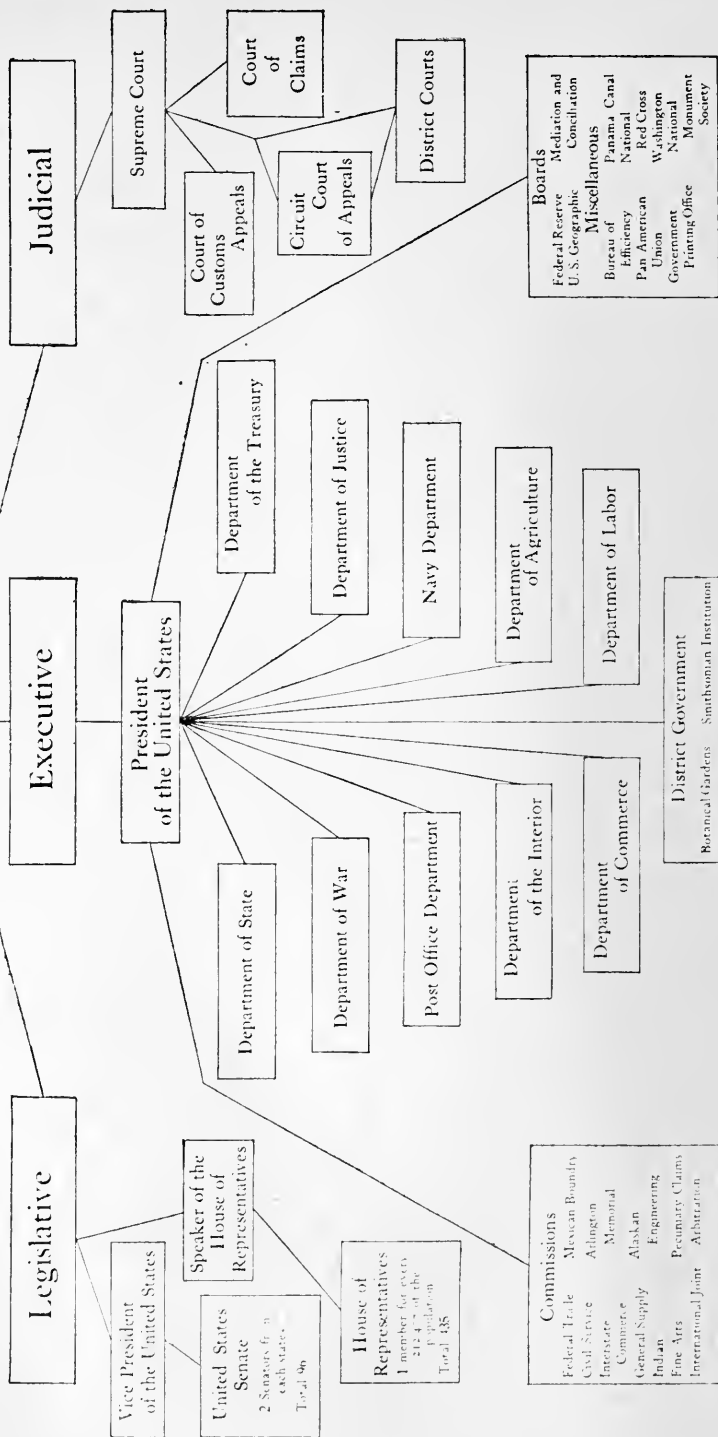

The **Judiciary** consists of three sets of federal courts: (1) The Supreme Court at Washington, D. C., consisting of a Chief Justice and eight puisne judges, with original jurisdiction in cases affecting ambassadors, etc., or where a state is a party to the suit, and with appellate jurisdiction from inferior federal courts, (2) The Circuit Court of Appeals, dealing with appeals from district courts, and consisting of the Justice of the Supreme Court for the circuit and all the Circuit and District Judges within the circuit, (3) The District Courts, eighty-five in number, served by a District Court Judge. Besides these, the Court of Customs Appeals (q. v.) was created in 1909. (See Judiciary Courts, and Supreme Court.)

Education.—The system of public instruction extends from the kindergarten to the university. Control is vested in the state and local authorities, the only central organization being the Bureau of Education charged with statistical and advisory functions only. The number of illiterates is swollen by immigrants, and by the fact that some 44 per cent of the colored population receive no instruction. It is said that no home is beyond reach of a school, whilst in some cases pupils are conveyed to and fro at public expense. A salient feature of the American system is co-education of the sexes throughout, there being comparatively few institutions where the tuition is not dual. Powerful aid is afforded by private and philanthropic initiative. Special Schools and Professional Establishments are numerous. Leading Universities are California, the Catholic University of America, Chicago, Clark, Columbia, Cornell, Harvard, the Johns Hopkins, Michigan, Pennsylvania, Princeton, Stanford, Virginia, Wisconsin, and Yale. (See Universities.)

Articles on the co-ordinate branches of the United States government will be found alphabetically arranged in the Encyclopedic Index under the following headings:

Executive—	President
Executive	Vice-President
Executive Depts.	Capitol
Executive Man-	Cabinet

^a Figures of 1915 are somewhat preliminary and subject to revision. ^b Exclusive of Alaska and islands belonging to the United States. ^c Census figures, relating to Continental United States; the figures for 1915 represent an estimate. ^d Census figures. ^e True valuation of real and personal property. ^f 1912. ^g 1800 to 1850, outstanding principal of the public debt, January 1. ^h Figures for the years 1800 to 1850 include the total public debt. ⁱ 1914. ^j Gold and silver cannot be stated separately prior to 1876. From 1862 to 1875, inclusive, gold and silver were not in circulation, except on the Pacific Coast, where it is estimated that the average specie circulation was about \$25,000,000, and this estimate is continued for the three following years under the head of gold. After that period gold was available for circulation. ^k As the result of a special investigation by the Director of the Mint, a reduction of \$135,000,000 was made in the estimate of gold coin in circulation on July 1, 1907, as compared with the basis of previous years, and on September 1, 1910, a reduction of \$9,700,000 was made in the estimate of silver coin. ^l Includes notes of Bank of United States; State bank notes; demand notes of 1862 and 1863; fractional currency, 1870; Treasury notes of 1890-1891 to date, and currency certificates, act of June 8, 1892-1900. ^m Includes all deposits, demand and time. ⁿ Includes value of buildings, \$3,556,639,496. The Twelfth Census was the first to collect statistics of buildings on farms. ^o Includes value of buildings, \$6,325,451,528. ^p Gross value of all farm products. The figures of the various censuses are not comparable, reason for which will be found in census reports. ^q Exclusive of neighborhood industries and hand trades, included in years previous to 1905. ^r "Ordinary receipts" include receipts from customs, internal revenue, direct tax, public lands, and "miscellaneous," but do not include receipts from loans, premiums, Treasury notes, or revenues of Post-Office Department. ^s Includes corporation and income taxes, \$79,828,675 in 1915. ^t "Ordinary disbursements" include disbursements for war, navy, Indians, pensions, payments for interest, and "miscellaneous," but do not include payments for premiums, principal of public debt, or disbursements for postal service paid from revenue thereof. ^u Imports for consumption after 1850. ^v Based on general imports. ^w Domestic exports only after 1860. ^x 1913. ^y Includes canal boats and barges prior to 1880. ^z First six months. (1) Figures relate to the Western Union only and after 1900 do not include messages sent over leased wires or under railroad contracts. (2) Estimated 1912. (3) 1800 to 1850, inclusive, from census of 1880; from 1880 to 1900, inclusive, from Rowell's Newspaper Directory; after 1900 from Ayer's American Newspaper Annual. Figures for 1914 include outlying possessions. (4) Includes salaries for teachers only. Figures are for 1912. (5) 1850, total alien passengers arrived; 1850, 15 months ending December 31; after 1850, fiscal years ending June 30.

United States Notes: (See also Currency.)

Act to fix amount of, and circulation of national banks vetoed, 4222.

Discussed and recommendations regarding, 6073, 6078, 6175.

United States Shipping Board.—This

board was created by act of Congress approved September 7, 1916, which provides for a Shipping Board of five commissioners, to be appointed by the President, by and with the consent of the Senate, with a yearly salary of \$7,500 each. The commissioners are appointed for terms of six years, and not more than three shall be of the same political party; and none of them shall have any relations with or hold stocks or bonds in any common carrier, nor engage in any other business. The Board was organized to construct merchant vessels suitable for auxiliary use in any way for naval or military purposes, but in times of peace to be operated as American merchant vessels. The Board is authorized, if it sees fit, to form a corporation or corporations better to carry out the purposes of the act, but in such corporations the Board is always to remain the majority stockholder. The Board is also to investigate the condition of the American merchant marine, and to report to Congress and to the President methods for its improvement. One of the moves made by the Board after the declaration of a state of war with Germany was to make plans for the construction of a thousand wooden ships, under the direction of General George W. Goethals, the builder of the Panama Canal.

United States vs. Peters.—A case of mandamus decided in February, 1809, by the Supreme Court of the United States, the execution of which was opposed by

the State authorities of Pennsylvania, backed by the militia. In the case of *Olmstead et al. vs. Rittenhouse's Executrixes* (q. v.) Judge Peters, of the United States district court of Pennsylvania, decided in favor of the plaintiffs, but refrained, he stated, for prudential reasons, from carrying his judgment into execution. April 2, 1803, a Pennsylvania statute was enacted forbidding the execution of the decree of the Federal court. A mandamus was then asked for against Peters. The Supreme Court granted it. Chief Justice Marshall declaring that the legislature of a State can not annul the judgment or determine the jurisdiction of a United States court. The execution of the original judgment required the payment of £11,496 9s. 9d., Pennsylvania currency, which had been placed in the custody of the State court. The Pennsylvania officials, with the militia, resisted payment for twenty-six days, when the marshal assembled a *posse comitatus* of 2,000 men, and the money was paid over without actual collision.

United States vs. Todd.—A case not printed, there having been no reporter at the time. It was possibly the first case in which the United States Supreme Court declared a Federal statute unconstitutional. Under an act of Congress passed in 1792 the name of Yale Todd was by the circuit court of Connecticut ordered to be placed upon the pension list. It was afterwards (Feb. 17, 1794) decided by the Supreme Court of the United States that the circuit court could not constitutionally make such a decree, nor could it act in the capacity of a commission not of judicial function.

Treaty with, 2913.

Uruguay.—Uruguay is the smallest of the South American Republics and lies between 30°-35° S. latitude and 53° 25'57" 42' W. longitude, with an eastern (Atlantic) seaboard of 120 miles, a southern shore line of 235 miles on the estuary of Rio de la Plata, and 270 miles of the Uruguay River on the west. In the north the territory is continuous with Brazil for 450 miles.

Physical Features.—The country consists mainly (and particularly in the south and west) of undulating grassy plains. In no case do the peaks exceed 2,000 feet.

The principal river of Uruguay is the Rio Negro, flowing from northeast to southwest into the Rio de la Plata. The boundary river Uruguay is navigable from its estuary to Salto, about 200 miles north, and the Negro is also navigable for a considerable distance. On the southeast coast are several lagoons, and the northeast boundary crosses Lake Mirim.

The climate is extraordinarily healthy,

with great uniformity of temperature, the summer heat being tempered by the breezes of the Atlantic and the geographical position causing a high thermometer in winter.

History.—Uruguay resisted all attempted invasions of the Portuguese and Spaniards until the beginning of the seventeenth century, and 100 years later the Portuguese settlements were captured by the Spaniards. From 1726-1814 the country formed part of the Spanish South America and underwent many vicissitudes during the Wars of Independence. In 1814 the armies of the Argentine Confederation captured the capital and annexed the province, and it was afterward annexed by Portugal and became a province of Brazil. Aug. 25, 1825, through the heroism of the thirty-three liberators (whose memory is perpetuated in the name of one of the provinces), the country threw off the Brazilian yoke. This action led to war between Argentina and Brazil, which was settled by the mediation of the United Kingdom, Uruguay being declared an independent state in 1828.

Government.—In 1830 a Republic was inaugurated, with a Constitution of Sept. 10, 1829. The President is elected by the legislature for a term of four years and is ineligible for a consecutive period of office. President (March 1, 1915-1919), Dr. Feliciano Viera.

There is a Congress of two houses. The Senate consists of nineteen members (one for each department), elected by indirect vote for six years and renewable as to one-third every two years. The Chamber of Deputies contains seventy-five members, elected for three years by direct vote. Congress meets in annual session from February to June.

Each of the nineteen Departments has a Prefect appointed by the President, and an elective municipal council. Justice is administered in subdistrict and district courts, and in departmental courts at each provincial capital. There is a high court at Montevideo composed of three judges elected by Congress.

Education.—Primary education is free and nominally compulsory, and is, perhaps, better extended than in any other South American Republic, and there is a University at the capital.

Production and Industry.—The total area is estimated at 46,178,000 English statute acres, of which nearly 38,000,000 acres are pasture land, while 1,211,370 acres are under corn crops (wheat 683,664, maize 505,072). In 1908-1909 there were also 45,302 acres under flax producing 260,934 tons, but the flax area is diminishing. The vineyards (11,000 acres) produced close on 2,000,000 gallons of wine in 1906. Olives and tobacco are also cultivated.

The live stock (the rearing of which is by far the most important industry) included (1908) 8,192,602 cattle, 26,286,296 sheep, 19,951 goats, 180,999 pigs, 556,307 horses, and 17,671 mules. The extensive pasture lands are particularly suitable for cattle breeding and sheep farming, and there are many establishments for the preparation of jerked beef (tasajo) for Brazil and Cuba, and of meat extract for Europe, while the department of Paysandú sends a special brand of ox-tongues all over the world. The frozen meat industry is now developing rapidly.

The mining industry is in its infancy and awaits capital. Gold and silver, lead, copper, magnesium and lignite are indicated, and gold is produced in small quantities.

Manufactures.—The industries connected with the live stock raising constitute the chief manufactures, with the exception of flour from home-grown grain. Outside these,

Uruguay still depends very largely on imported goods.

Finance.—The national debt was stated at 133,295,145 pesos on Jan. 1, 1913. The revenue for the preceding year was 17,211,850 pesos. The peso, the unit of value, is equivalent to \$1.03, United States money.

AREA AND POPULATION

Treinta y Tres.....	3,686	30,465
Total.....	72,210	1,094,688

Ethnography.—In 1908 there were 890,000 Uruguayans and 200,000 foreigners (Italian 75,000, Spanish 60,000, Brazilian 30,000, Argentine 15,000, French 13,000, British 2,000, Swiss 2,000, German 1,500, others 5,000). About 4 per cent of the population is colored (negro or Indian), 10 to 12 per cent of mixed blood, and the rest white or European (mainly Italian or Spanish) descent.

Railways.—In 1911 there were 1,570 miles of railway open for traffic, all being in British hands. Three lines radiate from Montevideo, the eastern line running to Artigas, the central line to Rivera (on the Brazilian frontier), and the western line to Mercedes, a river port on the Rio Negro. The central line also runs westward to Paysandú, and thence via Salto to the Brazilian and Argentine frontiers. A southern line runs from the capital to Minas and Maldonado. The capital has electric trams. In 1910 there were 1,018 post-offices and 319 telegraph offices (and two wireless stations), with 6,059 miles of line, there were also 4,803 telephone stations, with 19,039 miles of lines.

Cities.—Capital Montevideo, on the northern shore of the Rio de la Plata estuary. Population (1912), 325,000. Other towns are Paysandú, Salto, Mercedes, Florida and San José.

Trade with the United States.—The value of merchandise imported into Uruguay from the United States for the year 1913 was \$7,522,145, and goods to the value of \$2,450,697 were sent thither—a balance of \$5,071,448 in favor of the United States.

Uruguay:

American citizens aggrieved by acts of, referred to, 2014.

Treaty with, 2703, 2718, 2813, 4072

Delay in exchange of ratifications of, referred to, 2915.

Uruguay, Treaties with.—An extradition treaty was concluded with Uruguay March 11, 1905, and a naturalization convention was signed at Montevideo August 10, 1908.

Uruguay also became a party to the convention between the United States and the several republics of South and Central

America for the arbitration of pecuniary claims and the protection of inventions, etc., which was signed in Buenos Aires in 1910 and proclaimed in Washington, July 29, 1914. (See *South and Central America, Treaties with*.)

Usury.—A charge for the use of money in excess of the legal rate of interest. Usury is universally discredited and in many states it is a penal offense. (See *Statutes of Limitations and Interest Laws*.)

Utah.—One of the western group of states sometimes referred to as "Deseret," a word taken from the Book of Mormon and signifying "Honey Bee." Nickname, "Mormon State." The State extends from lat. 37° to 42° north, and from long. 109° to 114° west. It is bounded on the north by Idaho and Wyoming, on the east by Colorado and Wyoming, on the south by Arizona, and on the west by Nevada. The area is 84,990 square miles. The surface is largely mountainous and includes part of the Great Basin and all of the Great Salt Lake. The region formed a part of the territory ceded by Mexico in 1848. Agriculture, mining and manufacture, are the leading industries. Probably no other state in the Union has such a variety of resources. Irrigation has been practiced from the beginning and was once thought absolutely necessary, but in later years arid farming has achieved wonderful success. The main products of the soil are wheat, oats, barley, potatoes, sugar beets, corn, alfalfa and timothy. The yearly wool clip amounts to many millions of pounds and is continually increasing. Utah fruits are superior in sweetness, firmness, beauty and fine flavor. The most successful manufacturing industry, aside from the smelting, milling and refining of ores, is the making of beet sugar. Salt production is also extensive, as is fruit and vegetable canning. The mountains of Utah contain inexhaustible deposits of minerals of great variety; some of them unique and peculiar to the region. Silver, lead, coal and iron have been mined for many years, and gold has also been found; but copper is the great mining staple in Utah at the present time.

The first white settlements were made by the Mormons in 1847-1848. The Territory of Utah was organized in 1850. Prejudice against these people and the polygamous practices of some of them, kept Utah out of the Union for many years, though she possessed every qualification for statehood and made repeated efforts to secure it. After the issuance by the Mormon Church of its manifesto discontinuing the practice of polygamy a State Constitution was framed prohibiting plural marriages, and this instrument being approved at Washington, the State was admitted Jan. 4, 1896. The Mormons still have a majority in Utah, though in the leading cities the Gentile or non-Mormon element predominates.

With the help of irrigation, agriculture is the chief occupation of the people of Utah. In 1906 there were 300 incorporated irrigation companies in the state. The Federal Government project of irrigation includes about 80,000 acres of Utah lands. Land offices are located at Salt Lake City and Vernal. Statistics of agriculture reported to the Federal census Bureau under date of April 15, 1910, placed the number of farms in the State at 20,676, comprising 3,397,699 acres, valued, with stock and improvements, at \$150,795,201. The average value of land per acre was \$29.28 against \$9.75 in 1900. The value of domestic animals, poultry, etc., was \$28,-

781,691, including 412,334 cattle, valued at \$8,948,702; 115,676 horses, \$9,990,835; 2,277 mules, \$157,497; 64,286 swine, \$445,653; 1,827,180 sheep, \$8,634,735; poultry, \$327,908. The yield and value of field crops was: Corn, 8,000 acres, 280,000 bushels, \$227,000; wheat, 225,000 acres, 5,025,000 bushels, \$3,518,000; oats, 87,000 acres, 3,889,000 bushels, \$1,828,000; rye, 5,000 acres, 78,000 bushels, \$55,000; potatoes, 15,000 acres, 2,100,000 bushels, \$1,785,000; hay, 380,000 acres, 950,000 tons, \$8,550,000. The State is one of the largest producers of copper. The coal production was 2,517,809 short tons. The gold mined in 1911 was 227,834 fine ounces, worth \$4,709,747, and silver, 12,679,033 fine ounces, \$6,973,798. This places Utah first among the states in the production of silver. The report of the State treasurer for the biennial period 1908-10 shows receipts of \$6,157,126; expenditures, \$5,153,220; balance Nov. 30, 1910, \$902,739.

The number of manufacturing establishments in Utah having an annual output valued at \$500 or more at the beginning of 1915 was 1,110. The amount of capital invested was \$71,653,000, giving employment to 17,129 persons, using material valued at \$62,234,000, and turning out finished goods worth \$87,114,000. Salaries and wages paid amounted to \$13,696,000.

Utrecht, Peace of.—A series of nine treaties, concluded in 1713-14 between the States that had taken part in the War of the Spanish Succession. The treaties were signed at Utrecht, Rastatt, and Baden, and provided for a general rearrangement of domain. Much of the territory parceled out and confirmed by these treaties has been retained by the respective States to the present day.

Vacancies in Public Offices, power of President to make provisional appointments to fill, discussed, 3190.

Vallandigham Case.—May 5, 1863, Clement L. Vallandigham, a lawyer and politician of Ohio, was arrested in accordance with orders issued by Gen. Burnside, of the United States Army, commanding the Department of Ohio. On the day following he was taken before a military commission, and subsequently tried, convicted and imprisoned for uttering opinions disloyal to the Union. May 19 the President commuted this sentence to banishment. Vallandigham applied to the Supreme Court for a writ of certiorari to review the proceedings of the commission, by which he claimed to have been unlawfully convicted. The Supreme Court, Justice Wayne delivering the opinion, decided that it had no power to review proceedings ordered by a general officer of the United States Army. Justices Nelson, Grier and Field concurred; Chief Justice Taney and Justice Miller were not present.

Valparaiso, Chile; population (1895) 220,756; sailors of the *Baltimore* assaulted at. (See *Baltimore*, The.)

Thirteenth Administration.—Democratic.

Vice-President—R. M. Johnson.

Secretary of State—

John Forsyth (continued).

Secretary of the Treasury—

Levi Woodbury (continued).

Secretary of War—

Joel R. Poinsett.

Secretary of the Navy—

Mahlon Dickerson (continued).

James K. Paulding.

Postmaster-General—

Amos Kendall (continued).

John M. Niles.

Attorney-General—

Benjamin F. Butler (continued).

Felix Grundy.

Henry D. Gilpin.

Martin Van Buren was elected by the Democratic party in 1836. At the Democratic National Convention, held at Baltimore, May 20, he was nominated on the first ballot.

Opposition.—A rival faction of the party nominated Hugh L. White, of Tennessee. Several rival candidates were named by States as National Republican or Whig candidates. Among these were William Henry Harrison, Daniel Webster and Willie P. Mangum. Twenty-six states participated in the election, Arkansas and Michigan having been recently admitted.

Vote.—At the election held Nov. 8, the popular vote was Van Buren, 762,678; Harrison, 548,007; White, 145,396; and Webster, 42,247. The electoral vote, counted Feb. 8, 1837, gave Van Buren, 170; Harrison, 73; White, 26; Webster, 14; and Mangum, 11—all of South Carolina.

Party Affiliation.—In his youth, Van Buren was a zealous adherent of Jefferson; he was elected to the State senate of New York as a Clinton Republican; but in 1813 resumed friendly connections with Madison's administration. He disentangled the political complications that prevailed during the "era of good feeling" (1819-1821) in New York and brought about the election to the Senate of Rufus King, an old-school Federalist. Later, he became a generous supporter of Jackson, but in all of his political affiliations his conduct was marked by conservatism and moderation.

Political Complexion of Congress.—In the Twenty-fifth Congress (1837-1839) the Senate, of 52 members, was made up of 31 Democrats, 18 Whigs, and 3 Independents; and the House, of 242 members, was made up of 117 Democrats, 115 Whigs, and 10 Independents. In the Twenty-sixth Congress (1839-1841) the Senate, of 52 members, was composed of 22 Democrats, 28 Whigs, and 2 Independents; and the House, of 242 members, was made up of 103 Democrats, 132 Whigs, 6 Independents, and 1 vacancy.

Finance.—A commercial panic began in March, 1837, by the failure of Briggs & Co., of New Orleans. The panic reached its height in May, when all the banks in New York, Boston, Philadelphia and Baltimore suspended specie payments. This so much embarrassed the Government that President Van Buren convened Congress in special session in September, 1837, to consider the situation. In his Special Message (page 1541) he analyzes in detail the financial crisis and the causes which led to it. He then unfolds his plan for the institution of an independent treasury for the keeping and disbursing of Government funds. It was the return to the system in use in Washington's time and was departed from, despite the earnest warnings of Jefferson, when the United States Bank was chartered for the deposit of Government money. Congress was unwilling to sanction the plan, but the President, with unusual insistence, succeeded, near the close of his term of office, in securing the assent and cooperation to his sub-treasury plan. The Whig Congress of 1842 repealed the measure and deposited the funds in selected private banks until 1846, when the sub-treasury system was again adopted and has persisted to the present day. In his Fourth Annual Message (page 1827) the President gives a survey of the fiscal affairs of the country and says that "It will serve to illustrate more fully the principles by which I have been guided in reference to two contested points in our public policy which were earnest in their development and have been more important in their consequences than any that have arisen under our complicated and difficult, yet admirable, system of government. I allude to a national debt and a national bank. . . . Coming into office a declared enemy of both, I have earnestly endeavored to prevent a resort to either."

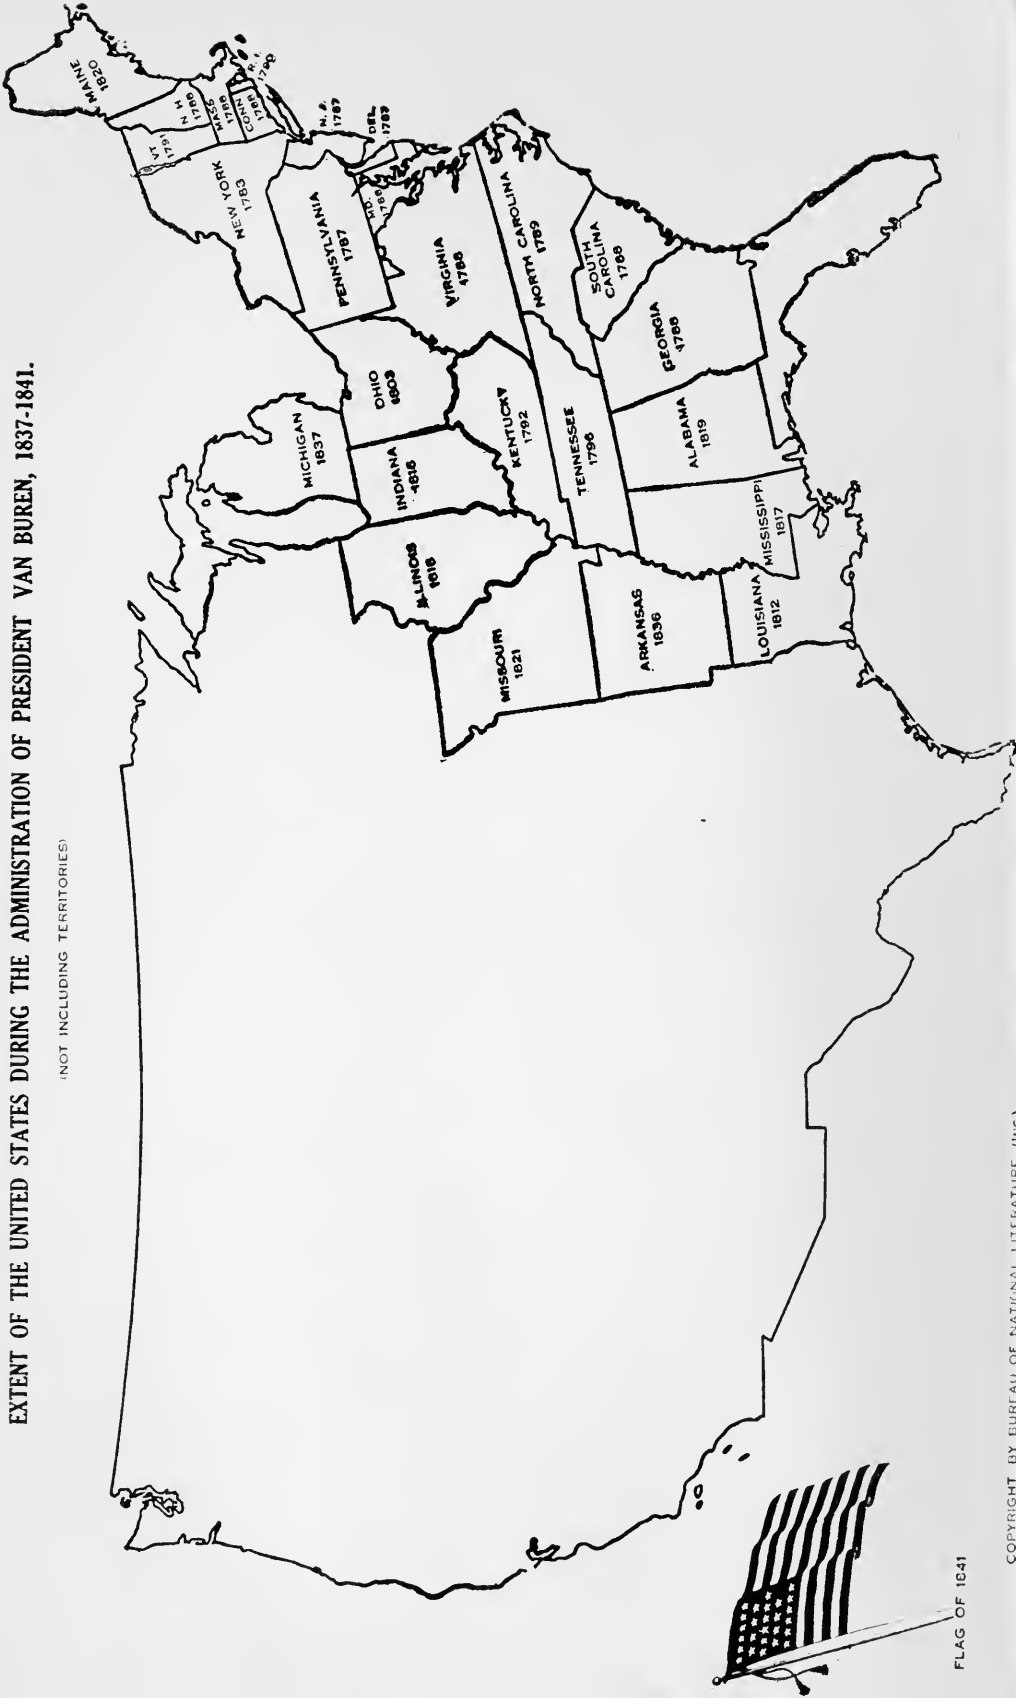

Public Debt.—The public debt of the United States during the administration of President Van Buren stood as follows: Jan. 1, 1838, \$10,434,221.14; 1839, \$3,573,343.42; 1840, \$5,250,875.54; 1841, \$13,594,480.75.

Commerce.—The commercial status of the United States in the year 1840 is shown by the following statistical summary: Area, 2,059,043 square miles; population, 17,069,453; population per square mile, 8.29; wealth, \$7,135,780,000; money in circulation, \$186,305,488; imports, \$98,258,706; exports, \$123,668,932; miles of railway, 2,818; vessels built, 121,203 tons; vessels in deep-sea trade, 899,765 tons; vessels in coastwise trade, 1,280,999 tons; vessels on the Great Lakes, 54,199 tons; post-offices, 13,468; immigrants arrived, 84,066.

Foreign Policy.—It is regarded as one of the most creditable features of the Van Buren administration that it was able, despite the popular wish in some quarters, to remain neutral during the rebellion in Canada. The burning of the *Caroline* in this connection caused the President to issue his proclamations of neutrality (pages 1698, 1699). In this case, as in all others,

EXTENT OF THE UNITED STATES DURING THE ADMINISTRATION OF PRESIDENT VAN BUREN, 1837-1841.

(NOT INCLUDING TERRITORIES)

FLAG OF 1841

the President consistently followed the course laid down in his Inaugural Address (page 1537) where he said: "We have no disposition, and we disclaim all right, to meddle in disputes, whether internal or foreign, that may molest other countries, regarding them in their actual state as social communities, and preserving a strict neutrality in all their controversies."

The Democrats renominated Van Buren but he was defeated by Wm. H. Harrison.

Venezuela.—Venezuela lies on the north of the South American continent and is bounded on the north by the Caribbean Sea, west by the Republic of Colombia, east by British Guiana, and south by Brazil. The western boundary is in dispute, the area estimated by Venezuelan geographers (599,538 square miles) lying between 1° 40' S., 12° 26' N. latitude and 59° 40' 73' 31' W. longitude. Included in this area are over seventy islands off the coast, with a total area of about 14,670 square miles, the largest being Margarita, which is politically associated with Tortuga, Cubagua and Coche to form the newly constituted State of Nueva Esparta. Margarita has an area of about 400 square miles.

Physical Features.—The Eastern Andes from the southwest cross the border and reach to the Caribbean Coast, where they are prolonged by the Maritime Andes of Venezuela to the Gulf of Paria on the northeast. The main range is known as the Sierra Nevada de Merida, and contains the highest peaks in the country in Picacho de la Sierra (15,420 feet) and Salado (13,878 feet), the maritime ranges containing the Silla de Carácas (8,531 feet). Near the Brazilian border the Sierras Parima and Pacaraima and on the eastern border the Sierras de Rincoite and de Usupamo enclose the republic with parallel northward spurs, between which are valleys of the Orinoco tributaries. The slopes of the mountains and foothills are covered with dense forests, but the basin of the Orinoco is mainly llanos, or level stretches of open prairie, with occasional woods.

The principal river of Venezuela is the Orinoco, exceeding 1,500 miles in length. The Orinoco is navigable for large steamers for some 700 miles, and by smaller vessels as far as the Mampures Cataract, some 200 miles further up stream. The coastal regions of Venezuela are much indented and contain many lagoons and lakes, of which Maracaibo, with an area exceeding 7,000 square miles, is the largest lake in South America.

The climate is tropical and except where modified by altitude or tempered by sea breezes is unhealthy. Yellow fever is endemic at Carácas, and plague cases have occurred there since 1908.

History.—Venezuela was visited by Columbus in 1498, and in 1499 by Alonso de Ojeda and Amerigo Vespucci, the former naming the Gulf of Maracaibo Venezuela, or "Little Venice" (on account of the Indian pile-built settlements on the coast and shores of the lake), and the name was afterwards extended to the whole of the Orinoco basin. In 1550 the territory was formed into the captaincy-general of Carácas, and the country remainder under Spanish rule until the revolt under Simon Bolivar, a native of Carácas, who defeated the Spanish forces in the battles of Las-

toguanes (1813) and Carabobo (1821), and thus secured the independence of the country. Bolívar was an untrifling hero in the cause of independence, and through his efforts (and those of his adjutant Sucre) Venezuela, Ecuador and Colombia (Upper Peru) achieved their freedom from Spain, while Peru was enabled to establish its independence in consequence of his victories. He died in 1830, at the age of forty-seven, and his remains were re-interred at Caracas in 1842. Venezuela formed part of the Federal Republic at Colombia from 1822-1830, since which time it has been independent. There have been many revolutions since 1846, particularly in 1849, 1868, 1889, 1891, 1900, and 1908. In 1854 President Monagas liberated the African slaves, and in 1864 President Falcón divided the country into States and formed them into a Federal Republic.

Venezuelan Question.—Protection of the sovereignty of Venezuela by the United States through the application of the Monroe Doctrine has, on two notable occasions, called for prompt and determined action by our Presidents—Cleveland in 1895, and Roosevelt in 1902. (See Monroe Doctrine.)

The contention in 1895 was with Great Britain over the boundary between Venezuela and British Guiana. In July 1888, President Cleveland laid a statement of the dispute before the Senate (Page 5204). President Harrison, in his first annual message, expressed the hope that the question might be amicably adjusted in accordance with the historic titles of the two parties (Page 5471), but regretfully announced in his third annual message (Page 5616), that the friendly efforts of the United States in that direction had proved unavailing.

Upon his return to the Presidency, Cleveland was again confronted by the question, and in his first message announced that the controversy was still pending. (Page 5873.) In the second message during his second term he declared his determination to bring about arbitration—"a resort to which Great Britain so conspicuously favors in principle and respects in practice, and which is earnestly sought by her weaker adversary." (Page 5958.)

In July, 1895, the American Ambassador at London was instructed to communicate to the British Government the position of the United States on the question. This took the form of a protest against the enlargement of the area of the British possessions on the American continent, especially at the expense of Venezuela without the latter's consent, referring to the traditional and established policy of this Government (Page 6064), and denying the right of Great Britain to establish an arbitrary line through the territory in debate and submit to arbitration only the portion lying on one side of it.

Great Britain's reply called forth a special message from Cleveland December 17, 1895 (Page 6087), in which he laid the British reply before the Senate. The reply declared the Monroe Doctrine "inapplicable to the state of things in which we live at the present day." (Page 6088.) Cleveland firmly upheld the Monroe Doctrine, and proposed a commission of his own to determine the boundary line, and asked Congress to appropriate money to carry out the terms, whatever the consequences, which he intimated might be forcible maintenance of his contention, under the Monroe Doctrine. (Page 6090.)

Mr. Cleveland's attitude caused much excited comment throughout the country, but his position was stoutly backed by the peo-

ple and newspapers of all political parties. Diplomatically, the matter was skillfully handled, and finally referred to arbitration, and it was announced to the next Congress that a general arbitration treaty with Great Britain was under way. (See page 6154.) The arbitral tribunal was appointed under the treaty of February 2, 1897, and the award was made October 3, 1899. The terms of award were announced by President McKinley in his third annual message, December 5. (See page 6380.)

(See also illustration opposite page 5485.)

The next invocation of the traditional doctrine by the United States in behalf of Venezuela was during Roosevelt's Administration. Debts due by the South American Republic to citizens of England, France, Germany, Italy, and other foreign countries, were long over-due, and payment seemed remote, if not hopeless. The creditors appealed to their respective governments for redress. England, Germany and Italy agreed upon what they termed a pacific blockade for the forcible collection of the claims. Operations began December 3, 1902, and on the 9th four Venezuelan vessels were seized and an ultimatum was sent to President Castro. Upon its rejection, two forts at Puerto Cabello and San Carlos were bombarded by the allies.

In his first message to Congress, December 3, 1901, President Roosevelt said of the Monroe Doctrine (page 6664) that there must be "no territorial aggrandizement by any non-American power at the expense of any American power on American soil."
* * * We do not guarantee any state against punishment if it misconducts itself, provided that punishment does not take the form of the acquisition of territory by any non-American power."

By diplomatic interviews, all the Powers concerned, except Germany, were brought to a state of willingness to arbitrate. In the case of Germany, President Roosevelt found it necessary to intimate that Admiral Dewey, in command of the fleet, would prevent forcible occupation of the Venezuelan ports. At the same time the President informed the German Ambassador that in event the Emperor should consent to arbitration the credit for such advanced ground in international disputes would be accorded to the Emperor.

The German Ambassador conveyed personally to the President the assurance of the German Emperor that his Majesty's government would consent to arbitration and that it had no purpose or intention to make even the smallest acquisition of territory on the South American Continent or the Islands adjacent. This voluntary and friendly declaration was afterwards repeated to the Secretary of State.

Through the offices of the diplomatic representatives of the United States at Caracas and the Government at Washington, protocols were signed whereby Venezuela agreed (see page 6794) to set apart a certain percentage of the customs receipts of two of her ports to be applied to the payment of whatever obligations might be ascertained by mixed commissions appointed for that purpose to be due from her, not only to the three powers already mentioned, whose proceedings against her had resulted in a state of war, but also to the United States, France, Spain, Belgium, the Netherlands, Norway, Sweden and Mexico, who had not employed force.

The blockading powers, however, demanded that the sums ascertained to be due their citizens by such mixed commissions should be accorded payment in full before

anything was paid upon the claims of any of the so-called peace powers. The powers at this juncture asked that the question be referred to President Roosevelt for decision, but he declined, and suggested that the whole matter be submitted to the Hague Tribunal for adjudication. This was finally agreed to, and amicable settlement was reported in a special message by Roosevelt, January 23, 1905. (See page 6941.) The Hague Tribunal pronounced in favor of the allied powers.

This later incident found echo in the Third International Conference of South American Republics at Rio Janeiro in July and August, 1906, when Dr. Drago, former Minister of Foreign Affairs of Argentina, announced the adherence of South American Republics to the Monroe Doctrine, and the conference, after discussion, recommended that their delegates to the Second Peace Conference at the Hague oppose the compulsory collection by armed forces of debts due its citizens by any other government. This became known as the Drago Doctrine. (See Drago Doctrine.) Mr. Roosevelt stated the policy of the United States on this question in his sixth annual message. (Page 7060.)

Government.—The present constitution rests upon the fundamental law of August 5, 1909, under which the government is that of a Federal Republic of twenty autonomous States, a Federal District, and two Territories, with a President elected by the Federal Congress for four years and ineligible for a consecutive term of office, and a "Council of Government" of ten members (one for each two States), chosen by Congress for seven years, its members (by seniority) supplying at need a successor to the President. President (April 19, 1915-1922), General Juan Vicente Gomez, born July 24, 1859.

The Federal Congress consists of two Chambers. The Senate consists of forty members (two from each State), native born Venezuelans above thirty years of age, elected for four years. The Chamber of Deputies consists of 117 members elected for four years by direct vote in each State, in the proportion of one per 35,000 inhabitants (each State having at least one representative, irrespective of population) with other representatives for every 15,000 in excess of that number.

Each of the States has an elective President and Legislative Assembly.

Education.—Primary education is free and nominally compulsory, but little effort is made to instruct the Indians, and schools are confined to urban areas, where they were attended in 1908 by 35,777 pupils. Universities at Caracas and Mérida. About 60 per cent of the total population are absolutely illiterate.

Finance.—The revenue is derived from customs and customs surtax of 30 per cent, and excise. Salt and matches are State monopolies and are farmed out, the latter to an English company; Cigarette paper is also a farmed monopoly, and with the excise on cigarettes produces 6,000,000 bolivares. The expenditure includes 2,600,000 bolivares for amortization and service of the debt, in addition to the final payment of 7,868,600 bolivares due to certain foreign countries under the Protocol of Washington; and 9,500,000 bolivares war and marine.

The national debt was stated on June 30, 1911 to be 192,164,539 bolivares (about \$36,000,000 United States money).

Production and Industry.—Agriculture and stock raising are the principal industries of the country, and most of the land is suited for these purposes. The chief agricultural products are coffee, cacao,

sugar, maize, beans, wheat, rice, potatoes, vegetables and fruit of various kinds. Cotton is now being grown successfully for three native cotton mills. The Live Stock is stated to include about 2,000,000 cattle, 1,750,000 pigs, 1,500,000 goats, and 200,000 sheep. The llanos, or grassy plains, could support many times the present estimated number with organization and development of the industry, much of the pastoral area having been abandoned since the War of Independence.

The fisheries round the coast and of the lakes are of much importance for the food of the people. Round the northern islands are important pearl fisheries, but they are only carried on in a primitive way by native fishers.

Gold, silver, copper, iron, tin, lead, mercury, sulphur, coal, asphalt and petroleum are known to exist.

Cities.—Capital, Caracas. Estimated population, 75,000. Other towns are Maracibo (35,000), Valencia, Puerto Cabello and La Guaira, and Ciudad Bolívar.

Trade with the United States.—The value of merchandise imported into Venezuela from the United States for the year 1913 was \$5,737,118, and goods to the value of \$10,852,331 were sent thither—a balance of \$5,115,213 in favor of the United States.

Venezuela, Treaty with.—Apart from certain claims conventions, the only diplomatic relation between the United States and Venezuela which survives is the protocol of 1903, by which United States claims against Venezuela were submitted to arbitration. The commission, consisting of two members (one chosen by the President of the United States, the other by the President of Venezuela) must sit at Caracas. An umpire must be appointed to preside over the deliberations, and it was agreed that the umpire should be chosen by the queen of the Netherlands. The commissioners, acting under oath, should determine after due investigation, the justice of the claims. Should the two commissioners be unable to reach a decision, the vote of the umpire should decide the questions. Venezuela also became a party to the convention between the United States and the several leading republics of South and Central America for the arbitration of pecuniary claims and the protection of inventions, etc., which was signed

in Buenos Aires in 1910. (See South and Central America, Treaties with.)

Vera Cruz (Mexico), Siege and Capture of.—March 9, 1847, Gen. Scott, who had been ordered to Mexico to conduct an expedition against its capital city by way of Vera Cruz, landed a force of 12,000 men on the beach in the vicinity of that port. By March 22 the attacking forces were in position and the siege guns mounted. Gen. Scott summoned the governor of Vera Cruz to surrender. Upon his refusal a bombardment was begun and kept up until the morning of the 26th, when overtures for surrender were made by Gen. Landero. Articles of capitulation were signed March 27. The Mexicans lost nearly 500 pieces of artillery, besides other arms and much ammunition. Five thousand prisoners were taken and paroled, and the best port of Mexico, with its famous and almost impregnable fortress of San Juan de Ulloa, was captured. The American loss was insignificant.

Vera Cruz, Occupation of.—During the Mexican revolution of 1913, Americans and other foreigners in Mexico were subjected to gross hardship and abuse. Property was seized and the owners were insulted, threatened, imprisoned, and in several instances actually met death at the hands of one or the other of the warring factions. President Wilson increased the regular troops at the border posts and sent naval vessels to the Mexican seaports to protect the lives and property of Americans and citizens of foreign countries.

On the 9th of April, 1914, a paymaster of the U. S. S. *Dolphin* landed at Iturbide bridge, Tampico, with a whaleboat and boat's crew to take off supplies. The men were unarmed and the boat carried, both at her bow and at her stern, the flag of the United States. The men were arrested, but later released, and an apology was made, but Admiral Mayo demanded that the flag of the United States be saluted with special ceremony. This was refused by President Huerta of Mexico. Citing this and a number of similar insults preceding it, President Wilson, April 20, 1914, asked Congress to approve the use of the land and naval forces of the country to enforce the fullest recognition of the rights and dignity of the United States. This was granted and Vera Cruz was occupied by the American forces. In the three days of fighting seventeen sailors and marines were killed and fifty wounded. The naval occupation was followed by a brigade of the regular army under Gen. Funston. Before attempting an advance into the interior, operations were halted by an offer of mediation between the United States and Mexico made by the diplomatic representatives of Argentina, Brazil and Chile. These met in Niagara Falls, Canada, in May. An attempt was made to adjust the differences between the two countries, but the demand for a salute to the American flag was not complied with and the American forces were withdrawn from Vera Cruz No. 23, 1914. (See Illustrations opposite 7936, 7952.)

Vera Cruz, Mexico; population (1900) 960,570; battle of, referred to, 2385.

Vermont.—One of the New England States; nickname, "The Green Mountain State"; motto, "Freedom and Unity." It extends from lat. 42° 44' to 45° 1' north and from long. 71° 38' to 73° 25' west. It is bounded on the north by Quebec (Canada), on the east by New Hampshire (separated by the Connecticut River), on the south by Massachusetts, and on the west by New York (separated in part by Lake Champlain). It has an area of 9,564 square miles. Vermont is traversed from north to south by the Green Mountains. It is an agricultural state and has extensive quarries of marble and granite. The manufacture of wood pulp is an important industry. It was explored by Champlain in 1609. The first settlement was at Brattleboro in 1724. Vermont was early claimed by both New Hampshire and New York. It was admitted to the Union in 1791.

Statistics of agriculture collected for the last Federal census, place the number of farms in the State at 32,709, comprising 4,663,577 acres, valued, with stock and improvements, at \$145,399,728. The average value of land per acre was \$12.52. The value of domestic animals, poultry, etc., was \$22,642,686, including 430,314 cattle, valued at \$11,828,892; 80,781 horses, \$8,591,357; 94,821 swine, \$974,779; 118,551 sheep, \$538,991; poultry, \$607,787. The yield and value of the field crops for 1911 was: Corn, 46,000 acres, 1,886,000 bushels, \$1,509,000; wheat, 1,000 acres, 28,000 bushels \$28,000; oats, 76,000 acres; 2,660,000 bushels, \$1,569,000; potatoes, 26,000 acres, 2,730,000 bushels, \$2,157,000; hay, 930,000 acres, 1,209,000 tons, \$16,926,000; tobacco, 100 acres, 170,000 pounds, \$27,200. The leading mineral product of the State is marble, of which Vermont produces half of the country's output. The value for the last twelve months reported for the census of 1910 was \$4,679,960, while the granite output was valued at \$2,451,533. Slate, lime, clay, metallic paint, soapstone, sand and gravel are also marketed. The stone production exceeds that of Pennsylvania. The manufactures include hosiery and woolen goods, wood pulp, lumber and machinery, and employ capital to the extent of \$62,658,741. The output was valued at \$63,083,611. The employees numbered 33,106, and the wages paid totalled \$15,221,059. The bonded debt of the State is \$135,000, and the tax rate \$3.50 per \$1,000. The annual receipts of the State Treasurer at last report were \$1,823,390; expenditures, \$1,871,166.

There are forty-seven national banks holding \$7,544,364 to the credit of 21,830 depositors; and twenty-three loan and trust companies, holding \$18,878,526 to the credit of 52,135 depositors. The savings banks hold \$43,132,268 to the credit of 108,298 depositors.

The number of manufacturing establishments in Vermont having an annual output valued at more than \$500 at the beginning of 1915 was 1,772. The amount of capital invested was \$79,811,000, giving employment to 37,217 persons, using material valued at \$42,555,000, and turning out finished goods worth \$76,811,000. Salaries and wages paid amounted to \$22,002,000.

In 1906 there were 1,073 miles of steam railways and 122 miles of electric lines. The population in 1910 was 355,956.

Veterans of Indian Wars of the United States.—Instituted by officers of the United States Army at Philadelphia, April 23, 1896. The objects are "to perpetuate the faithful services, heroism, and privations of the officers and soldiers of the Army of the United States of America, as well as of the auxiliary forces of the several states of the Union, in their successive campaigns conducted against a savage foe on our frontiers, in the interests of civilization, and for the settlement and defense of our Territories at different periods in the history of our common country since the close of the War of the Revolution: and also to collect and preserve for publication a record of these services and other historical data relating thereto, as well as to unite in a fraternal bond of union all those who are entitled to membership therein."

Veto.—The act by which the executive refuses his approval of a measure of the legislative body with which he is associated. The Constitution gives the President of the United States power to veto any act of Congress by refusing to sign the bill after its passage. In the Colonies (except Rhode Island and Connecticut) the governors had power to veto acts of the colonial legislatures. Massachusetts was the first of the original states to grant the veto power to its governor. This was in 1780. In the Convention of 1787 several veto plans were discussed, one of which proposed to associate the Supreme Court with

the President in the exercise of the power. The plan finally adopted resembled that in use in Massachusetts. If the President refuses to sign an act, it is returned to the House in which it originated with his reasons for refusing his signature. That House may then proceed to reconsider the act, and if it again passes both Houses with a majority of two-thirds it becomes a law. The Constitution also provides that "if any bill shall not be returned by the President within ten days (Sundays excepted) after it shall have been presented to him, the same shall be a law in like manner as if he had signed it, unless the Congress by their adjournment prevent its return, in which case it shall not be a law" (18). The veto power was used quite sparingly by the early Presidents.

Following is the number of veto messages sent to Congress by the several Presidents. Those whose names are not mentioned sent no veto: Washington, 2; Madison, 6; Monroe, 1; Jackson, 9; Tyler, 8; Polk, 3; Pierce, 9; Buchanan, 7; Lincoln, 3; Johnson, 22; Grant, 46; Hayes, 8; Arthur, 4; Cleveland, first term, 301; Harrison, Benj., 19; Cleveland, second term, 42; McKinley, 6, and Roosevelt, 15.

Veto Messages. (See the several Presidents; the several subjects.)

Veto, Pocket.—The power of the President to prevent the enactment into law of a bill presented to him within ten days before the adjournment of Congress, without sending in a refusal to sign or his objections in writing, is known as a pocket veto.

Veto Power discussed by President—Polk, 2512.

Taylor, 2561.

Vetoes, Pension. (See Cleveland, Grover; Grant, Ulysses S.)

Vetoes, Pocket. (See the several Presidents; the several subjects.)

Vice-Admiral.—An honorary rank in the United States Navy created by Congress Dec. 21, 1864, and conferred upon David G. Farragut. At the time of its creation it was the highest grade in the Navy. Two years later (July 25, 1866) Congress created the rank of admiral and bestowed it upon Farragut, making David G. Porter vice-admiral. Oct. 17, 1870, after the death of Admiral Farragut, Porter was promoted to the vacancy and Rear-Admiral Stephen C. Rowan was made vice-admiral. On his death in 1890 the grade became extinct. During the colonial period it was customary for the royal governor to be appointed vice-admiral, which made him head of the colonial admiralty courts. (See also Admiral.)

Vice-Admiral, creation of grade of, recommended, 3450, 6423.

Vice Consul.—Assistant to the Consul; or an officer appointed to perform certain special duties in the territory where there is a consul.

Vice-President of United States.—The Constitution provides for the office of Vice-President. His duty is to preside over the Senate, and in case of the removal, death, resignation, or disability of the President succeed him. His salary is \$12,000 per annum. Until the adoption of the twelfth amendment, in 1804, the candidate for President receiving next to the highest number of votes was declared Vice-President. Five Vice-Presidents have succeeded

to the Presidency, by reason of the death of the President, viz.: John Tyler, who succeeded William Henry Harrison in 1841; Millard Fillmore, who succeeded Zachary Taylor in 1850; Andrew Johnson, who succeeded Abraham Lincoln in 1865; Chester A. Arthur, who succeeded James A. Garfield in 1881; and Theodore Roosevelt, who succeeded William McKinley in 1901. The attempt was made in 1841 to give Tyler only the title and rights of "Acting President," but he claimed the full office of President. Six Vice-Presidents have died in office, namely, George Clinton, Elbridge Gerry, William R. King, Henry Wilson, Thomas A. Hendricks and James S. Sherman. Only one resigned, John C. Calhoun.

A list of Vice-Presidents follows:

Name and Birthplace	Inaugurated
John Adams, Quincy, Mass.....	1789
Thomas Jefferson, Shadwell, Va.....	1797
Aaron Burr, Newark, N. J.....	1801
George Clinton, Ulster Co., N. Y.....	1805

Charles W. Fairbanks,	
Unionville Center, O.....	1905
James S. Sherman, Utica, N. Y.....	1909
Thomas R. Marshall,	
No. Manchester, Ind.....	1913

Vicksburg (Miss.), Siege and Capture of.—The night after the battle of the Big Black, May 17, 1863, McPherson's and McClernand's corps crossed the river on floating bridges made of bales of cotton covered with plank. Sherman, who carried the only pontoon train in the army, passed over at Bridgeport, a few miles above. The whole army then moved upon Vicksburg. Sherman, still holding the right, marched toward the Yazoo River, and on the 19th rested his right on the Mississippi, within plain view of Porter's gunboats. McPherson followed Sherman with the Seventeenth Army Corps, halting where the latter had turned off. McClernand came up by the Jackson road and deployed to the left. The investment of Vicksburg was thus complete by May 19, 1863. At this time Grant's army was over 30,000 strong. The Federal force was increased to nearly 70,000 during the siege. The Confederate garrison, commanded by Gen. Pemberton, consisted of about 25,000 or 30,000 men and 102 guns. Vicksburg's fortifications were bastioned earthworks. The place was provisioned for about two months.

On the afternoon of the 19th Grant ordered a general assault, which was repulsed with a loss to the Federals of 912. Three days later he made another attack, but the assailants succeeded merely in planting their flags on the outer slopes of the bastions. The city was found to be too strong to be taken by assault. The Federal loss on the 22d was 3,199. During the skirmishing on

the 18th, 20th, and 21st of May the Union army lost 241 men. Porter assisted materially in these attacks by a constant fire from his gunboats and mortar boats. Pemberton soon began to feel the effects of the siege. By the end of May his meat rations were reduced one-half, and not long thereafter the bacon supply was entirely exhausted. There were no signs of the arrival of reinforcements and 6,000 men lay sick and wounded in the hospitals and private houses. Some of his men had been in the trenches forty-seven days and nights. Besides, they were now constantly exposed to bursting shell and the fire of sharpshooters.

Thus despairing of aid, his resources about exhausted, the Confederate commander resolved to capitulate. July 3, 1863, Vicksburg was surrendered to Grant. Gen. Grant recorded magnanimous terms. The entire garrison was paroled and was allowed to depart with rations to last them beyond the Union lines. The results of the campaign were the defeat of the Confederates in several engagements, the occupation of the capital of Mississippi, and the capture of the important post of Vicksburg with its garrison and munitions of war, a loss to the Confederates of over 30,000 prisoners and several thousand killed and wounded. Among the dead were Generals Tracy, Tilghman, and Green. Grant's losses in the campaign, from the first skirmish at Port Gibson, May 1, to the surrender of Vicksburg, were 1,511 killed, 7,396 wounded, and 453 missing—a total of 9,360.

International Exposition in, discussed, 4142, 4190.

International Patent Congress in, 4215.

Villéré's Plantation (La.), Battle of.—

After the battle of Lake Borgne, La. (q. v.), the British expedition pushed on toward New Orleans by way of the Bayou Bienvenue and Villéré's Canal. Dec. 23, 1814, within an hour after hearing that the British were approaching, Jackson had 1,800 of his troops on the march to meet them. Half of the invading army, some 2,500 men, had approached to within nine miles of New Orleans without serious check. The schooner *Carolina* dropped down the river to a point opposite Villéré's and opened a terrible fire upon the invading army, killing or maiming 100 men in 10 minutes. The general engagement lasted about two hours. Both combatants retired from the field in the darkness. The loss of the Americans was 213, while that of the British was about 400 men.

Virgin Islands.—Formerly the Danish West Indies. They comprise the islands of St. Thomas, St. Croix and St. John, which lie in the Caribbean Sea almost due east of Porto Rico on an important trade route to the Panama Canal, and are the northernmost and westernmost of the Lesser Antillas. Their principal product is sugar cane, although molasses, cotton and live stock are also produced. St. Thomas is an important coaling and cable station. In 1908-9, the imports were \$1,566,099. Their total area is 138 square miles and their population about 25,000.

Unsuccessful attempts had been made by the United States in 1867 and in 1902 to acquire the islands. On July 25, 1916, the Government announced officially that negotiations for their purchase had been completed, and on January 18, 1917, ownership formally passed to the United States. The price paid was \$25,000,000 and abandon-

ment of any United States claims in Greenland arising from American explorations in that country. The islands are of especial value to this country because, when fortified, they will be of great service in protecting the Panama Canal.

Virginia.—One of the thirteen original states; nicknames, "Old Dominion," "Mother of States," "Mother of Presidents"; motto, "Sic semper tyrannis" ("Be it ever thus to tyrants"). Virginia is bounded on the northwest and north by West Virginia (separated by the Alleghany Mountains), on the north and northeast by Maryland and the District of Columbia (separated by the Potomac River), on the east by the Chesapeake Bay and the Atlantic Ocean, on the south by North Carolina and Tennessee and on the southwest by Kentucky. The county of Accomac lies east of the Chesapeake. The area of the state is 42,627 square miles. Virginia is traversed by the Blue Ridge Mountains from northeast to southwest. It is level toward the southeast. It is one of the foremost States in the Union in the production of tobacco. The State also produces largely wheat, corn, vegetables, fruit, timber, coal, iron, salt and building stone, and manufactures flour, leather, iron and tobacco.

Virginia was the first settled of the British American Colonies, the settlement having been made by the English at Jamestown in 1607. Virginia became a royal colony in 1624. It was the largest and most influential of the colonies. It took a conspicuous part in the events leading up to the Revolution. Virginia ceded to the United States all its territory beyond the Ohio River in 1784. It ratified the Constitution in 1788. This great state furnished four of the first five Presidents, and altogether five of the Presidents of the United States. It seceded from the Union April 17, 1861, and became one of the principal battle grounds of the Civil War. The state was readmitted to the Union in 1870.

Statistics of agriculture collected for the last Federal census, place the number of farms in the State at 184,018, comprising 19,495,636 acres, valued, with stock and improvements, at \$635,065,383. The average value of land was \$20.24, against \$10.98 in 1908. The value of domestic animals, poultry, etc., was \$74,891,538, including 859,067 cattle, valued at \$21,124,071; 330,424 horses, \$34,857,610; 60,022 mules, \$7,595,516; 767,635 swine, \$4,165,640; 804,873 sheep, \$3,300,026; poultry, \$3,395,962. The yield and value of the field crops for 1911 was: Corn, 1,980,000 acres, 47,520,000 bushels, \$34,690,000; wheat, 750,000 acres, 9,000,000 bushels, \$8,640,000; oats, 194,000 acres, 3,880,000 bushels, \$2,095,000; rye, 48,000 acres, 532,000 bushels, \$491,000; potatoes, 95,000 acres, 4,275,000 bushels, \$4,104,000; hay, 437,000 acres, 280,000 tons, \$5,740,000; tobacco, 160,000 acres, 128,000,000 pounds, \$12,288,000. Virginia now ranks next to Kentucky (which is first) as a tobacco-growing state. There are 946 vessels engaged in fishing, employing 20,066 people. The value of the products, largely oysters, is \$4,715,744. The leading minerals are coal and iron.

The number of manufacturing establishments in Virginia having an annual output valued at \$500 or more at the beginning of 1915 was 5,508. The amount of capital invested was \$261,501,000, giving employment to 118,109 persons, using material valued at \$155,320,000, and turning out finished goods worth \$264,039,000. Salaries and wages paid amounted to \$56,118,000.

In 1906 there were 4,087 miles of steam railway and 497 miles of electric line. The population in 1910 was 2,061,612.

Referred to, 3983.

War between the States, course regarding, pursued by, 3224.

Withdrawal of, from Union, discussed, 3224.

Virginia Coupon Cases.—A series of eight cases in which the United States Supreme Court in 1884 denied the right of a state to pass laws impairing the obligation of contracts. An act of the Virginia legislature in 1871 authorized the receipt of coupons of the state's funded debt in payment of taxes and debts due the state. An act of 1882 required payment of tax dues in "gold, silver, United States Treasury notes, national-bank currency, and nothing else." The tax collectors thereupon refused to accept the coupons in payment of taxes, as authorized by the law of 1871. The court decided the law of 1882 void, and judgment was found for the plaintiff taxpayers.

Virginia Plan.—At the opening of the Convention of 1787 to amend the Articles of Confederation, Edmund Randolph, of Virginia, on behalf of his delegation, set forth the defects in the old articles and submitted a series of fifteen resolutions drawn up by Madison. This was the first plan of revision presented to the convention and is sometimes called the "Randolph Plan" or the "National Plan." It provided for representation according to population in two branches of Congress—the first chosen

by the people, the second by the state legislatures; Congressional control of taxation and commerce; Congressional veto of state enactments; an Executive chosen by Congress; a limited veto by the Executive and part of the judiciary upon acts of Congress. There were other and less important provisions. The Constitution as framed and ratified was based on the Virginia plan, but quite a number of its leading features were either rejected altogether or greatly modified.

Virginia Resolutions.—A set of nine resolutions drawn up by James Madison, then a member of the Virginia legislature, passed by that body, and signed by the governor Dec. 24, 1798. The reason for the passage of these resolutions and similar ones by Kentucky about the same time was to give expression to the feeling that had been growing since 1791 that the Federal party was endeavoring to obtain greater power than that conferred upon the Government by the Constitution. The direct cause of their adoption was the passage of the alien and sedition laws (q. v.) by Congress. The resolutions deplored the broad construction given to the Constitution, as tending toward monarchical government. They declared the Union to be a compact between the states composing it, and that when this compact was infringed, each state might interpose to protect itself. The alien and sedition laws were denounced as "palpable and alarming infractions of the Constitution." (See also Alien and Sedition Laws; Kentucky Resolutions.)

Virginian, The.—Oct. 31, 1873, the *Virginian*, an American schooner suspected of carrying men and arms from New York to the Cuban insurgents, was captured by the Spanish gunboat *Tornado* on the high seas near Jamaica. Capt. Fry and thirty-five of the crew and four Cuban passengers were executed. The affair created much ill feeling between the United States and Spain. The latter country made such reparation as lay within her power by disclaiming any intention to insult the United States, by paying an indemnity, and by surrendering 102 remaining prisoners. It was proved that the *Virginian* was not entitled to sail under our flag. She foundered at sea off Cape Fear Dec. 19, 1873, while on her way to New York. (See illustration opposite 4249.)

Virginian, The, seized by Spanish vessel and citizens of United States on, put to death, discussed, 4189, 4195, 4210.

Claims regarding, settled, 4276.

Condition of indemnity fund, referred to, 5187, 5908.

Correspondence regarding, transmitted, 4436.

Distribution of indemnity to claimants, discussed, 4290, 5122.

Orders regarding, 5077, 6339.

Visits of Foreign Commissions.—On April 20, 1917, a commission to the United States from England arrived at an American port to consult and to be consulted concerning the part to be played by the United States in the struggle against Germany. It was followed by the arrival on April 21, of a similar commission from France; and on May 9, by the advance-guard of a similar commission from Italy. The leading figure in the English Commission was Minister

Balfour, and the leading figures in the French Commission, ex-Premier Viviani and Marshal Joffre. (For the careers of these men, look under their names in the Biographical Index.) The advance-guard of the Italian Commission was headed by Enrico Arloffa, Minister of Maritime and Railway Transportation. After consulting in Washington with the President, the Cabinet, and high officials of the United States Army and Navy, the French and English commissions paid visits to different cities of the East and Middle West, being received everywhere with acclamation. The remainder of the Italian Commission arrived in Washington on May 23, 1917. It was headed by the Prince of Udine, the eldest son of the Regent of Italy; and included in its personnel Guglielmo Marconi, the inventor of the wireless telegraph. In June, a Belgian commission arrived in the United States. It was headed by Baron Moncheur, formerly Belgian minister to the United States, Mexico, and Turkey, and later chief of the political bureau of the Belgian Foreign Office. The counsel of the commission was M. Carlier, a prominent Belgian banker; and other members were General Leclercq, Major Osterrieth, and Count d'Ursel. In the same month, a similar commission from Russia was received in the United States. It was headed by Special Ambassador Boris A. Bakhmetieff.

Viva Voce.—Vote by voice, that is, by ayes and nays. (See Acclamation.)

Volley.—The discharge from a number of guns fired simultaneously.

Volunteer Naval Reserve. (See Naval Reserve.)

Volunteer State.—A nickname for Tennessee (q. v.). (See also States); sometimes also nicknamed Big Bear State.

Vizcaya, The, mentioned, 6317.

Volunteers.—Persons who enter the military service of their own free will for temporary duty, as distinguished from regulars of a permanent military establishment. By an act passed in 1792 the American Congress recognized the existence in a number of states of volunteer organizations not included in the militia of those states. The Government has since from time to time raised volunteers for temporary purposes. Such troops are United States rather than state forces, and their officers are to be appointed by the President. A provisional force of 25,000 volunteers was authorized by Congress for the war with England in 1812. During the Mexican War 73,500 volunteers were enlisted. During the Civil War a number of calls were made for volunteers, aggregating nearly 2,800,000 enlistments. In the war with Spain over 200,000 volunteers were enlisted. (See also Militia; Army.)

Votes for President, Count of.—The electoral votes of the states are received by the President of the Senate. The two Houses meet in joint session on a day fixed by law, and the President of the Senate opens the returns and hands them to tellers, who count the votes and announce the result. In 1876 two sets of returns were received from certain states. A special electoral commission was appointed by Congress to decide which were the regular returns. In 1887 Congress passed a law providing that contests over electors should be finally decided under state laws as far as possible.

Vote of Thanks. (See Thanks of Congress.)

Wabash and Erie Canal, grant of land in aid of, to Indiana, 1725.

Wageworkers (see also Labor):

Condition of, discussed by President—

Roosevelt, 6903.

Compensation for when killed or injured in discharge of duty, recommended, 7206, 7213.

Wahpeton Indians. (See Indian Tribes.)

Wake and Other Islands.—The United States flag was hoisted over Wake Island in January, 1899, by Commander Tausig, of the *Bennington*, while proceeding to Guam. It is a small island in the direct route from Hawaii to Hongkong, about 2,000 miles from the first and 3,000 miles from the second.

The United States possesses a number of scattered small islands in the Pacific Ocean, some hardly more than rocks or coral reefs, over which the flag has been hoisted from time to time. They are of little present value and mostly uninhabited. The largest are Christmas, Gallego, Starbuck, Penrhyn, Phoenix, Palmyra, Howland, Baker, Johnston, Gardner, Midway, Morell, and Marcus Islands. The Midway Islands are occupied by a colony of telegraphers in charge of the relay in the cable line connecting the Philippines with the United States, in all about forty persons.

The Santa Barbara group is a part of California and the Aleutian chain, extending from the peninsular of Kamchatka in Asiatic Russia to the promontory in North America which separates Bering Sea from the North Pacific, a part of Alaska.

Wakefield, Va., appropriation for approaches to monument at, to mark birthplace of Washington, recommended, 4803.

Walker vs. Jennison.—A slave case decided by the Massachusetts Supreme Court in 1783. It placed a construction upon the State constitution which soon afterwards put an end to slavery in the State. A negro servant had been whipped and imprisoned by his master, and public indignation was aroused by the offense. The owner of the slave was prosecuted. The Supreme Court, sitting in Worcester, found the defendant guilty of assault and imposed a fine upon him. The holding of the court was that the State constitution of 1870, in declaring all men free and equal, had abolished slavery in Massachusetts. As a matter of strict fact, runaway slaves were advertised for in the Boston newspapers after the decision had been promulgated. Nevertheless, the institution of slavery very soon after 1783 came to an end in Massachusetts.

Walker River Reservation, Nev., right of way for railroad through, 4736, 4776, 4953, 5178.

Walla Walla Indians. (See Indian Tribes.)

Wampum.—An Indian word meaning "white" and referring to strings of white beads worn for ornament and used as a medium of exchange. The beads were made of clam shells, through which holes had been drilled, and were strung upon a thread. Tradition says the Narragansets were the first Indians to use wampum. This is perhaps true as regards the beads made of the quahog or clam shell of the coasts of Rhode Island and Connecticut, though periwinkle shells were also used. Its use as money spread from the coast Indians inland. It was also used by the colonists of New England and the Middle States, having been deemed legal tender from 1627 to 1661. Beads of black or dark purple were rated at double the white wampum. Wampum was known to the Dutch settlers under the name of "sewon" or "zeewand." Payments were made by cutting off the desired number of beads. They were also used in the simple arithmetical calculations of the Indians.

Wanderer, The, landing of, with cargo of slaves, 3065, 3086.

War (see also Algerine War; Indian Wars; Mexican War; Revolution; Revolutionary War; Spanish-American War; Tripolitan War; Civil War; War of 1812; Wars, Foreign): Instant redress, conferring of authority upon President to demand, recommended, 3100.

War College. (See War, Department of and illustration, frontispiece, Vol. IX.)

War Department.—An Executive Department of the federal government established by act of the First Congress under the Constitution, on Aug. 7, 1789. The work then taken up by the Department was begun by the Continental Congress, that body on June 15, 1775, having elected George Washington "to command all the continental forces raised or to be raised for the

defense of American liberty." An Adjutant-General, Quartermaster-General, and Commissary-General were also appointed, and on Dec. 26 of the following year Congress gave General Washington power to appoint all officers below the grade of Brigadier-General and to fill vacancies in all departments of the American Army.

In response to the recommendation of Washington, Congress, on June 13, 1776, created the Board of War, which was the germ of the modern War Department. The office of Secretary of War was created in 1781 and was filled by Henry Knox from 1784. When the War Department was formally established in 1789 he was made the first Secretary under the Constitution.

Adjutant-General.—The office of Adjutant-General was formally created by an act of Congress of March 3, 1813, there having been no regular Adjutant-General from the disbanding of the Army in 1783 up to that time. An act of March 5, 1792, created the dual office of Adjutant and Inspector-General, but on the reorganization of the Department this office was changed to that of Adjutant-General. By an act of Congress approved April 23, 1904, this office was united with the Record and Pension Office to form the office of the Military Secretary. This is the Department of records, orders and correspondence of the army and militia, the Military Secretary being charged with transmitting all orders of the Secretary of War, conducting the recruiting service, etc.

Inspector-General.—The Inspector-General's office was established under the Constitution by an act of March 3, 1813, although in 1777 an Inspector-General of Cavalry, and of Ordnance and Military Manufactures, had been appointed. It is the duty of the Inspector-General to inspect all military commands, stations, schools, armories, arsenals, fortifications and public works carried on by the War Department.

Judge-Advocate-General.—The office of Judge-Advocate General of the Army was created in 1775, was discontinued in 1802, and existed again from 1812 to 1821. An act of March 2, 1849, authorized the President to appoint a Judge-Advocate of the Army, but in 1862 the title was changed to that of Judge-Advocate General. This office was made head of the Bureau of Military Justice, created June 20, 1864, but by the act of July 5, 1884, the office of Judge Advocate-General and the Bureau of Military Justice were united under the designation of Judge-Advocate General's Department, of the War Department. It is the duty of the Judge-Advocate General to review the proceedings of all courts-martial, courts of inquiry and military commissions, and give opinions on legal questions arising under laws and regulations pertaining to the War Department.

Quartermaster.—The Quartermaster's office was formally organized in the War Department by an act of Congress of March 28, 1812, although provision had been made for a Quartermaster-General by the Continental Congress as early as June 16, 1775. Various enactments were also made concerning the office up to 1785, when it ceased to exist until, as stated, it was finally organized in 1812. It is the duty of the Quartermaster's Department to furnish the army with military supplies; provide transportation for troops; construct military roads and bridges; maintain national cemeteries; and provide supplies for the militia of the various states.

Commissary-General.—The earliest legislation concerning the subsistence of the army was the resolution of the Continental Congress of June 16, 1775, creating the office

of Commissary-General of Stores and Provisions. This office was succeeded on June 10, 1777, by two offices, the Commissary-General of Purchases and the Commissary-General of Issues, which acted under the direction of a committee of Congress until Nov. 25, 1779, when they were placed under the supervision of the War Board. The clothing of the troops was provided for by the ordinance of June 17, 1777, which created the office of Clothier-General, this office being placed under the direction of the War Board on April 10, 1782. An act of the Continental Congress of July 10, 1781, directed the Superintendent of Finance to procure all supplies by contract; and again on March 8, 1792, the Congress under the Constitution placed a similar duty upon the Treasury Department, which had succeeded the Superintendent of Finance. The latter act was repealed on July 16, 1798, and the Secretary of War was required to provide subsistence for the army. An act of March 16, 1802, provided for three military agents to do this work, but this system was abolished by an act of March 28, 1812, which created the office of Commissary-General of Purchases. This in turn was abolished by an act of March 28, 1812, its duties transferred to the Quartermaster's Department.

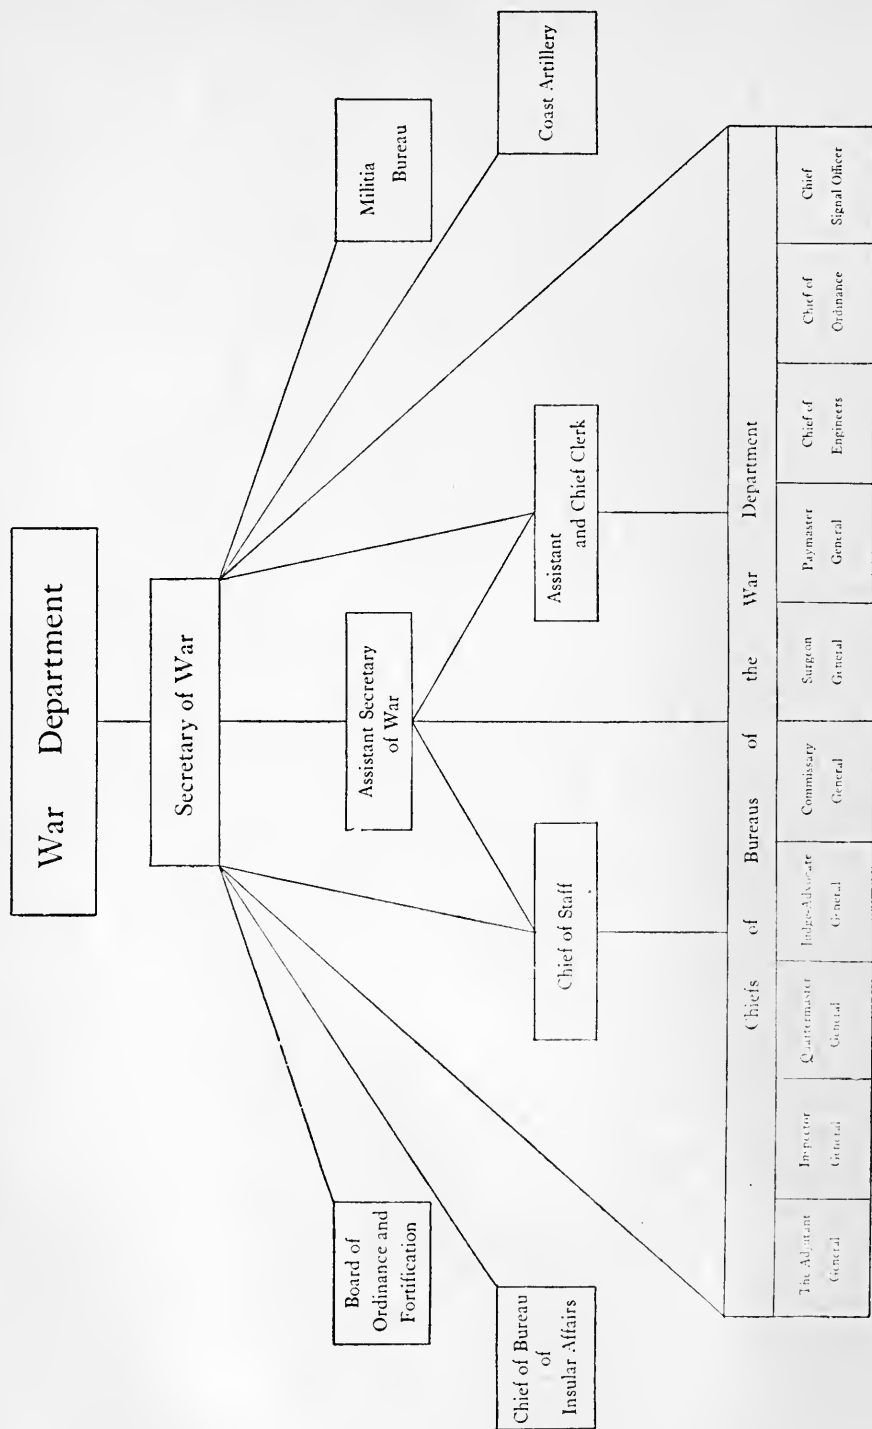

The office of Commissary-General as it exists to-day was first established by an act of April 14, 1818, the head of this office being later referred to as Commissary-General of Subsistence. He provides and issues rations, and distributes articles authorized to be kept for sale to the officers and men of the army.

Surgeon-General.—A hospital department for the army was created by Congress on July 27, 1775, its head being called Director-General and Chief Physician. By an act of March 3, 1813, the office of Physician and Surgeon-General was created and on April 14, 1818, the medical branch of the War Department was given a permanent head with the title of Surgeon-General.

Paymaster-General.—The office of Paymaster-General was provided by the resolution of Congress of June 16, 1775, but on March 23, 1787, it was merged with that of Commissioner of Army Accounts. A Paymaster of the Army was appointed by an act of May 8, 1792, and the Pay Department was definitely organized in the War Department under an act of April 24, 1816.

Engineer Corps.—The Corps of Engineers was created on March 11, 1779, disbanded in November, 1783, but restored by the acts of May 9, 1794, and March 16, 1802. As early as July 25, 1777, however, there had been a "geographer and surveyor of roads" appointed. By an act of March 3, 1818, the appointment of topographical engineers was authorized, and in August, 1818, a Topographical Bureau was established in the War Department under the direction of the Secretary of War and the Chief Engineer. On July 5, 1838, an independent corps of topographical engineers was created, but by the act of March 3, 1863, it was merged with the Corps of Engineers. Besides those duties germane to its military nature, the Corps of Engineers conducts the river and harbor improvements.

Ordnance Department.—To consider ways and means of supplying the continental troops with arms and ammunition, a committee was appointed by the Continental Congress on May 27, 1775; and although a Commissioner of Artillery Stores (later called Commissioner-General of Artillery Stores) was appointed, the business of pro-

viding arms and ammunition was conducted by a secret committee of the Continental Congress and the Board of War. An act of April 2, 1794, authorized the President to appoint an officer who, under the War Department, should perform ordnance duty, and on May 14, 1812, the Ordnance Department was formally established in the War Department. By an act of March 2, 1820, it was merged with the artillery but was reorganized as an independent bureau by an act of April 5, 1832.

Signal Corps.—The Signal Corps was practically created June 21, 1860, when Congress authorized the addition of a signal officer to the staff of the army. The Signal Corps, by that name, was organized by an act of March 3, 1863. The duties now performed by the Weather Bureau were added to those of the Signal Corps in 1870, but in 1890 that work was transferred to the Department of Agriculture. The Chief Signal Officer has charge of all means of military communication.

Customs and Insular Affairs.—A Division of Customs and Insular Affairs was established in the War Department in December, 1898, for conducting the business relating to the civil government of Cuba, Puerto Rico, and the Philippine Islands. In 1900 the designation of this division was changed by Department orders to that of Division of Insular Affairs, and by an act of July 1, 1902, it was definitely established by law as a bureau of the War Department.

General Staff.—To better coordinate the various offices of the Department, the General Staff Corps was established by an act of Congress approved Feb. 14, 1903. It consists of a Chief of Staff, who took the place of the Commanding General of the Army; two general officers detailed by the President from the regular army not below the grade of brigadier-general, and forty-two officers of minor grade similarly detailed by the President. It is the duty of the General Staff Corps to prepare plans for the national defense, and for the mobilization of the military forces in time of war; to assist the Secretary of War in increasing the efficiency of the military establishment; and in case of war to act as a board of strategy. The Chief of Staff, under the direction of the President, or the Secretary of War under the direction of the President, has supervision of all troops of the line, the Adjutant-General's, Inspector-General's, Judge-Advocate General's, Quartermaster's, Subsistence, Medical, Pay, and Ordnance Departments, the Corps of Engineers, and Signal Corps.

In administering the affairs of the Department, the Secretary is aided by an Assistant Secretary, as well as by the chiefs of the various offices, bureaus, divisions and corps named above, who are officers of the regular army of the United States. Two bureaus of the Department not now in existence are: The Bureau of Refugees, Freedmen and Abandoned Lands (1865-1873), which aided in the work of reconstruction, after the Civil War; and the Bureau of the Provost-Marshal General (1863-1866), which had to do with the enrolling and calling out of the national forces and the arrest of deserters and spies. (See Army.)

War College.—To coordinate and direct the instruction in the various service schools and to extend the opportunities for investigation and study in the army and militia Congress established the War College at Washington, and placed it under the immediate direction of the Secretary of War.

Following is a list of the Secretaries of War and the Presidents under whom they served:

PRESIDENT	Secretary of War	Appointed
Washington	Henry Knox, Massachusetts.....	1789
"	Timothy Pickens, Mass.....	1795

Military Policy of America.—Secretary of War Garrison stated the policy of the Wilson administration on the subject of preparedness for defence in the following language in his report to the President in 1915:

"It is a matter of great gratification to observe that there is a realizing sense of the necessity of the adoption of a wise and sensible policy. It was inevitable that this should be the result of the consideration of this subject. In a self-governing nation the prime necessity for proper action is to secure the concentrated attention of the people; when they are all thinking about the same thing at the same time, they reach a sound and satisfactory conclusion. This subject is now receiving such concentrated attention, and a wise result will be reached when facts are realized and reason is applied. The only firm foundation is one which rests upon fact, and the only wise guide to conduct is one which proceeds from reason.

"The necessity of a nation having force commensurate with its responsibility is demonstrated by every correct process of reasoning founded upon fact. This is so whether the subject is considered in the light of the philosophy of government or of history. The use of force is the inherent essence of government. The very term itself is explicit—government—the right or power to compel obedience to law. Where there is no force to compel such obedience—that is, to govern—there is anarchy. Individuals give up the right of unregulated action when they form themselves into or become subject to a government. The progress and advancement of that which is summed up in the word "civilization" have been made possible solely because of government. Unless the individual is secure in his person and his property, he has neither time nor inclination to devote himself to the cultivation of the mental, moral or spiritual side of his nature. That security is assured to him by government, and government can only meet its responsibility of assurance by the possession of sufficient force to secure and preserve it. In our own earlier days the continued progress of the arts of peace

was constantly interrupted by the necessity of banding together to prevent destruction by aggression from without. Later, and even after many of our largest civil communities were established, the individual citizen had to be prepared to protect himself, his family and his property, against the depredations of criminals, until the community organized and prepared a police force sufficient to assure the citizen of protection.

"The identical necessity exists as to the nation. Unless the citizens thereof are assured that they can cultivate the arts of peace behind a barrier of force which will protect them from aggression and secure them in their rights, they are not free to cultivate such arts. Alike in the case of the individual, the internal municipality and the nation, there must be a realization of the responsibility and a willingness and preparation to measure up to and meet it. This is equally true in respect to the three-fold aspects of men and nations—physical, mental and spiritual. Strength of mind, of body and of spirit, are prerequisites for progress along right lines. The essential basis of civilization is maintained by the triumph of what is right over what is wrong, and its progress can only be continued and assured so long as those who sustain the right are stronger than those who assert the wrong. Weakness inevitably results in overthrow, as the abundant instances of history demonstrate, both with respect to individuals, cities and nations. The eye that is not diverted will see this, and the mind that is free from prejudice will grasp and realize it. It is necessary, therefore, to remove obstructions to clear vision and prejudice to clear thinking.

"There are some who do not feel free to base their conduct upon a consideration of facts or conclusions of reason, because of their interpretation of Divine injunction. They do not believe in resistance to physical force; and those whose consciences are so convinced surrender life and all that they cherish and love at the behest of the aggressor. This attitude concerns the individual, and him alone. Since it does not

assume to be based upon fact or reason. It cannot be dealt with on that basis. It cannot be made the general rule of conduct under our form of government without departing from the basis upon which our government is founded. Our government is enjoined by the law of its being to use whatever force is necessary to protect the rights of the citizen. Before leaving this, one is impelled to query upon what proper consideration there is based any distinction between the right or necessity or desirability of using mental force to repel error, moral force to repel evil, and physical force to repel wrong. It would seem, if reason were applied, that in each instance the situation is identical; and that if we should properly prepare our minds to be strong so that we can reject error, and our moral characters to be strong so that we can reject evil, we should likewise make our physical force strong in order that we may maintain the right as against those who would physically impose the wrong upon us.

"There are others among us who are too intelligent and clear-sighted not to see the facts and to realize their significance, but who counsel inaction because they mistrust themselves and the nation. Those to whom I now refer do not believe in the doctrine of non-resistance; they do not rest upon the prediction that an evil which has existed since the world began has ceased to exist and been abolished and should not therefore be considered as one to be prepared against; they even point out our potentiality of force, but they counsel against any preparation thereof."

War-Horse.—From the literal meaning, a horse used in war, the term has come to be applied to a brave soldier, or to a valiant person in any walk of life, especially to a long-favored public servant.

War of 1812.—This war grew out of the British orders in council made to destroy the commerce of France and of nations trading with France, the arbitrary impressment of American seamen, and the exercise of the right of search. These orders in council and the Berlin and Milan decrees of Napoleon subjected to capture vessels trading with England and France.

In the early part of this century European nations did not admit the right of expatriation. Great Britain held that "once an Englishman always an Englishman," and maintained the rights of search and impressment. Many of our vessels were stopped on the high seas and searched; seamen claimed to be British subjects were taken from them and forced to serve in the British navy or imprisoned for refusing to serve. Several of our men-of-war were fired upon and compelled to give up seamen in their crews. The arrogance of Great Britain was further shown by her interference with our commerce under her paper blockades. She interfered with rights which our government claimed for our vessels as neutral ships. (See Embargo Act.) The Henry affair (see Henry Documents) also increased the bitter feeling of our people. For several years previous to the war, England's action had been intolerable.

Congress passed acts known as the Embargo Act, the Nonintercourse Act, and the Nonimportation Act in an effort to check British aggressions on the commerce of the United States. The Federalists were opposed to war; the Republicans favored it. Madison, the Republican President, was personally not disposed to warlike measures, and it was asserted that he "could not be kicked into a war." Finally, however, the pressure from public and party became too strong for him. The Congress which assembled in December, 1811, was heartily disposed to resort to arms. It passed acts to increase the army, and appropriated large sums for the army and navy. Finally, on June 18, 1812, the President declared war against Great Britain. The war at first was waged along the Canadian frontier. The Americans suffered some serious re-

War of 1812 *Messages and Papers of the Presidents*

verses the first year in the Northwest. Detroit was surrendered by Hull, and Fort Dearborn, on Lake Michigan, the present site of the City of Chicago, was captured by the British. Detroit was recovered by Perry's splendid victory on Lake Erie in 1813. The military and naval forces of Great Britain were greatly superior to those of the United States. Nevertheless some notable victories were won by the Americans as the war progressed.

The Navy especially distinguished itself in a remarkable series of engagements with the enemy's ships. In 1814 the British attacked and captured Washington City and burned the public buildings. The most famous victory won by the Americans in the war was that of Gen. Jackson over the British commanded by Sir Edward M. Pakenham, Jan. 8, 1815, at New Orleans. This battle was fought fifteen days after peace had been declared, but before the news had reached New Orleans, Dec. 24, 1814, by the treaty of Ghent (q. v.), peace was restored. By this treaty several questions pending between the two countries were settled, but the three principal ones, out of which the war grew, were not mentioned. The total number of enlistments in the regular service was 38,187, and in the militia 471,000. The total cost of the War of 1812 was \$107,159,003. The cost of the Revolutionary War was \$135,193,703; of the Mexican War, \$66,000,000.

War of 1812:

- Alexandria, Va., retreat of British from, 532.
- American blood wantonly spilled by Great Britain, 485.

Ware vs. Hylton.—A Supreme Court case denying the right of any State or citizen to repudiate debts contracted with British subjects before the Revolutionary War. In 1796 Ware, a citizen of Great Britain, administrator of William Jones, surviving partner of Farrell & Jones, brought suit against Hylton, of Virginia, for the recovery of a debt. Hylton refused payment on the ground that the Virginia legislature of 1777 had passed an act to sequester British property and enable debtors of British subjects to pay such debts to the State loan office. The act was signed by Governor Jefferson. Hylton claimed to have complied with this statute. The United States circuit court for Virginia rendered a decree in favor of the defendant. The United States Supreme Court, however, reversed this decision on the ground that the legislature had not the power to extinguish the debt, when payment of such debts had been stipulated in the treaty of 1783. The justices rendered separate opinions to this effect. At the close of the Revolution and for a number of years afterwards there was a great deal of feeling aroused in Virginia and other States over efforts to collect British debts contracted in colonial times.

Warehouse Act.—The central purpose of the United States Warehouse Act, which became a law August 11, is to establish a form of warehouse receipt for cotton, grain, wool, tobacco and flaxseed, which will make these receipts easily and widely negotiable as delivery orders or as collateral for loans and therefore of definite assistance in financing crops. This purpose the act aims to attain by licensing and bonding warehouses under conditions which will insure the integrity of their receipts and make these receipts reliable evidence of the condition, quality, quantity and ownership of the products named which may be stored with them.

The Secretary of Agriculture is given general authority to investigate the storage, warehousing, classification, weighing and certifying of cotton, wool, grains, tobacco and flaxseed, and to classify warehouses for which licenses are applied for or issued.

He may issue to warehousemen licenses for the conduct of warehouses in which such products may be stored for interstate or foreign commerce, and also of warehouses located in places under the exclusive jurisdiction of the United States in which such products may be stored. Persons who are not warehousemen may also be licensed, subject to the same requirements as licensed warehousemen, to accept such products for

storage in warehouses owned, operated or leased by any State. Licenses may be issued for periods not exceeding one year and are renewable upon a showing satisfactory to the Secretary of Agriculture. A fee not exceeding \$2 may be charged for each license or renewal, and, in addition, a reasonable fee for each examination or inspection of a warehouse made upon application of the warehouseman. It is not, however, compulsory that any warehouseman be licensed by the Secretary of Agriculture.

Every applicant for a license as a warehouseman must agree to comply with the act and the rules and regulations prescribed under it. He must give a bond, with other than personal surety, to secure the performance of his obligations as a warehouseman under the laws of the place in which the warehouse is conducted, under his contracts with his depositors and under the United States Warehouse Act. The right is given to any person injured through its breach to sue in his own name on the bond for any damages sustained by him. When such bond has been given the warehouse may be designated as bonded under the United States Warehouse Act.

The Secretary of Agriculture is authorized to inspect warehouses licensed, or for which licenses are applied; to determine whether they are suitable for the proper storage of agricultural products; to prescribe the duties of licensed warehousemen with respect to their care of, and responsibility for, agricultural products; and to examine agricultural products stored in licensed warehouses. Deposits of agricultural products in such warehouses are made subject to the act and the rules and regulations under it.

Licensed warehousemen are not permitted to discriminate between persons desiring to store agricultural products in their warehouses. All agricultural products, except fungible products (such as grain and the like), of the same kind and grade, for which separate receipts are issued, must be kept that they may be separately identified and redelivered to the depositor. Warehousemen may mix grain and other fungible products, ordinarily mixed in storage, when they are of the same kind and grade and are delivered from the same mass, but may not mix such products when they are of different grades.

Original receipts must be issued for all agricultural products stored in licensed warehouses, but only when such products are actually stored at the time of the issuance of the receipts. Additional or further receipts for the same products may only be issued in place of lost or destroyed receipts, and then only under specified conditions.

The act enumerates certain facts which must be stated in all receipts issued by licensed warehousemen. They must show (a) the location of the warehouse, (b) the date of issuance, (c) the consecutive number, (d) whether the products will be delivered to the bearer, to a specified person, or to a specified person or his order, (e) the rate of storage charges, (f) a description of the product stored, including the quantity or weight, (g) the grade or other class, according to the official standards of the United States for such products, unless there be no such standard, in which event it must be stated according to some recognized standard or according to rules and regulations prescribed by the Secretary of Agriculture, (h) that they are issued subject to the United States Warehouse Act and the rules and regulations under it, (i) ownership, if any, of the products by the warehouseman, (j) any lien claimed by the ware-

houseman for advance made or liabilities incurred, (k) any other fact required by the Secretary of Agriculture, (l) the signature of the warehouseman, which may be made by his authorized agent. Unless otherwise required by the law of the State in which the warehouse is located, the grade may be omitted at the request of depositors, except in case of fungible agricultural products. If the receipts clearly show that they are not negotiable.

Battle of San Jacinto, referred to, 2330.

Correspondence between President Jackson and Santa Anna regarding, 1493.

Defeat of Mexican arms, 1487.

Desire of Texas to become part of United States, 1456, 1487.

Discussed by President Tyler, 2113, 2164, 2193.

Hostilities should cease, 2113, 2164, 2194.

Independence of Texas—

Acknowledgment of, by Santa Anna referred to, 2330.

Recognition of, by United States discussed, 1484, 1500, 2113.

Interference of citizens of United States in, complained of by Mexico, 2050.

Neutrality of United States in, 1370.

Physical force, disparity of, on side of Mexico, 1487.

Referred to, 2329.

Result of, of importance to United States, 1456, 1487, 2113.

Wars, Foreign *Messages and Papers of the Presidents*

- Strong prepossession felt by United States for Texas, 1456, 1487, 2113.
- Threats of Mexico to renew hostilities, discussed, 2193, 2206.
- Neutrality preserved by the United States during war of Great Britain with Russia, 2864.
- Russia with Turkey—
Discussed by President—
Adams, J. Q., 973.
Hayes, 4418.
- Neutrality preserved by United States in, 4418.
- Threatening aspect of, discussed, 762.
- Treaty of peace, referred to, 1008.
- Salvador with Guatemala, 5543.
- Schleswig-Holstein, neutrality of United States in, discussed, 2548.
- Spain with Cuba (see also Spanish-American War)—
Armistice proposed by United States, discussed, 6285.
- Autonomous government promised by Spain, discussed, 6152, 6261, 6284, 6308.
- Captain-General Blanco directed to suspend hostilities, 6292.
- Claims of United States against Spain resulting from, 4051, 4099, 4448, 5871, 6180.
- Concentration policy of Captain-General Weyler, discussed, 6256, 6283, 6284, 6308.
- Revoked, 6285.
- Forceful intervention in, by United States, discussed, 6261.
- Recommended, 6289.
- Friendly offices of United States, tender of, refused, referred to, 6255, 6282.
- Joint resolution of Congress declaring freedom of Cuba, authorizing intervention, etc., 6297.
- Discussed, 6311.
- Regarded by Spain as "equivalent to an evident declaration of war," 6312.
- Neutrality proclamations of President Cleveland, 6023, 6126.
- Policy of United States regarding, discussed by President—
Cleveland, 6068, 6148.
Referred to by President McKinley, 6291.
- Grant, 3985, 4018, 4051, 4101, 4143, 4245, 4290.
- Referred to by President McKinley, 6259, 6286, 6291.
- Hayes, 4438, 4448.
- McKinley, 6248, 6281, 6307.
- Questions with Spain, growing out of, 4115, 4195, 4196, 4245, 4520.
- Recognition of belligerency of Cuba by United States deemed unwise by President—
Cleveland, 6068, 6151.
Grant, 3985, 4018, 4292.
McKinley, 6258.
- Recognition of independence of Cuba by United States opposed and precedents cited by President McKinley, 6286.
- Referred to, 4004, 4024.
- Surrender of insurgents, referred to, 4437.
- Termination of, announced, 4448.
- Spain with South American provinces—
Discussed by President—
Adams, J. Q., 922, 950.
Jackson, 1318, 1369, 1486.
Monroe, 582, 612, 627, 639, 646, 657, 674, 685, 762, 828, 829.
- Independence of South American provinces—
Achieved before recognized by United States, 829.
- Asserted, 612.
- Emperor of Russia intervenes for recognition of, 892.
- Not recognized until danger of subjugation had passed, 1486.
- Referred to, 706, 761.
- Should be recognized by United States, 685.
- Negotiations opened for establishment of peace, 1369.
- Neutrality preserved by United States in, 582, 627, 639, 685, 762.
- Referred to, 892, 969.
- Successful management of war by South American provinces, 616, 674.
- Spain with South American Republics—
Armistice referred to, 4144.
- Good offices of United States tendered, 3776, 3884.
- Accepted, 3987, 4052.
- Vessels being built in New York for Spain forbidden to depart, 3987.
- Turkey with Greece; hope for success of Greece manifested by United States, 762, 786, 828, 875, 950.

Wars of the United States.—The principal wars in which the United States has been engaged are the Revolutionary war, the war with France, war with the Barbary States (Algeria, Tunis and Tripoli), the War of 1812, the Mexican war, the Civil War, the Spanish-American war, the Indian wars, and the war with Germany. The most important conflicts with Indian tribes are described under Indian Wars. The near approach to war with France at the close of the Eighteenth Century is chronicled in the article entitled X. V. Z. Mission, and some of the minor domestic insurrections are treated under the head-

MILITARY AND NAVAL FORCES EMPLOYED BY THE UNITED STATES IN THE SEVERAL WARS SINCE AND INCLUDING THE WAR OF THE REVOLUTION :

Wasco Indians. (See Indian Tribes.)

Washington, George.—1789-1797.

(FIRST TERM, 1789-1793).

First Administration—Federal.

Vice-President—John Adams.

Secretary of State—

Thomas Jefferson, from March 21, 1790.

Secretary of the Treasury—

Alexander Hamilton, from Sept. 11, 1789.

Secretary of War—

Henry Knox, from Sept. 12, 1789.

Attorney-General—

Edmund Randolph, from Sept. 26, 1789.

Postmaster-General—

Samuel Osgood, from Sept. 26, 1789.
Timothy Pickering, from Aug. 12, 1791.

The first session of the First Congress under the Constitution met in New York, April 6, 1789. Speaker of the House, F. A. Muhlenberg, of Pennsylvania.

The electoral vote was immediately counted and George Washington was found to be the unanimous choice for President. He took the oath of office April 30, and the organization of the United States government under the Constitution was begun. The first tariff bill was passed July 4. By the end of September the departments of State, War and Navy, Treasury, Post-Office and Attorney-General had been organized and the Supreme Court established.

After submitting twelve constitutional amendments to the states (ten of which were ratified, taking effect Dec. 15, 1791), Congress adjourned, and President Washington paid a visit to the northern and eastern states.

The second session of the First Congress met in New York, Jan. 4, 1790, and Washington delivered his First Annual Address (page 57). At this session Secretary Hamilton's scheme for funding the National debt was adopted, providing (1) fund and pay the foreign debt of the Confederation (\$12,000,000); (2) fund and pay the domestic debt (\$40,000,000); (3) assume and pay the unpaid war debt (\$21,500,000) of the states. This session also passed acts authorizing the census, the patent office and the acquisition of the District of Columbia as a permanent seat of government. Meanwhile the last of the thirteen original states had ratified the Constitution, and after amending the tariff law by increasing duties, the second session adjourned Aug. 12, 1790.

The third session of the First Congress, which met in Philadelphia, Dec. 6, 1790, passed the act incorporating the Bank of the United States, and adjourned March 3, 1791. This Congress in two years established the government on a permanent basis and provided the means to maintain it.

England further recognized the young republic by sending a minister to the capital.

The Second Congress opened at Philadelphia Oct. 24, 1791, with Jonathan Trumbull, of Connecticut, Speaker of the House. The Mint was established and an apportionment act was passed. (See Apportionment.) At the second session the President's salary was fixed at \$25,000, and the electoral vote was counted, showing Washington to have received 132 (all) and John Adams 77 and George Clinton 50 as second choice.

(SECOND TERM, 1793-1797).

Second Administration—Federal.

Vice-President—John Adams.

Secretary of State—

Thomas Jefferson (continued).

Edmund Randolph, from Jan. 2, 1794.

Timothy Pickering, from Dec. 10, 1795.

Secretary of the Treasury—

Alexander Hamilton (continued).

Oliver Wolcott, from Feb. 2, 1795.

Secretary of War—

Henry Knox (continued).

Timothy Pickering, from Jan. 2, 1795.

James McHenry, from Jan. 27, 1796.

Attorney-General—

Edmund Randolph (continued).

William Bradford, from Jan. 8, 1794.

Charles Lee, from Dec. 10, 1795.

Postmaster-General—

Timothy Pickering (continued).

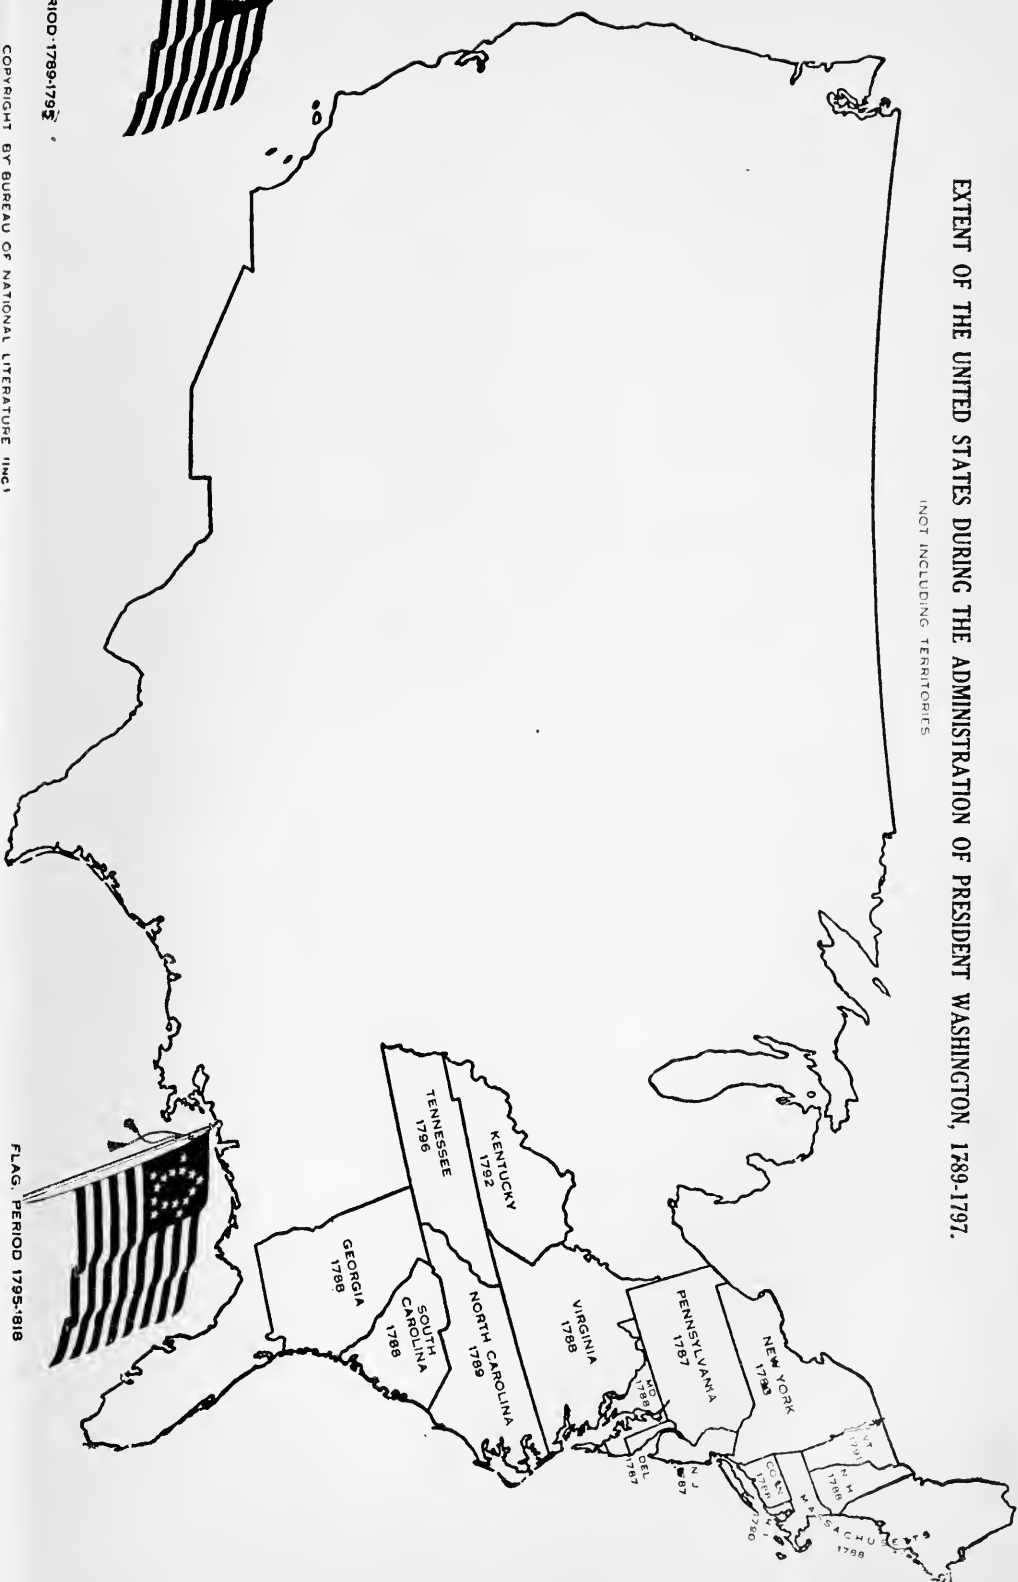

Joseph Habersham, from Feb. 25, 1795.

It was by perfectly natural and logical steps that Washington passed from the military leadership of the people in their struggle for independence, through the Presidency of the National Convention at Philadelphia, where months of the year 1787 were spent in framing a Constitution, to the position of first President of the United States. Speaking of Washington's eminent fitness for the office, Bancroft, in his "History of the Constitution," says: "But for him the country could not have achieved its independence; but for him it could not have formed its Union; and now but for him it could not set the Government in successful motion." The election should have been held in November, 1788; but it did not take place until the first Wednesday in January, 1789. The Constitution required that to become operative it should be ratified by nine of the thirteen states. It was not until June 21, 1788, that New Hampshire, the requisite ninth state, gave its approval; Vermont followed on the 26th of June, and New York on July 26. It was Sept. 13, 1788, before Congress passed the resolution declaring the Constitution ratified, and ordered the appointment of the electors. The interval between this date and that set for the election allowed no time for the participation of the people in the election. The electors were appointed by the legislatures of all states except that of New York, where a bitter struggle over the Constitution between the House and the Senate prevented the necessary compliance with the order, and those of North Carolina and Rhode Island, whose legislatures had not yet ratified the Constitution. There was no nomination or preparation of platform, yet when on April 6, 1789, the votes of the electors were counted in the presence of the two houses, it was found that Washington had received every vote of the ten states that had participated in the election, and that John Adams had received 34. The third highest vote was that of John Jay, who received nine.

Party Affiliation.—At no time did Washington make an avowal of party. He entered upon the duties of office with a profound veneration for the Constitution, a determination to adhere to its every pro-

EXTENT OF THE UNITED STATES DURING THE ADMINISTRATION OF PRESIDENT WASHINGTON, 1789-1797.

FLAG, PERIOD 1795-1818

vision, and with a fixed purpose of promoting the unity of the nation. Before his election he said in a letter: "I have ever been a friend to adequate powers in Congress, without which we shall never establish a national character. . . . We are either a united people under one head and for federal purposes, or we are thirteen independent sovereignties, eternally counteracting each other." When he was consulted about the choice of a Vice-President, he expressed no preference save that he hoped it would be "a true Federalist." Even at the end of his eight years as President, after the installation of the machinery of the Government, the formulation of the policies of the country, and the application of the provisions of the Constitution to the practical duties of the administration had erected the party of which he was the head, hereafter to be known as Federalists, and that of his opponents, known for a time as Anti-Federalists—even then in his memorable Farewell Address (see page 205) he denounced party affiliation and cautioned his countrymen against its, to him, baneful effects. While he, therefore, must be regarded as the founder of a party, he, nevertheless, says: "The alternate domination of one faction over another, sharpened by the spirit of revenge natural to party dissension, which in different ages and countries has perpetrated the most horrid enormities, is itself a frightful despotism." . . . "It opens the door to foreign influence and corruption, which find a facilitated access to the Government itself through the channels of party passion."

The war between England and France had made itself felt in America through vexatious interference by both belligerents with the commerce of the United States. The French Government directed the seizure of all vessels carrying supplies to an enemy's port and Great Britain ordered her war ships to stop all vessels laden with French supplies and to turn them into British ports. War sentiment ran high in America and Washington was severely criticised for his proclamation of neutrality. These aggressions on the seas were the beginnings of a series of provocations which finally led to the second war with Great Britain in 1812. During the summer of 1793 the cornerstone of the Capitol was laid. Hamilton was the recognized leader of the Federalist party, and the followers of Jefferson began to assume the name of Republicans in opposition.

The Third Congress opened in Philadelphia Dec. 2, 1793, with F. A. Muhlenberg as Speaker of the House. Thomas Jefferson resigned from the State Department owing to his opposition to the administration, and dissensions among the Federalists themselves resulted in that party's overthrow. The Eleventh Amendment to the Constitution, securing suits against suits in the United States Courts, was declared in force Jan. 8, 1798. Six ships of war were authorized—three of 44 guns and three of 28 guns. Of these the *Constitution* (44 guns), *United States* (44 guns), and the *Constellation* (38 guns) were completed. In retaliation for the English navigation acts an embargo was laid on all shipping for sixty days, and an act was passed forbidding any American vessel to supply slaves to any other nation. On account of the popular sympathy with France in her war with England it was deemed necessary to pass a neutrality law in order to avoid war with England, and John Jay was sent as envoy with a treaty. Indians in the Ohio territory, which had been giving considerable trouble, were de-

feated by Gen. Anthony Wayne. Stringent naturalization laws were passed at this time. Hamilton resigned his portfolio as Secretary of the Treasury in January, 1795. The Third Congress adjourned March 3, and the following summer Washington called the Senate in extra session and the Jay Treaty with England was ratified in spite of popular remonstrances against it. Treaties were also signed with the Ohio Indians, with Spain and Algiers.

The Fourth Congress met in Philadelphia Dec. 7, 1795, with Jonathan Dayton as Speaker of the House. The Jay Treaty was proclaimed March 1, 1796, and the House demanded the papers in relation thereto, and Washington refused. About this time Jefferson wrote the famous Mazzei letter (*q. v.*), which later severed the friendly letter between himself and Washington. The closing days of this session were enlivened by Fisher Ames' speech in the House on the Jay Treaty.

Political Complexion of Congress.—In the First Congress, the Senate was composed of twenty-six members, all of whom were Federalists; the House, of sixty-five members, was composed of fifty-three Federalists and twelve Democrats. In the Second Congress, the Senate was composed of seventeen Federalists and thirteen Democrats; and the House, of sixty-nine members, was made up of fifty-five Federalists and fourteen Democrats. In the second term of Washington's administration, the Third Congress was composed of a Senate of thirty-one members, of whom eighteen were Federalists and thirteen Democrats; the House, of 105 members, was made up of fifty-one Federalists and fifty-four Democrats. The Fourth Congress consisted of a Senate of thirty-two members, of whom nineteen were Federalists and thirteen Democrats; and a House of 105 members, composed of forty-six Federalists and fifty-nine Democrats.

At the third presidential election the Federalists voted for John Adams and Thomas Pinckney for President and Vice-President, respectively, while the Republicans voted for Thomas Jefferson and Aaron Burr. When the votes were counted one of the great faults in the method of electing the President and Vice-President became apparent. Of the 138 votes cast for President, Adams received 71, and Jefferson, 68, and, under the Constitution, Jefferson, though a candidate for President on the opposition ticket became Vice-President. This resulted in the Twelfth Amendment to the Constitution.

Constitution.—The failure of the confederation to secure for his country that unity of government which he most desired, caused Washington great anxiety; and Shay's rebellion added greatly to his disquiet. He said in a letter to Madison, in November, 1786: "It was but the other day that we were shedding our blood to obtain the constitutions under which we now live—constitutions of our own choice and making—and now we are unsheathing the sword to overturn them." He was persuaded by his friends to head the delegation from Virginia to the convention at Philadelphia in May, 1787, and there was unanimously elected president of the convention that passed the Constitution, on Sept. 17, 1787. He immediately announced the fact to Congress by letter, in which he said: "In all our deliberations on this subject we kept steadily in our view that which appears to us the greatest interest of every true American: the consolidation of our Union in which is involved our prosperity, felicity, safety, and, perhaps, our national existence." His firm

adherence to the Constitution and his influence in interpreting it were remarked by his contemporaries. In his appointments to the several offices he acted as he himself said: "With the best intentions and fullest determination to nominate to office those persons only who, upon every consideration, were the most deserving, and who would probably execute their several functions to the interest and credit of the American Union, if such characters could be found by my exploring every avenue of information respecting their merit and pretensions that it was in my power to obtain." His regard for the Constitution seems to be epitomized in his statement in his Farewell Address (page 209): "The basis of our political system is the right of the people to make and to alter their constitutions of government. But the Constitution which at any time exists till changed by an explicit and authentic act of the whole people is sacredly obligatory on all."

Finances.—When Washington took office the finances of the country were in a deplorable state. He appointed Alexander Hamilton, of New York, Secretary of the Treasury. A loan of 3,000,000 florins (about \$1,200,000) was negotiated from Holland in 1790 (see page 73), after which came Hamilton's plan for providing revenues. The first step toward the revenue was taken in the tariff bill of July 4, 1789, the preamble of which reads: "Whereas, it is necessary for the support of government, for the discharge of the debts of the United States, and the encouragement and protection of manufacturers, that duties be laid on goods, wares, and merchandise imported. Be it enacted," etc. Hamilton's plans for financing the nation and of restoring public credit involved the funding system, of which Hamilton was the originator in America, and the establishment of the Bank of the United States, the subscriptions of which were made in a single day (see page 96). Three other loans from Holland were made and are referred to by Washington with much satisfaction in his Fourth Annual Address (see page 120). The establishment of public credit was very dear to Washington. In his Second Annual Address (page 75) he expresses satisfaction at the sufficiency of the revenue provisions and adds the hope "that it will be the favorite policy with you, not merely to secure a payment of the interest of the debt funded, but as far and as fast as the growing resources of the country will permit to exonerate it of the principal itself." In his Fifth Annual Address (page 134) he says: "No pecuniary consideration is more urgent than the regular redemption and discharge of the public debt. On none can delay be more injurious or an economy of time more valuable." In his Sixth Annual Address (page 159) he again refers to this subject: "Indeed, whatsoever is unfinished in our system of public credit cannot be benefited by procrastination; and as far as may be practicable we ought to place that credit on grounds which cannot be disturbed, and to prevent that progressive accumulation of debt which must ultimately endanger all governments." His last official word on this subject is given in his Seventh Annual Address (page 177): "Congress have demonstrated their sense to be, and it were superfluous to repeat mine, that whatsoever will tend to accelerate the honorable extinction of our public debt accords as much with the true interest of our country as with the general sense of our constituents."

The attention of Congress was repeatedly called to the necessity of producing uniformity in the coins, weights, and measures

of the country, to overcome the confusion resulting from the several standards in use. By the power vested in him, Washington reduced the weight of the copper cent to one pennyweight and sixteen grains, and that of the half-cent proportionately.

Public Debt.—The public debt of the United States during the years of Washington's administration stood as follows: Jan. 1, 1791, \$75,463,476.52; 1792, \$77,227,924.66; 1793, \$80,352,634.04; 1794, \$78,427,404.77; 1795, \$80,747,587.39; 1796, \$83,762,172.07; 1797, \$82,064,479.33.

Tariff.—The tariff act of July 4, 1789, imposed duties varying from five per cent. to ten per cent. upon iron, steel, wool, carpets, and glass; and duties of from five to twenty cents per gallon on certain liquors. An act, passed on Aug. 10, 1790, "making further provision for the payment of the debts of the United States," increased the duties upon some of the dutiable imports; and both increased and added to the duties imposed on liquors. The first case of indirect taxation in the country, other than duties on imports, was the act of March 3, 1791, "repealing after the last day of June next the duties heretofore laid upon distilled spirits imported from abroad, and laying others in their stead; and also upon spirits distilled within the United States, and for appropriating the same." The duty varied from nine to twenty-five cents a gallon according to strength; with a yearly duty of sixty cents per gallon of capacity on all stills employed. Duties on nearly all dutiable goods were slightly increased by the act of May 2, 1792, "for raising a further sum of money for the protection of the frontier, and for other purposes therein mentioned." The act of June 5, 1794, "laying certain duties upon snuff and refined sugar; also upon carriages; and retail dealers of wines, etc., were required to pay five dollars a year for license." The duty on snuff made in the country was laid at eight cents a pound; and refined sugar, two cents a pound. The act of June 7, 1794, laid additional duties on goods imported and imposed a duty upon auction sales. On March 3, 1797, an act was signed imposing stamp duties on some kinds of certificates, bills of exchange, letters patent, insurance policies, promissory notes, etc.

Opposition to the payment of excise taxes by certain distillers of western Pennsylvania necessitated sending troops to the scene of disorder, and was made the subject of three proclamations by Washington. (See Whisky Insurrection, and proclamations, pp. 116, 150 and 153.)

Commerce.—The regulation of commerce in the young republic was a task of extreme difficulty, but Washington addressed himself to the development of trade and industry with such ardor that in his Seventh Annual Address (page 176) he was able to say: "Every part of the Union displays indications of rapid and various improvement; and with burdens so light as to be scarcely perceived, with resources fully adequate to our present exigencies, with governments founded upon the general principles of rational liberty, and with mild and wholesome laws, is it too much to say that our country exhibits a spectacle of national happiness never surpassed, if ever equalled?" In Hamilton's plan for raising revenue there was included a tax on spirits. This was opposed as being a tax on a necessity, but especially because suits arising out of its imposition were triable only in Pennsylvania, thus involving great trouble and expense. The protest against the tax is known as the

Whisky Rebellion. Washington bore the defiance against that law with admirable patience and issued no fewer than three placating proclamations on the subject before resorting to force. An army of 15,000 men was called out, but order was restored without their aid.

In the Second Annual Message (page 75) a warning is sounded for the need of better protection of American commerce by building a merchant marine, that the country be not dependent upon foreign bottoms for carrying its produce to other countries. Especial attention is called to the Mediterranean trade which was then interfered with by African pirates.

Slavery.—Washington inherited a great many slaves, and used them in his successful operations as a planter. He was, while President, the richest man in the United States. The slavery question assumed no political status in his time; but in 1786, in a letter to Mr. Morris, he said: "There is no man living who wishes more sincerely than I do to see a plan adopted for the abolition of slavery." In proof of the sincerity of this statement, all of his slaves were emancipated by his will.

Foreign Policy.—In his First Annual Message Washington (page 64) asked for provision to be made by Congress to enable him to conduct intercourse with foreign nations in a manner most conducive to public good. He adopted a firm policy of neutrality, and greatly embittered the Anti-Federalists by his refusal to aid the French revolutionists in their war against Great Britain; but consummated with the latter country the famous Jay Treaty. This spirit he embodied in his counsels that "nothing is more essential than that permanent, inveterate antipathies should be excluded and that in place of them just and amicable feelings toward all should be cultivated." His every act was regulated by the principle "that the great rule of conduct for us in regard to foreign nations is, to have in extending our commercial relations with them as little political connection as possible. Why by interweaving our destiny with that of any part of Europe entangle our peace and prosperity in the toils of European ambition, rivalry, interest, humor, or caprice?" So determined was the opposition against this policy that his famous proclamation of neutrality of April, 1793 (page 149), was denounced as "a royal edict and a daring assumption of power." Still Washington maintained this attitude even to the length of insisting upon the recall of M. Genet from America while using this country as a base and a means of making war upon Great Britain in that year. The seizure of American vessels by British cruisers fomented this opposition and Washington's act in closing the Jay Treaty exposed him to the severest censure.

Army.—Washington in his First Annual Address (page 57) urged attention to Army organization with the statement: "To be prepared for war is one of the most effectual means of preserving peace." He advocated the arming and disciplining of the people, the manufacture of military supplies, and the establishment of troops. In a special message (page 52) he had already advised that the experience and training of the "well-instructed officers and soldiers of the late Army be utilized in the development of an efficient militia." This experience he speaks of as a "resource which is daily diminishing by death and other causes. To suffer this peculiar advantage to pass away unimproved would be to neglect an opportunity

which will never again occur, unless, unfortunately, we should again be involved in a long and arduous war." In his Eighth Annual Address (page 194) he urges the institution of a military academy, and adds: "However pacific the general policy of a nation may be, it ought never to be without an adequate stock of military knowledge for emergencies. The art of war is at once comprehensive and complicated, it demands much previous study, and the possession of it in its most improved and perfect state is always of great moment to the security of a nation."

Education.—In his First Annual Address (page 58) Washington urges upon Congress the necessity of making provision for the promotion of science and literature. "Knowledge," he says, "is in every country the surest basis of public happiness." He suggests efficient patronage either by aiding seminaries already established or by the institution of a national university. In his Eighth Annual Address (page 194) he says: "True it is that our country, much to its honor, contains many seminaries of learning highly respectable and useful; but the funds upon which they rest are too narrow to command the ablest professors in the different departments of liberal knowledge for the institution contemplated, though they would be excellent auxiliaries. He lays particular stress upon the "education of youth in the science of government."

Veto Messages.—In the eight years of his administration Washington issued only two veto messages. The first on April 5, 1792 (page 116), refused sanction to an act regulating the apportionment of Representatives in the several states because it was contrary to the provisions of the Constitution. The second veto message was the last message sent by Washington to Congress. It refused sanction to an act amending the military establishment because of its unfairness and injustice to the bodies of troops which it might affect (page 203).

Indian Affairs.—Washington's remarkable patience and good judgment were fully displayed in his treatment of the Indians in the uprisings that occurred among the Creeks, Wabash, Five Nations, Senecas, and Six Nations. In a special message upon treaties with the Indians (page 59) he maintains that a "due regard should be extended to these Indians whose happiness in the course of events so materially depends upon the national justice and humanity of the United States." Again (page 61), he declares that it is "important that all treaties and compacts formed by the United States with other nations, whether civilized or not, should be made with caution and executed with fidelity."

Washington, George:

Anniversary of birth of, proclamation regarding celebration of, 3289.

Annual addresses of, 57, 73, 95, 117, 130, 154, 174, 191.

Addresses of Senate in reply, 59, 76, 100, 122, 134, 160, 178, 196.

Replies of President, 60, 77, 101, 123, 135, 161, 179, 199.

Addresses of House in reply, 61, 77, 101, 123, 136, 162, 179, 199.

Replies of President, 62, 79, 102, 124, 137, 163, 180, 201.

Biographical sketch of, 33.

- Birthplace of, appropriation for approaches to monument to mark, recommended, 4803.
- Centennial celebration of inauguration of, 5371.
- Proclamation regarding, 5453.
- Colors of France presented to United States on the occasion of the presentation of an address to the United States by the Committee of Public Safety in France expressive of good-will and amity towards them, 181.
- Commander-in-Chief of Armies, proclamation recommending commemoration of anniversary of surrender of commission, 4810.
- Committee appointed by House to meet, 37.
- Constitution, right to make and alter, basis of our political system, 209.
- Death of—
 - Addresses on, 287, 288, 289, 290.
 - Resolutions of Congress on, transmitted to widow of, 290.
 - Reply of, 291.
- Departments of Government to be preserved in constitutional spheres, 211.
- Discretionary power of President over nominations, removals, discussed by, 186.
- Discussion of the state of the Union by, 95, 175, 205.
- Disregard of Indian treaty by, and transactions discussed and recommendations made, 103.
- District of Columbia, boundaries of, discussed and referred to, 92, 94.
- Election—
 - For third term declined by, 205.
 - Official information of, 35.
- Farewell address of, 205.
 - To be read to Army, 3306.
 - Ordered read at birthday celebration, 3290.
- Finances discussed by, 75, 98, 121, 133, 159, 177.

 - Regarding armed force under James O'Fallon, 83.
 - Revenue laws, opposition to, 116, 150, 153.
 - Reward for persons destroying Indian town, 129.
 - Thanksgiving, 56, 171.
 - Treaty with Creeks, 72.

- Public credit, strength and security of Government rest upon, 212.
- Reception of, to be held in house of Samuel Osgood, 35, 36.
- Religion and morality indispensable supports to prosperity, 212.
- Reports of committee respecting inauguration of, 39, 40.
- Request of House for correspondence regarding foreign negotiations refused by, 186.
- Retirement from office announced by, and replies of Congress, 196, 198, 199, 200.
- Salary as President, refused by, 45.
- Seminaries of learning, establishment of, recommended by, 58.
- State of the Union discussed by, 95, 175, 205.
- States of the Union, alliances between, discouraged by, 209.
- Statue of, to be—
Erected at Caracas, Venezuela, 4716, 4760.
- Placed in Capitol, 881, 1170, 1910.
- Thanksgiving proclamations of, 56, 171.
- Faasimile, 66.
- Unity of Government—
Best preserved by local self-government, 208.
- Essential to our liberty, 207.
- Veto messages of—
Apportionment of Representatives, 116.
- Military establishment, 203.

Washington.—One of the Pacific coast states—nickname, "Chinook State." It extends from lat. 45° 40' to 49° north, and from long. 117° to 124° 44' west. It is bounded on the north by the Strait of San Juan de Fuca and British Columbia, on the east by Idaho, on the south by Oregon (partly separated by the Columbia River), and on the west by the Pacific Ocean. Area, 69,127 square miles. The Cascade Range traverses the State from north to south, west of the center. There are extensive forests, particularly in the western part, and the eastern portion produces large quantities of wheat. Gold and silver are also found in paying quantities. Salmon fishing and shipbuilding are important industries.

The country was visited as early as 1592. The mouth of the Columbia River was explored in 1792 by Captain Gray, and further explorations were conducted by Lewis and Clark in 1805. John Jacob Astor founded a trading post at the mouth of the Columbia River in 1811. The State was formed from part of the Oregon region, which was claimed by both England and America for many years. It was organized as a Territory by an act of Congress passed March 2, 1853, and admitted to the Union Nov. 11, 1889 (5469).

The arid region east of the Cascade Mountains requires irrigation for the production of full crops. During 1904, 178,000 were included in irrigation systems, and the Federal reclamation act (q. v.) provides for further irrigation as the lands are sold.

The Mount Rainier, Olympic, Washington, Wenaha, and Priest Forest Reserves have a combined area of 12,162 square miles. The total timber area is put at 34,000 square miles. The cut of the Washington lumber mills in one year was more than four billion feet, and the shipments by sea more than a billion feet. The trees are mostly fir, cedar and spruce.

Statistics of agriculture collected for the last Federal census, place the number of farms in the State at 56,192, comprising 11,712,235 acres, valued, with stock and improvements, at \$637,543,411. The average value of land per acre was \$44.13, against \$11.68 in 1900. The value of domestic animals, poultry, etc., was \$48,865,110, including 402,120 cattle, valued at \$12,193,465; 280,572 horses, \$29,680,849; 12,185 mules, \$1,776,297; 266,135 swine, \$1,674,927; 475,555 sheep, \$1,931,170; poultry, \$1,367,440. The yield and value of the field crops for 1911 was: Corn, 30,000 acres, 855,000 bushels, \$675,000; wheat, 2,230,000 acres, 50,661,000 bushels, \$35,969,000; oats, 281,000 acres, 14,528,000 bushels, \$6,538,000; rye, 8,000 acres, 176,000 bushels, \$141,000; potatoes, 59,000 acres, 9,440,000 bushels, \$6,419,000; hay, 400,000 acres, 960,000 tons, \$11,520,000.

The principal industry of the State is lumber and timber, with a capital of \$40,953,816, employing 28,023 wage-earners, and turning out \$49,572,512 worth of finished product from \$16,325,594 raw material. The flour and feed industry is next in importance, with a capital of \$6,490,492, using \$12,771,390 worth of raw material, which 613 wage-earners convert into finished product valued at \$14,663,612. The fisheries of the State employ nearly 3,000 boats and 4,954 persons. The value of the annual catch is \$1,161,669. The State revenues for the biennial period ending Sept. 30, 1910, were \$13,381,687; expenditures, \$12,944,263. The bonded debt is \$1,006,024. The tax rate is \$31 per \$1,000, and the assessed valuation is \$789,912,979.

The State oyster bed reserves cover 13,683,000 acres, and salmon and many other fish are abundant.

Cool worth \$7,679,801 was mined in 1907, of gold 12,689 fine ounces, silver 84,000 fine ounces, and 122,263 pounds of copper.

The industrial census of 1905 returned 2,751 manufacturing establishments, with a capital of \$96,952,621, employing 48,858 persons in converting \$69,166,165 worth of raw material into finished goods to the value of \$128,821,667, consisting of lumber, flour, meats, fish, machinery and dairy products. There were in 1907 2,950 miles of steam railway and 330 miles of electric line. The population in 1910 was 1,141,990.

The number of manufacturing establishments in Washington having an annual output valued at \$500 or more at the beginning of 1915 was 3,830. The amount of capital invested was \$277,717,000, giving occupation to 78,387 persons, using material valued at \$136,609,000, and turning out finished goods worth \$245,327,000. Salaries and wages paid amounted to \$63,207,000.

- Washington City.**—The capital of the United States. It is situated in the District of Columbia, on the Potomac River, at the head of navigation, in latitude 38° 53' N. and longitude 77° 1' W. The site for the capital was chosen in 1790 and the seat of government was established at Washington in 1800. Washington is one of the best planned cities in the world; in addition to the usual rectangular arrangements of streets it has a number of fine wide avenues radiating in all directions from both the Capitol and the White House. At their intersections are circles laid out as small parks and most are lined with pleasant shade trees. It contains the principal public buildings in which the business of the Government is transacted.
 - Besides the Capitol (*q. v.*) the city contains the official residence of the President, buildings devoted to the various Departments of Government, the Congressional Library, the Smithsonian Institution, National Museum, Naval Observatory, Corcoran Art Gallery, National Soldiers' Home, Washington Monument, and many other objects of national interest. The White House, or Presidential residence, was first occupied by John Adams in 1800. The public buildings were burned by the British in 1814, and more imposing ones erected subsequently. (See also District of Columbia and Capital of United States.) Population (1910), 278,718, of which 191,532 were white and the residue colored people.
- Washington City** (see also District of Columbia):

- Washington City Canal, improvement of, referred to, 3579.**
- Washington City (D. C.), Capture of.—**
After the flight of the Americans from the field of Bladensburg Aug. 24, 1814, the British army advanced to the plain between the present Congressional Cemetery and the Capitol. Cockburn and Ross, with 200 men, rode into the city in the evening to destroy the public buildings. The unfinished Capitol, containing the Library of Congress, was fired. The President's house, the Treasury building, the arsenal, and barracks for 3,000 men were next burned. In a few hours nothing but the blackened walls remained of the public buildings, the Patent Office

alone having been spared. Only such private property as was owned or occupied by persons offensive to the British was destroyed. The President and his chief advisers fled to different points in Virginia and Maryland.

Mrs. Madison, the wife of the President, when advised of the defeat at Bladensburg, sent away the silver plate and other valuables from the Presidential mansion and at great personal risk saved from destruction the full-length portrait of Gen. Washington by Gilbert Stuart, which now adorns the Blue Room of the White House. With her sister and brother-in-law she was then conveyed to a place of safety beyond the Potomac. Commodore Tingey, in command of the navy-yard, burned the property under his control to prevent its falling into the hands of the British. The bridge over the Potomac was also destroyed. The total value of property destroyed by British and Americans in Washington was estimated at \$2,000,000. On the night of the 25th Ross and Cockburn withdrew from Washington.

Washington Headquarters Association.

—The purpose of this Association is to preserve the old mansion on 160th Street, near Amsterdam Avenue, New York City, which was at one time, in the War of the Revolution, the headquarters of Washington. The property is owned by the city and is under the care and direction of the Knickerbocker, Mary Washington, Colonial and Manhattan Chapters of the Daughters of the American Revolution. It is open daily to the public.

Washington Monument.—An obelisk-shaped tower of white marble erected at Washington, D. C., in honor of George Washington. The cornerstone was laid July 4, 1848, but soon the work languished and then stopped entirely. Work was resumed in 1876, and the monument was finally completed Dec. 6, 1884. It is 555 feet high and fifty-five feet square at its base. The interior walls are built of granite and contain many memorial stones from foreign nations. The entire cost of the monument was \$1,187,710.

See photograph of, and appreciation, frontispiece, Vol. XVII.

Washington Monument:

Construction of, discussed and recommendations regarding, 4430, 4532, 4579.

Dedication of, Government employees to participate in, 4879.

Washington, Treaty of.—Many treaties have been negotiated at Washington, but the one usually referred to as the treaty of Washington was negotiated between the United States and Great Britain at that city in 1871. After thirty-four meetings commissioners of the United States and England concluded a treaty between the two countries to settle pending questions. It was ratified June 17, 1871, and proclaimed to be in force July 4.

To adjust the Alabama claims it was agreed to submit them to a tribunal of arbitration, to meet at Geneva, Switzerland, and to consist of members appointed by each of the parties and by three neutral nations. Concerning the difficulties with regard to the fishing privileges of the United States vessels on the coast of British America, the treaty adjusted the differences on the basis of the reciprocity treaty of 1854, giving to persons of each nation the right of fishing on the coasts of the other. There was a mutual conces-

sion of privileges, such as that of transportation from one place to another in one country across the territory of the other without the payment of duties. Lake Michigan, the lower course of the St. Lawrence, and certain rivers in Alaska were opened to the people of both nations. It was also agreed to submit the disputed boundary line between the British possessions and the State of Washington to the arbitration of the German emperor, who, on Oct. 21, 1872, rendered a decision awarding the island of San Juan and the group of which it forms a part to the United States. (See also Alabama Claims; Geneva Tribunal.)

Washington, Treaties of. (See also Alabama Claims; Ashburton Treaty):

Wasp, The.—An American warship of eighteen guns, built at Washington in 1806. Oct. 13, 1812, the *Wasp* left the Delaware for the West Indies, under Capt. Jacob Jones, with 137 men. Five days later she fell in with six merchantmen under convoy of the British brig *Frolic*, eighteen guns and 110 men. The *Wasp* attacked, and in less than an hour the *Frolic* struck her colors after a loss of 90 men. The fight was in a heavy sea. Within two hours the *Wasp* and its prize were captured by the British frigate *Polestar*, seventy-four guns, and the Americans were sent to Bermuda as prisoners. In 1814 the United States built a naval vessel at Newburyport and christened it the *Wasp*. It was a ship-rigged sloop of war and carried twenty-two guns and 160 men. Leaving Portsmouth May 1, 1814, under Capt. Johnson Blakely, she ran into the English Channel to look for British merchantmen. June 28 she encountered the British sloop *Reindeer*, eighteen guns and 118 men. In less than half an hour of fierce fighting the *Reindeer* struck her colors, having sustained a loss of 25 killed and 42 wounded. The American loss was 27 in all. Sept. 1, after a fight of about two hours, the *Wasp* captured the British brig *Arion*, eighteen guns. Oct. 9, in lat. 18° 35' north, long. 30° 10' west, she spoke and boarded the Swedish brig *Adams* and took off Lieut. McKnight and a master's mate of the United States ship *Essex*, on their way from Brazil to England. The *Wasp* was never heard from again.

Wasp, The:

Engagement of, with the *Frolic*, 506. Mentioned, 6318.

Refused permission to enter ports of Paraguay by Brazilian blockade commander, 3883.

Watch-Dog.—A term of praise applied to a legislator who opposes extravagant appropriations,—usually termed "Watch-Dog of the Treasury."

“Watchful Waiting.”—A term used by President Wilson with reference to our attitude in the Mexican question in his administration, 1908.

Water-Dog.—A pet name, or term of endearment, applied to sailors and other persons long experienced in life on the water.

Water Rights, policy of the Federal Government in imposing conditions in granting, 7723.

Water Supply. (See Irrigation.)

Water Witch, (The, fired upon by Paraguayan fort, 2980.

Commissioner sent to demand compensation, 3050.

Demands of, acceded to, 3091.

Discussed, 3195.

Naval force sent to Paraguay, 3050.

Waterliet Arsenal, N. Y., gun factory to be established at, 5374.

Wautauga Association.—June 2, 1769, a company of North Carolina hunters formed an organization to settle the territory to the west of the Cumberland Mountains, which had been opened by the treaty of Fort Stanwix in the previous year. Their settlements were on the Wautauga, one of the tributaries of the Tennessee River, within the limits of what is now the State of Tennessee. The settlers framed a code of laws, which was signed by each of them, and the body politic thus formed was called the Wautauga Association. The tyranny of Governor Tryon, of North Carolina, caused many of the independent-spirited settlers of that Colony to cast their lot with the Wautauga Association. In 1784, at a convention held in Jonesboro, a separate state government was organized under the name of Franklin. (See also Franklin.)

Waxhaw (S. C.) Massacre.—After the capture of Charlestown, Sir Henry Clinton sent a detachment of 300 men under Col. Tarleton to disperse Col. Buford's command of 380 men, who, hearing of the fall of Charleston, had retired to a point near the North Carolina line. May 29, 1780, Tarleton, having overtaken Buford at the Waxhaw River, made a furious charge, while the Americans were awaiting flags of conference, believing hostilities suspended. Many of the Americans threw down their arms and begged for quarter; 113 were killed on the spot, 150 so badly wounded that it was impossible to move them, and only 53 were taken prisoners. Col. Buford and about 100 infantry and a few horses escaped. The British lost but 5 killed and 15 wounded.

Wea Indians. (See Indian Tribes.)

Weather Bureau.—Since 1870 the Federal Government has maintained a service having for its object the forecasting of weather conditions throughout the United States. Although originally designed for the benefit of navigation alone, an ever-broadening recognition of the practical utility of such a service has necessitated its continued extension in the interest of both agriculture and commerce. During the first twenty years of its development the work was conducted by the Signal Corps of the Army, under the direction and control of the War Department, but the demand for a strictly scientific bureau, unhampered by regulations of a military character, resulted in a reorganization of the service in 1891, and the

establishment of the present Weather Bureau as a branch of the Department of Agriculture.

In the act providing for this reorganization, approved Oct. 1, 1890, the functions of the Bureau are thus summarized: “The Chief of the Weather Bureau, under the direction of the Secretary of Agriculture, shall have charge of forecasting the weather; the issue of storm warnings; the display of weather and flood signals for the benefit of agriculture, commerce, and navigation; the gaging and reporting of rivers; the maintenance and operation of seacoast telegraph lines, and the collection and transmission of marine intelligence for the benefit of commerce and navigation; the reporting of temperature and rainfall conditions for the cotton interests; the display of frost, cold-wave, and other signals; the distribution of meteorological information in the interest of agriculture and commerce, and the taking of such meteorological observations as may be necessary to establish and record the climatic conditions of the United States, or are essential for the proper execution of the foregoing duties.”

Observations and Forecasts.—To the general public the Weather Bureau is probably best known through the medium of its daily forecasts and weather maps. These forecasts are based upon simultaneous observations of local weather conditions taken daily at 8 a. m. and 8 p. m. seventy-fifth meridian time, at about 200 regular observing stations scattered throughout the United States and the West Indies, and upon similar reports received daily from various points in other parts of the Northern Hemisphere. Each of the Weather Bureau stations is operated by one or more trained observers, and is equipped with mercurial barometers, thermometers, wind vanes, rain and snow gauges, and anemometers, and many of them with sunshine recorders, barographs, thermographs, and other devices which make a continuous automatic record of the local weather conditions and changes. The results of the twice-daily observations are immediately telegraphed to the central office at Washington, D. C., where they are charted for study and interpretation by experts trained to forecast the weather conditions that may be expected to prevail during the following thirty-six to forty-eight hours.

A complete telegraphic report includes the following data: Temperature, pressure (reduced to sea level), precipitation, direction of wind, state of weather, current wind velocity, maximum or minimum temperature since last observation, and kind and amount of clouds, with the direction of their movement. From these data the forecaster, by comparison with preceding reports, is able to trace the paths of storm areas from the time of their appearance to the moment of observation, and approximately determine and forecast their subsequent courses and the occurrence of other weather conditions.

Weather services similar to that of the United States are maintained by the Canadian and Mexican governments, and, by a system of interchange, daily reports are received from a number of stations in those countries. Daily observations are also received from the Azores, Iceland, the Faroe Islands, Great Britain, Germany, France, Portugal, European and Asiatic Russia, the Philippines, Hawaii, and Alaska, so that the field represented by the daily reports extends over practically the entire Northern Hemisphere.

The system for the collection and distribution of telegraphic reports of observa-

tions is so arranged that all of the principal stations in the United States receive 8 a. m. reports from a sufficient number of other stations to represent the general weather conditions over a considerable portion of the country.

Forecast centers are also established at Chicago, Ill.; New Orleans, La.; Denver, Colo.; San Francisco, Calif.; and Portland, Ore. At the first three, morning forecasts only are prepared and distributed; at the last two both morning and evening forecasts. The Chicago district comprises the upper Mississippi Valley and the Northwest; the New Orleans district, Louisiana, Texas, Arkansas, and Oklahoma; the Denver district, Utah, Colorado, New Mexico, and Arizona; the San Francisco district, California and Nevada; and the Portland district, Washington, Oregon and Idaho. Forecasts are issued at Washington, D. C., for all portions of the United States not included in the aforementioned districts.

Distribution of Forecasts.—Within two hours after the morning observations have been taken the forecasts are telegraphed from the forecast centers to more than 2,300 principal distributing points, whence they are further disseminated by telegraph, telephone and mail. The forecasts reach nearly 135,000 addresses daily by mail, the greater part being delivered early in the day, and none later, as a rule, than 6 o'clock p. m. of the day of issue, and more than 3,500,000 telephone subscribers, mainly in the rural districts, receive the forecasts by telephone within an hour of the time the prediction is made. This system of forecast distribution is wholly under the supervision and at the expense of the Government, and is in addition to and distinct from the distribution effected through the press associations and the daily newspapers. The rural free mail delivery system and rural telephone lines afford means of bringing within the benefits of this system a large number of farming communities which before it was impracticable to reach with the daily forecasts. The independent rural telephone lines are being utilized to their fullest extent and this plan of distribution has been enlarged to cover the entire telephone service of many states.

The Weather Map.—The weather map is mailed immediately after the morning forecast is telegraphed. On this map the salient features of current weather conditions throughout the country are graphically represented, accompanied by a synopsis of these conditions, in addition to which complete reports from all the observing stations are presented in tabulated form. In order that all sections of the country may receive weather data, maps or bulletins containing the data in tabulated form are issued from about one hundred of the larger stations. The maps issued at Washington and other forecast centers contain detailed forecasts for the respective forecast districts, while other station maps and bulletins contain forecasts only for the localities in which they are distributed.

Climatological Service.—Although the 200 regular observing stations, each representing about 21,000 square miles of territory, furnish sufficient data upon which to base the various forecasts, observations at many intermediate points are necessary before the climatology of the United States can be properly studied. This need has given rise to the establishment of an important and interesting feature of the Weather Bureau in its Climatological Service, which is divided into forty-four local sections, each section, as a rule, covering a single state, and having for its center a regular observ-

ing station. These centers collect temperature and rainfall observations from more than 3,600 co-operative stations. During the crop-growing season (from April to September, inclusive) each section also receives weekly mail reports of weather conditions from numerous correspondents. During the same season the Central Office at Washington issues weekly a National Weather Bulletin, containing a series of charts graphically illustrating current and normal conditions of temperature and rainfall for the entire country, and a general summary of the weather for each state. There is issued at the Central Office every Tuesday during the winter a publication entitled *Snow and Ice Bulletin*, which shows the area covered by snow, the depth of snow and the thickness of ice in rivers, etc., as indicated by a large number of reports of observations made on the afternoon of the day preceding the issue of the Bulletin. This publication is of especial value to those interested in the winter wheat crop, to ice dealers, and to the manufacturers of rubber goods and all other articles the sale of which is largely affected by the presence or absence of snow and ice. During the growing season in the cotton, corn, wheat, sugar and rice-producing sections, designated centers receive telegraphic reports of rainfall and daily extremes of temperature for publication in bulletin form, each local center receiving the reports from all others.

Special Publications.—By the assistance of several thousand co-operative observers, many of whom have maintained local records for long periods, the Weather Bureau endeavors to collect special local data and thus perfect the records that are needed for the study of the relations between climate and agriculture, forestry, water resources, and other kindred subjects.

In the utilization of these meteorological data the Weather Bureau employs a staff of officials of high scientific ability who are not only engaged in the practical work already mentioned, but are also occupied in the elaboration of those fundamental principles which must necessarily play an important part in the development of meteorology and its kindred sciences. The results of these investigations are presented to the public through regular and special reports.

Among the publications of the Weather Bureau the following are worthy of special notice:

(a) *The Monthly Weather Review*, which has been published regularly since January, 1873. It contains elaborate meteorological tables and charts showing the weather conditions for the month over the United States and neighboring countries. The tables contain the details of observations made at the regular and co-operative stations of the Weather Bureau. The arrangement of the material, however, as well as the discussion of the meteorological data is according to the natural drainage areas of the country, instead of by states.

(b) *The Bulletin of the Mount Weather Research Observatory*, a publication devoted to the discussion of the scientific investigations of atmospheric phenomena, especially to those that are being carried on at the research station located at Mount Weather.

(c) A vast amount of climatological data is being prepared in a series of separates, each treating of the principal climatic features of a limited area, the complete set—106 in all—to cover the entire United States. Besides the general discussion and climatological tables, these reports will con-

tain valuable notes furnished by the Geological Survey concerning the water power of the districts under consideration.

(d) The bulletins, published occasionally and now numbering about sixty, that contain the larger reports made by the experts of the service.

The Library of the Weather Bureau contains about 28,000 books and pamphlets, consisting principally of technical books on meteorology and allied sciences and of published climatological data from all parts of the world. It is available to all Weather Bureau officials and to students of meteorology generally, who either consult it personally or through correspondence. In addition to its general card catalogue it keeps up to date a catalogue of the meteorological contents of the principal scientific serials of the world.

The annual report of the Chief of the Bureau presents a full summary of climatic data for the United States.

Instruments and Apparatus.—The apparatus used at Weather Bureau stations for recording weather conditions is largely the result of improvements devised by the Instrument Division, to which is intrusted the care of all standards. The kites, meteorographs, self-registering instruments, and other forms of apparatus devised by the Weather Bureau are favorably known throughout the world.

The United States Government does not manufacture the instruments and apparatus employed in its meteorological work. These, in general, are purchased under formal annual contracts with responsible manufacturers, from whom instruments and apparatus of the standard Weather Bureau patterns may be procured by private parties.

Forecasts and Warnings.—The extent to which the work of the Weather Bureau affects the daily life of the people and becomes a factor in their vocations and business enterprises, already very great, is increasing yearly. Of the warnings mentioned those of storms and hurricanes, issued for the benefit of marine interests, are the most valuable.

Storm warnings are displayed at nearly 300 points along the Atlantic, Pacific, and Gulf coasts and the shores of the Great Lakes, including every port and harbor of any considerable importance, and so nearly perfect has this service become that scarcely a storm of marked danger to maritime interests has occurred for years for which ample warnings have not been issued from twelve to twenty-four hours in advance. The reports from the West Indies are especially valuable in this connection, as they enable the Bureau to forecast with great accuracy the approach of those destructive hurricanes which, during the period from July to October, are liable to sweep the Gulf and Atlantic coasts. The sailings of the immense number of vessels engaged in our ocean and lake traffic are largely determined by these warnings, and those displayed for a single hurricane are known to have detained in port on our Atlantic coast vessels valued with their cargoes at more than \$20,000,000.

The warnings of those sudden and destructive temperature changes known as cold waves are probably next in importance. These warnings, which are issued from twenty-four to thirty-six hours in advance, are disseminated throughout the threatened regions by means of flags displayed at regular Weather Bureau and sub-display stations, by telegraph, telephone and mail service to all places receiving the daily forecasts and to a large number of special addresses in addition. The warnings issued for a single cold wave of exceptional severity

and extent resulted in saving more than \$3,500,000 through the protection of property from injury or destruction.

The warnings of frosts and freezing weather are also of immense value, particularly to the fruit, sugar, tobacco, cranberry, and market gardening interests. The early truck-raising industry, so extensively carried on in the regions bordering on the Gulf and South Atlantic coasts and in Florida, and which has increased so greatly in the last few years is largely dependent for its success on the co-operation of the Weather Bureau in this particular, and the growers of oranges and other fruits in Florida and California have also received great benefit therefrom. The value of the orange bloom, vegetables and strawberries protected and saved on a single night in a limited district in Florida through the instrumentality of warnings of freezing weather sent out by the Bureau was reported at over \$100,000.

The commerce of our rivers is greatly aided, and lives and property in regions subject to overflow are protected, by the publication of the river stages and the issue of river and flood forecasts based on reports received from about 500 special river and rainfall stations. On one occasion live stock and other movable property to the estimated value of about \$15,000,000 were removed from regions in the lower Mississippi Valley that were afterward inundated, as a result of warnings issued by the Bureau a week in advance of the flood.

The value of the service was even more strongly emphasized during another great flood from March to June in the Mississippi watershed. The flood in the upper Mississippi watershed was one of the greatest in its history, while in many portions of the lower watershed the stages were the highest ever known. Yet, notwithstanding the enormous volumes of water the forecasts and warnings were accurately verified, both as to location, stage and date. Warnings were issued from four days to three weeks in advance and in no single instance did the stage that was forecast differ from that actually recorded by more than four-tenths of a foot. The average difference was about two-tenths of a foot. The value of property saved by the Weather Bureau warnings could not be accurately computed, but probably exceeded that mentioned in the preceding paragraph.

Special Benefits Derived from Reports and Warnings.—While the value of the Bureau's reports and warnings to many interests is so obvious as scarcely to need more than the brief mention already given, there are numerous special applications of the information to individual pursuits and industries that might not be suspected. An account of some of these might lead to an increased use of the data in quarters where the possibility of their application has not yet been recognized, and additional detail of the manner in which the information is utilized in a number of enterprises will doubtless be found of interest.

The railway and transportation companies make continued use of the forecasts in all of their shipments. Perishable products are protected against temperature extremes by icing or heating, as conditions may require.

The uses made of temperature forecasts in the cities are more varied than is generally supposed. With notice of an approaching cold wave greenhouses are closed and boilers fired. Fire plugs, exposed water mains, and general plumbing are protected; large stock yards drain their mains; gasoline engines are drained; work in concrete is stopped; merchants curtail advertisements

or direct attention largely to cold weather articles; coal dealers supply partial orders to all customers instead of full orders to a few.

In the agricultural districts the frost and cold wave warnings are invaluable to the trucker and fruit grower, especially in the spring, when tender vegetables are protected by coverings of paper, cloth or soil.

Marine Service.—Meteorological information pertaining to the oceans is collected from about 2,000 co-operative observers on vessels of war and commerce and other sailing craft. Many vessels equipped with wireless telegraph send messages twice daily to the stations at San Francisco, Cal., and Portland, Ore., for use in the forecast work at those points. The data thus obtained are plotted on daily synoptic charts for the use of the Hydrographic Office, of the Navy. Eight stations are maintained on the ocean coasts for vessel reporting and the announcement of wrecks, marine disasters and other casualties. In one year these stations reported the passing of more than 30,000 vessels.

Employees.—The conduct of the regular observation stations outside of Washington requires the constant services of about 530, and the business of the central office in Washington of about 185 employees. The annual disbursements of the Bureau amount to about \$1,600,000. Original appointments are to the lowest grades, and upon certification by the Federal Civil Service Commission; promotion depends upon ability. Applicants for positions should communicate with the Civil Service Commission at Washington.

Weldon Railroad (Va.), Seizure and Destruction of.—June 21, 1864, during Grant's operations against Petersburg and Richmond, an attempt was made to capture the Petersburg and Weldon Railroad, an important supply line for the Confederate army. The Second and Sixth Corps, under Generals Birney and Wright, cut the telegraph wires three miles south of Petersburg, but were repulsed with a loss of seven guns and many prisoners. Another and successful effort was made on Aug. 18, 1864. Lee had drawn heavily from his forces in Petersburg to resist a threatened attack on the north side of Richmond. The Fifth Army Corps, under Gen. Warren, moved from its position at the extreme left of Grant's army and struck the railroad four miles below Petersburg. Mahone's division of Lee's army tried to force Warren back, but he held his position, with a loss, after three days' fighting, of 4,543 men. By the 24th seven miles of railroad were destroyed. Aug. 25 the Second Army Corps and Gregg's cavalry, while at Reams Station destroying the railroad, were assailed. The fighting was desperate and a part of the Union line gave way after losing 5 guns and 2,400 men, three-fourths of whom were missing.

West India Company.—In 1621 the States-General of the United Netherlands chartered the Dutch West India Company. Among other important grants it received from the Government the exclusive right of trading with a large part of the coasts of America and Africa, planting colonies building forts, employing soldiers and fleets, making treaties, and attacking the colonies and commerce of Spain and Portugal. This company planted the colony of New Netherlands in the United States, as well as the Dutch settlements in Brazil, Guiana, the West Indies, and on the Gold Coast of Africa. In 1674 the company relinquished New Netherlands to the English. Its powerful fleets took many rich prizes on the coasts of Spanish and Portuguese America. In 1624 the projector of the Dutch West India Company obtained a charter from Gustavus Adolphus, of Sweden, granting special trading privileges in America. Under its auspices settlements were made along the Delaware River.

West Indies.—The area of the West Indies is about 65,000 square miles, a little more than half that of the United Kingdom. They extend from about 27° N. latitude to 10° N. latitude. There are three independent republics—Cuba, Haiti and Santo Domingo, with an area of 72,200 square miles and a population of 3,200,000. Islands under foreign rule are: United States, 3,750 square miles; British, 2,300 square miles; Danish, 140 square miles; French, 1,350 square miles; Netherlands, 430 square miles; Venezuelan, 90 square miles.

The Bahamas consist of about 3,000 islands and reefs, of which twenty are inhabited. There is practically no running water, though there are ample underground supplies.

South of Puerto Rico the islands form a deeply submerged mountain ridge separat-

ing the Caribbean Sea from the Atlantic Ocean. Mont Pelée, in Martinique, and the Soufrière, in St. Vincent, have been the scene of disastrous eruptions.

West Virginia.—One of the central group of states. Nickname, "The Pan Handle State"; motto, "Montani semper liberi" ("Mountaineers are always freemen"). It extends from lat. 37° 12' to 40° 38' north, and from long. 77° 40' to 82° 35' west, an area of 24,170 square miles. West Virginia is bounded on the northwest by Ohio (separated by the Ohio River), on the north by Maryland and Pennsylvania (separated from the former by the Potomac), on the east and south by Virginia, and on the west by Kentucky (separated by the Big Sandy River). The state is hilly or mountainous and contains abundance of timber and coal, being, in fact, one of the leading states in the production of the latter. Of the manufacturing interests the iron and steel industry, confined almost entirely to Wheeling, is the most important.

West Virginia was originally a part of Virginia. When that state adopted the ordinance of secession, April 17, 1861, many of the people of the western and northwestern parts of the state claimed that they were not to be bound by that action. A convention was called in 1861, which resolved not to recognize the State officers who were in opposition to the National Government. This convention elected Francis H. Pierpont governor of Virginia and called a legislature to meet at Wheeling. It also voted to erect a new state, called Kanawha, and the legislature which was called by the convention voted to recognize the new state. It was admitted to the Union as the State of West Virginia June 19, 1863 (page 3368).

The forest area of West Virginia, estimated at 18,400 square miles, covers 73 per cent. of its surface.

Statistics of agriculture collected for the last Federal census, place the number of farms in the State at 96,685, comprising 19,026,412 acres, valued with stock and

improvements, at \$314,738,540. The average value of land per acre was \$20.65, against \$12.60 in 1900. The value of domestic animals, poultry, etc., was \$43,336,073, including 620,288 cattle, valued at \$15,860,764; 179,991 horses, \$18,583,381; 11,717 mules, \$1,339,760; 328,188 swine, \$2,087,392; 910,360 sheep, \$3,400,901, and poultry, \$1,628,700. The yield and value of the field crops of 1911 was: Corn, 707,000 acres, 18,170,000 bushels, \$13,991,000; wheat, 238,000 acres, 2,737,000 bushels, \$2,792,000; oats, 110,000 acres, 2,420,000 bushels, \$1,355,000; rye, 17,000 acres, 187,000 bushels, \$168,000; potatoes, 44,000 acres, 1,980,000 bushels, \$2,059,000; hay, 648,000 acres, 428,000 tons, \$8,560,000; tobacco, 15,000 acres, 11,250,000 pounds, \$900,000. In 1910 the State ranked second in the amount of coal produced, taking this position away from Illinois on account of the strike among the mine-workers in the latter state. Pennsylvania is the only state producing more coal than West Virginia. The output of 1910 was 61,671,000 short tons, valued at \$56,665,061. The output of 1911 fell back to 60,500,000 short tons. The state revenues for the fiscal year 1910-1911 were \$5,379,699; expenditures, \$5,183,416; balance on hand Sept. 30, 1911, \$1,611,620. The property valuation was \$1,119,828,173, and the tax rate 84 cents per \$100. The State has no bonded debt.

The number of manufacturing establishments in West Virginia having an annual output valued at \$500 or more at the beginning of 1915 was 2,749. The amount of capital invested was \$175,727,000, giving employment to 79,278 persons, using material valued at \$110,033,000, and turning out finished goods worth \$193,512,000. Salaries and wages paid aggregated \$51,378,000.

The business interests of the state suffered serious losses by an extensive coal miners' strike in 1914, and state-wide prohibition decreased the public revenue by \$1,125,000.

West Virginia (see also Clarksburg):

Admission of, into Union, proclaimed, 3368.

Unlawful combinations in, discussed and proclamation regarding, 4399, 4424.

Westcott, Hampton, lieutenant in Navy, nomination of, and reasons therefor, 1126.

Western European Division, State Department.—This division was organized in 1909 by Secretary of State Knox. It has charge of other than administrative matters in Great Britain and Colonies, France, Belgium, Spain, Portugal, Switzerland, Norway, Sweden, Morocco, the Congo, the Netherlands, Luxemburg, Denmark and Liberia. This division of the work of the State Department (q. v.) is under the supervision of the third assistant secretary of state (q. v.).

Western Reserve.—The charters of most of the original Colonies granted territory extending from the Atlantic to the Pacific Ocean. After the Revolution the unsettled western portions were ceded to the General Government. When Connecticut made her cession the state reserved a tract of land between the forty-first parallel of latitude and Lake Erie as a foundation for her school fund. It extended 120 miles westward from the Pennsylvania boundary line,

and contained 3,666,291 acres, afterwards included in Ohio. An act of Congress in 1800 authorized the President to deed to Connecticut the title to this Western Reserve, to quiet titles of settlers, on condition that the state surrender all claims to its jurisdiction. On the admission of Ohio as a state, Connecticut lost all interest in the territory. The tract was settled largely by Connecticut people.

Western Territory, instructions to governor of, regarding employment of militia against Indians, 6306.

Whale Fisheries, papers for vessels engaged in, referred to, 1774.

Whig.—A name taken by the political party in the American Colonies which favored the Revolution, as opposed to the Tories, who advocated adherence to the mother country. The name was first used in Great Britain to designate those Scotch Covenanters whose rebellion in 1699 led to the fixing the name upon any opponents of the court. The term is generally used in America, however, refers to the political party in the United States which began to develop toward the end of John Quincy Adams's administration, favoring a national bank, a protective tariff, a system of internal improvements, and in general holding to a latitudinarian construction of the Constitution. They were at first called National Republicans, and those who opposed them were known as Democratic Republicans. After the defeat of Adams, in 1828, Henry Clay became the leader of the National Republicans.

The party took the name of Whig in 1834, and in 1836, failing to unite on any candidate of their own for the Presidency, Martin Van Buren was elected by the opposition. In 1840 the Whigs elected William Henry Harrison. After the death of Harrison they quarreled with Vice-President Tyler, who had succeeded Harrison as President and had vetoed the fiscal measures passed by the Whig Congress. In 1844 they nominated Henry Clay for the Presidency, but he was defeated by James K. Polk. The annexation of Texas, the Mexican War, the Wilmot Proviso, and other phases of the slavery question caused serious dissensions in the Whig party, but they preserved their power for another term by nominating a military candidate in the person of Zachary Taylor. He was elected, but the disintegration of the Whig party had begun.

Many of the northern Whigs became Free Soilers, and by 1856 Republicans, while many temporarily joined the American or Know-Nothing party. Large numbers of the southern Whigs became Democrats. The factions of the old party united and nominated Winfield Scott for President in 1852, but he was defeated by Franklin Pierce. A small number of Whigs formed the Constitutional Union party and nominated Bell and Everett in 1860. Besides those already mentioned, the chief leaders of the party in the north were Webster, Winthrop, Choate, Seward, Greeley, and Weed; in the south, Mangum, Badger, Bell, Berrien, Forsyth, Stephens, Toombs, Prentiss, and Crittenden, and in the west, Giddings, Ewing and Corwin.

Whisky. (See Liquors—Malt, etc.)

Whisky Insurrection.—A revolt against the enforcement of a Federal excise law by the people of four counties of western Pennsylvania.

The first bill for an excise law was beaten in Congress June 21, 1790. The project

was revived the following year, and the first excise law was passed March 3, 1791. The Senators from Pennsylvania were instructed by their legislature to oppose the law, "established on principles subversive of peace, liberty, and the rights of citizens." In Pennsylvania the law was violently opposed by one Bradford and his followers and condemned by more peaceable and reflecting citizens, following the lead of Albert Gallatin, afterwards Secretary of the Treasury, minister to France, envoy extraordinary to England, etc., and William Findley and John Smiley, members of Congress. Numerous meetings were held to protest against this law, which bore with particular force upon the settlers of western Pennsylvania because of their isolated position, distance from the seaboard, and the scarcity of money in that region. In response to repeated protests Congress on May 8, 1792, passed an act reducing the duties on whisky, but, on account of the threatening attitude of some of the settlers, empowering the President to use militia in suppressing disturbances within a state, the agents of the Government sent to collect the excise having been maltreated and driven from the country and the marshals refused office room and assistance in serving writs, President Washington, by a proclamation of Sept. 15, 1792 (116), called upon the citizens to abandon their unlawful proceedings. Instead of complying, resistance to the service of writs continued and the officers were tarred and feathered. Aug. 1, 1794, a mass meeting of 7,000 armed insurgents was held on Braddock's Field, a county judge presiding, with Albert Gallatin as secretary and Bradford as the leading spirit. An emergency had now arisen. Governor Mifflin, of Pennsylvania, having declined to take the initiative, a certificate of the existence of an insurrection was obtained from a Federal judge, and on Aug. 7, 1794, President Washington again called upon the insurgents to disperse and retire peaceably to their homes on or before Sept. 1, 1794 (150). This warning was unheeded and was followed by a third proclamation on Sept. 25, 1794 (153). A requisition for 15,000 militia was issued to the governors of Pennsylvania, Virginia, Maryland, and New Jersey. A Federal commission of three and a State commission of two preceded the troops with offers of amnesty on full submission. Bradford urged armed resistance, Gallatin counseled submission. Washington accompanied the troops, which were in command of Governor Lee, of Virginia, as far as Carlisle. Alexander Hamilton, then Secretary of the Treasury, accompanied the expedition to the scene of disorder. The troops arrived in the rebellious district early in November. After giving the people time to obey the President's proclamation, Lee's force arrested many of those who failed to accept the proffered amnesty. Bradford and the more violent leaders escaped. Those captured were tried, convicted, and later pardoned by the President. The first show of Federal force had suppressed the insurrection. (See Illustration opposite 162.)

Whisky Ring.—A conspiracy of distillers and United States officials formed in St. Louis, Mo., in 1872 to defraud the Government of internal-revenue taxes. By 1874 the ring had attained national proportions,

with branches in Milwaukee, Chicago, Peoria, St. Louis, Cincinnati, New Orleans, San Francisco, and Washington. Distillers who refused to enter the combination were trapped into technical violations of the revenue laws, and when made liable to seizure they were given their choice between ruin and surrender to the ring. The combination became so powerful that when Secretary Bristow ordered a transfer of supervisors, which would have thrown the ring into confusion, their agents at Washington procured a countermand of the order from President Grant. After diligent effort evidence was obtained against the distillers and revenue agents. Upon this evidence the Government seized \$3,500,000 worth of property and procured indictments against 238 persons. It was shown that the Treasury had been defrauded of \$1,650,000 between July 1, 1874, and May 1, 1875. When the papers were laid before President Grant he indorsed them with orders to "let no guilty man escape." The most important convictions were those of John A. Joyce, special revenue agent; John McDonald, supervisor, and William O. Avery, chief clerk in the Treasury Department.

White House, The.—The site for the erection of the White House, or the "President's Palace," as it was termed on some of the earlier maps, was selected by President Washington and General L'Enfant when they laid out the city of Washington in 1792. The corner stone was placed in that year.

The plans were procured by competition, which gave the award to James Hoban, a distinguished young architect from Dublin, afterward identified for many years with the architectural work of the capital city. By the architects of today his design is considered to surpass anything of a similar style since constructed in this country. The White House was so called after the home of Martha Washington in Virginia, the name being particularly appropriate, because of the fact that the free-stone of the edifice is painted white.

According to the original plan, the building was 160 feet long. It is built in the English Renaissance style. The North and South porches, constructed from designs made by Latrobe in 1803, were added twenty-five years after the first occupancy of the house; and in Jefferson's time and under his direction, terraces were built extending 150 feet east and west of the mansion. The West Terrace, enclosed in glass and otherwise disguised, became in time the Conservatory so dear to the heart of the Washington sight-seer. The East Terrace was removed about the time of the Civil War, but, happily, both of these were restored and beautified during the general reconstruction of the house in 1902.

The White House, when President Adams came to take possession of it in 1800, was neither finished nor furnished, and its surroundings were rough and unattractive, little or no effort having been made to reclaim the adjacent country from muddy and ragged woodland. From time to time Congress made small appropriations for the adornment of the Executive Mansion, and this money was spent more or less wisely by the several administrations in their efforts to make the official residence comfortable. An appropriation of fifty thousand dollars was made to President Madison after the fire of 1814, during the occupation of Washington by the British, for the purpose of refurnishing; but despite the expenditure of more than two million dollars upon the furnishing and decorating of the building dur-

ing the first three-quarters of a century of its existence, it contained but few articles of value at the time of the remodeling under President Roosevelt. President Roosevelt also restored the official title "White House" to the edifice, which had been called for several previous administrations merely the "Executive Mansion."

It was originally intended that the public offices should be separate from the President's home; and previously to 1814, the Executive Departments occupied small detached buildings in the White House grounds. But of necessity the President's privacy was invaded by the business of his office, until finally, during the Civil War, President Lincoln set aside the second story of the East Wing for official business purposes. This invasion limited the accommodations for comfortable living and introduced a degree of publicity into the family life of the Chief Executive which was far from agreeable. But these and many other discomforts were at last removed in 1902-3 by the construction of the new office building and by the remodeling of the entire old building. There is now little business of an official nature conducted in the house proper, and the East Wing has been reclaimed for domestic purposes. With the exception of the outside walls, scarcely any part of the building has been left unchanged. The old flooring, long in a dangerous condition, has been replaced by new, supported upon steel beams. The latest improvements in heating, lighting, and plumbing have supplanted the old-fashioned arrangements tolerated by many administrations. In this process, it is to be regretted that many nooks and crannies of historic interest have been obliterated, but it is comforting to know that the alterations will preserve in good condition and for a much longer period the main structure and the chief beauties of the old house.

The East Room.—In viewing this magnificent apartment it is difficult to realize that it was at one time used by Mrs. John Adams as a drying-room for the family linen. The East Room was not finished until 1836, and a bare, bleak place it must have been in those early days! In former times state banquets were held there, but in more recent years it has been used chiefly for public receptions. During the administration of President Arthur this room was redecorated and refurnished, and afterward no changes of importance were made until 1902, when, with the rest of the building, it underwent almost complete transformation. Before this period the walls were hung with historical portraits, among them the Gilbert Stuart portrait of Washington, saved from the fire of 1814 by Mrs. Madison; but these were removed, as were also the pillars and beams of the old room, to give place to the present beautiful scheme of decoration. The walls and ceilings are now of white; the spaces over the doors and windows contain low-relief panels, each illustrating one of the fables of Æsop. The ceiling is most elaborate, but of delicate design; from each of its three panels hang the splendid cut-glass chandeliers, which have taken the place of the former larger, but less artistic ones. Four beautiful mantels of colored marbles are features of the recent remodeling. The draperies are of rich yellow silk.

The Blue Room.—It is in this famous apartment that the President receives his guests upon state occasions. The room is considered the handsomest in the house in point of decoration, and also in its beautiful proportions. The floor is a fine, highly polished parquet, and the walls are covered with a heavy steel-blue silk, with yellow em-

broderies at the ceiling and wainscot. In the pattern of this embroidery and in the decoration of the ceiling and of the window hangings, the star is used with graceful effect. Each of the three windows is surmounted by a golden eagle. A feature of the room is the fine marble mantel with its supports representing sheaves of arrows tipped with gold bronze. When receiving in the Blue Room, the presidential party stands in front of the windows, but formerly it occupied the north end of the room. A heavy rope of silk encloses a passageway for the procession of guests, who must pass from the Red Room into the presence of the host, and thence into the Green Room. This change is one of the many that were brought about by the re-arrangement of the entire premises. During the administration of John Adams, the Blue Room was used as a sort of vestibule, its convenient location making it available for this purpose.

The Red Room.—In early times this was the anteroom to the Library and the Cabinet Room. It adjoins the State Dining Room, and by recent changes has been turned into a smoking room, except when it is required for service on receiving days. It is then used as formerly, in conjunction with the series of state parlors. Its walls are covered with dark red velvet and are hung with historical portraits. Its marble mantel is one of those which formerly adorned the State Dining Room,—the other being placed in the Green Room.

The Green Room.—In previous days the Green Room was the family dining-room. The present Private Dining Room was then used for state dinners. As in the Blue Room, the walls of the Green Room are hung with velvet; here, however, the color is an exquisite silvery green. Some of the original paintings which are reproduced in the White House Gallery of Portraits of the Presidents also adorn the walls of this room.

State and Private Dining Rooms.—The State Dining Room was enlarged in 1902 by the addition of a corridor from which the private stairway led. This necessitated the removal of that portion of the stairs. The room now measures forty by fifty feet and will accommodate as many as one hundred guests at table. The walls are of panelled oak, and the window draperies of heavy green velvet. Flemish tapestries of the sixteenth century are a feature of the room, which is further decorated by trophies of the chase in American hunting-grounds arranged around the beautifully carved cornice. The furniture is of red mahogany; it includes two tables,—the larger crescent in shape, and the smaller a rounded oblong.

An interesting feature of the furnishings of the State Dining Room is the complete service of china and cut glass, manufactured from special designs made exclusively for the White House and selected by Mrs. Roosevelt from a number submitted to her for approval. The design is simple but rich in effect, and the china is of the purest texture, the whole having been very costly. The glass, which includes many pieces, is of the best American cut.

The Private Dining Room has been remodelled in a style essentially colonial, with an attractive color scheme of ivory white and red. The ceiling is domed and the window hangings are of red velvet. The furniture in this apartment harmonizes with the general plan of decoration, it also being distinctly colonial in design.

The Library.—The room, which is oval in shape, is situated on the second story of the Executive Mansion and was once used as the President's office, but is now converted into a private sitting room. It was during Presi-

dent Fillmore's administration that the Library was first planned, an appropriation being made for that purpose. The low book-cases lining the walls contain over seven thousand volumes, principally literature of a historical and classical character, and chiefly of Mrs. Fillmore's own selection. She greatly deplored the lack of books in the White House and urged the need of a more extensive Library. However, it did not progress as it should have done, and is not catalogued.

The Executive Office.—From the time of President Lincoln's administration, the business of the White House began to encroach seriously upon the living quarters. The discomfort and inconvenience resulting from this combination of public and private life under one roof—and that a roof of very limited dimensions—had long been realized. Plans to relieve the situation were occasionally brought forward, but nothing was accomplished until 1902, when the reconstruction of the entire establishment took place. It was then that the one-storied and basement building was erected at the end of the West Terrace for the accommodation of the Executive Offices. The architects have placed the structure most effectively in its relation to its surroundings. It contains a Reception Room, the President's suite of rooms, the offices of the President's Secretary and Assistant Secretary, telegraph and telephone rooms and several other offices. The building is comparatively small and will probably give place to a larger one in the course of time. (See Illustrations, 130, 240, 288, 711, 823, 1231, 1613, 6788.)

White Leagues referred to, 4251. (See also Klu-Klux-Klan.)

White Plains (N. Y.), Battle of.—After the battle of Harlem Heights, in which Washington was enabled to maintain his ground in the face of the British attack, Gen. Howe's war ships advanced up the East River and landed troops at Frogs Point (now Throgs Neck). His purpose was to gain a position in Washington's rear and thus cut him off from communication with his army outside of New York. About 4,000 British were sent to dislodge some 1,400 Americans who were intrenched on Chatterton Hill. After a short and sharp skirmish the Americans fell back in good order to the main body of the army, having lost but little more than half as many as their opponents. The American loss is variously stated at from 125 to 200, while the lowest official estimate of the British loss places it at 231. The following night Washington retired to a much stronger position about five miles north and Howe withdrew to Dobbs Ferry.

White Slavery.—A term applied to the enticing and incarceration of girls for immoral purposes. Exposures in Great Britain, France and the United States led to an international conference in Paris in 1902, which resulted in a treaty, afterwards ratified by nearly all the civilized governments. In March, 1910, Congress adopted what was known as the Bennett Law, making the importation of women for immoral purposes a penal offense, and, in June, 1910, Congress adopted what was known as the Mann Law, making interstate transportation of women for immoral purposes a penal offense. The constitutionality of the Mann Law was vigorously attacked, but was sustained by the Court.

Whitehall, N. Y., proclamation granting privileges of other ports to, 2540.

Wichita Indians. (See Indian Tribes.)

Wilderness (Va.), Battle of.—The rank of lieutenant-general was revived on March 2, 1864, and on the 9th of that month it was conferred upon Gen. Grant, who was given the command, under the President, of all the armies of the United States. The plan of campaign agreed upon between Grant and Sherman was to make a simultaneous advance against Lee's army in Virginia and that of Johnston in Georgia. Meade was left in control of the army of the Potomac and Sheridan placed in command of the cavalry in Virginia. Gen. B. F. Butler was made commander of the Army of the James, consisting of 38,648 men and 90 guns. May 4, 1864, Grant crossed the Rapidan with the Army of the Potomac, aggregating on May 1, according to the report of the Secretary of War, 120,380 in men and 316 guns. The Ninth Corps, 20,780 in number, was subsequently added. Lee lay on the south bank of the Rapidan with 63,984 men. The Confederate position was in the midst of a wilderness of scraggy oak, sassafras, hazel, and pine. It is a region of worn-out tobacco fields, and lies directly west of the battlefield of Chancellorsville. It was not Grant's intention to fight Lee there, but the Confederate attack early on the 5th compelled it. Lee gained ground in the two days' fighting. The battle was a bloody bush fight. More than 200,000 men fought in a vast jungle. Grant's loss amounted to over 20,000, of whom 5,000 were made prisoners. The Confederate loss was about 10,000. Grant now resolved to turn Lee's left flank and put his army between the latter and Richmond. On the night of the 7th the Federal army took up the march toward Spottsylvania Court-House. On the morning of the 8th of May the men of the opposing forces arrived almost at the same moment at the Court-House. Then occurred the great battle of Spottsylvania (q. v.). (See illustration opposite 3421.)

"Wild Cat."—The currency issued by a "Wild Cat Bank." (See "Wild Cat Banking.") During Jackson's administration and the period following, up to the institution of the National Bank System by Congress, state banks and private banks issued paper money with but little security back of them—practically mere promises to pay. This lack of soundness and stability in the banking methods of the time worked great injury to the commercial interests in the United States, and greatly retarded progress. The approbrious name "Wild Cat Banking" was applied by those seeking to reform the banking method.

William and Francis, The, satisfaction to be allowed by Great Britain for detention of, 2111.

Williamsburg (Va.), Battle of.—As soon as it was discovered that the Confederates had withdrawn from Yorktown (May 5, 1862), a column was sent in pursuit. It

came up with the retreating rear guard at Williamsburg. The Confederates had been reinforced from Johnston's army at Richmond. Longstreet's division, having passed beyond the town, retraced its steps to resist the attack. Hooker, of Heintzelman's division, and Smith, of Keyes's, bore the brunt of the assault, fighting from morning till late in the afternoon, vainly calling for reinforcements. The arrival of Kearny's division about 4 p. m. caused the Confederates to retire toward Richmond. The Federal loss was 2,228 men, of whom 456 were killed. The Confederate loss was 1,560, of whom 288 were killed.

Williamson's Farm (S. C.), Battle of.—One of the minor skirmishes of the Revolutionary War in the South and the first disaster to the British arms after the capture of Charleston, July 12, 1780. Capt. Houk, with 115 British and Tories, was sent from the garrison at Rocky Mount to collect militia and drive back the Americans. Thomas Sumter, with 75 men, surprised and captured them. Capt. Houk was killed in the fight.

Wilmington, The, attempts of, to silence batteries at Cardenas, Cuba, 6302, 6316.

Wilmot Proviso.—President Polk, in a special message Aug. 8, 1846 (2309), made a request of Congress for money to adjust the boundary between Mexico and the United States by the purchase of certain Mexican territory outside of Texas. In accordance with this request a bill was introduced into the House appropriating \$2,000,000 for the purpose. David Wilmot, a Democrat from Pennsylvania, offered an amendment which provided "that neither slavery nor involuntary servitude shall ever exist in any part of said territory, except for crime, whereof the party shall first be duly convicted." This was the Wilmot Proviso. The bill as amended passed the House, but failed in the Senate. Early the next year another bill passed the House, appropriating \$3,000,000 for the same purpose, with the Wilmot proviso, but the amendment was omitted in the Senate.

David Franklin Houston.

Secretary of Commerce—

William C. Redfield.

Secretary of Labor—

William Bauchop Wilson.

The Democratic National Convention met in Baltimore, Md., June 25, 1912, and on July 6, on the forty-sixth ballot, chose Woodrow Wilson, Governor of New Jersey, as the nominee of the party. Other prominent candidates before the convention were Champ Clark, of Missouri; Jud-

son Harmon, of Ohio, and Oscar W. Underwood, of Alabama.

Platform.—The convention reaffirmed their devotion to the principles of Democratic government formulated by Thomas Jefferson; declared that the high Republican tariff was the principal cause of the unequal distribution of wealth, and favored immediate downward revision of the rates. President Taft was denounced for his veto of the Farmers' Free List bill, and the Republican party was charged with having been faithless to its pledges of 1908. The people were appealed to for support in a demand for a tariff for revenue only. Other planks declared a private monopoly indefensible and intolerable; favored enforcement of the criminal as well as civil law against trusts and their officials; prevention of holding companies, of interlocking directors, stock watering, and discrimination in prices; legislation to restore to the Sherman Antitrust law the strength of which it was deprived by interpretation; the unhampered exercise by the states of their reserved rights; favored an income tax and the popular election of Senators; publicity of campaign contributions; presidential primaries and a single term for the President; supervision of railroad, express, telegraph and telephone companies; opposed the establishment of a central bank, and favored the revision of the banking laws; favored rural credits, and national aid to state and local roads; equal justice to capital and labor; conservation of national resources; exemption from tolls of American ships on the Panama Canal; fostering the growth of our merchant marine; independence for the Philippines; establishment of a parcel post and extension of rural free delivery.

Opposition.—The Republican party nominated President Taft for a second term, and Ex-President Roosevelt withdrew from the convention and became the nominee of the Progressive Republicans. The Socialists nominated Eugene V. Debs, the Socialist Labor Arthur E. Reimer and the Prohibitionists Eugene W. Chafin for President. A notable feature of the campaign was the split in the Republican party caused by the candidacy of Ex-President Roosevelt, who was extremely popular with the people, but opposed by the politicians and some leading newspapers.

Vote.—The popular vote showed Wilson 6,293,019; Roosevelt, 4,119,507; Taft, 3,484,956; Debs, 901,873, and Chafin, 207,928. The combined Republican vote of Roosevelt and Taft (7,604,463) being 1,311,444 more than the vote for Wilson, thereby showed Wilson's success to have been due to the split in the Republican party. The popular vote of Wilson over Roosevelt, however, was 2,173,512. When the electoral vote was counted it showed Wilson, 435; Taft, 8, and Roosevelt, 88.

Tariff.—April 8, 1913, Wilson convened Congress in extra session for the purpose of revising the tariff law in accordance with the "duty laid upon the party at the recent elections" (page 7871). The Sixty-third Congress consisted of 96 Senators, of whom 52 were Democrats; and 435 Representatives, of whom 290 were Democrats. The tariff bill introduced by Mr. Underwood, of Alabama, embodied the essential ideas of the Democratic platform—that duties should be imposed primarily to produce revenue for the government without thought of protection, and that such duties should be established by legislation that would not injure or destroy legitimate industry. One hundred items were added to the free list, including acids, salt, bread, meat, flour and meal, potatoes, paper, manufactures

of leather, lumber and iron and certain machinery. Duties were imposed on seventy articles previously free.

The customs receipts for 1912 were \$304,597,035, which was an average of more than 40 per cent. of the value of the imports. The estimated receipts under the new act for the fiscal year were \$266,701,000, an average of less than 30 per cent. of the estimated value of the imports. It was predicted that the deficit under the Underwood tariff would reach nearly \$70,000,000. (See Import Duties.) To make up the deficiency an income tax on individuals and corporations was added to the law by authority of the Sixteenth Amendment. (See Income Tax.)

Bills were passed limiting securities issues, creating a trade commission and exempting farmers' and laborers' unions under the Sherman law.

Banking Law.—The National Monetary Commission in 1912 recommended the establishment, under federal charter, of a central reserve bank with branches in fifteen districts. The Democratic Congress rejected the principle of a central bank and embodied the opposite idea of decentralization in the Owen-Glass Federal Reserve Currency law. This divides the country into twelve districts, with a federal reserve national bank in each, to which all national banks are required to subscribe. These district banks were placed under the supervision of a Federal Reserve Board. Besides a general banking business, authority to issue currency, make loans on farming lands and an elaborate system of discounting were notable features of the law. (See Currency Law.)

Mexican Revolution.—The revolution existing in Mexico at the time of his election attracted the early attention of President Wilson, and in a special message of Aug. 27, 1913, he issued a warning and reassurance of friendship. He refused to recognize Huerta as president of the Republic and sent as special agent John Lind, formerly Governor of Minnesota, to demand immediate cessation of fighting and a free election with Huerta eliminated. (Page 7885.)

The rebellion in that country continued and led to abuse of Americans and other foreigners and the destruction of their property in Mexico. Finally, in April, 1914, following a series of flagrant insults to the dignity of the United States (page 7934), Wilson ordered the occupation of Vera Cruz by United States forces. (See also Mexico.)

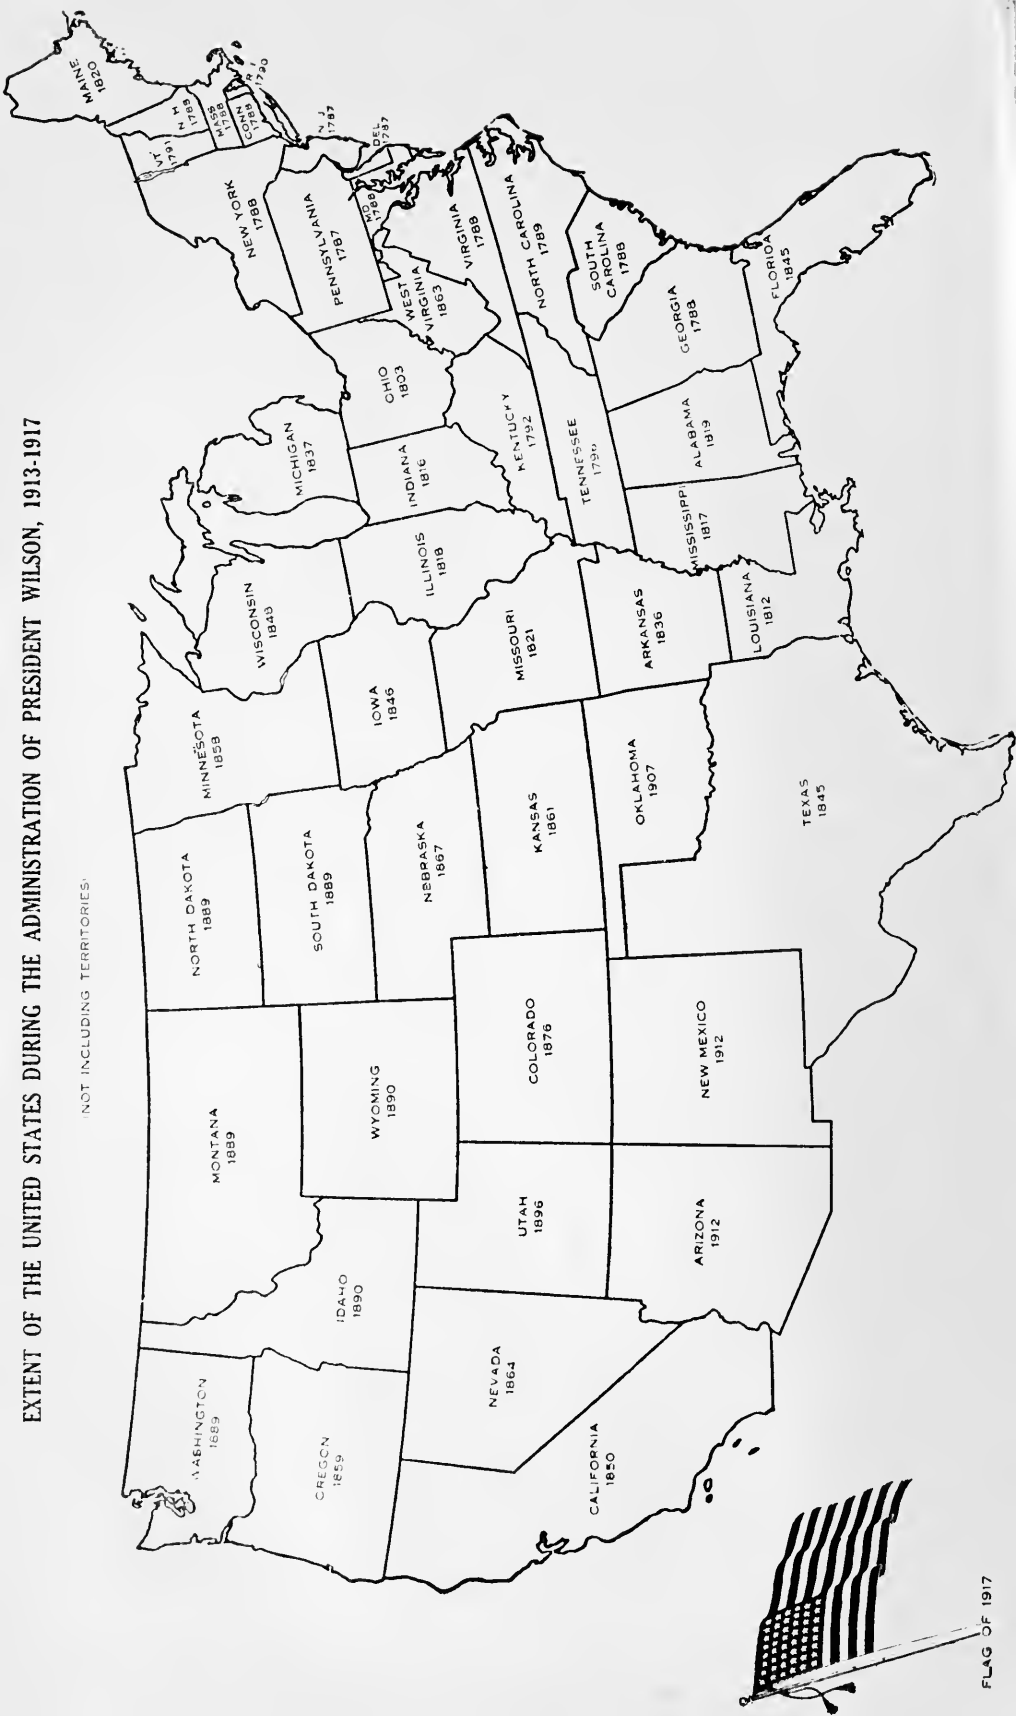

The early months of his administration were marked by threatened complications with Japan on account of an alien land law passed by the State of California, which Japan claimed was in violation of her treaty with the United States (page 7875).

Panama Canal.—When the Panama Canal was nearing completion the question of exempting American shipping from tolls became a matter of wide public discussion. Great Britain held that such exemption was a violation of treaty. Mr. Wilson asked Congress (page 7933) to repeal the exemption clause.

European War Situation.—The first duty of the President upon the breaking out of hostilities between nations friendly to our government is to declare American neutrality. This duty devolved upon Wilson in 1914, and was promptly performed. The first European war declaration was dated July 28, 1914, and on August 4, Wilson issued a proclamation of neutrality, naming five powers (page 7969), which was repeated as other countries became involved. This was followed on August 18th, by an

EXTENT OF THE UNITED STATES DURING THE ADMINISTRATION OF PRESIDENT WILSON, 1913-1917

(NOT INCLUDING TERRITORIES)

appeal to the people at large (page 7978), in which he said: "It will be easy to excite passion and difficult to allay it. Those responsible for exciting it will assume a heavy responsibility; responsibility for no less a thing than that the people of the United States, whose love of their country and whose loyalty to its government should unite them as Americans all bound in honor and affection to think first of her and her interests, may be divided in camps of hostile opinions, hot against each other, involved in the war itself in impulse and opinion, if not in action."

In September the German Emperor sent a letter to President Wilson protesting against the use of dumdum bullets by French and English troops. The French President denied the German charge, and protested against Germany's offenses against the laws of nations. A commission of Belgians submitted charges of brutalities against the Germans. These efforts on the part of the belligerents evoked only assurances of friendly neutrality. A formal offer of mediation was made by Wilson and formally acknowledged by the warring powers.

In his message to the Sixty-third Congress at its second session Wilson said (page 8015): "There is reason to fear that the time is near, if it be not already at hand, when several of the countries of Europe will find it difficult to do for their people what they have hitherto been always easily able to do—many essential and fundamental things. At any rate, they will need our help and our manifold services as they have never needed them before; and we shall be fit and ready, more fit and ready than we have even been. . . . Here are the markets which we must supply, and we must find the means of action. . . . We have the resources, but are we fully ready to use them? And if we can make ready what we have, have we the means at hand to distribute it? We are not fully ready, neither have we the means of distribution. . . . To speak plainly, we have grossly erred in the way in which we have stunted and hindered the development of our merchant marine. And now we need ships, we have not got them." This was in advocacy of the administration measure for a government owned steamship line, but the measure failed of passage.

Early in 1915 a British Order in Council forbade the shipment of foodstuffs to Germany and this was followed by Germany's declaration of a war zone about the British Isles. February 19th, Wilson sent protests to France, Germany and Great Britain against the interruption of neutral maritime commerce (pages 8055, 8059). Germany replied with an offer to modify her orders providing foodstuffs in neutral vessels destined for the civilian population of Germany were allowed unimpeded passage into German ports (page 8057). The allied nations refused to accede to this. The interference with American trade by the Anglo-French allies and the menace of the German war zone caused much uneasiness in the United States, and Wilson's diplomacy was put to a severe test. (See his correspondence with the European powers, pages 8435 and following.

One of the first effects of the European war was the collapse of the financial markets. The stock exchanges were flooded with securities. The Paris Bourse closed July 28, followed by London and New York on the 31st. The disorganization of foreign trade caused a marked decline in customs revenue, the deficit in August amounting to \$10,629,538, as compared with August, 1913. Wilson addressed a special message to Congress recommending a war revenue

tax (page 7980), urging immediate provision for raising \$100,000,000 additional revenue through internal taxes. "New revenue must be found," he said (page 7980), "to avoid the withdrawal of the Treasury balance on deposit in national banks."

The tragic sinking of the British steamship *Lusitania* in the war zone off the coast of Ireland in May, 1915, called forth another emphatic protest to Germany against the submarine operations against merchant vessels. (Page 8062.)

During the controversy with Germany over the safety of neutral ships on the high seas, Secretary of State Bryan resigned from the Cabinet. Robert Lansing, of New York, the ranking official of the department, was appointed to the position. The Austrian Ambassador, Dumba, and two attaches of the German legation were recalled at the request of the Department of State, and protests were repeatedly made to the belligerent powers against interference with American shipping and attacks upon merchant vessels. Germany and Austria both agreed to respect neutral vessels and non-combatant lives so far as possible. Great Britain continued to intercept and seize all merchandise which might be useful to Germany, though such goods were consigned to neutral countries. Mails between the United States and European countries were also held up and examined.

Unofficial Advisors.—President Wilson appointed, April 2, 1915, the twelve members of the Advisory Committee on Aeronautics authorized by the naval appropriation act. The appointees are to serve without pay.

Secretary Daniels June 4, 1915, abolished the system of Naval Aids created by a Republican predecessor in office and substituted a council to be known as the Secretary's Advisory Council, to be composed of the Assistant Secretary of the Navy, the Chief of Naval Operations, the chiefs of the various bureaus, and the Commandant of the Marine Corps. The new Naval Cabinet will meet every Thursday.

An Advisory Board of sixteen civilian American inventors with Thomas Edison as chairman was announced Sept. 12. The board was made up chiefly of members of scientific societies whose members deal with those branches of science on which the navy is thought to depend for inventions.

Treasury Statement.—The fiscal year closed June 30, 1915, with an excess of ordinary disbursements over receipts of \$35,864,381, and an excess of all disbursements over all receipts of \$64,165,416 in the United States Treasury (including Panama Canal expenditures). The total amount from income tax collected during the year was \$79,828,675, of which \$36,303,525 was collected on the last day of the fiscal year. The total treasury receipts for the year amounted to \$696,598,730, as compared with \$737,462,640 in 1914. The total disbursements were \$760,762,147. The net balance in the general fund at the close of the fiscal year was \$82,025,716. The returns for the last day of the fiscal year greatly changed the financial condition. The receipts for June 30 were \$44,715,151, of which \$860,236 was from customs, \$7,469,581 was from ordinary internal revenue; \$36,303,525 was from income tax, and \$81,809 was from miscellaneous sources. The reduction in the deficit was caused by the large collection of income tax during the year. This satisfactory condition, it was said, was largely due to the fact that the income tax came up to the estimate of \$80,000,000 made by the Commissioner of Internal Revenue. This sum was sufficient to cover the large falling off in the cus-

toms revenues due to the cutting off of imports because of the European war. Internal revenue for the year, including the special war tax, amounted to \$335,828,377, as against an estimate of \$359,000,000 and receipts a year ago of \$380,613,000. Customs for the year totaled \$209,268,107, as against an estimate of \$220,000,000 and receipts a year ago of \$292,128,527.

Foreign Relations.—During the years 1915 and 1916 President Wilson was kept busy with diplomatic correspondence relating to the protection of American persons and property at sea from attacks by German U-boats and the interference with United States mails by British cruisers, and the blacklisting of American merchants. His principal notes and correspondence on these questions are to be found between pages 8055 and 8081.

The vexatious condition of affairs in Mexico caused Wilson to revoke the order of President Taft forbidding the exportation of arms and munitions to that country. (Page 7929.) It was thought that by encouraging the Carranza faction, which seemed to be predominant, that peace and order might sooner be restored. Carranza proved unable to pacify the turbulent rebels, and after an incursion by Villa bandits into New Mexico and a fatal raid on Columbus, Wilson, by agreement with Carranza, dispatched a punitive expedition into Mexico to capture Villa. (See Mexico.) This proved futile, and additional recruits failing to respond to the authorized increase in the army (page 8130), President Wilson, June 18, 1916, called out the militia of forty-four states to protect the border line between the two republics. This was followed during August by the appointment of a joint commission of Mexicans and Americans to settle the differences between the two countries.

Wilson's protests against attacks by German U-boats upon unarmed merchantmen without warning and without providing for the safety of passengers, drew from Germany a pledge to modify her ruthless warfare on the high seas. (Page 8127.) His protests to Great Britain against the seizure of American mails and the blacklisting of American merchants elicited a document justifying Britain's course. (Page 8165.)

Preparedness.—President Wilson's speeches on preparedness were the most widely discussed of any of his utterances with the possible exception of his notes to Germany. In his tour of the middle west, ending February 4, 1916, he frequently spoke of the possibility of this country's being drawn into the world war. At Pittsburgh he announced that "new circumstances have arisen which make it necessary for America to defend itself." At Cleveland he uttered this ominous note of warning: "We have interests that are being slowly drawn into the maelstrom of this tremendous upheaval." In Milwaukee he declared that "there may, at any moment, come a time when I cannot preserve both the honor and the peace of the United States." He told his Chicago hearers that "no man can competently say whether the United States will be drawn into the struggle or not." The people of Topeka, Kansas, heard him say that America "is not going to abide the habitual and continued neglect of the rights of her citizens, even though it might be necessary to use force to vindicate them." And in Kansas City he said that for the first time in the history of the nation the railroads were being called in council to make effective for military purposes the arteries of the country, and business men were being consulted upon the use to be made in the event of war of the nation's resources. In Des Moines he took issue both

with the men who are "preaching war" and with the extreme pacifists. The pacifists, he said, were making a fundamental mistake, "not about the sentiment of America, but about the circumstances of the world." All of America's dangers "come from the contacts with the rest of the world; and those contacts are going to be largely determined by other nations and not by ourselves." His St. Louis audience was told that this country should have the greatest navy in the world.

Great crowds greeted the President everywhere, and press reports agreed that there was much enthusiasm, even in St. Louis and Milwaukee, where the large pro-German elements were believed to be strongly against increased military preparations. In Topeka the enthusiasm was less than elsewhere, although the crowds were large. One result of the tour was to stir up political interest, despite the fact that politics was not mentioned. A few days after the tour ended the President gave formal permission for the use of his name on the Ohio ballot, which was tantamount to a declaration that he was in the race for re-election.

Peace Proposals.—President Wilson in a speech, May 27, 1916, before the League to Enforce Peace, held in Washington, outlined in general terms the basis on which the United States would undertake to suggest or initiate a movement for peace in Europe as follows: First, such a settlement with regard to their own immediate interests as the belligerents may agree upon. We have nothing material of any kind to ask for ourselves and are quite aware that we are in no sense or degree parties to the present quarrel. Our interest is only in peace and its future guarantees. Second, a universal association of the nations to maintain the inviolate security of the highway of the seas for the common and unhindered use of all the nations of the world and to prevent any war begun either contrary to treaty covenants or without warning and full submission of the causes to the opinion of the world—a virtual guarantee of territorial integrity and political independence.

Finally, in December, 1916, President Wilson sent a formal note to each of the European belligerents suggesting that tentative peace terms be submitted by each, to the end that an agreement might be reached. This note will be found in substance in the article European War, in the *Encyclopædic Index*.

Re-election.—President Wilson was formally notified of his renomination for the Presidency before a throng of fifteen thousand at Shadow Lawn, Long Branch, N. J., September 2, 1916, and in his acceptance said the Democrats would stand on their record of progressive achievements.

In the first speech of his campaign for re-election, President Wilson, September 23, declared that the interests of the public justified the enactment of the Adamson eight-hour law to avert the railroad strike. (See Railroads.) In the course of his address, September 30, at Shadow Lawn, President Wilson charged:

That Republican victory meant embroiling the nation in the European war; That the Republicans represent the vested interests in Mexico; That the political use made of foreign affairs is hampering negotiations with other nations of great moment, including those with Mexico; That "those who want to inject into our politics the politics of Europe" are behind the Republican party; That Mark Hanna's lieutenants are back in power in the G. O. P. He made a strong bid for the Progressive vote.

The result of the 1916 election showed

the President a popular choice by a small plurality. (See Presidential Elections.)

Mexican Policy.—In Mexico Wilson has been actuated by a keen feeling for the rights of man. He has conceded to the Mexican people every opportunity consistent with due respect for the rights of the rest of the world to work out their own problems in their own way. In translating his convictions into action, however, he has fallen into serious inconsistencies. He has wavered between impulsive action and passive drifting. He brought the United States to the verge of war through a demand for reparation which, after all, was never granted. He seized the custom house and city of Vera Cruz at a cost of seventeen American dead in order to prevent the landing of arms which, a few days later, were quietly disembarked at another port without a shadow of protest. The exhaustion of one faction and the encouragement of the other by open show of sympathy on the part of the United States (see page 8090) finally led to the recognition of Carranza as provisional President of Mexico.

The recognition of Carranza, after two years of inaction, defended by Mr. Wilson as "watchful waiting," led to the belief that at last the right man had been found to head an effective government. The man the administration had been watching and the time it awaited had arrived. No further proof of Carranza's ability to pacify the rebellious tribesmen was given than the determination of the United States to consider him responsible for the preservation of order. This was not even strong enough to induce the administration to rescind the warning it had issued to all Americans to keep out of Mexico, or enter at their peril.

January 11, 1916, a party of American and English mining engineers and workmen left Chihuahua for Cuahuiraichi to resume operations on the Kansas City Smelting and Mining Company's mines, owned by American capitalists. When about fifty miles west of Chihuahua the train was waylaid by bandits and robbed, and nineteen Americans were taken off and murdered. The administration immediately demanded of Carranza the apprehension and punishment of the outlaws, and members of Congress demanded intervention in Mexico to protect Americans and other foreigners.

The interval between the last session of the Sixty-third and the opening of the Sixty-fourth Congress was one of much anxiety to the country. The revolution in Mexico dwindled into insignificance in comparison with the war in Europe. Efforts were made at home and abroad to involve the United States in the almost universal conflict. Calm restraint of the clamorous jingoes, who demanded action by the United States over every incident of the war that they could magnify into national insult or injury, coupled with the magnanimous spirit of conciliation shown by certain of the belligerents, kept the country neutral, at least officially. The manufacture of arms and ammunition and the shipment of war supplies to the Anglo-French allies had grown to such proportions as to call forth a protest from the Austrian Government. Large fortunes were being made in war supplies and by trading in the stocks of the companies manufacturing them. Partisans of the Teutonic powers demanded an embargo on war material, and when the Sixty-fourth Congress convened bills for this purpose were introduced.

National Defense.—In an address welcoming the Naval Advisory Board to the White House, Oct. 7, 1915, Mr. Wilson committed himself more definitely to a

strong national defense policy than at any time previously. "The country has abandoned nothing of its ideals of peace," said he, "but it is well aware that it must command the respect of the world. In formulating a national defense programme the Government is working not to change anything in America but to safeguard everything in America." (Page 8077.) In his speech at the Biltmore Hotel, in New York, Nov. 5th, he declared solemnly that the United States had no aggressive purposes, but must be prepared to defend itself and retain "full liberty and self-development." (See page 8083.)

President Wilson was married in Washington Dec. 18, 1915, to Mrs. Norman Galt, widow of a business man of that city who had died eight years before.

Wilson, Woodrow:

Addresses—

Annual to Congress, 7906, 8015, 8102, 8183.

To his fellow-countrymen, 8242.

To meeting of Committee on Labor of the Advisory Commission of the Council of National Defense, 8248.

To States' Defense Council, 8247.

Aeroplane, American vessel *Cushing* attacked by, 8062.

Aggressive Christianity discussed, 7995.

Agriculture—

Allowed to languish for lack of credit, 7908.

Cause of inefficiency in, 7870.

Commission to study credits abroad, 7909.

Credit facilities not afforded, 7870.

Credit on substantial resources needed, 7908.

Agriculture, Department of—

Activities of, 7909.

Importance of, to whole world, 8037.

Agriculture, Secretary of—

Sheep experiment station established by, 8101.

Alaska—

Coast line charts urged for, 8019.

Development of, 7912.

Lands in, set aside for naval radio stations, 8215.

Regulations for sale of lands in, 8171.

Resources of, opened up, 8152.

Territorial government for, 7911.

Withdrawal of townsite, 8005.

Alien enemies, regulations for, 8236.

Alien land law, California's, 7873.

Changes in wording to avoid offense, 7876.

Protest against, 7875.

Alien land laws, federal and state, discussed by Gov. Johnson, 7874.

Aliens—

Appointment of, to Civil Service when no citizens are available, 7959.

Discussed, 8086.

Intrigues of, denounced, 8154.

- Allegiance to America, meaning of, 8066, 8087.
- America the servant of mankind, 8034.
- American allegiance, meaning of, 8066, 8087.
- Citizens in Europe, relief for, 7961, 7962.
- Registration of, 8177.
- Patriotism, principles of, 7952.
- American Republics—
- Attitude toward, 8103.
- Cooperation for national defense, 8104.
- Mutual understanding among, 8071.
- Ancona, protest to Austria on sinking of, 8117, 8120.
- Reply to, 8118.
- Anti-Trust Law—
- Clarified by definition, 8151.
- Individual suits against trusts based on findings in government cases, 7918.
- Legislation needed to clarify, 7910.
- Uncertainty of, hampers business, 7916.
- Appointment of aliens to federal post, 8175.
- Arbitration of pecuniary claims, convention with South and Central American Republics for, 7982.
- Arbitration, failure of in railroad dispute, 8145, 8184.
- Arizona and New Mexico, combining national forests in, 7987.
- Arkansas, unlawful assemblages in, ordered to disperse, 8013.
- Arlington Cemetery, unveiling of Confederate statue in, 7948.
- Arms and munitions, export of, to Mexico—
- For de facto government allowed, 8091.
- Forbidden, 7888, 8089.
- Permitted by proclamation, 7929.
- Arms, carrying of, in Canal Zone, 7903.
- Army—
- Aero squadron for, 8106.
- Division sent abroad, 8253.
- Increase in strength of—
- Ordered, 8172.
- Recommended, 8105.
- Army and Navy, asking authority to use in Mexico, 7934.
- Assemblages, unlawful, in Arkansas, ordered to disperse, 8013.
- Associated Press, serious responsibility of, 8051.
- Associations, inspection of returns of, 7960.
- Austria—
- Peace overtures from, 8189.
- Protest to, on sinking of *Ancona*, 8117, 8120.
- Reply of, to note on sinking of *Ancona*, 8118.
- Bandits, pursuit of, into Mexico, 8155.
- Banking and currency—
- Antiquated system of, 7869.
- Elasticity in, secured, 8151.
- Federal Reserve Act, effect of, 8026.
- Legislation recommended, 7879.
- Reform of, urged, 7908.
- Bar Association address, 7991.
- Barry, Commodore, unveiling of statue of, 7942.
- Battleships, programme of construction of, 8107.
- Bennet resolution, reply to, 8120.
- Biography of, 7867.
- Birds, migratory, regulations for protection of, 7895, 7986.
- Native, reservation for, established on Smith Island, 7959.
- Black-listing of American firms by Great Britain, protest against, 8143.
- British reply to, 8178.
- Bonds, Panama Canal, available for other purposes, 8112.
- Business—
- Advantages of Chambers of Commerce, 8036.
- Conditions of, should be best possible, 8036.
- Co-operative effort necessary, 8036.
- Government's assistance to, 8037, 8151.
- Interests, not to be kept in suspense, 7871.
- Interference with, discussed, 8038.
- Regulation programme complete, 8015.
- Safe maxim for, 8033.
- Cabinet of, see illustration opposite, 7888.
- Cabrillo national monument, 7901.
- California—
- Alien land law of, 7873.
- Protest against, 7875.
- Canal Zone—
- Appointment and compensation of employees in, 7924.
- Carrying of arms in, 7903.
- Chinese excluded from, 8213.
- Costs in civil cases in, security for, 7964.
- Corrupt influencing of agents or employees in, forbidden, 7918.
- Employment conditions in, 7923.
- Fines for dishonest service in, 7963.
- Fire-hunting at night in, forbidden, 7919.
- Gambling law in, amended, 7988.
- Government and sanitation of, 7920.
- Health department of, 7921.
- Money orders in, interest on, 8140.
- Neutrality of, proclaimed, 8008.

- Postal crimes in, punishment for, 7964.
- Quarantine regulations for, 7966.
- Rate of interest on money in, 7905.
- Vessels using, to be fitted with wireless telegraph, 7958.
- Wireless telegraph station in, 7960.
- Censorship over cable, telegraph and telephone lines ordered, 8247.
- Chambers of Commerce, advantages of, 8036.
- Chinese, exclusion of, from Canal Zone, 8213.
- Christian character, formation of, 7994.
- Christianity, aggressive, discussed, 7995.
- Citizens—
 - American, disloyal, denounced, 8154.
 - American, in Europe, relief for, 7961, 7962.
 - Naturalized, disloyalty of, 8114, 8120.
 - Register of those abroad to be kept by American Consuls, 8177.
 - Training of, in use of arms, 8022.
- Citizenship in America, meaning of, 8066, 8333.
- Citizenship, requirement of Civil Service waived in special case, 8175.
- Civil Service—
 - Aliens, appointment of, when no citizens are available, 7959.
 - Amendment providing for appointment of aliens, 7959.
 - Citizenship, requirement of, waived in specified case, 8175.
 - Established in first, second, and third classes of post-offices, 8225.
 - Examinations refused to recent Government employees under certain conditions, 8225.
 - Waived in appointment of employees to military organizations sent to Europe, 8255.
- Claims, pecuniary, convention with South and Central American republics for arbitration of, 7982.
- Club life, influence of, 8081.
- Coast line, necessity for charting, 8019.
- Coastwise trade, repeal of exemption from tolls on Panama Canal for vessels in, asked, 7933.
- Coconino national forest, ranger station for, 7990.
- Colorado, domestic violence in, proclamation against, 7937.
- Commerce—
 - Foreign and domestic, uses of Bureau of, 8037.
 - Lack of ships hampers, 8072, 8109.
 - Opportunity for American, 8016.
 - Service of Democratic party to, 8028, 8151.
- Committee on Public Information Created, 8240.
- Confederate soldiers, tribute to, 7948.
- Congress, 63d—
 - Legislation of, 8045.
 - Notable record of, 8015.
 - Work of, commended, 8000.
- Consular Service—
 - American citizens to be registered by, 8177.
 - Currency certificates to be attached to invoices, 8176.
 - Regulations amended, 8176.
 - Sailors, rights and duties of, in foreign ports, 8091.
 - Salaries in, regulation of, 7938.
- Conventions, national, composition and work of suggested, 7910.
- Convention with republics of South and Central America for arbitration of pecuniary claims, 7982.
- Corporations, inspection and returns of, 7960.
- Cost and economy not properly studied, 7870.
- Council of National Defense, civil service obligations removed from, 8246.
- Credit, agricultural (See also Farm Loan Act)—
 - Benefits to, of currency bill, 7908.
 - Commission to study system of, in Europe, 7909.
 - Necessity for, 8018.
 - Not afforded by existing laws, 7870.
 - Recommended, 8116.
- Credits in foreign markets, 8040.
- Crops, money to move, deposited by Treasury Department, 7909.
- Culebra Cut, name changed to Gaillard Cut, 8050.
- Currency—
 - Antiquated system of, 7869.
 - Elasticity secured in, 8151.
 - Legislation recommended, 7879.
 - Reform of, urged, 7908.
- Currency law, special address, urging enactment of, 7879.
- Cushing, attacked by German aeroplane, 8062.
- Customs Service—
 - Collection districts designated, 7889.
 - Dishonest manifests in Canal Zone, fines for, 7963.
 - Fines for dishonest service in Canal Zone, 7963.
- D. A. R., Address before, 8077.
- Danish West Indies, payment for, 8224.
- Day of prayer proclaimed, 8007.
- Deadman's Island transferred to Health Service, 7979.
- Dedication of, to forces of humanity, 7871.

Defense, National—

Aero squadron recommended, 8106.
America not to be turned into military camp, 8021.

Arms for merchant ships asked for, 8209.

Army—

Increase in:

Ordered, 8172.

Recommended, 8106.

Citizen army outlined, 8084.

Citizen army sufficient for, 8105.

Citizen soldiers, number and equipment of, 8106.

Citizenry trained to arms, reliance upon, 8022.

Increased army needed for, 8106.

Wilson's Creek (Mo.), Battle of.—During the summer of 1861 Confederate troops in large numbers were sent into Missouri from Arkansas, Louisiana, and Texas. Gen. Lyon was stationed at Springfield with 5,500 Federal troops. The Confederates, 20,000 strong, advanced in two columns under McCulloch and Price. During the night of Aug. 9, 1861, Sigel was sent with 1,500 men to attack the Confederate rear, nine miles distant, at Wilson's Creek, while Lyon attacked the front. Both attacks were repulsed. Sigel lost 5 of his 6 guns and more than half of his men. Lyon was killed while leading a charge. The Federal loss was 1,246 in killed, wounded, and missing. The Confederate loss was about the same.

Winchester (Va.), Battle at.—Winchester and its vicinity was the scene of several engagements during the War between the States. It is located in the Shenandoah Valley, and was on the line of the two armies as they marched and countermarched through the valley. An engagement occurred at Kernstown, near Winchester, March 23, 1862, the Federals under the command of Shields and Kimball, and the Confederates under Jackson. In killed, wounded, and missing the Federals lost 530 and the Confederates 718. Jackson retreated to his main force.

In May, 1862, the Federals under Banks were posted at Harrisonburg, in the valley. Banks was about to be attacked by the Confederates under Jackson, when he retired down the valley to the heights of Winchester, where on May 24 he gave battle. Being assailed on both flanks, he retreated rapidly on the 25th to the north bank of the Potomac, making the distance, about 50 miles, in forty-eight hours. He was pursued by Jackson to near Harper's Ferry. Again, June 15, 1863, the Federals under Milroy were encamped near Winchester, numbering about 7,000, which force was deemed sufficient to hold the place against all the Confederates known to be in the valley. On that day Milroy found himself almost surrounded by the combined corps of Longstreet and Ewell. An artillery fight was maintained all day and at night the divided and scattered troops of Milroy retreated to the Potomac River, having lost 4,000 men, 28 guns, about 300 horses, and a large number of wagons. The Confederate loss was insignificant.

A small force of Federals under Averell was attacked by the Confederates under Early near Winchester July 12, 1864. The Confederates defeated the Federals, who lost 3 guns and about 400 men. Early then marched on Chambersburg, Pa.

In August, 1864, Sheridan took command of the Federal army in the valley, known as the Army of the Shenandoah. The Confederates under Early were encamped on the west bank of Opequan Creek, covering Winchester. They were attacked on Sept. 19 by Sheridan. The battle began about 10 A. M., and was maintained till nearly 3 P. M., when the Confederates retreated to and beyond Winchester. Sheridan took 2,500 prisoners and found 2,000 wounded in the hospitals at Winchester. The Confederate loss was 653 killed, 3,719 wounded, and 618 missing a total of 4,990. This is also called the battle of Opequan.

Wireless Telegraph.—Heinrich Hertz, of Karlsruhe, Germany, in 1888 demonstrated the existence of electric waves and devised means for producing and receiving them. Edouard Branly, of Paris, France, in 1900 brought out a sensitive detector for manifesting the presence of electric waves, to which he gave the name radio-conductor. This was improved and called a coherer by Oliver Lodge of Birmingham, England, and later perfected and used as a wireless telegraph receptor by William Marconi, of England, who patented it. The first receptor for receiving and indicating electric waves was designed by Alexander Popoff, of St. Petersburg, Russia, in 1895. Lodge later designed a syntonic system for sending and receiving, which could be tuned to the same period of oscillation by means of inductive coils and condensers. The principal systems in practical use are the Marconi, the Lodge-Multhead, the Fessenden, the De Forest, the Telefunken, the Popp-Branly and the Paulson.

The government station at Arlington, Va., has developed a high power transmission range of 3,500 miles, conducting experiments in conjunction with the Eiffel Tower in Paris. Other high power stations are at Belmar, N. J., owned by the Marconi Company, and at Sayville, L. I., owned by the Telefunken Company, operating direct with Nauhen, Germany.

Wisconsin.—One of the western group of states; nickname, "The Badger State"; motto, "Forward." It lies in the northern part of the country, between lat. 42° 27' and 47° north and long. 86° 53' and 92° 54' west, not including islands in Lake Superior and Michigan. It is bounded on the north by Lake Superior and the upper peninsula of Michigan, on the northeast and east by the upper peninsula of Michigan and Lake Michigan, on the south by Illinois, and on the west by Iowa and Minnesota (separated mostly by the Mississippi and St. Croix Rivers). The area is 56,066 square miles. Wisconsin is hilly in the north and southwest, but elsewhere is generally level. It has important agricultural, mining, and lumbering interests and extensive manufactures of flour, machinery, and beer.

Wisconsin was visited as early as 1634 by Nicolet, La Salle, and French fur traders, who established a settlement at Green Bay in 1639. It was included in the Northwest Territory till 1800, when it became a part of the Indian Territory. In 1809 it

was included in Illinois Territory, and in 1818 in Michigan Territory, and in 1836 it was organized as Wisconsin Territory, and included, besides its present area, the territory now embraced in the states of Iowa and Minnesota and part of the Dakotas. It was admitted to the Union May 29, 1848.

Statistics of agriculture collected for the last Federal census place the number of farms in the state at 177,127, comprising 21,069,466 acres, valued, with stock and improvements, at \$1,413,043,000. The average value of land per acre was \$43.30. The domestic animals, poultry, etc., were valued at \$158,454,043, including 2,678,000 cattle, valued at \$67,399,858; 614,654 horses, \$68,585,573; 2,872 mules, \$316,066; 1,809,331 swine, \$13,620,741; 929,783 sheep, \$3,669,572, and poultry, \$4,468,703. The yield and value of the field crops for 1911 was: corn 1,600,000 acres, 58,080,000 bushels, \$34,848,000; wheat, 195,000 acres, 3,097,000 bushels, \$2,788,000; oats, 2,250,000 acres, 67,050,000 bushels, \$30,172,000; rye, 355,000 acres, 6,035,000 bushels, \$5,069,000; potatoes, 280,000 acres, 32,480,000 bushels, \$20,138,000; hay, 2,079,000 acres, 2,495,000 tons, \$38,922,000; tobacco, 41,000 acres, 51,250,000 pounds, \$5,125,000.

The state ranks fifth in the production of iron ore. The output in 1910 was 1,149,551 long tons, valued at \$2,727,406. The amount of capital invested in manufacture is \$412,647,051, and \$71,471,805 is paid annually to 151,391 wage-earners. Lumber is the leading industry, with 725 establishments, capitalized at \$46,543,787.

The number of manufacturing establishments in Wisconsin having an annual output valued at \$500 or more at the beginning of 1915 was 9,104. The amount of capital invested was \$754,287,000, giving employment to 230,273 persons, using material valued at \$417,415,000, and turning out finished goods worth \$695,172,000. Salaries and wages paid amounted to \$149,762,000.

There were in 1907, 7,292 miles of steam railway, and 776 miles of electric lines. The population in 1910 was 2,343,860.

Wolverine State.—A nickname for Michigan (q. v.). (See also States); sometimes also nicknamed the Lake State.

Woman Suffrage.—The first American woman to demand the ballot so far as known, was Mistress Margaret Brent, of Maryland, in 1647. She was heir of Lord Calvert, the brother of Lord Baltimore, and executor of the estates of both in the colony, and, as representation in the Legislature was based on property, she demanded "place and voice"—two votes—in that body. Her petition was hotly debated for several hours and finally denied.

The colonial records of Massachusetts show that women voted under the Old Province Charter from 1691 to 1780 for all elective officers. When a constitution was adopted they were excluded from a vote for Governor and Legislature but retained it for other officials. In March, 1776, Mrs. Abigail Adams wrote to her husband, John Adams, in the Continental Congress asking him to remember the ladies in the new code of laws, and in 1778, Mrs. Corbin, sister of Richard Henry Lee, of Virginia, presented her own petition for the right to vote. The Continental Congress left the suffrage to be dealt with by the states in their constitutions and New Jersey was the only one which conferred it on women, its constitution giving the franchise to "all inhabitants worth \$250, etc." In 1790 a revision of the election law used the words "he or she," thus emphasizing the inclusion of women in the electorate, but in 1807 the Legislature passed an arbitrary act limiting the suffrage to "white male citizens." This was declared to be a usurpation of authority, on the ground that the constitution could be changed only by action of the voters.

In 1826 Frances Wright, a young Scotch woman of beauty, education and wealth, came to the United States and in a series of lectures was the first to bring the question of woman suffrage thus before the public, where it met with almost universal derision. In 1836 Ernestine L. Rose, daughter of a Rabbi in Poland, made a lecture tour of America advocating the full enfranchisement of women and was the first to urge them to secure the repeal of laws which affected their interests. In the winter of 1836-7 she circulated a petition in Albany, N. Y., for a law that would enable a married woman to hold property and could get only five signatures, including men and women, but she carried these to the Legislature and addressed that body in behalf of such a law. She kept up this work steadily and by 1840 she had associated with her Elizabeth Cady Stanton, Paulina Wright Davis and Lucretia Mott. They continued their petitions and addresses to the Legislature until 1848, when the law extended property rights to married women, and thereafter they devoted themselves to working for the suffrage.

Margaret Fuller, one of a coterie of thinkers in Boston, in her writings and semi-public addresses in 1840 demanded political rights for women. In 1847 Lucy Stone, just graduated from Oberlin College, began speaking on woman's rights. Soon afterwards Lucretia Mott published a "Discourse on Woman," in answer to a lecture which Richard H. Dana was giving in many cities ridiculing the idea of political equality for women.

The first woman suffrage convention in the United States was held in the Wesleyan Chapel, at Seneca Falls, N. Y., on the 19th and 20th of July, 1848. It demanded for women equal rights with men. James Mott presided and addresses were made by Lucretia Mott and her sister, Martha C. Wright, Elizabeth Cady Stanton, Mary Ann McClintock, Frederick Douglass and several men prominent in the locality. A declaration and resolutions were discussed, the latter adopted and the former signed by one hundred men and women, some of whom withdrew their names when "the storm of ridicule began to break." This declaration stated the whole case for woman as comprehensively as it ever has been stated since; the resolutions comprised practically every demand that ever afterward was made for women, and, taken together, they formed a remarkable document.

In 1852 a bona fide woman's rights con-

vention, with delegates present from eight states and Canada, was held in Syracuse. It brought to the front the wonderful galaxy of women whose names were henceforth connected with this movement, and here began its fifty-four years' leadership by Miss Anthony.

April 19 and 20, 1850, a woman's rights convention was held in the Second Baptist Church of Salem, Ohio. Emily Robinson, J. Elizabeth Jones and Josephine S. Griffing were three of the leading spirits. The "Memorial to the Constitutional Convention" and the "Address to the Women of Ohio" have not been surpassed in eloquence and force in the years that have since elapsed. It is said that nearly 8,000 signatures to the memorial were secured. In 1852 the first State Suffrage Association was formed. Woman's rights conventions were held annually in Ohio thereafter until the approach of the civil war.

In May, 1850, a few women decided to call a convention to discuss exclusively the rights of women, and the time and place were fixed for Oct. 23 and 24 in Worcester, Mass., and from the holding of this convention the woman's rights movement may be said to have assumed a national aspect. Nine states were represented by speakers and among these were Garrison, Phillips, Pillsbury, Foster, Burleigh, Douglass, Channing, Mrs. Mott, Mrs. Rose, Abby Kelly, Lucy Stone, Antoinette Brown and Dr. Harriot K. Hunt, and letters were read from Emerson, Alcott, Whittier, Gerrit Smith, Joshua R. Giddings, Mrs. Swisshelm, Eliza Wright, Mrs. Stanton and others. Mrs. Davis presided. A national committee was formed, under whose management conventions were held annually in various cities, while the question was always thereafter a leading one in Massachusetts. An account of this Massachusetts convention in the *Westminster Review*, London, by Mrs. John Stuart Mill, marked the beginning of the movement for woman suffrage in Great Britain.

In 1850 the constitution of Indiana was revised and the laws for women were liberalized beyond any then existing. A woman's rights convention took place in Dublin, Ind., in October, 1851. Therefore these meetings became annual.

In June, 1852, the first woman's rights convention of Pennsylvania was held in West Chester, and was largely under the auspices of the Friends, or Quakers, among them James and Lucretia Mott.

From 1852 woman's rights conventions were held in many parts of the country. Woman suffrage was slowly gaining ground, when the breaking out of the civil war banished all other questions from the public thought. When the war was ended and the women again took up their cause they met the vast complication of the rights of the emancipated negroes, and were compelled even by those who had been their strongest supporters to yield their claims to those of negro men.

The civil, legal and political results of the fourteenth and fifteenth amendments to the national constitution tended still further to obscure and hinder the efforts to obtain the franchise for women. An Equal Rights Association had been formed to promote the interests of both negroes and white women, but in 1869 the latter were forced to recognize the necessity for a separate organization and a National Woman Suffrage Association was formed whose sole object was to secure an amendment to the national constitution which should enfranchise women. Mrs. Stanton was made president. As there was some division of sentiment at this

time, a call was issued by Lucy Stone, Julia Ward Howe and others for a convention to meet in Cleveland, Ohio, the following November, and here the American Woman Suffrage Association was formed, with Henry Ward Beecher, president. It worked principally to obtain the suffrage through amendments to state constitutions. Both societies held national conventions every year thereafter. In 1890 the two bodies united under the name National American Woman Suffrage Association, and since then both methods of work have been followed. Mrs. Stanton was elected president of the new organization; Miss Anthony, vice-president-at-large; Lucy Stone, chairman Executive Committee. In 1892 Mrs. Stanton resigned her office because of advancing age; Miss Anthony was elected president and the Rev. Anna Howard Shaw, vice-president. Miss Anthony resigned the presidency in 1900 and Mrs. Carrie Chapman Catt was elected to it. In 1904 she was succeeded by Miss Shaw. National headquarters were opened in 1895. The National Association is a federation of State Suffrage Associations; the latter are composed of County Societies made up of Local Suffrage Clubs. School suffrage prevails in twenty-six states and tax-payers' suffrage in four states.

In New Zealand, Australia and Finland all women vote on exactly the same terms as all men, and in the last two countries may sit in the Parliament. In Norway women have the complete suffrage with a very slight property qualification. In Great Britain, Sweden and Iceland they vote for all officials except members of Parliament. In Canada they have the school and municipal suffrage.

Women have municipal suffrage in Ontario, Nova Scotia, Manitoba, Quebec, British Columbia, and the Northwest Territory, in Iceland, Denmark, and Sweden. In France women engaged in commerce have the right to vote for Judges of the Tribunal of Commerce. Women have some voting privileges in Cape Colony.

The International Woman Suffrage Alliance is composed of National Woman Suffrage Associations composed of twenty-two nations. Its officers are: President, Carrie Chapman Catt, New York; vice-president, Millicent Garrett Fawcett, London; second vice-president, Annie Furrholm, Finland; treasurer, Mrs. Stanton Colt, London; secretaries—First, Miss Martina Kramers, Holland; Mrs. Anna Lindemann, Germany; Miss Sings Bergman, Sweden.

Woman suffrage was granted in Wyoming in 1869; Colorado, 1893; Utah and Idaho, 1896; Washington, 1910; California, 1911; Kansas, Arizona and Oregon, 1912; Nevada and Montana in 1914. Five other states rejected the proposition in 1914.

Arkansas has granted the right of women to vote in primary elections, which in this Southern State is tantamount to full suffrage. In 1913, Illinois granted the right of women to vote for all offices not expressly mentioned in the Constitution of the State; and as national and municipal elections are not mentioned in state constitutions, this form of suffrage is usually known as Presidential and Municipal Suffrage. Both the Democratic and Republican parties carried planks in their platforms in the Presidential campaign of 1916 which favored the granting of the franchise to women the Democrats favoring state action, and the Republicans favoring Federal action. By May 1, 1917, the following states had also granted Presidential and Municipal Suffrage—North Dakota, Michigan, and Nebraska; and the following states had granted to women the right to vote in Presidential elec-

tions only—Ohio, Indiana, and Rhode Island. The Territory of Alaska has complete equal suffrage. These additions to the ranks of the equal suffrage states by May 1, 1917, gave 9,000,000 women the right to vote in Presidential elections. In November, 1916, Jeanette Rankin, Republican, was elected to the House of Representatives from Montana, thus becoming the first Congresswoman.

An overwhelming majority of the advocates of woman suffrage are affiliated with the American Woman Suffrage Association, which must be distinguished from the Women's Political Union, which has changed its title to the Woman's Party. This latter organization, which believes in the political organization of women voters with only equal suffrage in view, inaugurated on March 5, 1917, a "peaceful picketing" of the White House, in their desire to persuade President Wilson to insist that Congress pass the Federal woman suffrage amendment.

For an early cartoon of woman suffrage, see illustration opposite page 1581.

The New York State Association Opposed to Woman Suffrage has its central office in New York City. Its officers are as follows: Mrs. Arthur U. Dodge, president; Mrs. Fritz Achells, first vice-president; Mrs. Elihu Root, Mrs. Richard Watson Gilder, Mrs. William A. Putnam, Mrs. Robert McVickar, Mrs. George D. Miller, and Mrs. William P. Northrup, vice-presidents; Mrs. Francis S. Bangs, treasurer; Mrs. George Phillips, secretary; Room 819, Engineering Societies Building, 29 West 30th St., New York City. There are also organizations in Massachusetts, Illinois, Oregon, Iowa, Washington, California, Pennsylvania and Maryland. These are founded with the object of testifying to

legislative committees and through the medium of the public press that the opposition to woman suffrage is based upon what is claimed to be "the intelligent conviction of the majority of representative women in all lines of social, industrial, and domestic progress."

Women's Peace Party. (See Peace Societies.)

Wool.—The production and consumption of wool in the United States from 1840 to 1915 is set forth in the annexed table, together with the amount produced in each state in the latter year.

Wool:

Cost of manufacturing yarn and fabrics greater in United States than in competing countries, 7680.

Cost of production in America greater than that of nearest competitor, 7680.

Proposed reduction of tariff by House would work injury to trade, 7748.

Reduction of tariff on, in accordance with report of Tariff Board would give sufficient protection to industry, 7748.

Reduction of tariff on, recommended, 7677.

Tariff, minimum *ad valorem* rate should be 35 per cent, 7747.

Tariff must offset difference in cost of production here and abroad, 7746.

PRODUCTION, CONSUMPTION AND EXPORTATION OF WOOL.

[Sources: Production, 1896-1913, reports of the National Association of Wool Manufacturers, Boston; other years, reports of the Department of Agriculture.]

1907.....	31	39	36	1915.....	29	36	34

Ohio fleece wool" is less subject to variation than any other description, and therefore is used as the basis of value in this table. Wool, owing to its wide variety, difference in character and condition, and liability to shrink in cleaning, is precluded from speculative operations which apply to products which may be dealt in as futures.

The business of manufacturing woolen and worsted goods in the United States in 1914 is summed up in the following table:

	Woolen goods	Worsted goods	Total
Number of establishments.....	501	298	799
Persons engaged in manuf- actures.....	51,631	113,059	164,690
Proprietors and firm members.....	316	141	457
Salaried em- ployees.....	2,150	3,391	5,541
Wage earners.....	49,165	109,527	158,692
Primary horse- power.....	134,597	246,623	381,220
Capital.....	\$107,871,742	\$281,780,836	\$389,652,578
Services.....	27,726,892	58,772,968	86,499,860
Salaries.....	3,522,413	7,024,003	10,546,416
Wages.....	24,204,479	51,748,965	75,953,444
Materials.....	63,696,042	182,800,624	246,496,666

Totals..... 196,909,513 *\$121,309,597

* In addition, woollen and worsted goods, to the value of \$1,281,292, were made by establishments engaged primarily in the manufacture of products other than those covered by the industry designation.

Wool and Woollens, import duty on, dis-
cussed, 1247, 4247.

Wool Bill, vetoed by Taft, 7745.

Wool Taps and Yarn, low tariff on,
would disrupt industry, 7747.

Woolen Goods, low tariff on, would de-
stroy fine goods industry, 7747.

Worcester vs. Georgia.—An important Su-
preme Court case involving the right of
individual States to make laws at variance
with treaties made by the Government of
the United States. Samuel A. Worcester
was a missionary among the Cherokees. In
1831 he was arrested by officers of the
State of Georgia, tried, and sentenced to
four years' imprisonment for living among
the Indians in violation of an act of the
State legislature which forbade any white
person to reside among the Indians without
a license from the governor of the State
or some one authorized to issue it. Worces-
ter pleaded authorization by the President
and by the Cherokees, also the unconsti-
tutionality of the act itself. By a writ of
error the case was brought before the
United States Supreme Court. That tribu-
nal reversed the decision of the State court
and rendered judgment in favor of Worces-
ter on the ground that the Georgia act,

being repugnant to the Constitution, to the
treaties made by the United States with
the Cherokees, and to the laws of Con-
gress in execution thereof, was unconstitu-
tional and void. It was held that the
treaties and laws of the United States con-
template the Indian territory as completely
separated from that of the States, and
provide that all intercourse with the In-
dians shall be carried on by the Government
of the Union.

World's Columbian Commission:

Reports of, deposited in State De-
partment, 6181.

Reports of, transmitted, 5567, 5669,
5769.

World's Columbian Exposition.—The
idea of celebrating by an exposition the
fourth centenary of the discovery of Amer-
ica by Columbus was conceived during the
progress of the Centennial Exposition at
Philadelphia in 1876. The project was
widely discussed and met with general
favor, New York, Washington, St. Louis,
and Chicago competing for the site. In
February, 1890, Congress authorized the
holding of the exposition and designated
Chicago as the place. A company had al-
ready been organized, with a capital of \$5-
000,000, for holding the fair.

President Cleveland appointed an official
board of managers, and at the close of the
fair a full report was filed in the State De-
partment.

The buildings were dedicated Oct. 21,
1892, just 400 years after the landing of
Columbus. Owing to the magnitude of the
enterprise the exposition did not open un-
til May 1 following, remaining open till
the 30th of the following October. It sur-
passed all previous world's fairs in every
respect except in point of attendance, in
which it fell below that of the Paris Ex-
position of 1889 only. Jackson Park and
the Midway Plaisance, the site of the ex-
position, covered 633 acres of land on the
shore of Lake Michigan, and of this about
190 acres were under roof. The twenty-
eight main exposition buildings occupied
142½ acres, the remainder being covered by
state and foreign buildings and concessions.
The building devoted to the exhibition of
manufactures and liberal arts was the larg-
est in the world. It measured 1,687 by
787 feet and covered 30½ acres. The cen-
tral hall, 1,280 by 380 feet, was open to
the roof, a distance of 237.6 feet, without
a supporting column. There were eleven
acres of skylight and forty car-loads of
glass in the roof, and it required 7,000,000
feet of lumber and five car-loads of nails
to lay the floor. The buildings were paint-
ed by spraying machines and covered with
a composition resembling marble, which
gave the fair the name of the "White City."

Fifty-two foreign countries officially par-
ticipated in the exposition in response
to President Harrison's proclamation of
Dec. 24, 1890, inviting "all the nations of
the earth to take part in the commemora-
tion of an event that is preeminent in hu-
man history and of lasting interest to
mankind." (Page 5575.) The United States
Government appropriations amounted to \$6-
000,000. There were in all 65,422 ex-
hibitors, 27,529,400 admissions, and the re-
ceipts amounted to \$14,117,332, exceeding
the expenditures by nearly \$2,000,000.

Württemberg.—A Kingdom of the German Empire, lying between Bavaria on the east and Baden on the west, while to the south reaches Lake Constance and the borders of the Tyrol. Though primarily an agricultural state, yielding considerable quantities of grain, beets, hops, flax and hemp. Württemberg has numerous flourishing industries. Stuttgart is the center of the publishing trade of southern Germany, and gold and silverware, clocks, pianos, surgical instruments, paper, beer and sparkling wine are largely produced both in the capital and other cities of the Kingdom. The government is a limited monarchy administered by the King and two legislative chambers. Württemberg sends four representatives to the Bundesrat and seventeen to the Reichstag. Education is compulsory, the standard of illiteracy is very low and there is an excellent university at Tübingen, founded in 1477. The King is the head of the Evangelical Church, to which 60 per cent of his subjects belong; Catholics and Jews form the rest of the population. The former Duchy and Electorate of Württemberg became a Kingdom by the peace of Pressburg in 1805 and became a state in the German Empire in 1871. Area, 7,534 square miles; population (1900), 2,169,480.

Wyoming.—One of the western group of states; motto, "Equal rights." It lies between lat. 41° and 45° north and long. 104° and 111° west. It is bounded on the north by Montana, on the east by South Dakota and Nebraska, on the south by Colorado and Utah, and on the west by Utah and Idaho. Area, 97,914 square miles. The surface being mountainous, the leading industries are stock raising and mining. Gold, coal, iron, and petroleum are the chief minerals.

Most of the present state was included in the Louisiana Purchase. It was organized as a Territory in 1868 from areas previously in Dakota, Idaho, and Utah, but derived more remotely from the original Territories of Nebraska, Utah, and Oregon, a portion having at one time also belonged to Washington. Wyoming was admitted to the Union in 1890.

About 10,000,000 acres of Wyoming are covered with forests, and the prosperity of the state depends largely on its mineral resources and grazing lands. About 3,300 square miles are inclosed in the Yellowstone National Park (q. v.), and 2,742 reserved for the use of Indians. Most of the land is arid and unsuited to agriculture without the aid of irrigation. Under the Federal reclamation act \$3,250,000 will be expended in irrigation in the valleys of the Shoshone and North Platte Rivers. Many private companies are also at work. About half the state is well fitted for cattle and sheep grazing. In July, 1911, there were 33,629,605 acres of public land unreserved and unappropriated. United States land offices are located at Buffalo, Cheyenne, Douglas, Evanston, Lander, and Sundance. (See Lands, Public.)

Statistics of agriculture collected for the last Federal census place the number of farms in the state at 10,987, comprising 8,543,010 acres, valued, with stock and improvements, at \$167,189,081. The value of domestic animals, poultry, etc., was \$65,605,510, including 767,427 cattle, valued at \$22,697,387; 156,062 horses, \$12,426,838; 2,045 mules, \$248,572; 33,947 swine, \$301,716; 5,397,161 sheep, \$29,666,228, and poultry, \$194,078. The yield and value of field crops for 1911 was: corn, 13,000 acres, 195,000 bushels, \$148,000; wheat, 69,000 acres, 1,794,000 bushels, \$1,687,000; oats, 190,000 acres, 6,555,000 bushels, \$3,278,000; rye, 2,000 acres, 40,000 bushels, \$36,000; potatoes, 10,000 acres, 420,000 bushels, \$588,000; hay, 330,000 acres, 693,000 tons, \$7,138,000. The coal production in 1910 exceeded all past records. The output was 7,533,088 short tons, valued at \$11,706,187. During 1910 and 1911 there has been great development of the oil industry. Many new fields are being opened. The total mineral output for 1910 was \$12,110,286.

The report of the State Treasurer for the fiscal year 1911 shows total receipts of \$1,069,970; total expenditures, \$967,568. The bonded debt is \$120,000. The suffrage extends to all citizens, male and fe-

male, who can read, and who are registered as voters and have resided in the state one year and in the county sixty days next preceding the election.

About half the state is adapted for sheep-raising. The wool clip for 1910 was 36,037,500 pounds, valued at \$6,342,000, a record exceeded only by Montana. The population in 1911 was 145,965.

Wyoming:

Unlawful combinations in, proclamations against, 5725, 5932.

Wyoming Controversy.—In the original charter granted by Charles I. to William Penn the northern boundary of Pennsylvania was fixed at lat. 43° north. However, the proprietors of the colony accepted 42° as the northern boundary and extended the southern boundary to include the Chesapeake and Delaware bays. Connecticut claimed all the territory north of 41° in Pennsylvania, and asserted her rights by chartering the Susquehanna Company, organized in 1753, to form settlements in the disputed territory. In 1762 the company sent its first party of settlers, 200 in number, into the region, but they were

driven out by the Indians, who repudiated a previous sale of their rights to Connecticut and made a sale to Pennsylvania. In 1769 the Susquehanna Company sent more colonists into the disputed country, and a desultory warfare began between them and the Pennsylvania settlers, to whom the territory had been leased. The former were several times driven out of the disputed district by the Pennsylvanians, but they finally obtained a permanent lodgment, as the Pennsylvania contestants were only lessees, while their opponents fought for their property rights. Hostilities with the mother country caused a suspension of civil strife for a time.

In 1779 an act of the Pennsylvania legislature transferred all the proprietary lands to the state. Pennsylvania brought suit against Connecticut to decide the jurisdiction over Wyoming. The case was heard by five judges at Trenton. In November, 1782, their unanimous decision, afterwards confirmed by Congress, was in favor of Pennsylvania.

Wyoming Massacre.—July 3, 1778, Col. Zebulon Butler, of the Continental army, with a force of about 300 militiamen, mostly old men and boys, marched out of Forty Fort, in the Wyoming Valley, about three miles above Wilkesbarre, Pa., to drive off an invading party of some 800 Indians and Tories under Chief Joseph Brant and the British Colonel Walter Butler. The Indians burned the forts in the upper part of the valley and forced the American militiamen to retreat in disorder. Of the 300 who left the fort in the morning the names of 162 officers and men are recorded as killed in action and the massacre which followed. Butler, the British officer in command, reported the taking of 227 scalps and only 5 prisoners. Col. Zebulon Butler with 14 men escaped from the valley.

X. Y. Z. Mission *Messages and Papers of the Presidents*

X. Y. Z. Mission.—During the Revolution the United States secured the valuable aid of France by treaties in 1778. In 1789 monarchy was overthrown in France, and that nation soon found herself at war with England and other European nations. She desired the United States as an ally, and Genet (*see Genet, Citizen*) was sent to accomplish her purpose. His mission failed, Washington persisted firmly in preserving our neutrality, and Jay's Treaty (*which see*) was concluded with England. The course of our government angered France. In 1797 the directory, which then governed that country, gave permission to the French navy to assail our vessels. Following a policy of conciliation, in spite of French insults to our minister and the threat to our commerce, President Adams called a special session of Congress in May, 1797, and Charles Cotesworth Pinckney, John Marshall and Elbridge Gerry were sent to France to arrange matters. In the spring of the next year the President submitted to Congress dispatches that had been received from these commissioners. They had been kept waiting by Talleyrand, the minister of foreign affairs, and had been approached by three unofficial persons with what was in effect a demand for a bribe and a loan to the directory before any arrangement could be concluded with the United States. In dispatches the names of these three persons were indicated merely by the letters X., Y. and Z., and hence the whole affair came to be termed the X. Y. Z. Mission. To these demands our representatives returned a decided refusal. It is said that Pinckney made use of the phrase, "Millions for defense, but not one cent for tribute." The answer as recorded, however, was, "No, no, no; not a sixpence." About the time when these dispatches were submitted to Congress, Pinckney and Marshall were ordered to leave France, and Gerry was afterward recalled by our government. A warlike feeling instantly sprang up in the United States. The Federalists, with Adams as leader, desired to

defend by force, if necessary, their policy of keeping this country from entangling foreign alliances, and desired to resent French insults. The Democrats (then called Republicans) had always favored an alliance with France and had opposed the creation of a navy for the United States. Now, however, the popular pressure could not be withstood. Bills were passed for increasing the navy and separating it from the War Department (April 30, 1798). Provision was made for a national loan and the imposition of a direct tax. The President was authorized to increase the army in case of a foreign war within three years, and soon Washington was called to be commander-in-chief of the army and Alexander Hamilton was selected as the active commander. On July 9, 1798, Congress declared the treaties with France no longer binding, and authorized our war vessels and privateers to capture armed French vessels. A few naval engagements occurred, but no event of great importance. The effect of our warlike feeling and preparations on France was excellent. American prisoners were released and the embargo which had been declared was raised on American ships. Talleyrand now hinted to our Minister to Holland, William Vans Murray, that he was willing to receive another American Minister. Adams accordingly appointed Murray, in February, 1799, and soon joined with him Oliver Ellsworth and William R. Davis. The President's action created much stir, politically, as he was considered to have become subservient to France and to have changed the former attitude of himself and the Federal party. It was some months after their appointment that our envoys arrived in Paris. Napoleon was then at the head of the government as first consul and was favorably inclined toward the United States. French commissioners were appointed, and, on Sept. 30, 1800, a friendly convention was signed. Both countries ratified it, and it was declared in force Dec. 21, 1801, and for a while the safety of our commerce was secured.

Yangtze River, steamers sailing under American flag prohibited from passing through Straw Shoe Channel on, 3896, 3902.

Yankee Doodle.—A popular national air of the United States. The words are said to have been written in derision of the ill-assorted Continental troops, about 1755, by Dr. Schuckburgh, a surgeon under Gen. Amherst in the French and Indian War. The original title was "The Yankee's Return from Camp," and there are several versions. The tune has undergone various changes.

Yankee, The, mentioned, 6317.

Yankees.—A word of uncertain origin, first applied to the early English colonists, later by the English to Americans generally, and still later to Northerners by people of the South. According to common legend, *Yankees* is a corruption of *Yengees*, *Yaunghees*, or *Yanghies*, a name said to have been given by the Massachusetts Indians to the English colonists in their efforts to pronounce the word "English" or the French word "Anglais." It was first applied to the New Englanders as a term of reproach by British soldiers.

Yards and Docks, Bureau of, Navy Department. (See Bureau of Yards and Docks, Navy Department.)

Yazoo Frauds.—A term applied to the sale by the State of Georgia in 1795 of her western territory, now included in Alabama and Mississippi, to four land companies, known generally as the Yazoo companies, from the district in which they operated. The land extended from the Alabama and Coosa rivers to the Mississippi, and from the thirty-first to the thirty-fifth parallel, and the price paid to the state was \$500,000, or about one and two-thirds cents per acre. It was charged that many members of the legislature who voted for the sale had been bribed. President Washington made the alleged frauds the subject of a special message (page 167). The people of the state were indignant and a party was formed to repeal the sale. In 1796 the records of the transaction were burned in the presence of the governor and legislature in accordance with what was known as the Rescinding act. Immediately numerous claims sprang up, which had to be decided by Congress.

The territory was ceded to the United States in 1802. The next year President Jefferson appointed a commission to investigate the claims, and James Madison, chairman of the commission, recommended a compromise, but Georgia refused to compensate the claimants. Their claim was sustained by the Supreme Court, however, Chief Justice Marshall holding that allegations of bribery of the legislature could not be entertained, and that purchasers from the land companies were innocent holders; that the act of the Georgia legislature in 1796 repealing the sale of 1795 was an abrogation of contract, and therefore void. Finally an act was passed in 1814 appropriating \$8,000,000 payable out

of the proceeds of the sale of Mississippi lands to satisfy the Yazoo claimant.

Yellowstone National Park, compensation to superintendent of, referred to, 4036.

York (Canada), Capture of.—The plans for the prosecution of the war with Great Britain in 1813 contemplated an invasion of Canada from both the east and the west. Gen. Harrison successfully carried out the programme in the west, routed Proctor's army, and was in possession of the territory. April 27, Gen. Dearborn, with about 1,700 men under the immediate command of Gen. Zebulon Pike, crossed Lake Ontario on Commodore Chauncey's transports and marched upon the British garrison at York (now Toronto), where Maj.-Gen. Sheaffe was in command of 800 regulars and a body of Indians. A sharp conflict ensued. The British and Indians were routed. By the explosion of a magazine Gen. Pike was killed, together with 51 other Americans and 40 British; 180 Americans were wounded by the explosion. The American loss in the battle was 269 on land and 17 on water. The British lost, besides the prisoners, 69 killed and 89 wounded.

Representatives of French Republic and descendants of Lafayette present at, 4625.

Yorktown (Va.), Siege of, in 1781.—After the battle of Green Springs, or Jamestown, Lafayette withdrew the American army to Malvern Hill. Cornwallis hurried on toward Yorktown, which place Sir Henry Clinton designed to be held as a British post in the absence of sufficient force to hold the entire State of Virginia. By Aug. 27, 1781, the British army in Virginia, consisting of 9,433 men, was concentrated at Yorktown and Gloucester Point, just across the York River. Aug. 30 Count De Grasse arrived in Chesapeake Bay with twenty-six French ships of the line besides frigates and transports. Sept. 3 Count De St. Simon landed at Jamestown with 3,200 French troops, and the allied armies, numbering 12,000 regular troops and 4,000 militia, under Washington and Lafayette, occupied Williamsburg, about fifteen miles from Yorktown. Washington had eluded Clinton by a feint. Sept. 28 the army advanced and took a position about two miles from the British works, and on the 29th a general

movement was begun to encircle the town and close in upon its defenders.

On the Gloucester side the siege was maintained by the Duke de Lauzun with his legion of French cavalry and 800 marines from De Grasse's squadron, besides a body of Virginia militia under Gen. Weedon. Oct. 6 the first parallel was opened under Gen. Lincoln within 600 yards of the enemy, and heavy guns were placed in position, with the loss of 1 French officer and 16 privates. On the 11th a second parallel was established with slight loss. On the 14th the two advanced redoubts of the British were taken by storm by the American light infantry under direction of Lafayette, and the French, under Baron Visménil. The American loss was 9 killed and 32 wounded. Three French officers were wounded. The British lost 8 killed and 17 prisoners. On the morning of the 16th an unsuccessful sortie was made on the advanced American redoubts, by about 350 British under Lieut.-Col. Abercrombie, 100 French troops being killed or wounded, with little loss and no advantage to the British.

An attempt made by Cornwallis's army to escape in boats that night was frustrated by a storm, and on the morning of Oct. 17, 1781, a flag of truce was sent to Washington, making overtures for surrender. On the 18th articles of capitulation were signed by Washington and Cornwallis. The land forces became prisoners to the Americans and the marine force to the French. The total number of British officers and men surrendered was 7,073 from the army and 900 from the navy, besides 144 guns and 6 British and 18 regimental standards. The military chest contained £2,113. The *Guadalupe*, *Forcey*, *Benetta*, and *Vulcan*, together with 30 transports, 15 galleys, and many smaller vessels, fell into the hands of the French. The total casualties of the siege were: British, 156 killed, 326 wounded, and 70 missing; American, 23 killed, 65 wounded; French, 52 killed, 134 wounded.

Yorktown (Va.), Siege of, in 1862.—

Nov. 1, 1861, McClellan was appointed to the chief command of the armies of the United States. He set about improving the organization and efficiency of the men, and by March 1, 1862, the forces about Washington numbered 221,987. The country was growing impatient at the inactivity of the Army, and the cry "On to Richmond" was almost universal in the North. The President directed that a move of some kind be made. The knowledge that McClellan contemplated a forward movement caused the Confederates to evacuate Manassas, Johnston withdrawing his forces to the defense of Richmond March 9, 1862. March 11 the

President relieved McClellan of the command of all military departments except that of the Potomac, which had been divided into five corps, under command of Generals McDowell, Sumner, Heintzelman, Keyes, and Banks. It was decided that this army, except so much as was necessary for the protection of Washington, should move upon Richmond by way of the Virginia peninsula, lying between the James and York rivers. Fort Monroe occupies the extremity of the peninsula. Heintzelman's corps embarked March 17, and April 1 the headquarters of the Army of the Potomac was transferred to the vicinity of Fort Monroe. Yorktown was defended by Gen. Magruder with less than 8,000 Confederates. April 4 occurred the principal skirmish of the siege, in which 35 men were killed and 120 wounded on the Union side, while the Confederates lost more than 100 killed. The next month was consumed by McClellan in building fortifications and roads to take Magruder's army. May 5 the last of the Confederates retired up the peninsula.

Yosemite National Park. (See Parks, National.)

Youngstown, Ohio, act for erection of public building at, vetoed, 5254.

Yucatan.—A peninsula of Mexico. It comprises the States of Yucatan and Campeche and the territory of Quintana. It is bounded on the north by the Gulf of Mexico, on the east by the Channel of Yucatan (which separates it from Cuba) and the Caribbean Sea, on the south by British Honduras and Guatemala, and on the west by the Gulf of Campeche. The surface is low. Its chief product is sisal hemp. Yucatan was discovered in 1517; was conquered by Spain, 1527-1547; became independent 1821; was annexed to Mexico 1822. In April, 1848, President Polk reiterated the "Monroe doctrine" while discussing the relations of the United States and Yucatan (2431).

Zenger's Case.—One of the most important struggles for the freedom of the press in America. John Peter Zenger was editor and publisher of the *New York Weekly Journal*, which was founded by him in 1726. His newspaper openly denounced the administration of the colonial government. For this he was brought to trial in 1735, charged with the publication of "false, scandalous, seditious libels" against the royal government of the Colony of New York. Strenuous efforts were made to secure Zenger's conviction, but no jury could be found to convict him.

Zeppelins. (See aeronautics and European war, Aerial Warfare.)

For a picture of the effects of a Zeppelin raid, see illustration opposite 8032, and description on back.

Zinc.—For many years the value of the copper mined in the Central States has exceeded that of zinc, frequently by millions of dollars, owing entirely to the greater value of the copper, for the quantity of zinc produced has been larger. Under the stimulus of extraordinary prices for both copper and zinc in 1915 the mine output of copper in the Central States increased 50,650 tons and that of zinc 47,857 tons. The value of the copper produced increased from \$21,865,943 to \$16,494,969, an unusual increase, but not sufficient to retain its preeminence, for the value of the recoverable zinc jumped from \$17,139,264 in 1914, to \$53,540,472 in 1915, "jack" thus running \$7,000,000 ahead of copper. Under ordinary conditions the production of 222,548 tons of lead, valued at \$20,919,512, an increase of 18,703 tons in quantity and of \$5,000,000 in value, would have attracted considerable attention. An increase in value of one-third is unusual, but it appears small compared with that of either zinc or copper.

The production of silver in the Central States is always relatively unimportant. The output in 1915 amounted to 647,553 ounces, valued at \$328,309, of which 585,933 ounces was derived from copper mines in Michigan.

The total value of the silver, copper, lead, and zinc mined in the Central States increased from \$55,171,306 in 1914, to \$121,283,262 in 1915, or about 120 per cent.

The high price of copper in 1915 benefited few companies or individuals except those interested in the comparatively small number of mines in the Lake Superior district in Michigan, for that State produced nearly all the copper credited to the Central States. Missouri reported 402,160 pounds of copper, which was derived mainly from the dressing of lead concentrates.

The average selling price of lead was less than a cent a pound more in 1915 than it was in 1914, so that lead mining was more profitable chiefly for the five or six large companies having mines in the disseminated lead region in southeastern Missouri, which produced 83 per cent of the output of the Central States. The increase in average price did not stimulate lead mining in other regions, as the only other notably increased

output was due to more extensive mining of the "sheet ground" in the Joplin region, which carries considerable lead. In 1915, however, the smelters desired high-grade zinc concentrates free or nearly free from lead. Such concentrates were purchased at a base price much higher than that paid for concentrates containing over 1 per cent of lead. Moreover, high-grade zinc concentrates frequently sold for more than double the price paid for galena concentrates, so that owners of "sheet ground" and "soft ground" had no reason to rejoice over the lead content of their ore.

The largely increased and high price of zinc concentrates created a healthy boom in nearly all districts. The profits of the big operators were abnormal, but hundreds of mines worked by small companies or individuals shared in the general prosperity. Miners' wages were raised and mining machinery and supplies were liberally purchased at advanced prices. With zinc concentrates doubled and more than doubled in value any mine that would not yield a profit was indeed worthless. Producing properties or old mines with shafts and drifts that could be unwatered, where old concentrating plants could be repaired or new ones quickly built, were eagerly sought. Old dumps at abandoned mines attracted men and boys who made good wages by culling the waste rock. Tailing mills were run profitably on material that would not yield any profit when zinc concentrates sold for less than \$50 a ton.

The salient facts relating to zinc and lead mining in the Central States in 1915 were the building of new mills and roasting and separating plants in the Wisconsin-Illinois region; the increased output and the better recovery made by "flotation" in the disseminated lead district in Missouri; the more general use of thickeners, classifiers, and tables and the vastly larger yield from the "sheet ground" in southwestern Missouri; the development of the new mining territory near Picher and Cardin, in the north Miami field in Oklahoma; and the active prospecting and mill building and the large increase in shipments of zinc carbonate in Arkansas.

Zollverein.—A union of German states for the maintenance of uniform rate of duty on imports from other countries and of free trade among themselves. It began in 1828 in an agreement between Prussia and the Grand Duchy of Hesse, and gradually developed until now it is coextensive with the German Empire, and also includes the Grand Duchy of Luxemburg.

Zollverein, The. (See Germany.)

Zona Libre.—A narrow strip of territory along the northern border of Mexico, so called because certain articles imported for consumption in it were formerly exempted from customs duties. It was first established in 1858. Imports into the zone latterly paid 10 per cent of the ordinary duties, except cattle, which paid full duty. The zone was suppressed July 1, 1905.

Zona Libre:

Augur, Christopher Colon; soldier; b. in New York in 1821; graduated from West Point in 1843; took part in Mexican War; promoted to captain in 1852, and served in Indian outbreaks in Oregon, 1855-56; served with distinction during Civil War, and in 1865 was brevetted brigadier-general and major-general; had command in Washington, 1863-66; made brigadier-general United States Army in 1869, and retired in 1885.

Augur, Christopher C., directed to assume command of Department of Missouri, 4754.

Auldjo, Thomas, vice-consul to Poole, England, nomination of, 90.

Aury, Louis De; lieutenant in New Grenada navy; b. about 1780; in command at siege of Cartagena; went to Texas with Herrero in 1816, as commander of the united fleets, and was appointed governor of Texas and Galveston Island; July, 1817, he took part in McGregor's expedition to Florida, and various South American revolts; resided in New Orleans and Havana.

Aury, Louis De, mentioned, 601.

Austin, Richard Wilson; b. at Decatur, Ala., Aug. 26, 1857; educated University of Tennessee; member of the bar; was assistant doorkeeper of the House of Representatives in the 47th Congress; United States marshal for the eastern district of Tennessee from 1897 to 1906; served as American consul at Glasgow, Scotland, from July, 1906, to November, 1907; elected to the 61st, 62d, 63d and 64th Congresses from Tennessee.

Bacon, Augustus Octavius; b. Bryan Co., Ga., Oct. 20, 1839; received a high-school education in Liberty and Troup counties; graduated at the University of Georgia; entered the Confederate army at the beginning of the war and served till its close; began the practice of law in 1866 at Macon, from which date until his election to the Senate he actively continued both in the State and Federal courts; in 1871 elected to the Georgia house of representatives, which body he served for fourteen years; during eight years he was speaker; a regent of the Smithsonian Institution; elected to the United States Senate from Georgia, in November, 1894, 1900 and 1907, having been, by a general state primary, unanimously renominated. Died in 1913.

Badger, George Edmund, statesman and Secretary of the Navy under President William H. Harrison; b. Newbern, N. C., April 17, 1795. His father was a native of Connecticut, but removed in early manhood to the South, where he became a lawyer of distinction. The son was prepared for college in the schools at Newbern, and at the age of fifteen entered Yale. With his other studies he took up law, and progressed so rapidly that at the age of twenty he was admitted to the bar. The War of 1812 was at the time disturbing the country, and Gov. Hawkins called out the militia. Badger took the field, and served as aide-de-camp to Gen. Calvin Jones, with the rank of major. He was elected to the legislature in 1816, the year of his majority, and devoted the next four years of his life to law and legislation. In 1820 he was appointed judge of the superior court, and filled the judicial bench until 1825, when he resigned and removed to Raleigh, where he continued to reside until the end of his life. In 1840 he took an active part in the Harrison presidential campaign, and soon after Mr. Harrison's inauguration was appointed Secretary of the Navy. After the death of President Harrison, and the separation of Mr. Tyler from the Whig party, Mr. Badger resigned, giving as a reason his non-agreement with the policy of Mr. Tyler. In 1846 he was elected to the United States Senate to fill an unexpired term of two years, and in 1848 re-elected for a full term. In 1853 President Fillmore nominated him as a judge of the United States Supreme Court, but the nomination was not confirmed by the Senate. He was a vigorous speaker, but rarely wrote anything. He excelled in debate, and in the subjects he studied made profound research. Mr. Badger married three times, in each case forming an alliance with a distinguished family. He was prostrated by a stroke of paralysis Jan. 5, 1863, and, after a lingering illness, died May 11, 1866, at Raleigh, N. C.

Bagley, Worth, ensign in Navy, killed while attempting to silence batteries at Cardenas, Cuba, 6302, 6316.

Bailey, Edward L., reinstatement in service vetoed, 6775.

Bailey, Joseph Weldon; b. Copiah Co., Miss., Oct. 6, 1863; admitted to the bar in 1883; removed to Texas in 1885 and located at his present home; elected to the 52d, 53d, 54th, 55th, and 56th Congresses; chosen United States Senator from Texas, Jan. 23, 1901; reelected in 1907.

Bailey, Theodorus, thanks of Congress to, recommended, 3277.

Bainbridge, William, naval officer; b. May 7, 1774, at Princeton, N. J.; served as lieutenant-commander in the war with France in 1798, and was captured by the French; commanded the *Philadelphia* in the Tripolitan war and surrendered Nov. 1, 1803, after his vessel had become fast on a rock in a position where her guns could not be used; appointed commodore in 1812 and made commander of a squadron; in command of *Constitution* captured the British frigate *Jara*, Dec. 29, 1812; in 1815 and 1819 commanded squadrons in the Mediterranean, returning in 1824; in command at various times of the navy yards at Charlestown, Boston, and Philadelphia; died at Philadelphia July 28, 1833.

Bainbridge, William:

Commander of the—

Constitution, 507.

Philadelphia, 352, 356.

Letter of, regarding—

Hostile act of vessel of Morocco transmitted, 352.

Wreck of the *Philadelphia* transmitted, 356.

Baker, Eugene M., engagement with Piegan Indians referred to, 4004.

Baker, John, imprisonment of, in New Brunswick, 963, 969, 990.

Claims arising out of, 1687.

Baker, Marcus; geographer, mathematician, and explorer; b. Sept. 23, 1849, in Ostemo, Mich.; graduated from University of Michigan in 1870, and became professor of mathematics in Albion College, and tutor in University of Michigan; appointed to Coast and Geodetic Survey in 1873, and as assistant geographer, explored Pacific coast from Southern California to Alaska and Arctic Ocean; placed in charge of magnetic observatory, United States Signal Service, at Los Angeles, Cal., 1882; member of Board of Geographic Names, 5647.

Baldwin, Charles H.; naval officer; b. Sept. 3, 1822, in New York City; entered navy in 1839, and served on frigate *Congress* in Mexican War; in 1861 commanded steamer *Clifton*; raised to rank of rear-admiral, January, 1883, and assigned to command of Mediterranean squadron; retired in 1884; died Nov. 17, 1888, in New York City.

Baldwin, Charles H., thanks of Congress to, recommended, 3277.

Baldwin, Leon, indemnity paid by Mexico for murder of, in Durango, 5959.

Balestier, Joseph:

Mentioned, 2688.

Mission of, to eastern Asia referred to, 2681.

Balfour, Arthur James; b. July 25, 1848. Educated at Eton and at Trinity College, Cambridge. He was elected to Parliament in 1874, and in 1878 became private secretary to his uncle, Lord Salisbury, the Foreign Minister. His duties in this capacity laid the foundation for his comprehensive knowledge of international affairs, but he did not relinquish his keen interest in the study of philosophy, as was shown in 1879 by the publication of his well-known "Defence of Philosophic Doubt." From 1880 to 1886, he was a member of the House of Commons, but took no prominent part in the

discussions, and much surprise was caused by his appointment in 1886 as Secretary for Scotland, with a seat in the Cabinet. Soon afterwards he was appointed Chief Secretary for Ireland, and created a reputation for unusual sagacity and administrative ability in that office. He also developed his ability as an orator during this period to such an extent that he became celebrated as one of the most effective speakers in Parliament. In 1891, he was made First Lord of the Treasury, and until 1895 was the leader of his Party. In 1898, he was given charge of the Foreign Office, and on the resignation of Lord Salisbury in 1902, his nephew became Prime Minister. For three and a half years the government of England during a critical period of her history lay in his hands, until his resignation on December 4, 1905, when he was succeeded by Campbell-Bannerman. He remained the leader of the Unionists, however, and received in addition many distinguished academic honors, including the Chancellorship of Edinburgh University. When the coalition Cabinet under Asquith was formed in 1915, he was made First Lord of the Admiralty, and when Lloyd-George succeeded to the Premiership in December, 1916, he was made Secretary of State for Foreign Affairs. He was the head of the English Commission which visited the United States in April, 1917, and was received with the marked honor to which his valuable services to his country so well entitled him.

Ballard, David W., governor of Idaho Territory, removal of, referred to, 3794.

Ballard, Henry E.; naval officer; b. in 1785, in Maryland; lieutenant in command of United States frigate *Constitution* in famous action with British cruisers *Cyane* and *Lerant*, in Bay of Blaisy, in 1815; died May 23, 1855, in Annapolis, Md.

Ballard, Henry E., commander of the *United States*, 1273.

Ballinger, Richard Achilles, of Seattle, Wash., Secretary of the Interior in President Taft's Cabinet; b. Boonesboro, Iowa, July 9, 1858; graduated from Williams College, Mass., 1884; Sept. 1, 1897, moved to Seattle, Wash.; engaged in active practice until 1904, when he was elected mayor of Seattle; 1907, Commissioner of the General Land Office; chairman of the Washington State delegation to the national convention which nominated Hon. Wm. H. Taft for the Presidency.

Balmaceda, José M., President of Chile, mentioned, 5618.

Bancroft, George; historian; b. Carrington, Henry B., provision for compensation to, for services rendered in Indian matters, 5499.

Carroll, Anna Ella; author, lawyer and strategist; b. Aug. 29, 1815, in Somerset Co., Mo. Her father, Thomas K. Carroll, was governor of Maryland in 1829-30. The family was related to that of Charles Carroll of Carrollton, a signer of the Declaration of Independence. Anna Ella read law in her father's office and wrote for the press. Her more important works were "The Great American Battle; or, Political Romanism," "The Star of the West," "Reconstruction," "War Powers of the Government," and a pamphlet in answer to John C. Breckinridge's speech favoring secession delivered in Congress in 1861. The latter was circulated in large numbers by the War Department. At the outbreak of the civil war she freed her slaves and used her social influence to prevent Maryland from seceding from the Union. At the request of President Lincoln she went to St. Louis in 1861 to gather information on the proposed federal military expedition down the Mississippi River. After investigation she advised against the project and recommended that the heart of the confederacy be attacked by way of the Cumberland and Tennessee Rivers. Upon her advice and information Gen. Halleck sent Gen. Grant and Commodore Foote with a flotilla of gunboats and 17,000 men up the Tennessee where Fort Henry was taken, and later Fort Donelson on the Cumberland. The final capture of Vicksburg was also accomplished by following the line of attack laid out by Miss Carroll. She continued to send plans and suggestions to the War Department throughout the war. The authorship of the plan of campaign in the West was unknown except to the President and his cabinet until after the war. Miss Carroll never received adequate compensation for her services to the cause of the Union. A bill to grant her the pay of a major general was introduced in Congress in 1881, but failed of passage. She died Feb. 19, 1894, in Washington.

Carroll, Charles, of Carrollton; author, statesman; b. Sept. 20, 1737, in Annapolis, Md.; able political writer and advocate of independence; elected to Continental Congress in 1776, and signed the Declaration of Independence; devoted himself to the councils of his own state from 1778 to 1789, when he was elected Senator under the Constitution; died Feb. 14, 1832, in Baltimore, Md.; the last surviving signer of the Declaration of Independence.

Amherst County, Va., Feb. 24, 1772; moved with his father to Georgia in 1783; studied law and commenced practice at Lexington; appointed to prepare a digest of the laws of Georgia in 1799; member of the state house of representatives 1803-1807; elected a United States Senator from Georgia in place of Abraham Baldwin, deceased, serving from Dec. 9, 1807, to March 3, 1813; elected President pro tempore of the Senate March 24, 1812; declined the position of Secretary of War offered him by President Madison, and accepted the mission to France, serving from April 3, 1813, to April 22, 1815; returned home to act as agent for the sale of the land donated by Congress to La Fayette; accepted the position as Secretary of War Aug. 1, 1815, and transferred to the Treasury Oct. 22, 1816, serving until March 7, 1825; defeated as the Democratic candidate for President in 1825; on account of illness declined the request of President J. Q. Adams that he remain Secretary of the Treasury; returned to Georgia and appointed judge of the northern circuit court in 1827, which position he held until his death, at Elberton, Ga., Sept. 15, 1834.

Crawford, William H., mentioned, 1227.

Creswell, John A. J., Postmaster-General under President Grant; b. Port Deposit, Cecil Co., Md., Nov. 18, 1828. He was thoroughly educated, his parents being wealthy and ambitious for his future prospects. After studying in the schools in his neighborhood he was sent to Dickinson College, Carlisle, Pa., from which he was graduated with the highest honors in 1848. He at once began to study law, and in 1850 was admitted to practice at the bar of Maryland. Eventually he took rank as one of the foremost lawyers in Maryland. From the time when he cast his first vote as a whig, Mr. Creswell was earnest and enthusiastic in his study of politics, and in his consideration of party relations. He was a nominee from Cecil County, appointed by the whig party, to the general convention which was held in Maryland in 1850, for the purpose of remodeling the constitution of the commonwealth. In the autumn of 1861 Mr. Creswell was elected as the representative of Cecil County in the legislature of the state, and in the following year was appointed Adjutant-General of Maryland. In 1863 he was chosen a member of the United States house of representatives. There he made his mark by delivering an eloquent speech, in which he favored the abolition of slavery. In 1865 he was elected a member of the United States Senate, to fill out the unexpired term of Gov. Thomas H. Hicks, who died in Washington, Feb. 13, 1865. March 5, 1869, he was appointed Postmaster-General, being recommended for the position not only by his political friends in Maryland, but by Vice-President Cuffey, Senator Ben Wade and other prominent Republicans. Mr. Creswell served in the cabinet for five years and four months, and during his administration succeeded in introducing into that department many valuable reforms. On June 22, 1874, he was appointed counsel of the United States in connection with the court of commissioners sitting on the Alabama claims, and, having resigned the postmaster-generalship a few days later, he continued to serve in that capacity until Dec. 21, 1876. Mr. Creswell died at Elkton, Dec. 23, 1896.

Cridler, Thomas W., special commissioner to Paris Exposition, report of, transmitted, 6329.

Crittenden, John Jordan; soldier, lawyer; b. Dainese, F., claim of, for salary while acting consul at Constantinople, 2957, 2958.

Dallas, Alexander J.; statesman; Secretary of the Treasury under President Madison, and previously acting Secretary of State by three successive appointments under Presidents Washington and Adams, also acting Secretary of War, 1815-16; b. June 21, 1759, in Jamaica; of Scotch parentage; educated in Edinburgh and Westminster, he read law, contracted an early marriage, returned to Jamaica and then migrated to the United States and located in Philadelphia in 1783; admitted to practice in 1785, and for a time edited the *Columbian Magazine*; was an active politician and founder of the Pennsylvania Democratic Society in 1793; besides "Features of Jay's Treaty," he published an edition of the State Laws from 1700 to 1801, and "Reports of Cases in the United States and Pennsylvania courts before and after the Revolution (4 vols., 1796-1807). (See Supreme Court Reports.)" President Jefferson appointed him United States Attorney for the Eastern District of Pennsylvania, which position he held until called by Madison to head the Treasury Department at a critical juncture; the government was practically bankrupt; Dallas advised a loan and the organization of a bank to float the same, but the bill therefor was vetoed by President Madison (page 540); Dallas then managed to allay the fears of the business world as to an extensive issue of treasury notes, and these were received at par; he succeeded, in April, 1816, in having the Bank of the United States chartered with a capital of \$35,000,000; prepared the Tariff Law of 1816, under which business throughout the country received a new impetus (page 760); acting as Secretary of War subsequent to March, 1815, he reduced the army to a peace footing; published "Exposition of the Causes and Character of the War of 1812-15"; died Jan. 16, 1817, in Philadelphia.

Dallas, George Mifflin (1792-1864); statesman; b. Philadelphia; United States Senator from Pennsylvania, 1831-33; minister to Russia, 1837-39; Vice-President of the United States with Polk, 1845-49; was United States minister to England, 1856-61.

Dalton, Tristram; legislator: b. Newbury, Mass., in May, 1843, member of both branches of the Massachusetts legislature, and was chosen speaker of the house; elected to the first United States Senate under the Constitution; died Boston, May 30, 1817.

Dalton, Tristram, on committee to conduct inaugural ceremony of President Washington, 40.

Dana, E. T., arrest and maltreatment of, at Heidelberg, Baden, 2772.

Dana, Francis; lawyer, jurist: b. in Charlestown, Mass., June 13, 1743; delegate from Massachusetts to the Continental Congress, 1776-79, and in 1784 signed the Articles of Confederation; secretary of legation to Paris under John Adams; appointed minister to Russia, but not officially received; appointed minister to France, 1797, but declined; chief justice of State court, 1791-1806, when he resigned; died Cambridge, Mass., April 25, 1811.

Dana, Francis, minister to France, nomination of, and reasons therefor, 235.

Danforth, Henry G., b. June 14, 1854, in the town of Gates (now part of Rochester), Monroe County, N. Y.; educated in private schools in Rochester, at Phillips Exeter Academy, Exeter, N. H., and was graduated from Harvard College in 1877, from the Harvard Law School in 1880; was admitted to the bar in 1880; elected to the 62d, 63d and 64th Congresses from New York.

Daniel, Peter Vyvian; lawyer, jurist: b. Stafford Co., Va., April 24, 1784; served in State legislature and as lieutenant-governor; appointed judge of United States District Court for Virginia, 1836, and in 1840 was made justice of the Supreme Court of the United States; died Richmond, Va., June 30, 1860.

Daniel, Peter V., Supreme Court Justice, death of, referred to, 3250.

Daniels, Jared W., member of Indian commission, 5579.

Daniels, Josephus, Secretary of the Navy under President Wilson; b. Washington, N. C., May 18, 1862; son of Josephus and Mary (Cleves) Daniels; received an academic education in Wilson (N. C.) Collegiate Institute; a newspaper man by profession; his field of journalism began when, between the ages of fifteen and sixteen, he started a little paper in Wilson called *The Corruption*, of which he was the amateur editor; at the age of eighteen was the editor of the *Wilson (N. C.) Advance*, a weekly paper; admitted to the bar in 1885, but did not practice law; became editor Raleigh (N. C.) *State Chronicle* in 1885; married Addie W., daughter of Major W. H. Bagley, May 2, 1888, and has four sons; state printer for North Carolina, 1887-1893; chief clerk, Department of the Interior, 1893-1895; trustee University of North Carolina and member of the executive committee of the board of trustees; in 1891 he consolidated the *State Chronicle* and the *North Carolinian* with the *News and Observer*, and has since been its editor; has been the North Carolina member of the Democratic national committee for twenty years; nominated, confirmed, and commissioned Secretary of the Navy, March 5, 1913.

Daniels, William H., collector of customs, suspension of, referred to, 4741.

Dart, Anson, official conduct of, referred to, 3015, 3016.

Davenport, James S.; b. near Gaylesville, Cherokee County, Ala., Sept. 21, 1864; moved to Conway, Faulkner County, Ark., where he was educated in the public schools and the academy at Greenbrier, Ark., read law and was admitted to the bar; Feb. 14, 1890; in October of that year moved to Indian Territory, and continued the practice of his profession; has been twice married, in 1892 to Cullielma Ross, who died in 1898, and on June 15, 1907, to Miss Byrd Ironside, both citizens by blood of the Cherokee Nation; he served two terms in the lower house of the Cherokee Legislature from 1897 to 1901, being elected speaker the latter term, the only intermarried white man who ever held that position; was selected one of the attorneys for the Cherokee Nation and held that position until March 4, 1907; twice elected mayor of Vinita, 1903 and 1904, voluntarily retiring at the end of his second term; elected to the 60th, 62d, 63d and 64th Congresses from Oklahoma.

David, Pierre Jean, bust of Lafayette presented to Congress by, 992.

Davidson, Francis S.:

Act for relief of, 6736.

Vetoed, 6773.

Davidson, James H.; b. Colechester, Delaware Co., N. Y., June 18, 1858; graduated Albany Law School 1884 and was admitted to the bar of New York; subsequently moved to Wisconsin and commenced the practice of law at Princeton in 1887; in 1888 was elected prosecuting attorney of Green Lake County; in 1892 removed to Oshkosh; in 1895 was appointed city attorney; elected to the 55th, 56th, 57th, 58th, 59th, 60th, 61st, 62d and 64th Congresses from Wisconsin.

Davis, Charles Henry; American naval officer; b. Boston, Mass., Jan. 16, 1807; d. Washington, D. C., Feb. 18, 1877; entered the navy in 1823, became commander in 1854, and served as chief of staff and captain of the fleet in the expedition under Dupont which captured Port Royal, S. C., in 1861; in command of the Mississippi gunboat flotilla he overcame the Confederate fleet off Port Pillow May 10, 1862; and again off Memphis June 6, 1862, on which day he received the surrender of the Confederate commander; promoted to rear-admiral Feb. 7, 1863; wrote "The Coast Survey of the United States" (1849), and "Narrative of the North Polar Expedition of the U. S. *Polaris*" (1876).

Davis, Charles Henry:

Correspondence regarding squadron at Rio Janeiro and the Paraguay difficulties, 3890.

Pittsfield, Ill.; moved to Lesueur Co., Minn., at an early age; admitted to the bar and practiced law for more than thirty years in Minnesota; served for two years in the house of representatives, and four years in the State senate of Minnesota; elected to the 58th, 59th, 60th, 61st, 62d, 63d and 64th Congresses from Minnesota.

Davis, Cushman Kellogg; diplomat and statesman; b. Henderson, Jefferson County, N. Y., June 16, 1838; received a common school and collegiate education, graduating from the University of Michigan in June, 1857; lawyer; first Lieutenant in the Twenty-eighth Wisconsin Infantry 1862-1864; member of the Minnesota legislature in 1867; United States district attorney for Minnesota 1868-1873; governor of Minnesota 1874-1875; elected to the United States Senate as a Republican to succeed Hon. S. J. R. McMillan, and took his seat March 4, 1887; twice re-elected and served until his death, at St. Paul, Minn., Nov. 27, 1900; member of the commission which met at Paris, France, in Sept., 1898, to arrange terms of peace between the United States and Spain; died at St. Paul, Minn., Nov. 27, 1900.

Davis, Cushman K., member of Spanish-American Peace Commission, 6322.

Davis, David (1815-1886); jurist and statesman; b. in Cecil Co., Md.; associate justice of the United States Supreme Court, 1862-77; nominated for President by the Labor-Reform party against Grant, 1872; United States Senator from Illinois, 1877-83; when Arthur succeeded to the Presidency, Davis was acting Vice-President, 1881-83.

Davis, George W., member of board to consider expedition to be sent for relief of Lady Franklin Bay Expedition, 4813.

Davis, J. C. Bancroft, Acting Secretary of State, 4178.

Davis, Jefferson (1808-1889); statesman; b. in Christian Co., Ky.; graduated West Point, 1828; took part in the Black Hawk and Mexican wars; member of Congress from Mississippi, 1815-46; United States Senator from Mississippi, 1847-51; Secretary of War under Pierce, 1853-57; United States Senator, 1857-61; president of the Confederate States, 1862; arrested near Irwinsville, Ga., 1865; imprisoned in Fortress Monroe, 1865-67, and amnestied, 1868.

Davis, Jefferson:

Correspondence of governor of South Carolina with President delayed by, 3195.

Declaration of, and advisability of attempting negotiations with, discussed, 3455.

Imprisonment of, and reasons for not placing upon trial, inquired into, 3572.

Report of Attorney-General regarding, referred to, 3576.

Negotiations with, for restoration of peace discussed and correspondence regarding, 3461.

Official acts of, in Virginia declared null and void, 3535.

Reward offered for arrest of, 3505.

Persons claiming, directed to file claims, 3551.

Day, William R.; lawyer, diplomat; Secretary of State under President McKinley; commissioner to conclude the peace treaty between the United States and Spain in

1898; b. April 17, 1849, in Ravenna, Ohio; his father and his maternal grandfather and great-grandfather were eminent lawyers; he was educated in Ohio public schools and the University of Michigan; began practice in Canton, Ohio, and was offered position of U. S. District Judge by President Harrison; personal friendship for Mr. McKinley drew him into politics; and he was appointed Assistant Secretary of State under Secretary John Sherman, and upon the latter's resignation Mr. Day succeeded to the cabinet position. War had been declared against Spain, and it was due to Secretary Day's skill in diplomacy that the conflict was confined to the two nations directly concerned. When Spain asked peace terms Mr. Day signed the protocol providing for a commission of five members to meet at Paris to conclude the final terms. He presided over the commission, and signed a treaty of peace Dec. 10, 1898, and upon his return to the United States, was appointed U. S. Circuit Judge of the Sixth Judicial Circuit, and in February, 1903, became an associate Justice of the Supreme Court. Mr. Day married in Canton, Ohio, and had four sons, William L., Luther, Stephen and Rufus.

Day, William R.:

President of Spanish-American Peace Commission, 6322.

Secretary of State, 6476.

Dearborn, Henry (father of H. A. S. Dearborn), Secretary of War under President Jefferson; b. Hampton, N. H., Feb. 23, 1751; received a public school education; studied medicine; began practicing in 1772; captain during the Revolutionary War; moved to Monmouth, Me., in June, 1784; elected brigadier-general of militia in 1787; and made major-general in 1789; appointed United States marshal for the district of Maine in 1789; elected a Representative from one of the Maine districts of Massachusetts to the 3d Congress as a Democrat, and reelected to the 4th Congress, serving from Dec. 2, 1793, until March 3, 1797; appointed Secretary of War, and served from March 4, 1801, until March 7, 1809; appointed collector of the port of Boston by President Madison in 1809, which position he held until Jan. 27, 1812, when he was appointed senior major-general in the United States Army; in command at the capture of York (now Toronto), April 27, 1813; recalled from the frontier July 6, 1813, and placed in command of the city of New York; appointed minister plenipotentiary to Portugal by President Monroe, and served from May 7, 1822, until June 30, 1824, when, by his own request, he was recalled; returned to Roxbury, Mass., where he died June 6, 1829.

De Camp, John, thanks of Congress to, recommended, 3277.

Decatur, Stephen; naval officer; b. Sinepuxent, Md., January, 1779; entered navy 1798; February, 1804, entered the harbor of Tripoli with a small party and burned the American frigate *Philadelphia*, which had been captured by Barbarian; for this act he was promoted to captain; active in War of 1812, as commander of *United States and President*; commander of squadron sent to Mediterranean, 1815, and captured two Algerine war vessels and dictated treaty of peace to Dey of Algiers; killed in a duel near Bladensburg, Md., March 22, 1820, by Commodore James Bar-

Decatur, Stephen:

Captain in Navy, advancement of, to grade of, referred to, 362.

Claims of, arising from recapture of the *Philadelphia*, 1025.

Commander of the *United States*, 506.

Remains of, removed to United States, 4834.

De Martens, M. F., arbitrator, in Venezuelan boundary dispute, 6338.

Denby, Charles:

Member of Commission to Philippine Islands, 6584.

Minister to China, regulations for consular courts promulgated by, 5388.

Dennison, William, Governor of Ohio (1860-62), and postmaster-general under President Lincoln; b. Cincinnati, Nov. 23, 1815. He was graduated from Miami University in 1835, was admitted to the bar in 1840, and settled at Columbus, Ohio, where after some years of legal practice, he became president of a bank and of a railroad, and was sent to the legislature in 1848-50. In 1856 he was a member of the Pittsburgh convention which organized the Republican party, and of that which met at Philadelphia, June 17th, and nominated J. C. Fremont. As governor in 1860-62 he was

very active in supporting the war by raising troops and supplies, as well as in protecting the border; some of his measures at this time were thought to be at least extra-constitutional. It was through Gov. Dennison's efforts that West Virginia was saved to the Union. He assured the Unionists of that state that if they would break off from old Virginia and adhere to the Union, he would send the necessary military force to protect them. When it became necessary to redeem this pledge, Gov. Dennison sent Ohio militia, who, uniting with the loyal citizens, drove the Confederates out of West Virginia. When the general government was about to refund to Ohio money used for military purposes, the state auditor and the attorney-general decided that this money could not legally be used again for military purposes. Gov. Dennison, therefore, through his personal agents, caused it to be collected from the federal government, and used it for military purposes instead of turning it into the Ohio state treasury. It was again refunded to Ohio, again collected by his agents, and was thus used over and over again, so that he intercepted in all \$1,077,600. It was a high-handed measure, but justifiable on the ground of public necessity. He presented satisfactory accounts, and vouchers to the legislature for every dollar, and no shadow was ever cast upon him or his officers who disbursed it. In 1864 he presided over the national convention of his party at Baltimore, and was called into the cabinet by President Lincoln in October, 1864, as post-master-general. This post he held until July, 1866. He reappeared in the political field as a member of the national convention of 1880 and a candidate for United States Senator, but was not elected. He was a benefactor of Dennison University, founded in 1831 at Granville, Ohio. Gov. Dennison died June 15, 1882.

Denniston, William H., act for relief of, vetoed, 4222.

Dent, Stanley Hubert, Jr.; b. Enfaula, Ala., Aug. 16, 1869; graduated from the Southern University, of Greensboro, Ala., with the degree of A. B., in 1886, and in 1889 was graduated in law from the University of Virginia; elected to the 61st Congress from Alabama, receiving 10,754 votes, none being cast against him, and re-elected to the 62d Congress without opposition; and later to the 63d and 64th Congresses.

Depew, Chauncey Mitchell; b. Peekskill, N. Y., April 23, 1834; graduated from Yale College in 1856, and in 1887 received the degree of LL. D. from his alma mater; admitted to the bar in 1858, elected to the assembly in 1861 and 1862; in 1863 candidate for secretary of state, and reversed the Democratic success of 1862, being elected by 30,000 majority; in 1866 appointed attorney for the New York & Harlem Railroad Company; made general counsel of the New York Central & Hudson River Railroad Company in 1875; president of the New York Central & Hudson River Railroad in 1885; resigned in 1899 to become chairman of the boards of directors of the New York Central, the Lake Shore, the Michigan Central, and the New York, Chicago & St. Louis Railroad companies; elected to the United States Senate from New York in 1899; re-elected 1905.

De Poiery, Mr., captain by brevet, nomination of, and reasons therefor, 67.

Derrick, W. S., Acting Secretary of State, 2613.

Dewey, George; Admiral of the Navy; b. Montpelier, Vt., Dec. 26, 1837; graduated Annapolis Naval Academy, 1858, and assigned to Mediterranean squadron; served throughout Civil War in navy of lower Mississippi River and Gulf of Mexico, and later with North Atlantic squadron; commander of *Varrigansett*, 1870; had charge of Pacific survey and Secretary of Lighthouse Board, 1872-82; captain-commander of the *Dolphin*, of White Squadron, 1881; commodore, 1896; assigned to Asiatic squadron, Nov. 30, 1897; April, 1898, following British declaration of neutrality, left port of Hong Kong, arriving at Manila Bay April 30, with nine vessels and 1,694 men; May 1, destroyed the Spanish fleet of thirteen vessels and reduced the five batteries defending the city; raised to rank of acting rear-admiral and received vote of thanks and sword; Congress, 1899, re-created rank of Admiral, and President McKinley appointed Dewey to the office previously held only by Farragut and Porter. Admiral Dewey died Jan. 16, 1917.

Recommended, 6297.

Reply of, 6302.

Thanks of President tendered, 6568.

Referred to, 6297.

Suggestions from, regarding force, etc., for Philippine Islands requested by President, 6580.

Devens, Charles, Attorney-General under President Hayes; b. Charlestown, Middlesex Co., Mass., April 4, 1820, the son of Charles and Mary Lithgow Devens, and grandson of Richard Devens, a revolutionary patriot. His maternal grandfather was Col. Arthur Lithgow, of Augusta, Me. Charles entered Harvard, from which he was graduated in 1838. He subsequently studied law in the Harvard Law School, and afterward with Hubbard & Watts of Boston. In 1841 he was admitted to the bar, and at once began the practice of his profession at Northfield, later removing to Greenfield. In 1848-49 he served as a member of the state senate, and from the latter year until 1853 as United States marshal for the district of Massachusetts. When the Civil War broke out he enlisted in the cause of the Union, and on April 19, 1861, was unanimously elected major of the third battalion rifles—three full companies with which he at once proceeded to the front. On July 26th of the same year Major Devens was made colonel of the fifteenth regiment Massachusetts volunteers. He was brevetted brigadier-general during the siege of Yorktown, and took command

of a brigade in Couch's division, fourth army corps. Gen. Devens was severely wounded at the battle of Fair Oaks, but would not leave the field until the fall of night terminated the hostilities for the day. At the battle of Antietam his horse was shot from under him, and for gallant conduct while in command of a brigade at Fredericksburg he was complimented by the general commanding the division. At the request of Gen. Grant, Gen. Devens in April, 1865, was commissioned major-general by brevet for gallantry and good conduct at the capture of Richmond. He was mustered out of service, at his own request, at Washington, in June, 1866, after a brilliant military career of five years and three months. He was elected national commander of the G. A. R. to succeed Gen. Burnside, and has also served as commander of the Military Order Loyal Legion of Massachusetts, as well as of the military societies of the army of the Potomac and of the James, and of the sixth army corps. In 1867 Gov. Bullock appointed Gen. Devens one of the judges of the superior court of Massachusetts, and in 1873 Gov. Washburn made him one of the judges of the supreme court. On March 10, 1877, he became a member of President Hayes's cabinet, taking the portfolio of Attorney-General. Upon returning to Massachusetts, Gen. Devens was reappointed to the supreme bench by Gov. Long.

Dexter, John S., district supervisor, nomination of, 91.

Dexter, Samuel, Secretary of War under President John Adams; b. Massachusetts, May 14, 1761; graduated from Harvard College in 1781; studied law and admitted to the bar; member of the state house of representatives, 1788-1790, elected a Representative from Massachusetts to the 3d Congress as a Federalist; elected to the United States Senate, serving from Dec. 2, 1799, until he resigned in June, 1800; appointed Secretary of War, May 13, 1800, and Secretary of the Treasury, Dec. 31, 1800; declined the mission to Spain offered him by President Madison; while on his way home with his family from Washington, D. C., died at Athens, N. Y., May 3, 1816; published *The Progress of Science* (a poem), 1780, also *Speeches and Political Papers*, and several other political pamphlets.

Diaz, A. J., arrest and imprisonment of, by Cuban authorities, 5516.

Diaz, Porfirio, revolution in Mexico and installation of, as President, 4419, 6333.

Dick, Charles; lawyer; b. Akron, Ohio, Nov. 3, 1858; served in the Eighth Ohio Volunteer Infantry in Cuba in the war with Spain; represented the Nineteenth Ohio District in the 55th, 56th, 57th, and 58th Congresses; instrumental in securing the enactment of the Dick Militia law, and raising pay of army and navy; elected March 2, 1904, United States Senator for the short and long terms from Ohio.

Dickerson, Mahlon (brother of Philemon Dickerson), Secretary of the Navy under Presidents Jackson and Van Buren; born at Hanover, N. J., April 17, 1770; graduated from Princeton College in 1789; studied law and in 1773 was admitted to the bar; began the practice of his profes-

sion at Philadelphia; quartermaster-general of Pennsylvania, 1805-1808; recorder of the city court of Philadelphia, 1808-1810; returned to New Jersey; member of the state house of representatives in 1814; governor of New Jersey, 1815-17; elected United States Senator from New Jersey as a State Rights Democrat; serving from December 1, 1817, to March 2, 1833; appointed Secretary of the Navy June 30, 1834, and reappointed by President Van Buren; United States district judge of the district of New Jersey; delegate to the state constitutional convention in 1844; president of the American Institute, 1846-1848; died at his home in Succasunna, Morris County, N. J., Oct. 5, 1853.

Dickinson, Don. McDonald, Postmaster-general under President Cleveland, born Jan. 17, 1846, at Port Ontario, Oswego Co., N. Y. His ancestors were among the early settlers of Massachusetts, and his father and grandfather natives of the state. The first of the family who came to America was John Dickinson, a member of the Continental congress of 1774, president of the executive council, and one of the founders of Dickson College, Carlisle, Pa., to whom Jonathan Dickinson, chief justice of the province of Pennsylvania in 1719, was also related in the direct line. The father of Mr. Dickinson in 1820 explored the shores of lakes Erie, Huron and Michigan in a birch-bark canoe, and in 1848 removed to Michigan, settling in St. Clair county, where his son received his primary education in the public schools, and entering the law department of the University of Michigan, was graduated before reaching his majority. The interval prior to his admission to the bar he spent in studying the management of cases and the practical application of the philosophy and logic of law. In 1867 he entered upon a successful and lucrative practice, being concerned in all of the leading cases under the bankruptcy act of that year. In 1872 he entered political life, and in 1876, as chairman of the state democratic central committee, conducted the Tilden campaign, being brought into close relations with that statesman until his death. As member of the national democratic committee in 1884-85, he enjoyed the full confidence and esteem of President Cleveland, who in 1888 called him to a seat in his cabinet, being the fourth representative of Michigan to be honored thus.

Dickinson, Jacob McGavock, of Nashville, Tenn., Secretary of War in President Taft's Cabinet; b. Jan. 30, 1851, Columbus, Miss.; graduated from the University of Nashville; studied law at Columbia College, New York, in Paris, and at the University of Leipzig; LL. D., Columbia University of New York, University of Illinois and Yale; Assistant Attorney-General of the United States from Feb. 13, 1895, to March 8, 1897; in 1903 appeared as counsel for the United States before the Alaskan Boundary Tribunal in London; Assistant Professor of Latin in the University of Nashville; served several times by special appointment as judge on the Supreme Bench of Tennessee; was General Counsel of the Illinois Central Railroad Company at the time of appointment as Secretary of War.

Dickson, James C., receiver of public moneys, nomination of, withdrawn and reasons therefor, 1040.

Dickson, Walter, outrages committed on family of, in Palestine, 3015.

Dies, Martin; b. in Jackson Parish, La., March 13, 1870; moved to Texas with his parents in 1876; elected county judge of Tyler County in 1894; district attorney of the first judicial district of Texas in 1898; elected to the 61st, 62d, 63d and 64th Congresses from Texas.

Dillingham, William Paul; b. Waterbury, Vt., Dec. 12, 1843; admitted to the bar in 1867; member of the Vermont house of representatives in 1876 and again in 1884; a state senator in 1878 and again in 1880; governor of Vermont from 1888 to 1890; Oct. 18, 1900, was elected United States Senator from Vermont to fill a vacancy caused by the death of Justice S. Morrill; Oct. 15, 1902, elected to succeed himself, and re-elected Oct. 21, 1908, for the term ending March 3, 1915.

Dingle, W. B., arrest and maltreatment of, at Heidelberg, Baden, 2772.

Dingley, Nelson, Jr. (1832-1899); statesman; b. Durham, Me.; for thirty years (1856-86) he was editor of the *Leviston Journal*; sat in the State Legislature, 1862-73; and was speaker, 1863-64; governor of Maine, 1874-75; sat in Congress, 1881-99; framed the Dingley tariff bill of 1897.

Dinsmore, Silas, commissioner to treat with Indians, 423.

Dix, John Adams; soldier, statesman; b. Rosawen, N. H., July 24, 1798; joined the army in 1812 and served through the second war with England; while serving in the army studied law, and in 1828 resigned his commission as captain and took up practice of law at Cooperstown, N. Y.; served as adjutant-general and secretary of state of New York; was elected to the state legislature and United States Senator; appointed Secretary of the Treasury, Jan. 9, 1861; while in this position, with the Confederacy organized and the authority of the Federal Government defied in the South, he sent to Lieutenant Caldwell in the revenue service at New Orleans the historic message: "If any one attempts to haul down the American flag, shoot him on the spot"; organized and sent into service during the Civil War seventeen regiments of militia; major-general of volunteers, June, 1861; as commander of the Seventh Army Corps he secured control of the whole country between the Pamunkey and Rappahannock rivers, and cut off Gen. Lee's communication with Richmond, and had the Confederate capital almost at his mercy in June, 1862, when he was ordered to fall back to the defense of Washington; during the draft riots in New York, in 1863, he was appointed commander of the Department of the East and succeeded in subduing the disorder and restoring business confidence; first president of the Union Pacific Railway Company, 1863-68; served through the Civil War, and was appointed minister to France; and later was elected governor of New York, 1872; died New York City, April 21, 1879.

Dix, John A.:

Applications to go south across military lines to be made to, 3302.

Authority given to, while commanding at Baltimore, 3313.

Commissioner to examine cases of State prisoners, 3310.

Mentioned, 3279.

Prisoners of war released to report to, 3303.

Dixon, Lincoln; b. Vernon, Jennings Co., Ind., Feb. 9, 1860; elected prosecuting attorney for the sixth judicial circuit of the state in 1884; re-elected in 1886, 1888, and 1890; was elected to the 59th, 60th, 61st, 62d, 63d and 64th Congresses from Indiana.

Dobbin, James Cochrane, Secretary of the Navy under President Pierce; born at Fayetteville, N. C., in 1811; graduated from the University of North Carolina in 1832; studied law, and admitted to the bar in 1825; began practicing at Fayetteville; elected a Representative from North Carolina to the Twenty-ninth Congress as a Democrat; declined to be a candidate for re-election; member of the house of commons in 1848, 1850, and 1852, and in 1850 was speaker; delegate to the national Democratic convention at Baltimore in 1852; Secretary of the Navy from March 7, 1853, to March 6, 1857; died at Fayetteville, N. C., Aug. 4, 1857.

Dodge, Grenville M.; engineer, soldier; b. Danvers, Mass., April 12, 1831; received a liberal education and graduated at the military university, Norwich, Vt.; studied civil engineering; chief engineer of the Union Pacific Railroad; entered the Union Army as a captain and left the service as a major-general; elected a Representative from Iowa to the 40th Congress as a Republican; located in New York City, but still retained residence in Iowa; president of Society of Army of Tennessee; president of New York commandery of Loyal Legion; president of commission to inquire into the management of the war with Spain; extensively interested in western railroad building and management; vice-president of the Grant Monument Association.

Dodge Henry (father of Augustus C. Dodge); soldier and statesman; b. Vincennes, Ind., Oct. 12, 1782; received a limited education; emigrated to Missouri; served in the Black Hawk and other Indian wars; left the army as colonel of the First United States Dragoons July, 1836; governor of Wisconsin from July 4, 1836, to 1841; elected a delegate from Wisconsin to the 27th Congress as a Democrat; re-elected to the 28th Congress; again appointed governor of Wisconsin, Feb. 6, 1846; elected United States Senator from Wisconsin as a Democrat, and re-elected, serving from June 23, 1848, to March 3, 1857.

Dodge, Henry, troops in Indian campaign under command of, 1332.

Dodge, William E.; merchant; b. Hartford, Conn., Sept. 4, 1805; received a liberal education; moved to New York in 1818; became a clerk in a store, and in 1826 commenced business on his own account; established the house of Phelps, Dodge & Co., of which he was the head for forty years; delegate to the peace convention in 1861; claimed to have been elected a Representative from New York to the 39th Congress (James Brooks having received the certificate of election and taken his seat), and on April 6, 1866, the House decided that Mr. Dodge was entitled to the seat, serving from April 6, 1866, to March 3, 1867; died Feb. 9, 1883, at New York City.

Dodge, William E., member of Indian commission, 3977.

Dole, Sanford Ballard; judge of the supreme court of Hawaii, head of the provisional government of Hawaii, and president of the republic of Hawaii from the

overthrow of the kingdom till the annexation of the islands to the United States; b. Hawaii, April 23, 1844, of American parents; admitted to the bar in Boston, and returned to Hawaii; the provisional government, of which he was the head, negotiated a treaty of annexation with the United States, but President Cleveland withdrew the treaty and requested President Dole to relinquish to the queen her authority in the islands; Dole refused and later (1898) visited the United States and Congress passed an act annexing the islands to the United States.

Dole, Sanford B.:

Member of commission to recommend legislation for Hawaiian Islands, 6333.

Minister of foreign affairs of provisional government of Hawaii, letter from, transmitted, 5906, 5907.

Sovereignty of Hawaiian Islands transferred to United States by, 6332.

Dole, William P., treaty with Indians concluded by, 3393, 3394, 3395, 3400, 3402, 3411, 3413.

Dorn, Andrew J., commissioner for the United States, treaty made by, with the Senecas, August, 1854, 2829.

Doty, James Duane; statesman; b. New York in 1799; received a common school education; moved to Menasha, Wis.; elected a delegate from Wisconsin to the 25th and 26th Congresses; governor of Wisconsin 1841-1844; elected a Representative from Wisconsin to the 31st Congress as a Democrat and to the 32d Congress as a Free-soil Democrat; appointed treasurer of Utah and governor of that Territory in 1864 by President Lincoln; died at Salt Lake City, June 13, 1865.

Doty, James D.:

Mentioned, 3397.

Treaty with Indians concluded by, 1912.

Doughton, Robert L.; b. Laurel Springs, N. C., Nov. 7, 1863; educated in the public schools and at Laurel Springs High School; farmer, stock raiser, and banker; president of the Deposit and Savings Bank of North Wilkesboro, N. C.; elected to the state senate from the thirty-fifth senatorial district November, 1908; elected to the 62d, 63d and 64th Congresses from North Carolina.

Douglas, James, governor of Vancouver Island, repayment of sum advanced by, recommended, 3067.

Douglas, Stephen Arnold (1813-1861); politician; b. Brandon, Vt.; elected judge of the supreme court of Illinois, 1841; member of Congress from Illinois, 1843-47; United States Senator, 1847-61; author of the "Squatter sovereignty" doctrine, and reported the Kansas-Nebraska bill, 1854; nominated by the Democratic party in 1860 against Lincoln for the Presidency; he was known as the "Little Giant."

Douglass, Frederick, recorder of deeds, District of Columbia, resignation of, referred to, 5116.

Drexel, Joseph W., chairman of executive committee on pedestal of Statue of Liberty Enlightening the World, 4982.

Driscoll, Daniel A.; b. Buffalo, N. Y., March 6, 1875; elected to the 61st, 62d, 63d and 64th Congresses from New York.

Drum, Richard C., Adjutant-General:

Union and Confederate flags, return of, to respective States, recommended by, 5163.

Proposition withdrawn, 5164.

Duane, William J.; printer, editor, author, lawyer; Secretary of the Treasury under President Jackson; b. 1780, in Clonmel, Ireland; part of his boyhood was spent in India, but his father came to America in 1795, and edited a paper, the *Aurora*, published in Philadelphia; the son learned the printing trade and devoted some years to the business, and also studied law; admitted to the bar in 1815; he was deeply interested in education, and his legal ability won him fame and fortune; he was selected by Stephen Girard to draw the will by which that noted philanthropist bequeathed some \$6,000,000 to educational and eleemosynary institutions in Philadelphia; every effort was made by Girard's relatives to break the will, but the terms were so explicit that not a flaw could be found in it; Mr. Duane's wide reputation as a lawyer induced President Jackson to appoint him in 1833 Secretary of the Treasury upon the refusal of Secretary McLane to remove the public deposits from the Bank of the United States upon the order of the President; Mr. Duane, after his appointment, also refused to remove the deposits, and Jackson removed him from the office and appointed Roger B. Taney, who acceded to the President's demands; Mr. Duane resumed the practice of law in Philadelphia, where he died Sept. 27, 1865; he published "Narrative and Correspondence Concerning the Removal of the Deposits," 1838; "The Law of Nations Investigated," 1809; "Letters on Internal Improvements," 1811.

Dullye, Eugene, expulsion of, from Prussia, 3123.

Dunbar, William, appointed to explore Washita River, 387.

Dunham, Aaron, district supervisor, nomination of, 91.

Dunlap, Robert P.; lawyer; b. Maine in 1789; graduated from Bowdoin College in 1815; studied law; began practicing at Brunswick, Me.; member of the State house of representatives 1821-1823 and of the State senate 1823-1832; president of the State senate four years; an executive councillor in 1833; governor of Maine 1834-1838; elected a Representative from Maine to the 28th Congress as a Democrat, and re-elected to the 29th Congress; collector of customs at Portland, Me., 1848-49; president of the board of overseers of the Bowdoin College; died at Brunswick, Me., Oct. 20, 1859.

Dunlap, Robert P.:

Correspondence regarding imprisonment of Ebenezer S. Greely, 1575, 1622.

Correspondence regarding northeastern boundary. (See Northeastern Boundary.)

Du Pont, Henry Algernon; b. Eleutherian Mills, Newcastle Co., Del., July 30, 1838; entered the University of Pennsylvania at Philadelphia in 1855, and United States Military Academy July 1, 1856; commissioned second lieutenant, Engineers, 1861; first lieutenant, Artillery, 1861; served with honor throughout Civil War; twice brevetted for gallant and meritorious services, and awarded a medal by Congress; resigned

from the army, 1875, and became president and general manager of the Wilmington and Northern Railroad Company; elected United States Senator June 13, 1906, from Delaware to serve the unexpired portion of the term beginning March 4, 1905.

Dupont, Samuel F.:

Mentioned, 3279.

Thanks of Congress to, recommended, 3265, 3271.

Dupre, Henry G.; b. Opelousas, St. Landry Parish, La., July 28, 1873; educated in the public schools at Opelousas and graduated in 1892 from the Tulane University of Louisiana, at New Orleans, with the degree of bachelor of arts; subsequently received the degree of bachelor of laws from the same institution; served as assistant city attorney of New Orleans from 1900 to 1910; elected to the House of Representatives of Louisiana; re-elected in 1904 and in 1908; elected speaker of the House of Representatives of Louisiana for the session of 1908; elected to the Sixty-first Congress Nov. 8, 1910, to fill the unexpired term occasioned by the death of the Hon. Samuel L. Gilmore; re-elected to the 62d, 63d and 64th Congresses.

Dyer, Leonidas C.; b. Warren County, Mo., June 11, 1871; educated in the public schools, Central Wesleyan College, at Warrenton, Mo., and the law department of the Washington University, city of St. Louis; served as assistant circuit attorney of St. Louis; served in the Spanish War; elected to the 62d, 63d and 64th Congresses from Missouri.

Eads, James Buchanan; engineer; b. May 23, 1820, in Lawrenceburgh, Ind.; became self-supporting at an early age in St. Louis, and during his spare time applied himself to the study of engineering and allied sciences without the aid of school or teacher; while clerk on a Mississippi River steamboat he invented the diving-bell boat to recover cargoes from sunken vessels, and, later, a larger boat, to pump sand and water from sunken vessels and raise the cargo intact. These inventions proved successful and profitable and Mr. Eads in 1845 established a glass factory in St. Louis, the first west of Ohio; in 1856 he proposed to Congress a plan to remove all snags, sunken hulks, wrecks and other obstructions from the western rivers; the measure passed the house but failed in the senate for want of time. At the outbreak of civil war he was engaged by President Lincoln to construct light draught gunboats to patrol western and southern rivers. Inside a hundred days he had built eight iron-clad steamboats carrying 107 large guns. These were the first iron-clads built in the United States, and were used in the capture of Fort Henry Feb. 6, 1862 (q. v.), more than a month before the *Merrimac* and *Monitor* were finished; later constructed six turreted iron vessels, in which 11-inch and 15-inch guns, worked by steam, were loaded and fired every forty-five seconds, on a different plan from those of Ericsson and Coles, constituting the first manipulation of heavy artillery by steam. Eads' next important achievement was the design and construction, from 1867 to 1874, of the steel arch bridge over the Mississippi at St. Louis, a marvel of engineering skill. In 1874 he began the work of deepening the mouth of the Mississippi by building parallel jetties out into the sea across the bar of sediment that had been deposited by the spreading waters. This problem had baffled the skill of engineers for forty years; the price agreed upon was \$5,250,000, and to secure the first payment half the work had to be executed. President Grant (page 4362) and President Hayes (page 4524) made reports on the progress of the work which was completed in 1879; published a plan for a ship railway across the Isthmus of Tehuantepec, Mexico, by which ships and their cargoes could be safely and inexpensively transported from ocean to ocean; engaged to devise improvements for St. John's River, Florida; Sacramento River, California; the harbor of Toronto, Canada; the port of Vera Cruz, Mexico; visited the great rivers and canals of Europe, Asia and Africa; received degree of LL.D. from University of Michigan; first American to receive the Albert medal (British); died March 16, 1887, in Nassau, N. Y.

Eads, James B.:

Grants to, for construction of jetties in Mississippi River, order regarding, 4282.

Improvement of South Pass of Mississippi River, under, discussed, 4362, 4524.

Eaton, Dorman B., chairman Civil Service Commission, report of, discussed, 4588.

Eaton, John, publication of second edition of Second Arctic Expedition suggested by, 4666.

Eaton, John Henry; Secretary of War under President Jackson; b. Tennessee in

1800; received a liberal education; studied law and admitted to the bar; practiced at Nashville; elected United States Senator from Tennessee (in place of George W. Campbell, resigned), and unanimously re-elected, serving from Nov. 16, 1818, to March, 1829, when he resigned; appointed Secretary of War; resigned June 18, 1831; appointed governor of Florida 1834-1836; minister to Spain 1836-1840; died at Washington, D. C., Nov. 17, 1856.

Eaton, John H., treaty with Indians concluded by, 1271.

Eaton, William:

Correspondence regarding war with Tripoli transmitted, 379.

Eckert, T. T., negotiations for and correspondence regarding restoration of peace, 3461.

Edgcomb, Willard W., treaty with Orange Free State concluded by, 4116.

Edmunds, George F.; lawyer, President *pro tem* of Senate; b. Feb. 1, 1828, in Richmond, Vt.; received a public school education and the instruction of a private tutor; studied and practiced law; member of the State legislature of Vermont in 1854, 1855, 1857, 1858, and 1859, serving three years as speaker; a member of the State senate, and its presiding officer *pro tempore* in 1861 and 1862; appointed to the United States Senate as a Republican to fill the vacancy caused by the death of Solomon Foot, and took his seat April 5, 1866; in the Senate he had charge of the tenure of office act, and was active in the impeachment proceedings against President Johnson; he helped to secure the passage of the reconstruction measures; sided with Grant in his difficulties with Sumner, Schurz, and Trumbull; member of the Electoral Commission in 1876-77; with Senator Thurman he pushed through the Pacific Railroads funding act; was the sponsor in the Senate of the act for the suppression of polygamy in Utah; when Vice-President Arthur became President Senator Edmunds was elected President *pro tempore* of the Senate; at the Republican National Conventions held in Chicago in 1880 he received 34 votes for the nomination for President of the United States, and four years later received 43; elected by the legislature for the remainder of the term ending March 4, 1869; re-elected for the terms ending in 1875, 1881, 1887, and 1893; resigned Nov. 1, 1894; member of the electoral commission of 1876; after leaving the United States Senate he moved to Philadelphia, Pa., where he engaged in the practice of law.

Edwards, Charles Gordon; b. Taitnall Co., Ga., July 2, 1878; educated at Gordon Institute, Barnesville, Ga., Agricultural College, Lake City, Fla., and the University of Georgia, graduating B. L. from the latter 1898; moved to Savannah; Oct. 11, 1906, elected to the 60th, 61st, 62d, 63d and 64th Congresses from Georgia.

Edwards, Ninian; lawyer, jurist; b. In Montgomery Co., Md., March, 1775; moved to Kentucky and was twice elected to the legislature; later judge of the general court of Kentucky, of the circuit court, of the court of appeals, and finally chief justice of the state, all before reaching his thirty-second year; appointed by President Madison to be governor of Il-

Illinois Territory in 1809, to which office he was three times reappointed; when Illinois was admitted to the Union, he was elected to the United States Senate, serving from 1818-24; elected governor in 1826, serving till 1831; died of cholera in Belleville, Ill., July 20, 1833.

Edwards, Ninian:

Minister to Mexico, examination of, by committee referred to, 808.

Treaty with Indians concluded by, 589.

Egan, Patrick, minister to Chile. (See *Baltimore*, The.)

Ehrman, Felix, consular correspondence of, 6788, 6792.

Ekin, James A., member of commission to try assassins of President Lincoln, etc., 3534.

Elder, Samuel S., member of Gun Foundry Board, 4748.

Elkins, Stephen Benton; b. Perry Co., Ohio, Sept. 26, 1841; was admitted to the bar in 1864, and went to New Mexico, and began the practice of law; was a member of the Territorial legislative assembly of New Mexico in 1864-65; elected to the 43d and 44th Congresses; later moved to West Virginia and devoted himself to business affairs; appointed Secretary of War Dec. 17, 1891, in President Harrison's Cabinet; in 1894 was elected to the United States Senate from West Virginia, and re-elected in 1901 and 1907.

Ellerbe, James Edwin; b. near Marion, S. C., Jan. 12, 1867; entered Wofford College, at Spartanburg, S. C., 1884, spending three years; graduated, 1887; A. B.; elected to the state legislature; elected to the 59th, 60th, 61st and 62d Congresses from South Carolina without opposition.

Ellery, Charles, lieutenant in Navy, nomination of, and reasons therefor, 1129.

Ellicott, Andrew, United States commissioner for running line between United States and Spanish possessions, 962.

Ellis, Albert G., treaty with Indians concluded by, 2529.

Ellis, Powhatan, Minister to Mexico: Mentioned, 1790.
Nomination of, 1537.

Ellsworth, Oliver (1745-1807); jurist and statesman; b. Windsor, Conn.; represented Connecticut in the United States Senate, 1789-96; received 11 electoral votes for President in the third electoral college, 1796; chief justice of the United States Supreme Court, 1796-1800; minister extraordinary to France, 1799.

Ellsworth, Oliver, minister to France, nomination of, 274.

Emerson, John B., petition of, regarding use of his invention referred to, 2528.

Emery, A. H., compensation to, for services in perfecting testing machine recommended, 4540.

Emmons, G. T., reports on Alaskan Indians, 7071.

Emory, U. E., map of Texas compiled by, 2166.

Emory, W. H., report on survey of boundary between Mexico and United States transmitted, 2915.

Emory, William H., commander of the *Bear* in Lady Franklin Bay Expedition, 4835.

Endicott, William Crowninshield, Secretary of War under President Cleveland; born in Salem, Mass., Nov. 19, 1826. He was the son of William Putnam and Mary (Crowninshield) Endicott. He is descended directly from Gov. John Endicott, who came to Salem in 1628, and on his mother's side is a grandson of the Hon. Jacob Crowninshield, who was a well-known member of congress in the early part of this century. Mr. Endicott was educated in Salem schools and in 1843 entered Harvard, from which he was graduated in 1847. Soon after graduating he studied law in the office of Nathaniel J. Lord, then the leading member of the Essex bar, and in the Harvard Law School at Cambridge. He was called to the bar in 1850, and began the practice of law in Salem in 1851. He was a member of the Salem common council in 1852, and in 1853 he entered into partnership with Jairus W. Perry (who is well known throughout the country as the author of "Perry and Trusts") under the firm name of Perry & Endicott. From 1857 to 1864 he was solicitor of the city of Salem. In 1884 he was the Democratic candidate for governor of Massachusetts, but was defeated. In 1885 he became secretary of war, and held office to the end of Mr. Cleveland's term. Mr. Endicott is president of the Peabody Academy of Science in Salem, which position he has held since 1868, and is a member of the corporation of Harvard, and one of the trustees of the Peabody Education Fund.

Endicott, William C., Secretary of War: Union and Confederate flags, return of, and Confederate flags, return of, to respective states recommended, 5163.

Proposition withdrawn, 5164.

Eno, Amos F., secretary of Arkansas, appointment of, revoked, 3377.

Ericsson, John; engineer, inventor; b. Langbanshyttan, Sweden, July 31, 1803; appointed cadet in the Swedish corps of engineers, 1814, and rose to the rank of captain; early displayed precocious talent as an inventor; made many improvements in the application of artificial draught to locomotives, and in 1829 built an engine which, in competition with Stephenson's locomotive, ran a mile in 56 seconds, and inaugurated the era of rapid railway travel; English indifference to his inventions caused him to move to America in 1839; here he applied the screw propeller principle to steamboats, and in 1843 to United States war ships; originated the range-finder; discarded the breeching for heavy guns, and placed the machinery of war vessels below the water line, and protected it with coal bunkers; made the first practical application of twin screw propellers; the success of his ironclad *Mon-*

itor in defeating the *Merrimac* at Hampton Roads, Va., March 9, 1862, stayed the rising tide of Confederate success and compelled the reconstruction of the navies of the world: he devoted the last years of his life and extended a fortune in experimenting on machines to utilize the heat of the sun to generate motive power; invented a solar engine which he left as a legacy to future time when the coal mines shall cease to supply the world with a concentrated form of fuel; died in New York City, March 8, 1889, and his remains were transferred with national honors to his native land and buried at his birthplace.

Ericsson, John:

Memorial of American Society of Mechanical Engineers relating to, transmitted, 5565.

Restoration of remains of, to Sweden, discussed, 5547.

Erving, George W.:

Instructions to, upon appointment as minister to Spain, in 1814, and during his mission to that court as United States plenipotentiary, 2210.

Esch, John Jacob; b. Norwalk, Monroe Co., Wis., March 20, 1861, of German parents; in 1865 his parents moved to Milwaukee, and five years later to Sparta, Wis.; elected to the 56th, 57th, 58th, 59th, 60th, 61st, 62d, 63d and 64th Congresses from Wisconsin.

Espy, James P., meteorological report of, transmitted, 2777.

Estacourt, James B. B., commissioner of Great Britain in northeastern boundary question, report of, 2023.

Estopinal, Albert; b. in the parish of St. Bernard, La., Jan. 30, 1845; elected to the Louisiana house of representatives in 1876 and 1878; elected to the state senate in 1880, and served continuously in that body until 1900, when he was elected lieutenant-governor of the state and served four years in that position; served in the Confederate army, surrendering to Gen. Canby, at Meridian, Miss., in March, 1865; elected to the 60th Congress to fill a vacancy, and succeeded to the 61st, 62d, 63d and 64th Congresses from Louisiana.

Eustis, Abraham:

Correspondence regarding Dorr's Rebellion, 2153.

Troops under, in Seminole War, 1834.

Eustis, William, Secretary of War under President Madison; born at Cambridge, Mass., June 10, 1753; graduated from Harvard College in 1772; studied medicine, and served in the Revolutionary Army as surgeon; resumed his practice at Boston; elected a Representative to the Seventh Congress as a Democrat, and re-elected to the Eighth Congress; Secretary of War from March 7, 1809, to Jan. 19, 1813; minister to the Netherlands Dec. 19, 1814, to May 5, 1818; again elected to the Seventeenth Congress; elected governor of Massachusetts in 1823, and served until his death, at Boston, Feb. 6, 1825.

Evans, John:

Geological survey of Oregon and Washington by, referred to, 3016.
Treaty with Indians concluded by, 3393.

United States Senator, 3573.

Evans, Robley D., mentioned, 6297.
Delegated to entertain Prince Henry of Prussia, 6704.

Evarts, William Maxwell; lawyer; b. Boston, Mass., Feb. 6, 1818; leading counsel employed to defend President Johnson in his trial before the Senate, and was Attorney-General of the United States, 1868-69; one of the three lawyers appointed to defend the interests of the United States before the tribunal of arbitration at Geneva in 1871 to settle the Alabama claims; maintained the unconstitutionality of state laws taxing United States bonds and National Bank stock; one of the counsel to defend Henry Ward Beecher in 1875; delivered the oration at the opening of the Centennial Exposition in 1876; his orations also include eulogies of Chief Justice Chase, William H. Seward, and Daniel Webster; Secretary of State under President Hayes in 1877-81; elected United States Senator from New York for term beginning March 4, 1885, and was twice re-elected; died New York City, Feb. 28, 1901.

Evarts, William M.:

Counsel for President Johnson in impeachment proceedings, 3924.

Secretary of State, first proclamation as, convened Congress in extraordinary session to provide for supply of army, 4399.

Everett, Edward (1794-1865); statesman; b. Dorchester, Mass.; Eliot professor of Greek at Harvard College, 1815; editor of the *North American Review*, 1820-24; representative in Congress, 1825-35; governor of Massachusetts, 1836-40; United States minister to Great Britain, 1841-45; president of Harvard, 1846-49; Secretary of State, 1852-53; United States Senator, 1853-54; candidate for the Vice-Presidency, as nominee of the Constitutional Union party, in 1860, with John Bell, against Lincoln; his orations on Washington and on Gettysburg, delivered 1863, are his best-known rhetorical works.

Everett, Edward:

Mentioned, 2082, 2169, 2910.

Secretary of State, 2727.

Ewing, Thomas (1789-1871); statesman; b. in West Liberty, Ohio Co., Va.; taken in childhood to Ohio, he studied and practised law there with eminent success; United States Senator, 1837-1847, 1850-51; Secretary of the Treasury, under Harrison, 1841, but resigned because Tyler vetoed a national bank bill of which Ewing was part author; first secretary of the Interior, 1849-50; opposed Clay's compromise bill and the fugitive slave bill; and supported Lincoln's war policy.

Ewing, Thomas, Secretary of Treasury, mentioned, 2010.

Exeta, Carlos:

Extradition proceedings in case of, transmitted, 5544, 5992.

Faben, J. W., Dominican minister, mentioned, 4017.

Fairbanks, Charles Warren; lawyer, legislator, and twenty-sixth Vice-President of the United States; b. Union Co., Ohio, 1852; removed to Indianapolis, 1874, and admitted to the bar in that year; elected United States Senator, 1897, to succeed Daniel W. Voorhees, and re-elected, 1903; Joint High Commissioner at Quebec to adjust Canadian difficulties, 1898; Vice-President of the United States with Roosevelt, 1905-1909.

Fairchild, Charles Stebbins, Secretary of the Treasury under President Cleveland; born in Cazenovia, N. Y., April 30, 1842. His father was Sidney T. Fairfield, for many years attorney for the New York Central R. R., and one of the leading men of central New York. Young Fairchild studied at the common schools and at the Oneida Conference Seminary at Cazenovia, where he prepared for a university course, and went to Harvard in 1859, graduating in the class of 1863. He determined to follow the legal profession, entered the Harvard Law School, and completed the prescribed course in 1865, receiving the degree of Bachelor of Laws. He then removed to Albany, where he continued his legal studies, and in 1866 was admitted to the bar; April 1, 1887, President Cleveland appointed him secretary of the treasury. He continued to fill that office until the close of Mr. Cleveland's administration in March, 1889.

Fairchild, Lucius:

Letter of, and memorial relative to Paris Exposition transmitted, 3668. Member of Cherokee Commission, 5481.

Fairfield, John, correspondence regarding northeastern boundary. (See Northeastern Boundary.)

Faris-El-Hakim, maltreatment of, in Egypt, and indemnity for, referred to, 3278.

Farman, Mr., mentioned, 4564.

Farnsworth, Hiram W., treaty with Indians, concluded by, 3277, 3413.

Farr, John R.; b. Scranton, Pa., July 18, 1857; educated in public schools, School of the Lackawanna, Scranton, Pa., Phillips Academy, Andover, Mass., and Lafayette College, Easton, Pa.; newsboy, printer, publisher, in the real estate business; served in the Pennsylvania House of Representatives, 1891, 1893, 1895, 1897, 1899; speaker session of 1899; author of free school book and compulsory education laws; elected to the 62d, 63d and 64th Congresses from Pennsylvania.

Farragut, David Glasgow; Admiral of the Navy; b. Campbell's Station, near Knoxville, Tenn., July 5, 1801; entered the navy as midshipman, 1810; promoted to commander in 1841; ordered to Vera Cruz in Mexican War too late for service; began operations, during Civil War, against New Orleans, April 24, 1862; opened the lower Mississippi and twice ran the batteries at Vicksburg; July 16, 1862, Congress created the rank of rear-

admiral, and conferred it with thanks upon Farragut; Aug. 5, 1864, he passed the fortifications and floating batteries of Mobile Bay, and maintained a blockade of the city till November; for this exploit he was presented by the citizens of New York with \$50,000 to buy a home, and Congress created the higher rank of vice-admiral, and the President nominated Rear-Admiral Farragut for the office; July 25, 1865, the exalted rank of admiral was established, and the Senate confirmed Farragut therein; in command on James River at fall of Richmond; died in Portsmouth, N. H., Aug. 14, 1870, and buried in Woodlawn Cemetery, New York.

Farragut, David G.:

Thanks of Congress to, recommended, 3276.

Thanks of President tendered, 3440.

Farwell, John V., member of Indian commission, 3977.

Fauchet, Mr., attempted seizure of, by commander of the *Africa*, 3344.

Faure, President, death of, 6367.

Fay, Theodore S., mentioned, 2205.

Fergusson, Harvey B.; b. Sept. 9, 1848, in Pickens County, Ala.; educated at Washington and Lee University, graduating with the degree of M. A., in 1874; and in the law department in 1875; practiced law in Wheeling, W. Va., from 1876 to 1882; removed in 1882 to New Mexico; residing at Albuquerque; delegate in the 55th Congress; member of the Democratic national committee from 1896 to 1904; elected as Representative in Congress from New Mexico at the first state election on Nov. 7, 1911, and again to the 63d and 64th Congresses.

Ferris, Scott; b. Nov. 7, 1877, Neosho, Newton Co., Mo.; graduated from Kansas City School of Law, 1901; elected to the legislature of Oklahoma in 1904, representing the twenty-second district; elected to the 60th, 61st, 62d, 63d and 64th Congresses from Oklahoma.

Ferry, Thomas W.; lumberman, legislator; b. June 1, 1827, in Mackinac, Mich.; received a public school education; engaged in lumber business with his father and brothers at Grand Haven; member of the house of representatives of Michigan, 1850; State senate, 1856; vice-president for Michigan in the Chicago Republican Convention, 1860; appointed 1864 to represent Michigan on the board of managers of the Gettysburg Soldiers' National Cemetery, and re-appointed 1867; elected to 39th, 40th, and 41st Congresses, and re-elected to the 42d Congress, but did not take his seat, having been elected to the United States Senate to succeed Jacob M. Howard, Republican; took his seat in the Senate March 4, 1871; chosen President *pro tempore* March 9 and 19, and again Dec. 20, 1875, and by the death of Vice-President Wilson became acting Vice-President, serving as such until March 4, 1877; actually President from 12 o'clock noon Sunday, March 4, 1877, till the same hour next day, when President Hayes was inaugurated; represented President Grant at the opening of the Centennial Exposition in Philadelphia, July 4, 1876; re-elected a Senator Jan. 17, 1877; re-elected President *pro tempore* of the Senate March 5, 1877, Feb. 26, 1878, April 17, 1878, and March 3, 1879; died in 1896.

Fessenden, William Pitt (1806-1869); statesman; b. at Boscawen, N. H.; began the practice of law at Portland, Me., about 1828; member of Congress, 1854; United States Senator from Maine, 1854-64, and 1865-69; Secretary of the Treasury, 1864-65, during one of the gloomiest financial periods in the history of the United States; when gold was at 280, and paper at 34 cents on the dollar, Fessenden issued the "seven-thirties," and gold fell to 199. He was one of the seven Republican Senators who voted "not guilty" in the Johnson impeachment proceedings.

Field, Cyrus W., gold medal presented to, 3901.

Field, Stephen J., associate justice Supreme Court, assault upon by David S. Terry, 5477.

Northeastern boundary. (See Northeastern Boundary.)

Outrages committed by Canadians on American frontiers, 1618.

Francis, David R.; merchant; Secretary of the Interior under President Cleveland; b. Oct. 1, 1850, in Richmond, Ky.; educated at Richmond Academy and Washington University at St. Louis; began commercial life in the wholesale grocery business in St. Louis and in 1877 established a commission business and engaged in the exportation of grain; President of the St. Louis Merchants' Exchange in 1884; elected Mayor of St. Louis in 1885, and Governor of Missouri in 1888; in 1896 President Cleveland appointed him Secretary of the Interior; for the purpose of taking practical charge of the Louisiana Purchase Exposition, held in St. Louis in 1904, Mr. Francis was made president of a company having twenty-four standing committees; the State of Missouri appropriated \$1,000,000 for a State exhibit, the city of St. Louis \$5,000,000, the federal government \$5,000,000, and by private subscription another \$5,000,000 was raised; to the management of this vast enterprise Mr. Francis devoted his time and energy without compensation.

Francis, John Brown; b. Philadelphia, Pa., May 31, 1794; on the death of his father he was reared by Nicholas Brown, of Providence, R. I., receiving a classical education and graduated from Brown University in 1808; attended the Litchfield Law School; never practiced; became interested in agricultural pursuits; secretary of the State Agricultural Society; a representative from Warwick in the State legislature in 1824, 1826-1828 and 1832; elected gov-

ernor in 1832 as a Jackson and Antimasonic candidate, serving until 1838; State senator in 1843; chancellor of Brown University 1841-1854; elected United States Senator (vice William Sprague, resigned), as a Law and Order candidate, serving from Feb. 7, 1844, to March 3, 1845; again State senator in 1847, 1849 and 1852-1854; died at Warwick, R. I., Aug. 9, 1864.

Francis, John B., correspondence regarding Dorr's Rebellion, 2141.

Francis, William B.; b. Updegraff, Jefferson County, Ohio, of German and Irish parentage; admitted to practice law in 1889; practiced in all State and Federal courts; delegate to the Democratic national convention at St. Louis in 1904; elected to the 62d, 63d and 64th Congresses from Ohio.

Franklin, Benjamin; author, printer, philosopher; b. Boston, Mass., Jan. 17, 1706; published "Poor Richard's Almanac," 1732-37, and later established a newspaper, and after that a magazine; he was the father and patron of the American Philosophical Society; postmaster of Philadelphia, and Postmaster-General for the Colonies; for his scientific investigations into the nature of lightning he was elected F. R. S. in 1775; was active in founding what later became the University of Pennsylvania; as early as 1754 he proposed a scheme of union for the thirteen colonies under a central government; served the American colonies as commissioner to England, where he secured the repeal of the stamp act, and did much to avert the revolution, but when his efforts at conciliation failed, became one of the signers of the Declaration of Independence, which he helped draft; acted as a diplomatic agent of the United States at Paris during Revolution; delegate in 1787 to the convention which drew up the United States Constitution; president of the Supreme Council of Pennsylvania (in effect governor of the State) 1785-88; died at Philadelphia, April 17, 1790.

Franklin, Benjamin, letter from President and decree of National Assembly of France on death of, 87.

Franklin, John; British rear-admiral; b. Spilsby, Lincolnshire, England, April 16, 1786; joined the navy in childhood and served at Copenhagen, Trafalgar and New Orleans (1815); led Arctic expeditions, 1818, 1819, 1825 and 1845; elected F. R. S., 1823, and knighted in 1829; set out in command of the *Erebus* and *Terror* (1845) in search of a northwest passage between the Atlantic and Pacific oceans north of America; after three years, no tidings having been received of the expedition, relief ships were sent out, and traces of the party were found, but it was not until 1859 that Captain McClintock, in command of the *For*, sent out by Lady Franklin in search of her husband, found a paper from one of the ships bearing the legend: "Sir John Franklin died June 11, 1847."

Franklin, Sir John, expedition in search of missing ships under command of: Recommended, 2563.

Referred to, 2624.

Gwin, William M.:

Immigration plans of, referred to, 3571.

Mentioned, 2570.

Habersham, Joseph, soldier and Postmaster-General under Presidents Washington, John Adams and Jefferson; b. Savannah, Ga., July 28, 1751; his father, James, came from England to Savannah with Whitefield, the English evangelist, in 1738, and taught school for some years, but became a merchant in 1744, and was subsequently prominent in civil affairs. He raised the first cotton in the state, and sent the first few bales of cotton to England that went out from Georgia; three of his sons were zealous patriots, and Joseph was a member of the first committee appointed by the friends of liberty in his native colony, in July, 1774; in 1775 (June 11), with others, he seized the powder in the arsenal at Savannah, for the use of the colonists; during the same month he was made a member of the Georgia committee of safety. In July of that year he commanded a party which captured a British government vessel, having on board 15,000 pounds of powder; during the following Jan., and while a member of the colonial assembly, he raised a party of volunteers, which took Gov. Wright a prisoner, and confined him to his house under guard. Appointed (Feb. 4, 1776) major of the 1st Georgia battery, he defended Savannah from a naval attack early in March. In the winter of 1778, after the capture of Savannah by the British, he removed his family to Virginia, but participated in the unsuccessful attack upon that city while it was in the hands of the British in September, 1779; he was lieutenant-colonel at the close of the war; in 1785-86 he was a delegate from Georgia to the Continental Congress, and speaker of the state assembly in 1785, and in 1790; President Washington appointed him U. S. Postmaster-General in 1795, and he was continued in office by Presidents John Adams and Jefferson until 1801, when he resigned the position to become president (1802) of the United States Branch Bank at Savannah, which presidency he held until his death at Savannah Nov. 17, 1815. A county of his native state bears his name.

Hale, C. H., treaty with Indians concluded by 3403.

Hale, Eugene; b. Turner, Oxford Co., Me., June 9, 1836; received an academic education; studied law, was admitted to the bar in 1857, and commenced practice at the age of twenty; was a member of the Legislature of Maine in 1867, 1868 and 1880; was elected to the 41st, 42d, and 43d Congresses; appointed Postmaster-General by President Grant in 1874, but declined; was re-elected to the 44th and 45th Congresses, was tendered a Cabinet appointment as Secretary of the Navy by President Hayes, and declined; received the degree of LL. D. from Bates College, from Colby University, and from Bowdoin College; was elected to the United States Senate to succeed Hannibal Hamlin, for the term beginning March 4, 1881; was re-elected in 1887, 1893, 1899 and in 1905 to represent Maine.

Hale, John Parker (1806-1873); statesman; b. at Dover, N. H.; a member of Congress, 1843-45; United States Senator, 1847-53, and 1855-65; nominated for President by the Liberal party in 1847; and by the Free-Soil Democrats in 1852; in the latter part of his political career he was a Republican; United States minister to Spain, 1865-69; in the early days he stood almost alone in the Senate as an anti-slavery Democrat.

Ingalls, John J.; author, journalist, lawyer, statesman, orator; b. Dec. 29, 1833, at Middleton, Essex Co., Mass.; educated in public schools of Haverhill and graduated Williams College 1855; admitted to the bar in 1857 and the following year moved to Atchison, Kan., and entered actively into the political discussions which distraught the territory at the time; delegate to the Wyandotte Convention in 1859, and secretary of the territorial council; secretary of State Senate in 1861 and in the following year elected to that body; became editor of the *Atchison Champion*; unsuccessful candidate for Lieutenant Governor on the Republican ticket in 1862 and 1864; engaged in the practice of law and journalism till 1873, when he was elected to the United States Senate and served for eighteen consecutive years; he was an eloquent and convincing speaker; from 1889 to 1891 he was president *pro tem.* of the Senate, where his proficiency in parliamentary procedure was strikingly apparent; after leaving the Senate wrote for the press and practiced law until his death, Aug. 16, 1900.

Ingham, Samuel D., Secretary of the Treasury under President Jackson; b. Pennsylvania Sept. 16, 1779; attended the public schools; manager of a paper mill at Easton, N. J., for several years; member of the state legislature of Pennsylvania for three years; prothonotary at Philadelphia; elected a Representative from Pennsylvania to the 13th, 14th, and 15th Congresses as a Jackson Democrat, resigning July 6, 1818; elected a Representative to the 17th Congress, vice Samuel Moore, resigned; re-elected to the 18th, 19th, and 20th Congresses; Secretary of the Treasury from March 6, 1829, serving until Aug. 8, 1831, when he resigned; died at Trenton, N. J., June 5, 1860.

Innis, James, commissioner appointed by United States under treaty with Great Britain, 188.

Iredell, James (1751-1799); politician and jurist; b. Lewes, England; justice of the United States Supreme Court, 1790-1799; in the third electoral college he received three votes for President.

Iredell, James (1788-1853); politician and jurist; b. at Edenton, N. C.; governor of North Carolina, 1827-28; and United States Senator, 1828-31.

Irion, R. A., secretary of state of Republic of Texas, convention signed by, 1686.

Irvine, Callender, commissary-general of purchases, nomination of, discussed, 992.

Irwin, James T., act granting pension to, vetoed, 5044.

Irwin, John, commanding American naval forces at Honolulu, reports of, referred to, 5906.

Irwin, Walter R., treaty with Indians concluded by, 3896.

Izard, Ralph; patriot, statesman; b. near Charleston, S. C., in 1742; received classical education and graduated from Cambridge University, England; Delegate from South Carolina to the Continental Congress 1781-1783; elected United States Senator from South Carolina 1789-1795; appointed by the Continental Congress commissioner to Tuscan; recalled June 8, 1779; pledged his large estate in South Carolina for the payment of ships of war to be used in the Revolution; died near Charleston, S. C., May 30, 1804.

Izard, Ralph, on committee to conduct inaugural ceremonies of President Washington, 40.

Jackson, Andrew, biography of, 998.

Jackson, Henry R., minister to Mexico, resignation of, 5123.

Jacobs, Richard T., lieutenant-governor of Kentucky, arrest and imprisonment of, 3460.

Jacobs, Stephen, district attorney, nomination of, 91.

Jacoway, Henderson M., b. Dardanelle, Yell County, Ark., Nov. 7, 1870, and is the third son of Judge W. D. Jacoway; graduated from the Dardanelle High School at the age of 16 years and from the Winchester Literary College, Winchester, Tenn., in 1892; in 1898 graduated from law department of Vanderbilt University, receiving a degree of LL. B.; served as secretary of the Dawes Commission during the Cleveland administration; elected to the office of prosecuting attorney in 1904, and re-elected in 1906. Sept. 19, 1907, married Miss Margaret H. Cooper, daughter of Hon. S. B. Cooper, of Beaumont, Tex.; was elected to the 62d Congress from Arkansas, carrying every county in the district and nearly every voting precinct and re-elected to the 63d and 64th Congresses.

Jacques, William H., member of Gun Foundry Board, 4748.

James, Ollie M.; b. Crittenden Co., Ky., July 27, 1871; was admitted to the bar in 1891; was one of the attorneys for Governor Goebel in his celebrated contest for governor of the State of Kentucky; elected to the 58th, 59th, 60th, 61st, and 62d Congresses from Kentucky; elected to the United States Senate for term ending 1920.

James, *Thomas L.; printer, publisher, editor; Postmaster General under President Garfield; b. March 29, 1831, in Utica, N. Y.; left school at the age of fifteen and was apprenticed to a local printer; at twenty he became a partner in publishing the Madison County (N. Y.) *Journal*; the paper was Whig in politics, and as editor Mr. James attracted the attention of the leading men of the State; in 1861 he was appointed to a position in the office of the Collector of the Port of New York and in 1873 President Grant made him postmaster at New York; he declined the office of Collector of the Port, tendered by President Hayes, and was reappointed Postmaster; he declined the Republican nomination for Mayor of New York and Postmaster General under Hayes; March 5, 1881, Garfield named him for Postmaster General and he accepted the place; he found the service disorganized, many of the employees dishonest and an annual deficit of \$2,000,000; under his executive direction abuses were corrected, frauds punished and the service was made self-sustaining; declined to serve in Arthur's cabinet, returned to New York and entered the banking business.

Jarvis, Charles, correspondence regarding northeastern boundary. (See Northeastern Boundary.)

Jay, John (1745-1829); jurist and statesman; b. New York City; represented the State of New York in Congress, 1774-77, and drew up the constitution of New York, 1777; United States minister to Spain, 1780-82; peace commissioner with Adams and Franklin at Paris, 1783; sec-

retary for foreign affairs, 1784-89; first chief justice of the Supreme Court of the United States, 1789-95; concluded with England the treaty of 1791, known as Jay's Treaty, which conveyed to the United States the military posts of the northwest, erected the eastern boundary, provided for the payment of English debts and the settlement of American claims, restricted the United States trade with the West Indies, and defined the conditions of neutrality at sea; Jay was an unsuccessful candidate for governor of New York 1792; was special minister to Great Britain, 1794-95 and governor of New York, 1795-1801.

Jay, John, minister to Great Britain, nomination of, 146.

Jefferson, Thomas, biography of, 307.

Jenckes, Thomas A.; statesman; b. Cumberland, R. I., Nov. 2, 1818; graduated from Brown University in 1838; studied law, and in 1840 admitted to the bar; began practice at Providence; clerk in the State legislature 1840-1844; secretary of the State constitutional convention in 1842; adjutant-general 1845-1855; member of the State legislature 1854-1859; commissioner to revise the laws of the State in 1855; elected a Representative from Rhode Island to the 38th, 39th, 40th and 41st Congresses as a Republican; defeated as a Republican candidate to the 42d Congress; died at Cumberland, R. I., Nov. 4, 1875.

Jenckes, Thomas A., correspondence regarding Dorr's Rebellion, 2149.

Jenkins, Capt. (See *Baltimore*, The.)

Jesup, Thomas S., commander of forces in Seminole War, 1472.

Report of, referred to, 1697.

Jewell, Marshall, Governor of Connecticut (1869-70 and 1871-72), and Postmaster-General under President Grant; b. Winchester, N. H., Oct. 20, 1825; his American ancestry goes back to Thomas Jewell, who was granted land at Wollaston, Mass., shortly after the settlement of Massachusetts; he received a common school education and learned tanning under his father; in 1873, after having served two terms as governor, he was appointed minister to Russia, whence he was recalled to be made Postmaster-General in 1874; he was chairman of the Republican National Committee during the campaign that ended with Garfield's election to the presidency; he died at Hartford, Feb. 10, 1883.

Jewett, Milo A., consul of United States at Sivas, Turkey, directed to investigate Armenian atrocities, 5991.

Joffre, Joseph Jacques Césaire; b. near the Pyrenees in France in 1852. As a youth entered the Ecole Polytechnique (the French Military Academy) as a student of military engineering; and saw service during the Franco-Prussian War in 1870 as a sub-lieutenant of artillery in a Paris fortification. He became prominently and favorably known as a deep student of military engineering, and was made a captain in 1876. In 1885 he was active in the Indo-Chinese campaign, and was appointed a major in 1889. As a result of his brilliant services in Timbuctoo in 1894, he was made a lieutenant-colonel and was awarded the Legion of Honor. His thorough mastery of military science soon brought him appointment as professor in the Ecole de Guerre (School of

War). In 1901, he was made brigadier-general; in 1905, governor of Lille; in 1909, commander of the Second Army Corps. In 1911, he was made chief of the general staff, and as such became directing head of the army. He was in command at the battle of the Marne (see European War), and it was under his direction that the invading German armies were turned back from Paris; and he was later given command over all the allied armies on the Western front of battle. On December 12, 1916, he was retired as head of the Allied armies to become adviser to the French Government on the prosecution of the war; and on December 26 he was raised to the position of Marshal of France by special decree. He accompanied the French visiting delegation to the United States in April, 1917; and he was received with acclamation and especial honors everywhere in the United States.

Johnson, Andrew, biography of, 3499.

Johnson, Ben; b. near Bardstown, Nelson Co., Ky., May 20, 1858; elected to the Kentucky house of representatives in 1885 and 1887; elected member of the Kentucky state senate, but resigned Nov. 5, 1906; elected to the 60th, 61st, 62d, 63d and 64th Congresses from Kentucky.

Johnson, Cave, Postmaster-General under President Polk; b. Robertson County, Tenn., Jan. 11, 1793; received an academic education; studied law; admitted to the bar and began practice at Clarksville, Tenn.; appointed circuit judge; elected a Representative from Tennessee to the 21st, 22d, 23d, and 24th Congresses as a Democrat; defeated for the 25th Congress; re-elected to the 26th, 27th, and 28th Congresses; appointed Postmaster-General, serving from March 5, 1845, until March 5, 1849; president of the State Bank of Tennessee 1850-1859; elected to the state senate during the Civil War as a Unionist; died at Clarksville, Tenn., Nov. 23, 1886.

Johnson, Charles F.; b. Winslow, Me., Feb. 14, 1859; attended Waterville Classical Institute; graduated from Bowdoin College in 1879, which conferred upon him the degree of LL. D. In June, 1911; taught school and read law; admitted to the bar in 1886 and began practice in Waterville; Democratic candidate for governor of Maine in 1892 and 1894; member of the State Legislature in 1905 and 1907, serving both terms on the judiciary committee; delegate to the Democratic national convention in 1904; was grand master of the Grand Lodge A. F. & A. M. of Maine in 1906 and 1907; elected to the United States Senate to succeed the Hon. Eugene Hale for the term beginning March 4, 1911.

Johnson, George, claims of, against Uruguay, 2014.

Johnson, James, provisional governor of Georgia, appointed, 3516.

Johnson, Joseph Travis; b. Brewerton, Laurens Co., S. C., Feb. 28, 1858; graduated Erskine College, 1879; admitted to the practice of the law in all the courts of South Carolina, 1883; elected to the 57th, 58th, 59th, 60th, 61st, 62d, 63d and 64th Congresses from South Carolina.

Johnson, Reverdy (1796-1876); statesman and Cabinet officer; b. Annapolis, Md.; United States Senator from Maryland,

1845-49 and 1863-68; Attorney-General, 1849-50; United States minister to Great Britain, 1868-69; a treaty which he negotiated with Great Britain for the settlement of the Alabama Claims was rejected by the Senate.

Johnson, Reverdy:

Address of, on presenting to President proceedings of Union Convention in Philadelphia filed in impeachment trial, 3947.

Commissioner at New Orleans, report of, referred to, 3347.

Mentioned, 4014.

Johnson, Richard Mentor (1780-1850); statesman and ninth Vice-President of the United States; b. near Louisville, Ky.; elected to Congress, 1807, he became an ardent supporter of Madison's policies; raised and commanded a regiment of mounted riflemen in the War of 1812; supported Harrison at the Thames, 1813, and is believed to have killed Tecumseh in this battle; United States Senator, 1819-29; member of Congress, 1829-37; Vice-President with Van Buren, 1837, to which office he was elected by the United States Senate by default of an electoral majority; was candidate for re-election in 1840, but defeated.

Johnson, Richard M., military talents of, commented on, 520.

Johnson, R. M., compensation due, for erection of buildings for use of Choctaw academy, 2537.

Johnson, Samuel, president North Carolina convention, 62.

Johnson, William Samuel, appointed on committee to receive President Washington, 36.

Kellogg, William P.:

Candidate for governor of Louisiana, election disturbances discussed.

(See Louisiana, elections in.)

Mentioned, 4177.

Kendall, Amos; lawyer, editor, author; Postmaster General under President Jackson; b. Aug. 16, 1789, in Dunstable, Mass.; attended school at New Ipswich, N. H., and graduated from Dartmouth College in 1811; studied law in Groton, Mass.; travelled by way of Washington, D. C., to Kentucky, where he became a tutor in private families, including that of Henry Clay; admitted to the bar in Kentucky and made postmaster at Georgetown in 1814; became sole editor of the *Argus of Western America* at Frankfort, Ky., in 1816, and was interested in promoting the cause of education; appointed by President Jackson Fourth Auditor of the Treasury, 1829; acquired great influence in the administration and was largely the means of having the *Globe* newspaper supersede the *Telegraph* as the official organ; appointed Postmaster General in 1835; he found the department disorganized, corrupt and heavily in debt; within a year the debts were cleared, but Mr. Kendall had incurred the hostility of powerful mail contractors, who obtained judgments against him for claims he considered invalid; he started successively *Kendall's Expositor* and the *Union Democrat*, both of which failed; for the judgments against him he was imprisoned within the bounds of the District of Columbia; Congress later paid the claims and abolished the law of imprisonment for debt in the District; his reputation was established as an honest man and a pure, faithful, inflexible public officer; when he left the Post Office Department he received the most gratifying testimony to that effect from those who had associated with him; he later declined a foreign mission tendered by President Polk, and in 1845, associated with Prof. S. F. B. Morse in the development of the telegraph; this business brought him an ample fortune, which he devoted largely to benevolences; in 1865 he published in the *Washington Evening Star* a series of vigorous protests against the secession of the Southern States; at the outbreak of the Civil War he placed his house and grounds in Washington at the disposal of the government for the use of troops and spent a year in Trenton, N. J.; he published an incomplete "Life of Andrew Jackson"; died Nov. 12, 1869, in Washington.

Kennedy, Charles A.; b. Montrose, Iowa, March 24, 1869; mayor of his native town for four years; in 1903 he was elected to the Iowa legislature, serving two terms; elected to the 60th, 61st, 62d, 63d and 64th Congresses from Iowa.

Kennedy, John P.; Secretary of the Navy under President Fillmore; b. Baltimore, Md., Oct. 25, 1795; received a classical education; graduated from Baltimore College in 1812; studied law, and admitted to the bar in 1816; commenced practice at Baltimore; served in the war of 1812; State representative 1820-1822; appointed secretary to the legation at Chile, January 27, 1823, but resigned; defeated for the 25th Congress, but subsequently elected to the same Congress as a Representative from

Maryland (vice Isaac McKim, deceased), serving from April 30, 1838, to 1839; defeated for the 26th Congress; Presidential elector on the Whig ticket in 1840; elected to the 27th and 28th Congresses; Secretary of the Navy July 22, 1852, to March 7, 1853; died at Newport, R. I., Aug. 18, 1870.

Kennon, Beverly, court-martial of, referred to, 811.

Kent, Edward, correspondence regarding northeastern boundary. (See *Northeastern Boundary*.)

Kent, William; b. Chicago, Ill., March 29, 1864, and is the son of Albert E. and Adaline Elizabeth (Dutton) Kent; his parents moved to California in 1871 and settled in Marin County; preliminary education received in private schools in California and at Hopkin's Grammar School, New Haven, Conn.; entered Yale in 1883; and graduated in 1887, with the degree of A. B.; M. A. (honorary), Yale, 1908; located in Chicago to look after his father's business interests; in 1890 entered into partnership with his father, under the firm name of A. E. Lafferty, A. W.; b. Audrain County, Mo., June 10, 1875; attended the law department of the Missouri State University, admitted to the bar of the Supreme Court of Missouri, and practiced law at Montgomery City, Mo.; served three years with the rank of captain in the Missouri National Guard and one term as prosecuting attorney; in 1909 he was given the degree of LL. B. by the law department of the Missouri University; appointed special agent of the General Land Office, and was sent to Oregon, arriving at Portland the 1st of March, 1905; resigned as special agent of the Land Office and re-entered the private practice of law; instituted litigation in the Federal court in Oregon to compel the Oregon and California Railroad Company to sell 2,300,000 acres of lands granted to it by act of Congress in accordance with the terms of the grant, which require that the lands shall be sold by the railroad company to actual settlers only in quantities not greater than a quarter section to any one settler, and at prices not exceeding \$2.50 per acre; became a candidate for Congress in 1910 as a Progressive Republican, favoring greater liberality to homesteaders and the giving to Oregon the benefit of her own natural resources; was elected to the 62d, 63d and 64th Congresses from Oregon.

Lafitte, Jean. (See Barrataria, Island of.)

La Follette, Robert Marion; b. at Primrose, Dane Co., Wis., June 14, 1855; graduated from the State University of Wisconsin, 1879; admitted to the bar in 1880; elected a member of the 49th, 50th, and 51st Congresses; elected governor of Wisconsin in 1900, 1902, and 1904; elected to the United States Senate from Wisconsin, Jan. 25, 1905.

La Follette, William L.; b. Boone Co., Ind., Nov. 30, 1860, and went West at the age of 16 years, settling in eastern Washington; engaged in fruit, grain, and stock raising for 30 years, and served one term in the Washington legislature and on various appointive commissions; elected to the 62d, 63d and 64th Congresses from Washington.

Lamar, Lucius Quintus Cincinnatus, Secretary of the Interior under President Cleveland; b. Putnam County, Ga., Sept. 1, 1825; moved to Oxford, Miss.; graduated from Emory College, Oxford, Ga.; in 1845; studied law at Macon, and admitted to the bar in 1847; returned to Oxford, Miss., in 1849; served a year as professor of mathematics at the University of Mississippi; moved to Covington, Ga., and elected a State representative in 1853; returned to Lafayette County Miss.; elected a Representative from Mississippi to the 35th Congress as a Democrat, and re-elected to the 36th, serving until his retirement, Jan. 12, 1861, to become a member of the secession convention of Mississippi; served in the Confederate army as Lieutenant-colonel and colonel; in 1863 entered the diplomatic service of the Confederacy on a special mission to Russia; in 1866 elected professor of political economy and social science at the Uni-

versity of Mississippi, and in 1867 professor of law; elected a Representative from Mississippi to the 43d Congress and also to the 44th; United States Senator from Mississippi 1877 to March 6, 1885, resigning to accept the Secretaryship of Interior; in December, 1887, appointed associate justice of the United States Supreme Court; died at Vineville, Ga., Jan. 23, 1893.

Lambert, William, astronomical observations by, 680, 688, 789.

Lamont, Daniel Scott, Journalist and Secretary of War under President Cleveland; b. McGrawville, Cortland Co., N. Y., Feb. 9, 1851; he came of Scotch-Irish ancestry, who emigrated to this country and devoted themselves to farming; from such lineage sprung Andrew Jackson, John C. Calhoun, Horace Greeley, and many others of the most eminent men of America; young Lamont's father was a well-to-do farmer, and the boy, after having studied in the Cortland Normal College, was sent to Union College, Schenectady, N. Y., but did not graduate; he left college before the end of the course in order to enter the profession of journalism, for which he possessed both taste and predilection; he purchased an interest in the "*Democrat*," a paper published at the county seat of his native county, and became its editor, at the same time interesting himself warmly in politics; for a time the young man held a position on the staff of the Albany "*Argus*," and he thus became known to many of the most influential politicians of the state. When Grover Cleveland was elected governor of New York, he met young Lamont; and, having had occasion to make use of his knowledge and ability in the preparation of his first message, offered him an honorary position on his military staff, which gave him the title of colonel; Gov. Cleveland next appointed Lamont his private secretary, in which position the latter made himself so useful and valuable, that when Mr. Cleveland became President he took Lamont with him to the White House; it was Mr. Lamont, who, when private secretary to Gov. Cleveland, originated the phrase "Public office a public trust." He used this as a headline in compiling a pamphlet of Mr. Cleveland's speeches and addresses; the expression used by Mr. Cleveland was, "Public officials are the trustees of the people," and it was employed in his letter accepting the nomination for the office of mayor of Buffalo.

Lander, Frederick W., activity and enterprise manifested by, commended, 3305.

Landreau, John C., claim of, against Peru referred to, 4463.

Lane, Franklin Knight, Secretary of the Interior under President Wilson; b. Charlottetown, Prince Edward Islands, Canada, July 15, 1864; son of Dr. C. S. and C. W. H. Lane; removed to California during childhood; educated at the University of California 1886; married Anne Wintermute, of Tacoma, Wash., April 11, 1893; engaged in newspaper work in college days and later was reporter, New York correspondent for western papers, and part owner and editor of the Tacoma *Daily News*; admitted to the bar in California in 1889; corporation counsel for city of San Francisco three terms, 1897-1902; candidate for governor of California 1902; party vote of

legislature of California for United States Senator 1903; member Interstate Commerce Commission December, 1905, to March, 1913; formerly member permanent international railway commission, representing United States Government; took office as Secretary of the Interior March 5, 1913.

B. in the Columbia Law School, Columbia University, New York City; elected to the United States Senate, 1911, from Tennessee.

Leach, D. C., treaty with Indians concluded by, 3460.

Lear, Tobias:

Consul to Algiers, mentioned, 380, 418, 428.

Letter of, announcing death of Washington, 287.

Secretary to President Washington, 62.

Leavenworth, Henry:

Attack upon Indians led by, 781.

Death of, referred to, 1332.

Lecompte, Samuel D., judicial conduct of, referred to, 2598.

Lee, Charles, Attorney-General under Presidents Washington and John Adams; b. Fauquier County, Va., in July, 1758; he was the son of Henry Lee and Mary Grymes, the lady for whom Washington is said to have had an unrequited affection in his youthful days. Charles was never as noted as his more distinguished soldier-brother Henry, such renown as he gained coming from civil pursuits, other than military service; he studied law under the instruction of Jared Ingersoll in Philadelphia, and was in course of time admitted to the bar, where he gained a fair practice; he served for several terms in the Virginia assembly, and after the constitution was adopted, held the position of naval officer of the Potomac district until December, 1795, when Washington appointed him Attorney-General; this office he held during the remainder of Washington's second term and throughout the whole of John Adams's administration, being succeeded by Benj. Lincoln, Jefferson's appointee. In 1801; President Jefferson subsequently offered Lee the chief-justiceship of the supreme court, but he would not accept; he died June 24, 1815.

Lee, Col., commissioner, United States, 781.

Lee, Gordon; b. May 29, 1859, near Ringgold, Catoosa Co., Ga.; served in state legislature in 1894, 1895, 1902, 1903, and 1904; elected to the 59th, 60th, 61st, 62d, 63d and 64th Congresses from Georgia.

Lee, Richard Henry; b. Stratford, Va., Jan. 20, 1732; educated at Wakefield Academy, England; returned in 1751; delegate to the house of burgesses in 1757; Delegate from Virginia to the Continental Congress 1774-1780, and President of it in 1784; served in the State legislature and as colonel of militia; member of the Virginia convention of 1788; United States Senator from Virginia 1789 to his resignation in 1792; died at Chantilly, Va., June 19, 1794.

Lee, Richard H., appointed on committee to conduct ceremonies of administration of oath to President Washington, 40.

Lee, Robert Edward, soldier, son of General Henry Lee (Light Horse Harry); b. Jan. 19, 1807, at Stratford House, Westmoreland County, Va.; graduated United States Military Academy, West Point, 1829; served in the Mexican War as chief engineer on the staff of Gen. Winfield Scott; superintendent of West Point Military Academy (1852-1855); in command military department of Texas 1860; resigned from the army April 25, 1861, after Virginia had seceded from the Union; and became major-general of the state forces, later a general in the Confederate army, and finally Commander-in-chief of all the forces of the Southern States. Throughout the entire war he maintained with skill and valor the cause he believed to be just, and at last, when overcome by the Federal army, he surrendered to General Grant at Appomattox, Va., April 9, 1865, thus ending the Civil War. He advised his soldiers to accept the proffered parole, return to their homes and be good citizens. After the war he was made President of Washington College at Lexington, Va., where he died Oct. 12, 1870. A beautiful mausoleum was erected over his tomb at Lexington, and an equestrian statue commemorates his name in Richmond, Va.

Lee, Robert E.; b. Schuylkill County, Pa., and educated in the common schools of Pottsville; elected to the 62d, 63d and 64th Congresses from Pennsylvania.

Lee, Samuel P., thanks of Congress to, recommended as a naval officer commanding one of the vessels engaged in the operations under Flag-Officer Farragut at Forts Jackson and St. Philip, at New Orleans, 1862, 3277.

Legarda, Benito; b. Manila, Sept. 27, 1853; was educated in the Jesuits' College and St. Thomas University of Manila, from the latter of which he received the degree of LL. B.; held some honorific positions during the Spanish régime; joined Aguinaldo when he landed in Cavite shortly after Admiral Dewey had destroyed the Spanish fleet, 1898; member of Aguinaldo's cabinet at Malolos and vice-president of the Filipino congress; resigned these positions to return to Manila in December, 1898; cooperated with live interest in the establishment of peace during and after the war between the Filipinos and Americans; Feb. 1, 1901, appointed by President McKinley a member of the Philippine Commission; elected by the Philippine legislature to be a Resident Commissioner of the Philippine Islands in the United States, November, 1907.

Legare, Hugh Swinton, Attorney-General under President Tyler; b. Charleston, S. C., Jan. 2, 1789; graduated from the College of South Carolina in 1814; studied law; visited Paris and Edinburgh; admitted to the bar at Charleston, S. C., in 1822; state representative 1820-1822 and 1824-30; Attorney-general of South Carolina 1830-1832; chargé d'affaires to Brussels 1832-1836; elected a Representative from South Carolina to the 25th Congress as a Union Democrat; defeated for the 26th Congress; Attorney-General from Sept. 13, 1841, until his death, at Boston, Mass., June 20, 1843.

Leggett, Mortimer D., Commissioner of Patents, recommendation of, referred to, 4115.

Leib, R. J., consul at Tangier, disposition of presents given by Emperor of Morocco discussed, 1256.

Lennox, David, attacked while discharging duties of marshal, 151.

Lenroot, Irvine L.; b. Superior Co., Wis. Jan. 31, 1869; became court reporter, studied law, and was admitted to the bar in 1897; elected to the Wisconsin legislature in 1900, 1902, and 1904; elected speaker of the assembly in 1903 and 1905; elected to the 61st, 62d, 63d and 64th Congresses from Wisconsin.

Letcher, John; b. Lexington, Rockbridge County, Va., March 28, 1813; studied at Washington College and at Randolph-Macon College; studied law and commenced practice at Lexington in 1839; Presidential elector on the Democratic ticket in 1848; delegate to the State constitutional convention of 1850; elected a Representative from Virginia to the 32d, 33d, 34th and 35th Congresses as a Democrat; governor of Virginia 1860-1864; turned over the entire forces of the State to the Confederacy before its secession; died at Lexington, Va., Jan. 26, 1884.

Letcher, John, official acts of, in Virginia declared null and void, 3535.

Lever, Asbury Francis; b. Jan. 5, 1875, near Springhill, Lexington Co., S. C.; graduated in law at the Georgetown University in 1899, and admitted to practice in his state by the supreme court; elected to the state legislature from Lexington County; elected to the 58th, 59th, 60th, 61st, 62d, 63d and 64th Congresses from South Carolina.

Levy, David (afterwards David Levy Yulee); b. St. Thomas, West Indies, in 1811; pursued classical studies and studied law in Virginia; moved to Florida in 1824, becoming a planter; elected a Delegate from Florida to the 27th and 28th Congresses as a Democrat; changed his name to David Levy Yulee; delegate to the first State constitutional convention; twice elected a United States Senator from Florida as a Democrat, serving from Dec. 1, 1845, to 1851, and from 1855 until his retirement, Jan. 1, 1861; president of the Atlantic and Gulf Railroad; served in the Confederate Congress; prisoner of state at Fort Pulaski in 1865; died at New York City Oct. 10, 1886.

Levy, Jefferson M.; b. in his district, son of Capt. Jonas P. Levy, and nephew of Commodore Uriah P. Levy, a distinguished naval officer of the last generation, who was mainly instrumental in the abolition of flogging in the United States Navy; graduated from the University of New York, studied law; one of the founders of the Democratic Club of New York; studied law; member Chamber of Commerce and Board of Trade and Transportation of New York; Commodore Levy, in 1830, at the suggestion of President Jackson, became the owner of Monticello, the home of Thomas Jefferson, and at his uncle's death Mr. Levy became, and still remains, the owner; the homestead is maintained by Mr. Levy in keeping with its distinguished traditions. Mr. Levy was elected to the 56th and 62d Congresses from New York.

Lewis, David J.; b. May 1, 1869, at Nuttals Bank, Center County, Pa., near Osceola, Clearfield County; began coal mining at 9 years of age and learned to read at Sunday school; continued at mining until 1892, when he was admitted to the bar of Allegheny County, having pursued his occupation as a miner and his studies in law and Latin at the same time; elected to the Maryland senate in 1901, and to the 62d, 63d and 64th Congresses from Maryland.

Liliuokalani, Queen of Hawaiian Islands:

Referred to, 5623.

Restoration of, to throne, discussed, 5783.

Surrender of sovereignty of, discussed, 5903.

Lincoln, Abraham, biography of, 3204.

Lincoln, Benjamin, commissioner to treat with Indians, nomination of, 52.

Lincoln, Levi; b. Worcester, Mass., Oct. 25, 1782; graduated from Harvard College in 1802; studied law, commencing practice in 1805; Democratic State senator in 1812 and State representative 1814-1822; delegate to the State constitutional convention in 1820; elected lieutenant-governor in 1823; appointed associate justice of the supreme court in 1824; governor 1825-1834; elected a Representative from Massachusetts to the 23d Congress as a Whig, vice John Davis, resigned; elected to the 24th, 25th and 26th Congresses, serving from March 5, 1834, to 1841; collector of Boston in 1841; president of the State senate; Presidential elector on the Whig ticket in 1848; first mayor of Worcester in 1848; member of numerous historical and agricultural societies; died at Worcester, Mass., May 29, 1868.

Lincoln, Levi, commissioner to settle boundary question with Georgia, 329.

Lincoln, Robert T.; Secretary of War under President Garfield, and Minister to England; b. Aug. 1, 1843, in Springfield, Ill., eldest child of President Lincoln; educated in a private school of Springfield, and at Illinois State University; later spent a year at Phillips Academy, Exeter, N. H., graduated from Harvard in 1864; took a course in law and was appointed a captain of volunteers; saw service in the final campaign of the Civil War, ending at Appomattox; resumed the study of law in Chicago and was admitted to the bar in 1867; took an active part in local politics and worked for the election of Grant, Blaine and Garfield for the presidency; appointed Secretary of War in 1881 by President Garfield; on the accession of Arthur to the presidency he was the only one of Garfield's cabinet who was requested to remain in office, which he did to the close of the administration; President Harrison appointed him Minister to England.

Lind, John; b. Sweden, March 25, 1854; received a public school education; attended the State University at Minneapolis; taught school; read law, and admitted to the bar in 1877; appointed receiver of the Tracy land office in 1881; elected to the 50th, 51st and 52d Congresses as a Republican; served in the Spanish war as quartermaster of the Twelfth Minnesota Regiment of Volunteers; elected governor of Minnesota in 1898 as a Democrat; elected to the 58th Congress; sent to Mexico on mission of peace by President Wilson during insurrection in 1913.

Lind, John, sent as representative to Mexico, 7885.

Instructions to, 7885.

Proposals rejected, 7887.

Lindbergh, Charles A.; b. in Sweden and brought by his parents to Melrose, Minn., in his first year; an extensive writer for magazines and newspapers on political economy; has always taken great interest in farming; elected to the 60th, 61st, 62d, 63d and 64th Congresses from Minnesota.

Linthicum, John C.; b. Linthicum, Anne Arundel County, Md., Nov. 26, 1867; received his early education in the public schools of that county and of Baltimore city, later entering the State Normal School, from which he graduated in 1886, when he became principal of Braddock School, Frederick County, and later taught school in his native county of Anne Arundel; returning to Baltimore he took a special course in the historical and political department of Johns Hopkins University, after which he entered the University of Maryland school of law, from which he obtained his degree of LL. B. in 1890; practiced law in the city of Baltimore; elected to the house of delegates from Baltimore; chairman of the city delegation, chairman of the elections committee, a member of the judiciary committee and of the printing committee, and performed valuable service for the state and city; elected to the state senate; appointed in 1908 by Governor Crothers as judge-advocate-general; elected to the 62d, 63d and 64th Congresses from Maryland.

Lippitt, Henry F.; b. Providence, Oct. 12, 1856; received an academical education, graduating from Brown University, with the degree of A. B.; entered the cotton manufacturing business, in which he has served in various capacities from day operative to general manager; he has been a director in the Mechanics' National Bank, of Providence, in several of the mill mutual insurance companies, and vice-president of the People's Savings Bank, of Providence; colonel on the staff of Governor Taft of Rhode Island in 1888-89; was elected, 1911, to the United States Senate from Rhode Island.

Livermore, W. R., commissioner in marking boundary line between Texas and Mexico, 4902.

Livingston, Edward; lawyer, jurist, author; b. Clermont, N. Y., May 26, 1761; representative in Congress from New York City, 1795-1802; United States Attorney for the district of New York, and in 1801 Governor Clinton appointed him mayor of New York City; contracted yellow fever during the epidemic in 1803, and on his recovery found his fiscal affairs had been so badly managed by his agent as to be hopeless; he confessed judgment to the United States in the sum of \$100,000; gave up all his property and went to New Orleans and began the practice of law; was a member of the Louisiana legislature and represented the state in the 18th, 19th, and 20th Congresses, and in the Senate from 1829 to 1831, when he resigned to accept the position of Secretary of State; appointed minister to France in 1833; his "Donal Code" is considered a monument to his profound learning, and his "Criminal Jurisprudence" is a standard law book; died Rhinebeck, N. Y., May 23, 1836.

Livingston, Edward:

Minister to France—

Correspondence regarding claims against France. (See France, claims against.)

Referred to, 1407.

Instructed to quit France if claims are not paid, 1354.

Resignation of, transmitted, 1403.

Secretary of State, 1219.

Correspondence relating to north-eastern boundary. (See North-eastern Boundary.)

Livingston, Joseph W., consul at San Juan de Nicaragua, mentioned, 2573.

Livingston, Robert R., statesman, diplomat; b. New York City, Nov. 27, 1746; graduated from King's College in 1765; studied law, and commenced practice in New York; city recorder 1773-1775; member of the colonial assembly 1775; Delegate from New York to the Continental Congress 1775-1777 and 1779-1781; secretary of foreign affairs August, 1781, to August, 1783; delegate to the State constitutional convention in April, 1777; chancellor of New York State 1777-1801; minister plenipotentiary to France 1801-1804; prominent in local affairs; died at Clermont, N. Y., Feb. 26, 1813.

Livingston, Robert R., minister to negotiate treaty with France, nomination of, 339.

Lloyd, James Tighlman; b. Carona, Lewis Co., Mo., Aug. 28, 1857; admitted to the bar, and practiced his profession in Lewis County until 1885, when he located at Shelbyville; elected to the 55th Congress, to fill a vacancy; elected to the 56th, 57th, 58th, 59th, 60th, 61st, 62d, 63d and 64th Congresses from Missouri.

Lloyd-George, David; b. in Manchester, England, on January 17, 1863, but at the age of 1 year was taken to live in Wales. He studied for the bar, and became a solicitor before he was twenty years old. As a Non-Conformist, he early was attracted to politics, and at a by-election was elected to a seat in the House of Commons in 1890. During the next ten years, he became noted in Parliament as a trenchant Parliamentary fighter, his radical views on social questions endearing him to the working-classes. He bitterly opposed the Boer War during 1899-1902, and his opposition made him unpopular to the extent that he was mobbed when he attempted to speak in Birmingham in 1900. When the Liberals were returned to power in 1905, he was made President of the Board of Trade, and earned fame for himself, not only by his efficient administration of that office, but also by his settlement of the severe railroad strike of 1906. When Asquith became Premier in 1908, he was made Chancellor of the Exchequer, and proceeded to outline a comprehensive series of social reforms for England, including schemes for old-age pensions and national insurance. To provide revenue for this program, he introduced his famous budget of 1909-10, in which large taxes were laid upon the unearned increment of land, and upon other possessions of the wealthy classes. The budget was eventually thrown out by the House of Lords, as a result of which the veto powers of the House of Lords were cur-

talled. When the coalition Cabinet was formed in 1915, he became the Minister of Munitions, and on December 7, 1916, succeeded Asquith as Prime Minister.

Lobeck; C. O.; b. Andover, Ill., April 6, 1852; educated at Andover, at high school, Geneseo, Ill., and one year at German Wallace College, Berea, Ohio, and, later a term at Dyhrenfurth Commercial College, Chicago; from 1875 to 1892 was a commercial traveler, selling dry goods and hardware; member of the Travelers' Protective Association; entered political life in 1892, being elected state senator (Omaha district), Nebraska; became a Silver Republican, supporting Mr. Bryan; in 1897 elected a councilman of Omaha, city comptroller of Omaha; was Democratic presidential elector for Nebraska in 1900; nominated at the primary election Aug. 16, 1910, over four competitors and was elected to the 62d, 63d and 64th Congresses from Nebraska.

Lodge, Henry Cabot; b. Boston, Mass., May 12, 1850; graduated from Harvard College in 1871, receiving the degree of LL. B., and Ph. D. from Harvard University for his thesis on "The Land Law of the Anglo-Saxons;" has published "Short History of the English Colonies in America;" "Life of Alexander Hamilton;" "Life of Daniel Webster;" edited the works of Alexander Hamilton in 9 volumes; published "Studies in History;" "Life of Washington," 2 volumes; member of the Massachusetts Historical Society, the Virginia Historical Society, the American Academy of Arts and Science, the New England Historic and Genealogical Society; has received the degree of doctor of laws from Williams College, Clark University, Yale University, and Harvard University; Regent of the Smithsonian Institution; served in house of representatives of Massachusetts; elected to the 50th, 51st, 52d, and 53d Congresses; took his seat in the Senate March 4, 1893; re-elected 1899 and 1905 to represent Massachusetts.

Long, John C., misunderstanding with Louis Kossuth referred to, 2682.

Long, John D.:

Report of, on number of lives lost by sinking of the *Maine*, 6296.

Thanks of President tendered Commodore Dewey by, 6568.

Longworth, Nicholas; b. Cincinnati, O., Nov. 5, 1869; graduated A. B. from Harvard University, 1891; graduated Cincinnati Law School, 1894; admitted to the bar, 1894; elected to the Ohio house of representatives, 1899, and to state senate, 1901; elected to the 58th, 59th, 60th, 61st, 62d and 64th Congresses from Ohio.

Loomis, F. B., reports of, during Panama Revolution, 6752-6755.

Loud, George Alvin, lumberman of Au Sable; b. June 18, 1852, in Bracebridge, Geauga Co., Ohio; engaged in the lumber business; during the Spanish-American War, while making a trip around the world on the revenue cutter *McCulloch*, under commission of six months as paymaster, was present and participated in the battle of Manila. Later was sent by the governor in charge of the hospital train, through the southern camps and hospitals, to bring home the sick soldiers of Michigan regiments; elected to the 58th, 59th, 60th, 61st, 62d and 64th Congresses from Michigan.

McAdoo, William Gibbs, Secretary of the Treasury under President Wilson; b. near Marietta, Ga., Oct. 31, 1863; son of William G. McAdoo, M. A. LL. D., who was a judge, soldier in the Mexican and Civil Wars, district attorney general of Tennessee, and adjunct professor of English and history in the University of Tennessee; removed from Georgia to Tennessee; studied at the University of Tennessee; admitted to the bar at the age of 21; practiced law in Chattanooga until 1892, when he removed to New York and continued the practice of his profession; conceived the Hudson River tunnel system; organized the company which built it and was its president from 1902 to 1913; delegate to the Baltimore convention in 1912; vice chairman of the Democratic National Committee and acting chairman during the greater part of the campaign of 1912; married Sarah Houston Fleming, of Chattanooga, Tenn., who died February, 1912, and is the father of six children—three sons and three daughters; appointed Secretary of the Treasury March 5, 1913; was married May 7, 1914, to Miss Eleanor Randolph Wilson, daughter of the President.

McArthur, Duncan, treaty with Indians concluded by, 590.

McCall, Samuel Walker; b. East Providence, R. I., Feb. 28, 1851; admitted to the bar, practicing in Boston; served as editor in chief of the Boston *Daily Advertiser*; member of the Massachusetts house of representatives of 1888, 1889, and 1892; author of biography of Thaddeus Stevens, "American Statesmen Series"; elected to the 53d, 54th, 55th, 56th, 57th, 58th, 59th, 60th, 61st and 62d Congresses from Massachusetts.

McCalla, Bowman H., member of board to consider expedition to be sent for relief of Lady Franklin Bay Expedition, 4813.

McCallum, D. C., military director and superintendent of railroads, appointed, 3302.

McClellan, Capt., Florida volunteers under command of, referred to, 2430.

McClellan, George Brinton; soldier, author; b. Philadelphia, Pa., Dec. 3, 1826; entered West Point as an instructor, and prepared a manual on "Bayonet Exercise," which became a text-book in military service; at the outbreak of the Rebellion he was appointed major-general of Ohio volunteers, and soon after to same rank in the regular army, and on the retirement of Gen. Scott was made general-in-chief of the United States army; commanded the Army of the Potomac in the Peninsular campaign; resigned from the army in 1864; Democratic candidate for President in opposition to President Lincoln in 1864; governor of New Jersey, 1878-81; published books on military subjects; died Oct. 29, 1885.

McClellan, George B.:

Command of Army of United States assumed by, 3241.

Plans of, approved, 3312.

Referred to, 3257.

Death of, announced and honors to be paid memory of, 4904.

Relieved of command of Army of Potomac, and Major-General Burnside ordered to take command of that Army. He in turn to be succeeded by Major-General Hunter, 3325.

Relieved of command of other departments, retaining command of Department of Potomac, 3312.

Report of, on Dominican Republic, transmitted, 4071.

Resignation of, as major-general accepted, 3443.

McClelland, Robert, Secretary of the Interior under President Pierce; b. Greencastle, Pa., Aug. 1, 1807; graduated from Dickinson College, Carlisle, Pa., in 1829; admitted to the bar in Chambersburg in 1831; moved to Pittsburg, thence in 1833 to Monroe, Mich.; delegate to the state constitutional conventions of 1835 and 1867; state representative 1838-1843, the last year as speaker of the house; elected a Representative from Michigan to the 28th, 29th, and 30th Congresses as a Democrat; delegate to the national Democratic conventions of 1848, 1852, and 1868; governor of Michigan 1851-1853; resigning; Secretary of the Interior 1853-1857; died at Detroit, Mich., Aug. 27, 1880.

McCook, Anson G.; soldier; b. Steubenville, Ohio, Oct. 10, 1835; received a common school education; in the spring of 1854 crossed the plains to California; returned in the autumn of 1859, and at the outbreak of the rebellion was engaged in the study of law; entered the Union Army as captain in the Second Regiment of Ohio Infantry, and was at the first battle of Bull Run; on the reorganization of the regiment was commissioned major and afterwards promoted to lieutenant-colonel and colonel, serving with the regiment in the Army of the Cumberland; at the muster out of the regiment commissioned colonel of the One hundred and ninety-fourth Ohio Infantry, and at the close of the war brevetted brigadier-general; appointed assessor of internal revenue in the seventeenth Ohio district in November, 1865; moved to New York in May, 1873; elected to the 45th, 46th and 47th Congresses as a Republican.

McCook, Anson G., letter of, regarding statue of Gen. Garfield to be erected in Washington transmitted, 4795.

McCook, Edward M., brigadier-general in Army, nomination of, referred to, 3403.

McCord, Victor H., claim of, against Peru, 5988, 6092, 6335.

Milledge, John; b. Savannah, Ga., in 1757; served in the Revolutionary struggle; attorney-general of Georgia in 1780; elected a Representative from Georgia to the 2d Congress (vice Anthony Wayne, whose seat was declared vacant), serving from Nov. 22, 1792, to March 2, 1793; elected to the 4th, 5th and 7th Congresses, resigning in May, 1802; governor 1802-1806; elected a United States Senator from Georgia, serving from Dec. 11, 1806, until his resignation in 1809; died at Sand Hill, Ga., Feb. 9, 1818.

Milledge, John, letter of President Madison to, regarding taking of oath, 451.

Miller, Clarence Benjamin; b. March 13, 1872, Goodhue Co., Minn., graduated from the University of Minnesota law department, 1900; member of the Minnesota legislature, 1907; elected to the 61st, 62d, 63d and 64th Congresses from Minnesota.

Miller, James, governor of Arkansas, legalization of official acts of, recommended, 801.

Miller, Joseph N., joint resolution annexing Hawaiian Islands delivered to President Dole by, 6332.

Miller, Washington D., secretary to President Houston, of Texas, 2172.

Miller, William, refuge given to, by the St. Louis, 1133.

Miller, William Henry Harrison, Attorney-General under President Benjamin Harrison; b. Augusta, Oneida Co., N. Y., Sept. 6, 1840; his ancestry is English and Scotch; he grew up on his father's farm, attending the country schools and Whites-town Seminary, and was graduated from Hamilton College in 1861; after teaching school at Maumee City, O., for a short time, he enlisted in May, 1862, in the 84th Ohio infantry, a three-months' regiment; being mustered out in September, he took up the study of law in the office of Chief Justice Waite; he read law during his

leisure and was admitted to the bar at Peru in 1865; he practiced in that city for a short time, holding the office of county school examiner, the only office he ever held until appointed attorney-general; in conducting business before the federal courts at Indianapolis, Mr. Miller formed the acquaintance of Gen. Harrison, and on the retirement of Albert G. Porter from the firm of Porter, Harrison & Hines in 1874, he was invited to enter that firm; from then till his appointment as attorney-general Mr. Miller was exclusively engaged in the practice of the law; as his was one of the two or three leading firms of Indiana, he was engaged in the most important litigation before the United States courts and the supreme court of the state.

In the Terry case his bold and fortunate action early attracted public attention; on hearing that there was danger that David S. Terry, a very prominent and somewhat notorious lawyer of California, would attack Justice Field, of the United States Supreme Court, when the latter should go on the California circuit, Mr. Miller promptly directed the U. S. marshal to protect him. In compliance with this order a deputy marshal was detailed to attend Justice Field. Terry was killed in the very act of making a deadly assault on the venerable justice. The authority of the deputy marshal being questioned and an attempt made to prosecute him by the authorities of California, Mr. Miller avowed the act and directed the defense of the deputy marshal, on the ground that independently of all statutes, it was the constitutional duty of the executive to protect the judiciary. On this high plane the case was fought and the Attorney-General was sustained both in the United States Circuit and Supreme Courts.

Miramon, Miguel:

President of Mexico, election of, discussed, 3095, 3175.

Property of American citizens confiscated by, 3120.

Mitchell, David B., instructions to, regarding possession of Florida, 493, 495.

Noah, M. Mordecai, surveyor of customs, renomination of, 1043.

Noble, John Willock, Secretary of the Interior under President Benjamin Harrison; b. Lancaster, Ohio, Oct. 26, 1831; his father was a native of Pennsylvania, and his mother, Catherine McDill, of Maryland; after obtaining a good preparatory education in the public schools of Cincinnati, he spent one year at Miami University, and then entered the junior class at Yale, from which institution he was graduated in 1851, before he had attained the age of twenty years; he then studied law under the instruction of Henry Stanberry (afterward attorney-general in the cabinet of President Johnson) and of his brother, Henry C. Noble, and was admitted to the bar in 1855 at St. Louis, Mo. He began the practice of law there, but in 1856 removed to Keokuk, Iowa; in Aug., 1861, he was made a first lieutenant in the 3d regiment of Iowa cavalry, and subsequently became adjutant; he did valiant service at the battle of Pea Ridge in the spring of 1862 and was present at the surrender of Vicksburg, and at the battle of Tupela, Miss.; he also took part in the successful raids made by Gen. James H. Wilson, the

storming of Selma, Ala., the capture of Columbus, Ga., and in numerous minor engagements. For a time he was judge advocate-general of the army of the southwest, and the department of Missouri, under Gen. Samuel R. Curtis, but soon returned to his regiment, with which he served four years; he rose by regular promotion in his own regiment to be colonel, and was breveted brigadier-general by congress "for distinguished and meritorious services in the field"; after the close of the war Gen. Noble resumed the practice of law in St. Louis; there he encountered great opposition in enforcing the provisions of the internal revenue laws, especially from dealers in whiskey and tobacco, who were very rebellious in that state; among the offenders brought to justice by him at this period, were the noted counterfeiters Biebusch and Burke; shortly after, when in Washington, President Grant invited him to the White House, and in the presence of his assembled cabinet thanked him "for the faithful manner in which he had performed the duties of his office"; in Iowa, Mr. Noble, before the war, had practiced at the same bar, state and federal, with Samuel F. Miller, afterward justice of the United States supreme court, Gen. W. W. Belknap, and George W. McCrary, each afterward secretary of war, and John F. Dillon, afterward judge of the United States circuit court, and other able lawyers. His ability as an attorney and his marked individuality as a public-spirited citizen gave him a national reputation, and in 1889 President Harrison appointed him secretary of the interior, a position for which his successful experience and marked executive abilities especially fitted him. His administration of the duties of this responsible office has been characterized by

decision of purpose and a comprehensive knowledge of public affairs, nowhere more marked than in his settlement of questions arising from the opening of settlers of some of the Indian reservations and the organization of the territory of Oklahoma, where the rush for land gave rise to conflict for claims.

Noland, N. B., claims of, against Peru, 6099.

Norris, P. W., petition of, for compensation for services rendered transmitted, 4669.

Nourse, Joseph E., publication of second edition of Second Arctic Expedition recommended by, 4666.

Nye, Frank Mellen; b. Shirley, Piscataquis Co., Me., March 7, 1852; member of the Wisconsin assembly 1884-85; elected to the 60th, 61st, and 62d Congresses from Minnesota.

Nye, James W.; b. Madison County, N. Y., June 10, 1815; received a common school education; studied law and practiced; held several local offices; defeated as the Antislavery candidate for the 39th Congress; moved to Syracuse, N. Y.; appointed governor of Nevada Territory in 1861; elected a United States Senator from Nevada as a Republican and re-elected, serving from Dec. 4, 1865, to March 3, 1873; a short time after leaving the United States Senate his reason became impaired, and he died at White Plains, N. Y., Dec. 25, 1876.

Nye, James W., governor of Nevada Territory, letter of, transmitted, 3405.

Oakes, D. C., treaty with Indians concluded by, 3663.

O'Brien, Richard, letter of, regarding bombardment of Tripoli, 363.

O'Donnell, Patrick, trial, conviction, and execution of, by Great Britain, 4782.

Ogden, Peter V., crimes charged against, 405.

Ogden, Thomas L., treaty with Indians concluded by, 940.

O'Gorman, James A.; b. New York City, May 5, 1860; educated in the public schools, the College of the City of New York and the law department of the New York University, graduating with LL.B. in 1882; admitted to the bar in 1882; served as justice of the district court, justice of the supreme court, State of New York; elected United States Senator from New York, March 31, 1911.

O'Laughlin, Michael, implicated in assassination of President Lincoln, proceedings of trial and verdict of military commission, 3532, 3533, 3534, 3540, 3545, 3546.

Oldfield, William A., lawyer; b. Franklin, Izard Co., Ark., Feb. 4, 1874; when war broke out between the United States and Spain, in 1898, enlisted as a private; promoted to first sergeant, and later to first lieutenant, and was mustered out with that rank in 1899; elected to the 61st, 62d, 63d and 64th Congresses from Arkansas.

Oliver, George Tener, b. County Tyrone, Ireland, Jan. 6, 1848, while his parents were visiting in that country, they at the time being residents of Allegheny City, Pa.; studied law and was admitted to the bar of Allegheny county in 1871; after an active practice of ten years, he retired and engaged in iron and steel manufacturing; president of the Youngstown Car Manufacturing Company, at Youngstown, Ohio; connected as a director with several financial and industrial corporations in Pittsburgh; in 1900 purchased the Pittsburgh Gazette; and later in the same year acquired the controlling interest in the Pittsburgh Chronicle-Telegraph; in 1906 the Pittsburgh Gazette and the Pittsburgh Times which are now published under the name of the Gazette-Times, and he is the principal owner of both papers; elected March 17, 1909, to the United States Senate from Pennsylvania.

Olmstead, Gideon, sailor, resident of Connecticut during the Revolutionary War; captured at sea by a British vessel and placed aboard the British sloop *Active*,

carrying stores from Jamaica to the British in New York; he and three over-Americans overpowered the British crew and took possession of the ship; while making for Little Egg Harbor they were captured by the *Convention* of Philadelphia and the privateer *Girard*, and taken before the Pennsylvania State Court of Admiralty; this court divided the prize into four parts, giving Olmstead and his companions, who had made the capture, only one fourth; they appealed to Congress, and the Committee on Appeals decided in their favor, but the Pennsylvania Court refused to yield, and directed the ship to be sold and the money paid into the state court to await final decision; the case dragged along until 1809, when the Pennsylvania authorities offered armed resistance to the United States Marshal at Philadelphia; he called to his assistance a *posse comitatus* of 2,000 men; before an actual conflict between state and federal officials occurred the matter was adjusted and the money (\$18,000) paid to the United States Marshal; Olmstead died at East Hartford, Conn., Feb. 7, 1845, aged 96 years.

Olmstead, Gideon:

Correspondence with governor of Pennsylvania in regard to case of, 462.

Resolutions of Pennsylvania legislature protesting against Supreme Court decision in case of, 456.

Olney, Richard; lawyer; Attorney General and Secretary of State under President Cleveland; b. Sept. 15, 1835, in Oxford, Mass.; educated at Leicester Academy and graduated Brown University, 1856, and LL.B. Harvard Law School 1858; began practice in Boston and soon was looked upon as an authority on wills and estates; later achieved a reputation as a railroad and corporation lawyer; appointed by President Cleveland in 1893 Attorney General, and upon the death of Walter Q. Gresham in 1895 he was transferred to Secretary of State.

Olney, Richard, Secretary of State, 6024.

Onis, Louis de, letter of, to Captain-General of Caracas transmitted, 473.

Ord, Edward O. C., negotiations of, for and correspondence regarding restoration of peace, 3461.

for Louisiana, appointed, 3323.

Peabody, George, medal presented to,
referred to, 3897.

Peace, Samuel, ensign in Navy, nomi-
nation of, and reasons therefor, 3357.

Pearce, James A.; lawyer, legislator; b.
Dec. 8, 1804, in Alexandria, Va.; educated
in his native town and graduated College
of New Jersey 1822; studied law in Balti-
more and began practice in Cambridge, but
later removed to Louisiana and engaged in
sugar planting; after three years he re-
turned and resumed the practice of law in
Kent Co., Md.; elected to the House of
Delegates in 1831 and two years later was
elected to Congress, where he served almost
continuously until 1843, when he was
elected to the United States Senate; during
his long service as Senator he was espe-
cially interested in the Library of Congress,
the Smithsonian Institution, the Coast Sur-
vey and educational matters; he was of-
fered an appointment as United States
Judge for Maryland and was also nomi-
nated and confirmed as Secretary of the
Interior by President Fillmore, but de-
clined both these offices; while still Sen-

ator he died Dec. 20, 1862, at Chesterton,
Md.

Peck, Ferdinand W., commissioner-gen-
eral to Paris Exposition, 6330.

was admitted to the bar in 1883; practiced
his profession in Philadelphia; member of
the State Legislature, 1884-91; elected to
the United States Senate from Pennsyl-
vania for the term beginning March 4,
1897; re-elected in 1903 and 1909.

Perkins, Benjamin W., claim of, against
Russia, 3826.

Perry, Benjamin F., provisional gov-
ernor of South Carolina, appointed,
3524.

Perry, Matthew Calbraith; naval officer;
b. about 1821; made lieutenant, 1848, and
served for several years in the coast sur-
vey; commissioned captain 1867, and
placed on retired list; died New York
City, Nov. 16, 1873.

Perry, Matthew C.:

Directed to protect rights of Ameri-
can fishermen in British posses-
sions, 2694.

Report of, on light-houses of England
and France, 1819.

Perry, Oliver Hazard; naval officer; b.
South Kingston, R. I., Aug. 21, 1785; com-
missioned midshipman 1799; served in the
Mediterranean fleet in campaign of 1801-
03, against pirates; after the surrender of
Gen. Hull, at Detroit, Perry asked to be
put in command on the lakes, then in undis-
puted possession of the English; built a
fleet on Lake Erie in 1813, consisting of
eight vessels, and with about 500 men de-
feated the British fleet of six vessels fully
manned, and sent the laconic message to
Gen. Harrison: "We have met the enemy,
and they are ours"; rendered further ser-

vice on the great lakes, in the defense of Baltimore, and in the Mediterranean; he was highly honored for his achievements; died of yellow fever at Trinidad, in the West Indies, Aug. 23, 1819, while in command of the *John Adams*; his remains were transferred to Newport, R. I., Dec. 4, 1826.

Perry, Oliver H.:

Death of, referred to, 631.

Victory of naval forces under, on Lake Erie discussed, 519.

Perry, Rodger, commander in Navy, nomination of, and reasons therefor, 3354.

Pershing, John Joseph; b. in Linn Co., Mo., Sept. 13, 1860. Was graduated from the United States Military Academy in 1886. In 1892 was appointed a first lieutenant, and a major of volunteers in 1899. In 1901 he was made a captain of cavalry, and in 1906 was raised to the rank of brigadier-general by President Roosevelt. He saw service during the Indian campaign of 1886, and during the Spanish-American War. His achievements in annihilating the Moro rebellions in the Philippines in 1913 won him distinction, and he was made commander of the United States troops sent into Mexico in 1916 to capture Villa. On May 19, 1917, President Wilson announced that General Pershing would lead the division of the United States regular army to leave for France within a few days of the announcement.

Phelps, John Smith; b. Simsbury, Conn., Dec. 22, 1814; graduated from Trinity College, Hartford, Conn.; studied law, and began practice at Simsbury; moved to Springfield, Mo., in 1843; served in the Missouri State house of representatives; elected a Representative from Missouri to the 29th, 30th, 31st, 32d, 33d, 34th, 35th, 36th and 37th Congresses as a Democrat; colonel in the Union Army; military governor of Arkansas; defeated as the Democratic candidate for the 38th Congress; governor of Missouri 1877-1881; died at St. Louis, Mo., Nov. 20, 1886.

Phelps, John S., military governor of Arkansas, appointment of, revoked, 3377.

Pickens, Andrew:

Commissioner to treat with Indians, nomination of, 171.

Treaty with Indians concluded by 202.

Relieved from duty, 3534.

Porter, James M.; lawyer, soldier; b. Jan. 6, 1793, in Selma, Pa.; educated for the law and served throughout the War of 1812; after the war he built up a large practice in eastern Pennsylvania and New Jersey; member of the Pennsylvania Constitutional Convention in 1838; appointed Secretary of War by President Tyler in 1843, but the Senate refused to confirm the appointment; one of the founders of Lafayette College and for twenty-five years president of its Board of Trustees; he was a prominent Mason; died Nov. 11, 1862, in Easton, Pa.

Porter, Peter Buel; Secretary of War under President John Quincy Adams; b. at Salisbury, Conn., Aug. 4, 1773; graduated from Yale College in 1791; studied law and began practice at Canandaigua, N. Y.; held various local offices; elected a representative from New York to the 11th and 12th Congresses as a Democrat; served as a major-general in the war of 1812; elected to the 14th Congress, serving from Dec. 4, 1815, to 1816, when he resigned; secretary of state of New York 1815-16; appointed Secretary of War, serving from 1828 to 1829; died at Niagara Falls, N. Y., March 20, 1844.

Porter, Stephen G.; b. Salem, Columbian County, Ohio, May 18, 1869; moved to Allegheny, Pa., in 1877; received a common and high school education; studied medicine two years; read law and was admitted to the Allegheny County bar in 1893; never held any office until he was elected to the 62d, 63d and 64th Congresses from Pennsylvania.

Potter, Elisha R.; b. Kingston, R. I., June 20, 1811; graduated from Harvard College in 1830; served several years as a member of the State house of representatives; adjutant-general of the State in 1835 and 1836; elected a Representative from Rhode Island to the 28th Congress as a Whig; State commissioner of public schools 1849-1854, when he resigned; judge of the Rhode Island supreme court, March 16, 1868, to his death, April 10, 1882.

Potter, Elisha R., correspondence regarding Dorr's Rebellion, 2141, 2148, 2149.

Powell, Joseph W., naval cadet, to be made ensign for attempting to rescue force of the *Merrimac*, 6306.

Powell, L. E., treaty with Indians concluded by, 2521.

Powell, Lazarus W.; b. Henderson County, Ky., Oct. 6, 1812; graduated from St. Joseph College, Bardstown, in 1833; studied law, and in 1835 began practice; served in the State legislature as a member in 1836; a Presidential elector on the Polk and Dallas ticket in 1844; governor of Kentucky 1851-1855; elected a United States Senator from Kentucky as a Democrat, serving from 1859 to 1865; delegate to the national Union convention at Philadelphia in 1866; died near Henderson, Ky., July 3, 1867.

Powell, Lazarus W., sent to Utah during troubles with Mormons, 3036.

Powers, Caleb, b. Whitley County, Ky., Feb. 1, 1869; attended Union College, Barboursville, Ky.; State University, Lexington, Ky.; Centre College, Danville, Ky., and the Valparaiso Indiana University, Valparaiso, Ind., where he graduated in law and was admitted to the bar in 1894; elected superintendent of public schools for Knox County, Ky., in 1894, and re-elected in 1897; in 1899 was elected secretary of state for the State of Kentucky. During the contests for state offices at this time, Senator William Goebel, the Democratic contestant for governor, was shot and killed by an unknown assassin; and upon the heels of that followed Mr. Powers' long persecution with which the public is familiar. After having served eight years, three months and three days in the jails of Kentucky he was given his freedom and was nominated and elected to the 62d, 63d and 64th Congresses from Kentucky.

Powers, Hiram, American sculptor, negotiations with, regarding work of art for Capitol, 2910.

Preble, Edward; naval officer; b. Portland, Me., Aug. 15, 1761; made midshipman in navy, 1779; commodore of the Mediterranean squadron, 1803, in command of the Constitution; exacted from the Emperor of Morocco a renewal of the treaty of 1786; bombarded the city of Tripoli, 1804; for his services in the Mediterranean he was voted a gold medal by Congress; died Portland, Me., Aug. 25, 1807.

Preble, Edward:

Energy and judgment displayed by, 365.

Medal presented to, March 3, 1805, for gallantry, mentioned, 352.

Preble, George Henry; naval officer; b. Portland, Me., Feb. 25, 1816; midshipman, Oct. 10, 1835; served in China and in the Mexican War; took part in the operations against New Orleans and the lower Mississippi as far north as Vicksburg and off Mobile Bay, in the Civil War; promoted rear-admiral, Sept. 30, 1876, and retired 1878; died Brookline, Mass., March 1, 1885.

Preble, George H.:

Commander in Navy, nomination of, and reasons therefor, 3354.

Thanks of Congress to, recommended, 3277.

Preston, William B.; lawyer, statesman; Secretary of the Navy under President Taylor; b. Nov. 25, 1805, in Smithfield, Va.; graduated from the University of Virginia and admitted to the bar; entered political life quite young and served a number of terms in the Virginia House of Delegates and the State Senate; was elected to Congress as a Whig; March 8, 1849, President Taylor appointed him Secretary of the Navy; upon the death of Taylor he retired from politics; in 1861 he was elected a member of the Secession Convention, and being a Union man, opposed the secession of the State, as long as there was any hope for the opposition, but went with the majority and was elected to the Confed-

erate Senate in 1861, and was a member of that body until his death, which occurred Nov. 16, 1862, at Smithfield, Va.

Prince of Wales, visit of, to United States, 3171.

Pringle, Samuel, claim of representatives of, refused and reasons therefor, 2826.

Proctor, Redfield, Secretary of War under President Benjamin Harrison; b. at Proctorsville, Vt., June 1, 1831, of English stock, descended from Robert Proctor, who came from London to Salem, Mass., in 1635; graduated from Dartmouth College in 1851, and from the Albany Law School in 1859; enlisted in the Third Regiment of Vermont Volunteers in 1861, of which he was appointed quartermaster with the rank of lieutenant; served on the staff of Gen. William F. (Baldy) Smith as brigade and division quartermaster; promoted major of the Fifth Regiment and colonel of the Fifteenth; after being mustered out returned to Vermont and engaged in the practice of law, and later became interested in the development of the marble industry; representative in the State Legislature in 1867-68 and 1888; member of the State Senate and president pro tem of that body in 1874-75; lieutenant-governor of the state from 1876 to 1878, and governor from 1878 to 1880; delegate to the Republican national convention of 1884, and chairman of the Vermont delegation in the same conventions of 1888 and 1896; appointed Secretary of War in March, 1889; resigned from the cabinet in Nov., 1891, to accept the appointment as United States Senator as a Republican, to succeed George F. Edmunds, and was elected by the Vermont Legislature Oct. 18, 1892, to fill both the unexpired and full terms; elected Oct. 18, 1898, to succeed himself for the term beginning March 4, 1899, and ending March 3, 1905.

Proctor, Redfield, resignation of, as Secretary of War and appointment as United States Senator from Vermont referred to, 5630.

Pujo, Arsene Paulin; b. Dec. 16, 1861, near Lake Charles, Calcasieu Parish, of the marriage of Paul Pujo, of Tarbes, France, to Miss Eloise M. Le Bleu; admitted to the bar Oct. 23, 1886, by the supreme court of Louisiana; elected to the 58th, 59th, 60th and 61st Congresses from Louisiana.

Queen, Walter W., thanks of Congress to, recommended, 3277.

Quiggle, Chloe, act granting pension to, vetoed, 5233.

Quezon, Manuel L.; b. Baler, Province of Tayabas, Philippines, Aug. 19, 1878; received his primary and secondary education in the College of San Juan de Letran, obtaining the degree of bachelor of arts and expert land surveyor; studied law in the

University of St. Thomas, and was admitted to the Filipino bar in April, 1903. During the revolution was a major of the Philippine army, and was detailed to Gen. Aguinaldo's staff; under the American Government he held the office of prosecuting attorney for the Province of Mindoro, and was subsequently transferred to the Province of Tayabas with the same office. May 15, 1909, the Philippine Legislature elected him Resident Commissioner of the Philippine Islands in the United States to succeed Hon. Pablo Ocampo de Leon.

Radcliffe, William, compensation to, 6866.

Rainey, Henry T.; b. Aug. 20, 1860, at Carrollton, Ill.; graduated from Union College of Law, Chicago, in 1885, receiving the degree of B. L.; soon afterwards admitted to the bar; elected to 58th, 59th, 60th, 61st, 62d, 63d and 64th Congresses from Illinois.

Raker, John E.; b. near Knoxville, Knox County, Ill., Feb. 22, 1863; in 1873 moved with his parents to Lassen County, Cal.; worked on the ranch and farm and attended the public schools and the State Normal School at San Jose, Cal., 1882-1884; studied law and was admitted to the bar in the fall of 1885; engaged in many important suits involving water rights and land matters, as well as many noted criminal cases; district attorney for Modoc county four years, 1895-1898; judge of the Superior Court of California in the county of Modoc in 1902 and re-elected in 1908; resigned Dec. 19, 1910; admitted to the Supreme Court of Oregon, the United States Circuit and District Courts of California, United States Court of Appeals, and the Supreme Court of the United States; elected to the 62d, 63d and 64th Congresses from California.

Ramsay, David, arrest and maltreatment of, at Heidelberg, Baden, 2772.

Ramsey, Alexander; lawyer; b. Harrisburg, Pa., Sept. 8, 1815; admitted to the Pennsylvania bar and practiced in Harrisburg, which district he represented in the 28th and 29th Congresses, 1843-47; appointed territorial governor of Minnesota, 1849, and made important treaties with the Indians of the section; mayor of St. Paul, 1855-57, and governor of Minnesota, 1860-63; from 1863 to 1875 he was United States Senator, and President Hayes appointed him Secretary of War, 1879-81; died St. Paul, Minn., April 22, 1903.

Ramsey, Alexander:

Superintendent of Indian affairs in Minnesota, misconduct of, referred to, 2760.

Treaty with Indians concluded by, 3397.

Ramsden, Fred W., British consul at Santiago, Cuba, services of, to United States and subsequent death of, referred to, 6331.

Randall Alexander Williams, Postmaster-General under President Johnson, and eighth Governor of Wisconsin; b. Ames, Montgomery Co., N. Y., Oct. 31, 1819, the son of Phineas Randall, a native of Massachusetts, and resident of Montgomery county, N. Y.; and subsequently of Waukesha, Wis. Alexander passed through college, studied law, and began the practice of his profession in 1840, in Waukesha. He was appointed postmaster at Waukesha, and in 1847 was elected a member of the convention that framed the constitution. In 1855 he was a member of the State Assembly, an unsuccessful competitor for the attorney-generalship, and was chosen judge, to fill an unexpired term of the Milwaukee Circuit Court. In 1857 he was elected Governor of Wisconsin, re-elected in 1859, occupying the gubernatorial chair at the outbreak of the war. He declared at once the loyalty of Wisconsin to the Union, and the purpose of her people to

fight for its integrity in such a way as to draw national attention, and his prompt and efficient measures, well seconded by all, augmented the useful service of the state, and gave her character and standing. He assembled the legislature in extra session, but before it could act, he organized the Second regiment, using for this purpose the public funds before a lawful appropriation had been made; but when the legislature convened it upheld him in what he had done. When his term as governor expired in 1861 he contemplated entering the army, but was prevailed upon by President Lincoln to accept the post of minister to Italy, where he remained for a year and returning home became first assistant to Postmaster-General Dennison; in 1866 President Johnson appointed him postmaster-general, and he served in that capacity to the end of that administration. He died July 25, 1872, in Elmira, N. Y.

Randall, Alex W., correspondence of, transmitted, 3804.

Randall, Samuel J., statesman; Speaker of the House of Representatives; b. Philadelphia, Oct. 10, 1828; received an academic education; engaged in mercantile pursuits; member of the city councils of Philadelphia four years; Member of the State Senate of Pennsylvania in 1858-59; elected to the 38th, 39th, 40th, 41st, 42d, 43d, 44th, 45th and 46th Congresses as a Democrat; elected Speaker of the House for the last session of the 44th, for the 45th and 46th Congresses; re-elected to the 47th, 48th, 49th, 50th and 51st Congresses; died at Washington, D. C., April 13, 1890.

Randolph, Edmund; statesman; b. Williamsburg, Pa., Aug. 10, 1753; graduated College William and Mary; delegate to the Continental Congress from Virginia, 1779-83; in 1788 was a member of the convention which framed the Constitution of the United States, but voted against its adoption; governor of Virginia, 1788; appointed Attorney-General of the United States, 1789, and in 1794 Secretary of State in Washington's Cabinet; died Clarke Co., Va., Sept. 13, 1813.

Randolph, Edmund, Attorney-General, proceedings of Cabinet were signed by, Aug. 5, 1793.

Randolph, Edmund J., Attorney-General and Secretary of State under President Washington; b. Virginia, Aug. 10, 1753; received a liberal education, studied law, and began practice at Williamsburg; served in the Revolutionary Army; Attorney-General of Virginia in 1776; Delegate from Virginia to the Continental Congress, 1779-1782; Governor of Virginia, 1786-1788; member of the convention that framed the Federal Constitution; appointed Attorney-General Sept. 26, 1789; transferred to the State Department as Secretary of State, January 2, 1794, but was invited to resign in August, 1795, having lost the confidence of the President; died in Clarke County, Va., Sept. 13, 1813.

Randolph, John, Jr., letter of, demanding that certain of the navy officers who had insulted him, be punished, 291.

Rankin, Jeanette; the first Congresswoman, was born in Montana in 1878. She is a graduate of the University of Montana, and

of the New York School of Philanthropy. She was known for many years throughout her state and the West as an ardent worker in the cause of equal suffrage, and was elected to Congress on the Republican ticket in the elections held in November, 1916, taking her seat in the House of Representatives when the Sixty-fifth Congress assembled in special session on April 2, 1917.

Reynolds, Thomas C., report of, on commerce of Nicaragua, Honduras and Salvador, 5116.

Rhind, Charles:

Arabian horses received by, from Turkey, referred to, 1099.

Treaty with Turkey concluded by, 1093.

Rice, Francis W., arrest and imprisonment of, at Acapulco, Mexico, 2334, 2837.

Rice, Henry M.; b. Waitsfield, Vt., Nov. 29, 1816; received a liberal education; resided in the Territories of Iowa, Wisconsin and Minnesota; elected a Delegate from Minnesota Territory to the 33d and 34th Congresses as a Democrat; elected a United States Senator from Minnesota, serving from May 12, 1858, to March 3, 1863; elected treasurer of Ramsay County in 1878; died in 1894.

Rice, Henry M., member of Chippewa Commission, 5500.

Richardson, Israel B., major-general in Army, nomination of, and reasons therefor, 2697.

Richardson, James D., statesman and author; b. Rutherford Co., Tenn., March 10, 1843, and was a student at Franklin College, near Nashville, when the civil war began. Although he was only 18 years old at the time he entered the Confederate Army as a private. At the end of the first year of the war he was made adjutant of the Forty-fifth Tennessee Infantry, in which capacity he served for three years. At the close of the war he read law, and in 1867, began practice in Murfreesboro. He was elected to the lower house of the Tennessee Legislature, taking his seat in October, 1871, and was elected Speaker of the House on the first day of the session, although he was only 28 years old at the time. The following year he was elected to the State Senate and was a delegate to the Democratic National Conventions of 1876, 1896 and 1900. He became a Member of Congress in 1885 and served the Fifth District of Tennessee in that capacity for twenty years. He was the Democratic nominee for Speaker of the House of the 56th and 57th Congresses. Among the committees on which he served was the Committee on War Claims, in which he had much influence. Mr. Richardson was prominent in Masonic circles, in which he attained the thirty-third degree, and was Grand Master of the order in his state in 1873 and 1874. In 1901 he was elected Sovereign Grand Commander of the Southern Jurisdiction, Scottish Rite Masons. He was the editor and compiler of "Messages and Papers of the Presidents" and of "Messages and Papers of the Confederacy." He died at Murfreesboro, Tenn., July 24, 1914.

Richardson, James D., resolution authorizing compilation of Messages and Papers of the Presidents by. (See Prefatory Note, Volume One.)

Richardson, William; b. Athens, Limestone Co., Ala.; was in the Confederate army; was severely wounded at battle of Chickamauga and paroled in April, 1865, in Marietta, Ga.; representative in the general assembly of Alabama, 1865-67; judge of the court of probate and county court of Madison County, Ala.; elected to fill an unexpired term in the 56th Congress; elected to the 57th, 58th, 59th, 60th, 61st, 62d and 63d Congresses from Alabama.

Richardson, William Adams, financier and jurist, Secretary of the Treasury under President Grant; b. Tyngsborough, Mass., Nov. 2, 1821, the sixth in descent from Ezekiel Richardson, the first of the family to settle in New England. William A. was graduated from Harvard in 1843, studied law with his brother Daniel and received the degree of LL. B. in 1846; assisted Judge Joel Parker in revising the general statutes of Massachusetts; appointed Assistant Secretary of the Treasury in 1869, and as financial agent abroad conducted the delivery in London of more than \$130,000,000 United States bonds of the five per cent loan there negotiated through him; in 1873 he was appointed Secretary of the Treasury to succeed Mr. Boutwell, who had been elected Senator from Massachusetts. One of Mr. Richardson's most important acts as Secretary was the transfer of the Geneva award money, \$15,500,000, from London to Washington without causing any stir in the financial circles of either country. In the financial panic of 1873 he kept the treasury from becoming involved by preventing ill-advised employment of the public money. He resigned the treasury to become Judge of the Court of Claims. In 1881 and 1891 he edited the supplement to the Revised Statutes of the United States, and established the style since pursued in that work. He was a lecturer on law in Georgetown University, LL. D. of Columbian University, and D. C. Dartmouth, Howard and Georgetown.

Richmond, James C., application of, for redress of wrongs, 2772.

Riddells, Bennett, consul to Chihuahua, Mexico, nomination of, and reasons therefor, 2587.

Smith, William Robert; b. Aug. 18, 1863, Smith Co., Tex.; studied law in Tyler, Tex.; admitted to the bar in 1885; appointed by the governor judge of the thirty-second judicial district of Texas, to fill a vacancy; re-elected to the same office in 1898 and 1900, without opposition; elected to the 58th, 59th, 60th, 61st, 62d, 63d and 64th Congresses from Texas.

Smith, William S., district supervisor, nomination of, 91.

Smithson, James. (See Smithsonian Institution.)

Smoot, Reed; b. Jan. 10, 1862, at Salt Lake City, Utah; educated at the State University and Brigham Young Academy; is a banker and woollen manufacturer; elected to the United States Senate from Utah, March 5, 1903, and for the term of six years to begin March 4, 1909; re-elected in 1914 for term ending March 3, 1921.

Southard, Samuel L., served as Secretary of War and as Secretary of the Treasury under President John Quincy Adams; b. Baskingridge, N. J., June 9, 1787; graduated from Princeton College in 1804; studied law and began practice at Kensington, N. J.; appointed law reporter by the state legislature; served one week as a member of the state legislature, when he resigned to become associate justice of the supreme court of New Jersey; Presidential elector in 1820; elected a United States Senator from New Jersey (vice J. J. Wilson, resigned) as a Whig, serving from Feb. 16, 1821, to March 3, 1823; Acting Secretary of the Treasury March 7, 1825, to July 1, 1825; also for a short time was Secretary of War; Attorney-General of New Jersey; Governor of New Jersey in 1832; again elected a United States Senator, serving from December 2, 1833, to May 3, 1842, when he resigned; died at Fredericksburg, Va., June 26, 1842.

Spangler, Edward, implicated in assassination of President Lincoln, proceedings of trial and verdict of military commission, 3532, 3533, 3534, 3540, 3545, 3546.

Sparkman, Stephen M.; lawyer; b. in Hernando County, Fla., July 29, 1849; read law and was admitted to practice in 1872; was state's attorney for the sixth judicial circuit from 1878 to 1887; elected to the 54th, 55th, 56th, 57th, 58th, 59th, 60th, 61st, 62d, 63d and 64th Congresses.

Sparrow, Thomas W., claims of, against Peru, 6099.

Spear, Edward, lieutenant of artillery, nominations of, and reasons therefor, 55.

Speed, James, Attorney-General under President Lincoln; b. Jefferson county, Ky., March 11, 1812. His ancestors were early pioneers of Kentucky, and prominent promoters of all measures that helped to build up the material interests of the new territory. He was graduated from St. Joseph's College, Bardstown, Ky., in 1828, and was for a time clerk in the circuit and county courts. He studied law at Transylvania University, was admitted to the bar and began practice at Louisville in 1833, becoming one of the most distinguished jurists in Kentucky, occupying for a time the position of professor of law in the Louisville University. His well-known opposition to slavery prevented him from having any strong political influence in pro-slavery days, but his consistent and upright course brought him a great measure of public esteem and confidence. In 1841 he was elected to the State Legislature, but in 1849 he suffered a defeat in the state constitutional convention as the "emancipation" candidate against James Guthrie, candidate for the pro-slavery party. In the discussions that ensued in Kentucky upon the question of secession, Mr. Speed threw the weight of his influence on the Union side, and to his earnest efforts is largely ascribed the decision of the state convention against secession. On the breaking out of the war, President Lincoln, who had been the life-long friend of Mr. Speed's family, called upon him to assist in organizing the national troops in his native state, making him mustering officer of volunteers for the first call for 75,000 men in 1861. July 1863, he was selected by President Lincoln as the successor of Edward Bates as Attorney-General, which position he resigned after the death of Mr. Lincoln, not being in accord with President Johnson's administration. He died at his home in Kentucky, June 25, 1887.

Speight, Jesse; b. Greene County, N. C., Sept. 22, 1795; received a public school education; served several terms in both branches of the state legislature, and for a number of years was speaker of the house; elected a Representative from North Carolina to the 21st, 22nd, 23rd, and 24th Congresses as a Democrat; moved to Plymouth, Miss., and elected to the state house of representatives and chosen speaker; elected a United States Senator from Mississippi as a Democrat, serving from Dec. 1, 1845, to May 1, 1847, when he died, at Columbus, Miss.

Speight, J., correspondence regarding interference in elections, 1315.

Spencer, John Canfield, Secretary of War and the Treasury under President Tyler; b. Hudson, N. Y., Jan. 8, 1788; graduated from Union College in 1806; studied law, and in 1809 began practice at Canandaigua, N. Y.; served in the war of 1812; postmaster at Canandaigua; assistant attorney-general for the western part of New York in 1815; elected a Representative from New York to the 15th Congress as a Democrat; member of the state house of representatives 1820-21, and one year as Speaker; State Senator 1824-1828; again a member of the State House of Representatives in 1832; Secretary of State; appointed Secretary of War, Oct. 12, 1841, serving until March 3, 1843, when he was transferred to the Treasury Department, resigning May 3, 1844; died at Albany, N. Y., May 18, 1855.

Spencer, John C.:

Associate Justice Supreme Court,

nomination of, and reasons therefor, 2181.

Correspondence regarding Dorr's Rebellion, 2152, 2153, 2155, 2157.

Sprague, William, correspondence regarding Dorr's Rebellion, 2158.

Stanbery, Henry; lawyer; Attorney-General under President Johnson; b. New York City, Feb. 20, 1803; graduated Washington (Pa.) College, 1819; moved to Ohio and engaged in practice of law, 1824-46, and became the first attorney-general of Ohio, 1846-51; appointed Attorney General in Cabinet of President Johnson, 1866; died New York City, June 25, 1881.

Stanbery, Henry:

Counsel for President Johnson in impeachment proceedings, 3924.

Special commissioner to investigate administration in military division on Mississippi River, 3474.

Standley, John S., delegate to the Choctaws for treaty purposes, mentioned, 5668.

Stanly, Edward; b. Newbern, N. C., about 1811; studied law and admitted to the bar; served three terms in the house of commons of the state legislature and one term as speaker; attorney-general of North Carolina in 1847; elected a Whig Representative to the 25th, 26th, and 27th Congresses; elected to the 31st and 32d Congresses; moved to California and practiced law; for a few months military governor of North Carolina in 1862, but resigned and returned to California; died at San Francisco, Cal., July 12, 1872.

Stanly, Edward, military governor of North Carolina, authority and action of, referred to, 3281.

Stanton, Edwin McMasters (1814-1869); jurist and statesman; b. Steubenville, Ohio; Attorney-General from December, 1860, until March, 1861; Secretary of War under Lincoln, 1862, and until his removal by Johnson, 1867; restored by the Senate in January, 1868; President Johnson's attempt to remove him again in February of the same year led to the President's impeachment; Stanton resigned on the acquittal in May, 1868; four days prior to his death he was made an associate justice of the Supreme Court.

Stanton, Edwin M.:

Correspondence of, relative to the restoration of peace, 3461.

Death of, announced and honors to be paid memory of, 4047.

Discussion of, and orders concerning the suspension of, as Secretary of War and transfer of records to Gen. U. S. Grant, 3754, 3781, 3801.

Negotiations for and correspondence regarding restoration of peace, 3461.

Stevens, Thaddeus (1793-1868); statesman; b. in Caledonia Co., Vt.; after studying law he removed to Gettysburg, Pa., 1816; entered the legislature of Pennsylvania; Whig member of Congress, 1849-53; changed his political views and was Republican member of Congress, 1859-68, becoming one of the leaders of the radical wing of that party; consistent opponent of slavery and an advocate of reconstruction; manager of the impeachment proceedings of President Johnson in 1868.

Stevenson, Adlai Ewing; politician and twenty-third Vice-President of United States; b. Christian Co., Ky., in 1835; removed to Bloomington, Ill., and was a member of Congress, 1875-77 and 1879-81; elected Vice-President with Cleveland, 1893-97, and was an unsuccessful candidate for re-election in 1900.

Stevenson, Andrew; diplomat; b. Culpepper Co., Va., 1784; admitted to the bar and became a representative in the legislature, 1804-20; member of the 18th to 23d Congresses from Dec. 1, 1823, to June 2, 1834, from Virginia; minister to Great Britain, 1836-41; died Albemarle Co., Va., June 25, 1857.

Stevenson, Andrew, minister to Great Britain:

Correspondence regarding—

Imprisonment of E. S. Greely, 1575, 1622.

Northeastern boundary. (See Northeastern Boundary.)

Nomination of, discussed, 1272.

Stewart, Alexander T.; merchant; b. Oct. 12, 1803, in Lisburne, near Belfast, Ireland; educated in Belfast and at Trinity College, Dublin, with the idea of entering the ministry, but the death of his father interfered with his plans and he went to New York in 1823; maintained himself as a tutor for some time, until by the death of his grandfather he inherited \$3,000 or \$4,000; with this capital he entered the drygoods business, and, in 1848, erected a marble building at Broadway and Chambers street in New York, which was for many years celebrated as the finest drygoods store in the country; at the outbreak of the civil war he was a multimillionaire, and in 1862 completed a stone and iron store building at Broadway and Tenth street, for his expanding business; by making large purchases he gained control of the cotton market, and, securing the output of several large woolen mills in New York and New England, he manufactured uniforms and clothing for the troops which were being hurried to the front; he became a warm personal friend of General Grant, and when the latter became President he tendered the position of Secretary of the Treasury to Mr. Stewart, and after his unanimous confirmation by the Senate it was found to be contrary to law to appoint a government contractor to a federal position; Mr. Stewart made many investments in real estate and at the time of his death owned the Grand Union Hotel at Saratoga Springs, and a large estate at Garden City, L. I., and was worth perhaps \$10,000,000; died April 10, 1876, in New York.

Stewart, Alexander T., nomination and confirmation of, as Secretary of Treasury, discussed, 3962.

Withdrawal of message, 3963.

Stewart, Charles:

Charges against, discussed, 847.

Stivers, Charles B., joint resolution declaring retirement of, from Army legal, etc., vetoed, 5526.

Stockton, Robert Field; naval officer; b. Princeton, N. J., Aug. 20, 1795; entered navy as midshipman Sept. 1, 1811, aboard the *President*; on duty with the Mediterranean squadron in the Algerine War; founded the colony of Liberia in West Africa; promoted to commander-in-chief of the Pacific squadron, October, 1845; with Col. John C. Frémont captured Los Angeles, Cal., Aug. 13, 1846, and established civil government; was elected Senator from New Jersey in 1851, and resigned in 1853; died at Princeton, N. J., Oct. 7, 1866.

Stockton, Robert F.:

Captain in Navy, nomination of, and reasons therefore, 1745.

Construction of the *Princeton* under direction of, referred to, 2130.

Stoddert, Benjamin, Secretary of the Navy under President John Adams, and for a short time acted as Secretary of War; b. in Charles County, Md., in 1751, a descendant of an old Scotch family. His grandfather settled in Maryland about 1675, and his father, Capt. James Stoddert, was an officer in the old French and Indian war, and was killed at the defeat of Gen. Braddock. Benjamin Stoddert was brought up as a merchant, but on the outbreak of the war of the revolution joined the army; was made captain of cavalry, and served actively and with distinction up to the time of the battle of Brandywine, when he held the rank of major. In that engagement he was severely wounded and was obliged to retire. He was secretary of the board of war, in which position he continued until the end of 1781. After the declaration of peace he settled in Georgetown, D. C., in business of general merchandizing, and was very successful. In May, 1798, he was appointed secretary of the navy by President Adams to succeed George Cabel, being the second to occupy that position, and the first to formate a naval force for the defence of the infant states. He continued in the naval department until March 4, 1801. Afterward for a time he was acting secretary of war. At the close of Adams' administration he devoted himself to settling his business affairs, which had been neglected, and he soon afterward retired to private life. He died in Bladensburg, Md., Dec. 18, 1813.

Stone, Claudius U.; b. Menard Co., Ill., May 11, 1879; educated in the public schools and later completed commercial and college courses; served as a corporal in Company K, Fourth Illinois Volunteer Infantry, for 12 months during the Spanish-American War. Four months of this time he spent in Cuba; in 1902 he was chosen county superintendent of schools of Peoria

County; in 1909 he was chosen president of the association of county superintendents of schools of the state; is state historian of the United Spanish-American War Veterans; studied law, was admitted to the bar and formed a partnership with Judge L. O. Bagleton; married in 1902 to Miss Genevieve C. Francis; elected to the 62d, 63d and 64th Congresses from Illinois.

Stone, William J.; b. May 7, 1848, in Madison County, Ky.; graduated from Missouril University, which later conferred upon him the degree of LL. D.; admitted to the bar in 1869; prosecuting attorney of Vernon County; Representative in the 49th, 50th and 51st Congresses; governor of Missouri, 1893-1897; elected to the United States Senate from Missouri for the term beginning March 4, 1903, and re-elected in 1909 and 1914, for term ending March 3, 1921.

Stone, William, report of, on slaughter of American citizens in South Carolina, transmitted, 4329.

Storer, George W., conduct of, referred to, 2528.

Straus, Oscar S.; diplomatist; b. Dec. 23, 1850, in Otterberg, Rhenish Bavaria; brought to America by his parents in 1854 and settled in Talbotton, Ga.; after three years the family moved to New York and established the importing house of L. Straus & Son; Oscar attended Columbia Grammar School two years and then entered Columbia College, graduating in 1871; began the practice of law in 1873; appointed Minister to Turkey by President Cleveland in 1887; reappointed by Presidents Harrison and McKinley; he was of great service to Christian missionary societies in securing for them privileges and immunities in Turkey; gained high favor from the Sultan, who offered to decorate him with the highest order of the empire, but was prevented by the law which forbids foreign representatives accepting presents; he has been the recipient of honorary degrees by several colleges.

Street, George F., correspondence regarding northeastern boundary. (See Northeastern Boundary.)

Stringham, Silas H., thanks of Congress to, recommended, 3284.

Stuart, Alexander H. H., Secretary of the Interior under President Fillmore; b. Staunton, Va., April 2, 1807; graduated from William and Mary College; studied law, and in 1828 began practice at Staunton; served in the state house of representatives 1836-1838; elected a representative from Virginia to the 27th Congress as a Whig; Presidential elector on the Clay ticket in 1844 and the Taylor ticket in 1848; Secretary of the Interior 1850-1853; member of the State Senate 1857-1861; delegate to the National Union convention in 1866; claimed to have been elected a Representative from Virginia to the 9th Congress, but not admitted to his seat; died at Staunton, Va., Feb. 13, 1891.

Stuart, Charles B., report of waterway, referred to, 3402.

Stuart, George H., member of Indian commission, 3077

Sullivan, John T., director of Bank of United States, nomination of, and reasons therefor, 1260.

Suloway, Cyrus Adams; b. Grafton, N. H., June 8, 1839; studied law, admitted to the bar in 1863; member of the New Hampshire house of representatives in 1872-73 and from 1887 to 1893, inclusive; elected to the 54th, 55th, 56th, 57th, 58th, 59th, 60th, 61st, 62d and 64th Congresses from New Hampshire.

Sumner, Charles (1811-1874); statesman, b. Boston, Mass.; after a period of foreign travel, 1837-40, he became a strong opponent of slavery; at first a Whig, he became a Free-Soiler in 1848, and was an unsuccessful candidate for Congress; elected United States Senator from Massachusetts by Free-Soilers and Democrats, 1851; re-elected as a Republican in 1857, 1863 and 1869; from 1856 to 1859 he was not in his seat in the Senate; was an ardent anti-slavery worker; chairman of foreign affairs, 1861, until his removal, 1871, for opposing Grant's scheme for annexing Santo Domingo; supported the Civil Rights Bill; and bitterly opposed Grant's re-election in 1872.

Newtown, Conn., Nov. 5, 1796; received a classical education; studied law, and in 1818 began practice at Hartford; State Attorney for Hartford County 1822-1825; elected a Representative from Connecticut to the 24th and 25th Congresses as a Democrat; defeated as the Democratic candidate for re-election; again attorney for Hartford County 1842-1844; defeated as the Democratic candidate for governor of Connecticut

cut in 1845, and again in 1846; elected to the Legislature; again defeated for governor in 1847; Attorney-General 1848-49; State Senator in 1850, and a member of the house of representatives in 1852; elected a United States Senator from Connecticut as a Democrat, serving from May 14, 1852, to March 3, 1857; Secretary of the Navy under President Buchanan 1857-1861; died at Hartford, Conn., July 30, 1869.

Tousig, Simon, claim of, to protection of United States, 2761.

Tower, Charlemagne, lawyer, coal operator and ironmaster, bibliophile; b. Paris, Oneida County, N. Y., April 18, 1809; educated at Chenango, Clinton and Utica academies; and graduated Harvard, 1830, where he was a classmate and intimate friend of Charles Sumner; studied law under Hermannus Bloecker of Albany; removed to Pennsylvania in 1848, and for twenty years was engaged in litigation over titles to coal lands; perfected title to the lands now owned by the Philadelphia and Reading railway; at the outbreak of the civil war he raised a company of volunteers, which he equipped and led to the front; became owner of large tracts of coal lands in Pennsylvania, and organized the Lehigh and Wilkesbarre Coal Co.; actively interested in building the Northern Pacific railroad; the crowning achievement of his life was the development of the valuable iron mines of the Vermilion Range in Minnesota; between 1875 and 1885 he acquired title to vast deposits of iron ore ninety miles northeast of Duluth, Minn., and seventy miles north of Lake Superior; though past seventy years of age he capitalized the undertaking himself and organized the Minnesota Iron Company and the Duluth and Iron Range Railroad Company; also built a 70-mile railroad from Lake Vermilion to Two Harbors, on Lake Superior; the first shipment of 68,000 tons of ore was made to Cleveland in 1884; soon the town of Tower sprang up on Lake Vermilion; in 1892, 600,000 tons of ore was shipped from the range; this proved to be one of the most valuable developments in the United States; these large mining and railroad properties were later absorbed by a large syndicate of which Mr. Tower was the head. He devoted much time to the collection of rare and valuable books, especially Americana, and formed the most complete collection of the colonial laws of America, which at his death, in Waterville, N. Y., July 24, 1889, was bequeathed to the Pennsylvania Historical Society. His son, Charlemagne Tower, Jr., served as Ambassador to Germany in 1902.

Towner, Horace M.; b. Belvidere, Ill., Oct. 23, 1855; educated at the public and high schools of Belvidere, Chicago University, and Union College of Law; married to Harriet Elizabeth Cole in 1887; admitted to the bar in 1877, and practiced law in Corning until 1890; elected judge of the third judicial district of Iowa in 1890, and served until Jan. 1, 1911; for ten years lecturer on constitutional law in the State University of Iowa, from which he received the degree of LL. B.; served as president of the Iowa State Bar Association; elected to the 62d, 63d, and 64th Congresses from Iowa.

Townsend, Charles Elroy; b. Concord, Jackson Co., Mich., Aug. 15, 1856; admitted to the Jackson bar to practice law in 1895; elected to the 58th, 59th, 60th,

and 61st Congresses from Michigan; nominated for United States Senator at the primaries in 1910 and elected by the legislature in 1911 for the term which will expire March 3, 1917.

Townsend, E. D., Asst. Adj.-Gen., signed order for release of Clement C. Clay, Jr., April 17, 1866.

Towson, Nathan, appointment of, to artillery discussed, 681.

Rejection of, discussed, 695, 702.

Tracy, Benjamin Franklin; Secretary of the Navy under President Benjamin Harrison; b. Owego, N. Y., April 26, 1830. His father, Benjamin, a man of marked integrity and enterprise, was a pioneer in the settlement of the southern tier of counties in the State of New York. Young Tracy began his education at the common school in Owego and entered Owego Academy where he studied for several years, acquiring an excellent English education. He then entered the law office of N. W. Davis, being admitted to the bar in May, 1851. November, 1853, as a candidate upon the Whig ticket, he was elected by a surprisingly large majority district attorney for Tioga county, at that time a democratic stronghold. He was re-elected in 1856. During the civil war he recruited two regiments, and as colonel took part in the battle of Spotsylvania, and later commanded the prison camp at Elmira, N. Y. In 1866, as United States District Attorney, he gave especial attention to the prevention of frauds by whiskey distillers, and drew up a law which resulted in increasing the revenue of distilled spirits from \$13,000,000 to \$50,000,000 in one year.

Tracy, Benjamin F., Secretary of Navy, mentioned, 5759.

Trenholm, George A., pardon applied for by, order regarding, 3550.

Trescott, William Henry; diplomat; b. Charleston, S. C., Nov. 10, 1822; graduated Charleston College, 1840, and admitted to the bar in 1843; appointed secretary of legation at London, 1852, and in 1860 was made assistant secretary of state; commissioner to revise the treaty with China in 1880, and to negotiate a commercial treaty with Mexico in 1882; died Pendleton, S. C., May 4, 1898.

Tribble, Samuel J.; b. in Franklin Co., Ga.; received college and legal education at the University of Georgia; located in Athens, Ga., engaged in the practice of law; elected to the 62d, 63d, and 64th Congresses from Georgia.

Tyner, James N.; Postmaster General under President Grant; b. Brookville, Ind., Jan. 17, 1826; received an academic education, graduating in 1844; spent ten years in business; studied law, and began its practice at Peru, Ind.; secretary of the State Senate for four successive sessions, commencing in 1857; Presidential elector in 1860; special agent of the Post-Office Department 1861-1866; elected a Representative from Indiana as a Republican to the 41st Congress at a special election (occasioned by the election of D. D. Pratt to the United States Senate), and re-elected to the 42d and 43d Congresses; appointed by President Grant governor of Colorado, but declined; accepted the position of Second Assistant Postmaster-General, serving from Feb. 26, 1875, to July 12, 1876, and Postmaster-General, serving from July 12, 1876, to March 3, 1877; appointed by President Hayes First Assistant Postmaster-General, serving from March 16, 1877, to his resignation in October, 1881; assistant attorney-general for the Post-Office Department 1889-1893, and from May, 1897, to 1903; delegate to the International Postal Congresses at Paris in 1878, and at Washington in 1897.

Uhl, Edwin F., Acting Secretary of State, 6018.

Underwood, Oscar W.; b. Louisville, Jefferson Co., Ky., May 6, 1862; was educated at Rugby School, Louisville, Ky., and the University of Virginia; moved to Birmingham, Ala., and began practice of law; elected to the 54th, 55th, 56th, 57th, 58th, 59th, 60th, 61st, 62d, and 63d Congresses from Alabama, and in 1914 elected to represent the state in the United States Senate.

Upshur, Abel Parker (1790-1844); statesman and cabinet officer; b. in Northampton Co., Va.; secretary of the navy under Tyler 1841-43; secretary of state to succeed Webster, 1843; representative of the extreme States-Rights and pro-slavery school of Southern politics.

Upshur, Abel P., death of, announced and honors to be paid memory of, 2132, 2186.

Usher, John Palmer, Secretary of the Interior under President Lincoln and Johnson; b. Brookfield, N. Y., Jan. 9, 1816. His descent is traced from Hezekiah Usher, who settled in Cambridge, Mass., about 1639, and purchased in England the press and type for printing Elliot's Bible. His great-great-grandfather was John Usher, lieutenant-governor of New Hampshire under Gov. Andros. Mr. Usher was admitted

to the supreme court of the state of New York, and as solicitor in the court of chancery in the same state Jan. 18, 1839. In 1840 he removed to Terre Haute, Ind., and was admitted to practice in the supreme court of the United States in 1859. In the meantime he served in the state legislature, and was for a short time attorney-general of the state under Gov. Morton. He was appointed first assistant secretary of the interior by President Lincoln March 20, 1862, and on the resignation of Caleb B. Smith, succeeded him as secretary Jan. 8, 1863, resigning his post May 15, 1865, one month after the inauguration of President Johnson. He then returned to the practice of his profession, and became, subsequently, consulting attorney for the eastern division of the Union Pacific Railroad Company. He died in Philadelphia April 13, 1889.

Usher, John P., treaty with Indians concluded by, 3394.

Utter, George H.; b. Plainfield, N. J., July 24, 1854; printer by trade and publisher of *Westerly Sun*; fitted for college at Alfred (N. Y.) Academy and Westerly High School; graduated from Amherst College in 1877; aide on staff of Gov. Bourn (1883-1885); member of Rhode Island House of Representatives (1885-89), the last year being speaker; member of the Rhode Island Senate (1889-1891); Secretary of State (1891-1894); lieutenant-governor in 1904 and governor in 1905 and 1906; elected to the 62d Congress from Rhode Island. Died in Providence, R. I., Nov. 3, 1912.

Vaca, Antonio, private land claim of, 4694.

Vallandigham, Clement Laird (1820-1871); Democratic politician; b. New Lisbon, Ohio; member of Congress, 1858-63; leader of the "Copperheads" of the North during the Civil War; arrested by United States under Burnside and banished to the Confederate lines, 1863, going thence to Canada; unsuccessful candidate for governor of Ohio, 1863; prominent at the national Democratic convention of 1863, and took a large part in the nomination of McClellan; in the Grant-Greeley contest of 1872 he proposed a union of all of the forces opposed to Grant.

Van Bokkelen, Mr., imprisonment and release of, by Haitian authorities, discussed, 4918.

Claim arising out of, 5369, 5545.

Van Buren, Martin, biography of, 1528.

Vanderbilt, Cornelius; financier; b. Port Richmond, Staten Island, N. Y., May 27, 1794; started business in 1811 by transporting government employees between New York City and Staten Island; in 1815 became part owner of a schooner and in 1815 captain of a canal boat running between New York and Philadelphia; later established steamboat lines on Long Island Sound and the Hudson River; and in 1851 established a route to San Francisco, via Nicaragua; in 1855 established a line of steamers between New York and Havre; sold all his steamboat interests in 1859, and bought stocks of New York railroads; elected president of New York Central Railroad in 1869; interested in Western Union Telegraph and other valuable stocks estimated to be worth \$60,000,000 to \$100,000,000; died New York City, Jan. 4, 1877.

- Walter, Squire**, act granting pension to, vetoed, 5419.
- Walworth, Reuben H.**, nomination of, as associate justice of Supreme Court, withdrawn, 2181.
- Wanamaker, John**; merchant and Postmaster-General under President Benjamin Harrison; b. Philadelphia, July 11, 1837. His grandfather was John Wanamaker, a farmer of Hunterdon County, N. J., a descendant of the Palatines who left Germany during the religious persecutions which raged from 1730 to 1740, and about 1815 removed to Dayton, Ohio, and shortly afterward to Kosciusko County, Ind., where he died. He left three sons, all of whom returned East and settled in Philadelphia County, Pa. John V. Wanamaker, the subject of this sketch, was the oldest of their seven children. He attended the Philadelphia public schools until 14 years of age, when he entered a retail store on Market street as an errand boy at a salary of \$1.50 per week. After he had served as stock boy, entry clerk and salesman in the largest clothing house in the city, he was chosen, in 1857, the first paid secretary of the Young Men's Christian Association, which office he resigned in April, 1861, to engage in the clothing business with his brother-in-law on a joint capital of \$3,500. The amount of the first day's sales at their store was \$24.67, and the business for the year \$24,125. His partner's health failing, most of the details of the business devolved upon Mr. Wanamaker. In May, 1869, Mr. Wanamaker established the house of "John Wanamaker & Co.," on Chestnut street. In 1875 he bought the Pennsylvania railroad freight depot, Thirteenth and Market streets, and when Dwight L. Moody visited Philadelphia in November of that year, fitted it up as a tabernacle, where from ten to twenty thousand persons daily listened to the great evangelist. In 1876 the depot was remodelled and opened as a bazaar for the sale of men's and boy's clothing, hats, shoes, etc. March 12, 1877, the establishment was reopened as a dry goods mart, to which have since been added millinery, upholstery, carpets, furniture, books, toys and almost every kind of goods that go to make up the stock of a general store, now the largest in the world. When asked for some part of his biography to be read to young men, he replied, "Thinking, trying, toiling and trusting is all of my biography." On receiving the first month's pay in his position as postmaster-general, he remarked to a friend: "This is the first salary I have earned for over twenty-five years; I do not know what I shall do with it." While he was postmaster-general Mr. Wanamaker provided quicker transmission of the mails by pushing the railway companies to new achievements in rapid transportation; he established sea post-offices, whereby foreign mail is distributed and made up aboard ship, and is ready for immediate transmission to inland cities on arrival at port; he improved the immediate delivery system, and urged the establishment of the postal telegraph service and parcel post.
- Warburton, Stanton**; b. Sullivan Co., Pa., April 13, 1865; graduated from the high school at Cherokee, Iowa, in 1881, and from Coe College, Cedar Rapids, Iowa, in

1888; moved to Tacoma, Wash., where he finished reading law and was admitted to the bar; elected to the Washington State Senate in 1896, and re-elected in 1900; elected to the 62d and 64th Congresses from Washington.

Ward, Frederick T., death of, while in military service of China, 3353.

Ward, John Elliot; diplomat; b. Sunbury, Ga., Oct. 2, 1814; admitted to the bar in 1835; solicitor-general of Georgia, 1836-38; member of legislature, 1839, 1845, and 1853; appointed minister to China, 1858, and resigned in 1861 because of his secession views.

Washington, Bushrod, commissioner to treat with Indians, nominations of, 250.

Washington, George, biography of, 33.

Washington, John, treaty with Indians concluded by, 2571.

Washington, Martha; the wife of the first President of the United States was b. Martha Dandridge, Kent County, Va., May, 1732. Descended from a highly respected Welsh clergyman her youth had every advantage of good birth, high social position and intercourse with refined society, and she was carefully trained in all the accomplishments common to young ladies of the period. She had an agreeable personality, a refined face and winning manners. In her seventeenth year she was married to Daniel Parke Custis. It was a love match and the young couple went to live at a plantation known as the White House, on the Pamunkey River, in Kent County. Three children were born of this union, and in a few years the eldest son and his father died, leaving Mrs. Custis and the two other children well provided for. Besides large landed estates her fortune included \$45,000 in money. She was still young and beautiful, and had many admirers. After three years of widowhood she was married to George Washington in the White House amid scenes of old-time Virginia hospitality amid a joyous assemblage of relatives and friends. Soon after the wedding the Washingtons went to live at Mount Vernon. During the Revolution Mrs. Washington spent the winters with her husband in his headquarters and the summers at Mount Vernon. Martha Custis, her daughter, died at the age of seventeen and John Custis, her son, died at the age of sixteen just after the close of the Revolutionary war, through which he served. Of the years in which she figured as the social head of the nation it is needless to speak. The elegant simplicity and the austere stateliness of the public entertainments of early official social life are familiar to all and the Washingtons led for eight years. Martha Custis Washington died in 1801, two years after her husband, and was buried beside him in the family vault at Mount Vernon.

Washington, Martha, resolution of Congress on death of husband, transmitted to, 290.
Reply of, 291.

Washington, Samuel T., resolution of Congress thanking, for sword of Washington and staff of Franklin, 2126.

Watkins, John Thomas; b. Minden, La., Jan. 15, 1854; studied law and was admitted to the bar, 1878; elected to the 59th, 60th, 61st, 62d, 63d, and 64th Congresses from Louisiana.

Wayne, Anthony, treaty with Indians concluded by, 181.

Weakley, Robert, commissioner to treat with Indians, nomination of, 620.

Weaver, James B.; soldier and politician; b. Dayton, Ohio, 1833; attained the rank of brigadier-general in the Civil War; sat in Congress from Iowa, 1879-81; nominee of the Greenback-Labor party for president, 1880, and of the People's party in 1892; from 1885 until 1889 he sat as a Greenback-Labor and Democratic member of Congress from Iowa.

Weaver, William A., court-martial of, 853.

Webb, Edwin Yates; b. Shelby, N. C., May 23, 1872; graduated Wake Forest College, 1893; studied law at University of North Carolina and at University of Virginia; began practice of law, 1894; elected state senator in 1900; elected to the 58th, 59th, 60th, 61st, 62d, 63d, and 64th Congresses from North Carolina.

Webber, Charles, arrest and imprisonment of, in Mexico, 4678, 4692.

Webster, Daniel (1782-1852); lawyer, statesman, and orator; b. Salisbury or Franklin, N. H.; prior to his removal to Boston in 1816, he was member of Congress, 1813-17; made a national reputation as a lawyer by winning the Dartmouth College case, 1818; member of Congress, 1823-27; United States senator, 1827-41; his famous reply to Hayne was made in 1830; opposed Calhoun, 1833; and Jackson on the Bank question; in 1836 he received the 14 electoral votes of Massachusetts for president; while Secretary of State, 1841-43, he negotiated the Ashburton treaty; from 1845 to 1850 he was United States senator for Massachusetts; opposed the Mexican War and the annexation of Texas; supported Clay in his compromise, 1850; Secretary of State again, 1850-52; and sought without success the Whig nomination for president in 1852; his famous orations include: the Plymouth anniversary, 1820; laying of the cornerstone of Bunker Hill monument, 1825; on the death of Jefferson and of Adams, 1826; on the dedication of Bunker Hill, 1843; and at the laying of the cornerstone of the addition to the Capitol in 1851.

Webster, Daniel:

Correspondence regarding Dorr's Rebellion, 2153.

Member of notification committee to

wait on President-elect J. Q. Adams, 858.

Mentioned, 2281.

Secretary of State, 1876, 2646.

Wright, Isaac H., naval agent, appointment of, referred to, 2272.

Wright, John C.; journalist; b. Wethersfield, Conn., in 1783; received a liberal education; printer; studied law, and began practice at Steubenville, Ohio; judge of the state supreme court; elected a Representative from Ohio to the 18th, 19th, and 20th Congresses; defeated for re-election; engaged in newspaper work and for some years proprietor of the *Cincinnati Gazette*; delegate to the peace congress; died at Washington, D. C., Feb. 13, 1861.

Wright, J. C., correspondence regarding removal of remains of the late President W. H. Harrison, 1906.

Wright, John V., member of Indian commission, 5579.

Wright, Joseph A.; diplomat; b. Washington, Pa., April 17, 1810; moved to Indiana, where he graduated from the University of Indiana; studied law, and in 1829 began practice at Rockville, Ind.; state representative in 1833 and a state senator in 1840; elected a representative from Indiana to the 28th Congress as a Democrat; defeated for re-election; governor of Indiana 1849-1857; minister to Prussia 1857-1861, and again appointed, serving from 1865 until his death, at Berlin, Prussia, May 11, 1867.

Yard, James, consul to Santa Cruz, nomination of, 90.

Yokum, William, report in case of, transmitted, 3412.

Young, Brigham; Mormon leader; b. Whitingham, Vt., June 1, 1801; joined the Latter-day Saints at Mendon, N. Y., in 1831. Possessed of great natural ability, developed by experience as a missionary and a religious organizer, he rose to prominence and at the death of Joseph Smith, in 1844, succeeded him as the head of the church. In 1846 he led the Mormon community from Nauvoo, Ill., to the Missouri River, which was then the frontier of the nation, and a year later led a company of pioneers across the great plains, over the Rocky Mountains, into "The Great American Desert." There he founded Salt Lake City, the first white settlement of the inter-mountain region and the nucleus of the present State of Utah.

In March, 1849, pending Congressional action upon their petition for a civil government, Brigham Young and his associates established the provisional State of Deseret. Congress denied the petition for a state government, and organized the Territory of Utah, with Brigham Young as Governor, appointed by the President of the United States. After serving a second term, he was succeeded in 1858 by Alfred Cumming, the first non-Mormon executive of the territory. Though no longer Governor, Brigham Young continued to wield great

Wright, Joseph A., compensation for, for attending International Agricultural Exhibition at Hamburg, Germany, recommended, 3398.

Wright, Obed, arrest and prosecution of, for murder of friendly Indians, 618.

Wright, Silas (1795-1847); statesman; b. Amherst, Mass.; began the practice of law at Canton, N. Y., in 1819; state senator, 1823-27, where he opposed De Witt Clinton; elected member of Congress, 1827-29; comptroller of New York, 1829-33; United States senator, 1833-34 and 1837-43, where he opposed the United States Bank and supported Clay's Compromise; declined the nomination for Vice-President, 1844; governor of New York, 1844-47; several cabinet and diplomatic offices were tendered him, but he refused all.

Influence, especially among the Mormon people. He died at Salt Lake City, Aug. 29, 1877.

Young, Brigham, governor of Utah:

Alleged rebellion under leadership of, discussed, 2986, 3034.

Referred to, 3013.

His power discussed, 2985.

Governor Cumming appointed in place of, 2986, 3034.

Young, James; b. July 18, 1866, at Henderson, Tex.; educated at the State University, Austin, Tex., graduating in June, 1891; with the degree of LL. B.; engaged in the practice of law when nominated for Congress, never having held public office; elected to the 62d, 63d and 64th Congresses from Texas.

Young, John J., captain in Navy, nomination of, 3478.

Young, Jonathan, commander in Navy, nomination of, to be restored to original position, and reasons therefor, 4002.

Young, Samuel B. M., operations of brigade under, around Santiago, Cuba, discussed, 6395.

Yulee, David L., imprisonment of, report on, transmitted, 3576.

Zantzinger, John P., captain in Navy, nomination of, and reasons therefor, 1745.

Zantzinger, William P., purser in Navy, nomination of, and reasons therefor, 6003.

Zepeda, Senor, treaty between United States and Nicaragua concluded by, 2572.

Zuloaga, Felix, supreme power in Mexico assigned to, 3094, 3175.

APPENDIX
